\* The mean population for the year is obtained as follows:—To the population at the end of the preceding year add four times the population on the 31st March of the year under review, twice the population on 30th June, four times the population on the 30th September and the population on the 31st December, and divide the total by 12, which is the method now in use throughout the Commonwealth of Australia. Each quarterly mean is arrived at by adding together the number of the population at the beginning and at the end of the quarter and dividing the sum so obtained by two. † Excess of departures over arrivals.

## No. 77.—Notes on the Climate of Western Australia for year ending 31st December, 1909.

(By the Commonwealth Meteorological Divisional Officer for Western Australia.)

In West Australia seasons are clearly defined, both as regards temperature and rainfall, January corresponding with the English July, thus our *Summer* months would consist of December, January, and February; *Autumn*, March, April, and May; *Winter*, June, July, and August; and *Spring*, September, October, and November; January being our mid-summer, and July our mid-winter; whilst March would commence Autumn, and September our Spring.

The annexed table shows the mean temperature, evaporation, and rainfall for several years at Perth for each of the seasons:—The temperature records extend over thirteen years; the evaporation eleven, and the rainfall thirty-four years.

PART IV.—INTERCHANGE.

No. 10.—GENERAL IMPORTS into the State of Western Australia during the Year 1909.

Duties on British and Foreign Imports are collected under the provisions of the Commonwealth "Customs Tariff Act, 1902" (Edwd. VII, No. 14).  
Note A.—On all British and Foreign Imports 10 per cent. has been added to the fair market value of the goods at port of shipment.  
Note B.—The "Quantities" columns are left blank in all cases where the quantities declared are packages of an irregular or unrecognised size, and consequently do not indicate the number, capacity, or weight of articles imported.

## PART V.—LAND SETTLEMENT, AGRICULTURE, AND LIVE STOCK.

No. 5.—Number of Holdings from which Returns were received for the Season 1909-1910, arranged in Acreage Series, and Total Area in acres, distinguishing Statistical Districts, Sub-Districts, and Areas of Western Australia.

NOTES.—1. The (rectangular) areas adopted, which are shown on the map attached to this part of the Statistical Register, are comprised within the sheet lines of the Standard Plans of the Survey Department. Being permanently fixed they are units that can be readily sub-divided and re-grouped at any future time into new districts and sub-districts, without impairing their use for comparative purposes. Except where the areas are broken by the sea coast or other causes, the area numbers here printed in black type represent areas of 8,437½ square miles each, whilst those printed in ordinary type represent areas of 987½ square miles each, and the sub-area numbers marked a, b, c, or d, as the case may be, represent areas of 234½ square miles each. 2. Areas in parentheses and marked with an asterisk (\*), are those for which the returns, if any, have been included in those of an adjacent area where the homestead is situated. In most instances, however, they are entirely unoccupied. Areas marked (+) are portions of areas only.

\* The acreages under "Vineyards" and "Orchards" have been compiled on the basis of the actual number of vines and fruit trees planted according to a standard suggested by the Department of Agriculture, which allows 600 vines or 100 fruit trees to the acre.

NOTE.—The figures in italics have been amended, it having been found from a comparison with the returns supplied last season, that the figures in some few instances previously given to the Collectors had been inadvertently duplicated.

## CROPS, SEASON ENDED 28TH FEBRUARY, 1910 (TABLES 12 TO 12F).

Notes.—1.—See Notes above Table No. 5. Except where the Statistical areas are broken by the sea coast or other causes, the area numbers here printed in black figures represent areas of 8,437½ square miles each, while those printed in ordinary type represent areas of 937½ square miles each, and the Sub-Area numbers marked a, b, c, or d, as the case may be, represent areas of 234½ square miles each. 2.—Areas in parentheses, and marked with an asterisk (\*), are those for which the returns, if any, have been included in those of an adjacent area where the homestead is situated. In most instances, however, they are entirely unoccupied. Areas marked (+) are portions of areas only. 3.—Average yields are given for Districts and Sub-Districts only.

Total Value of Imports of above specified produce											

\* In cases where blanks occur, the article, if importation took place during that year, was classified under some general heading, and not particularly specified.

NOTE.—This table has been compiled with the special object of showing the values of the importations into Western Australia during the last 10 years of such products of the soil and of live stock as could have been produced within the State, but are at present introduced to supply the deficiency in local production. It serves as a basis for calculations as to the market reasonably to be expected therein for home-grown products.

\* Children under the age of seven years are not criminally responsible; those who have attained that age, but are still under fourteen, are only criminally responsible if it is proved that at the time of the offence they were capable of knowing that they ought to have acted otherwise. In the above table, charges have been included concerning children under seven and over fourteen. Neglected children, formerly dealt with in this table, are now tabulated separately, see Tables Nos. 39 and 40.

\* Exclusive of cost of Administration. † Up to and including 1895 the numbers given are those of the "Assisted" or State-aided Denominational Schools. By "The Assisted Schools Abolition Act, 1895," all grants-in-aid to these were abolished from the 31st December of that year. Thereafter these schools ranked as "Private" schools, as distinguished from "Government" schools. The figures for 1896 and onwards include all private schools, secondary as well as primary, though one of the former (the Perth High School) is subsidised by the State. The average attendance, and, consequently, the percentage of attendance to enrolment at these schools from 1896 is partly estimated, some of the returns forwarded being obviously incorrect. ‡ Not ascertained previous to 1897. § Including schools closed during the year. a From and including 1897 the percentage of attendance to enrolment has been calculated on the basis of "average attendance" to "average enrolment." b Including one undenominational school, particulars of which are not included in next three columns. c Year ended 30th June.

NOTES.—Denominations.—When two or more Religious Denominations authorise the same Instructor or Instructors to give religious instruction, the children who attend such are entered in Records and Returns as if each such denomination formed a separate and distinct class.

\* For convenience sake, the heads of the Methodist, Presbyterian, Congregational, and Baptist Churches have agreed that clergymen belonging to any one of these denominations may be considered as the authorised delegate of the other three. Therefore, the attendance by a clergyman is credited to the denomination whose minister imparts instruction. † Special religious instruction has been given in 279 distinct schools.

\* The monthly barometer mean readings since 1885 are taken from the 9 a.m. and 3 p.m. daily readings. Prior to that the mean of the noon readings was used as the monthly mean. Correction for Gravity—0.04 has not been applied above. † Readings omitted on account of being unreliable. ‡ The thermometers were moved in August, 1885, to their present position in the Botanic Gardens, and as they have apparently given a slightly lower record since then, the means have been taken from 1886 only.

## SUMMARY OF STATISTICS

[illegible]

<sup>a</sup> From the first settlement of the colony up to the year 1837 there were no Blue Books issued, and the figures relating to arrivals and departures, shipping, imports and exports were taken either from the reports of the Harbour Master at Fremantle or from the Perth newspapers of that period. From 1838 to 1859, inclusive, the Blue Books give only the excess of arrivals over departures, or vice versa. No records obtainable. <sup>b</sup> Including allowance of 5 per cent. for unrecorded departures. <sup>c</sup> The figures for 1863 and subsequent years are for year ended 30th June. <sup>d</sup> Exclusive of Unclaimed Depositors' Fund, which for previous years have been included, but including figures relative to the Schools Savings Bank, which provision did not previously exist. <sup>e</sup> Derivational figures.

### SUMMARY OF STATISTICS.

[illegible]

*a* Year ended 30th June, except in case of Private Railways, the figures for which are for the calendar years. *b* Half-year ended 30th June. *c* No public debt. *d* The exact amounts of the Sinking Fund on 31st December in years previous to 1882 are not readily available. *e* At the end of the year referred to.

<sup>a</sup> The exports upto the year 1894 consisted only of supplies to shipping, of which no record was kept. <sup>b</sup> No records obtainable.

which comprises gold received at the Perth Mint. <sup>c</sup> Records of Outward Shipping for several years are not available, and for such years, therefore, the same figures are shown as for Inward Shipping. Where, occasionally, the correct outward figures have been found recorded, they naturally clash with the system adopted for the other years.

\* Total Gold Export is included in Table No. 3, "Gold Production," page 7.
