† Decrease. Note that the apparent decrease in existing "Endowments" of the Australian Catholic Assurance Coy. Ltd. is due to the previous improper inclusion of "Endowment Assurance" under "Endowments" instead of under "Assurance (including Endowment Assurance)". The increase in the latter is thus correspondingly exaggerated.

PART IV.—INTERCHANGE.

I.—TRADE AND CUSTOMS FOR THE YEAR 1934-35.

It should be noted in the tables dealing with Trade which follow that Imports from Abroad are recorded in terms of British Currency, whilst all other values are expressed in terms of Australian Currency, except in Table No. 2, wherein all values have been estimated in terms of Australian currency. On page 102 a Special Summary Table (No. 9) shows the Estimated Balance of Trade after all values have been reduced to approximate terms of Australian Currency, and allowance made for Gold in excess of current production shipped abroad.

No. 5.—IMPORTS into the State of Western Australia during the Year ended 30th June, 1935.

NOTE A.—On all Imports 10 per cent. has been added to the F.O.B. value of the goods at port of shipment.

NOTE B.—The "Quantity" columns are left blank in all cases where the quantities declared are packages of an irregular or unrecognised size, and consequently do not indicate the number, capacity, or weight of articles imported.

TRADE CLASSIFICATION.

Owing to the grouping of the Import Items into Classes, in lieu of the alphabetical system followed prior to 1918-19 by the Customs Department, it has been decided to insert, for the convenience of the public, a résumé of the classes, together with a slightly condensed index of the items in alphabetical order.

No. 9.—Summary of Western Australian Trade, Year ended 30th June, 1935.

In the Summary hereunder, Exchange is added to the declared value of Oversea Imports, thus expressing the latter in terms of Australian Currency in common with all other declared values.

A deduction is also made on account of Gold shipped in excess of Current Production, so that only Gold won during the year under review is credited in arriving at the *Net Visible Balance of Trade* for the year.

No. 35.—Transactions of the Fremantle Harbour Board during the undermentioned Periods.

NOTE.—The expenditure bases of the two Corporations are not the same. The Fremantle Harbour Trust employs all labour engaged in handling cargo on the wharves, whereas in the case of the Bunbury Harbour Board, general cargo is handled by the Railway Department for and on behalf of the Board, and bulk cargo by the Stevedores, and no revenue (other than wharfage) is derived therefrom or expenditure thereon incurred.

† In accordance with the Financial Agreement between the Federal and State Governments an adjustment of Capital and Sinking Fund Accounts of the Fremantle Harbour Trust took place in 1929-30, and in those of the Bunbury Harbour Board during 1931-32.

Fremantle Harbour Trust.—The Capital Account was reduced by the redemption of the Sinking Fund Account, as at 30th June, 1927, £337,176 (this being the net amount of contributions without allowance for interest); additions to Capital during that year were £217,789, making a net reduction of £119,386 for the year 1926-30.

Bunbury Harbour Board.—The Capital Account was reduced by the redemption of the Sinking Fund Account, as at 30th June, 1930, £22,718 (this being the amount of contribution *nil* allowance for interest); additions to Capital during that year were £46 and deductions £688 making a net reduction of £23,356 for the year 1931-32.

Sinking Funds are now based on the terms of the new agreement.

NOTE.—In addition to the above figures the following particulars were also obtained :—Acreage Planted Forest Trees, 4,480 acres ; Lands farmed on the "Share System" : For Cultivation, 51,518 acres.
* The reason why Returns relative to certain alienated and leased lands are not obtained under the Statistia Act is mainly to be found in the fact that it has proved impracticable for the Statistical Collectors to enforce the provisions of the Act in connection with lands which remain *entirely unimproved or unstocked*, and also in a lesser degree to the fact that small holdings under one acre in extent are exempted from supplying Returns. The Statistical returns are, however, collected from all lands over one acre in extent on which improvements have been effected, and upon which Agricultural or Pastoral pursuits are carried on, and, therefore, comprise all lands the obtaining of Returns from which would serve any practical purpose.

No. 47.—Value of Production, 1934-35.

- (I.) *Gross Value* is the value placed on recorded production at the wholesale price realised at the principal market, which in respect to the greater portion of primary products is the F.O.B. export price. In cases where primary products are absorbed as raw material for secondary industries, the point of disposal to factories is considered the principal market.
- (II.) *Marketing Costs* include freight, cost of containers, commission and other handling charges incidental thereto.
- (III.) *Local Value*.—The deduction of Marketing Costs from the gross price realised gives Local Value.
- (IV.) *The value of goods consumed in the process of production* covers seed and fertilisers used, picking, sprays, dips, fodder consumed, and similar costs.
- (V.) *Net Value* represents the return to the producer.
- (VI.) To secure a proper appreciation of the value of production as presented below, it is well to keep in mind the following considerations:—The sum of the gross values of the several agents of production contains substantial duplications. The total price realised for a season's wheat, for instance, includes costs of transport, commission and other handling charges, which items form the incomes of those performing these services. Similarly, the Local Value includes the value of fertiliser, etc., used, which item will have been included in the value of manufactured production. Again, fodder grown and valued as an agricultural product would also, if fed to milch cows, be reflected in the value of dairy production. When, however, the *net* values are being ascertained, the value of such fodder consumed is deducted as a cost against dairying, thus eliminating duplication. Thus, while Gross Value represents a very accurate estimate of the value of the production of any particular industry, *only Net Values should be aggregated in arriving at a total value of all recorded production*. The ratio of Marketing Costs to Gross Value of Production varies greatly as between industries. Thus, the great bulk of forestry production sustains no marketing costs, as the logs form the raw material for a secondary industry (saw-milling) without being "marketed." For this reason all forest products were valued prior to the year 1933-34 at place of production before any marketing costs were incurred. Since 1933-34, however, marketing costs and cost of goods consumed in the process of production have been taken into account where actually incurred. In any case, the statement of net values is not affected and is comparable throughout.
- (VII.) *Manufacturing*.—The value of Manufacturing is on a somewhat different basis. Factory output is valued as at the factory door and roughly corresponds to the Gross Value used in respect to primary industry. The contribution of the manufacturer to production, however, is the value added in the process of manufacture. To arrive at this value it is necessary to deduct from the value of total output the value of raw materials used as well as power and light consumed. The resultant value then corresponds with the net values as used in respect of primary production.

No. 34.—Mid-Monthly Employment in Western Australian Factories (a).

Index numbers representing the Trend of Employment, compiled on the basis of monthly returns specially collected from establishments which together furnish approximately 36 per cent. of the total employment in Secondary Industries.

The Annual Mean Employment for the year 1929-30 has been taken as a base equalling 100. The index number for 1930-31 fell to 77. The indices in the table hereunder show the fluctuations in the Number of Employees on the Pay Roll on or about the 15th day of each month, from July, 1931, to March, 1936.

STATISTICAL VIEW OF THE PROGRESS OF WESTERN AUSTRALIA, 1829 TO 1934-35.

Note.—Prior to the year 1837 no Blue Books were issued, and figures relative to arrivals and departures, shipping, imports and exports have been taken either from the reports of the Harbour Master at Fremantle or from Perth newspapers of the period. From 1838 to 1859, inclusive, migration figures show only the excess of arrivals over departures or *vice versa*.
