(a) 2,000 lb.

(b) Excludes railway sleepers.

4. Imports from the United Kingdom and Competing Countries.—Since 1908, permanent resident Commissioners appointed by the British Board of Trade have been located in Australia for the purpose of advising manufacturers and merchants in the United Kingdom with regard to Australian trade affairs. From 8th August, 1907, the Commonwealth Customs Tariffs have provided preferential rates of customs duties on certain goods the produce or manufacture of the United Kingdom, with the object of assisting the British manufacturer to retain or improve his position in this market in relation to other countries. The main provisions in these Acts relating to preference are dealt with on previous pages in this chapter.

In an investigation into the relative position occupied by the United Kingdom in the import trade of Australia, the comparison must, of course, be restricted to those classes of goods which are produced or manufactured in the United Kingdom. Imports into Australia include many commodities, such as tea, rice, raw coffee, unmanufactured tobacco, petroleum products, copra, timber, etc., which the United Kingdom cannot supply. These items, in addition to others not available from that country, have therefore been omitted from the following table.

The imports into Australia have been classified under nine headings, and the trade of the United Kingdom therein is compared with that of France, the Federal Republic of Germany, Japan, and the United States of America. These countries have been selected as the principal competitors in normal times with the United Kingdom for the trade of Australia under the specified headings. Totals for each of the years 1959–60 to 1961–62 are shown in the following table.

**VALUE OF IMPORTS FROM THE UNITED KINGDOM AND ITS MAIN  
COMPETITORS: AUSTRALIA**  
(£A.'000 f.o.b.)

Nature of imports	Year	United Kingdom	France	Federal Republic of Germany	Japan	United States of America	All countries

(a) Includes outside packages.

VALUE OF IMPORTS FROM THE UNITED KINGDOM AND ITS MAIN  
COMPETITORS: AUSTRALIA—*continued*.  
(£A.'000 f.o.b.)

Nature of imports	Year	United Kingdom	France	Federal Republic of Germany	Japan	United States of America	All countries
PERCENTAGE DISTRIBUTION							
Total, competitive imports	1959-60	44.5	1.9	7.2	5.9	16.7	100.0
	1960-61	38.4	1.9	7.4	7.7	20.9	100.0
	1961-62	37.4	1.5	7.4	7.2	21.3	100.0
Total imports (less bullion and specie) (a)	1959-60	35.7	1.5	5.8	4.5	16.2	100.0
	1960-61	31.3	1.5	6.1	6.0	20.0	100.0
	1961-62	30.1	1.3	5.9	5.6	19.7	100.0

(a) Includes outside packages.

The principal classes of competitive imports are metals, metal manufactures and machinery (value £315,338,000 in 1961-62) and manufactured fibres, textiles and apparel (value £104,204,000 in 1961-62). The value of goods included in these two groups represented 68.4 per cent. of the total value of competitive commodities during 1961-62.

### § 11. Trade with Eastern Countries

1. *Merchandise Trade According to Countries.*—The values of imports from, and exports to, eastern countries during the years 1959-60 to 1961-62 are shown in the following table.

(a) 2,000 lb.

(b) Not available.

(c) Quantity in terms of greasy wool.

A graph showing exports in principal commodity groups in each of the years 1952-53 to 1961-62 will be found on page 536.

4. **Imports of Merchandise and Bullion and Specie.**—The table hereunder shows the value of imports into Australia during each of the years 1957-58 to 1961-62, grouped under the headings—Merchandise, and Bullion and Specie. The imports of merchandise are shown under the sub-headings of "free" and "dutiable" goods.

**VALUE OF EXPORTS OF MERCHANDISE, AND BULLION AND SPECIE:**  
**AUSTRALIA**

(£A.'000 f.o.b.)

Year	Merchandise			Bullion and specie	Total imports
	Free goods	Dutiable goods	Total		
1957-58.. ..	426,206	363,055	789,261	2,679	791,940
1958-59.. ..	464,274	330,114	794,388	2,211	796,599
1959-60.. ..	509,824	414,704	924,528	2,563	927,091
1960-61.. ..	576,277	509,054	1,085,331	2,246	1,087,577
1961-62.. ..	496,798	385,748	882,546	2,200	884,746

5. **Exports of Merchandise and Bullion and Specie.**—The next table shows the value of exports from Australia during each of the years 1957-58 to 1961-62, grouped under the headings—Merchandise, and Bullion and Specie. The exports of Australian produce and re-exports are shown separately.

**VALUE OF EXPORTS OF MERCHANDISE, AND BULLION AND SPECIE:**  
**AUSTRALIA**

(£A.'000 f.o.b.)

Year	Merchandise			Bullion and specie			Total exports
	Australian produce	Re-exports	Total	Australian produce	Re-exports	Total	
1957-58 ..	795,527	14,776	810,303	7,626	17	7,643	817,946
1958-59 ..	790,165	16,540	806,705	4,744	14	4,758	811,463
1959-60 ..	907,971	17,988	925,959	11,716	7	11,723	937,682
1960-61 ..	901,809	26,232	928,041	40,797	5	40,802	968,843
1961-62 ..	1,041,339	26,546	1,067,885	9,385	14	9,399	1,077,284

6. **Imports and Net Customs Revenue.**—The ratio of net customs revenue collected, excluding net primage, to the total value of all merchandise imported in each of the years 1957-58 to 1961-62 was as follows:—1957-58, 8.8 per cent.; 1958-59, 8.8 per cent.; 1959-60, 8.9 per cent.; 1960-61, 9.2 per cent.; and 1961-62, 9.4 per cent. Primage duty was in force during these years, and if this is added to net customs revenue the percentages become:—1957-58, 9.1 per cent.; 1958-59, 9.0 per cent.; 1959-60, 9.1 per cent.; 1960-61, 9.4 per cent.; and 1961-62, 9.6 per cent. The ratios of net customs revenue, excluding primage, to the total value of dutiable goods only were:—1957-58, 19.1 per cent.; 1958-59, 21.0 per cent.; 1959-60, 19.9 per cent.; 1960-61, 19.5 per cent.; and 1961-62, 21.5 per cent. The calculations are based on Australian currency values and on the assumption that the value of clearances approximated to the value of imports during the same period. For particulars of customs revenue collections see Chapter XXI. Public Finance.

### § 14. Ships' and Aircraft Stores

The value of ships' and aircraft stores, which are excluded from the export figures, is shown in the following table for each of the years 1957-58 to 1961-62, with separate figures for oils.

#### VALUE OF STORES LOADED ON OVERSEA SHIPS AND AIRCRAFT: AUSTRALIA (£A. '000 f.o.b.)

Item	1957-58	1958-59	1959-60	1960-61	1961-62
Oils .. .. .	8,383	6,704	7,817	8,937	7,819
All stores (including oils) ..	12,798	10,876	12,413	14,205	13,324

In addition to oils, the principal items supplied to oversea ships and aircraft in 1961-62 were:—Meats, £1,549,720; fruit and vegetables, £459,189; eggs, £182,846; butter, £115,345; ale, porter, beer, etc., £402,590; sea food, £194,851; flour, £48,206; rice, £28,655; milk and cream, £45,072; tobacco and cigarettes, £253,538.

### § 15. Movement of Bullion and Specie

1. Imports and Exports.—The following table shows the values of gold and silver bullion and specie, and of bronze specie, imported into, and exported from, Australia during each of the years 1959-60 to 1961-62.

#### VALUE OF OVERSEA TRADE OF AUSTRALIA IN BULLION AND SPECIE (£A. f.o.b.)

Item	Imports			Exports

## § 16. Exports According to Industries

1. Classification.—The following table provides an analysis of the total recorded value of Australian exports for the years 1959–60 to 1961–62. This analysis is designed to show fluctuations in the value of exports of Australian produce dissected according to the main industry of their origin, although any such classification is necessarily arbitrary in some respects.

## VALUES OF EXPORTS OF AUSTRALIAN PRODUCE: INDUSTRIAL GROUPS

Industrial group	Value (£A.'000 f.o.b.)			Proportion of value of exports of Australian produce (excluding gold) (Per cent.)		
	1959-60	1960-61	1961-62	1959-60	1960-61	1961-62
Agriculture, horticulture and viticulture—						
Unprocessed .. ..	94,220	139,227	184,576	10.4	15.4	17.8
Processed .. ..	70,918	81,258	83,579	7.8	9.0	8.0
Total .. ..	165,138	220,485	268,155	18.2	24.4	25.8
Pastoral—

Processed .. ..	3,340	3,925	3,296	0.3	0.4	0.3
Total .. ..	3,959	4,511	3,903	0.4	0.5	0.4
Total Primary Produce—						
Unprocessed .. ..	571,097	565,935	671,499	62.8	62.7	64.5
Processed .. ..	227,490	216,900	234,304	25.0	24.0	22.5
Total .. ..	798,587	782,835	905,803	87.8	86.7	87.0
Manufactures .. ..	83,352	88,237	102,052	9.2	9.8	9.8
Refined petroleum oils .. ..	15,914	19,811	21,537	1.7	2.2	2.0
Unclassified .. ..	11,623	11,764	12,356	1.3	1.3	1.2
Total Australian Produce (excluding Gold) .. ..	909,476	902,647	1,041,748	100.0	100.0	100.0
Re-exports (excluding Gold) .. ..	17,994	26,236	26,559	..	..	..
Gold exports (a) .. ..	10,212	39,960	8,977	..	..	..
Total Recorded Value of Exports .. ..	937,682	968,843	1,077,284	..	..	..

(a) The value of refined newly-won gold was £16,770,000 in 1959-60, £16,203,000 in 1960-61, and £16,205,000 in 1961-62.

2. **Relative Importance of Industrial Groups.**—In the year 1961–62, Australian produce (other than gold) exported amounted to approximately £1,042 million. Of this, £906 million or 87 per cent. was mainly produce of primary industries, comprising £671 million of unprocessed produce and £234 million of goods which had been processed in some degree before export. The values of the principal individual items of processed Australian primary produce exported were:—Raw sugar, £33,191,000; flour, etc., £19,616,000; canned fruit, £11,919,000; dried fruit, £10,357,000; wool (scoured, tops, etc.), £41,996,000; canned meats, £10,519,000; butter, £23,537,000; milk (condensed, dried, etc.), £8,307,000; pig lead, £14,253,000; lead bullion, £4,183,000; zinc bars, blocks, etc., £6,387,000; copper ingots, £4,156,000; and undressed timber, £2,930,000.

The value of manufactures exported as classified above was £102 million, or approximately 10 per cent. of Australian produce (other than gold) exported in 1961–62. The values of principal individual items here included were:—Manufactures of metal, £58,573,000; implements and machinery, £10,315,000; drugs and chemicals, £6,998,000; and paper and stationery, £3,619,000.

The items enumerated indicate the arbitrariness of the line necessarily drawn between primary produce and manufactures in any classification of this kind. The value of processed primary products exported includes some element of value added by the simpler processes of manufacture, while the value shown for manufactures exported necessarily includes the value of raw materials (primary produce) used in those manufactures.

Refined petroleum oils exported are shown separately, as they consist of imported crude oils refined in Australia and re-exported in the refined form. The values of principal individual items shown as “unclassified” in 1961–62 were:—individual consignments of less than £50 in value, £4,753,000; and military equipment and stores and supplies for Australian projects overseas, £2,487,000.

### Export Prices and Price Indexes

Information on this subject, formerly included in this chapter, may now be found in Chapter XII. Labour, Wages and Prices.

## § 17. External Trade of Australia and other Countries

1. **Essentials of Comparison.**—Direct comparison of the external trade of any two countries is possible only when the general conditions prevailing therein, and the system of record, are more or less identical. For example, in regard to the mere matter of record, it may be observed that in one country the value of imports may be the value at the port of shipment, while in another the cost of freight, insurance and charges may be added thereto. Again, the values of imports and exports in one may be declared by merchants, whereas in another they may be the official prices fixed from time to time by a commission constituted for the purpose. In later years, moreover, a very substantial difference in the value of imports would result from the different methods of converting the moneys of foreign countries, i.e. from the application of current rates of exchange or of the mint par. Lastly, the figures relating to the external trade of any country are also affected in varying degree by the extent to which they include transit or re-export trade. This class of trade represents a much greater proportion of the trade of Switzerland and Belgium-Luxembourg than that of other countries. France and the United Kingdom also re-export largely, whereas in Canada, Australia and New Zealand the same class of trade represents a comparatively small proportion of the total.

2. **“Special Trade” of Various Countries.**—In the following table, the figures, which are expressed in Australian currency, relate as nearly as possible to imports cleared for home consumption in the various countries specified and to exports of their domestic products. It is to be noted, however, that these figures do not invariably denote the same thing throughout, since, in the United Kingdom and other manufacturing countries, raw or partly manufactured materials are imported as for home consumption and, after undergoing some process of manufacture or further modification, are re-exported as domestic production. Nevertheless, a comparison of this character reveals approximately the extent of the external trade which otherwise would not be manifest. The countries listed below are not necessarily all the important trading countries of the world, but those important countries for which comparable statistics are available. Information for countries other than Australia has been extracted from publications of the United Nations.

**VALUES OF IMPORTS CLEARED FOR HOME CONSUMPTION, AND EXPORTS OF DOMESTIC PRODUCTS (MERCHANDISE ONLY (a)): VARIOUS COUNTRIES, 1961**

(a) Includes silver. (b) f.o.b. (c) Covers goods imported less goods re-exported. (d) Covers goods imported as distinct from goods cleared for home consumption. (e) Year ended June, 1961.

### § 18. Oversea Trade in Calendar Years

For the purpose of comparison with countries which record overseas trade in calendar years, the following table has been compiled to show Australian imports and exports for each of the calendar years 1958 to 1962.

**VALUE OF OVERSEA TRADE IN CALENDAR YEARS: AUSTRALIA**  
(£A.'000 f.o.b.)

Year	Merchandise		Bullion and specie		Total	
	Imports	Exports	Imports	Exports	Imports	Exports
1958	792,891	738,913	2,541	4,083	795,432	742,996
1959	826,131	892,571	2,075	3,338	828,206	895,909
1960	1,056,842	874,585	2,389	40,577	1,059,231	915,162
1961	934,333	1,036,950	2,331	17,753	936,664	1,054,703
1962 (p)	1,009,935	1,048,498	2,237	5,367	1,012,172	1,053,865

### § 19. Excise

Although excise goods have no immediate bearing on overseas trade, the rate of excise duty is in some cases related to the import duty on similar goods. Moreover, as the Excise Acts are administered by the Department of Customs and Excise, it is convenient to publish here the quantities of Australian produce on which excise duty has been paid. Particulars of Customs and Excise revenue are shown in Chapter XXI. Public Finance. The following table shows the quantities of spirits, beer, tobacco, etc., on which excise duty was paid in Australia during the years 1960-61 and 1961-62.

## QUANTITY OF SPIRITS, BEER, TOBACCO, ETC., ON WHICH EXCISE DUTY WAS PAID: AUSTRALIA

## § 20. The Australian Balance of Payments

1. **Introduction.**—Estimates of a country's balance of payments are prepared for the purpose of providing a systematic record in money terms of the economic transactions which take place over a period between that country and all other countries. Such records are essential to the examination of influences which external factors have on the domestic economy. The Australian economy is subject to fairly large fluctuations in export income, and it is also affected in important respects by variations in the level of foreign investment and the demand for imports. Consequently, these estimates have always assumed particular importance in this country.

Official estimates of Australia's balance of payments covering the period 1928-29 to 1930-31 were included in the Appendix to Official Year Book No. 24, 1931. Except for the war years (1939 to 1945) estimates have since been published annually. Detailed estimates are currently provided twice yearly in the form of a mimeographed publication *Balance of Payments*. This publication brings the estimates forward to the end of the most recent financial year or half-year and, together with a printed volume *The Australian Balance of Payments, 1928-29 to 1950-51*, provides also a description of the various items included and the sources from which the information is obtained. A summarized statement of the principal current account items and some identified capital movements is prepared and issued on a quarterly basis in the *Balance of Payments—Quarterly Summary*.

The form in which the Australian estimates are presented follows the pattern originally adopted by the International Monetary Fund. In this presentation, a basic distinction is drawn between "current account" transactions and "capital account" transactions. Current account transactions are defined as those which involve changes in the ownership of goods or the rendering of services between residents of Australia and the rest of the world. They include such important items as exports, imports, shipping freights, dividends, profits and interest, travel and Government expenditure. The current account also includes transfers in the form of personal gifts and Government gifts of technical

assistance, for which there is no consideration. Capital account transactions are defined as those which involve claims to money and titles to investments between residents of one country and those of another country. Details are shown according to whether the items with which transactions are concerned are classified as assets or liabilities. For practical purposes, items are also broadly divisible into investment items (including oversea investment in companies in Australia and government loans), certain financing transactions, and monetary movements (including transactions with the International Monetary Fund and changes in the level of international reserves).

By definition, the balance of payments on current account is always equivalent to the balance on capital account. The net monetary movement is used as a control figure to which the net sum of all other figures must reconcile. However, errors and omissions occur in the estimation of the amounts involved in various items included in both current and capital accounts, and in addition there are timing differences between the statistical recording of trade transactions and certain invisible items, and the relevant foreign exchange transactions. Therefore, in order to preserve the identity between the total shown in the current account and the total shown in the capital account, it is necessary to introduce a "balancing item". The "balancing item" is included in the capital account, but, as mentioned above, it may include discrepancies in the current account, and it does not, as is frequently supposed, include only errors and timing differences related to investment and financing transactions.

Recent changes in the estimates include an adjustment for the estimated excess of the value of imports, as recorded in oversea trade statistics, over the actual selling price to the importer (see Appendix IV. *The Australian Balance of Payments 1957-58 to 1961-62*). Significant amendments to figures previously published for transportation items and changes in concept and presentation were made in the *Balance of Payments 1960-61 to 1961-62 and First Half 1962-63*. Information on these changes is provided in "Notes to Tables" and Appendix II. of that publication.

Details of the estimates are assembled from a variety of sources of which the following are the more important:—(i) statistics of exports and imports obtained from Australian trade statistics; (ii) details of the import valuation adjustment obtained from a sample of the invoices submitted to the Department of Customs in respect of imports into Australia; (iii) information on particular invisible current account items and capital movements obtained by regular inquiry from private organizations and Government departments; (iv) details of receipts and payments of foreign exchange provided by the banking system; (v) information on dividends remitted, undistributed income and private investment in companies provided by statistics of oversea investment collected by this Bureau; (vi) information on freight on imports and other items concerned with oversea shipping obtained from a sample of the invoices submitted to the Department of Customs in respect of imports into Australia and a survey of shipping operations conducted by this Bureau; and (vii) information on international reserves supplied by the Reserve Bank.

**2. Current Account.**—The balance of payments on current account is arranged to show a series of credit items and a corresponding series of debit items. In general, entries on the credit side include all current transactions which result in receipts of foreign exchange (for goods and services, investment income or donations), and on the debit side the similar transactions which result in payments of foreign exchange. The principal exceptions to this rule are the amounts shown for undistributed income. In respect of these amounts no movement of foreign exchange takes place, the amounts concerned being treated as credits or debits in the relevant sections of the current account, and as corresponding outflows or inflows in the relevant sections of the capital account. Exceptions also occur where debts incurred for current account items, principally goods, are subsequently capitalized.

The largest items shown in the current account are exports and imports, and the difference between them represents the balance of visible trade. This is the most important and usually the most variable relationship in the balance of payments. A full evaluation of the overall position on current account, however, occurs only after the invisible items have been taken into account. The most important of these are the transportation items. Entries appear on both the debit and credit sides, the principal component on the debit side being freight payable overseas on imports into Australia. The principal component on the credit side is expenditure by oversea carriers, which represents mainly oversea ships' expenditure for stevedoring, port charges, etc., incurred in loading and discharging goods at Australian ports, and stores purchased in Australia. The items next in importance are those concerning income from property. Debit entries under this heading include dividends, profits, interest and royalties, payable overseas, while the credit entries include similar details of amounts receivable by Australian residents. These items include undistributed income for which, as mentioned above, no monetary payments occur. The remaining items are smaller than those mentioned above, and include travel, government transactions, donations (including foreign aid made available by the Australian government), and on the credit side the net value of Australian gold production.

<i>Total Invisible Debits</i> .. ..	472.9	439.5	232.1
<b>Balance on Current Account</b> .. ..	-373.1	-4.0	-132.7

(a) The amounts shown represent the recorded trade figures adjusted for balance of payments purposes. Adjustments affect both coverage and valuation. (b) Total freight and insurance on imports, whether payable overseas or in Australia, is estimated at £139 million in 1960-61, £112 million in 1961-62 and £65 million in the first half of 1962-63.

NOTE.—Minus sign (—) denotes deficit.

3. **Capital Account.**—The capital account shows net movements in assets and liabilities. On the assets side, the most important item is Australia's holdings of monetary gold and foreign exchange, usually referred to as international reserves. On the liabilities side, the most important items are government loans, I.M.F. transactions and private investment in Australian companies.

Transactions with international monetary and finance agencies appear on both sides of the capital account. On the assets side, items 2 and 3 show increases in subscriptions to these institutions, and on the liabilities side, items 10 and 11 show corresponding increases in liabilities or changes in liabilities previously incurred. Liabilities comprise, on the one hand, bank balances and special non-negotiable, non-interest bearing securities (payable in Australian currency but convertible by arrangement into foreign currency or gold) related to capital subscriptions to the various agencies and, on the other hand, drawings from the International Monetary Fund.

Changes in overseas investment in companies by Australian residents are shown on the assets side of the capital account (items 6 and 7), and changes in investment in Australian companies by overseas residents are shown on the liabilities side (items 13 (part) and 14). Figures shown for marketing authorities (item 5) represent changes in the estimated value of commodity stocks held overseas or in amounts owed by overseas debtors to the principal Australian marketing authorities.

The balancing item includes errors and omissions and timing differences, referred to on page 568.

## CHAPTER XIV

### TRANSPORT AND COMMUNICATION

NOTE.—The statistics in this chapter relate in the main to the year 1961–62, with comparisons restricted to a few recent years. More detailed figures and particulars for earlier years are included in the annual bulletins, *Transport and Communication and Finance, Part I.—Public and Private Finance*, published by this Bureau.

Current information on subjects dealt with in this chapter appears in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics*, the *Monthly Bulletin of Registrations of New Motor Vehicles* and two preliminary monthly statements on *Registrations of New Motor Vehicles*.

### SHIPPING

#### § 1. Control of Shipping

1. **Commonwealth Navigation and Shipping Legislation.**—By section 51 (i) of the Commonwealth Constitution, the Parliament of the Commonwealth is empowered to make laws in respect of "Trade and commerce with other countries, and among the States". By section 98, this power is further defined as extending to navigation and shipping. Section 51 (vii) empowers the Commonwealth Parliament to legislate in respect of "Lighthouses, lightships, beacons and buoys" and section 51 (ix) in respect of "Quarantine".

A review of the introduction and development of the *Navigation Act* 1912–1950 was given in Official Year Book No. 40, pages 110–2. Amendments to the principal Act were made by the *Navigation Acts* of 1952, 1953, 1956, 1958 and 1961.

Other shipping Acts under the powers of the Commonwealth are the *Sea-Carriage of Goods Act* 1924–1961, the *Seamen's Compensation Act* 1911–1960, the *Seamen's War Pensions and Allowances Act* 1940–1961, the *Australian Coastal Shipping Commission Act* 1956, the *Australian Coastal Shipping Agreement Act* 1956 and the *Stevedoring Industry Act* 1956–1962.

The control of shipping during, and immediately after, the 1939–45 War and the establishment of the Maritime Industry Commission (abolished in 1952), the Australian Stevedoring Industry Board (replaced in 1956 by the Australian Stevedoring Industry Authority), and the Australian Shipping Board (replaced in 1956 by the Australian Coastal Shipping Commission) are described in Official Year Books No. 36, pages 121–30 and No. 39, pages 147–8.

2. **Australian Coastal Shipping Commission.**—This Commission was established in 1956 for the purpose of maintaining and operating interstate, overseas and territorial shipping services, and replaced the Australian Shipping Board. It operates the Australian National Line, a Commonwealth-owned merchant shipping service which, at 30th June, 1961, comprised 44 vessels totalling 192,191 gross tons. These included 15 vessels with a gross tonnage of 500 to 3,000; 13 vessels with a gross tonnage of 3,000 to 5,000; 14 vessels with a gross tonnage of 5,000 to 8,000; and 2 vessels with a gross tonnage exceeding 10,000—the bulk ore carriers *Mount Keira* (10,229) and *Mount Kembla* (10,112). The Commission has currently on order a 7,500-ton deadweight bulk carrier and a passenger/vehicular vessel of approximately 9,850 gross tons for operation between Sydney and Tasmania. The latter vessel will augment the service already being provided between the mainland and Tasmania.

by the *Princess of Tasmania*, the vehicular-container ship *Bass Trader* and the container vessel *South Esk*. Negotiations have also been completed to purchase a 21,400-ton dead-weight bulk carrier now on the stocks. This vessel will be the largest unit of the fleet, and is expected to be in service in 1964.

In the year ended 30th June, 1962, the *Princess of Tasmania* carried 86,792 passengers, 19,172 accompanied vehicles, 6,802 commercial vehicles, 2,795 trade cars and 317 mail vans.

**3. Australian Shipbuilding Board.**—(i) *Constitution and Functions.* Originally established in 1941 under National Security Regulations, the Board has been reconstituted a number of times since its inception, and in 1948 was constituted on a permanent basis under the control of the Minister for Shipping and Transport. The membership of the Board consists of a Chairman, who is the General Manager, a Deputy Chairman, a Finance Member and two other members, one of whom represents the Naval Board. The staff of the Board are employed under the *Public Service Act* as officers of the Department of Shipping and Transport.

The existing functions of the Board, which have been summarized in earlier issues of the Official Year Book, are set out in detail in regulation 22 (4) of the Supply and Development Regulations.

(ii) *Construction Programme.* From its inception to 30th June, 1962, the Board had arranged for the construction of 72 vessels totalling 461,236 deadweight tons. During the war, the Board was also responsible for the construction of numerous small craft and a 1,000-ton floating dock.

At 30th June, 1962, current orders placed by the Board were for the construction of 11 vessels totalling 115,612 deadweight tons. The vessels consisted of one 32,250 dw.t. oil tanker (completed in October, 1962), two 21,400 dw.t. bulk carriers, one bulk ore carrier of 16,400 dw.t., one 2,500 dw.t. passenger-cargo vessel, one 7,500 dw.t. general purpose bulk vessel, one passenger/vehicular vessel of 2,100 dw.t., one "seatainer" vessel of 5,400 dw.t., two roll-on roll-off vehicular traffic vessels of 3,250 dw.t., and one small vessel of 162 dw.t.

In addition, orders have since been placed by the Board for three new motor ships, each of 1,800 tons, for the Commonwealth Lighthouse Service, a survey vessel and a 90-ft. general purpose vessel for the Department of the Navy, two 56-ft. diesel tugs for the Department of the Army, one 76-ft. air/sea rescue vessel for the Department of Civil Aviation, and one 70-ft. launch for the Department of Customs and Excise.

**4. Australian Stevedoring Industry Authority.**—In March, 1947, legislation established a permanent Stevedoring Industry Commission to continue in peace-time the functions performed during the war by the Commission established under National Security legislation. In June, 1949, legislation was enacted to abolish the Stevedoring Industry Commission, on which employers and employees were represented, and established in its place a Stevedoring Industry Board of three members, which attended to administrative matters formerly under the control of the Commission, such as the operation of labour bureaux at ports, payment of attendance money and provision of amenities. The industrial functions which previously came within the province of the Commission were assigned to a single Judge of the Commonwealth Court of Conciliation and Arbitration. In August, 1956, following a Committee of Inquiry into the stevedoring industry, the Stevedoring Industry Board was replaced by the Australian Stevedoring Industry Authority of three members, including a representative of the management side of industry and a representative of the trade union movement. At the same time, the judicial and non-judicial functions formerly exercised by the Commonwealth Court of Conciliation and Arbitration were divided between the Commonwealth Industrial Court and the Commonwealth Conciliation and Arbitration Commission respectively. Awards of the Conciliation and Arbitration Commission subsequently placed payment of sick pay, public holiday pay and annual leave under the administration of the Authority. Under amending legislation which operated from 6th June, 1961, the Authority became responsible for payment of long service leave to registered waterside workers, and its disciplinary powers were strengthened to reduce the time lost through unauthorized stoppages. The statutory provisions regulating the industry are now contained in the *Stevedoring Industry Act 1956–1962* and in Division 4 of Part III of the *Conciliation and Arbitration Act 1904–1961*.

## § 2. System of Record

In the system of recording statistics of oversea shipping, Australia is considered as a unit, and therefore only one entry and one clearance are counted for each voyage, without regard to the number of States visited (*see also* § 4, p. 577).

On arrival at, or departure from, a port in Australia, whether from or for an oversea country or from or for another port in Australia, the master or agent must "enter" the vessel with the Customs authorities at the port, and supply certain prescribed information in regard to the ship, passengers and cargo. At the end of each month, the information so obtained is forwarded to the Bureau of Census and Statistics. This information relates, in the main, only to vessels engaged in the carriage of passengers and/or cargo between Australian States or between Australia and oversea countries.

The size of a vessel may be expressed in a number of ways. A vessel's gross tonnage, expressed in tons of 100 cubic feet, represents the total volume of the enclosed space, i.e. a ship of 25,000 tons has a total enclosed capacity of 2,500,000 cubic feet. Its net tonnage, expressed in tons of 100 cubic feet, represents the volume of enclosed space that can be used for cargo or passengers. Its displacement is its total weight and is expressed in tons of 2,240 lb. Its deadweight tonnage is the difference between the displacement of the vessel loaded to its summer deadline and the displacement light, i.e. it is the weight the vessel can carry, including the weight of bunkers and stores. Net tonnage is the concept generally used in the tables in this chapter, but since it can give a misleading impression of the size of ships which have a function other than carrying passengers and cargo (e.g. a tug has no net tonnage), some figures are given for deadweight tons and tons gross also.

Most of the cargo is recorded in terms of the ton weight of 2,240 lb. However, some additional cargo, mainly bulky commodities, is shipped and recorded on the basis of 40 cubic feet of space used representing one ton measurement.

Except in § 5. Shipping at Principal Ports (p. 580), intra-State (coastal) movements of vessels, including those of vessels engaged solely in trade within State limits, are excluded from the statistics in the following pages.

## § 3. Oversea Shipping

1. **Total Movement.**—The following table shows the number of entrances and clearances combined of oversea vessels at Australian ports, and the aggregate net tonnage, during each of the years 1957–58 to 1961–62.

**OVERSEA SHIPPING: ENTRANCES AND CLEARANCES (COMBINED) OF VESSELS DIRECT, AUSTRALIA**

Particulars	1957–58	1958–59	1959–60	1960–61	1961–62
Number of vessels .. .. .	5,254	5,463	5,945	6,778	7,210
Net tonnage .. .. . '000 tons	24,515	26,019	28,874	34,317	37,662

Particulars of the total oversea movement of shipping for each year from 1822 to 1920–21 were published in Official Year Book No. 15, page 507, and those for each year from 1921–22 to 1950–51 in Official Year Book No. 40, page 97.

2. **Total Oversea Shipping, States.**—The following table shows, for each State and the Northern Territory, the number of entrances and clearances of vessels direct from and to overseas countries, and the aggregate net tonnage, during the year 1961–62.

**OVERSEA SHIPPING: ENTRANCES AND CLEARANCES OF VESSELS DIRECT, 1961–62**

Particulars		N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	Aust.
Entrances	No.	1,257	567	472	244	943	72	44	3,599
	'000 net tons	6,471	3,851	1,746	1,039	5,399	268	84	18,858
Clearances	No.	1,067	504	698	294	979	28	41	3,611
	'000 net tons	5,881	3,446	2,672	1,217	5,362	135	91	18,804

3. **Shipping Communication with Various Countries.**—A vessel arriving in Australia from overseas is recorded as coming from the country where the voyage commenced, irrespective of the number of intermediate ports of call. Similarly, a vessel leaving Australia is recorded as going to the country where the voyage is scheduled to terminate.

The following table shows statistics of the net tonnage entered and cleared, with cargo and in ballast, according to the principal countries where vessels commenced or terminated their voyages to or from Australia.

**OVERSEA SHIPPING: COUNTRIES FROM WHICH ENTERED OR FOR WHICH CLEARED, AUSTRALIA**

Italy .. ..	532	532	656	Proportion of total %	14.0	17.3	25.4
Japan .. ..	779	907	859				
Netherlands .. ..	748	997	917	Grand Total .. ..	14,478	17,269	18,858

(a) Includes New Caledonia (47 during 1961-62).

The Australian tonnage which entered Australian ports from overseas during the year 1961-62 represented 1.8 per cent. of the total tonnage entered and was confined mainly to the New Zealand and Pacific Islands trade.

## § 4. Interstate Shipping

1. *System of Record.*—*Interstate Shipping* comprises two elements: (a) vessels engaged solely in interstate trade; and (b) vessels trading between Australia and overseas countries and in the course of their voyages proceeding from one State to another. (However, these vessels, except under special circumstances, do not engage in interstate carrying. Numerous overseas vessels obtain single voyage permits or exemptions under the *Navigation Act*. Such vessels include overseas tankers carrying petroleum products interstate, and, since the withdrawal of interstate passenger liners, other overseas vessels, under permit, carrying passengers and frozen cargo on the interstate run.) No complexity enters into the record of those in category (a), but with regard to the method of recording the movements of the overseas vessels (b), some explanation is necessary. Each State desires that its shipping statistics should show in full its shipping communication with overseas countries, but at the same time it is necessary to avoid any duplication in the statistics for Australia as a whole. In order to meet these dual requirements, a vessel arriving in any State from an overseas country—say the United Kingdom—via another State, is recorded in the second State as from the United Kingdom "Oversea via States", thus distinguishing the movement from a direct overseas entry. Continuing the voyage, the vessel is again recorded for the statistics of the third State as from the United Kingdom "Oversea via States". On an inward voyage, the *clearance* from the first State to the second State is a *clearance* interstate, and is included with interstate tonnage in conformity with the prefederation practice of the States, and to preserve the continuity of State statistics. Thus, movements of ships which are, from the standpoint of Australia as a whole, purely coastal movements, must for the individual States be recorded as "Oversea via States" or "Interstate" according to the direction of the movement. The significance of the record of these movements will be seen more clearly

from the following tabular presentation of the inward and outward voyages to and from Australia of an overseas vessel which, it is presumed, reaches Fremantle (Western Australia) and then proceeds to the terminal port of the voyage—Sydney (New South Wales)—via South Australia and Victoria. From the terminal port, the vessel will commence the outward voyage and retrace its inward track.

#### ITINERARY OF AN OVERSEA VESSEL ON THE AUSTRALIAN COAST

Particulars	Recorded as—		
	For the State and for Australia	For the States	
	1.	2.	3.
<b>Inward Voyage—</b>	<b>Overseas direct</b>	<b>Interstate direct</b>	
Enters Fremantle from United Kingdom			
Clears Fremantle for Adelaide .. ..			
Enters Adelaide from United Kingdom			
via Fremantle .. ..			Overseas via States

Enters Adelaide from Melbourne .. ..			
Clears Adelaide for United Kingdom via			Overseas via States
Fremantle .. ..			
Enters Fremantle from Adelaide .. ..		Interstate direct	
Clears Fremantle for United Kingdom ..	Overseas direct		

From the method outlined above, the requirements for Australia and for the individual States are ascertained as follows. (a) The aggregate of all ships recorded for each State as "Overseas direct" gives the overseas shipping for Australia as a whole; (b) the aggregate for all ships recorded in any State as "Overseas direct" plus those recorded as "Overseas via States" gives the total *overseas shipping* for that State; and (c) the aggregate for all ships recorded as "Overseas via States" may also be used, together with those recorded as "Interstate direct (including those engaged solely in interstate movement) to furnish figures showing the total *interstate movement* of shipping.

2. *Interstate Movement.*—(i) *Interstate Direct.* The following table shows the number of entrances and the net tonnage of vessels recorded into each State and the Northern Territory from any other State (including overseas vessels on interstate direct voyages as in column 2 above) during each of the years 1959–60 to 1961–62.

#### INTERSTATE MOVEMENT OF SHIPPING: ENTRANCES OF VESSELS INTERSTATE DIRECT

State or Territory	Number			Net tons ('000)

## § 6. Shipping Cargo

1. Oversea and Interstate Cargo.—(i) *Australia*. The table hereunder shows the aggregate tonnage of overseas and interstate cargo discharged and shipped at Australian ports for the years 1957–58 to 1961–62. Most of the cargo is recorded in terms of the ton weight of 2,240 lb., the remainder, mainly bulky commodities, being shipped and recorded on the basis of 40 cubic feet of space occupied representing one ton measurement.

### SHIPPING CARGO MOVEMENT: AUSTRALIA

('000 tons)

Year	Oversea cargo				Interstate cargo			
	Discharged		Shipped		Discharged		Shipped	
	Weight	Meas.	Weight	Meas.	Weight	Meas.	Weight	Meas.

**§ 7. Vessels Registered in Australia**

1. Australian-registered Trading Vessels.—The following table shows the number and gross tonnage of trading vessels of 200 tons and over registered in Australia at 30th June, 1962, classified according to—(i) year of construction, 1958 to 1962, and 1957 and earlier years, (ii) type of trade in which the vessels were engaged, and (iii) vessels built in Australian or in overseas shipyards. The statistics in this table have been compiled by the Commonwealth Department of Shipping and Transport. The *Merchant Shipping Act*, under which vessels are registered in Australia, does not make it compulsory to register vessels under 15 tons burden if engaged in river or coastal trade. Larger vessels are also exempt from registration if not engaged in trade. Yachts and small trading vessels may be, and frequently are, registered at the request of the owners.

## AUSTRALIAN-REGISTERED TRADING VESSELS, 30TH JUNE, 1962 (a)

Year of construction	Oversea and interstate vessels		Intrastate vessels		Built in Australian yards		Built overseas		Total	
	No.	Gross tons	No.	Gross tons	No.	Gross tons	No.	Gross tons	No.	Gross tons

<b>Total Registered in Australia ..</b>	<b>117</b>	<b>462,740</b>	<b>21</b>	<b>24,493</b>	<b>72</b>	<b>328,573</b>	<b>66</b>	<b>158,660</b>	<b>138</b>	<b>487,233</b>

(a) 200 gross tons and over.

Figures in this table relate to gross tons, and are therefore not comparable with those in the table following, which relate to net tons and to *all* registered vessels irrespective of tonnage and type.

2. **Vessels Registered.**—The following table shows the number and net tonnage of steam, sailing and other vessels on the register of each State and the Northern Territory at 31st December, 1962.

## VESSELS REGISTERED, 31st DECEMBER, 1962

State or Territory	Steam and motor		Sailing				Barges, hulks, dredges, etc., not self-propelled		Total	
			Propelled by sail only		Fitted with auxiliary power					
	No.	Net tons	No.	Net tons	No.	Net tons	No.	Net tons	No.	Net tons
New South Wales ..	304	43,709	28	2,047	130	1,618	11	1,439	473	48,813

South Australia ..	43	26,129	2	9	50	2,207	5	1,433	100	29,778
Western Australia ..	106	14,743	209	3,032	77	1,741	5	498	397	20,014
Tasmania ..	50	13,566	42	693	111	2,593	3	690	206	17,542
Northern Territory ..	..	..	16	154	11	227	..	..	27	381
Australia ..	713	288,340	361	7,235	493	10,200	44	11,101	1,611	316,876

3. **World Shipping Tonnage.**—At 1st July, 1962, the total steamships, motorships and auxiliaries of 100 gross tons and upwards throughout the world amounted to 38,661, with a gross tonnage of 139,979,813. Of these totals, steamships numbered 12,715 for 73,633,812 gross tons, motorships 25,124 for 66,195,558 gross tons, and auxiliaries 822 for 150,443 gross tons. Included therein were 4,922 oil tankers of 100 gross tons and upwards, with a gross tonnage of 45,303,702. Australian steamships, motorships and auxiliaries, 299 for 574,491 gross tons, constituted 0.77 per cent. and 0.41 per cent. respectively of the total number and tonnage. This information has been derived from *Lloyd's Register of Shipping*.

## § 8. Miscellaneous

1. **Lighthouses.**—A list of the principal lighthouses on the coast of Australia, giving details of the location, number, colour, character, period, candle-power and visibility of each light so far as particulars are available, will be found in *Transport and Communication*, Bulletin No. 46.

2. **Distances by Sea.**—The distances by sea between principal ports of Australia and some important ports in other countries which trade with Australia were published in Official Year Book No. 48, page 525.

3. **Shipping Freight Rates.**—The *Quarterly Summary of Australian Statistics* shows a list of the current freight rates for general merchandise in respect of both oversea and interstate shipments.

The following table shows the freight rates from Australia to various countries for certain important commodities at 31st December, 1962.

**OVERSEA SHIPPING FREIGHT RATES FROM AUSTRALIA TO VARIOUS COUNTRIES, 31st DECEMBER, 1962**

Interstate rates per ton weight or measurement for general cargo at 31st December, 1962, (expressed in Australian currency) were:—Sydney—Melbourne, 157s.; Sydney—Brisbane, 161s.; Sydney—Adelaide, 182s.; Sydney—Fremantle, 243s.; Sydney—Hobart, 147s.; Sydney—Darwin, 258s. 6d.

4. **Depth of Water at Main Ports.**—A table showing the depth of water available and tides at principal ports of Australia is published in the annual bulletin, *Transport and Communication*. For some major ports, information is given in Chapter XIX. Local Government.

5. **Shipping Casualties.**—Courts of Marine Inquiry are constituted by a magistrate assisted by skilled assessors, and, when necessary, are held at the principal port in each State and at Launceston (Tasmania). Such courts have power to deal with the certificates of officers who are found at fault. Particulars of shipping losses and casualties reported on or near the coast during each of the years 1958 to 1962 are shown in the table below.

**SHIPPING CASUALTIES TO OVERSEA AND INTERSTATE STEAM AND MOTOR VESSELS(a): AUSTRALIA**

6. **Ferry (Passenger) Services.**—For particulars of ferry passenger services operating in several States see page 608.

## GOVERNMENT RAILWAYS

1. **General.**—The policy of government ownership and control of railways has been adopted generally throughout Australia, and, although a number of private railways exist, most of them are light railways intended primarily to transport goods involved in the commercial operations of their owners. There are three main gauges in use in the several States (5 ft. 3 in., 4 ft. 8½ in. and 3 ft. 6 in.), but in recent years considerable progress has been made towards the standardization of main trunk routes (*see* para. 3 below).

In the tables in this division, details of the four lines owned by the Commonwealth are grouped and shown with the totals for the various State-owned systems. Separate particulars for each Commonwealth line and more detailed statistics for all lines are shown in the annual bulletin, *Transport and Communication*.

2. **Railway Communication in Australia.**—An account of the progress of railway construction in Australia since the opening of the first line in 1854 was given in Official Year Book No. 6, page 681, and in No. 22, page 259. The main ports on the mainland are connected by lines running approximately parallel to the coast and are the focal points of lines which radiate inland to the agricultural, mining and pastoral areas of the continent to a distance of up to 600 miles at some points. However, Darwin in the Northern Territory is not connected by rail to any other port. A 3 ft. 6 in. gauge railway extends southward from Darwin to Birdum, a distance of 317 miles, and from Port Augusta in South Australia a 4 ft. 8½ in. gauge railway of 217 miles extends northwards to Marree and thence as a 3 ft. 6 in. gauge of 540 miles to Alice Springs.

3. **Standardization of Railway Gauges.**—The first step towards uniform gauge railway communication between the capitals of the mainland States was effected in 1930 with the construction of the 4 ft. 8½ in. gauge line from Grafton to South Brisbane. The finance required for the construction was provided by the Commonwealth Government. For details of the agreement between the Commonwealth and New South Wales and Queensland, *see* Official Year Book No. 31, page 122. This line is operated by the New South Wales Railways, and details of operations in New South Wales are included with those of the New South Wales system. Details of operations on the Queensland portion are included with Queensland railway statistics unless otherwise specified.

In March, 1944, the late Sir Harold Clapp, Director-General of Land Transport, Commonwealth Department of Transport, and formerly Chairman of Commissioners, Victorian Railways, was requested by the Commonwealth Government to submit a report and recommendation regarding the standardization of Australia's railway gauges on the basis of a 4 ft. 8½ in. gauge. A summary of his report and recommendations, made in March, 1945, together with an outline of the agreement between the Commonwealth Government and the States of New South Wales, Victoria and South Australia regarding the standardization of railway gauges in their respective States, was published in Official Year Book No. 37, pages 146–9. The agreement, which was signed in 1946, was ratified by the Governments of the Commonwealth, of Victoria and of South Australia, but not by the New South Wales Government. After some time had elapsed and New South Wales had not ratified the agreement, the Commonwealth Government decided to enter into a separate agreement with South Australia, and the necessary legislation was enacted in 1949 by each Government concerned. The Commonwealth–South Australia Agreement provides for the same standardization work to be carried out in South Australia as would have been carried out had New South Wales ratified the original Commonwealth–Three States Agreement, and that the Commonwealth shall provide all funds required under the Agreement, with 30 per cent. of such moneys being repaid by South Australia over a period of years, while the Commonwealth shall meet the full cost of works on Commonwealth railways in South Australia.

At the request of the South Australian Government, an amendment to the Agreement was approved to enable, as an interim measure, the narrow gauge (3 ft. 6 in.) lines in the South–Eastern Division of the State railways system to be converted to the wide gauge (5 ft. 3 in.). This work was completed in 1959 at a cost of £5 million. Construction and conversion work on the Central Australian Railway between Stirling North and Marree, 216 miles, has been completed by Commonwealth Railways at a cost of £12.2 million, but other projects included in the Agreement have not yet been commenced. However, the Commonwealth Government has made available £50,000 to South Australia for

surveying the proposed Broken Hill to Port Pirie standard gauge line. In 1961, the Commonwealth undertook to provide £1.3 million, outside the Standardization Agreement, for the purchase of diesel-electric locomotives and ore wagons for use on the existing narrow gauge line on this route, the State to bear the cost of their subsequent conversion for operation on standard gauge track.

As a further step towards standardization, a Committee consisting of members of the Federal Parliament was formed in March, 1956, to ascertain whether a scheme confined to the main trunk routes would be desirable. This Committee recommended in October, 1956, that standard gauge (4 ft. 8½ in.) lines be provided from Wodonga to Melbourne, from Broken Hill to Adelaide via Port Pirie and from Kalgoorlie to Fremantle via Perth.

In 1962, the opening of a new uniform gauge line between Albury and Melbourne enabled the operation of through services between Sydney and Melbourne. An agreement on this project was reached between the Commonwealth and the two States, New South Wales and Victoria, whereby the Commonwealth would meet 70 per cent. of the cost of unification and the two States would share equally the remaining 30 per cent., with the Commonwealth advancing the whole of the necessary funds initially, and the States' portion, plus interest, being repayable over 50 years. Legislation was enacted by the Commonwealth and the two State Governments in three separate Acts assented to towards the close of 1958. Estimated total cost for the project is £15.5 million. The cost of operations of, and the revenue derived from, the line are based proportionately on a Sydney-Melbourne mileage basis. Details of operations are included in the statistics of the respective States.

In 1961, the Commonwealth and Western Australian Governments enacted legislation to enter into an Agreement to undertake certain standard gauge railway works, including the provision of rolling stock, in that State, at an estimated cost of £41.2 million. The proposal is linked with the establishment of an integrated iron and steel industry at Kwinana in Western Australia, and the new railway facilities will be used to transport iron ore from the Koolyanobbing deposits some 33 miles beyond Southern Cross. These railway facilities will also link Kalgoorlie with Perth and Fremantle by a standard gauge line. It has been agreed that the project has standardization and developmental components in approximately equal parts, and, initially, the Commonwealth will in effect provide finance for all of the standardization portion of the works and 70 per cent. of the developmental portion. The State will repay with interest over a period, 30 per cent. of the standardization costs and all the advance for developmental works. Work on the project commenced in 1962 and is planned to be completed by December, 1968.

4. **Mileage Open for Traffic, all Lines.**—The following table shows the route-mileage of Commonwealth and State lines open in each State and Territory at various periods since the inauguration of railways in Australia in 1854.

#### GOVERNMENT RAILWAYS: ROUTE-MILEAGE OPEN

(a) Portion of Victorian system. (b) Excludes 201 miles of 5 ft. 3 in. gauge line which roughly parallels the uniform gauge (4 ft. 8½ in.) line between Albury and Melbourne. (c) Includes 112 route-miles of Grafton-South Brisbane Uniform Gauge Railway. (d) Queensland section of Grafton-South Brisbane Uniform Gauge Line. (e) Portion of Commonwealth system. (f) Includes 432 miles of Commonwealth system.

6. Summary of Operations.—In the following table, a summary is shown of the operations of government railways open in Australia during 1961–62. Figures for earnings exclude State government grants and certain other earnings payable to railways, while figures for working expenses exclude certain other expenses charged to railways (see para. 10, p. 595).

GOVERNMENT RAILWAYS: SUMMARY OF OPERATIONS, 1961–62

Particulars	Commonwealth railways	State railways	Total
Route-mileage (30th June) .. .. miles	2,252	23,330	25,582
Track-mileage (30th June) .. .. miles	2,456	29,706	32,162

	2,861	132,177	135,038
	1,165	1,132	1,133

A graph showing the route-mileage and traffic of government railways from 1870 to 1961–62 appears on page 603.

7. Gross Earnings.—(i) General. Gross earnings are composed of earnings from (a) coaching traffic, including the carriage of mails, horses, parcels, etc., by passenger trains; (b) carriage of goods and livestock; and (c) rents and miscellaneous items. State Government grants are excluded. Details of these grants made during 1961–62 are shown in para. 10, page 595.

(ii) *Coaching, Goods and Miscellaneous Earnings.* (a) *Summary.* In the following table, gross earnings are shown for the years 1957-58 to 1961-62, together with earnings per average route-mile worked and per revenue train-mile.

### GOVERNMENT RAILWAYS: GROSS EARNINGS(a)

(a) Excludes government grants; see para. 10, p. 595.

(b) *Distribution.* The following table shows gross earnings for the year 1961-62 classified according to the three main sources of earnings together with the percentage of the total derived from each source.

### GOVERNMENT RAILWAYS: DISTRIBUTION OF GROSS EARNINGS(a), 1961-62.

Railway system	Gross earnings (£'000)			Proportion of total (per cent.)		
	Coaching	Goods and livestock	Miscellaneous	Coaching	Goods and livestock	Miscellaneous
New South Wales ..	22,982	61,424	3,945	26.01	69.52	4.47
Victoria ..	13,922	25,733	2,902	32.71	60.47	6.82
Queensland ..	4,840	30,177	1,142	13.39	83.45	3.16
South Australia ..	2,072	10,880	972	14.88	78.14	6.98
Western Australia ..	1,649	15,114	786	9.40	86.12	4.48
Tasmania ..	197	2,411	95	7.29	89.21	3.50
Commonwealth ..	1,129	4,671	441	18.09	74.85	7.06
<b>Australia ..</b>	<b>46,791</b>	<b>150,410</b>	<b>10,283</b>	<b>22.55</b>	<b>72.49</b>	<b>4.96</b>

(a) Excludes government grants; see para. 10 p. 595.

8. *Working Expenses.*—(i) *General.* In comparing the working expenses of the several States and Territories, allowance should be made for the variation of gauges and of physical and traffic conditions, not only on the different systems of the State and Commonwealth railways, but also on different portions of the same system.

Working expenses, wherever presented in the Railways section of this chapter, include reserves for depreciation in South Australia, Western Australia and Tasmania but exclude interest, sinking fund, exchange and certain other payments (*see para. 10*).

(ii) *Working Expenses.* The following table shows the total working expenses, the ratio of working expenses to gross earnings, and working expenses per average route-mile worked, and per revenue train-mile for the years 1957-58 to 1961-62.

GOVERNMENT RAILWAYS: WORKING EXPENSES<sup>(a)</sup>

(a) See para. 10, p. 595.

NOTE.—Minus sign (-) denotes loss.

10. Net Earnings, Grants to Railways, Interest, Sinking Fund, Surplus or Deficit, 1961-62.—The following table shows, for each railway system for the year 1961-62, (i) net earnings as in para. 9 above, (ii) State grants and other items credited to railways accounts, (iii) loan interest, exchange, sinking fund, etc., payments charged against the accounts, and (iv) the net surplus or deficit after these items have been taken into account. Particulars of items (ii) to (iv) are not included in the preceding tables in this section.

The figures shown in this table accord with those published in the Annual Reports of the Railways Commissioners of the several systems. Because of the differences in governmental practice in regard to costs other than operative charged against railways accounts, compensation for non-paying and developmental lines, etc., and the inclusion in some railways finances of the operations of ancillary transport services, direct comparison cannot be made between the results shown in the table.

## GOVERNMENT RAILWAYS: SURPLUS OR DEFICIT AT 30th JUNE, 1962

(a) See para. 9, p. 594. (b) Grants to meet losses on country development lines, £1,000,000, and to subsidize payments due from superannuation account, £800,000. (c) Loan flotation expenses. (d) Kerang-Koondrook Tramway recoup from Treasury. (e) As a result of legislation, interest and other charges are not now debited to departmental accounts. (f) Net loss on road motor services not included in previous pages. (g) Includes road motor services. (h) Adjustment for deficit on Queensland portion of Uniform Gauge Railway as included in foregoing tables. (i) Interest on unopened lines. (j) Excludes Queensland portion of Uniform Gauge Railway. (k) Grants towards working expenses, £3,300,000, and debt charges, £800,000. (l) Interest and repayment under Railways Standardization Agreement, £86,173, and net loss on road motor services not included in foregoing tables, £2,325. (m) Net profit on road motor services. (n) Includes depreciation and obsolescence, insurance, salary of Commissioner, audit expenses, and superannuation and furlough liability.

Note.—For further information on railways finance, in particular expenditure from loan and other funds, see Chapter XXI. Public Finance of this Year Book. See also the Reports of the several Railways Commissioners.

11. Traffic.—(i) General. The following table shows particulars of railway passenger and goods traffic for the years 1957-58 to 1961-62.

## GOVERNMENT RAILWAYS: TRAFFIC

1960-61	..	3,976	2,559	1,256	1,791	1,172	2,236	772	2,118
1961-62	..	3,967	2,412	1,334	1,823	1,387	2,124	869	2,169

(a) Traffic originating on the 3 ft. 6 in. gauge system and continuing on the Uniform Gauge Railway, or vice versa, has been counted once only. (b) Based on ticket sales, making allowances for periodical tickets. Except in Tasmania, tickets sold at concession rates are counted as full journeys. (c) Concession tickets are counted according to the proportion of the adult fare charged. (d) Partly estimated.

(ii) *Passenger Traffic.* With the exception of the Commonwealth railway systems, which operate only country services, all systems provide both suburban and country passenger services. Traffic classed as "suburban" moves between stations within a classified suburban area around each capital city, whilst traffic classified as "country" originates or terminates at stations outside this suburban area. Particulars of suburban and country passenger traffic are shown separately in the two tables following.

(a) *Suburban Passenger Traffic.* The following table shows a summary of suburban passenger operations for the years 1957-58 to 1961-62. Most of the suburban services in New South Wales and Victoria are operated within electrified areas.

## GOVERNMENT RAILWAYS: SUBURBAN PASSENGER SUMMARY

Year	Suburban passenger journeys (a)	Suburban revenue passenger train-miles	Suburban passenger miles	Average number of passengers per train-mile	Average mileage per passenger journey	Suburban passenger earnings

1960-61	303	773	93,540	113	309.07	838	664.51	2.15	244
1961-62	315	866	100,604	109	319.15	904	688.57	2.16	235

(a) Based on ticket sales, making allowances for periodical tickets. Except in Tasmania, tickets sold at concession rates are counted as full journeys. (b) Excludes mixed-train miles. (c) Passenger-miles divided by passenger train-miles inclusive of a proportion of mixed train miles. (d) Not available. (e) Traffic originating on the 3 ft. 6 in. gauge system and continuing on the Uniform Gauge Railway, or vice versa, has been counted once only. (f) Concession tickets are counted according to the proportion of the adult fare charged. (g) Railways controlled by Commonwealth Government.

NOTE.—Train-miles refer to revenue mileages only.

(iii) *Freight Traffic.* (a) *Commodities Carried and Earnings.* The following table shows the quantities of various commodities carried on the various systems and the earnings derived during 1961-62.

## GOVERNMENT RAILWAYS: COMMODITIES CARRIED AND EARNINGS, 1961-62

Railway system	Coal, coke and briquettes	Other minerals (a)	Agricultural produce (b)	Wool	Livestock	All other commodities	Total
----------------	---------------------------	-----------------------	-----------------------------	------	-----------	-----------------------	-------

<b>Australia ..</b>	<b>2,456</b>	<b>541</b>	<b>199</b>	<b>3,196</b>	<b>(h) 9,177</b>	<b>91,094</b>	<b>(h) 7,976</b>

(a) Included in capital account. (b) Includes all brake vans. (c) Excludes 39 interstate coaching stock owned jointly by New South Wales and Victoria. (d) Excludes 5 interstate service stock owned jointly by New South Wales and Victoria. (e) Includes all vehicles. Previous figures have included only vehicles having a capital value. (f) Excludes 68 interstate coaching stock owned jointly by Victoria and South Australia. (g) Excludes one dynamometer car owned jointly by Victoria and South Australia. (h) Includes jointly owned stock.

At 30th June, 1952, steam locomotives numbered 3,696; diesel-electric, 73; other, 30; total, 3,799.

13. Accidents.—The following table shows particulars of the number of persons killed or injured through train accidents and the movement of rolling stock on the government railways of Australia during 1961-62.

## GOVERNMENT RAILWAYS: ACCIDENTS(a), 1961-62

Particulars	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Cwth	Aust.
Persons killed ..	44	46	10	11	11	4	1	127
Persons injured ..	737	611	102	54	221	9	12	1,746

(a) Excludes accidents to railway employees.

14. Consumption of Coal, Oil and Petrol.—The following table shows the value of coal, oil and petrol consumed by the various government railways during 1961-62.

## GOVERNMENT RAILWAYS: VALUE OF COAL, OIL AND PETROL CONSUMED, 1961-62 (£'000)

Railway system	Coal		Oil				Petrol for rail cars
	Locomotives	Other purposes	Diesel(a)	Fuel(b)	Lubrication	Other purposes	
New South Wales ..	2,395	52	1,387	238	246	132	..

(a) Includes construction staff and staff of the road motor services. (b) Included with operating staff. (c) Excludes Queensland portion of Uniform Gauge Railway. (d) Construction work is carried out by private contractors and the staff engaged is therefore not under the control of the Railway Commissioner. (e) Includes construction staff, Victoria.

**TRAMWAY, TROLLEY-BUS AND OMNIBUS SERVICES**

1. **Systems in Operation.**—(i) *Tramway and Trolley-bus.* Since 1st April, 1947, all systems have been operated by government or municipal authorities. During the year 1961-62, tramway systems were in operation in the following cities—Melbourne, Bendigo, and Ballarat, Victoria; Brisbane, Queensland; and Adelaide, South Australia. Trolley-bus services operated in Brisbane, Queensland; Adelaide, South Australia; Perth, Western Australia; and Hobart and Launceston, Tasmania. All systems were electric.

In many parts of Australia, private lines used for special purposes in connexion with the timber, mining, sugar, or other industries are often called tramways, but they are more properly railways, and the traffic on them has nothing in common with that of the street tramways for the conveyance of passengers, which are dealt with in the present section.

(ii) *Motor Omnibus.* Services are operated by government or municipal authorities and private operators. Statistics are collected for government and municipal omnibus services located in all State capital cities; Canberra, Australian Capital Territory; Newcastle, New South Wales; Maryborough and Rockhampton, Queensland; Fremantle and the Eastern Goldfields area, Western Australia; Launceston and Burnie, Tasmania; Darwin, Northern Territory; and for country road services operated by the Western Australian Government Railways. In Sydney, the government tramway system has been replaced by omnibus services, and in Perth, the Metropolitan (Perth) Passenger Transport Trust has acquired all but one of the formerly privately owned metropolitan services. In Hobart, the government trolley-bus and omnibus services have replaced the government tramway service.

Particulars of motor omnibus services under the control of private operators are recorded for the States of New South Wales, Victoria, Queensland, South Australia and Western Australia. In New South Wales, particulars of private services are compiled for the Sydney metropolitan and Newcastle transport districts and the city of Greater Wollongong. In Victoria, particulars relate to the Melbourne metropolitan area only, and in South Australia to services licensed by the Municipal Tramways Trust and the Transport Control Board. In Queensland, they relate to all cities with a population of 10,000 or more persons. In Western Australia, particulars of all private services throughout the State are included.

# GOVERNMENT RAILWAYS: AUSTRALIA, 1870 TO 1962

NOTE:- VERTICAL SCALE IS LOGARITHMIC AND THE CURVES RISE AND FALL ACCORDING TO RATE OF INCREASE OR DECREASE. ACTUAL NUMBERS ARE INDICATED BY SCALE.

2. Government and Municipal Services.—(i) *Summary of Operations, States.* Because of the development in recent years of the various forms of public road transport under the control of single authorities, and the gradual replacement of tramway services by motor omnibus services, it is no longer possible to obtain separate statistics for all phases of the activities of each form of transport, particularly financial operations. In this section, therefore, statistics of public tramway, trolley-bus and motor omnibus services are combined in single tables with separate details shown for each form of transport where possible.

Since October, 1960, the tramway gauge has been 4 feet 8½ inches throughout.

The following table gives a summary of the operations of tramway, trolley-bus and omnibus systems controlled by government and municipal authorities, for 1961-62.

TRAMWAY, TROLLEY-BUS AND OMNIBUS SERVICES: GOVERNMENT AND MUNICIPAL, 1961-62

(a) Includes particulars of New South Wales trolley-buses up to cessation of operation in August, 1959, and tramway services up to February, 1961. (b) Includes a small number of passenger-ferry miles for Western Australia. (c) Includes particulars for Tasmanian trams (to October, 1960) and trolley-buses. (d) Excludes government grants. (e) Includes provision of reserves for depreciation, etc., where possible. (f) Excludes accidents to employees.

NOTE.—Minus sign (—) denotes deficit.

3. *Private Services.—Summary of Operations.* The following table shows the operations of motor omnibus services under the control of private operators in New South Wales, Victoria, South Australia and Western Australia during each of the years 1957–58 to 1961–62, and in Queensland during the years 1959–60 to 1961–62.

## MOTOR OMNIBUS SERVICES: PRIVATE

(a) Metropolitan, Newcastle and Wollongong transport districts only. (b) Nine months ended March, 1961; subsequent figures relate to the years ended 31st March. (c) Metropolitan area only. (d) Partly estimated. (e) Vehicles only. (f) Drivers only. (g) At 20th September, 1962. (h) All cities with a population of 10,000 persons or more. (i) Services licensed by the Municipal Tramways Trust and the Transport Control Board. (j) Not available. (k) Includes 156 Transport Control Board licensed omnibuses previously excluded. (l) Includes services operated in metropolitan and rural areas. (m) Decrease due to Metropolitan (Perth) Passenger Transport Trust acquiring services which were previously privately owned. r—Revised figures.

## FERRY (PASSENGER) SERVICES

1. **General.**—Ferry passenger services are operated in the following States—New South Wales, at Sydney and Newcastle; Western Australia, on the Swan River at Perth; Tasmania, on the Derwent River at Hobart and on the Mersey River at Devonport. Control is exercised by both governmental authorities and private operators. In Victoria and Queensland the services operated are not extensive. There are no ferry passenger services in South Australia.

2. **Summary of Operations.**—The operations of ferry passenger services in New South Wales, Western Australia and Tasmania during the years 1957–58 to 1961–62 are summarized in the following table. Particulars of vehicular ferries are not included.

## FERRY (PASSENGER) SERVICES

Year	Number of vessels	Passenger accommodation	Passenger-journeys (‘000)	Gross revenue (£)	Persons employed

r—Revised figures.

## MOTOR VEHICLES

1. **General.**—The arrangements for the registration of motor vehicles and the licensing of drivers and riders are not uniform throughout Australia, since they are the function of a separate authority, or authorities, in each State and Territory. Particulars of registration, licences, fees payable, etc., in each State and Territory at 30th June, 1960, were given in Official Year Book, No. 47, pp. 553–6.

In all the capital cities and in most of the provincial centres, taxi-cabs and other vehicles ply for hire under licence granted by either the Commissioner of Police or the local government authority concerned, but particulars of their operations are not available.

In both urban and provincial centres, motor omnibus traffic has assumed considerable proportions during recent years, and there has been a considerable replacement of existing tramway and trolley-bus services by motor omnibus services. (See p. 602.)

2. Motor Vehicles on the Register, etc.—(i) *Registrations and Revenue.* The following table shows particulars of the registration of motor vehicles, licences issued and revenue received for 1961–62 and a summary for Australia for each of the years 1957–58 to 1961–62. In Victoria, registration is made on the basis of the purpose for which the vehicle is to be used; consequently, motor car registrations are overstated by the inclusion of commercial vehicles registered for private use.

A graph showing, for all motor vehicles other than motor cycles, the registrations in force at 30th June of each year from 1935 to 1962 will be found on page 604.

## MOTOR VEHICLES: REGISTRATIONS AND REVENUE

<b>Total ..</b>	<b>238,363</b>	<b>252,686</b>	<b>302,824</b>	<b>290,190</b>	<b>273,361</b>

(a) This series is not entirely comparable with the "On Register" series. (b) Includes utilities, panel vans, trucks, omnibuses and ambulances.

4. **World Motor Vehicle Statistics. 1962.**—At 1st January, 1962, there were 135,220,800 motor cars, trucks and omnibuses registered in various countries of the world. This was an increase of 5.6 per cent. on the figure for the previous year, 128,035,000. Of the 1962 registrations, 75,880,000 or 56.1 per cent. of the world total were in the United States of America, while Australian registrations amounted to 2.1 per cent. This information is largely derived from the *Automobile International*, May, 1961.

### ROADS AND BRIDGES

Information on the length of roads in Australia, the class of roads and the composition, together with particulars of the financial operations of the roads authorities in the several States, is included in Chapter XIX. Local Government, of this Year Book.

### ROAD TRAFFIC ACCIDENTS

#### § 1. Accidents Reported.

1. **General.**—Statistics of "Total Accidents Recorded" were collected to 31st December, 1957, on a comparable basis for all States except Tasmania, where, under legislation passed on 10th August, 1954, it became no longer obligatory to report accidents involving only damage to property. However, this series was suspended from 1st January, 1958, owing to the inconsistency between States in recording "damage only" accidents.

Details are not available in respect of road traffic accidents which occur in the Northern Territory.

2. **Accidents Involving Casualties.**—(i) *States, 1961-62.* The following table gives a summary of accidents involving casualties in each State and the Australian Capital Territory for the year 1961-62.

**ROAD TRAFFIC ACCIDENTS INVOLVING CASUALTIES(a): ACCIDENTS  
RECORDED AND CASUALTIES, 1961-62**

State or Territory	Accidents involving casualties	Persons killed			Persons injured

(a) Accidents (reported to the police) which occurred in public thoroughfares and which caused death, or injury to an extent requiring surgical or medical treatment.

(iv) *Accidents Recorded and Casualties, classified according to Type of Vehicle, Road User, etc., Involved.* The following table shows, for the year 1961-62, the number of accidents involving casualties in which each of several classes of vehicles, road users, etc., were involved. The persons killed and injured are similarly classified. As in the table in sub-paragraph (ii) above, responsibility for cause of accident is not indicated by this classification.

### ROAD TRAFFIC ACCIDENTS INVOLVING CASUALTIES(a), CLASSIFIED ACCORDING TO TYPE OF VEHICLE, ROAD USER, ETC., INVOLVED: AUSTRALIA, 1961-62

Particulars	Motor vehicle	Motor cycle	Pedal cycle	Tram	Animal and animal-drawn vehicle	Pedestrian	Fixed object	Other vehicle
Accidents involving casualties ..	41,391	4,821	4,151	246	391	8,356	3,336	201
Persons killed ..	2,395	145	120	24	11	724	214	48
Persons injured ..	55,852	5,459	4,203	294	473	8,192	4,519	244

(a) Accidents (reported to the police) which occurred in public thoroughfares and which caused death, or injury to an extent requiring surgical or medical treatment.

NOTE.—As accidents and casualties classified according to one type of road user, etc., may also be classified according to another, these totals cannot be added across to obtain grand totals.

The 41,391 accidents involving casualties in which motor vehicles were involved comprised 14,535 collisions with other motor vehicles, 3,269 with motor cycles, 3,530 with pedal cycles, 81 with trams, 240 with animals and animal drawn vehicles, 7,832 with pedestrians, 3,023 with fixed objects, 177 with vehicles other than those mentioned, 8,208 instances of overturning or leaving the roadway, and 496 accidents to passengers only.

3. *Road Traffic Accidents Involving Casualties, and Persons Killed or Injured.*—The following table shows the number of road traffic accidents involving casualties and persons killed or injured in road traffic accidents in each State and the Australian Capital Territory during each of the years 1957-58 to 1961-62.

## ROAD TRAFFIC ACCIDENTS INVOLVING CASUALTIES(a) AND PERSONS KILLED OR INJURED

Year	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	A.C.T.	Total

(a) Accidents (reported to the police) which occurred in public thoroughfares and which caused death, or injury to an extent requiring surgical or medical treatment.

## § 2. Road Safety Organizations

1. Australian Road Safety Council.—(i) *Origin, Objectives and Organization.* The Australian Road Safety Council was formed in 1947 by the Australian Transport Advisory Council, which comprises Commonwealth and State transport ministers and Commonwealth ministers with associated interests, to conduct a nation-wide programme of public education. It was re-constituted in February, 1961, by the Australian Transport Advisory Council, in order to provide a smaller, more effective, organization.

The objectives of the reconstituted Council are:—

- to conduct a continuous programme of public education, aimed at improving the knowledge, skills, attitudes and practices of all classes of road users;
- to encourage a better understanding and observance of State and Commonwealth traffic laws by road users;
- to stimulate greater public interest, support and active participation in road accident prevention;
- to co-ordinate, in a balanced programme, the Commonwealth and State public education campaigns, and to integrate with these campaigns the support accorded by non-governmental bodies and the general public;
- to collect, collate, publish and distribute educational and informative data regarding road accidents; and
- to advise on specific road safety matters referred to it by the Australian Transport Advisory Council.

The Australian Road Safety Council comprises 16 members, representing the Commonwealth and State Governments and the major categories of organized road users. It meets approximately three times each year and has established a number of temporary sub-committees to investigate and report upon particular aspects of its activities.

The Department of Shipping and Transport provides the central executive for the Council. Each section represented on the Australian Road Safety Council—Commonwealth, State and community/commercial—exercises full control over its own activities. One of the Council's principal functions is to co-ordinate the Commonwealth and State public education campaigns and to integrate with these campaigns the support accorded by commerce, industry, and community service organizations.

A sum of £150,000 is provided annually by the Commonwealth Department of Shipping and Transport for the promotion of road safety practices; £50,000 is distributed to the State Governments for public education in road safety, and the remaining £100,000 is used for the national public education campaign. The £50,000 grant to the States is allocated in the following proportions:—New South Wales, £12,500; Victoria, £10,000; Queensland, £9,250; South Australia, £6,250; Western Australia, £8,250; Tasmania, £3,750.

(ii) *Mode of Operation.* The media used by the Australian Road Safety Council in its national campaigns include metropolitan daily press and metropolitan radio and television, platform and pulpit, plus a wide variety of posters, pamphlets, booklets, publications and films. The official publication of the Council is the *Australian Road Safety Council Report* which is published monthly. Close liaison is maintained with State and Commonwealth educationists in the preparation and distribution of road safety instructional material for schools.

The Council, through its Central Executive in the Department of Shipping and Transport, works in close collaboration with two companion Committees, established by the Australian Transport Advisory Council. These are the Australian Road Traffic Code Committee, which prepares model regulations with the object of attaining national uniformity of traffic laws; and the Australian Motor Vehicle Standards Committee, which devises national standards for the construction, equipment, and operational efficiency of all road vehicles.

Because of the great increases in population and vehicle numbers, the exposure to risk of road users is considerably greater today than ever before. This is the basic problem confronting the Australian Road Safety Council, and in its efforts to deal with it, the Council has recognized the consideration that, notwithstanding advances in road and vehicle design and traffic laws, road safety still remains essentially a problem of human behaviour.

The primary aim of road accident prevention, as envisaged by the Council, is thus to create a state of mind in which all classes of road users realize the imminence and consequence of road accidents, and are willing to accept the restraints necessary to prevent them. It is the Council's belief that, for the most part, this can best, and often only, be done effectively through education in the broad and practical sense, by improving knowledge, skill, attitudes and habits of all classes of road users, and by creating a public conscience about road accidents. The current National Public Education campaign is based on the theme "Road Safety Starts With You".

2. *National Safety Council of Australia.*—(i) *Origin, Objectives and Organization.* The National Safety Council of Australia was founded in Victoria in 1927, when it was registered as a company limited by guarantee and subsequently registered as a foreign company in New South Wales, Queensland, Tasmania and Western Australia. In 1959 the opportunity was taken to adopt new articles of association, which placed the National Safety Council of Australia on a more truly federal basis, reflecting the expanded character of the Council in the 35 years since its formation.

The objects of the Council, summarized, are:—

- (a) to devise and encourage the adoption of safety measures of all kinds;
- (b) to promote discussion of all matters relating to safety measures;
- (c) to conduct an educational campaign among the people of Australia to stimulate the adoption and observance of safety measures; and
- (d) to consider, initiate and support improvements in the laws of the Commonwealth of Australia, the States and local governing bodies calculated to prevent accidents.

The Council is a membership organization whose members include transport, education and other authorities as well as numerous industrial concerns. Membership is open to any person or organization wishing to further the objects and purposes of the Council. The Council is now registered in Canberra, with State Divisions established in Queensland, New South Wales, Victoria, Tasmania and South Australia, and the National Safety Council

of Western Australia acts as its agent in that State. It is managed by a Federal Council, whose members are appointed by the State Divisions. The Federal Council is responsible for those objectives which are of a national character, and each State Division controls its own affairs which are of State or local character.

The Council is a non-profit making organization and, apart from fees which may be charged to members and others for services provided, its work is financed by subscriptions, grants and donations, which in general are received at State level by the various State Divisions.

(ii) *Activities.* The Council's interests cover the development of industrial, rural and home safety, and, as in the case of its Victorian Division, road safety, where it undertakes road safety campaigns, lectures, film screenings to schools and organizations, and the distribution of posters and literature. A "Safe Driving" campaign for individual motor drivers and a "Freedom from Accidents" campaign for employee drivers are conducted, and those completing a year free from any accident for which they were responsible are given a certificate or award in recognition.

In addition to the industrial safety service of posters, slips for pay envelopes and the bi-monthly journal *Safety News* available to industry by subscription, the Council's Industrial Safety Division also provides advice on the setting up of safety programmes, information on safety problems, safety surveys of plant and works, safety instruction for foremen, technical library facilities, and safety service to small factories.

## CIVIL AVIATION

1. *Historical.*—A short review of the progress of civil aviation in Australia up to the date of foundation of a Civil Aviation Administration was published in Official Year Book No. 16, pages 334–5, and a brief account of the foundation and objects of this Administration was published in Official Year Book No. 19, page 299. Official Year Book No. 38 and earlier issues contain information on the control of civil aviation by the Board (1936) and later (1939) by the Department of that name. The Acts defining the broad principles of operation of the administration of civil aviation and the Regulations amplifying them, and the principal functions of the administration are also described.

The Department has 14 Divisions as follows:—Air Transport; International Relations; Aviation Medicine; Flying Operations; Airworthiness; Airways Operations; Communications and Air Traffic Control Engineering; Airport Engineering; Aviation Buildings and Property; Finance and Stores; Air Safety Investigation; Navigational Aids, Electrical and Mechanical Engineering; Organization, Methods and Establishments; and Personnel and Administration.

2. *International Activity.*—(i) *International Organizations.* A full report of the formation of the International Civil Aviation Organization, the Commonwealth Air Transport Council and the South Pacific Air Transport Council appeared in Official Year Book No. 37, and particulars of subsequent activity in the international field were included in issue No. 38. The International Civil Aviation Organization had a membership of 98 nations in November, 1962. Australia has continued her representation on the Council, a position which she held since I.C.A.O. was established in 1947. Further details will be found in Official Year Book No. 40 and earlier issues.

(ii) *International Agreements.* A list of the agreements between Australia and other countries for the use by Australia of certain overseas routes and reciprocal routes granted in return in force at 30th June, 1962, was given on pages 555–6 of Official Year Book No. 48.

The countries concerned were:—Canada, United States of America, Pakistan, India, Ceylon, Netherlands, United Arab Republic, Lebanon, South Africa, Japan, Germany, Ireland, United Kingdom, Malaya and Thailand.

(iii) *International Air Services.* Qantas Empire Airways Ltd. has an operational fleet of 11 Boeing 707 jet aircraft, 4 Lockheed Electras and 8 Lockheed Super Constellations. The Boeings operate a round the world service through the United States of America and the United Kingdom and to Hong Kong, Japan and Noumea. The Electras are used on services to New Zealand and Fiji, and the Super Constellations on the South Africa service and on cargo services. Qantas was operating aircraft over 67,885 route miles on international services in October, 1962. A summary of the operations of overseas services wholly or partly Australian-owned appears on page 619.

Three Lockheed Electra aircraft operated by Tasman Empire Airways Ltd. link Sydney with Auckland, Christchurch and Wellington; Melbourne with Auckland and Christchurch; and Brisbane with Auckland.

A total of eleven international airlines operate services into and out of Australia, mainly to and from Sydney.

3. **Australian National Airlines Commission.**—The *Commonwealth Australian National Airlines Act* 1945 constituted the Australian National Airlines Commission for the purpose of establishing, maintaining and operating airline services for the transport of passengers and goods between Australian States and/or Territories and within Australian Territories. The Commission may, with the approval of the Minister, undertake services between Australia and places outside Australia, and, in certain circumstances, may engage in intra-State operations.

The operating organization set up to give effect to the Act is Trans-Australia Airlines.

4. **Regular Air Services within Australia.**—Domestic airline services throughout Australia and the Australian sector of Papua-New Guinea are provided by three distinct groups of airlines, operating over a route network of some 93,000 miles. The three groups are as follows.

*Trans-Australia Airlines*—operated by the Australian National Airlines Commission on behalf of the Commonwealth Government. T.A.A. operates on the main interstate routes throughout Australia and on territorial air services, as well as intrastate services in Queensland and Tasmania, and internal services in the Australian sector of Papua-New Guinea.

*Ansett Transport Industries airline group*—a private enterprise organization. This group comprises Ansett-A.N.A., also operating on the main interstate and territorial air routes, and five subsidiary airlines which operate basically intrastate services in Queensland, New South Wales, South Australia and the Australian sector of Papua-New Guinea.

*Small private enterprise airlines*—This group comprises four independent feeder type airlines operating basically intrastate services in New South Wales, Western Australia, Northern Territory and internally in Papua-New Guinea.

Competition between the two major domestic airlines, T.A.A. and Ansett-A.N.A. is controlled by Commonwealth legislation and Airline Agreements. These controls are designed to prevent uneconomic competition between the two companies. The two principal Acts which establish the legislative basis of this controlled competition are the *Airlines Agreement Act* 1952–1961 and the *Airlines Equipment Act* 1958. The *Airlines Equipment Act* establishes the machinery for the achievement and maintenance of comparable aircraft fleets between T.A.A. and Ansett-A.N.A., and is designed to prevent the provision of excess aircraft capacity. The *Airlines Agreement Act* establishes the basis of the control of the two airline competitive system and extends this machinery until 1977, and also establishes certain requirements covering the introduction of jet aircraft to Australian domestic services after 1st July, 1964. Under the terms of this Act, on 19th November, 1962, T.A.A. and Ansett-A.N.A. applied for, and received, government approval for each to buy two Boeing 727 jet airliners for introduction on Australian domestic services in late 1964 or early 1965.

A summary of the operations of regular air services within Australia appears on page 619.

5. **Air Ambulance Services.**—A brief statement on the foundation and objects of the Air Ambulance Services will be found in Official Year Book No. 32, pages 145 and 146.

During the year 1961–62, the Air Ambulance and Royal Flying Doctor Services continued to provide medical aid for the outback regions of Australia. The Royal Flying Doctor Service of Australia, operating from Broken Hill, New South Wales, Cloncurry, Queensland, and Alice Springs, Northern Territory (operated in conjunction with the Department of Health) covers a wide area of inland Australia. The Bush Church Aid Society for Australia and Tasmania, supported by funds from the Church of England, operates from Ceduna in South Australia. The Federal Methodist Inland Mission operates services from Meekatharra, Western Australia, and the Queensland Ambulance Transport Brigade operates a service from Cairns in Queensland. Recently a Flying Surgeon Service came into operation in Queensland.

For further information see Chapter XVII. Public Health.

6. **Training of Air Pilots.**—Since 1926, the Commonwealth has subsidized flying training in Australia largely through the Aero Club movement. In 1961 the Government altered the basis of financial assistance to flying training organizations. The new system provides for the payment of £637,000 in subsidies to Australian flying training organizations, including

the Aero Clubs, flying schools and the Gliding Federation of Australia, spread over a four-year period from 1961 to 1965. A feature of the new subsidy arrangements was the establishment of the Australian Flying Scholarship scheme which is designed to train career pilots for the Australian commercial aviation industry. The scholarships provide financial assistance in much the same way as Commonwealth scholarships provide for people undertaking other professions. Of the 148 flying scholarships awarded for 1962-63, the first year in which the scheme operated, 99 were scholarships to take the student through to the commercial licence standard, and 49 were to commercial licence plus instructor rating.

During the year 1961-62, pupils of the Australian flying training organizations (aero clubs and commercial flying schools) received 481 private licences, 140 commercial licences, and 45 instructor licences. Subsidized hours flown by aero clubs and flying schools totalled 97,929 hours and their subsidy earnings totalled £172,732. A limit placed on the subsidy restricted the total payment to £144,000. During the year, 22 clubs were also assisted with the purchase of 38 aircraft and 3 aircraft radios. The value of this assistance under the Aircraft Replacement Fund was £30,000. The permanent secretariats of the Royal Federation of Aero Clubs and the Commercial Flying Schools also received £7,000 during 1961-62 as additional financial assistance.

Assistance given to the Australian gliding clubs was increased to £6,000 in 1961-62. Of this, £1,500 was allocated to the National Gliding School, £780 for the development and design of gliders, and £720 for secretarial expenses, and £3,000 was distributed to clubs on the basis of membership and F.A.I. certificates. Members of the gliding clubs affiliated with the Gliding Federation of Australia increased from 1,037 to 1,117 during 1961-62, and F.A.I. certificates issued showed an increase of 45 per cent. over those issued the previous year.

The Federation Aeronautique Internationale, whose headquarters are in Switzerland, sets certain standards of efficiency which the glider pilot has to attain before he qualifies for a F.A.I. certificate (e.g., certificates are obtainable for height, distance and time aloft). The administrative authority in Australia for F.A.I. is the Royal Aero Club of Australia.

The total of all subsidy payments and financial assistance to flying training organizations and the gliding movement during 1961-62 was £187,000.

**7. Airways Engineering.**—The field of airways engineering includes the provision of radio navigation facilities, radiocommunication systems, and airport lighting systems.

Approvals were given during 1961-62 for extensions and improvement of Australia's airways navigation and communications system. Long-range air traffic control radar units are being installed at Sydney and Adelaide at a cost of £770,000. Both units are expected to be in operation by mid-1963, and similar units are planned for Melbourne, Brisbane and Perth as part of a radar programme costing £2.5 million. This coincides with the introduction of airborne radar which is a mandatory requirement for all Australian airliners from June, 1963. These two steps will enable radar surveillance of Australia's controlled air space by pilots and controllers to be considerably extended. Approval was also given during the year for the second stage of the Department of Civil Aviation's navigational aids plan. This involves the installation, over the next four years, of 16 visual omni radio ranges for primary directional guidance, and four international standard distance measuring equipment units at Sydney, Melbourne, Brisbane and Perth. In the communications field, work is proceeding steadily to improve further the high quality direct speech facilities between ground controllers and aircraft operating in controlled air space, and improve generally the communications system throughout the entire Australian aviation area.

One of the most significant additions to the communication system during 1961-62 was the commissioning of the Penrith international receiving station, which, together with the international transmitting station at Llandillo, near Sydney, provides air to ground and point to point communications on the international frequency bands for places as far away as Honolulu, Manila and Singapore.

**8. Airports.**—During 1961-62, development, valued at £1.7 million, was carried out at Commonwealth aerodromes in Australia and its Territories, bringing the total value of runways, taxiways and buildings, etc., at these aerodromes to approximately £50 million. The number of aerodromes is now 620, of which 147 are owned and operated by the Commonwealth. The major airport development project was the extension and development of Perth Airport to enable it to take international jets, and the construction of a new international domestic passenger terminal. This project, costing approximately £1.2 million, was completed in October, 1962.

During November, 1962, the Commonwealth Government gave approval for a five-year £30 million airport development programme which includes the construction of a new international and domestic airport at Melbourne, a new international terminal building and runway extensions at Sydney, development and the erection of a new terminal at Launceston, and general airport development works throughout Australia.

Significant developments in the provision of airways facilities at aerodromes in 1961-62 included the provision of a very high frequency omni range at Darwin for international airliners and an instrument landing system (I.L.S.) at Perth. The Perth I.L.S. installation brings the number of I.L.S. units in Australia to twelve. A further eight country aerodromes were equipped with night landing facilities, bringing the number suitably equipped for night operations to sixty-six.

**9. Meteorological Services.**—The Department of Civil Aviation is the greatest user of meteorological services in the Australian Commonwealth and its territories, and therefore the requirements for civil aviation purposes have played a big part in determining the form of meteorological organization that exists at the present time. The Department and the Commonwealth Bureau of Meteorology have completed working arrangements designed to meet the very precise requirements of modern civil aviation in Australia, which specify the standards of service, times and places of operation and facilities required for the provision of meteorological services for civil aviation.

**10. Search and Rescue.**—The Department of Civil Aviation has assumed responsibility for co-ordination of search and rescue activity throughout all Australian flight information regions, and also arranges for the availability of search and rescue facilities. Particulars of systems and methods of operation were published in Official Year Book No. 48, page 558.

**11. Statistical Summaries.**—(i) *Registrations, Licences, etc.* The following table provides a summary of the civil aviation registrations and licences in force in Australia at 30th June in each of the years 1958 to 1962.

**CIVIL AVIATION: REGISTRATIONS, LICENCES, ETC., AUSTRALIA(a)**

Particulars	30th June—				
	1958	1959	1960	1961	1962
Registered aircraft owners ..	570	642	745	850	938

(a) Includes only services operating within the Australian mainland and Tasmania. of short tons (2,000 lb.).

(b) In terms

(iv) *Operations of Oversea Services wholly or partly Australian-owned.* The following table furnishes a summary of overseas services wholly or partly owned by Australian interests during the years 1957-58 to 1961-62. This table incorporates aggregate particulars of all traffic originating on overseas services of Qantas Empire Airways Limited and Tasman Empire Airways Limited, which, in the case of Qantas, includes considerable traffic which does not enter Australia. The transfer of the Australian Government's shares in Tasman Empire Airlines to the New Zealand Government on 25th July, 1961, made TEAL a wholly New Zealand-owned airline, and statistics of its operations are therefore not included in Australian statistics after 1960-61. An air services agreement was signed whereby air traffic rights into and through the two countries were exchanged at the same time, and on 1st October, 1961, both airlines commenced joint scheduling arrangements for trans-Tasman services. The table also includes traffic between Australia and Papua, New Guinea and Norfolk Island.

**CIVIL AVIATION: OPERATIONS OF OVERSEA SERVICES(a)**

Particulars	1957-58	1958-59	1959-60	1960-61	1961-62
Route miles (unduplicated) at 30th June ..	71,729	74,704	76,125	72,290	69,712

(a) Airlines wholly or partly owned by Australian interests.

(b) In terms of short tons (2,000 lb.).

(v) *Accidents and Casualties.* The number of accidents involving aircraft on the Australian register, in which persons were killed or injured, is shown in the following table for the years 1957-58 to 1961-62.

### CIVIL AVIATION: AUSTRALIAN AIRCRAFT(a), ACCIDENTS INVOLVING CASUALTIES

Particulars	1957-58	1958-59	1959-60	1960-61	1961-62
Number .. .. .	35	39	43	40	46
Persons killed .. .. .	28	21	44	28	52
Persons injured .. .. .	31	30	42	38	38

(a) Aircraft on Australian register and gliders irrespective of location of accident.

12. **Territory of Papua and New Guinea.**—For brief particulars of civil aviation in Papua and New Guinea see Chapter V. The Territories of Australia, pages 150 and 156.

### POSTS; TELEGRAPHS; TELEPHONES; OVERSEA TELECOMMUNICATION SERVICES

NOTE.—In this division, particulars for the Australian Capital Territory are included with those for New South Wales and the South Australian figures include particulars for the Northern Territory, unless otherwise indicated.

#### § 1. General

1. **The Postmaster-General's Department.**—Under the provisions of the *Post and Telegraph Act* 1901, the Postmaster-General's Department is responsible for the control and operation of postal, telegraphic and telephonic services throughout Australia. The Postmaster-General's Department is also responsible for the provision and operation of the transmitters and technical facilities required for broadcasting and television services by the Australian Broadcasting Commission (see pp. 630-6), and co-operates with the Overseas Telecommunications Commission (see pp. 627-8) in providing facilities for communication with overseas countries. Subsidiary to its major activities, the Postmaster-General's Department performs a number of important functions for other Commonwealth and State departments, including the payment of pensions, child endowment, and military allotments, the provision of banking facilities on behalf of the Commonwealth Savings Bank, the sale of tax and duty stamps, and the collection of land tax.

2. **Postal Facilities.**—(i) *Relation to Area and Population.* The following table shows the number of post offices, the area in square miles and the number of inhabitants to each post office (including non-official offices), and the number of inhabitants to each 100 square miles in each State and in Australia at 30th June, 1962.

#### POSTAL FACILITIES: RELATION TO AREA AND POPULATION AT 30th JUNE, 1962

Particulars	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Aust.
Number of post offices—							
Official and semi-official .. .. .	(a) 517	324	226	169	148	53	1,437

(a) See note (a) to previous table. (b) Figures not entirely comparable with those for earlier years. (c) Includes items allocated to other headings after 1959–60. (d) An amount of £43,625 has been excluded from 1960–61 figures published in Official Year Book No. 48. This amount represents receipts under the *Wireless Telegraphy Act* which are now credited to broadcasting and television revenue.

4. **Expenditure, Postmaster-General's Department.**—(i) *States.* The following table shows, as far as possible, the distribution of expenditure (actual payments) in each State during 1961–62, as shown by records kept for Treasury purposes. The table must not be regarded as a statement of the working expenses of the Department, since items relating to new works, interest, etc., are included therein.

(a) Number of distinct articles handled.

(b) Includes letters, cards and other postal articles enclosed in envelopes and sorted with letters.

(c) Includes newspapers and postal articles not included in letter mail.

(d) Includes registered, cash on delivery and duty parcels.

(e) Includes registered articles other than parcels.

(ii) *Australia.* The next table shows the total postal matter dealt with in Australia in relation to the mean population during each of the years 1957–58 to 1961–62.

## TOTAL POSTAL MATTER DEALT WITH: AUSTRALIA

Year	Letters, postcards and letter-cards		Newspapers and packets		Parcels(a)		Registered articles other than parcels	
	Total (‘000)	Per million of mean popula- tion	Total (‘000)	Per million of mean popula- tion	Total (‘000)	Per million of mean popula- tion	Total (‘000)	Per million of mean popula- tion
1957–58 ..	1,538,509	158	323,684	33	17,726	1.8	15,566	1.6
1958–59 ..	1,599,400	161	317,633	32	18,903	1.9	15,156	1.5
1959–60 ..	1,602,830	158	319,831	31	16,433	1.6	13,671	1.
1960–61 ..	1,700,544	164	318,614	31	15,976	1.5	12,935	1.2
1961–62 ..	1,748,054	165	324,694	31	15,854	1.5	12,357	1.2

(a) Includes registered, cash on delivery and duty parcels.

During 1961-62, the total amounts paid for the carriage of mails, as disclosed by the Profit and Loss Account of the Postal Branch, were as follows:—road £4,136,000; railway £1,346,000; sea £247,000; air—internal £1,289,000, oversea £4,971,000; grand total £11,989,000.

2. **Money Orders and Postal Notes.**—The issue of money orders and postal notes is regulated by sections 74-79 of the *Post and Telegraph Act 1901-1950*. The maximum amount for which a single money order payable within Australia may be obtained is £40, but additional orders will be issued upon request when larger amounts are to be remitted. The maximum amount permitted to be sent to any person in the dollar area is £A.5 a month and for remittances to countries outside the dollar area, £A.10 a week. A postal note is not available for a sum larger than twenty shillings.

The following table shows the number and value of money orders and postal notes issued in Australia in each of the years 1957-58 to 1961-62.

#### MONEY ORDERS AND POSTAL NOTES: TRANSACTIONS, AUSTRALIA

Year	Money orders			Postal notes		
	Issued		Net commission received	Issued		Poundage
	Number	Value		Number	Value	Value

1959-60.. ..	9,535	94,335	805	16,492	8,380	324
1960-61.. ..	9,652	100,760	867	15,959	8,194	307
1961-62.. ..	9,797	102,130	876	15,514	8,096	307

Of the total money orders issued in Australia during 1961-62, 9,387,000 valued at £100,886,000 were payable in Australia, and 410,000 valued at £1,244,000 were payable overseas. Of the total money orders paid in Australia during 1961-62, 9,499,000 (£100,647,000) were issued in Australia, and 173,000 (£1,038,000) were issued overseas.

Of the total postal notes paid in Australia during 1961-62 (15,474,000 valued at £8,292,000) 10,796,000 (£6,135,000) were paid in the State in which issued, and 4,678,000 (£2,157,000) were paid in States other than those in which issued.

### § 3. Telegraphs

1. **General.**—A review of the development of telegraph services in Australia up to 1921 appeared in Official Year Book No. 15, page 625, and subsequent developments of importance have been dealt with in later issues. During the past few years, substantial improvements in both the speed and grade of telegraph services throughout Australia have been effected, the entire system being subjected to intensive re-organization, and these matters have been dealt with in some detail in recent issues of this Year Book.

2. **Telegraph and Telephone Mileage.**—At 30th June, 1962, the combined single-wire mileages for both telegraph and telephone purposes were:—aerial, underground and submarine cables, 9,877,000 miles; trunk telephone and telegraph cables, 452,000 miles; aerial wires, 1,382,000 miles. There were 122,000 miles of pole routes. Joint use is made of poles for power and telephone reticulation.

3. **Telegraph Offices.**—The numbers of telegraph offices, including railway telegraph offices in the various States at 30th June, 1962, were:—New South Wales, 2,839; Victoria, 2,268; Queensland, 1,699; South Australia, 998; Western Australia, 949; Tasmania, 576; total, 9,329.

4. **Telegrams.**—The following table shows the number of telegrams dispatched to places within Australia and to adjacent islands and to ships at sea, according to the class of message transmitted.

#### TELEGRAMS DISPATCHED WITHIN AUSTRALIA, 1961-62

('000.)

State	Paid and collect							Unpaid (departmental)	Total telegrams
	Ordinary	Meteorological	Urgent	Radio-grams	Press	Letter-grams	Total		
New South Wales	6,042	236	236	67	45	22	6,648	236	6,884
Victoria	3,680	160	149	6	23	9	4,027	129	4,156
Queensland	3,090	218	91	89	46	20	3,554	132	3,686
South Australia	1,469	99	49	18	18	16	1,669	45	1,714
Western Australia	1,463	154	21	83	13	16	1,750	36	1,786
Tasmania	421	47	12	1	2	6	489	24	513
<b>Australia</b>	<b>16,165</b>	<b>914</b>	<b>558</b>	<b>264</b>	<b>147</b>	<b>89</b>	<b>18,137</b>	<b>602</b>	<b>18,739</b>

With the steady expansion of telephone and radio communication networks since the second world war, the number of telegrams dispatched to places within Australia and to adjacent islands and to ships at sea has decreased, with few interruptions of trend, since the peak of 35,970,000 in 1945-46.

For particulars of telegrams received from, and dispatched to, other countries, *see* § 5 para. 2, pages 628-9.

### § 4. Telephones

1. **General.**—Particulars of the total mileage of lines used exclusively for telephone purposes are not available, but are combined with all other line mileage. Particulars of the total single wire mileage used for telephone, trunk and/or telegraph purposes are shown in § 3, para. 2, above. Developments in the telephone system in recent years have been dealt with in previous issues of this Year Book.

2. **Summary.**—Particulars relating to the telephone services in each State at 30th June, 1962, are shown in the following table.

#### TELEPHONE SERVICES: SUMMARY, 30th JUNE, 1962

Particulars	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Aust.
Exchanges	2,130	1,744	1,306	737	762	377	7,056
Services in operation	'000 666	536	215	153	98	51	1,719
Instruments in operation	'000 949	728	289	211	134	71	2,382
(i) Subscribers' instruments	'000 929	712	280	204	129	68	2,322
(ii) Public telephones	'000 10	6	4	2	2	1	25
(iii) Other local instruments	'000 10	10	5	5	3	2	35
Instruments per 100 of population	23.5	24.4	18.8	20.7	17.7	19.8	22.3

Of the total telephone services (1,718,569) in operation at 30th June, 1962, 652,692 or 38 per cent. were connected to exchanges situated beyond the limits of the metropolitan telephone networks, and 1,353,315 or 79 per cent. were connected to automatic exchanges.

3. **Trunk Line and Local Calls.**—Following the introduction of a scheme of extended local service areas on 1st May, 1960, whereby many telephone calls which would previously have been short distance trunk calls became local calls, precise statistics distinguishing between local calls and trunk line calls are no longer available. However, estimates of local and trunk line traffic during 1961–62 are as follows:—effective paid local calls, 1,650 million, trunk line calls, 76.5 million, representing averages of 960 local calls and 45 trunk calls per service respectively.

4. **Oversea Telephone Services.**—These services are provided by the Overseas Telecommunications Commission (see § 5, para. 1) for operation by the Postmaster-General's Department. At 30th June, 1962, telephone calls could be made from Australia direct to 123 countries. International telephone calls to and from Australia during 1961–62 numbered 135,664, an increase of 7,407 or 6 per cent. on 1960–61. A direct radiotelephone service was opened during the year to Vila in the New Hebrides. Switched services were established with British Honduras, British Guiana, Jamaica, Windward Islands, Leeward Islands, Balearic Islands, Canary Islands and Faroe Islands.

5. **World Telephone Statistics, 1962.**—The following table shows the number of telephones in use in various countries with two million or more telephones at 1st January, 1962, together with the number per 100 of population and the proportion in each country to the world total.

WORLD TELEPHONE STATISTICS(a) AT 1st JANUARY, 1962

Country	Number of telephones '000	Telephones per 100 of population	Proportion of total (per cent.)
United States of America .. .. .	77,422	42	51.6
United Kingdom(b) .. .. .	8,609	16	5.8
Germany, Federal Republic of .. .. .	6,509	12	4.4
Japan(b) .. .. .	6,345	7	4.2
Canada .. .. .	6,020	33	4.0
U.S.S.R. .. .. .	5,119	2	3.4
France .. .. .	4,649	10	3.1
Italy .. .. .	4,235	9	2.8
Sweden .. .. .	2,904	39	1.9
Australia(c) .. .. .	2,382	22	1.6
Other .. .. .	25,866	..	17.2
<i>Total</i> .. .. .	<i>150,060</i>	<i>..</i>	<i>100.0</i>

(a) Partly estimated. Information derived, in the main, from the *World's Telephones* compiled by the American Telephone and Telegraph Company. (b) At 31st March, 1960. (c) At 30th June, 1962.

## § 5. Oversea Telecommunication Services; Radiocommunication Stations Authorized

1. **General.**—The Overseas Telecommunications Commission (Australia) is the authority responsible for the operation of Australia's external telecommunication services by cable and radio.

The Commission was established in August, 1946, under the *Overseas Telecommunications Act*. This Act implemented, in Australia, a recommendation of the 1945 Commonwealth Telecommunications Conference for national ownership of the external telecommunication services of the British Commonwealth countries concerned and for the establishment of a representative advisory board, the Commonwealth Telecommunications Board, to co-ordinate their development.

The Commission provides telegraph, telex, photo-telegraph, and, in conjunction with the Postmaster-General's Department, telephone services with overseas countries and Australian territories. Leased one and two-way circuits are also provided for large commercial users. In addition, it operates the Australian coastal radio services for communication with ships at sea in Australian waters and high frequency radio services for communication with ships in any part of the world. The Commission's coastal radio stations also provide certain services to a number of remote stations within Australia and its territories.

Details of overseas communication systems operating in Australia prior to 1946 and developments leading to the establishment of the Commission were published in Official Year Book No. 37, pages 220-4.

To meet Australia's increasing demand for overseas communication channels, and because of limitations to performance and capacity inherent in current forms of telegraph cables and high frequency radio systems, the Commission is at present engaged, in partnership with the overseas telecommunications authorities of Britain, Canada and New Zealand, in constructing and laying a large capacity telephone cable across the Pacific Ocean, connecting Australia, New Zealand and Canada via Suva and Honolulu. This project stems from the Pacific Cable Conference held in Sydney, 28th September to 20th October, 1959, at which representatives of Britain, Canada, Australia and New Zealand met to discuss and make recommendations on the feasibility of such a cable, and to formulate a financial and construction programme.

Following agreement of the four governments concerned in the plan, work was commenced in August, 1960, and the first section, between Australia (Sydney) and New Zealand (Auckland), opened in July, 1962. The next section between New Zealand (Auckland) and Fiji (Suva), was opened in December, 1962, and when completed late in 1963, the cable will form part of the projected British Commonwealth round-the-world large capacity cable scheme, in which a complementary cable between Britain and Canada was officially opened late in 1961.

The Pacific Cable project is administered by a management committee consisting of representatives of the overseas telecommunication authorities of the four partner Governments.

**2. International Telegrams.**—(i) *Number of Telegrams.* The number of telegrams received from and dispatched overseas in each State during 1961-62 is shown hereunder.

#### INTERNATIONAL TELEGRAMS, 1961-62

('000)

Particulars	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Aust.
Received .. ..	731	(a) 424	94	69	75	(a) 22	1,415
Dispatched .. ..	671	488	101	77	77	21	1,435

(a) Estimated.

The traffic in international telegrams to and from Australia has not varied greatly in recent years.

(ii) *Number of Words.* Particulars of the international business, originating and terminating in Australia, transacted over the cable and radio services during 1961-62 are shown in the following table.

**INTERNATIONAL TELEGRAMS: NUMBER OF WORDS, AUSTRALIA, 1961-62(a)**  
(‘000 words)

Class of telegram	Words transmitted to—			Words received from—		
	United Kingdom	Other countries	Total	United Kingdom	Other countries	Total
Letter .. ..	4,059	10,669	14,728	3,950	9,395	13,345
Ordinary .. ..	4,206	9,880	14,086	4,092	8,061	12,153
Press .. ..	2,890	1,133	4,023	8,971	2,692	11,663
Government .. ..	137	540	677	989	1,187	2,176

Other .. ..	..	8	8	..	117	117
<b>Total .. ..</b>	<b>12,250</b>	<b>23,252</b>	<b>35,502</b>	<b>18,707</b>	<b>22,687</b>	<b>41,394</b>

(a) Year ended 31st March.

Words transmitted to “ Other Countries ” included 9,848,190 words to other Commonwealth countries and 13,403,241 to foreign countries. Words received from “ Other Countries ” included 11,399,266 words from other Commonwealth countries and 11,287,528 from foreign countries.

3. *Oversea Telephone Services.*—See § 4. para. 4, page 627 for particulars of these services.

4. *Coast Stations.*—At 30th June, 1962, there were 104 radio stations established at points around the Australian coast and 15 about the coast of Papua and New Guinea and other External Territories. During the year ended 31st March, 1962, these stations handled 771,454 messages (622,679 paying, 33,405 free traffic and 115,370 meteorological) with a total of 17,137,877 words.

5. *Radiocommunication Stations Authorized.*—The following table shows particulars of the different classes of radiocommunication stations authorized in Australia and the External Territories at 30th June, 1962. Figures relate to radiocommunication (radio telegraph and radio telephone) stations only; particulars of broadcasting stations and of broadcast listeners’ licences are shown on pages 633 and 637 respectively.

## RADIOCOMMUNICATION STATIONS AUTHORIZED, 30th JUNE, 1962

(a) Stations established at fixed locations for communication with other stations similarly established.  
 (b) Stations established in out-back areas for communication with control stations such as those of the Royal Flying Doctor Service. (c) Stations established at fixed locations for communication with mobile stations. (d) Land stations for communication with ocean-going vessels. (e) Equipment installed in aircraft (aeronautical), motor vehicles (land mobile services), harbour vessels (harbour mobile services) and ocean-going vessels (ships), and mobile equipment of organizations such as the Royal Flying Doctor Service. (f) Includes 177 stations which cannot be classified according to States, etc.

## BROADCASTING AND TELEVISION

## § 1. General

Broadcasting and television services in Australia operate under the *Broadcasting and Television Act 1942–1960* and comprise the National Broadcasting Service, the National Television Service, the Commercial Broadcasting Service and the Commercial Television Service. General control of these services is a function of the Australian Broadcasting Control Board (see below). Details of each service will be found on pages 631–6. Licence fees for commercial broadcasting and television stations are payable under the *Broadcasting and Television Stations Licence Fees Act 1956*.

The Australian Broadcasting Control Board, which was constituted on 15th March, 1949, consists of five members (including two part-time), and operates under the Ministerial jurisdiction of the Postmaster-General. Its principal functions, as set out in section 16 of the *Broadcasting and Television Act 1942-1960*, are to ensure:—(a) that services by broadcasting stations and television stations are provided in accordance with plans prepared from time to time by the Board and approved by the Minister; (b) that the technical equipment and operation of such stations are in accordance with such standards and practices as the Board considers to be appropriate; (c) that adequate and comprehensive programmes are provided by the stations to serve the best interests of the general public; and (d) that sources of interference to the transmission and reception of broadcast and televised programmes are detected and that assistance is given in the detection and prevention of such interference. In addition, the Board may exercise such other functions as are prescribed in relation to broadcasting stations and television stations. For information as to the powers and constitution of the Board, see Official Year Book No. 46 and earlier issues.

The Australian Broadcasting Commission, which consists of seven members, at least one of whom must be a woman, controls the activities of the National Broadcasting Service and the National Television Service.

## § 2. Broadcasting

1. *The National Broadcasting Service.*—(i) *General.* In sound broadcasting, the programmes of the National Broadcasting Service are provided by the Australian Broadcasting Commission, and the provision and operation of transmitters and technical facilities in the studios are the responsibility of the Postmaster-General's Department.

(ii) *Technical Facilities.* At 30th June, 1962, the National Broadcasting Service comprised 70 transmitting stations, 61 medium frequency and 9 high frequency. Medium-frequency station 2AN Armidale (New South Wales) is a recent addition. Details of the call signs and locations of stations at 30th June, 1961 were given in Official Year Book No. 48, pages 572-3.

The medium-frequency transmitters operate in the broadcast band 525 to 1,605 kilocycles per second. The high-frequency stations, using frequencies within the band 3 to 30 megacycles per second, provide service to listeners in sparsely populated parts of Australia such as the north-west of Western Australia, the Northern Territory, and northern and central Queensland, and in Papua and New Guinea and adjacent islands.

Many of the programmes provided by country stations are relayed from the capital cities, high-quality programme transmission lines being used for the purpose. A number of programme channels are utilized to link national broadcasting stations in the capital cities of Australia, and, when necessary, this system is extended to connect both the national and commercial broadcasting stations.

In June, 1962, 48 of the Australian medium-frequency stations were situated outside the six State capital cities. Additional country stations are to be established, and, when these additions are complete, the medium-frequency and high-frequency stations together will provide for clear reception of the programmes of the National Broadcasting Service in practically every part of Australia.

(iii) *Programme Facilities.* (a) *General.* The programmes of the Australian Broadcasting Commission cover a wide range of activities, which are indicated briefly in the following paragraphs. The proportion of broadcasting time allocated to the various types of programme during 1961-62 was as follows:—Classical music, 26.2 per cent.; light entertainment, 18.0 per cent.; light music, 10.3 per cent.; news, 7.3 per cent.; talks, 6.3 per cent.; sporting, 5.3 per cent.; drama and features, 3.7 per cent.; education, 3.6 per cent.; religious, 3.5 per cent.; parliament, 3.5 per cent.; children's session, 2.8 per cent.; rural, 1.8 per cent.; non-departmental, 7.7 per cent.

(b) *Music.* The A.B.C., in addition to its extensive activities in the field of musical broadcasting, is one of the largest concert-giving organizations in the world. Its regular broadcasts command a large audience, and a total of 950,768 people attended A.B.C. concerts during 1961-62. There are symphony orchestras in Sydney, Melbourne, Brisbane, Adelaide, Perth and Hobart, which have developed from the studio broadcasting orchestras set up in 1936.

In 1961-62, the A.B.C. organized 570 public orchestral concerts (including 188 free concerts for school children and 46 free concerts for adults) and 177 public recitals by famous artists throughout the Commonwealth. In 1959, the Czech Philharmonic Orchestra became the first overseas orchestra to visit Australia.

(c) *Drama and Features.* Drama programmes are designed to give listeners opportunities, which they might not otherwise have, of hearing the world's great plays as well as adaptations of the best modern stage plays and also those written specially for broadcasting. The main regular radio drama programmes are broadcast on Sunday afternoons and Sunday and Monday evenings, and special series of longer plays are also given at various times. In recent years, the technique of the feature programme has also been developed. The feature is a form of entertainment which is unique to radio, consisting of specially written programmes designed to present information in an interesting way.

(d) *Youth Education.* The A.B.C. provides a regular series of broadcasts to schools as an addition to normal class-room education. The total number of listening schools at the end of June, 1962, was 9,984 or about 95 per cent. of all schools, State and private, throughout the Commonwealth. (See also Chapter XVIII. Education, Cultural Activities, and Research, on this subject.)

(e) *Talks.* The aim of the Talks Department is to provide programmes which will keep the listener well informed on current affairs and on general topics. Many of the talks in the first category are now presented in a magazine type of session consisting of a number of short items linked by a narrator. An extension of this type of programme is the documentary. Major controversial topics are covered in sessions such as the "Nation's Forum of the Air" and "I Put it to You". Another session in this type of programme is "News Review", containing comments on the news of the day recorded over landline from all States of the Commonwealth and, in the case of significant world events, from overseas by radio-telephone.

(f) *Rural Broadcasts.* The Rural Broadcasts Department exchanges programmes with several overseas countries and provides service, educational, and entertainment programmes all designed to be of value to the man-on-the-land and industries allied with primary production. A complete weather and marketing service is provided. Rural programmes are broadcast on a national, State, and regional basis, with separate programmes originating from 20 Regional Stations and relayed through a total of 33 stations. The 20 Rural Officers in Regional Stations present specific information and educational programmes in relation to their own regions. During 1961-62, a total of 7,486 rural talks and interviews, as well as 8,684 weather reports and 6,968 market reports were broadcast.

(g) *News.* The Commission collects all its Australian (including Papua and New Guinea) news through its own staff journalists and part-time correspondents. It also maintains a news room in London for the selection and transmission of news obtained from major overseas agencies, and has special representatives in south-east Asia. Regional bulletins are broadcast from country centres and also from capital cities to cover near-city districts. Radio Australia (the Overseas Service of the A.B.C.) broadcasts Australian and overseas news daily in English, French, Mandarin, Indonesian, Japanese, Cantonese, Vietnamese and Thai, with special attention to Asia and the Pacific. Each day, the A.B.C. re-broadcasts two news bulletins from the British Broadcasting Corporation. The A.B.C. broadcasts more than 160 news bulletins each day, including those given over Radio Australia.

(h) *Other Activities.* The proceedings of the Federal Parliament are broadcast regularly on one of the two national transmitters in each capital city, one in Newcastle and one domestic short-wave station (VLR).

The National Children's Hour, presented seven days a week, is composed of over 40 programme items, including stories, music, games, art, literature, natural history and sport.

In co-operation with the various religious denominations, the A.B.C. broadcasts several religious sessions each week-day in addition to those given on Sundays. These religious broadcasts include relays of normal church services and a variety of special programmes of talks and sacred music. The modern trend towards the use of religious drama is also followed.

The variety and sporting programmes of the A.B.C. provide the lighter side of the service. With its variety session, the policy of the A.B.C. is to assist local artists in order to increase the amount of first-class talent in this country, and encouragement is also given to Australian composers of light music.

A comprehensive coverage of sport at home and abroad is provided by the A.B.C. On Saturday afternoons, the sporting panel provides listeners with progress results, scores and descriptions from several fields of sport. Events of international interest such as Test matches and the Davis Cup are covered by simultaneous descriptions from A.B.C. commentators.

**2. The Commercial Broadcasting Service.**—Commercial broadcasting stations are operated under licences granted and renewed by the Postmaster-General after taking into consideration any recommendations which have been made by the Broadcasting Control Board. The initial period of a licence is five years and renewals are granted for a period of one year. The fee payable for a licence is £25 on the grant of the licence, and thereafter £25 a year plus one per cent. of the gross earnings of the station from the broadcasting of advertisements or other matter during the preceding financial year. Licensees of these stations rely for their income on the broadcasting of advertisements and other publicity.

**3. Oversea Broadcasting Service.**—There are seven high-frequency stations at Shepparton, Victoria, which provide the overseas service known as "Radio Australia". As in the case of the National Broadcasting Service, these stations are maintained and operated by the Postmaster-General's Department, and their programmes are arranged by the A.B.C. During certain periods, station VLG Lyndhurst is also used for the purpose of overseas transmission. The programmes, which give news and information about Australia presented objectively, as well as entertainment, are directed mainly to south-east Asia and the Pacific. The overseas audience has grown very substantially in recent years, as evidenced by a large and increasing number of letters from listeners abroad.

**4. Broadcasting Stations.**—The following table shows the number of broadcasting stations in operation at 30th June, 1962.

BROADCASTING STATIONS, 30th JUNE, 1962

Type of station	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Papua and New Guinea	Total
National—										
Medium frequency	17	5	13	8	7	4	4	2	1	61
High frequency—										
Domestic	1	(a) 3	2	..	2	..	..	..	1	9
Overseas	..	7	..	..	..	..	..	..	..	7
Commercial	37	20	21	8	14	8	1	1	..	110

(a) One station (VLG) is shared between domestic and overseas service.

Tables showing the call sign, location, frequency and aerial power of national and commercial broadcasting stations in operation at 30th June, 1962, are shown in *Transport and Communication*, Bulletin No. 53.

### § 3. Television

1. **General.**—Television services in Australia operate under the *Broadcasting and Television Act 1942*—1960 and comprise the National Television Service and the Commercial Television Service.

2. **The National Television Service.**—(i) *General.* The A.B.C. provides the programmes for the National Television Service from stations provided and operated by the Postmaster-General. At 31st December, 1962, seven stations had been established—ABN Sydney, commenced operation, 5th November, 1956; ABV Melbourne, commenced operation, 18th November, 1956; ABQ Brisbane, commenced operation, 2nd November, 1959; ABS Adelaide, commenced operation, 11th March, 1960; ABW Perth, commenced operation, 7th May, 1960; and ABT Hobart, commenced operation, 4th June, 1960—each of which operates on Channel 2; ABC channel 3, Canberra, commenced operation 18th December, 1962. Additional national television stations have been authorized as follows:—New South Wales—Central Tablelands area ABCN (channel 1), Newcastle—Hunter River area ABHN (channel 5), Richmond—Tweed Heads area ABRN (channel 6), Illawarra area ABWN (channel 5A); Victoria—Bendigo area ABEV (channel 1), Ballarat area ABRV (channel 3), Latrobe Valley area ABLV (channel 4), Goulburn Valley area ABGV (channel 3); Queensland—Darling Downs area ABDQ (channel 3), Rockhampton area ABRQ (channel 3), Townsville area ABTQ (channel 3); Tasmania—north-eastern Tasmania area ABNT (channel 3). It is planned that these services will be in operation by June, 1964.

(ii) *Programme Facilities.* (a) *General.* The television programmes provided by the A.B.C. cover a wide range of activities. The proportion of television time allocated among the A.B.C.'s various departments to 30th June, 1962, was as follows:—Drama and features, 22.1 per cent.; talks, 18.4 per cent.; sport, 11.1 per cent.; children's session, 10.8 per cent.; news, 9.1 per cent.; light entertainment, 8.0 per cent.; education, 7.4 per cent.; music, 3.2 per cent.; religion, 2.8 per cent.; rural services, 2.5 per cent.; non-departmental, 4.6 per cent. A summary of the activities of the departments in the field of television is given in the following paragraphs. Transmission hours in Sydney, Melbourne, Brisbane, Adelaide, Perth and Hobart, for the year ended 30th June, 1962, totalled 17,135.

(b) *Talks.* In television, talks cover a very wide field, ranging from commentaries on international affairs to panel games and outside telecasts of public events. Discussions, topical interviews, magazine programmes, women's programmes, demonstrations and film and studio documentaries are all part of the regular output.

(c) *Drama and Features.* A considerable proportion of television time is devoted to drama and features, and "live" television plays featuring Australian artists may usually be seen fortnightly in all State capitals. A Television Writers' Workshop gives writers practical advice on television writing. Of 24 live plays produced during 1961–62, 9 were by Australian authors and, in addition, twelve half-hour episodes of the locally written serials, "The Outcasts" and "The Patriots", were telecast.

(d) *Music.* During 1957, the A.B.C.'s musical activities extended to the field of television. A number of public concerts and studio performances were successfully telecast and there is reason to believe that the new medium will contribute to the further development of musical appreciation in Australia.

(e) *Rural Services.* Weather reports and forecasts are telecast six evenings a week on National T.V. stations. In Sydney and Melbourne, there are two half-hour magazines each week, namely "Country Call" and "Town and Country". These include rural film items from all States, topical interviews and demonstrations, and gardening items. Outside broadcast programmes are devised in all States at Royal Shows and other places of rural interest. The National Junior Farmer Radio and Television Competition is a major annual event. Film items are regularly exchanged with member countries of the European Broadcasting Union. In all States, a weekly programme is "To Market, To Market", a practical buying guide for housewives. A half-hour rural magazine programme, "Country Call", which includes local interviews, demonstrations and films, and films syndicated from Sydney, was commenced in Brisbane, Adelaide, Perth and Hobart.

The aim of rural broadcasts in television is to provide consumer-interest material for urban viewers and to convey to them aspects of food production and country life and to provide a rural news and extension service to farmer viewers.

(f) *Education.* The A.B.C. provides a daily television programme for schools in all Australian States with certain series repeated to meet their convenience. In addition, there is a daily programme for pre-school children entitled "Kindergarten Playtime". At the adult level, there are two television programmes weekly, designed in series and known as "University of the Air". These programmes are presented in the evening.

(g) *News.* Television news bulletins and newsreels have been included in the programmes presented in both Sydney and Melbourne since the television services began in November, 1956. Since then, those news items have been included in the programmes of other State capitals. The A.B.C. is a member of the British Commonwealth International Newsfilm Agency (B.C.I.N.A.), through which it receives world-wide television newsfilm and provides newsfilm of Australian origin for international distribution.

(h) *Other Activities.* Special television programmes are presented for children, including filmed material obtained on an exchange basis from overseas television organizations. Special religious services and programmes have also been televised. Outside television cameras have covered a number of sporting events, including the Olympic Games, Davis Cup tennis, Test and Sheffield Shield cricket, swimming championships and the Commonwealth Games.

3. **The Commercial Television Service.**—Commercial television stations are operated under licences granted by the Postmaster-General. Licences for commercial television stations have been granted as follows:—*Australian Capital Territory*—Canberra area CTC (channel 7), commenced operations 2nd June, 1962; *New South Wales*—Sydney ATN (channel 7), commenced operations 2nd December, 1956; TCN (channel 9), commenced operations 16th September, 1956; CBN (channel 8), Central Tablelands area, commenced operations 17th March, 1962; NBN (channel 3), Newcastle—Hunter River area, commenced operations 4th March, 1962; RTN (channel 8), Richmond—Tweed Heads area, commenced operations 12th May, 1962; WIN (channel 4), Illawarra area, commenced operations 18th March, 1962; *Victoria*—Melbourne GTV (channel 9), commenced operations 19th January, 1957; HSV (channel 7), commenced operations 4th November, 1956; BCV (channel 8), Bendigo area, commenced operations 23rd December, 1961; BTV (channel 6), Ballarat area, commenced operations 27th April, 1962; GLV (channel 10), Latrobe Valley area, commenced operations 9th December, 1961; GMV (channel 6), Goulburn Valley area, commenced operations 23rd December, 1961; *Queensland*—Brisbane BTQ (channel 7), commenced operations 1st November, 1959; QTQ (channel 9), commenced operations 16th August, 1959; DDQ (channel 10), Darling Downs area, commenced operations 13th July, 1962; TNQ (channel 7), Townsville area, commenced operations, 1st November, 1962; RTQ (channel 7), Rockhampton area, expected to commence operations in 1963; *South Australia*—Adelaide ADS (channel 7), commenced operations 24th October, 1959; NWS (channel 9) Adelaide, commenced operations 5th September, 1959; *Western Australia*—Perth TVW (channel 7) commenced operations 16th October, 1959; *Tasmania*—Hobart TVT (channel 6), commenced operations 23rd May, 1960; TNT (channel 9), north-eastern Tasmania area, commenced operations 26th May, 1962.

The initial grant of a licence is for a period of five years and thereafter the licence is renewable annually. The fee payable is £100 for the first year and thereafter £100 a year plus one per cent. of the station's gross earnings from the televising of advertisements or other matter during the preceding financial year.

4. **Extension of Television Services.**—The Government has approved the establishment of a national station in each of the following areas, and applications for the grant of licences to operate a commercial television station in each area were invited on 13th November, 1961:—*New South Wales*—Upper Namoi (Tamworth); South Western Slopes and Eastern Riverina (Wagga-Cootamundra); Grafton-Kempsey; Manning River (Taree); Central

Western Slopes (Dubbo); Murrumbidgee Irrigation Area (Griffith); Bega-Cooma; Broken Hill; *Victoria*—Upper Murray; Mildura; Murray Valley (Swan Hill); *Queensland*—Wide Bay (Maryborough); Cairns; Mackay; Southern Downs (Warwick); *South Australia*—Spencer Gulf North; South East (Mt. Gambier); *Western Australia*—Bunbury; Southern Agricultural Area (Katanning-Albany); Central Agricultural Area (Northam-York). The Government has now approved the grant of licences for the Upper Namoi, South Western Slopes and Eastern Riverina, Grafton-Kempsey, Upper Murray, and Wide Bay areas. The grant of a licence in the Spencer Gulf Area has been deferred, as the only applicant did not desire to proceed with the application at present. No applications were received for the Southern Agricultural or Central Agricultural Areas in Western Australia. The Australian Broadcasting Control Board will hold public inquiries, pursuant to the *Broadcasting and Television Act 1942–1960*, into the applications for the remaining areas during 1963.

When the stations commence operation, it is estimated that 91 per cent. of the Australian people will be able to receive a television service.

#### § 4. Licences, Revenue from Fees, etc.

1. **Broadcast Listeners' and Television Viewers' Licences.**—(i) *General.* Broadcast listeners' and television viewers' licences are issued at post offices in accordance with the provisions of the *Broadcasting and Television Act 1942–1960*, which stipulates that, except as prescribed, a person shall not use, maintain or have in his possession a broadcast or television receiver unless there is in force a licence which applies to that receiver. A broadcast listener's licence authorizes the operation of any broadcast receiver, and a television viewer's licence any television receiver, which is:—(a) in the possession of the holder of a licence, or of a member of his family, at the address specified in the licence and/or ordinarily kept at that address; (b) installed in a vehicle which is ordinarily in the possession of the holder, or a member of his family, and is ordinarily kept at that address while not in use.

The fee for a broadcast listener's licence or a renewal thereof is:—Zone 1, £2 15s.; Zone 2, £1 8s. Zone 1 is the area within approximately 250 miles of specified broadcasting stations and Zone 2 is the remainder of the Commonwealth. The fee for a licence granted to certain types of pensioners is 10s. in Zone 1 and 7s. in Zone 2.

A licence may be granted free of charge to a blind person over 16 years of age or to a person or authority conducting a school. Inmates of a hospital or charitable institution are covered by the licence held by the institution.

The fee for a television licence is £5 except in the case of certain classes of pensioners who pay a fee of £1 5s. Licences are granted free to blind persons and to schools.

Amendments to the *Broadcasting and Television Act 1942–1960* during 1960 included provisions relating to the licensing of broadcast receivers and television receivers installed in lodging houses or let for hire. The relevant sections were proclaimed to come into force on 3rd July, 1961. Any firm carrying on a business that consists wholly or partly in letting out receivers on hire is required to licence each such receiver.

Hirers' licences may be granted for any period not exceeding one year, and may apply to one or a number of receivers. Lodging house licences are issued for a period of one year, and lodging house keepers are required to hold one licence for each broadcast receiver or television receiver provided by them.

(ii) *Broadcast Listeners' Licences.* (a) *Number in Force.* The following table shows the number of broadcast listeners' licences in force at five-year intervals from 1925 to 1960 and for 1961 and 1962.

## BROADCAST LISTENERS' LICENCES IN FORCE

At 30th June—	N.S.W.(a)	Vic.	Qld	S.A.(b)	W.A.	Tas.	Aust.
1925 .. ..	34,857	20,290	1,267	3,331	3,562	567	63,874

(a) Includes the Australian Capital Territory. (b) Includes the Northern Territory. (c) Excludes licences for receivers in excess of one. These licences were introduced in July, 1942, and were abolished on 31st December, 1951.

Of the 2,220,462 broadcast listeners' licences in force at 30th June, 1962, 1,307,125 or 58.9 per cent. were held by persons living in metropolitan areas and 913,337 or 41.1 per cent. by persons in country areas. Short-term hirers' licences (included above) at 30th June, 1962, were:—New South Wales, 472; Victoria, 119; Queensland, 38; and South Australia, 766.

(b) *Revenue Received from Fees.* The following table shows the revenue received from broadcast listeners' licence fees for the years 1957–58 to 1961–62.

REVENUE RECEIVED FROM BROADCAST LISTENERS' LICENCE FEES  
(£'000)

Year	N.S.W.(a)	Vic.	Qld	S.A.(b)	W.A.	Tas.	Aust.

1961–62 .. ..	1,957	1,452	797	615	407	185	5,413

(a) Includes the Australian Capital Territory.

(b) Includes the Northern Territory.

(iii) *Television Viewers' Licences.* (a) *Number in Force.* The following table shows the number of television viewers' licences in force each year at 30th June, 1957, to 1962.

## TELEVISION VIEWERS' LICENCES IN FORCE

At 30th June—	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Aust.
1957 .. ..	28,912	44,986	..	..	..	(a) { 11	73,909
1958 .. ..	143,422	147,721	..	..	..	{ 43	291,186
1959 .. ..	300,871	270,073	360	6,124	..	{ 74	577,502
1960 .. ..	409,334	353,091	67,337	84,967	35,604	4,662	954,995
1961 .. ..	488,516	401,395	113,954	124,808	69,628	18,985	1,217,286
1962 .. ..	564,707	460,558	142,422	143,794	83,951	29,003	1,424,435

(a) These licences were for television sets in the north coast area of Tasmania which were able to receive programmes from Victoria.

Of 1,424,435 television viewers' licences in force at 30th June, 1962, 46,866 were held by short-term hirers, and therefore could not be separated into metropolitan licences or country licences. Persons living in the metropolitan area held 1,078,393 or 78 per cent. of the remainder. Short-term hirers' licences (included above) at 30th June, 1962, were:—New South Wales, 10,067; Victoria, 8,460; Queensland, 7,754; South Australia, 13,095; Western Australia, 5,934; and Tasmania, 1,556.

(b) *Revenue Received from Fees.* The following table shows the revenue received from television viewers' licence fees during the years 1957-58 to 1961-62.

1961-62 .. ..	2,623	2,170	664				6,626

(a) £262.

(b) £356.

## CHAPTER XV

### WELFARE SERVICES

NOTE.—Further information on subjects dealt with in this chapter may be found in the annual *Bulletin Finance, Part I.—Public and Private Finance*. Current and summarized information is contained in the *Quarterly Summary of Australian Statistics* and the *Monthly Review of Business Statistics*.

#### COMMONWEALTH EXPENDITURE ON SOCIAL AND HEALTH SERVICES

NOTE.—The Commonwealth Welfare Services outlined in this chapter are those administered by the Commonwealth Department of Social Services. Particulars of benefits provided under the National Health Service appear in Chapter XVII. Public Health, page 698.

Particulars of Commonwealth capital expenditure on mental hospitals and the Anti-Tuberculosis campaign are given in Chapter XVII. Public Health (*see* pp. 700 and 703). Grants are made to private organizations for the construction of homes for elderly people (*see* p. 654).

Information concerning the cost of administering each benefit separately is not compiled. Particulars of the cost of administering the Department of Health and the Department of Social Services may be found in Chapter XXI. Public Finance—Commonwealth Consolidated Revenue Fund Expenditure.

#### National Welfare Fund

The National Welfare Fund was established by the *National Welfare Fund Act 1943* to finance a scheme of national welfare. In introducing this measure to Parliament, the Prime Minister said that part of the scheme was to be introduced immediately, and part was to be deferred until after the end of the war. A certain balance, which would therefore accrue to the fund, would be invested in Commonwealth securities, and would thus provide finance for the war effort.

The fund operated from 1st July, 1943. At its commencement, it was used to finance funeral benefits and maternity allowances. Other social and health benefits were made a charge on the fund from time to time. At present, expenditure on all benefits except repatriation and a few minor social and health benefits is met from the fund. The fund is used only to finance the benefits themselves; it is not used to finance the cost of administering the benefits, or of capital works associated with the benefits.

For particulars of the income of the fund, *see* Chapter XXI. Public Finance—Commonwealth Consolidated Revenue Fund Expenditure. The following table sets out expenditure from the fund during 1961–62.

(a) Payments for some Health Services to residents of the Northern Territory and the Australian Capital Territory are included in the amounts shown for States. (b) Includes special benefits to migrants in reception and training centres. (c) Includes payments to Bush Nursing Centres and the Royal Flying Doctor Service. (d) Paid to the State Governments as a contribution towards the cost of surveys and the maintenance of institutions for the treatment of tuberculosis. (e) Includes costs of manufacturing B.C.G. Vaccine for distribution throughout Australia. (f) This item covers the cost of district laboratory services, the free supply of prophylactic materials and biological products (e.g., insulin, poliomyelitis and diphtheria prophylactics), the supply and maintenance of hearing aids for children, subsidies to voluntary organizations conducting home-nursing services, and certain costs associated with the blood transfusion services of the Australian Red Cross Society. (g) Includes £255,990 for the production of poliomyelitis vaccine, £100,000 for running expenses of the Blood Fractionation Plant at the Commonwealth Serum Laboratories, £107,668 for the Home Nursing Service throughout Australia, and £20,300 for the production of smallpox vaccine.

Expenditure from the fund during each of the years 1957-58 to 1961-62, and the amount per head of population for each service during 1961-62, are shown in the following table.

## COMMONWEALTH SOCIAL SERVICES

## § 1. Introduction

Under the provisions of section 51 of the Constitution, the Commonwealth Government is empowered to legislate on:—

“(xxiii) Invalid and old-age pensions:

(xxiiiA) The provision of maternity allowances, widows' pensions, child endowment, unemployment, pharmaceutical, sickness and hospital benefits, medical and dental services (but not so as to authorize any form of civil conscription), benefits to students and family allowances:”.

The latter paragraph was inserted in the constitution after being accepted by the electors at a referendum on 28th September, 1946. The enabling Act was assented to on 19th December, 1946.

Before 1947, each social service benefit was paid under a separate Act. On 1st July, 1947, with the passage of the *Social Services Consolidation Act 1947*, all Acts providing social service benefits were amalgamated. This Act eliminated certain anomalies and obsolete provisions and changed the title “old-age pension” to “age pension”. The word “Consolidation” was dropped from the short title of the Act in 1954. The Act is at present styled the *Social Services Act 1947–1962*.

The social service benefits provided by the Commonwealth Government, and the date on which each came into operation, are:—

Age pension	..	..	..	1st July, 1909
Child endowment (for other than first child)	..	..	..	1st July, 1941
Child endowment (for first child)	..	..	..	20th June, 1950
Commonwealth Rehabilitation Service	..	..	..	10th December, 1948
Funeral benefit	..	..	..	1st July, 1943
Invalid pension	..	..	..	15th December, 1910
Maternity allowance	..	..	..	10th October, 1912
Sickness benefit	..	..	..	1st July, 1945
Special benefit	..	..	..	1st July, 1945
Supplementary assistance (age, invalid and widow's pensions)	..	..	..	15th October, 1958
Unemployment benefit	..	..	..	1st July, 1945
Widow's pension	..	..	..	30th June, 1942
Wives' and children's allowances for pensioners who are invalids	..	..	..	8th July, 1943.

## § 2. Age and Invalid Pensions

Age pensions are payable to men, 65 years of age and over, and women, 60 years of age and over, who are British subjects and who have resided in Australia continuously for at least 10 years, which need not be immediately prior to the date of claim for a pension. If a person has completed five years but not 10 years continuous residence and has lived in Australia for periods which in total exceed 10 years, the period of continuous residence otherwise required is reduced by the total of his periods of residence in Australia in excess of 10 years. Absence in a Territory of the Commonwealth, any periods of absence during which a person's home remained in Australia, and absences in certain other circumstances, are counted as residence. Residence in New Zealand or the United Kingdom may be treated as residence in Australia.

Invalid pensions are payable to persons, 16 years of age and over, who have resided in Australia for a continuous period of five years (including certain absences at any time), and who are permanently incapacitated for work to the extent of at least 85 per cent., or permanently blind. If the incapacity or blindness first occurred outside Australia, except

during a temporary absence, a total of 10 years' residence is necessary. But if a person has completed five years but not 10 years continuous residence and has lived in Australia for periods which, in total exceed 10 years, the period of continuous residence otherwise required is reduced by the total of his periods of residence in Australia in excess of 10 years. Residence in New Zealand or the United Kingdom may be treated as residence in Australia. Certain absences do not affect eligibility.

Aboriginals, other than those who are nomadic or primitive, are eligible for age and invalid pensions on the same conditions as other members of the community.

A pension is not payable to:—an alien; a person who has deprived himself of property or income in order to qualify for a pension; a person whose annual rate of income (including pension) is £455 (£910 for a married couple) or more; a person who owns property apart from his permanent home and other exempt property, valued at £4,750 or more (£9,500 for a married couple). A pensioner with dependent children may, in certain circumstances, have additional income of 10 shillings a week for each child under 16 years of age.

Since 5th October, 1961, the maximum rate of pension has been £273 per annum (£5 5s. a week). The wife of an invalid pensioner (or an age pensioner who is permanently incapacitated for work or permanently blind) may be granted a wife's allowance of not more than £123 10s. per annum (£2 7s. 6d. a week). A child's allowance of £39 per annum (15s. a week) is also paid to an invalid pensioner for the first child under 16 years of age. The pension is increased, subject to the means test, by £26 per annum (10s. a week) for each other child under 16 years. Supplementary assistance of £26 per annum (10s. a week) is payable to single pensioners and to married pensioners whose spouses do not receive pension or allowance, if the pensioner pays rent and is considered to be entirely dependent on his pension. At 30th June, 1962, 524,794 age pensioners (88 per cent. of all age pensioners) and 90,576 invalid pensioners (93 per cent. of all invalid pensioners) were receiving the maximum pension.

If a pensioner is an inmate of a benevolent home, £1 17s. a week of his pension is paid to him. The rest is paid to the home for his maintenance. The balance is not paid to the home if the patient is in an infirmary ward, as payments under the Commonwealth Hospital Benefit Scheme are made in that case.

Age and invalid pensions (other than invalid pensions paid to blind persons) and allowances paid to wives of invalid pensioners (but not the child's allowance of 15s. a week) are subject to a means test which applies to income and to property. From March, 1961, the means tests previously applied separately on income and property were merged into one composite means test. The pension payable depends on the claimant's *means as assessed*. These consist of his annual rate of income plus a property component equal to £1 for each complete £10 of his net property above £200. A person's *means as assessed* may consist entirely of income, entirely of property component, or of various combinations of income and property component. The pension payable is calculated by deducting from the maximum annual rate of pension the amount by which the *means as assessed* exceeds £182. No pension is payable if the pensioner's property is £4,750 or more.

Certain types of income are excepted. The main exceptions are:—income from property; gifts or allowances from children, parents, brothers or sisters; benefits (other than annuities) from friendly societies; child endowment or other payments for children; Commonwealth health benefits and amounts received from registered benefit organizations.

Certain types of property are disregarded. They include the permanent home of the pensioner, his furniture and personal effects, the surrender value (up to £750) of life insurance policies, the capital value of annuities or contingent interests and the value of any reversionary interests.

For the purposes of the means test, the income and property of a married person are considered to be half the total income and property of the husband and wife unless they are legally separated or in other special circumstances. The pension is then assessed as for a single pensioner.

The following statement shows the rates of pension at 1st July, 1909, and the rates as they have been varied since that date, subject in all cases to income and property qualifications.

## MAXIMUM RATES OF PENSION PAYABLE(a)

	26 0	67 12	100 2		105 0	273 0	455 0

(a) Excludes amounts payable for wives and children of invalid pensioners and supplementary assistance.

(b) Additional pension of £6 10s. per annum (2s. 6d. a week) was payable to a pensioner with no income. Pensioners with income of less than 2s. 6d. a week were paid additional pension of 2s. 6d. less the amount of income.

(c) Variation according to change in retail price index number.

(d) Increase paid on 9th July, 1942, retrospective to 2nd April, 1942.

(e) Rate restored to £70 4s. per annum under National Security (Supplementary) Regulations 112A—Statutory Rule 315 of 1943.

NOTE.—Provision for variations according to retail price index numbers was repealed on 6th April, 1944.

The number of age pensioners at 30th June, 1962, was 594,012 of whom 185,583 (or 31 per cent.) were males and 408,429 (or 69 per cent.) were females. This was an increase of 31,222 for the year.

During 1961–62, 71,234 age pension claims were granted and 42,302 pensions expired through cancellations and deaths. Of these, deaths accounted for 35,346.

The recorded ages of the 71,234 persons (27,583 males and 43,651 females) to whom age pensions were granted during the year 1961–62 ranged from 10,666 at age 60 to 15 who were over 97; 50,720 were in the 60–69 age-group. The conjugal condition of the new pensioners was as follows:—Males—single, 3,170; married, 20,001; widowed, 4,016; and divorced, 396; Females—single, 5,656; married, 23,461; widowed, 13,601; and divorced, 933.

The number of invalid pensioners at 30th June, 1962, was 97,246 of whom 52,168 (or 54 per cent.) were males and 45,078 (or 46 per cent.) were females. During 1961–62, 18,177 invalid pension claims were granted, 7,156 pensions ceased through cancellation or death, and 2,245 invalid pensioners were transferred to the age pension list.

The recorded ages of the 18,177 persons (11,249 males and 6,928 females) to whom invalid pensions were granted during 1961–62 were as follows:—1,623 (9 per cent.) were in the 16–19 years age-group; 3,112 (17 per cent.) were in the 20–44 years age-group; 8,735 (48 per cent.) were in the 45–59 years age-group; 3,882 (21 per cent.) were in the 60–64 years age-group; and 825 (5 per cent.) were over 65 years of age.

The conjugal condition of persons to whom invalid pensions were granted during the year was as follows:—Males—single, 3,719; married, 6,541; widowed, 675; and divorced, 314; Females—single, 2,338; married, 3,268; widowed, 1,022; and divorced, 300.

The following table shows the number of pensions in force at 30th June, 1962, in each State and Territory.

## AGE AND INVALID PENSIONS, 30th JUNE, 1962

Particulars	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Age Pensions in force—									
Males .. ..	73,360	45,315	31,856	16,700	12,061	5,548	507	236	185,583

Invalid Pensions in force—									
Males .. ..	21,629	11,629	8,202	4,181	4,399	1,822	225	81	52,168
Females .. ..	20,103	9,890	6,448	3,479	3,427	1,477	154	100	45,078
Persons .. ..	41,732	21,519	14,650	7,660	7,826	3,299	379	181	97,246

The sum disbursed in age and invalid pensions in 1961–62, including the amount paid to homes for the maintenance of pensioners and allowances to wives of invalid pensioners, represented an expenditure of £16 19s. 11d. per head of population as compared with £15 4s. in 1960–61.

The following table gives details of age and invalid pensions for the years 1957–58 to 1961–62.

## AGE AND INVALID PENSIONS: SUMMARY, AUSTRALIA

Year	Pensioners at end of year				Total payments (c)	Average weekly pension as at 30th June		
	Age		Invalid	Total (b)		Age	Invalid	Age and Invalid combined
	No.	Rate (a)						
1957-58 ..	(d) 496,757	482	No. (d) 77,451	No. 574,208	£ 121,577,042	s. d. 83 5	s. d. 85 10	s. d. 83 9

(a) Number of pensioners per 1,000 persons of pensionable age (males aged 65 years and over and females aged 60 years and over). (b) Includes age and invalid pensioners in benevolent homes. (c) Includes allowances and supplementary assistance. (d) On 30th June, 1958, 15,205 invalid pensioners in New South Wales were transferred to their correct designation of age pensioners. (e) On 30th June, 1960, a number of invalid pensioners were transferred to their correct designation of age pensioners as follows:—Victoria, 4,843; Queensland, 4,908; and Western Australia, 486.

## § 3. Child Endowment

A person who is resident in Australia and has the custody, care and control of one or more children under the age of 16 years, or an approved institution of which children are inmates, is qualified to receive an endowment in respect of each child under 16. There are provisions to meet cases of families divided because of divorce, separation, unemployment or death of a parent. There is no means test.

Twelve months' residence in Australia is required if the claimant and the child were not born here, but this requirement is waived if the Department of Social Services is satisfied that they are likely to remain in Australia permanently. Where the child's father is not a British subject, endowment is payable if the child was born in Australia, if the mother is a British subject, or if the Department is satisfied that the child is likely to remain permanently in Australia.

Under certain conditions, endowment may be paid to Australians who are temporarily absent overseas. Endowment is payable to aboriginals unless they are nomadic or primitive.

From 1st July, 1941, the rate of endowment was 5s. a week for each child in excess of one in a family, and for each child under 16 in an approved institution. The rate was increased to 7s. 6d. a week in June, 1945, and to 10s. a week in November, 1948. Since June, 1950, the rates of endowment have been 5s. a week for the first child in a family, 10s. a week for each other child in a family, and 10s. a week for each child in an institution.

The number of families receiving child endowment at 30th June, 1962, was 1,523,074, an increase of 21,894 or 1.5 per cent. during the year. The following table shows, for each State and Territory, the number of claims for child endowment in force and the number of endowed children at 30th June, 1962.

#### CHILD ENDOWMENT: CLAIMS AND ENDOWED CHILDREN, 30th JUNE, 1962

State or Territory	Family groups			Institutions		Total endowed children
	Claims in force	Endowed children		Number	Endowed child inmates	
		Number	Average number per claim			
New South Wales	566,102	1,218,517	2.15	130	6,665	1,225,182
Victoria ..	417,482	921,582	2.21	119	4,627	926,209
Queensland ..	215,496	508,823	2.36	56	2,884	511,707

Total ..	1,523,074	3,395,449	2.23	479	24,685	3,420,134

The following table shows, as at 30th June, 1962, the number of claims in force and the number of endowed children, classified according to the number of endowed children in the family group. The families included in the table are not necessarily made up entirely of the children of one marriage, but may include step-children, foster children, adopted children, and any other children under the custody, care and control of the claimant.

#### CHILD ENDOWMENT: ENDOWED CHILDREN IN FAMILY GROUPS, 30th JUNE, 1962

Number of endowed children in family group			Claims in force	Endowed children	Number of endowed children in family group			Claims in force	Endowed children

<b>Total ..</b>	<b>68,481,712</b>	<b>641,810</b>	<b>69,123,522</b>	<b>66,377,628</b>

The following table shows, for Australia, the number of claims, the number of endowed children and the annual liability at 30th June for each of the years from 1958 to 1962 and the actual expenditure for the years 1957-58 to 1961-62.

**CHILD ENDOWMENT: SUMMARY, AUSTRALIA**

At 30th June—	Family group claims	Institutions	Endowed children	Annual liability for endowment (a)	Total payments (a)(b)
				£	£
1958 ..	1,415,378	415	3,073,945	61,522,656	58,733,561
1959 ..	1,451,516	421	3,171,823	63,597,690	(c) 67,539,615
1960 ..	1,476,835	443	3,252,413	65,363,883	62,531,977
1961 ..	1,501,180	465	3,340,302	67,332,512	(d) 74,302,614
1962 ..	1,523,074	479	3,420,134	69,123,522	66,377,628

(a) A number of endowments are paid every twelve weeks. During two years out of every three, there are four such payments, but every third year there are five. Figures for annual liability, therefore, reflect trends in expenditure on child endowment more accurately than do figures for payments.  
 (b) Year ended 30th June, (c) Expenditure for this year includes five twelve-weekly payments.  
 (d) Endowment payable on 4th July, 1961, to the credit of bank accounts and in cash at post offices was brought to account in 1960-61.

#### § 4. Commonwealth Rehabilitation Service

The Commonwealth Rehabilitation Service has been set up to help persons who are unable to work because of physical handicap, or who have had to give up their employment because of sickness or injury. It helps disabled persons to reach their maximum physical fitness and to prepare for suitable employment. They are given suitable treatment and training, the cases selected being those in which the person's disability is remediable and there are reasonable prospects of his engaging in a suitable vocation within three years after the commencement of treatment or training.

The service is available to invalid and widow pensioners, persons receiving unemployment, sickness or special benefits, persons receiving tuberculosis allowances and persons aged 14 or 15 who, without treatment and training, would be likely to qualify for an invalid pension on reaching the age of 16 years. During treatment, payment of pension or benefit continues. When vocational training begins, the pension or benefit

is suspended and a rehabilitation allowance, together with a training allowance of £1 10s. a week, is paid instead. With an invalid pensioner, or a sickness, unemployment or special beneficiary, this is equivalent to and calculated in the same manner as an invalid pension. In the case of a widow pensioner, the rate is the same as that of the widow's pension.

Living-away-from-home allowances are paid where necessary. Fares and living expenses (including those of an attendant where required) incurred in connexion with treatment, training or attendance for an interview or for medical examination may also be paid. A person receiving treatment or training may be provided, free of charge, with necessary artificial replacements, surgical aids and appliances. He may also be provided with books, equipment and tools of trade, costing not more than £40. If these are retained by him, he is required to pay the cost, but payments may be made by small instalments after he has commenced employment.

If the treatment or vocational training does not result in the trainee being able to engage in employment, he receives the pension or benefit to which he is entitled.

Disabled persons who cannot qualify for the free service may pay for rehabilitation themselves, or they may be sponsored by governmental or private organizations. Rehabilitation allowances, training allowances, living-away-from-home allowances and other allowances are not payable in these cases. Books, tools, etc., are available on a repayment basis.

The numbers of persons receiving benefits who were examined, accepted, trained and placed in employment during the year 1961-62 are shown in the following table.

#### COMMONWEALTH REHABILITATION SERVICE: AUSTRALIA, 1961-62

Type	Examined	Accepted	Completed training	Placed in employment	
				After training	Without training
Invalid pensioners .. ..	10,224	222	79	52	61

<b>Total .. ..</b>	<b>20,617</b>	<b>1,318</b>	<b>324</b>	<b>280</b>	<b>693</b>

#### § 5. Funeral Benefits

A funeral benefit of up to £10 is payable to the person who has paid, or is liable to pay the cost of the funeral of an age or invalid pensioner or of a claimant who, but for his death, would have been granted an age or invalid pension, or of a person who at the time of his death was receiving, or was a claimant for, a tuberculosis allowance, if he would otherwise have been qualified to receive an age or invalid pension. Where the cost of the funeral has been partly met by payment from a contributory funeral benefit fund of an organization other than a friendly society, funeral benefit is payable to the extent of the amount (not above £10) by which the cost of the funeral exceeded the amount paid from the fund.

The following table shows the number of funeral benefits which were granted in each State and Territory in the years 1957-58 to 1961-62.

## FUNERAL BENEFITS GRANTED: AUSTRALIA

## § 6. Maternity Allowances

Maternity allowances are paid to provide financial assistance towards the expenses associated with the birth of children and are additional to the benefits provided under the Commonwealth hospital benefits scheme. They are not subject to a means test.

The allowance is £15 if the mother has no other children, £16 if she has one or two other children and £17 10s. if she has three or more other children under the age of 16 years. The amount is increased by £5 for each additional child born at a birth. An advance payment of £10 on account of a maternity allowance may be made four weeks before the expected date of birth. The balance is payable immediately after the birth. Payment may be made in respect of the birth of a still-born child, or a child which lives for less than twelve hours, if the child had developed for at least 5½ months.

A maternity allowance is payable to a woman who, at the date of giving birth to a child, is residing in Australia, is temporarily abroad, or is on board a ship proceeding from a port in Australia or an Australian Territory to another port in Australia or another Australian Territory, or on board a ship proceeding to Australia, provided she receives no maternity benefit from the country from which she came. An alien mother may receive the allowance if she or her husband resided in Australia for at least twelve months immediately prior to the birth of the child, or if she is likely to remain in Australia. Aborigines, other than those who are nomadic or primitive, are eligible for maternity allowances on the same conditions as other members of the community.

The following table gives details of the amount paid in each State for the years 1957-58 to 1961-62.

## MATERNITY ALLOWANCES: AMOUNT PAID IN EACH STATE

(£'000)

## § 7. Unemployment, Sickness and Special Benefits

Unemployment and sickness benefits are paid to men over 16 and under 65 years of age, and women over 16 and under 60 years of age, who are unemployed or who are temporarily incapacitated for work and thereby suffer loss of income. They must have been living in Australia during the preceding twelve months or be likely to remain permanently in Australia. A person receiving an age, invalid or widow's pension, or a service pension (as distinct from a war pension) under the *Repatriation Act*, or a tuberculosis allowance, is ineligible to receive a benefit.

To qualify for an unemployment benefit, a person must establish that he is unemployed and that his unemployment is not due to his being a direct participant in a strike, that he is capable and willing to undertake suitable work, and that he has taken reasonable steps to obtain such work. Registration with the local Commonwealth District Employment Office is necessary.

To qualify for a sickness benefit, a person must establish that he is temporarily incapacitated for work because of sickness or accident and that he has thereby suffered a loss of salary, wages or other income.

A married woman is not eligible to receive a sickness benefit if it is reasonably possible for her husband to maintain her. Where her husband is able to maintain her only partially, a benefit may be paid at such rate as is considered reasonable in the circumstances. In exceptional cases, a married woman may qualify for an unemployment benefit in her own right.

Aboriginals, other than those who are nomadic or primitive, are eligible for these benefits on the same conditions as other members of the community.

Rates of benefit were increased as from 1st March, 1962. The maximum weekly rates of benefit payable and permissible income in respect of benefit periods which commenced on or after 1st March, 1962, are as follows.

Age and marital status of claimant	Maximum weekly rates			Permissible weekly income		
	£	s.	d.	£	s.	d.
Unmarried person under 18 years of age .. .. .	1	15	0	1	0	0
Unmarried person 18-20 years of age .. .. .	2	7	6	1	0	0
All others .. .. .	4	2	6	2	0	0

An additional benefit of £3 a week may be paid for a dependent spouse and 15s. a week for each dependent child under 16 years of age if resident in Australia. Prior to March, 1962, additional benefit was paid for only one dependent child under 16 years. Additional benefit, at the same rate as that for a dependent spouse, may be paid where a woman is keeping house for a claimant who has one or more children under 16 years of age in his care. It may be granted only if no such benefit is payable for his wife and the housekeeper is substantially dependent on him but not employed by him.

The weekly rate of benefit is reduced by the amount by which a beneficiary's other income exceeds the amount shown in the relevant line of the final column in the table above. For unemployment benefit purposes, the income of the spouse is also taken into account, unless the claimant and his spouse are permanently separated. For sickness benefit purposes, the income from an approved friendly society or other similar approved body in respect of the incapacity for which sickness benefit is payable is disregarded. "Income" does not include child endowment, or other payments for children, Commonwealth hospital and pharmaceutical benefits, or a tuberculosis allowance or an amount paid in reimbursement of medical, dental or similar expenses paid. There is no means test on property.

The amount of compensation, damages or similar payment, or war pension, if paid in respect of the same incapacity as that for which sickness benefit is claimed, is deducted from the sickness benefit. If not paid in respect of the same incapacity, compensation is regarded as income and war pension is ignored.

There is a waiting period of seven days for which unemployment or sickness benefit is not payable. Unemployment and sickness beneficiaries are eligible to participate in the Commonwealth Rehabilitation Service under the same conditions as invalid pensioners.

A special benefit may be granted to a person not qualified for unemployment or sickness benefit who is not receiving an age, invalid or widow's pension or a service pension, if because of age, physical or mental disability or domestic circumstances, or for any other reason, he is unable to earn a sufficient livelihood for himself and his dependants. Special benefits are also paid to migrants who are in reception centres and are awaiting their first placement in employment in Australia. During this time, they receive a short instruction in English and in Australian conditions to facilitate their assimilation into the community and employment.

During the year 1961-62, special benefits were granted to 3,932 migrants at a cost of £92,144.

The following table shows the number admitted to benefit during 1961-62, the number of persons on benefit at 30th June, 1962, and the amount paid for each benefit during 1961-62.

(a) Includes migrants in reception and training centres.

(b) Includes payments to migrants in reception and training centres.

## § 8. Widows' Pensions

Widows' pensions are payable according to the following classes. The rates shown have been in operation since 10th October, 1961.

*Class "A".* A widow who has the custody, care and control of one or more children under the age of 16 years—£286 per annum (£5 10s. a week) plus £39 per annum (15s. a week) for each child after the first in her custody, care and control.

*Class "B".* A widow who has no children under 16 years of age in her custody, care and control, and who is not less than 50 years of age or who, after having attained the age of 45 years, ceased to receive a Class "A" widow's pension because she no longer had the custody, care and control of a child—£240 10s. per annum (£4 12s. 6d. a week).

*Class "C".* A widow who is under 50 years of age and has no children under the age of 16 years in her custody, care and control, but is in necessitous circumstances within the 26 weeks after the death of her husband—£4 12s. 6d. a week for not more than 26 weeks after the death of her husband. If the widow is pregnant, this period may be extended until the child's birth. She may then become eligible for a Class "A" widow's pension.

Widow pensioners may receive supplementary assistance of £26 per annum (10s. a week) if they pay rent and are considered to be dependent entirely on their pensions.

For classes "A" and "B", the term "widow" includes a deserted wife, a divorcee, a woman whose husband has been imprisoned for at least six months, and a woman whose husband is in a mental hospital. Certain dependent females also may qualify for "A", "B" or "C" Class pensions.

The residential qualification is five years' continuous residence in Australia immediately prior to the date of lodgment of the claim, but this period may be reduced to one year if the widow and her husband were living permanently in Australia when he died. Certain absences are ignored.

A widow's pension is not payable to an alien, a woman receiving an age or invalid pension, a tuberculosis allowance, or a war widow's pension, a woman who has deprived herself of property or income in order to qualify for a pension, or a deserted wife or a divorcee who has not taken reasonable action to obtain maintenance from her husband or former husband. Aborigines, other than those who are nomadic or primitive, are eligible for widows' pensions on the same conditions as other members of the community.

Widows' pensions are subject to a means test on income and property. The pension payable depends on the claimant's *means as assessed*. These consist of her annual rate of income together with a property component equal to £1 for every complete £10 by which the value of her property is in excess of a stipulated sum. In the case of a Class "B" widow, £200 of property is exempt. A Class "A" widow has a basic exemption of £1,000 when the value of her property exceeds £2,250, but no property component is calculated where she has property of no more than £2,250 in value. A Class "A" pension is not payable where a widow has property valued at £5,680 or more; no Class "B" pension is payable where property is £4,430 or more. There is no specific means test for the Class "C" pension, which is paid only where it is evident that a widow has insufficient means of support. The types of income and property disregarded for means test purposes are the same as for age and invalid pensions.

The pension payable to a Class "A" widow may be continued until her child reaches the age of 18 years if the child continues with full-time education at a school or university, is still dependent on the widow and is not in employment.

The number of widows' pensions by class, current at 30th June, 1962, was as follows:—Class "A", 24,584; Class "B", 32,157; Class "C", 95; total, 56,836.

The amount paid in pensions during 1961-62 was £15,094,520. The following table shows details of widows' pensions paid in each State and Territory in the year 1961-62.

**WIDOWS' PENSIONS AT 30th JUNE, 1962**

(a) Included in figures for State in which pensioner is permanently domiciled.

**§ 9. Reciprocal Agreements with Other Countries**

1. **New Zealand.**—An agreement between the governments of Australia and New Zealand for reciprocity in social services came into operation on 1st July, 1949.

The reciprocal arrangements cover age and invalid pensions, widows' pensions, child endowment and unemployment and sickness benefits, and apply to both permanent and temporary changes of residence.

Residence in one country counts as residence in the other country in relation to entitlement to benefits in which a residential qualification applies.

Persons from one country taking up permanent residence in the other country become eligible for any of the specified benefits of the new country under the same conditions (with one or two exceptions) as apply to citizens of that country.

Persons in receipt of any of the specified benefits in one country may continue to receive those benefits while temporarily absent in the other country.

2. **Britain.**—A new reciprocal agreement on social services between Britain and Australia came into operation on 1st April, 1958, replacing the original agreement which operated from 7th January, 1954.

Under this agreement, residence in one country now counts as residence in the other country as the basis for entitlement to benefits in which a residential qualification applies.

Australians going to Britain for permanent residence are treated in Britain as if they had been insured under the National Insurance Scheme while in Australia, so that they can qualify for various National Insurance benefits.

There is also provision for the safeguard of social service rights for persons going from one country to the other for temporary residence.

## OTHER SERVICES

## § 1. Benevolent Homes

1. **General.**—Numerous establishments exist for the housing and protection of persons no longer able to provide for themselves. These homes are supported by government and municipal aid, public subscriptions, bequests, etc. In many cases, relatives of poor and afflicted persons contribute to their maintenance.

A satisfactory statistical tabulation of all forms of charitable aid provided by benevolent institutions is difficult because these services differ considerably.

2. **Revenue and Expenditure.**—Details regarding revenue and expenditure for the year 1960-61 are given in the following table.

## BENEVOLENT HOMES: REVENUE AND EXPENDITURE, 1960-61

(£ )

Particulars	N.S.W.(a)	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Australia
<b>Revenue—</b>

All other ..	342,304	476,168	399,894	43,316	136,114	139,573	1,537,369
Capital(c) ..	49,047	413,817	95,069	2,015	11,920	142,421	714,289
<b>Total</b> ..	<b>1,070,427</b>	<b>2,043,596</b>	<b>997,779</b>	<b>153,414</b>	<b>547,701</b>	<b>594,747</b>	<b>5,407,664</b>

(a) These figures relate to the two State hospitals and homes only. (b) Includes Commonwealth hospital benefits and age and invalid pension receipts. (c) Includes such items as purchase of land, cost of new buildings and additions to buildings.

3. **The Aged Persons Homes Act.**—*The Aged Persons Homes Act*, which operated from 16th December, 1954, was amended in October, 1957. The purpose of the Act is to encourage the provision of homes in which aged persons may reside in conditions approaching normal domestic life.

To be eligible for assistance under this Act an organization must be:—

- (a) carried on otherwise than for purposes of profit or gain to the individual members; and
- (b) a religious organization, an organization the principal objects or purposes of which are charitable or benevolent, an organization of former members of the defence forces established in every State or a State branch of such an organization, or an organization approved by the Governor-General for the purposes of this Act.

An organization conducted or controlled by, or by persons appointed by, the Government of the Commonwealth or of a State or a local governing body established under the law of a State, is not eligible for assistance under this Act.

The Director-General of Social Services may make a grant of money to an organization as assistance towards meeting the cost of the construction or purchase of a home, including land, to be used permanently for the accommodation of aged persons. The grant is made on a basis of £2 for each £1 raised by the organization, not counting money which the organization received from a governmental body or borrowed. Before a grant is made, the Director-General must be satisfied that the sum of the money expended and the money presently available for expenditure by the organization towards the capital cost of the home, together with the amount of the grant, will be not less than the capital cost of the home. Expenditure by the Commonwealth Government was £837,895 in 1957-58, £1,767,470 in 1958-59, £1,871,748 in 1959-60, £2,153,551 in 1960-61 and £3,472,514 in 1961-62.

## § 2. Orphanages, Industrial Schools, etc.

1. **General.**—The methods of caring for orphans and neglected children differ extensively, some being placed in orphanages and industrial schools, while others are boarded out with their mothers or female relatives or with approved foster-mothers. The children in orphanages and similar institutions may receive, in addition to general education, some craft training. In all cases, employment is found for the children on their discharge from the institution, and they remain for some time under the supervision of the proper authorities. The conditions under which orphans, neglected children and children boarded out live are subject to frequent departmental inspections.

2. **Children under Government Authority.**—The following table shows the expenditure by State Departments during 1960-61 in connexion with children under their control or supervision. The figures refer, in addition to neglected children, to uncontrollable and convicted children who are wards of a government authority, as well as children whose parents obtain assistance from the government without giving up the legal right of custody.

### CHILDREN UNDER GOVERNMENT AUTHORITY: COST OF MAINTENANCE, 1960-61.

(£)

Particulars	N.S.W.	Vic.(a)	Q'land	S. Aust.	W. Aust.	Tas.	Aust.
Gross cost of children's relief .. ..	2,343,952	1,605,383	601,242	457,393	275,359	98,244	5,381,573
Receipts from parents' contributions, etc. ..	116,821	50,560	39,262	50,402	30,471	8,834	296,350
<i>Net Cost to State</i>	<i>2,227,131</i>	<i>1,554,823</i>	<i>561,980</i>	<i>406,991</i>	<i>244,888</i>	<i>89,410</i>	<i>5,085,223</i>

(a) Year ended 31st December, 1961.

The total expenditure on children's relief in the foregoing table shows considerable variation between the States, owing to different methods of treating assistance to mothers with dependent children. In South Australia, Western Australia and Tasmania, large amounts have been excluded from the total expenditure on this account, owing to the difficulty of obtaining separate particulars for allowances made in respect of the dependent children only.

## § 3. Protection of Aborigines

For the protection of the aboriginal Australian race, there are institutions, under the supervision of Aborigines Boards, where these people are housed and encouraged to work, the children receiving elementary education. The work is usually carried on at mission stations, but many of the natives are nomadic and receive food and clothing when they call, while others only rarely come near the stations. The aboriginal race is extinct in Tasmania. The expenditure from Consolidated Revenue in 1961-62 was as follows (figures

in brackets are for the year 1960–61:—New South Wales, £280,838 (£250,658); Victoria, £50,000 (£25,000); Queensland, £803,529 (£770,013); South Australia, £524,038 (£428,021); Western Australia, £1,300,443 (£762,294); Northern Territory, £1,011,983 (£965,227); Australian Capital Territory, £4,372 (£5,485); Australia, £3,975,203 (£3,206,698).

#### § 4. Lifesaving

There are two life saving organizations in Australia, the Royal Life Saving Society—Australia, and the Surf Life Saving Association of Australia.

The objects of these organizations are the prevention of death from drowning and other forms of asphyxiation; the education of the general public in methods of life saving and resuscitation of the apparently drowned or asphyxiated; technical education in water safety; the encouragement of swimming and life saving in schools and other organizations; the encouragement of all aspects of swimming and aquatics which would assist in saving lives; and the initiation of research within the field of water safety and lifesaving.

The Royal Life Saving Society operates at lakes, rivers, bay and harbour beaches, and gives instruction to school pupils and members of other bodies throughout Australia except on surf beaches. The Surf Life Saving Association patrols surf beaches.

Numerous certificates and medallions of proficiency in various grades are awarded.

#### § 5. Royal Humane Society

The Royal Humane Society of Australasia has as its main object the granting of awards to all who with bravery, skill and perseverance risk their own lives in saving or attempting to save those of their fellow creatures. The classes of awards are (a) Gold Medal; (b) Silver Medal; (c) Bronze Medal; and (d) Certificate of Merit. The Clarke Medal is awarded for the outstanding case of the year, and the Rupert Wilks Trophy is awarded for the most outstanding bravery by a child under 13 years of age.

#### § 6. The Order of St. John

The Priory in Australia of the Most Venerable Order of the Hospital of St. John of Jerusalem is the governing body of the various activities of the Order which comprises the St. John Ambulance Association, the St. John Ambulance Brigade and the Hospitallers' Clubs in all States and Commonwealth Territories.

Members of the St. John Ambulance Association teach first aid, home nursing, hygiene and child welfare.

Members of the St. John Ambulance Brigade provide first aid at public functions.

The Hospitallers' Clubs in each State undertake the collection of funds for the St. John Ophthalmic Hospital in Jerusalem, and other duties which tend to bring together all persons interested in the work of the order.

The Order of St. John maintains ambulance transport services in some States, acts as an auxiliary to such services in other States, and provides technical reserves for the medical services of the Crown.

The Lifesaving Medal is awarded by the Order as warranted.

#### § 7. Other Charitable Institutions

Owing to the variety of names and functions of other charitable institutions, it has been found impracticable to give detailed particulars. The aid given in kind—food, clothing, tools of trade, etc.—is considerable, whilst the shelter and treatment afforded range from a bed for a night for casual callers in establishments ministering minor charity, to indoor treatment over long periods in those that exist for the relief of the aged and the infirm. The institutions not particularized include homes for the deaf, dumb and blind, infant homes, homes for the destitute and aged poor, industrial colonies, night shelters, crèches, rescue homes for females, auxiliary medical charities, free dispensaries, benevolent societies and nursing systems, ambulance and health societies, boys' brigades, humane and animals' protection societies, prisoners' aid associations, shipwreck relief societies, bushfire, flood and mining accident relief funds.

## CHAPTER XVI

### PUBLIC JUSTICE

NOTE.—In interpreting statistics of public justice, it should be realized that a number of factors affect comparability from State to State and from year to year, e.g.:

- (a) Differences in the jurisdiction of courts;
- (b) Changes in the law in particular States and differences in the laws between States;
- (c) Differences in the methods of compiling the figures (e.g. in respect of persons convicted for more than one offence);
- (d) The attitude to laws such as those connected with liquor, vagrancy, gaming, and traffic offences;
- (e) The strength and distribution of the police force;
- (f) The proportion of various types of crimes reported and solved.

#### § 1. The Australian Legal System

1. **Development of the System.**—The two major factors in the development of the Australian legal system have been its British origin and the Federal Constitution of 1900. When the various parts of Australia were first settled by British colonists, the common law and statutes of England were brought with them by the settlers. When local law-making bodies were established, the law so brought in was gradually modified and augmented by local legislation, but the Imperial Parliament in London also continued to legislate (to a lesser and lesser extent) in respect of Australia. The Federal Constitution of 1900, which is itself an Imperial Act, limited the legislative power of State Parliaments in some respects and created a federal legislature. Since the *Statute of Westminster Adoption Act* 1942, the Imperial Parliament can legislate for Australia only at Australia's request. The sources of Australian law of today are, therefore, found in Commonwealth and State legislation, in some Imperial legislation and in the common law. No significant attempt has been made at codification of the law, but three of the States (Queensland, Western Australia, and Tasmania) have Criminal Codes. However, separate consolidations of the statutes of the Commonwealth and of all States except Western Australia (which has adopted a system of reprinting of individual statutes at intervals) have been brought out from time to time.

There are few constitutional or other legislative guarantees of individual rights and liberties in Australia. These rights are nevertheless protected, because a basic feature of the Australian system is the "rule of law": no act, official or unofficial, however *bona fide* and apparently reasonable, which infringes the liberty or rights of an individual is justifiable unless it is authorized by law, and for any such unlawful act, by whatever authority commanded, the official or other person is personally liable in an action in the ordinary courts. In the case of subordinate legislation, and even in the case of Federal or State Acts, the validity of the law itself may be challenged in the courts. The remedy for the protection of the personal liberty of the individual is the writ of habeas corpus, which requires the person named therein to be produced in the court.

Australian law adheres to the principle that Federal control must in general be exercised by ordinary courts. There is no integrated system of administrative tribunals, but there is

a great variety of such tribunals of various descriptions. The ordinary courts exercise supervision over administrative tribunals either by way of statutory appeal or by the use of prerogative writs of *mandamus*, *prohibition*, or *certiorari*, by which the administrative tribunals can be enjoined to perform a duty or to abstain from excess of jurisdiction, or can have their decisions set aside.

Independence of the judiciary is an essential part of the Australian legal system. Security of tenure of superior court judges is guaranteed, mostly by the Constitutions of the Commonwealth and the States, and they can be removed from office only by resolution of both Houses of Parliament of the Commonwealth or the States, as the case may be, for proven misbehaviour or incapacity. Their independence is further secured by relatively high salaries which, in the case of High Court judges, cannot be reduced during their tenure of office, and liberal (mostly non-contributory) pensions for the judges or their widows.

Judgments given in the courts of any part of Australia can be enforced in any other part of Australia under the *Service and Execution of Process Act* 1901–1958 of the Commonwealth.

**2. State and Territory Courts.**—(i) *Civil jurisdiction.* Lower civil courts (which term includes, for the purposes of this chapter, Magistrates' Courts, Courts of Petty Sessions, Local Courts, Small Debts Courts, Courts of Request and Courts of General Sessions) are usually constituted or presided over by a stipendiary or special magistrate or a commissioner. In some limited instances, justices of the peace may exercise the jurisdiction of the court. Local Courts are sometimes constituted by a Judge. The powers of the magistrates in the various States and Territories are set out in § 2, pages 659–60. In most cases, unless the amount involved is very small, appeal may be made to a higher court against a magistrate's decision. In any case, the Supreme Court has a supervisory power, by means of prerogative writs, to examine whether a lower court has properly exercised its jurisdiction.

In the higher courts (which term includes, for the purposes of this chapter, District Courts, County Courts, and the Supreme Courts), actions are usually tried by a single judge, sitting with or without a jury, from whose judgment appeal lies to the bench of the Supreme Court. In certain cases, the appeal can be carried to the High Court of Australia. Appeals to the Privy Council are discussed below.

(ii) *Criminal jurisdiction.* Criminal courts are of two kinds, namely, courts of summary jurisdiction and higher courts. Courts of summary jurisdiction, usually called Courts of Petty Sessions, may deal summarily with minor offences; higher courts, known as Courts of Sessions, Quarter Sessions or General Sessions (not to be confused with the lower court of civil jurisdiction of that name) and the Supreme Court, hear indictable offences. A court of summary jurisdiction consists of a stipendiary or police magistrate, or two or more justices of the peace; a higher court consists of a judge or chairman, sitting with a jury. The jury finds as to the facts of the case and the judge determines the applicable law and, within the limits of the law, the punishment of the convicted person.

In the case of other than minor offences, a preliminary hearing is held before a stipendiary magistrate or justice of the peace for the purpose of determining whether a *prima facie* case has been made out. If the magistrate or justice of the peace finds that there is a case to answer, the person charged is committed for trial at a higher court. A magistrate or justice of the peace has power to release on bail.

There is an appeal to a higher court from the decision of a court of summary jurisdiction hearing a minor offence, and an appeal from a higher court to the full bench of the Supreme Court, or Court of Criminal Appeal. A further appeal may, with leave, be brought to the High Court of Australia.

**3. Federal Courts.**—The judicial power of the Commonwealth is vested in the High Court of Australia (the Federal Supreme Court), in the Federal courts created by Parliament (the Federal Court of Bankruptcy and the Commonwealth Industrial Court), and in the State courts invested by Parliament with Federal jurisdiction, both civil and criminal. Further particulars regarding the judicial power of the Commonwealth will be found in Chapter III. (§§ 71–73) of the Commonwealth Constitution (*see* p. 16 of this Year Book).

Particulars concerning the Federal Court of Bankruptcy and the High Court of Australia will be found in §§ 4 and 5, respectively, of this chapter. Information regarding the Commonwealth Industrial Court, which was established under the *Conciliation and Arbitration Act 1904-1961*, will be found in Chapter XII. Labour, Wages and Prices (pp.462-3).

4. **Appeal to the Privy Council.**—There is an appeal, by special leave of the Privy Council, from the High Court to the Privy Council. In certain important types of constitutional disputes, involving questions of the powers of the Commonwealth *vis-a-vis* the States, a certificate of the High Court in effect granting leave to appeal is necessary. There is also an appeal from the State Supreme Courts direct to the Privy Council.

## § 2. Lower (Magistrates') Courts

1. **Powers of the Magistrates.**—(i) *New South Wales.* There is no general limit to the powers of the magistrates with regard to offences punishable summarily, their authority depending in each case on the statute which creates the offence and gives them jurisdiction. Except in the case of a very few statutes, and excluding cumulative sentences, the power of sentence is limited to twelve months. Imprisonment in default of fine is regulated by a scale limiting the maximum period according to the sum ordered to be paid, but in no case exceeding twelve months. Actions for debt and damage within certain limits also come within magisterial jurisdiction. In cases of liquidated debts, and damages whether liquidated or unliquidated, the amount is limited to £150 before a court constituted by a stipendiary magistrate. Where the amount claimed exceeds £50, the Court must transfer the action to the District Court when the defendant gives notice that he objects to the action being heard and determined by a Court of Petty Sessions. Magistrates have power to entertain claims of up to £500 under the *Money Lenders and Infants Loans Act 1941*, as amended. The amount in actions of debt before two or more justices of the peace is limited to £30 and in actions of damages it is limited to £10, but may extend to £30 with the consent of the defendant. Outside the Metropolitan Area of Sydney and certain other prescribed districts, one justice of the peace may hear cases of debt, liquidated or unliquidated, or damage, up to £5 or to £30 by consent of parties.

(ii) *Victoria.* The civil jurisdiction of magistrates is restricted to what may be designated ordinary debts, damages for assault, restitution of goods, etc., where the amount in dispute does not exceed £100, and to actions arising out of torts or contracts to the extent of £250. No definite limit is fixed to the powers of the magistrates on the criminal side, and for some offences, sentences of up to two years' imprisonment may be imposed. The proportion of long sentences is, however, comparatively small.

(iii) *Queensland.* Generally speaking, the maximum term of imprisonment which justices can impose is six months, but in certain exceptional cases, such as offences against sections 233, 344 and 445 of the *Criminal Code* (betting houses, aggravated assaults, and unlawfully using animals), sentences of twelve months may be imposed.

There is provision for applying cumulative sentences, but in practice not more than one sentence is generally made cumulative on a previous sentence.

(iv) *South Australia.* The power of special magistrates to impose fines and imprisonment is defined by the special Act creating the offence and conferring jurisdiction. In the case of minor indictable offences which are tried summarily, a maximum penalty of £100 fine or two years' imprisonment is fixed by the *Justices Act 1921-1960*. Magistrates also have power to hear certain civil actions in which the amount claimed is less than £1,250.

(v) *Western Australia.* The powers of magistrates and justices with regard to offences which are tried summarily are governed by the Act creating the offence and giving them jurisdiction. Imprisonment in default of payment of a fine is regulated by a scale limiting the period according to the amount of the fine but not to exceed six months.

The civil jurisdiction of Local Courts is restricted in general to £500. By consent of the parties, any action that might be brought in the Supreme Court may be dealt with in a Local Court. Justices may act in the case of illness or absence of the magistrate.

Magistrates are coroners and justices may be appointed as acting coroners.

Magistrates have appellate jurisdiction under some statutes and in country districts act as *Chairmen of the Session Courts*. They may be appointed as *Commissioners of the Supreme Court*. On the goldfields, the magistrate is also the warden.

(vi) *Tasmania*. Magistrates are empowered to hear and determine in Courts of Petty Sessions all offences when an enactment expressly or by implication provides that the matter is to be determined summarily, or by or before justices, or that any offence is to be punishable upon summary conviction. In addition, stealing and analogous crimes may be heard and determined summarily on the election of the person charged, when the amount involved does not exceed £100.

No general limit is fixed in respect of sentences, the statute creating the offence almost invariably laying down the penalty. Where this is not the case, the *Contravention of Statutes Act* 1889 provides that a fine of £50 may be imposed. Sentences of imprisonment which justices may impose vary with the nature of the offence, with a maximum of two years. The aggregate of terms of cumulative sentences may not exceed two years.

The civil jurisdiction of magistrates is divided into two categories. A Commissioner of the Court of Requests, provided he is a legal practitioner, may hear actions for the recovery of debts and damages not exceeding £250. As Commissioners are invariably police magistrates, this jurisdiction is State-wide. Courts of General Sessions, constituted by at least two justices, exercise similar powers, but the jurisdiction cannot exceed £50. Only one court, that at Currie, King Island, has the maximum jurisdiction, the others being limited to £30.

(vii) *Northern Territory*. Magistrates constituting courts of summary jurisdiction try offences punishable summarily. The punishment that may be imposed depends on the law creating the offence. Where there is no magistrate available, the offence may be tried by two or more justices of the peace or, if all parties consent, by one justice. Proceedings for committal on indictable offences may be heard by either a magistrate or a justice of the peace. Certain minor indictable offences may be tried summarily by a magistrate or two justices of the peace, who may impose a fine up to £100 or imprisonment for up to two years.

A stipendiary magistrate constituting a local court has a civil jurisdiction to hear and determine claims for not more than £1,000. A local court constituted by two justices of the peace has a civil jurisdiction to hear claims up to £50.

(viii) *Australian Capital Territory*. Magistrates have jurisdiction to try an offence which is punishable summarily and also where a person is made liable to a penalty or punishment and no other provision is made for trial. The punishment depends upon the statute which creates the offence. Certain indictable offences of a less serious nature may be tried summarily by a magistrate, who may impose a fine not exceeding £50 or imprisonment for up to one year. Magistrates also hear proceedings for committal on indictable offences. In civil proceedings, magistrates try actions for amounts up to £200. Justices of the peace have no judicial functions.

NOTE.—In interpreting the statistics in the following paragraph, the factors affecting comparability listed at the beginning of this chapter (p. 657) should be borne in mind.

2. **Criminal Proceedings.**—(i) *Cases*. The total numbers of cases dealt with at magistrates' courts in each State and Territory for the years 1957 to 1961 are shown in the following table.

## CASES AT MAGISTRATES' COURTS: OFFENCES CHARGED

State or Territory	1957	1958	1959	1960	1961
New South Wales(a) ..	307,824	323,097	331,195	332,728	345,730

<b>Australia .. ..</b>	<b>650,659</b>	<b>707,696</b>	<b>734,805</b>	<b>734,884</b>	<b>748,095</b>

(a) See footnote (a) to first table on previous page. (b) Year ended 30th June. (c) A person convicted on several counts at the one hearing is included only once.

(iii) *Convictions for Serious Crime at Magistrates' Courts.* (a) *General.* The figures given in the preceding tables refer to all convictions, and include offences of a technical nature, drunkenness, and minor breaches of good order, which come under the heading of crime in a very different sense from the more serious offences. The following table has therefore been prepared to show convictions at Magistrates' Courts for what may be regarded as the more serious offences, i.e., offences against the person, offences against property, forgery and offences against the currency.

(b) *Number and Rates.* The following table shows the number of convictions for serious crime at Magistrates' Courts for the years 1957 to 1961.

### CONVICTIONS FOR SERIOUS CRIME(a) AT MAGISTRATES' COURTS

State or Territory	1957	1958	1959	1960	1961
New South Wales .. ..	23,510	27,960	30,769	31,529	31,696

(v) *Convictions for Drunkenness. (a) Number and Rates.* The numbers of convictions recorded during each of the years 1957 to 1961 are given in the following table.

#### DRUNKENNESS: CONVICTIONS

State or Territory	1957	1958	1959	1960	1961
New South Wales .. ..	75,953	68,354	69,201	68,591	67,809
Victoria .. ..	25,284	29,434	29,334	29,116	27,212
Queensland(a) .. ..	23,521	28,196	26,918	28,538	26,136
South Australia(a) .. ..	5,019	4,299	4,439	5,273	5,438
Western Australia .. ..	5,428	4,821	5,587	5,144	5,333
Tasmania .. ..	760	718	660	512	534
Northern Territory .. ..	(a) 1,029	926	1,010	822	1,037
Australian Capital Territory ..	322	380	255	298	307
<b>Australia .. ..</b>	<b>137,316</b>	<b>137,128</b>	<b>137,404</b>	<b>138,294</b>	<b>133,806</b>

(a) Year ended 30th June.

The term "drunkenness" includes "drunkenness and disorderliness", and "habitual drunkenness".

The rates of convictions for drunkenness for the years 1957 to 1961 per 10,000 of population for Australia were:—1957, 142.5; 1958, 139.3; 1959, 136.6; 1960, 134.6; 1961, 128.7.

(b) *Rate of Convictions, 1901 to 1961.* The rate of convictions for drunkenness since 1901 is shown below.

#### RATE OF CONVICTIONS FOR DRUNKENNESS: AUSTRALIA

Year .. ..	1901	1911	1921	1931	1941	1951	1961
Convictions per 10,000 persons..	133	133	97	57	91	175	129

(c) *Remedial Treatment of Drunkenness.* For particulars of relevant legislation and some details of the various institutions established for the treatment of inebriates, see Official Year Book, No. 46, p. 632.

(vi) *First Offenders.* In all States and Territories, statutes are in force for dealing with first offenders. For particulars of the relevant legislation, see Official Year Book, No. 46, page 632. Provisions are incorporated in the various Acts whereby courts may extend leniency to the offender by means such as: (i) dismissal of the charge without proceeding to a conviction; (ii) freeing the offender or suspending sentence with the requirement of a recognizance for good behaviour for a specified period; and (iii) by placing the offender under the supervision of a probation officer for a specified period. The provisions existing in the individual States and Territories are set out in Year Book No. 46.

3. **Civil Proceedings.**—The total numbers of complaints entered and the amounts awarded to plaintiffs during 1961 are shown in the following table. The figures are compiled from returns from the Small Debts Courts in New South Wales, Courts of Petty Sessions in Victoria, Magistrates' Courts in Queensland, Local Courts in South Australia and Western Australia, Courts of Requests in Tasmania, Local Courts in the Northern Territory and the Court of Petty Sessions in the Australian Capital Territory.

## CIVIL CASES AT LOWER COURTS, 1961

(a) Year ended 30th June.

## § 3. Children's Courts

1. *New South Wales.*—Children's Courts, first established in 1905, now exercise jurisdiction under the *Child Welfare Act* 1939–1960. Each court consists of a special magistrate with jurisdiction within a proclaimed area. Elsewhere, the jurisdiction of a court may be exercised by a special magistrate or two justices of the peace. Where practicable, children's courts are not held in ordinary court rooms, and persons not directly interested are excluded from any hearing.

The magistrates exercise all the powers of a Court of Petty Sessions in respect of offences committed by or against children under 18 years of age. They also exercise jurisdiction in respect of neglected and uncontrollable children. Their functions are reformative, not punitive; they may commit children to institutions, to the care of persons other than the parents, or to the care of the Minister.

2. *Victoria.*—Under the *Children's Court Act* 1958, the jurisdiction of Children's Courts is restricted, with certain exceptions, to children up to 17 years of age. Two stipendiary special magistrates with jurisdiction throughout the State and, in addition, honorary special magistrates, operate in some metropolitan courts and provincial cities. At country courts to which no special magistrates are appointed, the local stipendiary magistrate usually constitutes the bench. The Children's Court may deal with all offences except homicide. However, consent to the jurisdiction of the Children's Court must be indicated by the child (or by a parent if the child is under 14 years of age) before an indictable case may proceed.

The primary aim of the Children's Court is reformation and rehabilitation of the offender, and the court, under Section 27 (3) of the *Children's Court Act* 1958, must "firstly have regard to the welfare of the child".

The probation system has been in use by the Children's Court since 1907, and there are now in Victoria a large number of honorary probation officers as well as six stipendiary probation officers. Problem cases are referred by the Court for investigation to a Children's Court Clinic, which is staffed by psychiatrists, psychologists and social workers.

3. *Queensland.*—Children under the age of 17 years before the Court on summary charges are dealt with under the *Children's Court Acts*, 1907–1930, and the *State Children Acts*, 1911–1955. The Children's Court in the metropolitan area is presided over by a magistrate, and the services of the psychiatric clinic are available to him if he considers they are needed. Proceedings are held *in camera*. A non-commissioned police officer is present to offer any observations he considers necessary and to assist the magistrate. In country areas, the court is presided over by the local stipendiary magistrate or, in his absence, by two justices. If found guilty, a child may be either admonished, released on probation, or committed to the care of the State Children Department or an institution. A conviction will not necessarily be recorded against him. His parent or guardian may be ordered to pay damages to the wronged party, and in default is liable to the same consequences as a defendant in an ordinary Court of Petty Sessions.

4. *South Australia.*—Provision for the treatment of juvenile offenders under the age of 18 years is contained in various Acts, the main ones being the *Maintenance Act*, 1926–1958, the *Juvenile Courts Act*, 1941, the *Justices Act*, 1921–1960, and the *Offenders Probation*

*Act, 1913-1953.* A Juvenile Court to hear cases of offences by children is constituted by a special magistrate or two justices of a Juvenile Court, and it has power to determine all charges other than homicide. A child convicted of an offence punishable by imprisonment can be committed by a court only to a reformatory. For indictable offences, the penalty is committal to a reformatory or a fine of up to £50.

**5. Western Australia.**—Children's Courts deal with offenders under the age of 18 years and hear cases of certain offences against children. Special magistrates are appointed for Children's Courts, and the Governor may appoint other persons to be members of a particular Children's Court. One member may sit and adjudicate with the special magistrate, but in the magistrate's absence at least two members must be present.

A Children's Court is deemed to be a court of summary jurisdiction and may exercise exclusive jurisdiction in respect of all offences except wilful murder, murder, manslaughter or treason alleged to have been committed by children.

Adults charged with certain indictable offences against children may forego the right to trial by jury and agree to be dealt with summarily by Children's Courts.

**6. Tasmania.**—Under the provisions of the *Child Welfare Act 1960*, Children's Courts are established to deal with offenders under the age of 17 years. Special magistrates may be appointed by the Governor to adjudicate in these Courts, and one such Magistrate is sufficient to constitute a Court. In the absence of a Special Magistrate, the Court may be constituted by a Police Magistrate or two justices.

A Children's Court is a court of summary jurisdiction, but in the case of children under 14 years of age it may hear and determine all indictable offences except murder, attempt to murder, manslaughter, and wounding with intent to do grievous bodily harm. When children over this age are charged with an indictable offence, they, or their parents on their behalf, may elect to be dealt with by the Court in a summary way instead of being tried by a jury, except when the offences are murder, attempt to murder, manslaughter, rape, wounding with intent to do grievous bodily harm and robbery with violence.

**7. Northern Territory.**—The *Child Welfare Ordinance 1958-1960* provides for the establishment of Children's Courts. These courts are constituted by a special magistrate and one member of the Child Welfare Council authorized to sit as a member of the Children's Court. Where no Children's Court has been established for a particular area, or where special circumstances require it, the jurisdiction of a Children's Court may be exercised by a court of summary jurisdiction constituted by a special magistrate.

Proceedings in a Children's Court are in form similar to proceedings in a court of summary jurisdiction, but no reports of proceedings may be published without the express authority of the Court, and any person not directly concerned may be excluded from the hearing.

A Children's Court has jurisdiction in respect of all offences committed by persons under 18 years of age in respect of which proceedings may be taken in a court of summary jurisdiction. In dealing with such offences, the Court may, in cases other than homicide, impose a fine not exceeding fifty pounds or a sentence of imprisonment for not more than six months, and, in addition to or in lieu of these punishments, may make an order committing the child to the care of the Director of Child Welfare or of a person who is willing to undertake the care on the Court's terms and conditions (in which case the child may be declared a State child), or it may commit the child to an institution for a specified period or release the child on probation on such conditions as the Court orders. Children's Courts also exercise jurisdiction in respect of destitute, neglected, incorrigible or uncontrollable children.

**8. Australian Capital Territory.**—The *Child Welfare Ordinance 1957* provides that the Court of Petty Sessions constitutes the Children's Court when it is hearing proceedings involving persons under the age of 18 years. Its proceedings are similar to those of an ordinary Court of Petty Sessions except that persons not directly interested are excluded from the Court.

In addition to the power to deal with summary offences, the Children's Court has power to hear and determine summarily a charge for an indictable offence other than an offence punishable by death. In either case, the Court's powers include releasing an offender on probation, committing him to the care of a specified person, making him a government ward, or committing him to an institution for up to three years.

## § 4. Higher (Judges') Courts

NOTE.—In interpreting the statistics in the following paragraph, the factors affecting comparability listed at the beginning of this chapter (p. 657) should be borne in mind.

1. **Criminal Proceedings.**—(i) *Offences for which Persons were convicted at Higher Courts.* The following table shows the number of persons convicted at higher courts in each of the States and Territories of Australia during 1961, classified according to the nature of the offence.

## PERSONS CONVICTED AT HIGHER COURTS, 1961

(a) Year ended 30th June. (b) A person convicted on several counts at the one hearing is included only once, but if a person has been convicted at different hearings during the year, whether for the same or for a different type of offence, the results of all hearings are recorded separately. (c) Convictions. (d) Includes causing death by dangerous driving.

(ii) *Persons Convicted at Higher Courts, Numbers and Rates.* The numbers of persons convicted at higher courts for the years 1957 to 1961 are given in the following table.

## PERSONS CONVICTED AT HIGHER COURTS

State or Territory	1957	1958	1959	1960	1961
New South Wales .. ..	2,225	2,274	2,325	2,635	2,712
Victoria .. ..	1,643	1,779	1,799	1,996	2,307
Queensland(a)(b) .. ..	584	883	915	1,020	1,279
South Australia .. ..	459	457	499	580	606
Western Australia .. ..	200	255	216	183	203
Tasmania(c) .. ..	205	276	290	295	304
Northern Territory .. ..	(a) 59	31	69	29	87
Australian Capital Territory ..	32	50	40	62	54
<b>Australia .. ..</b>	<b>5,407</b>	<b>6,005</b>	<b>6,153</b>	<b>6,800</b>	<b>7,552</b>

(a) Year ended 30th June.

(b) A person convicted on several counts at the one hearing is included only once.

(c) Convictions.

The numbers of persons convicted at higher courts in Australia per 10,000 of population for the years 1957 to 1961 were:—1957, 5.6; 1958, 6.1; 1959, 6.1; 1960, 6.6; 1961, 7.2.

(iii) *Habitual Offenders.* An account of the methods adopted in each jurisdiction in connexion with habitual offenders is given in the following paragraphs.

(a) *Commonwealth.* Under the provisions of the *Crimes Act* 1914–1960, where a person who is convicted of an indictable offence against the law of the Commonwealth has been previously convicted on at least two occasions of indictable offences against the law of the Commonwealth or of a State or Territory, the court before which he is convicted may declare that he is a habitual criminal, and may direct as part of his sentence that on expiration of the term of imprisonment then imposed on him he be detained during the pleasure of the Governor-General.

(b) *New South Wales.* The *Habitual Criminals Act* 1957 gives power to judges to declare as a habitual criminal any person of or above the age of 25 years who has been convicted on indictment and has on at least two occasions previously served separate terms of imprisonment as a consequence of convictions for indictable offences, provided that such offences were not dealt with summarily without his consent. A person may also be pronounced by a Judge to be a habitual criminal upon recommendation by a Stipendiary Magistrate.

A judge, having pronounced a person to be a habitual criminal, shall sentence him to a term of imprisonment of not less than five years nor more than fourteen years.

A habitual criminal so sentenced may be considered for release on licence in the light of his conduct and attitude after he has served two-thirds of his sentence. He will, in any event, be granted a remission to permit his release on licence after five-sixths of his sentence, subject to good conduct and industry.

(c) *Victoria.* The Indeterminate Sentences provisions of the *Crimes Act* were abolished as from 1st July, 1957, with the proclamation of the *Penal Reform Act* 1956. The terms "reformatory prison" and "habitual criminal" also ceased to exist as from that date.

Under the *Penal Reform Act* 1956, a sentence of twelve months or more must contain provision for an offender's release on parole after he has served a minimum term which must be named. With sentences of under twelve months, the courts may fix a minimum term.

The relevant parts of the *Penal Reform Act* 1956 have now been embodied in Sections 506 to 542 of the *Crimes Act* 1958. In the case of the persistent offender, if the court is satisfied that it is expedient for the protection of the public that he should be detained in gaol for a substantial time, the court may pass a sentence of preventive detention for a term of not more than ten years, and where any such sentence is passed shall fix a minimum term during which the offender shall not be eligible to be released on parole.

(d) *Queensland.* Sections 659A to 659I, of the *Criminal Code of Queensland* deal with habitual criminals. Only the Supreme Court or a judge thereof, or a District Court Judge, may declare a person to be a habitual criminal. A habitual criminal is detained in a reformatory prison (Section 659D) and there employed (Section 659F).

Where the Supreme Court or a judge recommends the discharge of a habitual criminal, the Governor may direct his discharge and may order him so long as he remains in Queensland to report at intervals during any period not exceeding two years (Section 659G).

A habitual criminal may be released by order in writing (called a "parole order") by the Parole Board set up under the provisions of the *Offenders Probation and Parole Act* of 1959, after he has been detained during a period of two years (Section 32).

(e) *South Australia.* The *Criminal Law Consolidation Act 1935-1957* provides that persons previously convicted of a certain number of indictable offences of a particular class may be declared habitual criminals and shall then be detained during Her Majesty's pleasure. Proof of previous convictions is in all cases relevant to the question of penalty.

(f) *Western Australia.* Under the *Criminal Code Amendment Act 1918*, power is given to sentence a prisoner to be detained in a reformatory prison during the Governor's pleasure, where such prisoner is deemed to be a habitual criminal, or in other special circumstances where the Court considers such a sentence is fit.

The number under preventive detention on 30th June, 1962, was 29, and the total number dealt with since the passing of the Act was 236.

(g) *Tasmania.* Since the *Indeterminate Sentences Act* came into operation in 1922, 166 persons have been confined under its provisions and 27 were in custody at the end of 1962.

Of the 133 released on probation, 32 have been recommitted.

(h) *Northern Territory.* The *Habitual Criminals Amendment Act 1907* of South Australia is still in force in the Northern Territory. By virtue of that Act, a Judge of the Northern Territory Supreme Court has power to declare as habitual criminals persons of any age who come before him for sentence and have had at least two or, in some cases, three previous convictions for certain indictable offences specified in the Act. The result of the declaration is that the offender is detained for an indefinite period after the completion of his sentence, and is released only when he is considered fit to be at large.

(i) *Australian Capital Territory.* The *Habitual Criminals Act 1905* of New South Wales is still in force in the Australian Capital Territory. By virtue of that Act, a judge of the Australian Capital Territory Supreme Court has power to declare as habitual criminals persons of any age who come before him for sentence and have had at least two or, in some cases, three previous convictions for certain indictable offences specified in the Act. The result of the declaration is that the offender is confined for an indefinite period after the completion of his sentence, and is released only when he is considered fit to be at large. Habitual criminals declared in the Australian Capital Territory are detained in New South Wales.

(iv) *Capital Punishment.* There were eight executions in Australia during the period 1952 to 1961. Three took place in South Australia (one each in 1953, 1956, and 1958), three in Western Australia (one each in 1952, 1960, and 1961), and two in the Northern Territory (in 1952). In each case the offence was murder.

Under the *Criminal Code Amendment Act* of 1922, capital punishment was abolished in Queensland, and in New South Wales the *Crimes Act* was amended in 1955, abolishing capital punishment for all offences except treason and piracy with violence. In the Australian Capital Territory, the *Child Welfare Ordinance 1957* now provides that no death sentence is to be pronounced or recorded against a person under the age of 18 years.

In the early days of the history of Australia, the penalty of death was attached to a large number of offences, many of which would now be dealt with in a Magistrate's Court. The present tendency is to restrict death sentences to persons convicted of murder. Although rape is a capital offence in some States, the penalty of death has not been imposed in recent years on persons convicted of it.

The average annual number of executions in Australia from 1861 to 1880 was 9; from 1881 to 1900, 6; from 1901 to 1910, 4; from 1911 to 1920, 2; from 1921 to 1930, 2; from 1931 to 1940, 1; from 1941 to 1950, 0.5; and from 1951 to 1960, 1.0.

**2. Divorce and Other Matrimonial Relief.**—(i) *Separation and Maintenance Orders of Courts of Summary Jurisdiction.* In all States and Territories, there are laws enabling a wife whose husband leaves her or the children of the marriage without adequate means of support to obtain a maintenance order against the husband from a court of summary jurisdiction. In some States and in the Northern Territory, courts of summary jurisdiction also have power to make separation orders. A separation order is intended primarily for the protection of the person of the wife.

(ii) *Divorce and Other Matrimonial Relief Granted by Higher Courts.* A marriage may be terminated by a Supreme Court of a State or Territory in one of three ways. Firstly, there may be a dissolution of the marriage, commonly known as divorce; secondly, the courts may annul a marriage; and thirdly, there can be a judicial separation of the parties.

Until recently, each State was primarily responsible for the provision of matrimonial relief. The law varied from State to State; for example, as to the period of desertion needed to obtain a decree for the dissolution of marriage.

In 1959, however, the Commonwealth Parliament passed the *Matrimonial Causes Act 1959* which came into force on 1st February, 1961. The Act establishes uniform grounds throughout the whole of the Commonwealth for the termination of marriage. While the Act displaces corresponding State law, it vests jurisdiction in existing State and Territorial Courts.

Some of the statistical information given in this section relates to proceedings under the system before the operation of the Commonwealth Act.

(iii) *Matrimonial Causes Act 1959.* Under the *Commonwealth Matrimonial Causes Act 1959*, a decree for the dissolution of marriage may be granted on fourteen grounds, which include adultery, desertion, insanity, separation for five years in certain circumstances, or failure to comply with a restitution decree.

Proceedings for nullity of marriage may be instituted in respect of a marriage which is void or voidable. A marriage which is void has no existence at all, and so it is not legally necessary to obtain a decree of nullity of marriage, but since the issue may depend on difficult questions of fact, such as proof that the consent of one of the parties to the marriage was not a real consent, it is advisable and customary to seek a court judgment which decides the question of the validity of the marriage.

Proceedings for annulling a voidable marriage may be instituted on various grounds, as, for example, where at the time of the marriage either party was a mental defective. A voidable marriage is void from the date of the decree absolute, but until then the parties have the status of married people, and transactions concluded on the basis of the existence of that status cannot be undone or re-opened. Since the parties to a marriage which is void or which has been voided do not have the status of married people, they may remarry.

The death of either husband or wife terminates any proceedings for matrimonial relief. A decree for dissolution or annulment of a voidable marriage is first a decree *nisi*. The decree automatically becomes absolute at the expiration of three months, unless it is in the meantime rescinded, appeal proceedings are instituted, or there are children of the marriage under the age of 16, in which case the Court must be satisfied that appropriate arrangements have been made for their welfare before the decree will become absolute. The parties cannot remarry until a decree *nisi* has become absolute.

A decree of judicial separation is available on most of the grounds available for divorce. It leaves unimpaired the status of marriage, but suspends rights and duties with respect to cohabitation. A husband is not responsible for the acts of his wife, except that he is liable for necessities supplied to her if he has failed to pay alimony ordered by a court. Persons who have judicially separated cannot remarry, but a divorce may be obtained on the same facts as those on which the decree of judicial separation was based.

The new Commonwealth Act provides for financial grants to approved marriage guidance organizations, and the courts are enjoined to consider at all times the possibility of reconciliation and they may take certain steps to endeavour to effect a reconciliation.

In the following tables, the term "divorce" is used to cover dissolution of marriage, nullity of marriage and judicial separation.

(iv) *Number of Petitions Filed.* The following table shows the number of petitions for dissolution of marriage, nullity of marriage and judicial separation filed in each State during 1961 and 1962.

### PETITIONS FILED FOR DISSOLUTION OF MARRIAGE, NULLITY OF MARRIAGE AND JUDICIAL SEPARATION

Total Children (a)	..	..	1,897	2,842	1,992	972	360	216	63	24	18	..	..	8,384

(a) The term "children" used in the Commonwealth legislation refers to living "children of the marriage" under 21 years. However, as the majority of the dissolutions in this period were granted to petitions lodged under old legislation, it has not been possible to make the data in the table above conform exactly to this definition. For instance, New South Wales, Victoria, Queensland and Western Australia included children whether living or dead; and only Queensland included adopted children.

(xii) *Ages of Children of Dissolved Marriages.* The following table shows the ages of children of marriages dissolved in 1961 and 1962. The children referred to are only those under 21 years of age at the time of petition.

**CHILDREN OF DISSOLVED MARRIAGES(a) BY AGE AT TIME OF PETITION:  
AUSTRALIA**

Petitioner	Age of children at time of petition—																		Total number of children
	Under 12 mths	1 yr	2 yrs	3 yrs	4 yrs	5 yrs	6 yrs	7 yrs	8 yrs	9 yrs	10 yrs	11 yrs	12 yrs	13 yrs	14 yrs	15 yrs	16-20 yrs	Not stated

Total ..	43	116	204	373	439	464	526	519	522	525	507	432	459	375	441	372	1177	890	8,384

(a) This table refers to children, under 21 years at time of petition, of marriages for which decrees absolute for dissolution have been granted in 1961 and 1962. (b) Includes mainly children in respect of petitions for dissolution of marriage lodged under the superseded matrimonial causes laws of the States which did not, in all cases, require this information to be supplied. Most of the not stated cases refer to dissolutions in New South Wales.

(xiii) *Number of Divorced Persons at each Census, 1911 to 1961.* The following table shows the number and proportion of divorced persons in Australia as recorded from returns supplied at each census from 1911 to 1961. A classification of divorced persons by age, for the censuses from 1891 to 1947, appeared in earlier issues of the Official Year Book (see No. 39, p. 269). Prior to 1911, no record was made of divorced persons in South Australia, so comparisons cannot be made beyond that date.

**DIVORCED PERSONS AT CENSUS DATES: AUSTRALIA**

3. *Bankruptcy.*—(i) *General.* Particulars relating to bankruptcy in each State to the end of 1927 were incorporated in issues of the Official Year Book prior to No. 23. On 1st August, 1928, the *Commonwealth Bankruptcy Act*, which is now the *Bankruptcy Act 1924-1960*, came into operation.

Under the *Bankruptcy Act* 1924–1960, the Commonwealth is divided into bankruptcy districts which coincide generally with State boundaries. A Federal Court of Bankruptcy has been established with jurisdiction throughout Australia, but it exercises this jurisdiction mainly in the bankruptcy districts of New South Wales, which includes the Australian Capital Territory, and Victoria. Certain State courts have been invested with federal jurisdiction in bankruptcy and, outside New South Wales and Victoria, usually exercise that jurisdiction in the appropriate bankruptcy district.

Any person unable to pay his debts may apply voluntarily for the sequestration of his estate, or his creditors may apply for a compulsory sequestration, if he has committed an act of bankruptcy. The act of bankruptcy usually relied on is non-compliance by a debtor with a bankruptcy notice which requires the debtor to whom it is addressed to pay within a specified time, to a creditor who has obtained a final judgment or order to pay, the amount of the debt, or satisfy the Court that he has a counter claim, set-off, or cross demand which equals or exceeds the judgment debt. If a bankruptcy notice is not complied with, a creditor may thereupon present a petition against a debtor, provided that—the debt or debts amount to £50; the act of bankruptcy relied on has occurred within the six months preceding the presentation of the petition; and the statutory requirements relating to domicile or residence are applicable to the debtor.

Upon the issue of a sequestration order, the property of the bankrupt vests in the official receiver named in the order, and his property is divisible among his creditors in accordance with the provisions of the Act. No creditor to whom the bankrupt is indebted in respect of any debt provable in bankruptcy has any remedy against the property or person of the bankrupt except by leave of the court.

Under Part XI. of the *Bankruptcy Act* 1924–1960, instead of having a sequestration order made against his estate, a debtor may compound with his creditors or assign his estate for their benefit. Under Part XII of the Act, a debtor may enter into a scheme of arrangement. The object of Parts XI and XII of the Act is to allow a debtor and his creditors to enter into an agreement concerning the debts due to the creditors without having a sequestration order made against the debtor.

The Court has power to decide questions of law affecting a bankrupt estate. Questions of fact may be tried before a jury.

The *Bankruptcy Act* 1924–1960 provides for an Inspector-General in Bankruptcy, and for a Registrar and an Official Receiver to be appointed for each bankruptcy district.

A Registrar in Bankruptcy is controlled by the Court and has such duties as the Attorney-General of the Commonwealth directs, or as are prescribed, and exercises such functions of an administrative nature as are authorized by the Court. He may examine a bankrupt or a person indebted to a bankrupt or having in his possession any of the estate or effects of a bankrupt. Stipendiary magistrates are appointed Deputy Registrars in country districts.

All sequestrated estates are vested in an Official Receiver, who is a permanent officer of the Commonwealth Public Service. His duties are to investigate the conduct, property and transactions of the debtor, and the cause of bankruptcy of a debtor, and to realize and administer the estate of the debtor. In respect of these activities, the Official Receiver is under the control of the Court.

Persons registered by the Court as qualified to act as trustees may be appointed by resolution of the creditors to be trustees of estates. In cases where a registered trustee under a deed of arrangement, composition, or assignment (Parts XI and XII of the *Bankruptcy Act*) is removed from or vacates his office, the official receiver may be appointed by the Court to complete the administration of the estate, or the Court may direct the official receiver to convene a meeting of the creditors in the estate to enable them to appoint a registered trustee to complete the administration of the estate.

(ii) *Bankruptcy Proceedings.* The following table shows the number of bankruptcies of the various types in each State, together with the assets and liabilities of the debtors, during the twelve months ended 30th June, 1962.

## BANKRUPTCY PROCEEDINGS, 1961-62

(a) Excludes judgments signed in the Supreme Court.  
(c) Judgments signed and entered.

(b) Year ended 30th June, 1961.

## § 5. High Court of Australia

The High Court of Australia consists of a Chief Justice and six other Justices. Its principal seat is in Melbourne, but sittings are held in every State capital as occasion requires. The High Court has both original and appellate jurisdiction. Its original jurisdiction is usually exercised by a single Justice, appellate jurisdiction by at least three Justices.

The Constitution itself confers original jurisdiction on the High Court in all matters (i) arising under any treaty, (ii) affecting consuls or other representatives of other countries, (iii) in which the Commonwealth, or a person suing or being sued on behalf of the Commonwealth, is a party, (iv) between States, or between residents of different States, or between a State and a resident of another State, (v) in which a writ of mandamus or prohibition or an injunction is sought against an officer of the Commonwealth. In addition, Parliament may, under the Constitution, confer additional original jurisdiction on the High Court in certain classes of matters, and has in fact conferred original jurisdiction on the High Court in all matters arising under the Constitution or involving its interpretation and in trials of indictable offences against the laws of the Commonwealth. In matters (i) and (v) and in suits between the Commonwealth and a State or between States, the jurisdiction of the High Court is exclusive of that of the State Courts, and in matters (other than trials of indictable offences) involving any question as to the limits *inter se* of the constitutional powers of the Commonwealth and those of the States, the jurisdiction of the High Court is exclusive of that of the Supreme Courts of the States.

Under the Constitution, the High Court has jurisdiction, with such exceptions and subject to such regulations as the Parliament permits, to hear and determine appeals from all judgments, decrees, orders and sentences of (i) any Justice or Justices exercising the original jurisdiction of the High Court, (ii) any other Federal court or court exercising Federal jurisdiction and (iii) from the Supreme Court or other court of any State from which appeal lay to Privy Council at the establishment of the Commonwealth. In respect of (iii), the Parliament has prescribed that, generally, appeal can be brought only by special leave of the High Court. However, in the case of judgments affecting the status of any person under the laws relating to aliens, marriage, bankruptcy or insolvency, or in respect of any sum or matter at issue, or involving any claim, demand, or question, or to regarding any property or civil right, amounting to or of the value of £1,500, appeal may be brought as of right from final judgments, and by leave of the High Court or the Supreme Court from interlocutory judgments.

By Acts of Parliament and by subordinate legislation, the High Court has also been given appellate jurisdiction in respect of the courts of the Territories under the control of the Commonwealth. Provision is also made in various enactments for appeal to the High Court on points of law from administrative determinations, such as decisions of the Commissioner of Taxation and Taxation Boards of Review, the Commissioner of Patents, or the Registrar of Trade Marks. Such proceedings, although called appeals, are in reality proceedings in the original jurisdiction of the High Court.

The following table shows the transactions of the High Court for 1961 and 1962.

#### TRANSACTIONS OF THE HIGH COURT OF AUSTRALIA

Original jurisdiction(a)	1961	1962	Appellate jurisdiction	1961	1962
Number of writs issued ..	130	92	Number of appeals set down for hearing ..	122	132
Number of cases entered for trial ..	51	51	Number allowed ..	31	36
Judgments for plaintiffs ..	27	30	Number dismissed ..	65	52
Judgments for defendants ..	8	2	Otherwise disposed of ..	31	20
Otherwise disposed of ..	29	36			
Amount of judgments ..	£58,175	£96,588			

(a) Some matters dealt with by the High Court neither originate as writs nor are entered as cases.

During 1961 and 1962, respectively, the High Court dealt also with the following:— appeals from assessments under the Taxation Assessment Act, 39, 49; special cases stated for the opinion of the Full Court, 11, 8; applications for prohibition, etc., 21, 23. The fees collected amounted to £2,952 in 1961 and £3,239 in 1962.

## § 6. Police, Prisons and Prisoners

1. Police.—(i) *General.* The primary duties of the police are to prevent crime, to detect and detain offenders, to protect life and property, to enforce the law, and to maintain peace and good order. In addition, they perform many duties in the service of the State, e.g. they act as clerks of petty sessions in small centres, as crown land bailiffs, foresters, mining wardens and inspectors under the fisheries and various other Acts. In metropolitan and large country areas, they also regulate the street traffic. With the exception of the Commonwealth Police Force (*see* next page) and the police in the Northern Territory and the Australian Capital Territory, the police forces of Australia are under the control of the State governments, but their members perform certain functions for the Commonwealth government, such as acting as aliens registration officers and policing various acts and regulations.

Women police perform special duties at places where young women and girls are subject to moral danger, control traffic at school crossings, and lecture school children on road safety. They also assist male police as required in the performance of normal police duties.

The strength of the police force in each State and Territory and the number of persons to each police officer are shown in the following table for the years 1957 to 1961. The figures include traffic police, probationers, cadets, special constables and women police, but exclude parking police, native trackers (aboriginals employed in outlying districts in tracking lost persons and persons wanted by the police), female searchers, wardresses and interpreters. Figures refer to 30th June, except where otherwise indicated.

## STRENGTH OF POLICE FORCES

30th June—	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Australia

1960 .. ..	5	1	18	(d)	4	..	32	..	60
1961 .. ..	5	1	17	(d)	4	..	31	..	58

(a) At 31st December, 1957. (b) Included in total strength shown above. (c) Not included in total strength shown above. (d) One native tracker, who is paid a small weekly retainer and is supplied with rations, is continually on call.

(ii) *The Commonwealth Police Force.* The Commonwealth Police Force commenced operations on 21st April, 1960, and is the principal agency for the enforcement of the laws passed by the Commonwealth Parliament. It is also responsible for the protection of Commonwealth property and interests at various buildings and establishments under the control of the Commonwealth. This force co-ordinates the work of other Commonwealth investigation and law enforcement agencies and acts on behalf of the United Nations Organization for the suppression of traffic in women and the suppression of obscene literature.

Under the control of the force is the Australian Police College at Manly, N.S.W., which provides training for members of various police forces and other agencies in Australia and New Zealand.

The force has District Offices in each Capital City and its Head Office in Canberra. The strength of the force at 30th June, 1962, was 568 policemen and 3 policewomen. Twenty-eight guard dogs were available for use by the force and by State police forces as required.

2. **Prisons and Prison Accommodation.**—The table below shows the number of prisons in each State and the Northern Territory and the accommodation therein at 30th June, 1961.

PRISONS AND PRISON ACCOMMODATION, 1961

Particulars	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	Australia
Prisons .. .. .	18	11	8	16	19	1	2	75
Accommodation ..	2,912	2,055	929	965	906	381	87	8,235

There is no gaol in the Australian Capital Territory, but there is a lock-up attached to the police station at Canberra, and another lock-up at Jervis Bay, where offenders are held while awaiting trial or serving short sentences not exceeding one week imposed by a Magistrate's Court.

3. **Convicted Prisoners.**—The number of convicted prisoners at 30th June of each of the years 1957 to 1961 and the proportion per 10,000 of the population are shown in the following table.

CONVICTED PRISONERS

30th June—	N.S.W. (a)	Vic.	Q'land (b)	S. Aust. (b)	W. Aust. (b)	Tas. (b)	N.T. (b)	Australia

1960 .. .. .	7.6	5.9	5.8	6.0	7.3	5.7	10.2	6.6
1961 .. .. .	7.9	6.2	5.8	6.1	7.1	6.8	15.1	6.8

(a) Includes the Australian Capital Territory. Includes short-term prisoners held in lock-ups at police stations. (b) Excludes aboriginals.

## § 7. Patents, Trade Marks and Designs

1. **Patents.**—Patents for inventions are granted under the *Patents Act* 1952–1960, which applies to the Commonwealth of Australia and the Territories of Norfolk Island, Papua and New Guinea. The Act is administered by a Commissioner of Patents. The principal fees payable up to and including the grant of a patent amount to £19 10s. Renewal fees are payable as follows:—£5 before the expiration of the fourth year, and an amount progressively increasing by £1 before the expiration of each succeeding year up to the final fee of £16, payable before the expiration of the fifteenth year. An extension of time for six months for payment of a renewal fee may be obtained.

The number of separate inventions in respect of which applications were filed and the number of letters patent sealed during the years 1958 to 1962 are shown in the following table.

## PATENTS: AUSTRALIA

Particulars	1958	1959	1960	1961	1962
Applications .. ..	10,511	11,430	11,828	12,901	13,026
Applications accompanied by provisional specifications ..	3,919	4,063	3,772	3,919	3,710
Letters patent sealed ..	6,093	5,488	4,857	4,940	3,866

2. *Trade Marks and Designs.*—Under the *Trade Marks Act* 1955–1958 the Commissioner of Patents is also Registrar of Trade Marks. This Act has replaced the *Trade Marks Act* 1905–1948. Provision is made for the registration of users of trade marks and for their assignment with or without the goodwill of the business concerned. A new classification of goods has been adopted and trade marks registered under the repealed Acts are reclassified on renewal.

Under the *Designs Act* 1906–1950, the Commissioner of Patents is also Registrar of Designs.

The following table shows the applications for trade marks and designs received and registered during the years 1958 to 1962.

## TRADE MARKS AND DESIGNS: AUSTRALIA

Particulars	1958	1959	1960	1961	1962

Registered .. ..	1,758	819	1,507	1,522	1,064

## § 8. Copyright

1. *Legislation.*—Copyright is regulated by the *Commonwealth Copyright Act* 1912–1950 wherein, subject to modifications relating to procedure and remedies, the British *Copyright Act* of 1911 has been adopted and scheduled to the Australian law. The Act is administered by the Commissioner of Patents.

Reciprocal protection of unpublished works was extended in 1918 to citizens of Australia and of the United States of America, under which copyright may be secured in the latter country by registration at the Library of Congress, Washington. The Commonwealth government promulgated a further Order in Council which came into operation on 1st February, 1923, and extended the provisions of the *Copyright Act* to the foreign countries of the Copyright Union, subject to the observance of the conditions contained therein.

2. *Applications and Registrations.*—The following table shows under the various headings the number of applications for copyright lodged and registered for the years 1958 to 1962.

## COPYRIGHT: AUSTRALIA

## § 9. Cost of Administration of Law and Order

1. *Expenditure by the States.*—The tables below show the net expenditure (i.e., gross expenditure less receipts from fees, fines, recoups for services rendered, etc.) from Consolidated Revenue during 1961–62 in connexion with the administration of justice, police and prisons in each State.

In South Australia, the receipts for legal fees and registrations exceed the expenditure under "Justice". Because of differing legislative and administrative arrangements in the various States, the activities covered by the figures shown are not exactly the same in each State. Small differences also result from differing accounting practices. However, the figures shown for individual States are comparable from year to year.

## NET EXPENDITURE ON LAW AND ORDER, 1961-62

State	Net expenditure			Per head of population		
	Justice	Police	Prisons	Justice	Police	Prisons
	£	£	£	s. d.	s. d.	s. d.
New South Wales ..	1,475,864	8,908,081	1,524,809	7 6	45 2	7 9
Victoria ..	773,750	7,365,756	1,102,880	5 3	49 9	7 5
Queensland ..	259,875	4,654,903	492,854	3 5	61 0	6 5
South Australia ..	—232,663	2,703,973	442,113	—4 9	55 2	9 0
Western Australia ..	102,331	1,905,071	307,635	2 9	51 1	8 3
Tasmania ..	250,240	950,926	224,640	14 0	53 3	12 7
Total ..	2,629,397	26,488,710	4,094,931	4 8	52 7	8 7

2. *Commonwealth Expenditure.*—(i) *Attorney-General's Department.* The expenditure shown in the previous table is that incurred by the State Governments. Since the functions of the Commonwealth Government in the administration of law and order differ considerably from those of the States, precise comparison between Commonwealth and State expenditure in this field is not possible. The following table, however, shows the gross expenditure by the Commonwealth Attorney-General's Department during the year 1961–62 on the main services performed by that department.

EXPENDITURE BY THE COMMONWEALTH ATTORNEY-GENERAL'S DEPARTMENT, 1961-62  
(£)

Particulars	Gross expenditure
Administration .. .. .	323,673
Bankruptcy .. .. .	235,224
Commonwealth Police Force .. .. .	333,084
Court Reporting Branch .. .. .	191,923
Crown Solicitor's Office .. .. .	438,811
High Court .. .. .	169,298
Industrial Court .. .. .	114,811
Industrial Registrar's Branch .. .. .	237,008
Judges' Pensions .. .. .	22,180
Legal Service Bureau .. .. .	60,762
Matrimonial Causes—Grants to organizations .. .. .	51,000
Patents, Trade Marks and Designs .. .. .	519,864
Rent .. .. .	85,617
Repairs and Maintenance .. .. .	21,466
Total .. .. .	2,804,721

In addition, £243,851 was spent by the Attorney-General's Department on capital works and services.

The items of expenditure shown in the table above are gross. Receipts of the Attorney-General's Department for 1961-62 aggregated £946,934, of which revenue on account of Patents, Trade Marks and Designs, and Copyright amounted to £581,662, Bankruptcy £168,787, Court Reporting Branch £142,353, Fees, Fines and Costs of Court £31,323, and Miscellaneous £22,809.

Expenditure and receipts of the Attorney-General's Department for the five years 1957-58 to 1961-62 is shown in the following table.

#### EXPENDITURE BY THE COMMONWEALTH ATTORNEY-GENERAL'S DEPARTMENT

(£)

Year	Gross expenditure	Receipts	Net expenditure
1957-58 .. .. .	1,984,776	516,090	1,468,686
1958-59 .. .. .	2,100,388	572,771	1,527,617
1959-60 .. .. .	2,434,828	670,048	1,764,780
1960-61 .. .. .	2,594,495	812,493	1,782,002
1961-62 .. .. .	2,804,721	946,934	1,857,787

(ii) *Police and Prisons.* Expenditure (other than capital) by the Commonwealth Government on police in the Australian Capital Territory (excluding the Commonwealth Police Force shown above) and police and prisons in the Northern Territory for the five years 1957-58 to 1961-62 is shown in the following table.

#### EXPENDITURE ON POLICE AND PRISONS IN THE NORTHERN TERRITORY AND THE AUSTRALIAN CAPITAL TERRITORY

(£)

Year	Northern Territory	Australian Capital Territory(a)
1957-58 .. .. .	208,099	142,462
1958-59 .. .. .	227,031	137,894
1959-60 .. .. .	262,261	168,952
1960-61 .. .. .	322,763	197,275
1961-62 .. .. .	335,485	215,921

(a) Expenditure on police only. There is no prison in the Australian Capital Territory.

## CHAPTER XVII

### PUBLIC HEALTH

#### STATE GOVERNMENT ACTIVITIES

(Including activities of the Commonwealth Government in the Northern Territory and the Australian Capital Territory)

#### § 1. Public Health Legislation and Administration

1. **New South Wales.**—The Department of Public Health comes under the jurisdiction of the Minister for Health, with an Under-Secretary as Permanent Head of the Department for administrative purposes.

There is a Director-General of Public Health who is Chief Medical Adviser to the Government, *ex officio* President of the Board of Health, Chairman of the Nurses Registration Board, and Director of State Psychiatric Services. In the latter capacity, he is responsible for the administration of the part of the *Mental Health Act* relating to the care and treatment of mental patients.

The Department's activities embrace all matters relating to public health and the greater part of the general medical work of the Government. These include:—(a) Supervision of the work of local authorities (municipal and shire councils) in relation to public health matters connected with the following Acts—*Public Health Act*, *Noxious Trades Act* and *Pure Food Act*; (b) Scientific divisions (Government Analyst, Microbiological Laboratory, Institute of Clinical Pathology and Medical Research, and Division of Occupational Health); (c) Tuberculosis and Epidemiological Divisions; (d) Medical Officers of Health at Sydney, Broken Hill, Newcastle, Wollongong, Bathurst, Tamworth and Lismore; (e) State hospitals and homes and State sanatoria; (f) Mental hospitals; (g) Public hospitals (Hospitals Commission); (h) Maternal and baby welfare (baby health centres); (i) School medical and dental services; and (j) Publicity, nutrition and library services.

2. **Victoria.**—(i) *General.* The Ministry of Health, set up in 1943 for the purpose of promoting the health of the people of the State, combines under the control of one Minister all the health, hospital and associated services either administered directly or supported financially by the Government. The central administration of the Department of Health assists the Minister with the task of co-ordinating the work of a variety of associated bodies as well as carrying out the functions of a headquarters of a Department consisting of four branches—the General Health Branch, the Maternal and Child Welfare Branch, the Tuberculosis Branch and the Mental Hygiene Branch. The functions of these branches are described below.

(ii) *The General Health Branch.* This branch, which, *inter alia*, is the administrative branch for the Commission of Public Health, protects or promotes the health of the community in the following ways.

The Engineering Division scrutinizes from a public health point of view the plans of all public buildings and provincial sewerage installations and makes periodical inspections. Other activities include prevention of air pollution from industrial sources, prevention of stream pollution and supervision of abattoirs and cattle sale yards.

The Poliomyelitis Division provides a comprehensive orthopaedic, physiotherapy and respirator service for all eligible patients and carries out rehabilitation in conjunction with the Commonwealth Government. Facilities developed for poliomyelitis are now being used for other neurological disorders. The Division is also concerned with the Salk immunization campaign being undertaken in Victoria. Through the municipalities, immunization against poliomyelitis, diphtheria, smallpox, whooping cough, and tetanus is encouraged and supervised.

Prevention and control of infectious diseases are functions of this Branch, which also sponsors original research into virus diseases and epidemiological investigations throughout Victoria.

The Venereal Diseases Division provides a centrally situated headquarters where the use of modern remedies is effecting a general improvement in the standard of treatment.

Standards of quality and purity of foods and drugs are fixed by the Food Standards Committee and are administered and enforced by both departmental and municipal health inspectors.

Investigations into occupational hazards to the health of workers, the treatment and incidence of occupational diseases, and research into the effects of toxic substances used in industry are conducted by the Industrial Hygiene Division.

Subsidies are granted to municipalities to provide meals for pensioners, to clubs for elderly citizens, and to emergency housekeeper services.

Other services operated by the Branch are:—registering plumbers and gasfitters; providing free travel to hospital for people with limited incomes; analysing food, drink, water and sewerage effluents; registering cinematograph operators; administering the *Cemeteries Acts*; and advising industry on health hazards associated with handling radio-active substances.

(iii) *The Maternal and Child Hygiene Branch.* This branch is concerned with pre-natal hygiene, the development of pre-school services, and the school medical and dental services.

(iv) *The Tuberculosis Branch.* The Tuberculosis Branch is concerned with the prevention of tuberculosis and the treatment and rehabilitation of tubercular patients.

(v) *The Mental Hygiene Branch.* This Branch is controlled by the Mental Health Authority and consists of institutions for in-patient care and out-patient's clinics and other services necessary for a comprehensive community mental health programme. Since the appointment of the Authority in 1951, existing buildings have been remodelled and new ones provided. Services have been re-organized to conform with modern requirements.

3. *Queensland.*—(i) *General.* The *Health Acts 1937 to 1962* are administered by the Director-General of Health and Medical Services subject to the Minister for Health and Home Affairs. A central staff controls the following divisions.

(a) *Division of Public Health Supervision.* This Division is controlled by the Deputy Director-General of Health and Medical Services, and comprises separate sections of communicable disease control, environmental sanitation, food and drug control, enthetic (venereal) diseases, hookworm control and Hansen's disease (leprosy) control. Free treatment of venereal diseases is offered at the Department's clinics in Brisbane and at any public hospital. Free immunization against poliomyelitis, diphtheria, whooping cough and tetanus is offered by most of the local authorities. The majority of school children have been immunized against diphtheria, whooping cough, tetanus and poliomyelitis.

(b) *Division of Tuberculosis.* A central chest clinic in Brisbane offers Mantoux tests; X-ray examinations, and inoculations of Mantoux negative reactors free of charge, and this service is extensively used. Similar clinics are situated at the Cairns, Rockhampton, Thursday Island, Toowoomba, and Townsville district hospitals. Children in the final grade of primary schools are Mantoux-tested and given B.C.G. vaccine. The compulsory X-ray examination of all persons over the age of 14 years is proceeding. The survey of residents of the metropolitan area, now being done, and of the near south-west of the State will complete the campaign.

(c) *Division of Industrial Medicine.* The services of this Division are available both to industry and to the trade union movement, for the prevention of industrial hazards. This division is particularly interested in occupational diseases, such as silicosis and lead and other poisoning, and advises on industrial problems such as lighting, ventilation, fatigue, air pollution and the use of radio-active isotopes.

(d) *Division of Maternal and Child Welfare.* This Division offers supervision and advice on the rearing and health of infants and pre-school children at 251 baby health centres throughout the State. Outlying centres are visited by air or by special rail car. Homes for in-patient treatment of infants with feeding problems have been established at Brisbane, Toowoomba, Ipswich and Rockhampton.

(e) *Division of School Health Services.* This Division comprises the Chief Medical Officer, School Health Services, and a staff of doctors, dentists and visiting school nurses. Every child has a medical examination at least once in three years.

(f) *Division of Mental Hygiene.* The Director is responsible for the care and treatment of mentally sick patients in the State's four mental hospitals at Brisbane, Toowoomba, Ipswich and Charters Towers. In addition to a separate clinic at Brisbane, psychiatric services are available at Brisbane, Townsville, Rockhampton and Toowoomba Public Hospitals. There is also an epileptic home at Toowoomba.

(g) *Division of Welfare and Guidance.* Clinics for the diagnosis and management of behaviour disorders in children have been set up in the Greater Brisbane Area, and further clinics are planned for Townsville and Toowoomba. This service is extensively used. The Wilson Youth Hospital has been opened for the social and psychiatric rehabilitation of boys convicted in the Children's Court. About 40 boys can be accommodated.

(h) *Division of Laboratory Services.* Two laboratories—the Laboratory of Microbiology and Pathology and the Government Chemical Laboratory—are maintained to ensure the purity of a wide range of foodstuffs and materials. The former also offers a service in clinical pathology to institutions, country hospitals and private doctors, and provides a medico-legal service for the whole State. The Institute of Forensic Pathology is controlled by the medical staff of the Laboratory of Microbiology and Pathology, and coroners' autopsies are conducted there.

(ii) *Hospitals.* All public hospitals operate under the district system, which provides for the constitution of hospitals regions and hospitals districts, and a hospitals board for each district. The State is divided into 11 hospitals regions with a base hospital for each region. Each region comprises a number of hospitals districts, the purpose of the regional scheme being to co-ordinate the public hospitals in the region with the base hospital. The administration of the hospital services, including public dental services, in each hospitals district is vested in the hospitals board, which comprises not less than four members or more than eight members appointed by the Governor-in-Council, and one member elected by the component local authorities. During the year 1960–61, there were 57 hospitals boards controlling 132 public hospitals. In addition, six other hospitals received aid from the Government, and an institution for the treatment of Hansen's disease in aboriginals was maintained at Fantome Island near Townsville. Other persons suffering from this disease are treated at an annexe of the Princess Alexandra Hospital, South Brisbane.

4. *South Australia.*—The Department of Public Health embraces the activities of the Central Board of Health, the Food Drugs Advisory Committee, the Radiological Advisory Committee, the School Health Services (comprising School Medical and Dental Services and Deafness Guidance Clinic), Poliomyelitis Services and the public health aspect of the control of tuberculosis, including the State X-ray Health Survey and the Chest Clinic.

The Central Board of Health consists of five members, three of whom (including the chairman) are appointed by the Governor, while one is elected by metropolitan local boards and one by all other local boards. The Central Board of Health administers the *Health, Food and Drugs, Dangerous Drugs, Noxious Trades, Bakehouses Registrations and Early Notification of Birth Acts*. The Board is also concerned to some degree with Acts relating to local government, abattoirs and cremation. Other legislation administered by the Department of Public Health relates to venereal diseases and vaccination.

The *Health Act 1935–1961* constitutes every municipal council and every district council a local board of health for its municipality or district. There are 142 local boards under the general control and supervision of the Central Board. Under the *Food and Drugs Act* each local board is constituted the local authority for its respective district except in the metropolitan area, for which the Metropolitan County Board is the local authority.

5. *Western Australia.*—Health services are provided under the *Health Act 1911–1962*. The central authority is the Department of Public Health, controlled by a Commissioner, who must be a qualified medical practitioner. The State is divided into local government areas, each administered by a municipal council. All local government authorities have health administration powers.

In any emergency, the Commissioner may exercise all the powers of a health authority in any part of the State.

Features of legislation since 1947 are as follows:—(a) Act No. 70 of 1948 gives power to control sufferers from tuberculosis and establishes a Tuberculosis Control Branch; (b) Act No. 11 of 1952 gives wide powers to regulate the sale and use of pesticides; (c) Act No. 34 of 1954 provides for the licensing of manufacturers of therapeutic substances; (d) Act No. 21 of 1957 gives power to require the notification of any prescribed condition of health in addition to infectious diseases; (e) Act No. 17 of 1956 gives local authorities power to provide or subsidize centres for the accommodation and care of the aged; (f) Act No. 30 of 1958 provides for the establishment of the Health Education Council with the object of promoting and improving the health of the people of Western Australia; (g) Act No. 43 of 1958 provides for the establishment of the Cancer Council of Western Australia with the objects of co-ordinating, promoting and subsidizing cancer research; (h) Act No. 23 of 1960 establishes a Maternal Mortality Committee to investigate each maternal death and to recommend preventive measures; and (i) Act No. 33 of 1962 empowers medical practitioners to give blood transfusions to minors despite parental objections, where life is endangered.

**6. Tasmania.**—The Department of Health Services is under the jurisdiction of the Minister of Health. The Department consists of a Headquarters and three Divisions. The Director-General of Health Services is the permanent head of the Department, and he administers the Department through Directors of each of the three divisions (Division of Public Health, Division of Mental Health, and Division of Tuberculosis) and through several other clinical directors and other senior officers attached to the headquarters of the Department, including the Directors of Orthopaedics, Pathology and Anaesthetics, and the Government Analyst and Chemist.

In addition to his responsibility for the functioning of the Department as a whole, the Director-General of Health Services administers directly the various branches of the work performed by headquarters. They are concerned particularly with the following:—(a) the administration of the Hospital Services throughout the State, (b) the District Medical Service, (c) the Hospital and Government Nursing Service, which includes the administration of 25 District Nursing Centres throughout the State, (d) legislation concerned with Health and allied matters, the Nurses' Registration Board and the Dental Mechanics' Registration Board, (e) the National Fitness Council and Handicapped Children's Advisory Council, (f) Specialist Medical Services, (g) statistical classification of Diseases and Injuries, (h) liaison with other States and the Commonwealth Health Department; and (i) all matters dealing with the maintenance of departmental property and the appointments and salaries of departmental staff.

The Division of Public Health is responsible for the oversight of those services (except those specifically related to tuberculosis) which aim at the attainment and maintenance of good physical health in the community. It controls the school health services (both medical and dental) and the child health service. It supervises the immunization campaigns conducted by local health authorities and is responsible for custody of poliomyelitis vaccine and maintenance of records of its use. The Division also sets standards of food quality and of environmental sanitation, which are policed in detail by local health authorities. The Division administers laws relating to standards of food, drugs, and food premises, and to environmental sanitation, public buildings, infectious disease (other than tuberculosis), and cremation.

The Division of Mental Health provides a community psychiatric service. This includes a mental hospital and a neurosis hospital; institutional care for mental defectives, alcoholics, and sexual offenders; and a community psychiatric service on a regional basis covering the whole state. In addition, the Division administers the *Mental Hospitals Act* and the *Mental Deficiency Act* and provides a State-wide service for the supervision of mental defectives in the community.

The Tuberculosis Division is concerned with the prevention (including B.C.G. vaccination), detection, notification, examination and treatment of all forms of tuberculosis and the maintenance of chest hospitals and diagnostic clinics.

**7. Northern Territory.**—The Commonwealth Department of Health provides health services in the Northern Territory which include hospital, medical and dental services.

Four general hospitals have been established. The Darwin Hospital has accommodation for 284 in-patients, Alice Springs Hospital 130, Katherine Hospital 36, and Tennant Creek Hospital 31. The treatment of Hansen's disease (leprosy) is carried out at East Arm

Settlement. A full range of ancillary services is available at the Darwin hospital, which serves as a base hospital for the Territory. Dental clinics have been set up at Darwin and Alice Springs.

Medical and dental services to outback areas are provided by road and air. The Department of Health has two De Havilland Dove aircraft stationed at Darwin, and one at Alice Springs. They are staffed and serviced by Trans-Australia Airlines and are extensively used in ambulance and survey medical work. At Alice Springs, medical officers of the Department of Health provide the medical services to the Royal Flying Doctor Service (South Australian) base.

A section of the Department of Health undertakes continuous investigation into native health.

School doctors and dentists travel throughout the Territory to carry out diagnosis and treatment. Public health services are provided, and health inspectors visit all settlements periodically.

**8. Australian Capital Territory.**—The *Public Health Ordinance* 1928–1951 places under the control of the Minister for Health all matters relating to public health and hygiene in the Australian Capital Territory. A medical Officer of Health and a number of Health Inspectors are appointed to administer and police this ordinance. The Canberra Community Hospital is administered, subject to the Minister for Health, by a board consisting of five elected members and three members appointed by the Minister. The hospital has accommodation for 305 in-patients. A district nursing service, administered by the Commonwealth Department of Health, was established in 1950 to provide a home-nursing service for the sick and aged. The service is available at the request of a registered doctor.

## § 2. Supervision and Care of Infant Life

**1. General.**—Because the health of mothers and infants depends largely on pre-natal attention as well as after-care, government and private organizations provide instruction and treatment for mothers before and after confinement. The health and well-being of mother and child are looked after by baby health centres, baby clinics, crèches, etc.

In all States, Acts have been passed with the object of supervising the conditions of infant life and reducing the rate of mortality. Departments control the boarding-out of the wards of the State to suitable persons. Wherever possible, the child is boarded out to its mother or to a near female relative. Stringent conditions regulate the adoption, nursing and maintenance of children placed in foster-homes by private persons, while special attention is devoted to the welfare of ex-nuptial children.

Under the provisions of Part V. of the *Social Services Act* 1947–1961, a sum of £15 is payable to the mother in respect of each confinement at which a living or viable child is born if the mother has no other children under 16 years of age. Where there are one or two other children under 16, the amount payable is £16, and where there are three or more other children under 16, the amount payable is £17 10s. Where more than one child is born at a birth, the amount of the allowance is increased by £5 in respect of each additional child born at that birth. More detailed information concerning maternity allowances is given in Chapter XV. Welfare Services.

Information regarding infant mortality will be found in Chapter X. Vital Statistics (see page 380).

**2. Nursing Activities.**—Several State Governments maintain institutions which provide treatment for mothers and children, and, in addition, subsidies are granted to various associations engaged in welfare work.

(i) *Baby Health Centres.* The following table gives particulars of the activities of Baby Health Centres for the year 1962. The figures relate to all centres, whether permanently staffed or on a temporary or part-time basis. Centres may be located at accommodation specially provided for this purpose or at halls, schools, etc.

## BABY HEALTH CENTRES, 1962

Particulars	N.S.W.	Vic.	Q'land (a)	S. Aust. (a)	W. Aust.	Tas.	N.T.	A.C.T.	Aus- tralia
Number of centres	393	647	251	247	73	103	13	22	1,749
Attendances at centres ..	1,151,766	1,392,999	467,248	253,034	237,300	133,917	15,499	37,843	3,689,606
Visits by nurses to homes ..	(b)	159,303	(b)	31,899	23,959	76,067	4,979	4,645	(b)

(a) Year ended 30th June, 1962.

(b) Not available.

Mobile units are used as centres in some States. The number of these in 1962, included in the above table, were as follows:—Victoria, 6; Queensland, 1; South Australia, 3; Western Australia, 4; and Tasmania, 11.

In the last thirty years, the number of attendances at the Baby Health Centres has quadrupled. The number of attendances, at five-year intervals, since 1930 were as follows:—1930, 919,893; 1935, 1,355,306; 1940, 2,035,299; 1945, 2,927,764; 1950, 3,049,375; 1955, 3,099,233; and 1960, 3,480,203. During the year 1962, the number of attendances was 3,689,606.

(ii) *Bush Nursing Associations.* Treatment for mothers and children is also provided by the Bush Nursing Associations.

The number of centres maintained by the Associations in 1962 were:—New South Wales, 21; Victoria, 56; Queensland, 6; South Australia, 31; Western Australia, 11; and Tasmania, 25.

## § 3. Medical Inspection of School Children

1. *General.*—Medical and dental inspection of school children is carried out in all States, in the Northern Territory, and in the Australian Capital Territory. In some States, travelling clinics have been established to deal with dental defects.

2. *New South Wales.*—(i) *School Medical Service.* Doctors of the School Medical Service examine children attending all schools administered by the Department of Education and the majority of other schools in the State. They make annual visits to schools in the metropolitan, Newcastle and Wollongong areas, and in Armidale, Bathurst, Lismore and district, Grafton and district, and Cootamundra, and examine children in kindergarten or 1st grade in primary schools and 2nd year in secondary schools. Children in 4th grade in primary schools and 4th year in secondary schools are reviewed. Children in other classes are examined or reviewed as necessary.

In country areas, school children are examined by local medical practitioners according to the normal practice of the School Medical Service and under the supervision of local Municipal and Shire Councils. During the first examination, all children at these schools are examined, and following that, the same procedure is adopted as in the metropolitan area. This scheme is growing and the majority of Councils in New South Wales have expressed interest and are endeavouring to arrange with local medical practitioners to have the scheme introduced. If treatment is necessary, the parent is informed and, if possible, is called in for interview. In the metropolitan, Newcastle, Wollongong, Lismore and Grafton areas, school nurses follow up these cases with the object of persuading parents to seek medical advice for the children.

As well as examining school children, the medical officer examines the sanitary arrangements at each school. Bush nurses act as school nurses in schools at or near the bush nursing centres. Medical officers of this service examined 260,217 children in 1961 and 276,385 in 1962. Notifiable defects in the children examined were found in 32.0 per cent. and 33.0 per cent. respectively.

Various surveys of school children are undertaken from time to time, e.g. hearing surveys, hookworm surveys, height-weight surveys, and nutrition surveys, and investigations to determine the incidence of enlargement of the thyroid gland, defective vision, and postural defects.

Six child guidance clinics in the metropolitan area and one at Newcastle operate under the administration of the School Medical Service. One clinic functions at the Yasmar Boys' Shelter and deals exclusively with cases which come before the Children's Courts. Each clinic is staffed by a psychiatrist, a psychologist and social workers.

(ii) *School Dental Service.* There are 33 dental officers and 28 dental assistants on the staff of the Division of Dental Services, Department of Public Health, providing a School Dental Service for New South Wales school children. At the beginning of the 1962 school year, twelve fully-equipped mobile dental clinics were in service in country areas. The clinics are staffed by a dentist and assistant. They visit country schools and provide treatment free of charge.

There are five fixed clinics, each of two surgeries, a waiting room, office and separate washrooms for patients and staff. These are located at Newcastle and Wollongong, and at Hurstville, Parramatta and Naremburn in the Sydney metropolitan area. Free treatment may be obtained for those school children whose parents desire it. It is necessary to restrict the treatment to children of 6, 7 and 8 years of age, although children of any age may obtain free treatment of an emergency nature. A system involving examination only was commenced in September, 1960, whereby as many primary school children as possible are encouraged to seek private treatment.

A well-equipped dental surgery is in continuous operation at the Stewart House Preventorium, staffed by officers of the Division. A free dental service is provided, in co-operation with the Royal Flying Doctor Service, for children living in far western areas. In country areas where no adequate dental facilities exist, school children of all ages are eligible for treatment in the mobile clinics.

In 1962, 71,690 school children were examined and 16,601 were treated in 59,080 visits; 26,718 extractions, 66,668 fillings and 60,378 other treatments were completed. The parents of a further 36,993 children were notified of dental defects requiring treatment.

3. *Victoria.*—School Medical Services are conducted in close association with the Education Department. All children between the ages of 5 and 14 years attending State and registered primary schools are examined regularly, and any disabilities found in the children are brought to the notice of their parents. School nurses, under medical direction, visit the homes and schools. Children suffering from physical and mental disabilities are recommended to attend appropriate schools or classes by the medical officers. Some special training for the handicapped is given.

The School Dental Service has a staff of 40 dental officers and provides dental attention for children in parts of the metropolitan area at one of three dental centres and for a number of country districts, by means of 15 mobile units. It also provides dental services for children's institutions in and around Melbourne and certain provincial centres. The service is now providing dental attention for some 80,000 primary school children.

4. *Queensland.*—During 1961–62, medical officers and nurses examined 98,952 school children, referring children with defects to their own doctors. In western Queensland, local doctors act as part-time ophthalmic surgeons. Advice is given on school sanitation, infectious diseases in schools, and health education.

During 1961, school dentists gave treatment to 12,878 school children whose parents could not afford private treatment. The treatment was carried out at four rail dental clinics and with portable equipment at schools. In addition, school children are treated at hospital dental clinics in the larger towns.

5. *South Australia.*—The Metropolitan State schools are visited annually and the children are examined while in Grades 1, 4 and 7 in the primary schools and in their second and fourth years in secondary schools. Efforts are made to visit country schools every three years, when all the children are examined. Students who wish to become teachers are examined on appointment as Leaving Teaching Scholars while still attending secondary schools, again immediately prior to entering the Teachers' College and finally when they leave the College to take up teaching. Courses of lectures in health education are given to all College students and, in addition, domestic art students are lectured on home nursing.

During 1961, 68,615 children were examined by medical officers in 143 country and 109 metropolitan schools. Of these, 3,884 required treatment for defective vision, 1,916 for defective hearing, and 13,004 for dental disorders.

There were 1,691 children examined at the Deafness Guidance Clinic during 1961. Of the 1,118 new patients, 626 were referred to doctors or hospitals for treatment.

Educational work was assisted by talks to mothers' clubs and interviews with parents by doctors and dentists, and by home visits and interviews by nurses.

**6. Western Australia.**—The School Medical Service of the State Health Department employs seven full-time medical officers for schools. During 1961, these officers examined 58,012 children (metropolitan 36,405, country 21,607). The 410 schools visited comprised metropolitan, 257 (state schools 183, private schools 74), and country, 153 (state schools 124, private schools 29). The aim is to examine each school child three times in his school career.

During 1961, the twelve full-time dentists employed by the School Dental Service visited 13 metropolitan schools, 110 country schools, 6 orphanages and 8 native missions. The number of children examined was 9,732. With the consent of their parents, 5,902 of these were treated. The number of dental vans operating was 12. The cost of the School Medical Service and the School Dental Service for 1960–61 was £94,215.

**7. Tasmania.**—During 1962, three full-time and five part-time medical officers examined school children in State and private schools. In addition, three specialist medical officers also examined school children. Eighteen full-time and six part-time sisters visited homes and schools. Of the 28,216 children examined by medical officers, 8,442 were found to have defects.

Eleven school dental officers were employed during 1962, operating from surgeries at Hobart, Launceston, Burnie, Devonport, Ulverstone, Currie and Flinders Island, and from mobile clinics in other districts. A full-time dental surgeon is in charge of each surgery or clinic. During the year, there were 18,844 new visits to the school dentists and 25,997 repeat visits.

The cost of school medical and school dental services for the year ended 30th June, 1962, was £92,954.

**8. Northern Territory.**—The Schools Medical Officer makes routine physical examinations of all children attending both pre-school centres and the schools which come under the supervision of the Assistant Supervisor of Education in the Northern Territory. The only children not so examined by him are those at the Native Welfare Settlement School, i.e. full-blood aborigines, who are examined during native health surveys.

An immunization clinic and a paediatric clinic are held each week at the Darwin Hospital.

A special dental service for school and pre-school children is available in Darwin and Alice Springs.

**9. Australian Capital Territory.**—The Commonwealth Department of Health is responsible for health aspects of child welfare in the Australian Capital Territory. These include a school medical service carried out by two medical officers and two trained nurses who are full-time officers of the Health Department.

Routine examinations are carried out at all schools, public and private, within the Territory. The programme is planned to provide for examinations at the ages of six, eight and 12 years. During 1962, the total number of children examined in these age groups was 2,149.

Examinations of children attending Pre-school Centres are made according to the time available, an attempt being made to cover children aged 4½ to five years.

In addition, an immunization programme for the protection of children aged from six months to 12 years against diphtheria, whooping cough and tetanus is carried out by the school doctor. Injections given during 1962 numbered 8,774.

Anti-poliomyelitis injections are also given to children attending both primary and secondary schools, and nearly 14,000 injections were given during 1962. These included fourth injections to those previously immunized. Anti-poliomyelitis injections numbering 20,707 were given also to infants, pre-school children and adults.

The officer-in-charge of the school service also acts as medical adviser to the Mothercraft Council and at the Baby Health Centres.

The school dental service is staffed by ten dentists and eleven dental nurses, and has operated since 1950. Free dental treatment is available to children at infants' and primary schools. During 1962, 8,015 children were examined and treated.

### § 4. Inspection of Food and Drugs for Sale

Public health legislation in force in all States provides for the inspection of food and drugs, with the object of ensuring that all goods sold shall be wholesome, clean, and free from contamination or adulteration, and that all receptacles, places and vehicles used for their manufacture, storage, or carriage shall be clean.

Earlier issues of the Official Year Book refer to the legislation in force in the various States to ensure the purity of dairy produce.

### § 5. Disposal of Dead by Cremation

The first crematorium in Australia was opened in South Australia in 1903. At 31st December, 1962, there were eighteen crematoria in Australia, situated as follows:—New South Wales, 7; Victoria, 4; Queensland, 2; South Australia, 1; Western Australia, 2; Tasmania, 2.

There is no crematorium in the Northern Territory or in the Australian Capital Territory.

The following table shows the number of cremations and total deaths in each State for each of the years 1958 to 1962.

CREMATIONS AND TOTAL DEATHS

State or Territory	1958		1959		1960		1961		1962

## COMMONWEALTH GOVERNMENT ACTIVITIES

### § 1. General

At the time of Federation, the only health function given to the Commonwealth Government under the Constitution was the power to make laws with respect to quarantine. The *Commonwealth Quarantine Act* was passed in 1908, and a branch of the Department of Trade and Customs under the control of a Director of Quarantine was created on 1st July, 1909. The systems of quarantine originally established by the State Governments were transferred to the control of the Commonwealth. An amendment to the Constitution in 1946 gave the Commonwealth power to make laws with respect to pharmaceutical, hospital and sickness benefits, and medical and dental services. In addition, the Commonwealth Government has used its powers under Section 96 of the Constitution to make grants to the States for health purposes.

The Commonwealth Department of Health was formed in 1921 by the extension and development of the quarantine service, the Director of Quarantine becoming the Director-General of Health.

## § 2. National Health Benefits

**1. Pharmaceutical Benefits.**—A comprehensive range of drugs and medicines is made available to all persons receiving treatment from a medical practitioner registered in Australia. The benefits are supplied by an approved pharmacist upon presentation of a prescription, or by an approved hospital to patients receiving treatment at the hospital.

The patient pays the first 5s. of the cost of the prescription, but pensioners who are eligible for treatment under the Pensioner Medical Service (*see* para. 5, page 701) receive all benefits without any contribution being made.

Total Commonwealth expenditure on pharmaceutical benefits in the year 1961–62 was £35,189,883.

**2. Hospital Benefits.**—The payment of hospital benefits to the States is authorized under Part V of the *National Health Act* 1953–1962. The Act continued the agreements entered into with the various States under the *Hospital Benefits Act* 1951. Prior to the amendment of Part V of the *National Health Act* 1953–1961 by Act No. 82 of 1962, Commonwealth hospital benefits were of two types, “ordinary” hospital benefit and “additional” hospital benefit.

Commonwealth ordinary hospital benefit was provided for patients in public and approved private hospitals in Australia by way of deduction from the patients’ hospital account at the rate of 8s. a day. For pensioners enrolled in the Pensioner Medical Service and their dependants while they were patients in public hospitals, and for patients in certain South Australian hospitals, 12s. a day was provided. The daily rate of payments of these benefits in respect of patients in public hospitals was governed by agreements between the Commonwealth and each of the State Governments. These agreements expired on 20th August, 1962.

Commonwealth additional hospital benefits were paid through registered organizations to their financial members at the rate of 4s. a day to contributors who were insured for a fund benefit of at least 6s. a day but less than 16s. a day, and at the rate of 12s. a day to contributors who were insured for a fund benefit of at least 16s. a day. The patient normally received the additional benefit with the fund benefit payable by the organization. Reimbursement of the Commonwealth additional benefit was subsequently made to the organization by the Commonwealth.

The special account system was introduced on 1st January, 1959, to provide an assured rate of hospital fund benefits to contributors who would otherwise have been excluded from fund benefits on account of organizations’ rules covering pre-existing ailments, chronic illnesses and maximum fund benefit. The hospital fund benefit generally payable in such cases is 16s. a day and is paid either from special accounts guaranteed by the Commonwealth or from the ordinary accounts of the organizations. One condition of payment is that the treatment was given in a hospital recognized for the purpose of paying this benefit, although fund benefit is paid in certain circumstances in respect of treatment in hospitals which are not recognized. If the payments from special accounts exceed the contributions credited to the account, the amount of the deficit is reimbursed by the Commonwealth.

As from 1st January, 1963, the system of dual payment of Commonwealth ordinary and additional hospital benefits was discontinued. Qualified patients in approved hospitals and nursing homes are now eligible for only one Commonwealth benefit on any one day.

Insured qualified patients in approved hospitals (which generally are those hospitals recognized for special account purposes) receive Commonwealth hospital benefit of 20s. a day, which is paid through the contributors’ registered benefit organizations. A condition of eligibility for receipt of the hospital benefit of 20s. a day is that a person who joins a registered organization subsequent to 31st December, 1962, must contribute for a fund benefit of at least 16s. a day. Persons who at 31st December, 1962, were contributing for a fund benefit of at least 6s. a day but less than 16s. a day may continue to contribute for the same fund benefit and still be eligible to receive the Commonwealth hospital benefit of 20s. a day.

If the patient is not insured, a Commonwealth benefit of 8s. a day is deducted from his account and paid direct to the approved hospital.

A Commonwealth benefit at the rate of 36s. a day is paid in respect of pensioners enrolled in the Pensioner Medical Service and their dependants in public wards of public hospitals, provided that no charge is made to the pensioner in respect of the treatment.

A Commonwealth Nursing Home benefit of 20s. a day is paid for all qualified patients in approved nursing homes, whether the patient is insured or not. This benefit is deducted from the patient’s account and paid by the Commonwealth to the nursing home. Generally,

approved nursing homes are institutions which are not recognized for special account purposes and consist in the main of convalescent and rest homes, infirmary sections of State benevolent homes and State and private homes for the aged.

Australian residents and their dependants who receive hospital treatment while temporarily living overseas are eligible to receive the Commonwealth hospital benefit to which they are entitled.

Expenditure on hospital benefits in 1961-62 was £19,536,587. In addition, Commonwealth payments towards special account deficits totalled £2,665,566. This does not include expenditure on mental hospitals (see para. 3, below).

The following tables show the amount of ordinary benefit paid for each of the years 1957-58 to 1961-62, together with the number of registered organizations, the membership thereof, and payments of Commonwealth additional benefit and hospital fund benefit on account of occupied beds in public and approved private hospitals, for the year 1961-62. As many persons contribute on behalf of both themselves and their dependants, the total number of persons covered by hospital benefit schemes is considerably higher than the number of members.

The figures for Commonwealth Benefits in the table below, and for Medical Benefits shown on page 701, exclude payments towards special account deficits.

#### HOSPITAL BENEFITS: ORDINARY BENEFITS(a) PAID (£)

Year	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Territories and Abroad	Australia
1957-58 ..	2,832,282	2,024,597	1,415,169	735,079	644,149	276,378	63,498	7,991,152
1958-59 ..	3,260,416	2,077,329	1,493,257	746,282	720,164	284,522	65,313	8,647,283

(a) Ordinary benefits were payable in respect of:—(i) beds occupied by pensioners in public hospitals (12s. a day); (ii) beds occupied in certain South Australian hospitals (12s. a day); and (iii) other occupied beds in public hospitals and approved private hospitals (8s. a day).

#### HOSPITAL BENEFITS: ADDITIONAL BENEFITS(a), SUMMARY, 1961-62

Particulars	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Australia(b)
Registered organizations No.	30	(c)46	3	13	11	10	113
Members .. No.	1,225,338	901,596	292,579	336,445	269,123	104,645	3,129,726
Commonwealth benefit £	3,982,458	2,430,090	1,147,296	901,243	976,631	253,670	9,691,388
Fund benefit .. £	7,407,994	3,654,739	1,612,492	1,909,776	1,533,353	587,384	16,705,738

(a) An additional benefit of 4s. a day was payable to registered hospital benefit organizations for persons who contributed for a fund benefit of at least 6s. a day but less than 16s. a day, or 12s. a day for those who contributed for a fund benefit of at least 16s. a day.

(b) No hospital benefit organization is registered in the Northern Territory or the Australian Capital Territory. Members who live in one of these territories, or who are abroad, received their Commonwealth additional benefit and fund benefit through membership of an organization registered in one of the States.

(c) Includes 17 Bush Nursing Hospitals.

3. Mental Hospitals.—In 1946, when Commonwealth hospital benefits were introduced for patients in public hospitals, no provision was made for patients in mental hospitals. To help meet the cost of maintaining patients in mental hospitals, the Commonwealth Parliament passed the *Mental Institutions Benefits Act* 1948. This Act ratified agreements with the States, whereunder it was provided that the States would cease making charges for the maintenance of mental patients and that the Commonwealth would pay the States a benefit based upon the amount which had been collected by the States from the relatives of patients in mental hospitals by way of charges for maintenance.

These agreements operated for five years, and terminated in the latter half of 1954. The amount contributed by the Commonwealth during the operation of the agreements was approximately one shilling a day for each patient. When the agreements terminated, Dr. Alan Stoller, of the Victorian Mental Hygiene Authority, was commissioned to undertake a survey of mental health facilities and needs in Australia. His report, released in May,

1955, stated that serious overcrowding existed in the majority of mental hospitals in Australia. The provision of more beds was the most urgent need, but other accommodation and rehabilitation facilities were also required.

Following the report, the Commonwealth made an offer of £10 million to the States, as part of a capital expenditure programme of £30 million on increasing and improving patient accommodation. All States accepted the Commonwealth offer.

The following table sets out the amounts which have been paid to the State Governments by the Commonwealth Government each year from 1955–56 to 1961–62.

**EXPENDITURE ON MENTAL HOSPITALS BY THE COMMONWEALTH  
GOVERNMENT**  
(£)

Year	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Australia
1955–56 ..	208,763	445,747	66,588	12,245	9,984	29,822	773,149
1956–57 ..	383,555	527,213	88,068	128,467	51,855	68,974	1,248,132

1958–59 ..	196,831	619,585	118,512	122,328	17,210	45,892	1,120,358
1959–60 ..	359,060	518,271	74,613	91,770	36,799	66,995	1,147,508
1960–61 ..	432,881	83,819	97,642	45,691	15,276	51,933	727,242
1961–62 ..	648,637	..	70,717	27,839	77,023	..	824,216
<b>Total ..</b>	<b>2,553,878</b>	<b>2,740,000</b>	<b>630,244</b>	<b>580,499</b>	<b>237,383</b>	<b>355,000</b>	<b>7,097,004</b>

Amounts shown in the foregoing table represent payments made during the years shown under the *States Grants (Mental Institutions) Act* 1955. The total amounts payable to each State under this Act are in aggregate £10,000,000, to be distributed as follows:—New South Wales, £3,830,000; Victoria, £2,740,000; Queensland, £1,460,000; South Australia, £895,000; Western Australia, £720,000; and Tasmania, £355,000; Victoria and Tasmania have received their full entitlement under the Act.

There are no mental hospitals in the Northern Territory or the Australian Capital Territory.

**4. Medical Benefits.**—A medical benefits scheme has operated since July, 1953, being authorized firstly by the National Health (Medical Benefits) Regulations and then by the *National Health Act* 1953.

The basic principle of the scheme is Commonwealth support of voluntary insurance towards meeting the costs of medical attention. The benefits payable by the Commonwealth are paid either on a fee-for-service basis in respect of the items set out in the first and second schedules to the *National Health Act*, or in the form of a subsidy not exceeding half of the payments made to doctors by registered organizations under contract arrangements.

In order to qualify for the Commonwealth benefit, a person is required to be insured with a registered medical benefits organization. The organization pays the Commonwealth benefit to the contributor, usually at the time it pays its own benefit. Reimbursement of the Commonwealth benefit is subsequently made to the organization by the Commonwealth.

Provision was made from 1st January, 1959, for payments of fund benefit in cases of pre-existing ailments and long-term illnesses. These payments are made from the special accounts referred to on page 698.

Substantially increased Commonwealth and fund benefits were introduced for a number of medical services from 1st January, 1960. The largest increases were for major operations, where the combined benefits were doubled.

An organization wishing to be registered by the Commonwealth for the purposes of the medical benefits scheme is required to provide to its contributors, subject to its rules, all benefits specified in the first schedule to the *National Health Act* 1953–1962 at rates not less than those provided by the Commonwealth. The organization must be non-profit-making.

In 1961–62, Commonwealth expenditure on medical benefits was £10,645,642. In addition, Commonwealth payments towards special account deficits totalled £265,841.

The following table shows the number of registered medical benefit organizations, their membership, the number of medical services rendered to members and their dependants, and payments of Commonwealth benefits and medical fund benefits to members of registered organizations. As many persons contribute on behalf of both themselves and their dependants, the total number of persons covered by medical benefit schemes is considerable higher than the number of contributors.

**MEDICAL BENEFITS: SUMMARY, 1961-62.**

Particulars	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Australia (a)

(a) No medical benefit organization is registered in the Northern Territory or the Australian Capital Territory. Members who live in one of those territories, or who are abroad, receive their Commonwealth Benefit and fund benefit through membership of an organization registered in one of the States.

**5. Pensioner Medical Service.**—The Pensioner Medical Service, which commenced on 21st February, 1951, was introduced under the authority of the National Health (Medical Services to Pensioners) Regulations made under the provisions of the *National Health Services Act 1948-1949*. The service has been continued under the provisions of the *National Health Act 1953-1962*.

The service provided to eligible pensioners consists of medicine provided free of cost and a medical service of a general practitioner nature such as that ordinarily rendered by a general medical practitioner in his surgery or at the patient's home. Specialist services are not provided. Patients may be charged a small fee by doctors for travelling and attendance outside normal surgery or visiting hours. Doctors participating in the scheme are paid on a fee-for-service basis by the Commonwealth Government.

Persons eligible to receive the benefits of the service are those who satisfy a means test and are receiving an age, invalid or widow's pension under the *Social Services Act* or a service pension under the *Repatriation Act*, persons receiving a tuberculosis allowance under the *Tuberculosis Act*, and dependants of persons eligible for the service.

Since 1st November, 1955, the means test which has applied to new enrolments in the service is the income test that had to be satisfied in order to qualify for a full rate pension as at 31st December, 1953.

The means test does not apply to persons who had applied for and were eligible to receive a pension prior to 1st November, 1955, or to persons receiving a tuberculosis allowance.

At 30th June, 1962, the total number of pensioners and dependants enrolled in the Pensioner Medical Service was 810,317, while the number of doctors participating in the scheme at that date was 6,012.

During the year ended 30th June, 1962, doctors in the scheme performed 7,362,563 services—visits and surgery consultations—for persons enrolled in the scheme. For these services, they were paid £4,397,938. The average number of services rendered by doctors to each person was 9.3.

**6. Anti-Tuberculosis Campaign.**—The main provisions of the *Tuberculosis Act 1948* are as follows:—(a) Section 5 authorizes the Commonwealth to enter into an arrangement with the States for a national campaign against tuberculosis; (b) Section 6 empowers the Commonwealth to take over or provide specified facilities for the diagnosis, treatment and control of tuberculosis; (c) Section 8 provides for the setting up of an advisory council to advise the Commonwealth Minister for Health on matters relating to the national campaign; and (d) Section 9 authorizes the Commonwealth to pay allowances to sufferers from tuberculosis and to their dependants.

Under an arrangement with the Commonwealth Government, each State conducts a campaign against tuberculosis. The Commonwealth Government reimburses the State for all approved capital expenditure in relation to tuberculosis, and for net maintenance expenditure to the extent that it exceeds net maintenance expenditure for the year 1947-48.

Thus the States carry out the physical or field work of the national campaign and the Commonwealth acts in an advisory, co-ordinating and financial capacity. For this reason, the Commonwealth has not found it necessary to make much use of its powers under Section 6.

An advisory council, known as the National Tuberculosis Advisory Council, has been set up. There are twelve members, the chairman being the Commonwealth Director-General of Health. Other members are the Commonwealth Director of Tuberculosis, the six State Directors of Tuberculosis, the Consultant (Chest Diseases) of the Department of Repatriation, two specialist private practitioners, and an Administrative Officer of the Commonwealth Department of Health.

To help reduce the spread of infection, the Commonwealth Government pays living allowances to persons suffering from tuberculosis, so that they may give up work and undergo treatment. These allowances have been in operation since 13th July, 1950. Since 5th October, 1961, the rates payable have been:—married sufferer with a dependent wife, £12 2s. 6d a week; dependent child or children under sixteen years of age—first dependent child, 15s. a week; each dependent child in addition to the first, 10s. a week (both additional to child endowment); sufferer without dependants, £7 7s. 6d. a week (reducible to £5 5s. a week if a person is maintained free of charge in an institution).

There is a means test on income but not on property. The allowance is reduced by the amount by which a person's income from sources other than his allowance exceeds, in the case of a married person, £7 a week, and in the case of a person without a dependent wife, £3 10s. a week.

The following table gives particulars of the number of new cases of tuberculosis notified in Australia for the years 1961 and 1962.

#### TUBERCULOSIS: NEW CASES NOTIFIED(a)

State or Territory	Age group					Total

(a) Figures supplied by the Directors of Tuberculosis in each State.

Expenditure by the Commonwealth Government during 1961-62 on its anti-tuberculosis campaign is set out in the following table. The figures for maintenance differ from those in the table shown in Chapter XV. Welfare Services, because they include administrative costs which are not a charge on the National Welfare Fund.

**COMMONWEALTH EXPENDITURE ON ANTI-TUBERCULOSIS CAMPAIGN,  
1961-62  
(£)**

State or Territory	Allowances	Maintenance (a)	Capital	Total
New South Wales .. ..	312,883	1,520,000	47,492	1,880,375
Victoria .. ..	199,443	1,140,420	57,834	1,397,697
Queensland .. ..	190,974	784,396	200,335	1,175,705

(a) Includes administrative costs.

7. Anti-Poliomyelitis Campaign.—The success of the 1954 United States field trials of the poliomyelitis vaccine developed by Dr. Jonas Salk and his associates at the University of Pittsburgh was announced in April, 1955. The Commonwealth Government immediately decided to produce the anti-polio vaccine in Australia.

With the advantage of the experience of the campaigns in the United States and Canada, Australia has adopted a vaccine which has proved to be safe and effective in building up immunity against poliomyelitis.

The vaccine was being produced in Australia by the end of 1955 under the most rigid safety conditions. Plans were made for comprehensive testing procedures to be carried out at many stages both during the production process and of the finished product. These tests ensured the maintenance of safety standards no less rigid than those laid down in other countries where vaccination campaigns were in progress. The Research Laboratory at the Fairfield Hospital, Melbourne, agreed to act as an independent testing authority under an arrangement with the Commonwealth Government, and the pathology department of the University of Melbourne also agreed to conduct tests. No vaccine was released for use unless the searching requirements of the Commonwealth Serum Laboratories, the Fairfield Hospital, and the University of Melbourne were met.

The vaccine was supplied to the States free of charge, and the States accepted responsibility for the cost of their particular vaccination programmes. No child can be vaccinated without the consent of his parents or guardian.

Distribution of the Salk poliomyelitis vaccine to the States began in July, 1956. The States were responsible for the organization and running of their own campaigns and for the distribution of the vaccine in accordance with priority groups established by the National Health and Medical Research Council. Up to 1958, priority was given to children in the 0-14 age group, expectant mothers, and persons subjected to special risk. During 1958, this priority was extended to persons in the 15-44 age group.

Vaccination against poliomyelitis takes the form of four injections of the vaccine. The second injection is given approximately four weeks after the first, the third injection is given not less than 32 weeks after the first and the fourth injection a minimum of one year after the third dose.

Where the incidence of the disease in certain areas approaches epidemic proportions, special efforts have been made to vaccinate as soon as possible all persons in the area who give their consent.

One million doses of each of the three types of monovalent Sabin vaccine were imported by the Commonwealth in October, 1962, for use in a possible emergency. The decision whether to use the Sabin vaccine rests with the individual State Health Authorities.

The following figures relating to immunization coverage are taken from reports presented by the States at the meeting of the Poliomyelitis Committee of the National Health and Medical Research Council held in July, 1961.

#### POLIOMYELITIS: PERCENTAGE OF POPULATION COMPLETED COURSE OF IMMUNIZATION(a)

Age Group (Years)	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust. (b)	Tas.
0-4 .. ..	67.5	72.0	75.0	78.0	64.0	(c) 91.7
5-9 .. ..	89.2				84.0	
10-14 .. ..	92.6				89.0	
15-19 .. ..	75.3	15.6	46.0	46.0	47.0	(d) 52.0
20-40 .. ..	42.6					
40-44 .. ..	..					
45 and over ..	..	..	..	..	..	..

(a) From reports presented by the States at the meeting of the Poliomyelitis Committee of the National Health and Medical Research Council held in July, 1961. (b) Total, under 15 years, 78.0 per cent.; total, 20 years and over, 41.0 per cent.; total, all ages, 57.0 per cent. (c) Under 17 years. (d) 17-45 years.

No further data are available on immunization coverage since July, 1961, but all States are vigorously pursuing the poliomyelitis immunization campaign.

The numbers of new cases of poliomyelitis notified in each State are shown for each year from 1956 to 1962 in the following table.

#### POLIOMYELITIS: NEW CASES NOTIFIED

Year	N.S.W.	Victoria	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.

1962p ..	177	20	38	17	4	..	1	2	259

(a) Cases confirmed by the Poliomyelitis Surveillance Committee.

8. **Free Milk for School Children Scheme.**—In 1950, the *States Grants (Milk for School Children) Act* was passed. The object of this Act was to improve the diet of school children by the addition of a small quantity of milk each day. All children under the age of thirteen years attending public or private primary schools, including nursery schools,

kindergartens, crèches and aboriginal missions, are eligible to receive free milk. The cost of the milk plus half the capital or incidental costs, including administrative expenses of the scheme, is reimbursed by the Commonwealth to the States. All States now participate in the scheme. At 30th June, 1962, approximately 1,618,000 children were entitled to receive free milk under this scheme.

Expenditure by the Commonwealth Government under the scheme since its inception has been as follows.

#### COMMONWEALTH EXPENDITURE ON MILK FOR SCHOOL CHILDREN SCHEME

(£)

Year	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Australia
1957-58 ..	1,139,512	677,000	401,000	212,000	153,600	160,433	860	18,186	2,762,591
1958-59 ..	1,190,048	782,623	474,909	235,879	182,249	181,025	2,799	19,104	3,068,636
1959-60 ..	1,286,672	910,000	480,246	275,000	229,872	156,358	10,493	22,874	3,371,515
1960-61 ..	1,279,460	1,020,000	518,244	282,000	225,377	200,075	21,994	24,064	3,571,214
1961-62 ..	1,329,363	1,036,165	565,000	332,258	264,392	175,256	23,271	27,734	3,753,439
Total, 1950-51 to 1961-62..	11,401,333	7,067,455	3,717,338	2,283,179	1,745,989	1,730,087	63,620	169,149	28,178,150

The figures in the foregoing table differ slightly from those in the table shown in Chapter XV. Welfare Services, as they include capital and administrative costs. Figures in the latter table represent only expenditure which is a charge on the National Welfare Fund (i.e., the cost of the milk).

### § 3. Commonwealth Organizations concerned with Health

1. **National Health and Medical Research Council.**—In 1926, the Commonwealth Government established a Federal Health Council, in accordance with a recommendation of the Royal Commission on Health (1925). "for the purpose of securing closer co-operation between the Commonwealth and State Health Authorities". In 1936, the Commonwealth Government decided to create a body with wider functions and representation, and the National Health and Medical Research Council was established with the following functions:—to advise Commonwealth and State Government on all matters of public health legislation and administration, on matters concerning the health of the public and on medical research; to advise the Commonwealth Government on the expenditure of money specifically appropriated to be spent on the advice of this Council; to advise the Commonwealth Government on the expenditure of money on medical research and on projects of medical research generally; to advise Commonwealth and State Governments on the merits of reputed cures or methods of treatment which are from time to time brought forward for recognition.

The council consists of the Commonwealth Director-General of Health (as chairman), two other officers of the Commonwealth Department of Health, the official head of each State Health Department, the Director of Public Health for Papua and New Guinea, a representative of the Commonwealth Serum Laboratories Commission, and ten other members, one each being nominated by the Australian Medical Association, the Australian Dental Association, the Australian Paediatric Association, the Australian College of General Practitioners, the Royal Australasian College of Physicians, the Royal Australasian College of Surgeons, the Australian Regional Council of the Royal College of Obstetricians and Gynaecologists, the College of Pathologists of Australia, the College of Radiologists of Australasia, and the Australian universities having medical schools. An eminent layman and laywoman, appointed by the Commonwealth Minister for Health, also serve on the council.

The first session of the National Health and Medical Research Council was held at Hobart in February, 1937. The fifty-fourth session was held at Sydney in November, 1962.

Under the *Medical Research Endowment Act* 1937, the Commonwealth Government has made an annual appropriation of funds to assist:—(a) departments of the Commonwealth or of a State engaged in medical research; (b) universities for the purpose of medical research; (c) institutions and persons engaged in medical research; and (d) in the training of persons in medical research. In 1961–62, this appropriation was £298,500.

Most of the detailed work of the Council is delegated to a number of specialized Standing Committees, on such subjects as medical research, public health, veterinary public health, occupational health, tropical health, dental health, epidemiology, maternal and child welfare, nutrition, nursing, ultrasonics, food standards, food additives, radio-therapy and radio-isotopes. Applications for research grants are considered by the Medical Research Advisory Committee before being submitted to the Council, which then advises the Minister for Health.

**2. The National Biological Standards Laboratory.**—The *Therapeutic Substances Act* 1953–1959 provides the Commonwealth with powers to ensure that therapeutic substances used for the prevention, diagnosis and treatment of disease in man and animals are safe, pure and potent.

The Director-General of Health is authorized under this Act to set up laboratories to test such substances. In 1958, the first steps were taken to establish an Australian National Biological Standards Laboratory in Canberra.

The laboratory is divided into two main divisions, a Biological Division and a Pharmaceutical Division. The Biological Division consists of the Bacterial Products Laboratory, the Viral Products Laboratory, an Endocrine Products Laboratory and an Antibiotic Products Laboratory. The Pharmaceutical Division consists of an Analytical Chemistry Laboratory, and a Pharmacology Laboratory.

All these laboratories, with the exception of the Bacterial Products Laboratory, have now been established and have commenced work.

Samples of therapeutic agents available in Australia are taken and tested for compliance with legal standards. A major function of the laboratories is the establishment of such standards where none at present exist or present standards are unsatisfactory.

The laboratories receive international reference standards of biological substances from stocks maintained by the World Health Organization, and will on request issue Australian reference standards which have been assayed against international standards.

**3. Commonwealth Serum Laboratories.**—The laboratories were established in 1916 under the administration of the Department of Trade and Customs and from 1921 to 1961 were operated under the Department of Health. By Act No. 38 of 1961, control of the laboratories passed to the Commonwealth Serum Laboratories Commission on 2nd November, 1961.

The laboratories' basic function is to ensure the supply of essential biological products in accordance with national health needs. This includes:—production and supply of essential biological products; research and development relating to biological products and allied fields; and the maintenance of potential production capacity for use in emergencies.

Since their foundation, the laboratories have greatly extended in size and scope. They now produce some 450 regular products and many special products for use in the diagnosis, prevention and treatment of human and animal diseases. Professional, technical and other staff total over 900.

Products comprise a full range of human bacterial and virus vaccines, veterinary bacterial and virus vaccines, serum products such as blood fractions, a wide variety of antibacterial and antitoxic sera, antivenenes, penicillin, endocrines, including insulin, A.C.T.H., pituitary and thyroid extracts, allergy testing materials and desensitizing preparations, culture media and diagnostic agents for clinical and laboratory work. More recently, tissue culture materials have been prepared and supplied to virus research workers throughout Australia.

Continuous research is conducted into the relevant aspects of microbiology and immunology, and related fields. As the growth of medical and scientific knowledge in Australia and overseas reveals new methods of diagnosis, prevention and treatment of diseases, this information is applied to the preparation of new biological products at the laboratories.

Facilities are maintained for investigations into public health matters which are inconvenient or impracticable to handle at the Commonwealth Health Laboratories or the School of Public Health and Tropical Medicine.

The laboratories serve as a national centre for the maintenance in Australia of the international standards of the Permanent Commission on Biological Standards (World Health Organization). They act as a regional reference centre for W.H.O. in collating reports of the prevalence of certain infectious diseases, and provide facilities for the identification of these diseases.

Veterinary biological products produced at the laboratories have given the lead to other producers in Australia, resulting in the diminution of incidence of a number of serious infectious stock diseases.

4. **The Commonwealth Health Laboratories.**—Health laboratories, of which there are fifteen, are situated in the following towns: Albury, Alice Springs, Bendigo, Cairns, Canberra, Darwin, Hobart, Kalgoorlie, Launceston, Lismore, Port Pirie, Rockhampton, Tamworth, Toowoomba and Townsville. They were established as an essential part of the quarantine system but were also to undertake research into local health problems and to provide doctors of each district with up-to-date facilities for laboratory investigation and diagnosis. It was realized that co-operation between the general practitioner, with his clinical observations and knowledge of the environment of disease on the one hand, and the staff of a well-equipped laboratory on the other, is essential to the investigation and control of disease.

From this standpoint, the laboratories have proved their value in the determination of leptospirosis and endemic typhus in North Queensland, in the investigation of special local problems in Darwin, of undulant fever throughout Australia, of silicosis and tuberculosis at Kalgoorlie and of plumbism at Port Pirie. In these investigations, close co-operation exists with State and local health and hospital services, especially in Queensland, where collaboration has yielded exceptionally valuable results in differentiating the groups of fevers previously unclassified in that State. In this investigational work, as well as in more routine activities, the laboratories have at their disposal the full resources and technical and specialist facilities available at the Commonwealth Serum Laboratories and the School of Public Health and Tropical Medicine, Sydney.

The laboratories are unique in that, with the exception of the use of X-rays, they cover all the fields of diagnostic requirements, namely, pathology, public health, haematology, parasitology, mycology, bacteriology and biochemistry.

5. **Commonwealth Acoustic Laboratories.**—Sponsored by the National Health and Medical Research Council, the Acoustic Research Laboratory, Sydney, investigated inter-communication difficulties and noise problems in aircraft and tanks (1942-46). It then investigated the problem of congenital deafness in children resulting from maternal rubella. The Department of Health took over the laboratory in January, 1947, and subsequently established branch laboratories in all other State capitals.

The *Acoustic Laboratories Act* 1948 gave the Minister for Health the right to establish, maintain and operate, within the Commonwealth, acoustic laboratories for scientific investigations, including tests in respect of hearing aids and their application to the needs of individuals, and in respect of problems associated with noise as it affects individuals. In 1949, the Government approved the provision and maintenance of hearing aids, without charge, to deaf school and pre-school children. This service has since been extended to those whose hearing loss is discovered after leaving school, but who are still under 21 years of age. The laboratories' functions also include:—provision and maintenance of hearing aids on behalf of Repatriation and other Commonwealth Departments; assistance to the State Education Departments in measuring deafness by providing and maintaining portable audiometers; the making of hearing tests of Civil Aviation aircrew as required by international agreement; and the making of independent tests on behalf of State and other authorities.

The Sydney laboratory is responsible for staff training, production of equipment, calibration of hearing-aids and audiometers, and the technical administration of branch laboratories.

6. **Commonwealth X-ray and Radium Laboratory.**—In 1928, the Commonwealth Government purchased ten grammes of radium for use in medical treatment and research in

Australia. The use of this radium was to be co-ordinated by the Department of Health, and in 1929 the Department established the Commonwealth Radium Laboratory to act as custodian of the radium and to ensure its equitable distribution and efficient use.

The radium is distributed on loan to treatment centres throughout Australia. Under the terms of these loans, treatment at well-equipped clinics is available to all persons requiring it, irrespective of their ability to pay. Portions of the original stock of radium have been remounted from time to time, reflecting changes in techniques of treatment.

In 1935, the work of the laboratory was extended to include physical aspects of X-ray therapy, and the name of the laboratory was changed at this time to its present form.

Since 1939, the functions of the laboratory have included investigations of the physical aspects of the diagnostic use of X-rays with particular emphasis on miniature radiography and high-kilovoltage techniques.

In 1946, the laboratory imported the first artificially-produced radioactive isotopes used in Australia and established a system for the procurement and distribution of these substances.

A radiochemical laboratory and associated facilities were set up in the laboratory to permit the assay of radioactive materials present in minute amounts in the environment—in air, water, soil, and foods such as milk, grain and vegetables. A programme of monitoring the fall-out in Australia arising from the testing of nuclear weapons is continuing.

The laboratory co-operates with the physical services which have been developed in the other capital cities of Australia to provide local facilities for the production of radon, for the calibration of X-ray therapy equipment, and for the measurement of the exposure to radiation of those who work with X-rays and radioactive materials. The services of the laboratory are available to all who work with ionizing radiations.

A radon service has been operated by the laboratory since its inception. During the year ended 30th June, 1962, 32,724 millicuries of radon were issued by the laboratory in the form of implants, needles and tubes for use in Victoria, Tasmania, South Australia and Western Australia. A further 24,825 millicuries were issued by the associated centres in Sydney and Brisbane. The corresponding figures for 1960–61 were 39,360 millicuries and 27,872 millicuries, respectively. The issue of radon from a few centres to serve hospitals all over the continent is an Australian development which enables very efficient use to be made of the radium available.

Since 1935, the laboratory has maintained the Australian (free-air) standard for the precise measurement of X-ray dose. Sub-standard clinical dosimeters used by the laboratory and by centres in other States are calibrated in terms of this standard.

Through the development of atomic energy programmes overseas, supplies of radio-isotopes have been available for use in Australia since 1946. Some of the radio-isotopes required in Australia are prepared by the Australian Atomic Energy Commission in its reactor at Lucas Heights. At the present time, the procurement and distribution of radio-isotopes to be used in medicine and medical research is the responsibility of the Department of Health, and these isotopes are procured by the laboratory, as a central procurement agency, principally from Great Britain, Canada and the United States of America. The procurement and distribution of radio-isotopes for industrial and non-medical uses is the responsibility of the Australian Atomic Energy Commission.

The importation of radio-isotopes is restricted under the Customs (Prohibited Imports) Regulations. Approval for importation is given either by the Director-General of Health or by the Australian Atomic Energy Commission, depending on the category of use, after it has been established that the isotope will be used safely and usefully.

During 1961–62, 37 different isotopes were procured for use in medicine and medical research. They represented 987 separate deliveries, of which 47 were from the Australian Atomic Energy Commission. Of the 37 isotopes, seven were stable isotopes. Of the remaining 30, which were radio-isotopes, five were obtained from the Australian Atomic Energy Commission. Additional supplies of one of these were imported. Of the 30 radio-isotopes procured, 14 were for use in medical diagnosis or treatment, as distinct from medical research. Bulk supplies of radio-isotopes used for diagnosis or treatment are obtained regularly, and these are distributed by the laboratory as individual doses for use on patients throughout Australia in accordance with a policy developed by the Committee on Radio-isotopes of the National Health and Medical Research Council. These radio-isotopes are issued free of charge. In the year ended 30th June, 1962, 11,227 individual doses of these materials were issued for use on patients.

Investigations of the degree of protection necessary in particular applications of X-rays and radioactive materials continue to be an important activity of the laboratory. It prepares specifications of the protection facilities necessary in departments and laboratories employing ionizing radiations in medicine, research, and industry, and carries out measurements of radiation levels in existing departments and laboratories. A film-badge service to measure the radiation dose received by those exposed to ionizing radiations is maintained. In 1961-62, 31,118 film-badges were processed, assessed and reported on; the corresponding figure for the previous year was 26,238.

The laboratory maintains a library of radiological literature and issues library bulletins at appropriate intervals. Technical communications on topics related to its functions are issued from time to time.

**7. The School of Public Health and Tropical Medicine.**—In March, 1930, the Commonwealth government, under an agreement with the University of Sydney, established a School of Public Health and Tropical Medicine at the University of Sydney, for the purpose of training medical graduates and students in the subjects of public health and tropical medicine. The organization of the Australian Institute of Tropical Medicine at Townsville was merged in the new school, and the staff, equipment and material were transferred to Sydney.

The School comprises sections of Preventive Medicine, Tropical Medicine, Occupational Health, Environmental Health, Biochemistry, Bacteriology and Pathology, Parasitology, Medical Entomology and Medical Statistics. The Child Welfare section of the Institute of Child Health is located at the School, with which it is closely associated. The Occupational Health Section undertakes surveillance of the health of persons employed at the Small Arms Factory, Lithgow, and at the Munitions Filling Factory, St. Mary's. The Library, which includes approximately 17,000 bound volumes and a large collection of official and institutional papers and reports, forms an important information centre in the subjects of public health and tropical medicine.

The work of the school comprises both teaching and investigation. Courses are held for the university post-graduate diploma in public health and the diploma in tropical medicine and hygiene. Lectures are given in public health and preventive medicine as prescribed for the fifth year of the medical curriculum. Courses are provided also in hygiene and social medicine for students of architecture and social studies; in tropical medicine for lay officers, nurses in tropical service, and missionaries; and in industrial health for engineering students. Training is also provided for certain personnel of the armed services, for laboratory workers from various services and institutions, and for post-graduate nursing diploma students.

Investigations cover a wide range of public health and medical subjects, both in the laboratory and in the field. Field work has been carried out in Australia and in Papua, New Guinea, Norfolk Island, and Nauru in co-operation with the local administrations and the South Pacific Commission. Limited accommodation and other facilities for investigation can be made available at the school for independent research workers.

**8. Institute of Child Health.**—Associated with the School of Public Health is the Institute of Child Health, part of which is located in the School of Public Health and Tropical Medicine in the grounds of the University of Sydney, and part at the Royal Alexandra Hospital for Children, Camperdown. The activities of the Institute are concerned with research into medical and social problems of childhood, undergraduate teaching of students of the Faculty of Medicine in the University of Sydney, post-graduate teaching of doctors and members of associated professions, and collaboration with other bodies concerned with the general field of child health.

The director of the Institute is the Professor of Child Health in the University of Sydney. He is also a senior honorary paediatrician on the staff of the Children's Hospital.

The director is required to co-ordinate and control undergraduate and post-graduate teaching in paediatrics and child health. Each group of medical students attends the Children's Hospital for 10 weeks tuition in paediatrics and child health.

The particular research activities of the Institute vary with the immediate and long-term problems which present themselves. Fields of study have included rheumatic fever, scurvy, accidents, prematurity, hypothyroidism and mental deficiency. Studies are undertaken into the problems of infants and children deprived of a normal home life.

Members of the Institute staff are available for consultation by Commonwealth and State authorities and voluntary agencies.

The establishment of the Institute at present consists of the director, two senior medical officers, one child psychiatrist, five other medical officers, a psychologist, a social worker and clerical staff.

**9. Commonwealth Bureau of Dental Standards.**—This Bureau is concerned with research, standards, and testing related to dental and allied materials and processes. It became part of the Department of Health in January, 1947, but for the preceding eight years it was sponsored by the National Health and Medical Research Council. During that time, the then Dental Materials Research Laboratory established itself as a recognized authority in its special field and proved to be of value to the defence services, government departments, the dental profession and manufacturers of dental products. By maintaining the quality of dental materials and improving techniques for their use, the Bureau continues to assist the dentist in his service to the community—a service that calls for restorations and appliances of a high degree of precision and permanence under very exacting conditions.

The functions of the Bureau are:—original research into dental equipment, materials, techniques and processes; regular reporting of the results of these investigations in recognized Australian scientific journals; the development of specifications for dental materials and equipment, through the Standards Association of Australia, in consultation with a committee representing the Commonwealth Department of Health, the Australian Dental Association, and manufacturers and distributors; and the provision of a consultative service and testing facilities for manufacturers and distributors of dental materials with a view to assisting them in the improvement of existing products and the development of new materials.

**10. The Australian Institute of Anatomy.**—The Australian Institute of Anatomy is situated in a building erected in Canberra by the Commonwealth Government under the *Zoological Museum Agreement Act 1924*. Prior to the passing of this Act, the Commonwealth Government had expressed regret that the Australian nation possessed neither a collection of specimens of the unique and fast disappearing fauna of Australia, nor a museum in which such specimens could be preserved for future generations. Sir Colin MacKenzie, the first Director of the Institute of Anatomy, presented his entire private collection of Australian fauna to the Commonwealth Government. This gift was housed in the Institute. The Institute became part of the Commonwealth Department of Health in 1931.

The original collection has been greatly augmented. In addition to donations of material, there have been several endowments for orations and lectures.

The Institute consists of a museum section and a laboratory section. In the museum section, which is open to the public, a portion of the original collection of anatomical specimens assembled by Sir Colin MacKenzie is displayed, together with ethnological collections which have been added since the foundation of the Institute. The material has been arranged to present simple lessons in human hygiene, to display the anatomical features and peculiarities of Australian fauna, and to display aspects of the character of Australian aboriginals and natives of Papua and New Guinea.

A number of Health Department sections are now situated in the Institute. These include the Museum and Medical Artistry Section, the Nutrition Section, the Commonwealth Health Laboratory for the Australian Capital Territory, and a Veterinary Laboratory.

The scientific research work of the Institute is now concentrated on problems of nutrition. It takes the form of field surveys of the dietary status of the Australian population and laboratory investigations into the biochemistry of nutrition and metabolism.

#### § 4. Control of Infectious and Contagious Diseases

**1. General.**—The provisions of the various Acts with regard to the compulsory notification of infectious diseases, and the precautions to be taken against the spread thereof, are dealt with under the headings of quarantine, and notifiable diseases including venereal diseases.

**2. Quarantine.**—The *Quarantine Act* is administered by the Commonwealth Department of Health, and has three sections of disease control, as follows:—(i) human quarantine, which controls the movements of persons arriving from overseas until it is apparent that they are free of quarantinable disease; (ii) animal quarantine, which controls the importation of animals and animal products from overseas and the security of other animals present on vessels in Australian ports; and (iii) plant quarantine, which regulates the conditions of importation of all plants and plant products with the object of excluding plant diseases, insect pests and weeds.

In respect of interstate movements of animals and plants, the Act becomes operative only if the Governor-General considers that Commonwealth action is necessary for the protection of any State or States, and in general the administration of interstate movements of animals and plants is left in the hands of the States.

(i) *Human Quarantine.* All passengers and crews arriving in Australia from overseas, whether by air or sea, are subject to a medical inspection for the purpose of preventing the introduction of disease into Australia. At the major ports, full-time quarantine officers carry out the work, but in the minor ports local doctors act as part-time quarantine officers. In each State, quarantine activities are controlled by the Commonwealth Director of Health, who is a medical officer of the Commonwealth Department of Health.

The main concern of the examining officers is to detect cases of the quarantinable diseases smallpox, cholera, yellow fever, plague and typhus fever. These diseases are not endemic to Australia, and it is of great importance to prevent their entry. Quarantine stations at the major ports and at Darwin and Townsville are kept ready for occupation at all times. In addition, persons arriving in Australia and suffering from infectious diseases such as chicken pox, mumps, scarlet fever and measles are directed to appropriate care and placed in isolation where necessary.

The increasing use of air travel has created particular quarantine problems. Before the use of air transport, persons suffering from an infectious disease would show symptoms on arrival and before disembarkation. Passengers travelling by air, however, can arrive well within the incubation period, and they are, therefore, required to be vaccinated against smallpox before departure. Those from an area infected with cholera or yellow fever are required to be inoculated, in addition, against the particular disease prevalent in that area. They are also required to report any sickness which they might suffer within fourteen days after arrival. Passengers arriving in Australia by sea are also required to be vaccinated against smallpox, but exemption is granted to infants under twelve months of age, and to those who hold religious convictions against vaccination or who are suffering from a medical condition which makes vaccination undesirable. All passengers, whether they arrive by sea or air, are required to give their intended place of residence, so that they may be traced if a case of disease occurs among the passengers on the aircraft or ship by which they travelled to Australia.

The number of cases of infectious (non-quarantinable) diseases which were discovered among the passengers and crew of overseas vessels and aircraft calling at Australian ports during the year ended 30th June, 1962, and during the preceding four years, are shown in the following tables.

**HUMAN QUARANTINE: CASES OF INFECTIOUS (NON-QUARANTINABLE) DISEASES ON OVERSEA VESSELS AND AIRCRAFT CALLING AT AUSTRALIAN PORTS, 1961-62**

Disease	Number of overseas vessels and aircraft on which cases were found	Number of cases of infectious disease	
		Passengers	Crew

1961-62.. ..	3,761	2,417	67	221	15

(ii) *Animal Quarantine.* Animal quarantine, authorized by the provisions of the *Quarantine Act* 1908-1961, aims at preventing the introduction or spread of animal diseases. It covers the importation of all animals, raw animal products and biological cultures associated with animal diseases, and goods associated with animals.

Of the domesticated animals, only horses, dogs, cats and poultry are admitted from a limited number of countries depending on diseases present in the country of origin. All must be accompanied by health certificates which include prescribed tests. On arrival in Australia, they are subject to quarantine detention.

Zoological specimens are imported into registered zoos, where they remain in permanent quarantine. Circuses are also registered if exotic species of animals are kept. In a somewhat similar manner, animals for scientific purposes are imported to approved laboratories. All these premises are kept under constant surveillance. Raw animal products such as hair, types of wool, skins and hides, are specially treated under quarantine control. Such items as raw meat, sausage casings and eggs, which cannot be sterilized, are admitted from very few countries. Other items, such as harness fittings, fodder, and ship's refuse, are treated to destroy any possible infection.

The Animal Quarantine Service is also responsible for the health certification of animals for export to oversea countries in accordance with their various requirements.

The Division of Veterinary Hygiene was created in 1926 to deal with the administration of animal quarantine. Formerly, the full responsibility for this administration fell on the Director of Quarantine. The central administration is situated within the Health Department at Canberra, with a director, an assistant director, and veterinary officers. The Principal Veterinary Officer of the Department of Agriculture in each State is appointed Chief Quarantine Officer (Animals) of the State, and members of his staff Quarantine Officers (Animals). These State officers carry out the quarantine policy formulated by the central administration. Quarantine accommodation is provided in permanent animal quarantine stations at each capital city.

The Division participates in world-wide international notification of the more serious contagious diseases of animals and maintains a census of such diseases throughout the world. Information regarding animal diseases and parasites in Australia is also collected and disseminated by means of service publications. Consultation on technical matters is maintained with various scientific institutions, notably the Commonwealth Scientific and Industrial Research Organization. In matters of policy and the quarantine control of imports, there is a close liaison with the Department of Customs and Excise.

The Division collaborates with the "General" and "Plant" divisions of the quarantine service. Many diseases of animals are communicable to man, and for this reason "Animal" and "General" quarantine administration are in some respects inseparable. Similarly the interests of "Animal" and "Plant" divisions overlap, many items such as insects, fodder and straw being the subject of combined control.

Once every two years, the director of the Division convenes the Biennial Conference of Principal Commonwealth and State Veterinarians, which meets under the auspices of the Australian Agricultural Council to discuss problems of animal health and disease control and animal quarantine.

(iii) *Plant Quarantine.* Since 1st July, 1909, the importation into Australia of all plants or parts of plants, cuttings, seeds and fruits, whether living or dead, has been subject to an increasingly stringent quarantine with the object of preventing the introduction of insect pests, plant diseases and weeds not yet established in this country. Under the *Quarantine Act 1908-1961*, quarantine inspectors are required to examine all plant material at the first port of entry and to release only material free from diseases and pests. Everyone entering Australia is required to declare if he or she has any plant material in luggage or personal effects. Heavy penalties are laid down for those found evading the regulations. All plant material entering as cargo must also be declared.

When the Commonwealth became responsible for all plant quarantine, the State Governments agreed to co-operate by providing and maintaining inspection facilities and personnel, for which they are reimbursed by the Commonwealth. In 1921, the administration of the regulations came under the newly-formed Department of Health, and in 1927 the Division of Plant Quarantine was created, under a director who is responsible for policy and legislation and for co-ordinating the work of the State officers, who carry out the detailed administration in their capacity as Commonwealth officers.

Any plant material found carrying diseases or pests, or suspected of doing so, may be ordered into quarantine for remedial treatment, or, if the treatment is impracticable, may be destroyed. The cost of treatment is met by the importer. Regulations governing the different types of plants are based on the following broad principles. (a) The importation of plants likely to be infected with plant diseases, noxious fungi or poison plants is prohibited. (b) Agricultural seed must conform to standards of purity, insect pest and disease freedom. Some seeds are prohibited except with special permission of the Director of Quarantine, who specifies conditions of importation. (c) Many commodities such as hops, cotton, peanuts in shell, potatoes, certain crop seeds, vines and specified plants may be imported only by approved importers under special conditions. (d) Certain plant products such as bulbs and timber (in logs or sawn) from specified areas may be imported only if accompanied by certificates showing that prescribed treatment has been given in the country of origin. (e) All nursery stock including bulbs must be grown in post-entry quarantine. Propagating material for commercial fruits, vines and berries are permitted importation only after being specially screened for virus diseases. It may only be imported by approved importers who are registered for this purpose. The numbers of plants which may be imported in any one year are limited.

3. *Notifiable Diseases.*—(i) *General.* (a) *Methods of Prevention and Control.* Provision exists in the *Health Acts* of all States for the compulsory notification of certain infectious diseases and for the application of preventive measures. When any such disease occurs, the local authority must be notified at once, and in some States notification must be made also to the Health Department.

As a rule, the local authorities are required to report from time to time to the Central Board of Health in each State on the health, cleanliness and general sanitary state of their several districts, and on the appearance of certain diseases. Regulations provide for the disinfection and cleansing of premises, and for the disinfection or destruction of bedding, clothing or other articles which have been exposed to infection. Regulations also provide that persons suspected to be suffering from, or to be carriers of, infectious disease must submit to clinical and laboratory examination. Persons suffering from certain communicable diseases, for example, smallpox and leprosy, are detained in isolation.

(b) *Diseases Notifiable and Cases Notified in each State and Territory.* The following tables show, for each State and Territory, the diseases notifiable in 1961 and 1962, and the number of cases notified. Diseases not notifiable in a State or Territory are indicated by an asterisk.

Factors such as the following affect both the completeness of the figures and the comparability from State to State and from year to year:—availability of medical aid; diagnostic practices of doctors—e.g. infectious hepatitis may not be diagnosed as such unless jaundice is also present; enforcement and follow-up of notifications by Health Departments; differences in sources of notifications; differences in definitions of notifiable diseases in *Health Acts*—e.g. puerperal fever and encephalitis; and varying degrees of attention to notification of diseases of minor importance.

(a) No cases of cholera, plague, smallpox, epidemic typhus or yellow fever were notified. (b) There are popular names for various diseases mentioned in these tables. While these names may not be clearly defined or acceptable for diagnostic purposes, the most common ones are listed here for the information of the lay reader:—hookworm (ankylostomiasis); undulant fever (brucellosis); St. Vitus dance (chorea); Weil's disease or seven-day fever or swamp fever (leptospirosis); parrot fever (ornithosis); childbed fever (puerperal fever); German measles (rubella). (c) Included with typhoid fever. (d) These are final figures as supplied by the Directors of Tuberculosis in each State. (e) Included with acute rheumatism (rheumatic fever). (f) Under the Queensland Health Acts notifications of tuberculosis include erythema nodosum and pleural effusion. \* Not notifiable.

(ii) *Specific Diseases.* (a) *Tuberculosis and Poliomyelitis.* Information on the number of cases of tuberculosis notified in each State and Territory by age groups for the years 1961 and 1962, and other details, are shown on page 702. Some data regarding deaths from tuberculosis are shown on page 391 of Chapter X. Vital Statistics.

Particulars of the cases of poliomyelitis notified in each State and Territory for the years 1956 to 1962, and of treatment and preventive measures, are shown on pages 703-4.

(b) *Infectious Hepatitis.* The following table shows the number of cases of infectious hepatitis notified in each State and Territory during the years 1958 to 1962.

**INFECTIOUS HEPATITIS: CASES NOTIFIED.**

State or Territory	1958	1959	1960	1961	1962 p
New South Wales .. .. .	3,261	3,183	4,925	6,050	3,358

<b>Australia .. .. .</b>	<b>5,598</b>	<b>6,378</b>	<b>9,555</b>	<b>12,901</b>	<b>9,215</b>

(c) *Venereal Diseases.* The prevention and control of venereal diseases is the responsibility of State Health Departments. The necessary powers for the purpose are provided either by a special *Venereal Diseases Act* or by a special section of the *Health Act*. Venereal diseases are notifiable in all States except in South Australia, where however, the Director-General of Public Health is empowered to compel a venereal disease suspect to submit to medical examination and, if found infected, to medical treatment. While the provisions of the legislation differ from State to State, the Acts usually make it obligatory upon the patient to report for and continue under treatment until certified as cured. Treatment of venereal disease must be by a registered medical practitioner. Facilities for treatment of venereal disease free of charge may be arranged at subsidized hospitals or at special clinics. Penalties may be imposed on a patient who fails to continue under treatment. Clauses are inserted in the Acts which aim at preventing the marriage of any infected person, or the employment of an infected person in the manufacture or distribution of foodstuffs.

## § 5. Commonwealth Grants to Organizations Associated with Public Health

1. *General.*—In addition to providing the services mentioned in §§ 2-4 above, the Commonwealth Government gives financial assistance to certain organizations associated with public health. Examples of organizations included in this category are the National Fitness Organizations, the Royal Flying Doctor Service of Australia, the Red Cross Blood Transfusion Service, the Lady Gowrie Child Centres, and the National Heart Foundation of Australia.

2. *National Fitness.*—In 1938, arising from a recommendation of the National Health and Medical Research Council, the Commonwealth Government appointed a National Co-ordinating Council for National Fitness, under the Commonwealth Minister for Health, to effect collaboration of Commonwealth, State and Local Government authorities in the National Fitness Movement. Following the recommendations of the first Co-ordinating Council meeting in 1939, the Commonwealth Government agreed to make available an annual sum of £20,000 for five years, and grants were allocated to each State for purposes of organization and to each of the six Australian universities to establish lectureships in physical education.

The movement was placed on a statutory basis with the passing of the *National Fitness Act 1941*. The Act provides for a Commonwealth Council for National Fitness to advise the Minister for Health concerning the promotion of national fitness. It provides also for the establishment of a Trust Account, known as the National Fitness Fund, to assist in financing the movement. In June, 1942, the annual appropriation from revenue to the National Fitness Fund was increased to £72,500 to include grants to the State Education

Departments and for the work in the Australian Capital Territory. The annual appropriation was increased to £100,000 in 1962, the increase of £27,500 being made available to the National Fitness Councils in the States. The £100,000 is disbursed as follows:—State National Fitness Councils, £64,454; Universities, £12,400; State Education Departments, £17,000; central administration, £3,396; and Australian Capital Territory, £2,750.

The annual grant of £2,750 allocated in the Australian Capital Territory is distributed mainly on a £1 for £1 basis to youth and sports organizations for the purchase of equipment, the development of coaching schemes, and the extension of club and camp facilities.

**3. Royal Flying Doctor Service of Australia.**—The purpose of the Royal Flying Doctor Service of Australia is to provide medical and dental services to persons in isolated areas. Most remote homesteads are equipped with two-way radio sets which they use for receiving ordinary radio programmes, participating in the School of the Air, and for contacting each other. In cases of minor illness or injury, they also use these sets to seek medical advice. If the illness or injury is serious, a doctor flies to the homestead and, if necessary, flies the patient to the nearest hospital. Standard medicine chests are supplied by the service. Each chest contains a first-aid book and instructions on the use of the various drugs and medical supplies in it. Further instructions are given by doctors over the air.

From time to time, special purpose work is undertaken in connexion with flood relief, searching for lost parties and co-ordinating cattle movements.

The service is not conducted for profit. In some sections, small charges are made for particular services or a fixed annual charge is levied on graziers. Other sections rely on voluntary contributions from those who use their services. Donations and government contributions help to provide much of the overhead and capital expenditure incurred each year.

The Commonwealth has made an annual grant to the Service for operational expenses since 1936. Prior to that, from 1928 to 1931, the Commonwealth subsidized the Australian Inland Mission Aerial Medical Service. The Commonwealth annual grant to the Royal Flying Doctor Service of Australia towards maintenance was increased from £40,000 to £55,000 per annum for three years from 1st July, 1962. The Commonwealth grant towards capital expenditure was increased from £27,500 to £40,000 per annum for the same period. This capital expenditure grant is made on a £1 for £1 basis, in respect of approved projects.

The Royal Flying Doctor Service of Australia is conducted by a federal council comprising representatives of six sections, namely Queensland, New South Wales, Victoria, South Australia, Western Australia and the Eastern Goldfields of Western Australia. The Queensland, New South Wales and South Australian sections are centred in their own States, but in Western Australia there are three centres, that in the far north being under the control of the Victorian section, and that in the south-east under the control of the Eastern Goldfields section. The third, which has bases at Port Hedland and Meekatharra, is sponsored by the Western Australian section.

**4. Red Cross Blood Transfusion Service.**—The Australian Red Cross Society conducts a blood transfusion service in all States.

Before 1952–53, the cost of the Red Cross Blood Transfusion Service was borne by the Red Cross Society with assistance from the State Governments. In 1952, the Commonwealth made an amount of £50,000 available to the Red Cross Society through the State Governments. The States were to continue to assist the society at the same level as previously and make arrangements with the society to share any deficit still remaining.

The Commonwealth recognized that the proper maintenance of a blood transfusion service was of the utmost importance to the welfare of the community and that the service was one eminently suited for operation by the Australian Red Cross Society. In March, 1954, therefore, the Commonwealth offered each State Government a grant equal to 30 per cent. of the certifiable operating expenses incurred by the Society in the conduct of the blood transfusion service in that State. The grant was to be made subject to the condition that the government of the State concerned agreed to meet 60 per cent. of the cost of operating the service in that State, leaving the society to meet the remaining 10 per cent. of the cost. All States accepted this proposal. The payments made by the Commonwealth government to the State governments in 1961–62 were as follows:—New South Wales, £47,260; Victoria, £52,515; Queensland, £33,647; South Australia, £19,231; Western Australia, £16,115; Tasmania, £5,776; total, £174,544.

**5. Lady Gowrie Child Centres.**—In 1940, the Commonwealth Government established a pre-school demonstration centre in each of the six capital cities. These centres are known as the Lady Gowrie Child Centres and are administered by the Australian Pre-school Association. A grant of £50,000 per annum is made available by the Commonwealth towards the operation of the centres.

The specialized function of the centres is that of demonstration and research, and the programmes are carried out under the supervision of the Federal Pre-school Officer. Each centre is concerned with a study of the factors promoting and retarding physical and mental health in young children, and in demonstrating an educational health programme based on the developing needs of children aged 3 to 6 years.

The centres are used for observation by university students of Medicine, Psychology, Education, Social Studies, Architecture, Physical Education, Teacher Training Colleges, Nursing Colleges and Domestic Science.

6. **National Heart Foundation of Australia.**—The National Heart Foundation of Australia is a national organization established to promote research in cardiovascular disease, to rehabilitate heart sufferers and to foster the dissemination of information about heart diseases.

Formed in 1960, as a result of a public appeal yielding £2,500,000 to which the Commonwealth Government contributed £10,000, the Foundation has its headquarters in the John Curtin School of Medical Research of the Australian National University.

The organization is controlled by a Board of Directors assisted by various Committees. State Divisions with their own administrations deal especially with rehabilitation and education.

From its inception to the end of 1962, the Foundation has allocated over £370,000 for grants-in-aid towards research in university departments, hospitals and research institutes, research fellowships tenable in Australia and overseas, and oversea travel grants. Most of the annual expenditure of about £300,000 is devoted to supporting research in cardiovascular disease.

## INSTITUTIONS

NOTE.—Institutions referred to under this heading are classified into the following groups:—(i) Public (other than mental); (ii) Mental; (iii) Private; (iv) Repatriation; (v) Isolation (leper).

### § 1. Public Hospitals (other than Mental Hospitals)

1. **General.**—The statistics shown in this section refer to all institutions affording hospital relief, whether general or special, with the exception of mental hospitals, repatriation hospitals, leper hospitals, and private hospitals conducted commercially. They include hospitals wholly provided for by the State, hospitals partially subsidized by the State or by State endowments but receiving also private aid, and hospitals established and endowed by individuals for the benefit of the needy generally. All the State capitals have several large and well-equipped hospitals, and there is at least one in every important town. In large centres there are special hospitals for infectious diseases, tubercular patients, women, children, and patients suffering from chronic diseases.

The particulars given herein refer to public hospitals at the latest available date.

2. **Number, Staff and Accommodation.**—Details regarding the number of public hospitals, staff, and accommodation for the year 1960–61 are given in the following table.

**PUBLIC HOSPITALS: NUMBER, STAFF AND ACCOMMODATION, 1960-61**

Particulars	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.

(a) Qualified and student nurses, assistant nurses, assistant nurse trainees, nursing aides and nursing aide trainees.

3. **In-Patients Treated.**—The following table furnishes particulars of in-patients treated. The figures shown refer to cases, that is to say, a person who is admitted to hospital twice during a year is counted twice. Newborn babies are excluded unless they remain in hospital after their mothers' discharge.

## PUBLIC HOSPITALS: IN-PATIENTS TREATED, 1960-61

Females ..	9,740	5,442	4,468	1,540	1,667	945	151	133	24,086
Persons ..	17,029	9,269	8,378	2,726	2,982	1,830	323	215	42,752
Average daily number resident ..	16,218	8,606	8,130	2,758	2,948	1,833	310	206	41,009

In addition to those admitted to the hospitals, there are large numbers of out-patients treated. During 1960-61, there were 1,168,067 out-patients treated in New South Wales, 589,947 in Victoria, 599,010 in Queensland, 110,408 in South Australia, 136,000 (estimated) in Western Australia, 100,891 in Tasmania, 75,865 in the Northern Territory and 14,214 in the Australian Capital Territory, making an estimated total for Australia of 2,794,402. The figures quoted refer to cases, as distinct from persons and attendances.

4. Revenue and Expenditure.—Details of the revenue and expenditure for the year 1960-61 are shown in the next table. The revenue includes the Commonwealth Hospital Benefits Scheme.

PUBLIC HOSPITALS: REVENUE AND EXPENDITURE, 1960-61

(a) For New South Wales, included in Other.

5. **Summary.**—A summary, for the years 1956–57 to 1960–61, of the number of public hospitals in Australia, medical and nursing staffs, beds, admissions, in-patients treated, out-patients, deaths, average daily number resident, revenue and expenditure is given in the following table.

**PUBLIC HOSPITALS: AUSTRALIA**

Particulars	1956–57	1957–58	1958–59	1959–60	1960–61
Hospitals .. ..	729	735	733	736	736
Medical staff(a) .. ..	8,560	9,098	9,354	9,954	10,386
Nursing staff(b) .. ..	31,006	32,436	34,372	36,023	37,607
Beds and cots .. ..	55,801	56,618	58,544	60,203	61,039
Admissions during year .. ..	1,028,320	1,085,503	1,133,172	1,153,690	1,182,198
Total in-patients (cases) treated	1,065,045	1,123,799	1,172,861	1,196,111	1,225,060
Out-patients (cases)(c) .. ..	2,583,600	2,641,000	2,665,700	2,754,400	2,794,402
Deaths .. ..	33,267	33,689	35,848	35,407	36,619
Average daily number resident	37,554	38,470	40,021	40,672	41,009
Revenue .. .. £'000	82,182	87,692	90,512	98,976	109,399
Expenditure .. .. £'000	83,922	86,817	90,157	97,987	108,556

(a) Honorary and salaried. (b) Qualified and student nurses, assistant nurses, assistant nurse trainees, nursing aides and nursing aide trainees. (c) Partly estimated.

**§ 2. Mental Hospitals**

1. **General.**—Statistics of mental hospitals presented in the following tables, with the exception of those relating to revenue and expenditure, include particulars of the two authorized hospitals conducted by religious organizations in New South Wales. The figures exclude those of reception houses and observation wards in gaols. There are no mental hospitals in the Northern Territory or the Australian Capital Territory.

2. **Hospitals, Staff and Accommodation.**—Particulars regarding the number of hospitals, the medical and nursing staff, and accommodation are given in the following table for the year 1961. Figures for Victoria and Western Australia relate to 31st December, 1961. Figures for the other States relate to 30th June, 1961.

**MENTAL HOSPITALS: NUMBER, STAFF, ACCOMMODATION, 1961**

Particulars	N.S.W.	Vic.(a)	Q'land (b)	S. Aust.	W. Aust. (a)	Tas.	Aust.
Number of Hospitals .. ..	15	11	5	2	4	1	38

Males .. .. .	3.19	2.84	2.94	2.74	2.66	1.91	2.94
Females .. .. .	3.07	2.91	2.28	2.24	1.91	2.35	2.73
Persons .. .. .	3.13	2.88	2.62	2.50	2.29	2.13	2.83

(a) Year ended 31st December, 1961.

(b) Includes persons treated at the Epileptic Home.

Persons who are well advanced towards recovery are allowed to leave the hospitals and live with their relatives or friends, but they are under supervision and their names are kept in the records. These persons have been included in the table above as patients at the end of the year.

4. Revenue and Expenditure, 1960-61.—Mental hospitals are maintained by the State governments. They derive a small proportion of their revenue from other sources (chiefly patients' fees, pharmaceutical benefits and sale of farm produce), but in 1960-61 this source provided less than six per cent. of all their revenue. For a statement on the funds provided by the Commonwealth Government for mental hospitals, see para. 3, Mental Hospitals, page 700.

In New South Wales, the expenditure includes the cost of Broken Hill patients treated in South Australian mental hospitals.

**MENTAL HOSPITALS: FINANCES, 1960-61**  
(£'000)

Particulars	N.S.W. (a)	Vic.	Q'land (b)	S. Aust.	W. Aust.	Tas.	Australia

(a) Excludes the two authorized hospitals conducted by religious organizations. (b) Includes the Epileptic Home. (c) Capital expenditure includes purchases of land, cost of new buildings and additions to buildings.

5. **Summary for Australia.**—The following table gives a summary relating to mental hospitals in Australia for each of the years 1956-57 to 1960-61.

**MENTAL HOSPITALS: SUMMARY, AUSTRALIA**

Particulars	1956-57	1957-58	1958-59	1959-60	1960-61
Hospitals .. .. .	36	37	38	38	38
Medical staff .. .. .	188	206	219	232	250
Nursing staff and attendants ..	6,470	6,761	6,895	7,027	7,335
Beds .. .. .	30,617	31,587	32,025	32,068	31,996
Admissions .. .. .	8,276	9,244	9,477	8,854	9,001
Discharged as recovered, relieved, etc.	5,282	6,288	6,797	8,052	7,320
Deaths .. .. .	2,672	2,468	2,658	2,394	2,139
Patients at end of year .. .. .	32,775	33,521	33,543	31,951	31,493
Average daily number of patients resident .. .. .	29,032	29,323	29,553	29,209	29,475
Revenue (excluding Government grants) .. .. .	916	1,027	1,071	1,139	1,412
Total expenditure .. .. .	17,553	18,236	18,196	20,073	21,786

6. **Patients in Mental Hospitals.**—The total number of inmates of mental hospitals and patients on trial leave at the end of each year from 1957 to 1961 is shown in the following table. A more rational attitude towards the treatment of mental cases has resulted in a greater willingness in recent years to submit afflicted persons to treatment at an early stage, and an increase in the number of recorded cases, therefore, would not necessarily imply an increase in mental diseases. The numbers of patients in mental hospitals in the several States is affected to some extent by differences in practice. For instance, in some States there is a greater tendency to treat certain mental diseases in clinics attached to general hospitals. Figures for Victoria and Western Australia relate to 31st December of the year shown; figures for the other States relate to 30th June of the year shown.

## PATIENTS IN MENTAL HOSPITALS

(a) Includes persons treated at the Epileptic Home.

## § 3. Private Hospitals

1. General.—In addition to the other hospitals referred to in previous sections, there are private hospitals in each State. The figures shown in the following table refer to those private hospitals which have been approved for the payment of hospital benefits under the Commonwealth *National Health Act* 1953–1962.

2. Hospitals, Accommodation and Patients.—The number of these hospitals and the number of beds and patients are shown in the following table.

## § 4. Repatriation Hospitals

The medical care of eligible ex-servicemen and dependants of deceased ex-servicemen is a major function of the Commonwealth Repatriation Department, which provides a comprehensive service.

In-patient treatment is provided at Repatriation General Hospitals in each capital city, and at auxiliary hospitals in all States except Tasmania. "Anzac Hostels" are maintained in Queensland and Victoria for long-term patients. In-patient treatment may also be provided in country hospitals at the Department's expense in certain circumstances. Mental patients requiring custodial care are, by agreement with the State Governments, accommodated at the expense of the Department in mental hospitals administered by the State authorities.

The average daily number of patients resident in Repatriation General Hospitals during the year ended 30th June, 1962, was 3,163.

## § 5. Isolation (Lepor) Hospitals

Isolation hospitals for the care and treatment of persons suffering from Hansen's disease (leprosy) are located at Little Bay, New South Wales; Fantome Island, North Queensland; Derby, Western Australia; and East Arm Settlement, Northern Territory. Special wards for the isolation of leprosy patients have been provided at Fairfield (Victoria) and Wooroloo (Western Australia). Peel Island (Queensland) Hospital was closed down on 5th August, 1959, the patients being transferred to the chronic disease section of South Brisbane Hospital. At the end of 1962, there were eight cases at Little Bay, 21 at Fantome Island, six at South Brisbane Hospital, 179 at Derby, two at Wooroloo, 187 at East Arm Settlement and 7 at Fairfield. Of the 410 cases, 330 were full-blood aboriginals, 42 were half-caste aboriginals, two were Pacific Islanders, three were Asians and 33 were Europeans.

## CHAPTER XVIII

## EDUCATION, CULTURAL ACTIVITIES AND RESEARCH

NOTE.—For the most recent statistics available on subjects dealt with in this Chapter, reference should be made to the series of mimeographed bulletins *Social Statistics* and *University Statistics* issued by this Bureau. The *Quarterly Summary of Australian Statistics* contains summarized information on these subjects, and financial aspects are dealt with in the annual bulletin *Finance, Part I.—Public and Private Finance*.

## EDUCATION

NOTE.—An account of the development of the Australian school system up to 1929 may be found in Official Year Books Nos. 1, 2, 17 and 22. In Official Year Book No. 40, a review of changes which occurred up to 1951 and of the practices then current was presented from material furnished by the Commonwealth Office of Education, which contributed much of the textual matter in the following sections. The information relating to the educational programme applies mainly to the year 1962. The statistics given in the tables relate to 1961.

## § 1. Education in Australian Schools

1. Administration and Organization.—(i) *General*. In Australia, the provision of schools is mainly a responsibility of the governments of the States. During the nineteenth century, all six Australian colonies had established systems of compulsory education, beginning with the *Education Act* in Victoria in 1872, and followed by similar Acts in Queensland (1875), South Australia (1875), New South Wales (1880), Tasmania (1893), and Western Australia (1893). These Acts, with subsequent amendments, constitute the legal basis of compulsory education in the Australian States to-day.

School attendance is compulsory throughout Australia between the ages of 6 and 14 at least; in New South Wales the minimum leaving age is 15, and in Tasmania it is 16. An increasing number of children continue their education after reaching the minimum leaving age.

The *Education Acts* require that all children between the prescribed ages must attend either a government school or some other recognized educational institution. Children may be exempted from the requirement of compulsory attendance if they live too far from a school or suffer a physical disability. These children usually receive correspondence tuition.

The school year in Australia begins at the end of January or early in February; it ends in mid-December. The long vacation is taken over the summer months (December to February) and two short vacations divide the school year into three terms.

At government primary schools, it is usual for both boys and girls to attend the same school; at the secondary level, practices vary. Non-government schools cater mainly for boys and girls separately.

(ii) *Government School Systems*. Government schools are a responsibility of the six State governments, except in the Commonwealth territories. Although the educational systems are not identical, they have many similar features. Responsibility for framing educational policy and having it put into effect rests with a Minister for Education, who is a member of the State Cabinet.

The administrative authority in each State is an Education Department headed by a Director-General, or Director of Education. Separate divisions of the Education Department in each State administer primary, secondary and technical education (in New South Wales there is a separate Department of Technical Education). Other divisions look after such matters as the recruitment and training of teachers, pupil guidance, research and the education of atypical children.

In some States, administration has been decentralized to a degree by the appointment of "Area" or "Regional" directors, who are responsible for policy in the area which they control.

Tuition at government primary schools in all States is free. No fees are charged at secondary schools, except in Queensland, where a system of State scholarships has met the cost of fees for most pupils. By 1964, these tuition fees will be abolished in Queensland. Parents usually are expected to bear the cost of text-books, prescribed uniforms, and charges for such things as the use of sports materials. However, income tax concessions exist in respect of these expenditures.

(iii) *Non-Government Schools Systems.* More than three-quarters of the children at non-government primary and secondary schools attend Roman Catholic schools, which form a highly developed but not centralized system. At the primary level, these children normally attend mixed parish schools, but at the secondary level there are boys' schools, approximately half taking boarders, and girls' schools. Some of the small convent schools in country districts enrol young boys as well as girls. The organization of Roman Catholic schools is primarily on a diocesan basis under the general direction of the bishop, although many of the religious orders which conduct schools are Australia-wide, and have their own internal organization.

The majority of other non-government schools, sometimes known as "private" or "independent" schools, are conducted by, or are under the auspices of, various religious denominations, particularly the Church of England, Presbyterian, and Methodist Churches. Others are conducted by the Baptist, Lutheran, Congregational and Seventh-day Adventist Churches and by smaller religious groups. There are Jewish schools in several capital cities. A few non-government schools, including some of the foremost, are undenominational and conducted under the auspices of corporate bodies.

The methods adopted by the educational authorities to ensure an acceptable standard of education at non-government schools vary from State to State. In New South Wales, Victoria, Western Australia and Tasmania, these schools are regularly inspected. In Victoria and Tasmania, schools and teachers must be registered. In Queensland, eight grammar schools, which exist by statutory authority and are subsidized by the State, are subject to annual inspection. Other non-government schools in Queensland, and also those in South Australia, are not subject to inspection.

The principals of a number of the larger non-government schools have formed organizations with both State and Australia-wide coverage, namely, the Headmasters' Conference of Australia, and the Headmistresses' Association of Australia.

2. *Schools and Courses.*—(i) *Primary Education in Government Schools.* Though school attendance is not compulsory until the age of six, most Australian children begin school when they are five, attending infants' schools or infants' classes attached to a primary school. In some States, the first year in the infants' department is known as "kindergarten".

The emphasis in infants' classes, which occupy two or three years, is on general development, play activities and the informal aspects of education, with a gradual shift towards more formal activities in the second and third years. Creative expression through drawing, dancing, handwork, dramatization, painting and similar activities is encouraged. Attention is given to speech training and to activities with music.

At the end of their infants' school training, most children are able to read with some fluency, carry out simple arithmetical operations founded on the basic number facts, and write in pencil. In addition, they have acquired elementary skills in art, music and the like.

At about the age of eight, most children pass into the primary school proper, where they usually spend four or five years. Primary schools are normally provided when and where there is sufficient population to justify them. Irrespective of the size or the location of the school, standards of tuition do not vary appreciably, because teachers within a State follow similar courses of training and transfer freely between metropolitan and country areas.

The Education Departments prescribe syllabuses of instruction, which are drawn up with the assistance of expert committees. The primary syllabuses have an emphasis on basic subjects like reading, writing and arithmetic, social studies and oral language, but the teacher has some freedom to modify courses to suit local circumstances and the varying abilities of his students.

Children attend primary schools in their own districts, usually within walking distance of their homes, on five days each week. The school day is broken up into three or four sessions by a lunch break and by a morning and sometimes an afternoon recess. The total period of instruction is 4½ to 5 hours' daily with individual subject lessons lasting 20 to 30 minutes. Periods are set aside for physical education and sport. One teacher generally has charge of a class and teaches it all of the subjects set out in the curriculum for the particular grade.

Pupils do not, as a rule, sit for a public examination during or at the end of their primary course, and progression from primary to secondary school is automatic. Allocation to particular schools or particular courses is based on the recommendations of the headmaster, general ability tests, tests of achievement in the basic subjects and parents' wishes.

In South Australia, pupils may proceed to secondary school on receiving the Progress Certificate, which is awarded on satisfactory completion of the seventh grade, the highest grade at primary level. Until 1962, pupils in Queensland sat for a public examination before proceeding to secondary schooling.

(ii) *Secondary Education in Government Schools.* The age of transfer from a government primary to secondary school is usually between 12 and 13. Most secondary schools in the country are co-educational; in the cities the practice varies according to the State and the type of school concerned.

In the cities and larger country centres, secondary courses are provided in separate schools from primary courses, but in less populous areas secondary classes sometimes share buildings with primary classes.

The secondary student takes up new studies such as foreign languages and technical or commercial subjects, and moves on to more specialized studies in natural and social sciences and mathematics. The study of basic subjects begun in primary school is continued. The actual subjects studied depend on the ability of the pupil and the type of school. A school day is divided into "periods", and the children are taught by a number of teachers, each specializing in a particular subject or group of subjects.

To meet the varying abilities and needs of students, various kinds of secondary schools have been established in which different types of education are provided, although in country areas secondary schools tend necessarily to be comprehensive and offer a full range of secondary courses. But, following the re-examination by expert committees in all States of the problems associated with the provision of appropriate secondary education for all, significant changes in the structure and curricula of secondary schools are taking place. In New South Wales, for example, following a committee's recommendation that the secondary curriculum should offer a core of common basic education to all students, an increasing number of secondary schools are becoming comprehensive; in future, pupils of different aptitudes and interests in a given locality will attend the same secondary school, undertake this core of common basic studies, and in addition specialize according to their proven abilities and interests.

The main types of government secondary schools are described below.

*High Schools.* Until recently, high schools were organized on traditionally academic lines, offering courses of four to six years' duration which prepared students for public examinations qualifying them for entry to universities, teachers' colleges, other tertiary institutions and the public service. Curricula varied, but usually included English language and literature, foreign languages, mathematics, physics, chemistry, biology, history, and social sciences. In the comprehensive or multi-purpose high schools, which are becoming more common, a broader range of subjects is offered. There are high schools specializing in technical and commercial subjects, and as mentioned below, in agricultural subjects.

*Junior Secondary Schools.* Junior secondary schools provide general education, but also give pupils preparatory vocational training in trade, technical, commercial or agricultural courses, and assist them to determine the work for which they are best suited. Courses cover three to four years' study.

*Home Science Schools.* Home science schools offer two to five year courses in home science and commercial subjects. These courses prepare girls for the responsibilities of home-making and also for occupations in business, commerce, the public service and nursing.

*Agricultural Schools.* In each State, there are a few separate agricultural high schools, many of them residential. The curriculum consists of general educational subjects and practical farm training. There are also "area" and "rural" schools offering up to three years of secondary study, and in some States courses in agriculture are also given at high schools.

(iii) *Primary and Secondary Education in non-government Schools.* Non-government schools follow curricula similar to those laid down by Education Departments, and prepare their students for examinations conducted by public examining authorities. There are similarities between non-government and government schools in the courses they provide, but, in denominational schools, more emphasis is given to the religious training of pupils. Non-government schools at the secondary level, although usually organized along traditional academic lines, also cater for students who may wish to take commercial, junior technical or domestic science subjects. A few schools, mostly Roman Catholic secondary schools, specialize in agricultural and technical courses. Non-government schools offer some facilities additional to those normally found in government schools, such as personal tuition in music, ballet, etc. A few are organized on "experimental" lines.

3. *Examinations.*—During the course of secondary education, State-wide examinations are taken at two levels. The earlier examination, usually called the Intermediate or Junior Examination, qualifies pupils for entry to trade courses at technical colleges and agricultural colleges, to junior commercial positions in, for instance, insurance and banking, to nursing

and secretarial courses, to lower grades of the public service and to industry. The examination at the end of the secondary school course is usually called the Leaving Examination and qualifies students for entry to teacher's colleges, the higher grades of the public service, and commercial occupations. In the majority of States, the Leaving Examination is also the qualification for entry to the university, certain subjects and combinations of subjects being set down as the matriculation requirements by the respective universities.

The Leaving Examination is controlled by a Board consisting of representatives of the Department of Education, the universities, and non-government schools, and sometimes of other bodies such as teachers' organizations. In Victoria and Tasmania, the final secondary examination is controlled by the university and designed specifically for matriculation.

A brief description of the examinations in each State follows.

*New South Wales.* The Intermediate Certificate examination is taken internally after three years secondary study, at about the age of 15, and the Leaving Certificate examination after five years, at about 17. The structure of secondary education is being changed so that children entering secondary schools in 1962 and future years will follow a six-year course. The Intermediate Certificate examination will be taken as at present by those who wish to leave school at that stage. A School Certificate examination will be taken at the end of four years and a Higher School Certificate examination (Matriculation) after a further two years.

At present, a student presenting himself for the Leaving Certificate Examination qualifies for matriculation by obtaining passes in prescribed subjects. In addition, the University conducts its own matriculation examination, for which students may sit in place of the Leaving Certificate Examination.

*Victoria.* The Intermediate examination is taken at the end of the fourth secondary year, at about the age of 16, the School Leaving examination at the end of fifth year, at 17, and the Matriculation examination conducted by the University of Melbourne at the end of sixth year, at the age of 18. Pupils at approved non-government schools may be accredited for the Intermediate and Leaving Certificate by passing the examinations set by their own schools.

*Queensland.* The Junior Public Examination is taken at the end of second year, at about the age of 16. The Senior Public Examination conducted by the University of Queensland is taken at the end of fourth year, at the age of 18, and matriculation is obtained on results in this examination. At the beginning of the 1964 school year, a five-year secondary course will be introduced. Pupils will enter secondary school one year earlier than at present, and the Junior Public Examination will be taken at the end of the third year and the Senior Public examination at the end of the fifth year.

*South Australia.* The Intermediate Examination is taken at the end of the third year, at about the age of 15½. The Leaving Examination is taken at the end of the fourth year and Matriculation is gained on results in this examination. A further year may be taken, leading to the Leaving Honours Examination. The Leaving Honours year is designed primarily as additional preparation for university work, though it is not compulsory for intending students of the University of Adelaide.

*Western Australia.* The Junior Certificate examination is taken at the end of third year, at about the age of 15½. Students who pursue a less academic course may take the High School Certificate examination at this level. The Leaving Certificate examination is taken at the end of fifth year, at an average age of 17½, and matriculation is gained on results in this examination.

*Tasmania.* The Secondary School Certificate examination is taken at the end of third year, at about the age of 15½; the Schools Board Certificate examination at the end of fourth year, at 16½; and the Matriculation examination conducted by the University of Tasmania at the end of sixth year.

## § 2. Numbers of Schools, Teachers and Pupils.

1. *General.*—The statistics which follow relate generally to schools providing education according to the primary and secondary school curricula of the various State Education Departments, whether provided in government or non-government schools. Junior technical schools, correspondence schools and schools in institutional homes, hospitals and similar establishments are included. Institutions providing only pre-school education, senior technical colleges, evening schools, continuation classes and various unregistered schools such as coaching establishments are excluded.

"School Censuses" are conducted annually throughout all States and Territories of Australia. With the exception of non-government schools in Tasmania, where the census

is conducted in December, school censuses are conducted at or about the beginning of August. The numbers of pupils refer to the position at the school census date. The numbers of schools and teachers refer to the position at dates which vary from State to State and in some instances from year to year.

It has not been possible to present all figures on a uniform basis between States. However, continuity of the figures for any one State over the period of years shown has been maintained as far as possible.

Particulars relating to senior technical colleges are given in § 6, page 738.

2. Statistical Summary.—The numbers of schools, teachers and pupils for 1961 are shown in the following table.

### SCHOOLS: NUMBER, TEACHERS, PUPILS, 1961

## § 3. Teacher Training and Recruitment

1. Teachers for Government Schools.—(i) *Recruitment.* The teacher shortage evident in past years has now to a certain extent been overcome. Some States have no difficulty in recruiting and training sufficient staff to meet the present needs of primary schools. Despite expanded training programmes, the shortage of secondary school teachers has proved a greater problem, especially in mathematics and science.

State Education Departments recruit most prospective teachers for government service from students leaving schools after a secondary course. Each department offers training awards annually on the basis of academic merit and personal suitability. The traineeships cover the cost of a teacher training course (which may include university studies) and provide a living allowance. Students are usually required to enter into a bond to serve for a specified number of years in the government schools of the State where they have trained. In some States, intending teachers can obtain a scholarship at Intermediate Certificate level to enable them to complete teachers' college entrance requirements. Such an award entails a bond of service for a longer period.

(ii) *Training of Primary School Teachers.* In most States, teachers for government primary schools are trained in teachers' training colleges controlled and administered by the State Education Departments. These colleges are described in § 10, para. 2. Generally, the duration of courses for primary teachers is two years. The basic subjects taken in the various courses are history and principles of education, general and special methods of teaching in the primary school, school organization, and educational psychology. In addition, students undertake courses in English (including speech training), mathematics, handicrafts, music, art, social studies, natural science, physical and health education. Optional subjects may include dramatic art, visual aids and so on. Supervised practice teaching in schools, and the observation of demonstration lessons form part of all training courses. Since primary teachers in Australia may be called upon at some time to teach grouped classes in a small school or a "one-teacher" school, special training for this kind of work is included in their course.

(iii) *Training of Secondary School Teachers.* Secondary teachers are normally specialists in a combination of subjects, such as English and history, modern languages, or mathematics and science. Intending secondary school teachers are required to complete a university degree, followed by a year of professional training qualifying for a Diploma in Education.

The degree courses followed are usually in arts, science or economics, with the major studies providing the essential background for future subject teaching. During the post-graduate or professional year, the student takes such subjects as the history and principles of education, comparative education, educational psychology, and special teaching methods. Training also includes practice teaching under the supervision of teachers' college and university staff, and the observation of demonstration lessons.

At several Australian universities, students wishing to take up teaching as a profession can receive their professional training along with the study of their teaching subjects as part of a first degree course in Education. The time taken to complete such a Bachelor of Education degree is four years.

(iv) *Training for Specialist Teaching.* Teachers of specialist subjects such as music, art, manual arts, domestic science and commercial subjects receive from two to five years training which varies according to the institution concerned and the type of secondary school in which the teacher is to serve. In several States, the shorter courses are provided wholly by the teachers' colleges. Where the specialist course is given at an institution other than the teachers' college—for example, at a university, technical college or conservatorium of music—as is usual for teachers of specialist subjects in high schools, trainees are required to attend teachers' college or university lectures in education, and in some cases the specialist course is followed by a year of professional training. In four States, teachers of music receive their specialist training at conservatoria of music.

Courses designed to train physical education teachers are offered in universities in all States, and in three States at a teachers' college as well.

Training for teachers of agricultural subjects in secondary schools is available in five States and consists of either an agricultural college diploma or a university degree course together with professional training. In Victoria, the two-year agricultural college diploma course follows on the normal two-year primary teachers' course.

Teachers of technical subjects in secondary schools may be trained in manual or industrial arts courses of two to four years' duration, at teachers' colleges, technical colleges, or, in one State, at a university. These courses include basic training in such subjects as wood and metal work, and geometrical drawing. In Victoria, there is a separate Technical Teachers' College. Some teachers of trade subjects in technical schools are recruited from the ranks of qualified tradesmen engaged in either industry or commerce. These teachers usually receive instruction in classroom teaching techniques and procedures upon appointment.

(v) *In-service Training.* As almost all teachers now enter the profession by way of teachers' colleges or universities, where they receive basic professional training, in-service training in Australia is directed chiefly towards keeping teachers abreast of developments and adding to their basic training.

In-service training usually takes the form of short courses held sometimes during vacations, sometimes during school-time or in the evenings. Courses consist of discussions and lectures given by senior staff members of Education Departments and university and teachers' college lecturers on such subjects as classroom techniques and supervision, librarianship, visual aids, music, arts and crafts, and physical education. In some States, there are also in-service courses for special groups of teachers such as headmasters or teachers in one-teacher schools. In addition, district inspectors are responsible for organizing short conferences of teachers, where professional topics are discussed. Education Departments encourage teachers to pursue university courses, and in some States pay the cost of courses undertaken by selected teachers.

The official publications of the Education Departments contain articles dealing with educational theory and practice. Magazines of the teachers' organizations, which reach the majority of government teachers, also contain articles of this type.

(vi) *Status.* Most teachers in government schools are permanent public servants and have security of tenure, superannuation rights, and the right of appeal in matters of promotion. The centralized education systems and the general policy of providing fully trained teachers for both city and country areas mean that teachers are subject to transfer to any part of the State in which they serve. It is common for a teacher's first appointment to be to a country school.

In each State, there is a federation or union of State school teachers, and these together form a federal body, the Australian Teachers' Federation. Their aim is to advance the teacher's status and conditions and to stimulate community interest in educational problems.

2. **Training of Non-government School Teachers.**—Teachers for non-government schools receive their training in a number of ways. The Roman Catholic Church staffs both its primary and secondary schools mainly with members of religious orders whose training has been obtained in conformity with the requirements of the particular order concerned. In recent years, there has been a growth in the number of lay teachers being employed in Catholic schools, and some training of students to become lay primary teachers has now been instituted. Secondary teachers receive their academic training mostly through courses provided by Australian universities.

Other non-government schools tend to recruit their staffs from teachers who have already obtained qualifications in Australia or overseas. There are two training institutions—one each in New South Wales and Victoria—which offer courses designed principally for teaching in non-government schools. Non-government schools recruit also university graduates who are then given some guidance by senior members of the school staff.

Private students may enrol at government teachers' colleges on payment of a fee, but the number of places available is limited. Some teachers destined for non-government schools are trained in this way.

In-service training to provide the basic training for teachers is used only to a limited extent by non-government schools, mainly in the case of the graduate recruits mentioned above. Recently vacation courses have been provided by bodies other than Education Departments for teachers from both government and non-government schools. For example, an independent body—the Nuclear Research Foundation—has provided such courses for teachers of science in secondary schools in New South Wales.

The training of pre-school teachers is carried out in five States in Kindergarten Training Colleges, set up by the Kindergarten Unions. These are described in § 10, para. 3.

#### § 4. Other Aspects of School Education

NOTE.—Information relating to school medical and dental services is given in Chapter XVII. Public Health, and particulars of School Savings Banks in Chapter XX. Private Finance.

1. **Provisions for Isolated Areas.**—(i) *General.* Although the task of bringing education to isolated areas in Australia presents problems, all education authorities have nevertheless aimed at providing opportunities for country children comparable to those available to city children. Country children follow the same curriculum (with local adaptation, if desirable) and are under the guidance of teachers who are trained for service in country and city schools alike.

In areas where there are sufficient children of school age, a "one-teacher" school may be formed with all primary grades in a single classroom under the control of the one teacher. Special training is given to teachers undertaking work of this kind. Children who complete a primary course in a one-teacher school and cannot attend a secondary school may do secondary correspondence lessons under the teacher's supervision.

In districts where a number of small centres are scattered around a larger centre or country town, the tendency is to close the one-teacher schools and transport pupils each day by buses to a "consolidated" school in the larger centre. Consolidated schools provide primary instruction and from two to four years of post-primary instruction. The post-primary curriculum adopted is usually directed towards practical activities and training in subjects bearing on the primary industries of the locality.

Where a group of children is too small to warrant the establishment of a one-teacher school at public expense, a "subsidized" school may be opened. The Education Department pays part of the cost and in some States appoints a teacher. Some States also administer "provisional" schools, which are completely financed by the Government but which are not large enough, or sufficiently assured of adequate continued attendance of pupils, to warrant classification as permanent schools.

(ii) *Correspondence Schools.* These have been established in each State capital city to meet the needs of children whose daily attendance at school is prevented by distance between home and school, by illness or by physical disability. The correspondence schools also cater for inmates of penal institutions, Australian children overseas, pupils of other schools in which particular courses are not available, student teachers, members of the Defence Forces and other adults completing their secondary education. Lessons are done with the help of a supervisor, usually a member of the child's family, and posted back to the correspondence school in the capital city, where they are corrected and returned with helpful comments. Every endeavour is made to maintain a personal link between teacher and pupil. Correspondence schools began with primary grades only, but were soon extended to cater for secondary pupils, and it is now possible to do a complete secondary course to matriculation standard by correspondence. Some 18,000 primary and secondary pupils are receiving instruction through correspondence schools.

(iii) *Schools of the Air.* These are an attempt to give the outback child of school age some of the benefits of school life and at the same time to supplement correspondence education. Using the two-way wireless equipment developed first by the Royal Flying Doctor Service, children hundreds of miles apart participate in the same lesson, and teacher and pupils can talk directly with each other. The first School of the Air was established in 1950 at Alice Springs in the Northern Territory; it has been followed by similar schools at Broken Hill in the far west of New South Wales; at Ceduna and Port Augusta in South Australia; Cloncurry and Charters Towers in Queensland; and Meekatharra, Derby and Kalgoorlie in Western Australia. These nine schools serve children in an area of a million square miles.

**2. Handicapped Children.**—Special provision is made for the education of physically and mentally handicapped children, both by the State authorities and by church and voluntary organizations, often working in conjunction. In many cases where residential schools are necessary for particular groups, educational facilities and teaching staff are provided by a State Education Department, while a voluntary organization provides accommodation and accepts responsibility for the general welfare of the children. Among the facilities available are:—hospital schools for sick and crippled children; "spastic centres" for cerebral palsied children; special schools and special classes for deaf children; schools for blind children; and special classes and schools for mentally retarded children. Special schools and classes have involved the appointment of departmental specialists, the provision of special training courses, and close liaison with school health services. In some States, clinics attached to hospitals, or functioning as an independent child welfare service, handle cases of personality maladjustment and work in co-operation with the psychological services of the Education Departments.

**3. Educational Guidance.**—Each Australian State now has a comprehensive system of educational guidance administered by trained and experienced educational psychologists and backed by a system of individual pupil record cards. The functions of these services are the selection of pupils for courses at secondary level, diagnosis and guidance of atypical children, preliminary guidance and, in some States, research. The weight given to each of these functions varies from State to State, but the aim is to provide thorough educational guidance for all children.

Throughout Australia, branches of the Commonwealth Employment Service co-operate with State Education Departments by giving post-school vocational guidance, using the data obtained and made available by the Education Departments during the school career of the children. In New South Wales, a similar service is also provided by the Youth Welfare Section of the State Department of Labour and Industry.

**4. Research.**—All State Education Departments have set up branches undertaking research directed towards departmental activities. The work of the research branches is concerned with such matters as curriculum content, new teaching methods, evaluation procedures, wastage rates and educational statistics.

**5. School Broadcasting and Television.**—Over the years, an extensive school broadcasting system has been developed in Australia by the co-operative efforts of the Australian Broadcasting Commission and education authorities. The Australian Broadcasting Commission's Education Department is responsible for preparing and broadcasting programmes, but it draws freely on the advice and services of teachers and maintains permanent liaison with State Education Departments. It is estimated that, in 1962, over 90 per cent. of Australian schools were equipped to receive radio lessons.

School broadcasts are presented as part of the regular Australian Broadcasting Commission programmes without separate stations or wave lengths. Special efforts are made, however, to relate the broadcast to school work by the extensive distribution of booklets, giving details of programmes in advance, and subject notes accompanied by picture sheets, work books, and teachers' notes.

Broadcasting has proved to be a most effective way of reaching the outback children of Australia, and radio lessons have been designed to supplement correspondence lessons.

Even though the use of television in education is still in its early stages in Australia, more than 300 schools made use of the telecasts provided for schools by the Australian Broadcasting Commission during 1962. In 1962, over 400 programmes were broadcast to schools, mostly at primary level.

**6. Scholarships and Bursaries.**—All States have schemes of financial assistance to school pupils, mostly at the secondary level, through scholarships or bursaries. As tuition in government schools is free, this assistance is usually in the form of maintenance allowances, both for children living with their parents and for those living away from home. These may be paid in a lump sum or in instalments throughout the year. Awards are usually made on the results of a competitive examination, and sometimes a means test is applied. Other government and private authorities, such as the Repatriation Department and the Legacy War Orphans Fund, assist special categories of pupils with their school education. Many non-government schools also award scholarships on a competitive basis which enable students to attend the particular schools without payment of fees.

**7. School Transport.**—All States have systems of subsidies whereby transport is made available free or at a concession rate for children travelling to and from school. In some States, allowances are paid if private transport has to be used.

**8. School Buildings.**—The great increase in the school population in the last decade led to an expansion in school building, first for infants' and primary classes and later for secondary pupils. To cope with this growth in population, it was necessary at first to make use of temporary and emergency structures, but the period of resorting to this expedient is now giving way to one of consolidation and development in school building programmes. Quite large schools may be built in stages to match increase in local population in new and rapidly developing suburbs in metropolitan areas. Authorities are giving much attention to the use of new materials and especially to the planning of sites. An increasing number of schools are planned with playing fields and tennis courts. Gymnasiums which may also serve as assembly halls are included, and lighting, heating and ventilation to meet different climatic conditions are carefully planned.

**9. Textbooks, Materials and other Equipment.**—The State Education Departments supply government schools, free of charge, with essential equipment, including scientific apparatus, maps, blackboards, chalk and cleaning materials, and non-consumable equipment for commercial, home science and manual training. Garden tools and physical training equipment are also supplied in most States.

Primers and writing equipment for individual pupils are usually supplied free in primary schools, and Education Departments produce monthly school magazines which are supplied free or cheaply. In primary schools (except in one State) and in all secondary schools, textbooks must, however, be purchased by students. In several States, schools own stocks of textbooks which are hired to students, and in one State, secondary textbooks are sold at reduced prices.

Equipment such as radios, film and filmstrip projectors, pianos, duplicators and library books is ordinarily purchased for individual schools by the parent and citizen organizations associated with them, with the assistance of subsidies from the Departments.

The design of school furniture is undergoing considerable change following research on posture and the physical measurement of children. Dual desks are now being replaced in many schools by individual tables and chairs, provided in a range of sizes suitable to each class. The new type of furniture is more suitable for flexible arrangement of the class in line with modern educational practice.

10. **Visual Aids.**—Visual aids are widely used in Australian education. Each of the State Education Departments has a visual education branch to handle the production and distribution of such materials. Film strips and posters are distributed free or at low cost. Films are held in central libraries and are requisitioned by schools as required for teaching purposes.

### § 5. Pre-school Education

Pre-school centres of various kinds are conducted by private individuals, church bodies and voluntary organizations such as the Kindergarten Unions. Over recent years, the Commonwealth Government, State Governments, and some municipal councils have provided an increasing amount of financial assistance and themselves maintain centres in certain areas.

The Australian Pre-School Association is a federal body composed of the Kindergarten Unions and several other organizations. Its aim is to promote the development of pre-school education throughout Australia. It is also responsible for the administration of six Lady Gowrie Child Centres which were established in capital cities by the Commonwealth Government as model pre-school centres.

Centres are located in city and country areas. Programmes are adapted to suit the areas in which centres are situated. Types of pre-school centres include nursery kindergartens, crèches with full-day care for children in closely settled industrial areas, play groups and play centres, occasional care centres and residential holiday homes.

Pre-school centres can cater only for a small proportion of children in the three to five or six year age group, but radio and television have brought a form of education within the reach of practically every pre-school child in Australia. "Kindergarten of the Air", the first programme of its kind in the world, is a session of 25 minutes broadcast every week-day over the national radio network of the Australian Broadcasting Commission. Through it young children in hospitals, in homes in city and country towns and in bush homesteads in the outback, perhaps many miles from any school, receive some of the advantages of pre-school training.

"Kindergarten Playtime" is a 15-minute television programme transmitted each week-day. It is based on the interests of children from three to five years and is now broadcast in all State capital cities by the Australian Broadcasting Commission.

### § 6. Technical Education

1. **General.**—The following description of technical education refers to training in technical fields given by institutions other than secondary schools and universities. Students may proceed to this kind of training after completing three to five years at secondary school.

Each State has developed a system of technical education based on institutions set up in all the State capital cities and in many country areas. These institutions are known variously as technical colleges, technical schools, institutes of technology and schools of mines. The earliest began as local and even private ventures in the second half of the nineteenth century, but almost all of them have now come under the control of the State governments.

The technical colleges in Queensland, South Australia, Western Australia and Tasmania are administered by branches of the State Education Departments and are financed from the budget of the State Minister for Education. New South Wales has a separate State Department of Technical Education. Only in Victoria is there still a dual system with a number of the older colleges controlled by their own "councils" in addition to government-controlled colleges administered by the Technical Education Branch of the Education Department. The council-controlled colleges receive government grants-in-aid and their teachers' salaries are paid by the State government.

Australian technical colleges offer training in all the major industrial skills and in a wide variety of commercial, artistic and domestic occupations. The three main types of courses are described below.

2. **Trade Courses.**—These offer part-time training for apprentices. In developing a system of technical education, the Australian authorities were influenced by the British tradition which regards practical experience on the job as the fundamental training procedure, to be supplemented by theoretical and practical training at an appropriate school. In each of the Australian States there is an apprenticeship authority which supervises the administration of apprenticeships and an education authority which provides technical education through its technical colleges.

The time spent on training varies from three to five years in different trades and States. Between four and eight hours' instruction a week are required. Most of this takes place in the employer's time, and it is unusual for more than two hours a week of the employee's time to be spent in attending classes.

3. **Certificate Courses.**—There is considerable variation between the States in the aims and organization of certificate courses. In New South Wales, they provide training of a semi-professional nature in occupations for which no apprenticeship awards exist. Some of the courses are open to qualified tradesmen only. For others, no occupational entry qualifications are demanded, but it is necessary to hold an Intermediate Certificate or its equivalent. The courses are usually for four years, most of them being part-time.

The Victorian concept of a certificate course is somewhat different. It is designed to develop specialized skills in a particular phase of an occupation. In the building field, for instance, there is a certificate course in architectural drafting. The courses are offered at three levels—professional certificate courses which include diploma subject matter and can be counted towards a diploma; special short courses which are designed to increase the efficiency of people in their chosen field; and technicians' courses which give a standard of training between trade and professional courses. In general, they consist of part-time day and/or evening instruction concurrent with employment in the field, and entrance requirements are of approximately Intermediate Certificate standard.

Courses in other States are mostly part-time, and of two to seven years' duration. They provide a wide range of training for skilled technical and semi-professional workers, and, in most cases, entrance is at the level of the Intermediate Certificate or equivalent.

4. **Diploma Courses.**—Diploma courses are designed to provide professional training in fields such as architecture, art, building, commerce, management, public administration, manual arts, the various branches of engineering and metallurgy, and pure and applied science. They usually follow completion of a full secondary school course.

The courses consist of complete progressive units of study in which the lecture room, laboratory and workshop are closely associated. They vary from three to five years' full-time and from three to seven years' part-time study. At least one full year's employment in an appropriate occupation is usually required.

The aim of the courses is to develop highly trained technologists with the qualifications and experience required for membership of a professional institution.

5. **Other Courses.**—Most colleges provide short post-diploma and refresher courses to keep students in touch with new developments in their fields, as well as courses of general interest such as women's handicrafts and motor mechanics. Training in certain technical aspects of agriculture such as farm mechanics and wool classing is often given in the technical colleges. Some also offer general secondary courses to enable adults to prepare for matriculation and other public examinations.

6. **Correspondence Teaching.**—Each State has a well developed system of technical education by correspondence to extend the facilities of a metropolitan college to rural students. Entrance qualifications are identical with those for the regular classes. A major problem of correspondence work is the linking of theory with practice. This is overcome to a certain extent by holding practical sessions at appropriate training centres once or twice a year at the technical college where the correspondence school is based or at a mobile workshop stationed for the time at a focal point within the district. In New South Wales, these mobile workshops are rail cars equipped with machinery and fittings to make them self-contained training schools for engineering and other trades. Among practical courses offered by correspondence are trade drawing, fitting and machinery, welding, diesel engine operation, automotive engineering and workshop practice, and farm mechanics.

7. Colleges, Teachers and Students.—The number of colleges, teachers and enrolments of individual students during the years 1957 to 1961 is given in the following table.

### TECHNICAL EDUCATION: COLLEGES, TEACHERS, AND ENROLMENTS

State	Colleges	Teachers			Students enrolled

(a) Excludes correspondence students. (b) Includes A.C.T. (c) Estimated.  
 (d) Number enrolled at Census. (e) Student figures are enrolments at end of year. (f) Student figures are individual enrolments. (g) Number of teaching positions. (h) In 1961 there was a transfer of classes in the hobby category to the Adult Education Board. (i) Partly estimated.

8. Training of Technical Instructors.—Prior to the 1939–45 War, technical colleges were staffed chiefly by trained teachers in the employment of the Education Department or technicians drawn from industry. Although some of the latter were highly qualified, the great majority had not been trained as teachers.

To preserve links with industry and trade practice, schemes have been developed which continue the recruitment of specialist tradesmen as instructors but provide also for their training in educational method and teaching techniques. In Victoria, the Technical Teachers' College provides training for students with appropriate diploma or trade qualifications and suitable industrial experience. In New South Wales, technical college lecturers and tradesmen-instructors receive an in-service course of teacher training in both general educational theory and teaching method, while correspondence courses and visiting lecturers assist the newly appointed tradesman-instructor in country colleges. Variations of this scheme are in operation in other States. Many technical teachers, principally of academic, commercial and domestic science subjects, hold trained teacher's certificates from teachers' colleges.

## § 7. Government Expenditure on Schools and Technical Education

1. *General.*—The following tables show particulars of the total net expenditure (i.e., gross expenditure less receipts for services rendered) from certain funds on government schools, education departments and technical education. The data have been compiled on the same basis as far as differences in organization and accounting methods between States and Territories will permit.

The tables include only expenditure from the consolidated revenue funds and certain trust or special funds. They exclude loan fund expenditure; expenditure on debt charges, payroll tax and superannuation payments, in so far as it is possible to identify these items; and some items for which information cannot be obtained from the public accounts of all States.

2. *Government Schools and Education Departments Expenditure.*—(i) *Total Net Expenditure.* The figures relate throughout to years ended 30th June. Net expenditure per pupil relates the total net expenditure to the mean of the numbers of pupils enrolled at two subsequent school censuses. Net expenditure per head of population relates the total net expenditure to the mean population.

(ii) *Classification of Expenditure.* The following table shows, for the six States, the net expenditure on government schools and education departments classified into the following headings:—(i) Primary Education, (ii) Secondary Education, (iii) Administration, (iv) Training of Teachers, and (v) Transportation of School Children and Students. Expenditure on technical and agricultural education is excluded from the tables.

It has been necessary to estimate some items of expenditure, largely because the meanings of "primary" and "secondary" differ between States, and because elementary and higher education are sometimes given in the same school by the same teachers.

Expenditure on government schools in the Northern Territory and Australian Capital Territory is not included in the following table. This expenditure has been excluded, because the detail is not available.

## § 8. Non-government Schools Finance

Most Roman Catholic parochial schools charge fees, but payment is not insisted on in the case of families who cannot afford it. At the majority of non-government secondary schools, privately endowed scholarships are available in varying numbers, and reductions in fees are normally made for children of clergy or for two or more members of one family attending the same school. With these exceptions, pupils of non-government schools must pay fees.

Certain State scholarships and bursaries are tenable at approved non-government secondary schools. Since the establishment of educational systems by the State governments, official policy has been largely against the provision of direct financial assistance to non-government schools. The eight undenominational grammar schools in Queensland, however, receive a State subsidy under the *Grammar Schools Acts 1860-1900*. In 1956, the Commonwealth Government undertook to contribute to the interest payments on loans raised in order to build non-government secondary school accommodation in the Australian Capital Territory. This contribution is now available for both primary and secondary school buildings extensions and additions.

## § 9. Universities

1. General.—Students qualify for entrance to Australian universities by passing a matriculation examination in one of the States after 5 or 6 years of secondary education. Each university has its own regulations for matriculation, specifying the number and combination of subjects to be passed for admission. Students entering the universities have the choice of undergraduate study in various faculties.

The Australian universities with their faculties are listed below in the order of their foundation.

*University of Sydney*, 1850, Sydney, New South Wales: Agriculture, Architecture, Arts, Dentistry, Economics, Engineering, Law, Medicine, Science, Veterinary Science.

*University of Melbourne*, 1853, Melbourne, Victoria: Agriculture, Architecture, Arts, Dental Science, Economics and Commerce, Education, Engineering, Law, Medicine, Music, Science, Veterinary Science, Applied Science.

*University of Adelaide*, 1874, Adelaide, South Australia: Agricultural Science, Architecture and Town Planning, Arts, Dentistry, Economics, Engineering, Law, Medicine, Music, Science, Technology.

*University of Tasmania*, 1890, Hobart, Tasmania: Agricultural Science, Arts, Commerce, Education, Engineering, Law, Science.

*University of Queensland*, 1909, Brisbane, Queensland: Agriculture, Architecture, Arts, Commerce and Economics, Dentistry, Education, Engineering, Law, Medicine, Science, Veterinary Science.

*University of Western Australia*, 1912, Perth, Western Australia: Agriculture, Arts, Dental Science, Economics and Commerce, Education, Engineering, Law, Medicine, Science.

*Australian National University*, 1946, Canberra, Australian Capital Territory.—Institute of Advanced Studies: John Curtin School of Medical Research, Research School of Physical Sciences, Research School of Social Sciences, Research School of Pacific Studies. School of General Studies: Arts, Economics, Law, Science, Oriental Studies.

*University of New England*, 1954 (formerly New England University College, established in 1938), Armidale, New South Wales: Agricultural Economics, Arts, Rural Science, Science.

*University of New South Wales*, 1958 (formerly the New South Wales University of Technology, established in 1948), Sydney, New South Wales: Architecture, Arts, Commerce, Engineering, Medicine, Science, Applied Science.

*Monash University*, 1958, Melbourne, Victoria: Arts, Economics and Politics, Engineering, Medicine, Science.

Each of the universities was established by a parliamentary Act as an autonomous institution, with its own Governing Council or Senate. Nevertheless, the Australian universities receive substantial government support from both State and Commonwealth sources, only part of their income being derived from students' fees, private donations and bequests.

There are also three university colleges. *Newcastle University College*, founded in 1951, is affiliated with the University of New South Wales, and has degree courses in the faculties of Applied Science, Architecture, Arts, Commerce, Engineering and Science. *Townsville University College*, founded in 1961, is a constituent part of the University of Queensland. It offers some courses in the faculties of Agriculture, Arts, Commerce and

Economics, Dentistry, Education, Engineering, Law, Medicine, Science and Veterinary Science. Wollongong University College was opened in 1962, and is affiliated with the University of New South Wales. It offers some courses in the faculties of Engineering and Science. In 1966, the University of Adelaide plans to open additional facilities at Bedford Park, where four schools will be established initially in Language and Literature, Social Science, Physical Sciences and Biological Sciences.

**2. Organization of Courses.**—Bachelor degree courses are from three to six years in length, depending on the faculty, and for the majority full-time attendance is required. However, certain courses may also be undertaken by part-time or evening students. The university academic year begins in March and finishes in early December. At most universities, two short vacation periods divide the year into three terms, but there are four terms in some universities.

Several universities make provision for external tuition, whereby students living away from university towns may take a restricted number of courses by correspondence. The University of Queensland has developed a system of correspondence tuition which now caters not only for students within the State but for those in the Northern Territory, Papua and New Guinea, adjacent Pacific islands and Asian countries. External students living in Queensland receive tutorial assistance at university centres in the principal country towns.

The University of New England's Department of External Studies offers a wide range of subjects for external study, leading to the degrees of Bachelor of Arts and Bachelor of Letters, and to the Diploma of Education and the Diploma in Educational Administration. External students must attend short annual residential schools of instruction in their subjects, usually held at the university.

Post-graduate courses leading either to a Master's degree or to a Doctorate are available at all universities. Facilities cover the humanities, social sciences, pure and applied sciences.

Additional courses are constantly being introduced by the universities at both the undergraduate and the post-graduate level, to cover new fields of knowledge and specialization. In 1962 and 1963, the following courses were introduced:—the University of Sydney, undergraduate courses in Biblical Studies within the Faculty of Arts; at the University of Adelaide, the degree of Master of Town Planning in 1962, and one of Master of Business Management in 1963; at the University of Queensland, a course towards a Diploma in Speech Therapy in 1962; at the University of Western Australia, undergraduate courses in Archaeology in 1962; and at the University of Tasmania a course towards a Bachelor of Agricultural Science degree in 1962.

**3. Research.**—A wide range of research work and training in research techniques is carried out by the universities as part of their normal functions. Post-graduate students and members of university staff are engaged in research, both as part of their work for post-graduate degrees and also as part of group and departmental research programmes. Support for research in universities is derived from public and private sources, including funds and foundations established to encourage research in a particular field.

**4. Post-War University Expansion and Development.**—Since the 1939–45 War, the Australian universities have had to face greatly increased demands on their facilities, firstly from large numbers of ex-service personnel in the immediate post-war years, and later from greatly increased numbers of students leaving secondary schools each year. By 1961, the total enrolments in Australian universities had reached a figure of 57,672 compared with an early post-war peak of 32,453 in 1948.

To assist the universities to cope with these demands, increasing co-operation between the Commonwealth Government and the State Governments in university finance became necessary. The Commonwealth Government set up a Committee on Australian Universities, whose 1957 report ("The Murray Report") led to more finance becoming available to universities and to the setting up of a permanent body, the Australian Universities Commission, to advise the Commonwealth Government on university development. In the years since the Murray Report, the following major developments have taken place in the Australian university structure:—the University of New South Wales was created from the earlier University of Technology in 1958; in the same year, Monash University was established in Victoria; in 1960, the Australian National University was reconstituted, combining both undergraduate and post-graduate facilities and now consists of the Institute of Advanced Studies and the School of General Studies created from the Canberra University College; the University of Queensland set up the University College of Townsville in 1961; and the University of New South Wales established the Wollongong University College in 1962.

Despite rapid expansion, the Australian universities are still faced with a problem in providing tuition for all students who reach matriculation standard. As a result, several universities have found it necessary to impose quotas on enrolments in their courses.

The Commonwealth Government and governments of two States have set up their own committees to examine the problems of tertiary education. These committees, and the governments of other States, are directing much of their attention to the expansion of university facilities, both within existing institutions, and by planning the establishment of new universities or university colleges in the future.

5. **Teaching and Research Staff.**—University statistics have been reviewed, and those for 1961 are compiled on a different basis from that used in the past. The following table shows particulars of the teaching and research staff of the universities during 1961.

UNIVERSITIES: TEACHING AND RESEARCH STAFF, 1961

University	Teaching and research staff(a)						Research (only staff(a))	
	Full-time					Part-time (b)	Full-time	Part-time (c)
	Professors	Associate professors and readers	Senior lecturers and lecturers	Assistant lecturers, demonstrators, tutors and teaching fellows	Total			
Australian National University ..	20	8	71	9	108	27	202	..
Sydney ..	66	34	403	132	635	855	95	6
New South Wales ..	43	45	429	57	574	532	4	1

Melbourne ..	52	69	349	159	629	652	136	9
Monash ..	12	..	36	18	66	13	..	..
Queensland ..	37	40	287	130	494	506	39	2
Adelaide ..	39	41	229	45	354	286	104	7
Western Australia ..	31	32	147	13	223	229	66	2
Tasmania ..	19	9	69	13	110	63	39	3
<b>Total ..</b>	<b>337</b>	<b>289</b>	<b>2,142</b>	<b>628</b>	<b>3,396</b>	<b>3,199</b>	<b>712</b>	<b>32</b>

(a) Teaching and research staff includes all staff with teaching functions, but excludes Research (only) staff which is shown separately. (b) In units of 100 hours per annum. (c) In equivalent full-time units of 35 hours per week.

The next table gives details of the teaching and research staff of Australian universities for each year from 1957 to 1961. For purposes of comparison, the figures for 1961 have been compiled on a similar basis to those for previous years and therefore differ from those shown in the table above.

UNIVERSITIES: TEACHING AND RESEARCH STAFF, SUMMARY, AUSTRALIA

Year	Professors	Readers (a)	Lecturers(b)		Demonstrators, tutors and research assistants		Honorary lecturers and demonstrators	External studies staff	Total
			Full-time	Part-time	Full-time (c)	Part-time			
1957 ..	255	215	1,413	958	394	405	51	30	3,721
1958 ..	270	238	1,643	982	471	458	51	37	4,150
1959 ..	297	267	1,854	955	585	493	123	64	4,638
1960 ..	331	272	2,015	925	683	508	89	86	4,909
1961 ..	358	311	2,367	1,005	708	608	69	78	5,504

(a) Includes associate professors, assistant professors and lecturers-in-charge. (b) Includes senior lecturers, assistant lecturers, senior fellows, fellows and research fellows. (c) Includes technical officers of the University of New South Wales.

6. Students.—(i) *Total.* The number of students enrolled for courses at the universities for the year 1961 is shown in the following table.

UNIVERSITIES: STUDENTS ENROLLED, 1961

University	Degree courses	Diploma courses		Certificate courses	Miscellaneous subjects	Adjusted total(a)
		Post-graduate	Sub-graduate			
Australian National University ..	1,079	..	5	..	135	1,178
Sydney .. ..	11,477	295	558	..	272	12,534
New South Wales(b) .. ..	7,759	124	589	..	375	8,838
New England .. ..	2,290	189	..	..	61	2,536
Melbourne .. ..	10,150	332	462	175	547	11,451
Monash .. ..	363	..	..	..	..	363
Queensland .. ..	6,907	64	631	1,539	445	9,525

Western Australia .. ..	3,379	90	..	..	76	3,537
Tasmania .. ..	1,069	76	66	203	101	1,460
<b>Total .. ..</b>	<b>49,302</b>	<b>1,595</b>	<b>3,402</b>	<b>1,935</b>	<b>2,263</b>	<b>57,672</b>

(a) Adjustment made for students enrolled for more than one course. (b) From 1961, a new degree of B.Sc. (Technology) has replaced many sub-graduate diploma courses.

Of the students enrolled in 1961, 44,264 were males and 13,408 females. Included in those enrolled for degrees were 234 enrolled for higher degree courses at the Australian National University, 850 in Sydney, 478 at the University of New South Wales, 105 at the University of New England, 479 in Melbourne, 16 in Monash, 332 in Queensland, 331 in Adelaide, 264 in Western Australia and 81 in Tasmania, a total of 3,170.

The following table shows the number of students enrolled at Australian universities for each of the years from 1957 to 1961.

UNIVERSITIES: STUDENTS ENROLLED, SUMMARY, AUSTRALIA

Year	Degree courses		Diploma courses		Certificate courses	Miscellaneous subjects	Adjusted total(a)
	Higher degrees	Bachelor degrees	Post-graduate	Sub-graduate			
1957 .. ..	1,357	26,197	735	5,855	1,115	1,670	36,568
1958 .. ..	1,672	29,965	846	6,168	1,427	2,058	41,492
1959 .. ..	2,226	34,108	1,007	6,405	1,575	2,367	47,151
1960 .. ..	2,770	38,934	1,309	6,898	1,786	2,300	53,391
1961(b) .. ..	3,170	(b)46,132	1,595	(b)3,402	1,935	2,263	57,672

(a) Adjustment made for students enrolled for more than one course. (b) From 1961, a new degree of B.Sc. (Technology) replaced many sub-graduate diploma courses at the University of New South Wales.

(ii) *New Students Enrolled.* The number of new students enrolled for courses at the universities during the year 1961 is shown in the following table.

## UNIVERSITIES: NEW STUDENTS ENROLLED, 1961

University	Degree courses	Diploma courses		Certificate courses	Miscellaneous subjects	Adjusted total(a)
		Post-graduate	Sub-graduate			
Australian National University ..	466	..	..	..	91	535
Sydney .. ..	3,153	85	98	..	35	3,371
New South Wales(b) ..	2,311	43	75	..	263	2,692
New England .. ..	851	82	..	..	29	960
Melbourne .. ..	2,360	20	157	15	228	2,733
Monash .. ..	363	..	..	..	..	363
Queensland .. ..	1,796	3	180	528	236	2,724
Adelaide .. ..	1,251	1	364	2	70	1,665
Western Australia ..	779	3	..	..	24	806
Tasmania .. ..	284	2	18	75	41	414
<b>Total .. ..</b>	<b>13,614</b>	<b>239</b>	<b>892</b>	<b>620</b>	<b>1,017</b>	<b>16,263</b>

(a) Adjustment made for students enrolled for more than one course. (b) From 1961, a new degree of B.Sc. (Technology) has replaced many sub-graduate diploma courses.

Of the new students enrolled in 1961, 11,643 were males and 4,620 females. Included in those enrolled for degrees were 349 enrolled for higher degree courses—Australian National University, 92; Sydney, 34; University of New South Wales, 74; New England, 31; Melbourne, 41; Monash, 16; Queensland, 27; Adelaide, 19; Western Australia, 10; and Tasmania, 5.

The following table shows the number of new students enrolled at Australian universities during each of the years from 1957 to 1961.

## UNIVERSITIES: NEW STUDENTS ENROLLED, SUMMARY, AUSTRALIA

Year	Degree courses		Diploma courses		Certificate courses	Miscellaneous subjects	Adjusted total(a)
	Higher degrees	Bachelor degrees	Post-graduate	Sub-graduate			
1957 .. ..	119	7,417	121	1,601	333	772	10,316
1958 .. ..	211	8,949	92	1,657	457	1,038	12,231
1959 .. ..	252	10,099	198	1,712	483	1,139	13,803
1960 .. ..	278	11,647	242	1,985	526	1,094	15,685
1961(b) ..	349	13,265	239	892	620	1,017	16,263

(a) Adjustment made for students enrolled for more than one course. (b) From 1961, a new degree of B.Sc. (Technology) replaced many sub-graduate diploma courses at the University of New South Wales.

(iii) *Full-time, Part-time and External Students.* The following table classifies students at each university according to whether they were studying full-time, part-time or externally.

## UNIVERSITIES: FULL-TIME, PART-TIME AND EXTERNAL STUDENTS, 1961

University	Full-time	Part-time	External	Total
Australian National University ..	488	690	..	1,178
Sydney .. ..	9,428	3,106	..	12,534
New South Wales .. ..	2,471	6,329	38	8,838
New England .. ..	694	142	1,700	2,536
Melbourne .. ..	7,226	3,720	505	11,451
Monash .. ..	334	29	..	363
Queensland .. ..	3,854	3,058	2,613	9,525
Adelaide .. ..	3,562	2,270	418	6,250
Western Australia ..	1,988	1,183	366	3,537
Tasmania .. ..	766	544	150	1,460
<b>Total .. ..</b>	<b>30,811</b>	<b>21,071</b>	<b>5,790</b>	<b>57,672</b>

The next table shows full-time, part-time and external students enrolled at Australian universities during each of the years from 1957 to 1961.

**UNIVERSITIES: FULL-TIME, PART-TIME AND EXTERNAL STUDENTS, SUMMARY, AUSTRALIA**

Year					Full-time	Part-time	External	Total
1957..	..	..	..	..	22,074	10,607	3,887	36,568
1958..	..	..	..	..	25,535	11,392	4,565	41,492
1959..	..	..	..	..	28,394	13,893	4,864	47,151
1960..	..	..	..	..	31,590	16,304	5,497	53,391
1961(a)	..	..	..	..	30,811	21,071	5,790	57,672

(a) The figures of full-time and part-time students in 1961 are not comparable with those shown for previous years, as in 1961 all universities used a uniform classification of students which differed from that used previously by some universities.

(iv) *Assistance to Students.* The Commonwealth Government, through the Commonwealth Scholarships Board, grants undergraduate and post-graduate scholarships to university students. (Details of the Commonwealth Scholarship Scheme are given on page 755.) Commonwealth, State and local governments also award cadetships and other assistance to their employees. Foreign students are assisted by the Commonwealth Government under arrangements such as the Colombo Plan.

The Universities themselves grant exhibitions and scholarships as well as special assistance to teachers, etc.

The following table gives details of students assisted at each university in 1961.

**UNIVERSITIES: ASSISTED STUDENTS, 1961**

University	Source of assistance					Type of course	
	Commonwealth Government	State Governments	Universities	Other	Adjusted total (a)	Higher degrees	Other
Australian National University ..	262	..	302	21	536	186	350
Sydney ..	4,272	327	2,095	253	6,313	270	6,043
New South Wales ..	1,310	620	1,239	1,592	4,229	299	3,930
New England ..	226	345	1,039	18	1,607	79	1,528
Melbourne ..	3,521	2,085	2,706	448	6,817	121	6,696
Monash ..	64	96	9	3	172	10	162
Queensland ..	2,084	614	322	226	3,246	184	3,062
Adelaide ..	1,446	1,474	1,188	107	3,785	211	3,574
Western Australia ..	944	550	54	45	1,518	71	1,447
Tasmania ..	306	391	71	13	730	21	709
<b>Total ..</b>	<b>14,435</b>	<b>6,502</b>	<b>9,025</b>	<b>2,726</b>	<b>28,953</b>	<b>1,452</b>	<b>27,501</b>

(a) Adjustment made for students assisted from more than one source.

The next table shows the numbers of assisted students at Australian universities in the years 1957 to 1961.

## UNIVERSITIES: ASSISTED STUDENTS, SUMMARY, AUSTRALIA

Particulars	1957	1958	1959	1960	1961
Government assistance ..	14,700	16,532	18,756	20,345	20,937
University assistance ..	4,243	4,875	5,958	6,649	9,025
Other assistance ..	2,006	2,221	2,278	2,648	2,726
Adjusted Total(a) ..	18,155	20,645	23,342	26,061	28,953

(a) Adjustment made for students assisted from more than one source.

(v) *Resident Students.* In 1961, 4,424 full-time and 194 part-time students were in residence at affiliated colleges, halls of residence and university hostels. The 4,618 students in residence were distributed as follows:—Australian National University, 262; Sydney, 776; New South Wales, 192; New England, 619; Melbourne, 1,026; Queensland, 865; Adelaide, 361; Western Australia, 341; and Tasmania, 176. There were 3,422 male students and 1,196 female students in residence.

7. *Degrees Conferred, etc.*—The following table shows the number of degrees conferred and diplomas and certificates granted for males and females separately at each university during the year 1961.

(a) Includes one degree in physiotherapy.

8. Finance.—(i) *General*. Australian universities are incorporated by statute. Since their establishment, they have come to depend greatly on government grants for their income. In recent years, large amounts have been required for new buildings, as well as for current expenditure to provide staff and equipment to cope with increased student enrolments. In 1961, income other than from State and Commonwealth grants, including student fees, amounted to only about one fifth of the total income. Income from non-government sources includes grants, mainly for research purposes, from businesses, international foundations, and private individuals. Some income is also received from endowments.

(ii) *Financial Assistance from the Commonwealth Government*. (a) *General*. Prior to 1939, Commonwealth assistance was almost entirely concerned with research projects carried out by or in collaboration with the universities. During and since the 1939–45 War, the Commonwealth extended assistance to university students, at first to increase the number of highly trained people required for the war effort, then with the object of rehabilitating ex-servicemen, and finally as a social service benefit to the community. For the purpose of reconstruction training, the Commonwealth Government made available to the universities approximately £1 million for buildings and £500,000 for equipment.

Following a report submitted by a committee of inquiry appointed to report on university finances and requirements, the Commonwealth, since 1951, has made matched grants to the States for recurrent expenditure on university purposes. The Commonwealth also makes additional unmatched recurrent grants, assists with the capital needs of the universities for building projects and for equipment, and provides grants for the building programmes of residential colleges affiliated with universities.

In 1959, following the Report of the Committee on Australian Universities, the Commonwealth Government established the Australian Universities Commission under the *Australian Universities Commission Act 1959*. The Commission's principal functions are to advise the Prime Minister on financial assistance to Commonwealth universities and to States in relation to their universities and also on the balanced development of Australian universities. The Commission commenced its work in July, 1959. The first report of the Commission, covering the period 1961-63, was presented in October, 1960. The Commission recommended that Commonwealth grants in the period should be £93,300,000, approximately twice as great as grants available in the period 1958-60. The *States Grants (Universities) Act 1962* gave effect to the recommendations of a committee appointed to advise the Commission on the level of university salaries.

(b) *Commonwealth General Grant for Recurrent Expenditure*. This is a continuation of matched grants provided since 1951, and the maximum amount available in 1962 is shown in the following table.

**UNIVERSITIES: COMMONWEALTH GENERAL GRANT FOR RECURRENT EXPENDITURE, 1962.**

University								Amount
								£'000
Sydney .. .. .	..	..	..	..	..	..	..	1,726
New South Wales .. .. .	..	..	..	..	..	..	..	1,524
New England .. .. .	..	..	..	..	..	..	..	506
Melbourne .. .. .	..	..	..	..	..	..	..	1,453
Monash .. .. .	..	..	..	..	..	..	..	322
Queensland .. .. .	..	..	..	..	..	..	..	1,058
Adelaide .. .. .	..	..	..	..	..	..	..	904
The South Australian Institute of Technology .. .. .	..	..	..	..	..	..	..	76
Western Australia .. .. .	..	..	..	..	..	..	..	658
Tasmania .. .. .	..	..	..	..	..	..	..	293
<b>Total .. .. .</b>	..	..	..	..	..	..	..	<b>8,520</b>

From 1961, matched grants have been made on a basis of £1 of Commonwealth money for every £1.85 of income received by a university from fees and State grants. From 1951 to 1960, the matching ratio was, in general, £1 to £3.

(c) *Commonwealth Grants for the Teaching and Administrative Costs of Residential Colleges*. From 1961, there has been a change in the method of calculating these unmatched grants for residential colleges administered by or affiliated with a university. The grants consist of payments each year of £2,000 to each college, plus £15 for each resident student, and, a further £5 for each non-resident student receiving tutorial assistance. The Commonwealth total grant paid in 1962 was £164,445.

(d) *Commonwealth Grants for Selected Building Projects*. Those grants, for the period 1961-63, are shown in detail in the Second Schedule to the 1960 Act. Payments are made up to a given maximum for each project, on the basis of £1 from the Commonwealth for every £1 of State grants. The total Commonwealth grant for each University is shown in the following table.

**UNIVERSITIES: COMMONWEALTH GRANTS FOR BUILDING PROJECTS, ETC.,  
1961-63**

University								Amount
								£'000
Sydney .. .. .	..	..	..	..	..	..	..	1,450
New South Wales .. .. .	..	..	..	..	..	..	..	2,880
New England .. .. .	..	..	..	..	..	..	..	670
Melbourne .. .. .	..	..	..	..	..	..	..	1,056
Monash .. .. .	..	..	..	..	..	..	..	3,890
Queensland .. .. .	..	..	..	..	..	..	..	1,100
Adelaide .. .. .	..	..	..	..	..	..	..	1,060
The South Australian Institute of Technology .. .. .	..	..	..	..	..	..	..	10
Western Australia .. .. .	..	..	..	..	..	..	..	1,200
Tasmania .. .. .	..	..	..	..	..	..	..	900
<b>Total .. .. .</b>	..	..	..	..	..	..	..	<b>14,216</b>

In addition, a grant of 5 per cent. of the cost of each project is made for equipping and furnishing buildings. This grant is also matched £1 for £1 by the States. In the period 1958-60, the universities received an unmatched Commonwealth grant for equipment equal to 16 per cent. of the cost to the Commonwealth of each project.

(e) *Commonwealth Grants for Buildings for Residential Colleges.* The Commonwealth also makes available, at the request of a State, grants for buildings for residential colleges affiliated with a university. Commonwealth grants are up to one half of the cost for the purchase, erection or alteration of a building at an affiliated residential college. The maximum amount available for distribution in each State in the period 1961-63 is shown in the following table.

**UNIVERSITIES: MAXIMUM COMMONWEALTH GRANTS FOR RESIDENTIAL  
COLLEGE BUILDINGS, 1961-63**

University								Amount
								£'000
Sydney .. .. .	..	..	..	..	..	..	..	142
New South Wales .. .. .	..	..	..	..	..	..	..	150
Melbourne .. .. .	..	..	..	..	..	..	..	223
Queensland .. .. .	..	..	..	..	..	..	..	195
Adelaide .. .. .	..	..	..	..	..	..	..	101
Western Australia .. .. .	..	..	..	..	..	..	..	120
Tasmania .. .. .	..	..	..	..	..	..	..	69
<b>Total .. .. .</b>	..	..	..	..	..	..	..	<b>1,000</b>

(f) *Commonwealth Grants for Equipment.* Under the 1960 Act, special provision is made, for the first time, to assist universities to purchase items of equipment. A total Commonwealth grant of £500,000 is available for this purpose, grants being made available on the basis of £1 from the Commonwealth for every £1 of State grants. This grant is made available in two parts. The maximum amount of the first part available to each university is shown in the following table.

## UNIVERSITIES: COMMONWEALTH GRANTS FOR EQUIPMENT, 1961-63

University								Amount
								£'000
Sydney ..	..	..	..	..	..	..	..	45
New South Wales ..	..	..	..	..	..	..	..	40
New England ..	..	..	..	..	..	..	..	15
Melbourne ..	..	..	..	..	..	..	..	45
Monash ..	..	..	..	..	..	..	..	15
Queensland ..	..	..	..	..	..	..	..	25
Adelaide ..	..	..	..	..	..	..	..	25
Western Australia ..	..	..	..	..	..	..	..	25
Tasmania ..	..	..	..	..	..	..	..	15
<b>Total</b> ..	..	..	..	..	..	..	..	<b>250</b>

The remaining half of the grant (totalling £250,000) is to be distributed among universities on the basis of grants for individual items specially approved by the Commission.

The grants for capital building projects at universities and residential colleges and capital equipment grants for universities are payable at any time within the period 1961-63.

(g) *Commonwealth Grants for Teaching Hospital Projects.* The *States Grants (Universities) Act* 1962 gave effect to the recommendations of a committee appointed to advise the Commission on the teaching costs of medical hospitals. This Act makes provision for the payment to universities of grants for associated teaching hospitals. Commonwealth grants for particular hospital building projects and specific items of equipment in the period 1961-63 are shown in the Fifth Schedule to the Act. Payments are made up to a given maximum for each building project or item of equipment on the basis of £1 from the Commonwealth for every £1 of State grants. The total Commonwealth grant for each university is shown in the following table.

## UNIVERSITIES: COMMONWEALTH GRANTS FOR TEACHING HOSPITAL BUILDING PROJECTS, ETC., 1961-63

University								Amount
								£'000
Sydney ..	..	..	..	..	..	..	..	356
New South Wales ..	..	..	..	..	..	..	..	282
Melbourne ..	..	..	..	..	..	..	..	327
Monash ..	..	..	..	..	..	..	..	397
Queensland ..	..	..	..	..	..	..	..	270
Adelaide ..	..	..	..	..	..	..	..	103
Western Australia ..	..	..	..	..	..	..	..	31
<b>Total</b> ..	..	..	..	..	..	..	..	<b>1,766</b>

In addition, a grant of 5 per cent. of the cost of each project is available for equipping and furnishing each building; this grant is also matched £1 for £1 by the States.

(iii) *University Income.* The following table summarizes the income of each university in 1961. The statistics are compiled on a different basis from those published in previous years.

**UNIVERSITIES: INCOME, 1961**  
(£'000)

University	State Government grants	Commonwealth Government grants	Student fees	Other	Total income
Australian National University	..	5,266	51	347	5,664
Sydney .. ..	2,727	2,212	978	1,099	7,016
New South Wales .. ..	3,174	2,872	562	462	7,070
New England .. ..	990	671	92	170	1,923
Melbourne .. ..	1,973	1,606	956	1,062	5,597
Monash .. ..	1,703	2,250	35	11	3,999
Queensland .. ..	2,035	1,174	569	402	4,180
Adelaide .. ..	1,694	1,310	227	276	3,507
Western Australia .. ..	1,119	836	136	312	2,403
Tasmania .. ..	642	501	69	63	1,275
<b>Total .. ..</b>	<b>16,057</b>	<b>18,698</b>	<b>3,675</b>	<b>4,204</b>	<b>42,634</b>

(iv) *University Expenditure.* The following table summarizes the expenditure of each university in 1961. The statistics are compiled on a different basis from those published in previous years.

**UNIVERSITIES: EXPENDITURE, 1961**  
(£'000)

University	Teaching and research	Administration and general overhead	Libraries	Buildings, premises, grounds	Sundry auxiliary expenditure	Total expenditure
Australian National University .. ..	3,238	283	124	1,239	169	5,053
Sydney .. ..	4,402	523	192	2,049	137	7,303
New South Wales .. ..	3,123	394	193	3,558	185	7,453
New England .. ..	836	199	63	669	276	2,043
Melbourne .. ..	3,229	351	202	1,857	475	6,114

Western Australia .. ..	1,285	145	89	814	230	2,563
Tasmania .. ..	610	102	63	498	51	1,324
<b>Total .. ..</b>	<b>21,808</b>	<b>2,586</b>	<b>1,357</b>	<b>15,784</b>	<b>1,767</b>	<b>43,302</b>

### § 10. Other Tertiary Institutions

1. *General.*—In addition to the degree-granting universities, there is a variety of institutions offering courses at tertiary level; the courses may lead to a certificate, diploma, or similar qualification. Included among the institutions are technical colleges, which have been described in § 6.

2. *Teachers' Colleges.*—The State Education Departments conduct teachers' colleges to train teachers for government schools. There are eight colleges in New South Wales, twelve in Victoria, three in South Australia, and two each in Queensland, Western Australia and Tasmania, making a total of 29 colleges. Two of these opened for the first time in 1962 (Wollongong Teachers' College in New South Wales and Western Teachers' College in South Australia), and one in 1963 (Hobart Teachers' College in Tasmania).

A variety of teacher training courses is provided in these colleges, including those for primary teachers, secondary teachers, and those specializing in teaching infants, handicapped children, art, music, and handicrafts. A description of these courses is given in § 3.

Teachers' colleges are co-educational, and, in the larger States, have been established in country areas as well as in cities. Students entering them have completed their secondary schooling and are usually about 17 years of age. The principal and staff of the colleges are responsible to the Director of Education in the State concerned.

**3. Kindergarten Training Colleges.**—The Kindergarten Unions in all States except Tasmania have established teacher training colleges providing three-year courses. The minimum entrance age is usually 17 years, and the Leaving Certificate is required for admission. In addition, in New South Wales, the Sydney Day Nursery and Nursery Schools' Association maintains a training college.

The pre-school teacher training courses in these colleges are all full-time diploma courses and are similar in content and standards. Teachers are trained for work with children between the ages of 2 and 7 years and the training courses include the study of general educational theory, the theory of pre-school education, general cultural subjects, and art and crafts (including music). In addition, training is given in practical pre-school teaching.

**4. Agricultural Colleges.**—There are seven State agricultural colleges—Hawkesbury and Wagga (New South Wales), Longerenong and Dookie (Victoria), Gatton (Queensland), Roseworthy (South Australia), and Muresk (Western Australia), offering a comprehensive course of two or three years leading to the award of a Diploma in Agriculture, or in a specialized field such as animal husbandry, dairy manufactures, and horticulture. The School of Horticulture, Burnley, Victoria, also offers a three-year diploma course.

Agricultural colleges are government institutions administered by the State Departments of Agriculture in New South Wales, Victoria, South Australia and Western Australia and by the State Department of Education in Queensland. Their purpose is to teach the principles and practices of agriculture and its specialized branches to those intending to take up farming as a career and to those who propose to enter such occupations as agricultural field officer or technical officer in food processing industries.

The minimum entrance standard is the Intermediate Certificate or Junior Public examination in all cases except Western Australia where it is Sub-leaving. As entry is competitive, there is a tendency for students to hold better than the minimum qualifications. All the colleges are fully residential, and the age at which students may enter them varies from 15 to 17 years, depending on the college and the type of course.

In addition to their formal courses of training, agricultural colleges offer short courses of from three days to one month to farmers and teachers in country districts.

**5. Schools of Forestry.**—Training in Forestry is carried out at the Australian Forestry School, Canberra, and at the Creswick School of Forestry in Victoria. Reference to these institutions is made in Chapter XXIII. Forestry.

**6. Conservatoria of Music.**—There are conservatoria of music in four States. Those in Victoria and South Australia are attached to the Universities of Melbourne and Adelaide respectively, while the New South Wales State Conservatorium and the Queensland Conservatorium are each controlled by the State Department of Education.

All four conservatoria offer diploma courses for which matriculation status is not required; at Melbourne and Adelaide, degree courses are also available to matriculated students.

**7. Service and Administrative Colleges.**—Each of the three Armed Services maintains institutions for the training of officers. Descriptions of these can be found in Chapter XXVI. Defence. Two of the institutions, the Royal Military College, Duntroon, Australian Capital Territory, and the Royal Australian Air Force College, Point Cook, Victoria, have arrangements with universities whereby their graduates may enter university courses at an advanced stage.

The Australian School of Pacific Administration, controlled by the Department of Territories, trains students in the various aspects of service and administration in Commonwealth Territories, including teaching.

8. **The Australian Administrative Staff College.**—The Australian Administrative Staff College was opened in 1957, following discussions among prominent leaders in business and government on the need to raise the standards of administration in all walks of Australian life.

The College is a private body, working in close co-operation with governments and other public bodies, the armed services and the Trade Union movement. It was founded and is owned by a large group of the leading Australian companies. It has as its permanent premises a nineteenth century mansion at Mt. Eliza, thirty miles from Melbourne.

The College is based on the model of the Administrative Staff College at Henley-on-Thames, England, but incorporates features drawn from comparable activities in other parts of the world. Its courses are conducted by a Principal, a small permanent directing staff, and by extensive use of visits by practising senior administrators.

The College conducts a ten-week advanced course in administration designed to enable mature administrators to exchange their views and experiences and further their study of the problems which arise in any managerial work. There is also an intermediate course designed to offer a similar opportunity to men and women at a much earlier stage of their careers. The advanced course is offered thrice annually, and the intermediate course twice; both courses are fully residential. Each session of each course comprises forty diversely selected candidates. Certain scholarships are available for the advanced course.

The College has a library, and facilities for research in administrative fields.

## § 11. Commonwealth Activities in Educational Fields

1. **General.**—(i) *Fields of Activity.* Although education is primarily the responsibility of the States, the Commonwealth is engaged in educational activities incidental to its responsibilities in such areas as defence, external relations, immigration and social services. It is also responsible for public education in its own Territories. Activities of the Commonwealth in education are not administered by a single authority but are divided among a number of departments and instrumentalities. Education in Commonwealth Territories is described in Chapter V. The Territories of Australia; various schools and colleges for the defence services are treated in Chapter XXVI. Defence; the Australian Forestry School is mentioned in Chapter XXIII. Forestry; and other activities which may be considered broadly as educational are described in Chapter XIV. Transport and Communication (Broadcasting and Television) and elsewhere in that chapter.

(ii) *The Commonwealth Office of Education.* This was set up under the *Education Act 1945* to provide advice to the Commonwealth Government on educational matters and to serve as a channel for liaison between Commonwealth and State educational authorities. Some of its major commitments are connected with international relations in education, including the association of Australia with the aims and activities of the United Nations Educational, Scientific and Cultural Organization (UNESCO), and the planning and supervision of training for overseas students given awards by the Australian Government to attend Australian universities and similar institutions. The Office also acts as the administering authority for Australian participation in the Scheme of Commonwealth Co-operation in Education. The techniques of teaching English as a second language is another of its concerns, in connexion with both the assimilation of immigrants and tuition for sponsored foreign students.

(iii) *The Commonwealth Scholarships Board.* The Office of Education also provides the secretariat for the Commonwealth Scholarships Board. This Board under its former title of the Universities Commission was also established by the *Education Act 1945*. Prior to 1945, the Commission had functioned under wartime *National Security Regulations*. The Board consists of a chairman, who is the Director of the Office of Education, and three other members. The main responsibilities of the Board at present are advising the Government on the policy and co-ordinating the administration of the Commonwealth Scholarship Scheme and of Commonwealth Post-Graduate Awards. The Board is responsible for arranging and supervising the training of ex-service personnel and war widows at university and university type institutions under the Commonwealth Reconstruction Training Scheme, the Korea and Malaya Training Scheme and the Disabled Members' and Widows' Training Scheme.

2. **Assistance to Students.**—The Commonwealth Government provides financial assistance to students who are undergoing tertiary training through a number of scholarship schemes, all of which are administered by the Commonwealth Scholarships Board. The most extensive of these is the Commonwealth Scholarship Scheme, under which 4,000 scholarships are offered annually to undergraduates at universities and other approved institutions.

The majority of the undergraduate scholarships are Open Entrance awards allocated amongst the States on a population basis, and awarded competitively on the results of examinations accepted for matriculation in each State. Later Year awards are also available to students who have completed one or more years of a course, and Mature Age awards are available to older persons in the 25 to 30 years age group. All successful applicants have their fees paid. In addition, scholarship holders may be paid a living allowance subject to a means test. As from 1st April, 1962, the maximum rates of allowance have been £383 10s. per annum for a scholar living away from home and £247 per annum when he lives at home.

At 30th September, 1962, 13,782 Commonwealth scholars were enrolled in undergraduate courses including 4,230 new award holders. Up to the end of 1962, 19,462 scholars had completed undergraduate courses under the scheme.

In 1959, a scheme of Commonwealth Post-Graduate Awards tenable at Australian universities was introduced under which 100 awards were made available each year. The benefits comprise a living allowance without means test, and payment of university fees. From 1962, the possible number of Post-Graduate Awards was increased to 125. The Commonwealth Government contribution towards the stipend in respect of each award was at the same time increased from £700 to £800 per annum. Awards may be renewed annually up to a maximum period of four years; in 1962, 266 students were holding awards.

During 1962, the Commonwealth Scholarships Board also continued to arrange and supervise the training of ex-service personnel and war widows at university and university-type institutions. Training of this kind under the Commonwealth Reconstruction Training Scheme was completed at the end of 1961, a total of 21,424 students having completed training. At the end of 1962, 52 students were in training under the Korea and Malaya Training Scheme and the Disabled Members' and Widows' Training Scheme, 30 of them following full-time courses and 22 studying part-time.

3. **International Relations.**—The Commonwealth has been actively involved in the considerable extension which has recently taken place in relations and exchanges with other countries in the field of education. A significant encouragement to this growth has been membership in UNESCO, to which Australia has belonged since 1946 when the organization was founded.

Twelve specialist UNESCO committees in Australia are responsible for a wide and varied programme of activities and have helped to make Australia's contribution to many international conferences and seminars highly effective. Some of the Committees' projects include the organization of Australian and regional seminars, information programmes, and the preparation and circulation of travelling exhibitions which deal with subjects forming part of UNESCO's programme. The Australian National Advisory Committee for UNESCO co-ordinates the work of the specialist committees and advises the Commonwealth Government on Australian participation in UNESCO.

With the co-operation of educational institutions, State Education Departments and other bodies, the Commonwealth has accepted increasing commitments in schemes of international assistance and co-operation. The Colombo Plan Technical Co-operation Scheme, the United Nations Expanded Programme of Technical Assistance, and the Special Commonwealth African Assistance Plan are some of the programmes through which the Commonwealth Government is providing training for overseas students in Australia, and is sending Australian experts and equipment to many of the newly developing countries, especially in Asia and Africa. Australia is also actively sharing with other Commonwealth countries in the Scheme of Commonwealth Co-operation in Education which includes the Commonwealth Scholarship and Fellowship Plan. Other training schemes which the Commonwealth Government has established for developing countries are the Korean Training Scheme and the Australian International Awards Scheme. The total number of sponsored foreign students in Australian institutions in 1962 was 1,146, compared with about 400 in 1955.

Support is given to Australian participation in many international governmental and non-governmental organizations. For example, Australian educationists have attended yearly meetings of the International Bureau of Education, and regular contributions are made to the Bureau's international surveys into various aspects of education. Assistance has been given to bodies such as the Australian Teachers' Federation in sending delegates to meetings of the World Confederation of Organizations of the Teaching Profession.

**4. Grants for other Educational Purposes.**—The Commonwealth gives assistance to various educational schemes and institutions. Grants are made each year by the Commonwealth to the Australian Pre-school Association for the development of kindergarten education, to the Commonwealth National Fitness Council, to the Australian Council for Educational Research, to the Department of Tutorial Classes at the University of Sydney for the publication of the *Current Affairs Bulletin*, and to assist in the provision of training in Occupational Therapy, Physiotherapy and Nursing. The cost of the Departments of Indonesian and Malaysian Studies at the University of Melbourne and the University of Sydney is also met by the Commonwealth Government.

**5. Migrant Education.**—The Commonwealth Government's post-war immigration policy has brought to Australia a large number of immigrants with little or no knowledge of English. To assist their assimilation into the Australian community, a system of migrant education has been developed to teach them English and to give them information about Australia. This service is provided free of charge to immigrants above school leaving age.

Before arriving in Australia, migrants who do not speak English are given some instruction in English by shipboard education officers. Some may have attended classes in Europe organized by the Inter-governmental Committee for European Migration with which the Australian Government co-operates.

In Australia, evening classes are arranged by State Education Departments wherever nine or more migrants in country areas, or twelve or more migrants in city areas, wish to learn English. There is also available through State Education Departments a free correspondence course in English. In addition, English lessons are broadcast regularly by the Australian Broadcasting Commission. The Commonwealth Office of Education provides technical advice on all aspects of migrant education and is responsible for the preparation of teaching materials, while responsibility for the overall supervision of the programme rests with the Department of Immigration, which also meets the costs.

In March, 1962, 17,431 migrants were enrolled in classes and 9,389 were taking correspondence lessons. At the same time, 15,527 were receiving the monthly booklet accompanying the radio lessons. Since the inception of the programme in 1948, close to 500,000 migrants have been enrolled for English tuition.

**6. Technical Training by Government Departments.**—Although the needs of departments for trained staff are met by apprenticeship schemes and other technical college courses and by the universities, some departments provide training which is not available elsewhere. The most important field for which such training is provided is the training of telephone, telegraph, radio and television technicians by the Postmaster-General's Department. In 1961, this Department was training 4,343 technicians-in-training.

## § 12. Adult Education

**1. General.**—The term "adult education" as used in Australia refers mainly to non-vocational educational and cultural activities for adults. While the nature of the recognized adult education authorities varies from State to State, their major activities have many common features. Regular courses of lectures are organized on such topics as literature, music, drama, international affairs, languages and crafts. Some authorities also organize discussion groups, festivals and summer schools, and provide special services for groups in remote areas. In 1960, an Australian Association of Adult Education was formed, and its first Annual Conference was held in Adelaide in 1961. The Association handles matters pertaining to adult education at a national level and arranges liaison with similar bodies in other countries.

One of the first bodies active in the field of adult education in Australia was the Workers' Educational Association, which formed associations in all States in 1913. Its aims are to bring the universities into closer relationship with the community in general and to provide for higher education in civic and cultural subjects. These associations have been superseded by Adult Education Boards or Councils set up by the State Governments in Victoria, Queensland and Tasmania and by the University in Western Australia. In the other two States, New South Wales and South Australia, the associations continue to co-operate with the universities in their extension work and are given direct grants by the governments concerned.

The organization of adult education, and some of the activities in each State are described below.

2. *New South Wales.*—State Government grants for adult education are allocated on the advice of the Adult Education Advisory Board. Grants are made to the University of Sydney (Department of Tutorial Classes), the Workers' Educational Association, the University of New England (Department of Adult Education), the Public Library of New South Wales (Adult Education Section), and the Arts Council of Australia (New South Wales Division).

(i) *University of Sydney.* At the University of Sydney, there are two separate authorities concerned with adult education, the Extension Board and the Department of Tutorial Classes.

The Extension Board provides two forms of education—the extension of existing university education to the public in the form of lectures, or to graduates in the form of refresher courses; and the extension of academic education beyond the existing university curriculum, for example by special courses or classes in subjects such as scientific Russian and scientific German.

The Department of Tutorial Classes works in conjunction with the Workers' Educational Association through the Joint Committee for Tutorial Classes appointed by the university senate, and its activities include the provision of tutorial classes in a wide variety of subjects, discussion groups and "kits" to serve the needs of country districts and people who cannot be catered for by tutorial classes. It also publishes the fortnightly "Current Affairs Bulletin".

In 1961, there were 390 tutorial classes and discussion groups with a total enrolment of 6,684 at the University of Sydney.

(ii) *University of New England.* The Department of Adult Education at the University of New England brings university extension activities especially to the people of northern New South Wales and conducts classes in arts and social sciences in towns throughout this region. Short residential courses are held on topics of interest to primary producers in the area. Vacation schools attract participants from many other areas as well.

(iii) *Workers' Educational Association.* In addition to co-operating with the Sydney University Department of Tutorial Classes, the Workers' Educational Association itself provides classes in a wide variety of fields. It publishes *Highway*, a bi-monthly journal of adult education, and maintains a property near Sydney where short residential schools are held throughout the year. In 1961, the Association ran 69 classes, for which there were 3,164 enrolments.

(iv) *Public Library of New South Wales.* The Public Library of New South Wales Adult Education section provides an adult education library service for all classes and groups conducted by the bodies mentioned above.

(v) *New South Wales Education Department.* The New South Wales Education Department has established Evening Colleges consisting of classes held in school buildings and staffed largely by departmental teachers. Such colleges provide a wide range of educational, cultural and leisure activities for adolescents and adults, and at some there are facilities enabling adults to prepare for Intermediate and Leaving Certificate examinations.

(vi) *Arts Council of Australia.* Adult education of a more informal kind is provided by the New South Wales Division of the Arts Council of Australia which maintains a mobile theatre unit and organizes touring companies in ballet, opera and drama to country towns.

3. **Victoria.**—The Council of Adult Education is a government instrumentality established by the *Adult Education Act* 1946. Its aims are to stimulate adult education in Victoria and to encourage voluntary organizations and associations by giving them advice and assistance. Its activities include a variety of classes, usually lasting from 10 to 20 weeks, on topics ranging from social studies, psychology, language and literature, to crafts, music and drama. An annual 10-day summer school is another important activity. The Council publishes every two months a bulletin, *C.A.E. Newsletter* and a quarterly journal, *Adult Education*. Its group service assists, and provides programme material for, discussion groups formed by organizations and individuals throughout the State. In 1960–61, there were 7,600 enrolments for classes and 2,994 individual enrolments in 277 discussion groups.

A recent development of importance is the extension of the council's activities, including classes and discussion groups, to the prisons, as part of a general plan for penal reform in Victoria.

Through its community arts service, the Council organizes tours by musicians and by theatrical and other companies in country towns which otherwise would have no opportunity of seeing such performances.

The Council's income is derived mainly from a government grant, but also from student fees and Community Arts Service performances.

4. **Queensland.**—The Queensland Board of Adult Education was constituted in 1944 and is responsible under the Minister for Education for the provision of adult education facilities throughout the State. Under the executive officer of the Board are six district officers, one based in Brisbane and five in large country towns, who are responsible for organizing activities in country areas.

The cost of the programme is borne by the State Government and admission to all courses is free. Activities include lectures, group meetings on a variety of topics, generally short-term but some of which extend over a full year, and film screenings. Library and film services are provided.

In 1961, there was a total attendance of 130,288 at 1,590 lectures and class meetings.

5. **South Australia.**—Since 1917, the University of Adelaide, through the Joint Committee for Tutorial Classes, has provided in the metropolitan area a series of tutorial classes, lecture classes and study circles on a wide range of subjects of cultural and current interest, in co-operation with the Workers' Educational Association of South Australia.

In 1957, a Department of Adult Education was established in the University and a full-time Director appointed. A wide range of university extension courses and educational conferences, summer schools and seminars, including a number dealing with subjects at post-graduate level, are organized directly by the University. In 1961, enrolments for tutorial and university extension classes totalled 2,613, for special schools and seminars 1,451, and for discussion groups 334.

The Workers' Educational Association of South Australia, in addition, carries on an independent educational programme of classes, schools, and exhibitions and film festivals.

The State Education Department also arranges an extensive programme of educational activities for adults.

6. **Western Australia.**—Adult education in Western Australia is organized by the Adult Education Board established in 1928 under the terms of the statutes of the University of Western Australia. The Board has a considerable degree of autonomy. Its executive officer is the Director of Adult Education.

The Board conducts, in the metropolitan areas, classes, refresher courses and short schools, conferences, seminars and public lectures, and maintains a library. Classes were held in 1960 with a total enrolment of 1,785. The Board's country work operates mainly through a box library scheme for discussion groups, of which there were 72 in 1960. Lecture tours and week-end schools are held, and local adult education is encouraged through local committees. Metropolitan work and country work are drawn together in an annual summer school. The Board also operates a community arts service and arranges screenings of foreign films. Regional drama festivals and music festivals are arranged, culminating in the annual Festival of Perth, inaugurated and administered by the Board.

7. **Tasmania.**—Some form of adult education has existed since the formation in 1913 of a Workers' Educational Association, which worked in conjunction with the University of Tasmania for a number of years, receiving a grant through the university, which had a Director of Tutorial Classes. Later, the grant was paid direct to the Association by the Government and the university's tutorial department ceased to exist. The Adult Education Board, established under the *Adult Education Act* of 1948, organizes classes of ten weeks' duration on a wide range of subjects. In 1961, 485 courses were held with a total enrolment of 5,199. The Board sponsors special lectures, film screenings and art exhibitions, recitals of music, and dramatic performances in both city and country areas. Its income is derived from a State Government grant and from students' fees.

The executive officer of the Board, located at Hobart, is the Director of Adult Education. Activities are organized on a regional basis by organizers based in Hobart, Launceston and three large country centres.

### § 13. Oversea Students in Australian Educational Institutions

The development of closer ties in education between Australia and other countries, and the demand for education in many countries in Asia, Africa and the Pacific has brought about a remarkable growth in the number of overseas students who come to Australia to further their education. Part of the growth and much of the awareness of the facilities available may be attributed directly to the schemes mentioned in § 11, para. 3. Since 1955, overseas students in Australia have increased from 3,500 to about 12,000 in 1962. Some attend institutions of higher education such as universities and technical colleges, and Australian qualifications are receiving increasing acceptance and recognition as students return home on the completion of their courses. Between 1955 and 1962, the numbers in institutions of higher education have risen from about 1,500 to 5,600, most of whom came from Asian countries. Australian institutions have shown a readiness to accept overseas students, and in many cases special provisions have been made to suit their needs. Nevertheless, population growth and the demand for education, especially for higher education, within Australia have forced many institutions to restrict the admission of overseas students in common with Australian students.

### § 14. Organizations Associated with Education

1. **Australian Council for Educational Research.**—The Australian Council for Educational Research, a non-governmental body, is engaged on educational research in a wide variety of fields, ranging from tertiary to pre-school education. It conducts surveys and inquiries, makes grants to approved educational investigators, serves as a centre for disseminating educational information, provides training for research workers, and standardizes and distributes educational and psychological tests for use in Australia. Although this council is an autonomous body, the Commonwealth and State governments contribute substantial financial support.

2. **The New Education Fellowship.**—The New Education Fellowship is a world organization of parents, educators, and other citizens interested in the development of new educational practices. It was founded in London in 1915 and spread to Australia at the time of a regional conference held here in 1937. There are now sections in each State. Its Australia-wide journal *New Horizons in Education* is published quarterly. A major conference of the New Education Fellowship was held in Australia in 1962, during which prominent educationists from Australia and overseas met in all States.

3. **Australian College of Education.**—The Australian College of Education was formed in 1959. Its aim is to bring together leading teachers and administrators in every field of education, to raise the standard of the profession of education in Australia, to establish and proclaim fundamental educational values, and to recognize outstanding contributions to educational practice. Chapters of the College have been set up in all States, and several of the addresses and papers delivered at meetings of the College have been issued in published form.

4. **Parent and Citizen Organizations.**—In Australia, where all government schools are administered by central departments, there is limited opportunity for local administration of education. Public interest is expressed through parents' committees or organizations of parents and other citizens interested in supporting their local school. The Education Acts of all States provide for the formation of groups of this type, whose aims are to promote the interest of the school by bringing parents, pupils and teaching staff together, to help provide supplementary teaching aids and recreation materials, to foster the regular attendance of children at school, and to help find accommodation for teachers.

In several States, the general maintenance of school buildings, equipment and grounds is a statutory responsibility of the parent groups, costs being covered by government grants. Lunch canteen services at local schools are maintained by groups in some States.

A notable achievement of the parent groups has been the establishment of school children's insurance schemes, operated through State government insurance offices or private insurance companies. These schemes cover accidents to children which occur between the time of leaving home for school and returning home by the usual direct route.

State-wide councils or federations of parents' groups are associated in a federal body, the Australian Council of School Organizations.

## CULTURAL ACTIVITIES

### § 1. Libraries

1. **General.**—The Munn-Pitt report of 1935 greatly stimulated interest in libraries and librarianship throughout Australia. This is seen in the rapid development of libraries, the passing of legislation in all States to increase library services, and the establishment in 1937 of the Australian Institute of Librarians to improve the standard of librarianship. This body was reconstituted in 1949 as the Library Association of Australia, and its functions now include the promotion and improvement of libraries and library services. The Association conducts annual examinations for which students are prepared by courses of instruction in all States. Formal library schools exist in the Commonwealth National Library, Canberra, and the Public Libraries at Sydney and Melbourne. In 1960, the first library school to be attached to an Australian University was opened. This is in the University of New South Wales.

2. **Commonwealth.**—(i) *National Library of Australia.* This Library grew directly from the Library of the Commonwealth Parliament established in Melbourne in 1901, the Committee of which soon afterwards announced its intention to develop a library patterned on the Library of Congress at Washington, U.S.A., capable of serving purposes beyond those essential to the Parliament itself, appropriate to a national library and on a national scale. This policy was steadily pursued, so that, in addition to its primary function of serving Parliament, it gradually became a central source of information for the Government and its departments and other agencies, and assumed increasing reference and bibliographical responsibilities in relation to scholarship and research in Australia and abroad. It was also influenced by the basic elements of the national library concept of the older countries of Europe: namely, that a national library is the proper place to collect the national literature systematically and to make it known and available for use, and that it is a place to which scholars may turn for what is most significant in the literature of other countries. For these growing extra-Parliamentary activities, the Parliamentary Library Committee, in 1923, adopted the title of Commonwealth National Library.

A committee appointed to examine the future control and functions of the Commonwealth National Library recommended, in 1957, its establishment as the National Library of Australia, separate from the Parliamentary Library, with wide functions and controlled by a board subject to a Minister; the transfer, as a separate agency to an appropriate department, of its Archives Division, which constituted the Commonwealth's agency for the custody and organization of departmental records of permanent value which need no

longer be held within departmental offices; and that the Parliamentary Library be a separate library under separate Parliamentary control. Continuing co-operation, where possible, between the two libraries was also proposed.

Effect was given to these recommendations by the *National Library Act 1960*, which created the National Library of Australia as a body corporate under the control of a Council of nine members, of whom one is a Senator elected by the Senate, one a member of the House of Representatives elected by that House, and seven appointed by the Governor-General. Its functions are:—to maintain and develop a national collection of library material, including a comprehensive collection relating to Australia and the Australian people; to make the national collection available to such persons and institutions in such manner and subject to such conditions as the Council determines with a view to its most advantageous use in the national interest; to make available such other services in relation to library matters and material, including bibliographical services, as the Council thinks fit, and in particular for the purposes of the library of the Parliament, the Departments and authorities of the Commonwealth, and the Territories of the Commonwealth; and to co-operate in library matters (including the advancement of library science) with authorities or persons, whether in Australia or elsewhere.

The National Library comprehensively collects and preserves Australian books, periodicals, newspapers, government publications, pictures, prints, manuscripts, maps, moving picture films and sound recordings. In this, it has been assisted by the deposit provisions of the *Copyright Act 1912-1950*, and has also been enriched by the acquisition of such notable collections as the Petherick collection of 16,500 items in 1911, the Cook manuscripts in 1923, the Cumpston collection on Public Health in Australia in 1936, the Mathews Ornithological collection in 1940, the Nan Kivell collection of 16,000 items of Australian and Pacific interest including original paintings, prints, manuscripts and printed material in 1959, and the Ferguson Sociological collection which is still under transfer. A feature of the Library's Australian work is the copying on microfilm, in association with the Public Library of New South Wales, of all important unique material overseas relating to Australia, including over three million pages in the Public Record Office in London.

The Library maintains a permanent exhibition of selected paintings, prints and other historical material from its collections. This exhibition is displayed in Parliament House, Canberra.

The Library publicizes Australian publications, both at home and abroad, through select lists which include *Australian Books* (annual), and *Australian Public Affairs Information Services* (a monthly subject index with an annual cumulation), and by collections of Australian books maintained by it at all posts at which Australia is officially represented abroad. In London and New York, the National Library maintains and staffs Australian Reference Libraries supervised by its own Liaison Officers in those centres.

In the discharge of its wider bibliographical responsibilities, the Library publishes the *Australian National Bibliography* (monthly with an annual cumulation), which lists books, pamphlets, maps, prints, sheet music, government publications, the first issue of each new periodical or newspaper, and moving picture films produced in or relating to Australia. Commonwealth and State official documents, both monographic and serial, are listed in *Australian Government Publications* (annual). The Library is also building up a union catalogue of serials in the social sciences and humanities, and of monographs in Australian libraries.

In 1956, the Australian Bibliographical Centre was established within the National Library to serve as the secretariat of the Australian Advisory Council on Bibliographical Services. The Council, made up of representatives of the National Library, State libraries and library boards, the Commonwealth Scientific and Industrial Research Organization, each of the universities, and the Library Association of Australia, plans the further development and co-ordination of bibliographical services and co-operates with UNESCO and the International Advisory Committee of Bibliography. The Centre organizes bibliographical projects recommended by the Council, and operates as a centre for bibliographical information in Australia and overseas. It has published a *Union List of Newspapers in Australian Libraries*; Part 1: *Newspapers published outside Australia* (1959); and Part 2: *Newspapers published in Australia* (1960).

The Library acts as a central library of documentary and educational films, its film collection containing over 6,000 titles, together with Australian historical films and a great number of film strips. It published *Australian Films: a Catalogue of Scientific, Educational and Cultural Films*, 1940-58 in 1959 and annual supplements in succeeding years. A revised edition of the *Catalogue of 16-mm. Films*, which lists all films available for loan, was also published in 1960 and has been supplemented by annual accession lists. Special efforts are being made to discover and preserve samples of early Australian film production.

Through its Extension Division, the Library conducts the Canberra Public Library Service for residents of the Australian Capital Territory, to whom 692,000 books were loaned during 1961-62. It also assists in the provision of similar services in the Northern Territory, the Territory of Papua and New Guinea, and Norfolk Island.

The National Library's collections contain approximately 729,000 volumes, 32,000 pictures, prints, drawings and other graphic materials, one million feet of microfilm, 65,000 maps, and nine million feet of moving picture films. Special features of the book collection are its strong holdings of Australiana, materials relating to the Pacific area and east and south-east Asia, the publication of foreign governments and international organizations, and works in the social sciences, particularly in political theory and economics.

(ii) *Patent Office Library.* The Library of the Commonwealth Patent Office, Canberra, contains approximately 9,000 books and a wide variety of periodicals and other literature relating to pure and applied science, industrial technology and the industrial property (patent, trade mark, design and copyright) laws and practice of most countries. Patent specifications of inventions are received from the principal countries of the world; present holdings are more than 7,000,000. Indexes include a microfilm of a classified index to 3,000,000 U.S.A. patents and translations of abstracts of U.S.S.R. patents.

(iii) *The Commonwealth Archives Office.* In 1943, following a report by an Inter-departmental Committee, the Prime Minister directed the formation of a War Archives Committee to arrange for the preservation of war records. This Committee recognized that war archives could not be separated from peace-time archives and in 1946 the name was changed to the Commonwealth Archives Committee. In 1952, the National Library became the sole Archival Authority for the Commonwealth and the Chief Archives Officer became the Executive Officer for the Committee. In March, 1961, in accordance with a recommendation of the National Library Inquiry Committee, the Archives Division of the National Library was re-constituted as the Commonwealth Archives Office within the Prime Minister's Department.

The Archives Office is primarily a central agency for the control of those records created by the Commonwealth Government which are no longer required for frequent use in the day-to-day business of government. This function is carried out through the following three basic activities.

*Control of Destruction.* No Commonwealth records may be destroyed without the concurrence of the Chief Archivist whose responsibility it is to safeguard reference interests other than those of the department which compiled the records. This concurrence is given as far as practicable through continuing disposal authorities which enable Commonwealth departments to destroy certain routine classes of records automatically, but records not covered by such continuing authorities are checked before destruction is authorized.

*Provision of Accommodation.* Any records which are no longer in active use but which are considered, either by the originating department or by the Archives Office, to warrant preservation, either permanently or for a further period, may be transferred to an archives repository. While in archival custody, they are arranged and described so that the best use can be made of them.

*Provision of Information.* Records in the custody of the Archives Office are available for use by the depositing and other departments of the Commonwealth Public Service. The Office also provides departments with a service for the provision of information from the records in its custody.

As a complementary function, the Office also provides a service to persons engaged in academic and other forms of research. The headquarters of the Commonwealth Archives Office is in Canberra, for the time being in the National Library Annexe. There are also branches in Sydney, Melbourne, Brisbane, Adelaide and Perth.

(iv) *Commonwealth Scientific and Industrial Research Organization.* The library holdings of the Organization cover the pure and applied sciences. In addition to the Head Office Library in East Melbourne, each of the Divisions and Sections has a specialized collection covering such subjects as food preservation, forest products, chemistry, physics, animal health and fisheries. The collections are particularly strong in the publications of overseas scientific and technical research institutions, with many of which extensive exchange arrangements have been made.

The Head Office library maintains a union catalogue of the holdings of all C.S.I.R.O. libraries, and is responsible for the following publications:—*Scientific Serials in Australian Libraries*; *Australian Science Index*, an index of articles published in Australian scientific and technical periodicals; and *C.S.I.R.O. Abstracts*, which include abstracts of papers published by C.S.I.R.O. officers, C.S.I.R.O. translations, translations available from other Australian organizations and additions to the British Commonwealth Index of Scientific Translations.

The larger libraries in the Organization have photocopying facilities which, while normally for internal use, will provide a service for the public when a publication is not held elsewhere in Australia.

(v) *The Australian War Memorial Library.* In the War Memorial library are housed the documentary and pictorial records of Australia's fighting services in the 1914–18 and 1939–45 Wars, together with collections covering the war in Korea, 1950–53, and earlier wars in which Australian troops participated—Sudan, 1885; South Africa, 1899–1902; and the Boxer Rebellion in China, 1900–01. Books, periodicals and other records covering contemporary trends and events in the fields of military history and military science are constantly being added.

The printed records section contains approximately 65,000 volumes, a large collection of military maps, newscuttings and newspapers, sound recordings of war leaders, personalities and events, war posters and postage stamps. Many personal collections by distinguished soldiers and historical documents relating to the wars have also been placed in the Memorial's custody for preservation.

Written records comprise correspondence files of headquarters and units of both World Wars, and the original war diaries compiled from day to day by each unit during its service.

The collection of official war photographs covering the 1914–18, 1939–45, and Korean Wars numbers over 250,000, and a collection of official motion picture film depicts Australia at war.

Facilities for public research are not yet fully developed, but requests for information are met where practicable.

(vi) *Other Commonwealth Government Libraries.* Most Commonwealth authorities have specialized collections in their own fields, and in addition draw largely on the National Library.

(vii) *Northern Territory Library Service.* The Northern Territory Library Service maintains four centres in the Territory. At 30th June, 1962, stocks totalled 46,057 volumes which were held at the following centres:—Darwin, 24,480; Alice Springs, 14,578; Tennant Creek, 3,908; Katherine, 3,091.

3. *States (Other than University Libraries, for which see p. 767).—(i) State Public Libraries.* In each of the capital cities, there is a well-equipped public library, the libraries in Melbourne and Sydney especially comparing very favourably with similar institutions elsewhere in the world. The following statement gives the number of volumes in the public library of each capital city at 30th June, 1961. Later figures for some of the libraries are given in the text relating to the respective libraries.

## STATE PUBLIC LIBRARIES, 30th JUNE, 1961

City	Number of volumes in—			Total
	Reference branch	Ordinary lending branch	Country lending branch	
Sydney .. .. .	(a) 601,053	..	(b) 110,000	711,053
Melbourne .. .. .	678,555	120,046	46,319	844,920
Brisbane .. .. .	144,442	..	68,971	213,413
Adelaide .. .. .	199,095	(c) 75,540	125,471	400,106
Perth(d) .. .. .	191,039	(e) 222,201	..	413,240
Hobart .. .. .	81,814	(f) 148,371	139,401	369,586

(a) Includes 172,820 volumes in the Mitchell Library and 16,083 volumes in the Dixon Library.  
 (b) Includes 1,943 volumes in the model school library.  
 (c) Includes 26,930 volumes in the children's branch and 10,464 volumes in the youth lending branch.  
 (d) Figures for Library Board of Western Australia; separate details for Perth are not available.  
 (e) Public libraries and circulation stock.  
 (f) Includes 120,492 volumes in the children's branch.

(ii) *New South Wales.* The Free Library movement in New South Wales, founded for the establishment of a system of public libraries on the basis suggested in the Munn-Pitt Report of 1935, helped to pave the way for the *Library Act* 1939, which was fully proclaimed as from 1st January, 1944. Of the 175 councils which have adopted the *Library Act*, 159 have put their adoption into effect. During 1961-62, they spent on their libraries £1,415,917, including £407,339 received in subsidy. There are 205 libraries, of which 58 are in the metropolitan area and 147 in the country. There are also 16 bookmobiles, of which two are in Sydney, seven in the suburbs of Sydney and seven in country municipalities and shires. These libraries contain 2,402,940 volumes.

New South Wales departmental libraries are staffed by officers attached for duty from the State Library, which also provides a central cataloguing service for municipal and shire libraries constituted under the 1939-1959 Act. The State Library maintains an adult education section servicing adult education activities for the universities of Sydney and New England and the Workers' Educational Association.

The Country Circulation Department forwards books on loan to State schools, to municipal and shire libraries and to individual students. During 1961-62, 100,376 books were lent to small State schools, and 2,416 to country libraries, while 48,156 reference works were lent to individual country students and to libraries to satisfy special requests.

The State Library, known as the Public Library of New South Wales, includes a general reference department of 426,080 volumes, together with the Shakespeare Tercentenary Memorial Library, and the Mitchell and Dixon Libraries and Galleries which are mainly devoted to Australian and Pacific material. The Mitchell Library, of more than 60,000 volumes and pamphlets and 300 paintings, was bequeathed to the trustees of the Public Library in 1907 by Mr. D. S. Mitchell, together with an endowment of £70,000. There are now 179,776 volumes in the library, in addition to valuable manuscripts, maps and other material. In 1929, Sir William Dixon gave a collection of historical pictures then valued at £25,000. These were subsequently added to, and at his death in 1952 Sir William bequeathed the whole of his collection of books, manuscripts, pictures and other material, together with an endowment of more than £113,000, mainly for the printing or reprinting of historical documents relating to Australia and the Pacific.

The total number of volumes in the State Library now exceeds 730,000, apart from manuscripts, historical pictures and other material.

The maintenance and control of the ordinary lending branch of the Public Library were transferred in 1908 to the Sydney Municipal Council to become the City of Sydney Public Library.

The State Library, which had previously been the repository for State archives, transferred this responsibility to an Archives Authority in June, 1961. The Authority consists of nine members, one of whom the Trustees of the Public Library have a right to nominate.

Other important libraries in New South Wales are:—the Sydney Public Library, 211,782 volumes; Teachers' Colleges, 210,181; Railway Institute, 165,141; Technical Education Branch, 93,392; Government Transport Institute, 36,770; Australian Museum, 33,336; New South Wales Public School Teachers' Federation Library, 21,000; Workers' Educational Association, 13,579; and the Library at the National Herbarium, 10,120 volumes. At 30th June, 1962, the Parliamentary Library contained 142,187 volumes.

(iii) *Victoria*. Until the establishment of the Free Library Service Board in 1947, the only public library facilities available in Victoria (apart from those of the Public Library and one or two Metropolitan Municipal Libraries) were those offered by about 200 Mechanics' Institute Libraries situated in country areas all over the State. The Board's policy has been to replace these services with modern public libraries controlled by local Municipal Councils and subsidized by the Board. Since the Board's inception, 99 municipalities have established libraries. Of these, 23 are in the city and 76 in the country. An amount of £349,000 was paid to the Councils in library subsidy for the year 1961-62 and £698,000 was expended in municipal library services for the same year. More than 1,500,000 books are available to the communities in which libraries are established.

A feature of the services provided in the country is the number of co-operative or regional library groups now being developed. These services, of which there are fifteen, comprising a total of 59 councils, consist of groups of councils which pool their financial resources, book-stocks and trained staff, in order to provide more comprehensive, efficient library facilities. Approximately 140 Mechanics' Institute Libraries are still in existence in country areas. In 1961-62, 45 of them shared a grant of £2,000.

The Public Library of Victoria was established in 1856. It is controlled by a board of seven trustees and receives its finance from the State Government. The reference collections now total about 680,000 volumes, and the lending library has another 170,000 volumes. In addition, the library files 2,500 current periodicals and 500 newspapers, in all about 35,000 volumes. Special collections include the J. K. Moir Collection of Australiana, the M. V. Anderson Chess Collection and the Green and Brodie Shipping Collections. The Victorian Historical Collection contains nearly 20,000 pictures, drawings, prints and objects of historical interest. The Archives Division is responsible for the preservation of government records.

(iv) *Queensland*. The Library Board of Queensland was established in 1945 under the provisions of the *Libraries Act* 1943. Its duty is to attain the fullest co-operation and improvement of the library facilities of the State, with the object of placing such facilities on a sound basis for the benefit and educational improvement of the citizens generally. The Board consists of eight members including the State Librarian as *ex officio* member and secretary. A general function of the Board is to ensure that the fullest co-operation exists with the Department of Education, the University of Queensland, local bodies, and other bodies having for their object the encouragement of education, literature and the arts and sciences. A specific function of the board is the control and management of the Public Library of Queensland. Its policy is to build up the main collection of the Library as the State's reference centre.

The Country Extension Service, which is administered as a department of the Public Library, lends books of non-fiction free to adults and children residing outside the metropolitan area and to municipal libraries in areas of low population.

The Oxley Memorial Library, established in 1923, has been administered as a department of the Public Library since 1946, and the collection has been kept separate. It contains books, manuscripts, pamphlets and other graphic material relating to the history and literature of Australia, and of Queensland in particular, and provides facilities for research students in Queensland literature and history.

In 1958, the section of the *Libraries Act* dealing with the preservation of public records was proclaimed, and in 1959 an Archives Section of the Public Library was instituted and an archivist appointed.

Since 1948, a course in librarianship has been held annually at the Public Library for the purpose of preparing trainees for the examinations of the Library Association of Australia, up to 1961 for its Preliminary Examination, from 1962 for subjects 1-3 of its re-organized

**Registration Examination.** In 1959, a course covering some compulsory subjects of the Association's Registration Examination was inaugurated at the Central Technical College, Brisbane.

The holdings of the Public Library of Queensland and its extension services in 1961-62 were:—main reference collection, 131,958 volumes and 7,230 maps and pamphlets; country extension service, 73,208 volumes; Oxley Memorial Library, 21,097 volumes and 10,123 maps, pamphlets and miscellaneous items.

Local authorities are empowered by the *Libraries Act* to establish and conduct library services as a function of local government. The Board encourages local authorities to use these powers. In 1961-62, 66 local authorities were conducting 102 library services. The Brisbane City Council has established 12 of these libraries. There were 80 libraries in Queensland free to adults.

To help overcome the problems of large area and sparse population, various local authorities provide library services on a regional basis. By 30th June, 1962, four regional library services had been established:—the South Western (seven shires), the Central Western (seven shires), the North Western (seven shires), and the Central Highlands (five shires), with head-quarters at Charleville, Barcaldine, Mt. Isa and Emerald respectively. Other regional services are being planned.

During 1961-62, the Board received a grant of £217,414 from consolidated revenue to finance the activities of the Public Library and to pay subsidies to local bodies of fifty per cent. on the purchase of books and the acquisition or improvement of library buildings and equipment. Subsidies were paid to four regional library service boards, 43 local authorities, 37 schools of arts and four other bodies.

The library of the Parliament of Queensland was established in 1860. At 30th June, 1962, the library held 90,677 books and pamphlets, consisting of official publications and books devoted largely to history, the social sciences, biography and literature.

The *Libraries Act Amendment Act* 1949 provides for the Public Library and the Parliamentary Library each to receive a copy of all books, pamphlets, maps and other printed material published in Queensland.

(v) *South Australia.* In the reference department of the Public Library of South Australia, there are about 207,000 volumes, most of which may be borrowed. Over 3,000 periodicals are filed, and the collection of newspapers includes every newspaper printed in South Australia. There are 40,000 volumes in the lending department available to persons living in the metropolitan area, and the country lending service has 153,000 volumes, of which more than half are suitable for children.

The Research Service specializes in scientific and technical inquiries, and supplements the resources of the Public Library by borrowing from other libraries and by obtaining microfilm copies of material not available locally. It has an extensive collection of trade catalogues.

The library of the Parliament of South Australia held approximately 65,000 volumes at 31st December, 1961.

There are eleven local public libraries in South Australia provided by eight local government authorities. The libraries are subsidized on a £1 for £1 basis by the State Government. The Library Board of South Australia, through the Public Library of South Australia, provides various central services. Book-stocks are pooled in the Public Library of South Australia and are interchanged between the libraries.

At the end of June, 1962, these local public libraries contained 59,000 books. There were 38,000 registered borrowers. In the year 1961-62, 584,000 books were lent.

(vi) *Western Australia.* In 1955, the Library Board of Western Australia was made responsible for all public library services throughout the State to which the State Government contributes funds.

The Board has the following major functions:—to encourage local authorities throughout the State to establish public libraries, and to provide as a State subsidy all books and bibliographical services necessary for such libraries when established; to administer the State Library; to advise the Government on all matters relating to libraries; and to provide for the training of librarians.

Local public libraries are subsidized on a £1 for £1 basis, the local authority providing accommodation and staffing, and the Board all books and related services. The Board provides at least one volume per head of the population. All non-fiction books may be made available at any public library throughout the State on request to the Board. All cataloguing is done by the Board. The first library under this scheme was opened in August, 1954. By 30th June, 1962, 60 libraries had been established.

The State Library, established in 1887, is the reference division of the Library Service of Western Australia. In addition to providing the normal facilities of a reference library for the metropolitan area, it extends its service throughout the State through local public libraries. It is divided into four subject departments as follows:—J. S. Battye Library of West Australian History; Library of Business, Science and Technology; Library of Social Sciences, Philosophy and Religion; Library of Literature and the Arts.

The State bibliographical centre is housed at the State Library and there is also a commercial information centre. The State archives are maintained by the State Library and managed by the staff of the Battye Library. The State Library is fully equipped with microfilm and photocopy apparatus.

The book-stock of the Board at 30th June, 1962, was approximately:—lending library services (including books in public libraries), 270,617 volumes; State Library, 197,144 bound volumes.

The University of Western Australia, through its Adult Education Board, manages the Adult Education Library of some 18,000 volumes of general reading and fiction. Books are sent to country readers each month.

There are some 100 special libraries in government departments and industrial firms. Union catalogues of periodicals and books received in the libraries in Western Australia are maintained by the Library Board of Western Australia in the bibliographical centre of the State Library.

(vii) *Tasmania*. The Tasmanian Library Board, constituted in 1944, is responsible for administering the State library headquarters in Hobart, for the extension of library services throughout the State, for the control of State aid to libraries and for the State Archives. The first stage of a new State Library headquarters building in Hobart was completed in 1962. The State Government provided £141,038 towards the cost of library services in 1961–62.

Municipal libraries are assisted with the purchase of books and participate in a book exchange scheme. In 1962, 45 municipalities took part in the service, leaving only four outside the scheme. In Hobart, the Board operates the Hobart Lending Library on behalf of the City Council. Two bookmobiles operate in Hobart and country districts, catering for areas without library premises, for children, old people's homes, etc.

The Board also operates a Reference Library in Hobart from which reference services are available to people throughout the State. There is also a documentary film library and a recorded music library. The Board arranges screenings of documentary films, recitals of recorded music, lectures, library weeks in country centres, puppetry demonstrations, etc.

The Parliamentary Library works in close collaboration with the State Library, which provides a reference officer to serve members during sessions.

**4. University Libraries.**—(i) *General*. These libraries provide material not only for the education of graduates and undergraduates, but also for research workers and practical investigators all over the continent. Much of the material they contain is not available elsewhere, for although in most cases smaller, they are in many directions more highly specialized than the public libraries. They lend to one another and to State and private institutions as well as to individual investigators. Each of them is governed by a librarian, who is responsible as a rule to an executive sub-committee and a committee which is practically co-extensive with the professorial staff.

The following table shows the volumes held, accessions during the year, and expenditure of the Australian university libraries.

## UNIVERSITY LIBRARIES, 1961

University				Volumes	Accessions during year	Expenditure
						£
Australian National University .. ..				251,719	21,766	124,119
Sydney .. ..				692,629	76,043	191,542
New South Wales .. ..				176,152	35,177	192,501
New England .. ..				115,403	12,650	63,158
Melbourne .. ..				300,366	19,032	202,204
Monash .. ..				28,000	18,000	174,000
Queensland(a) .. ..				236,993	24,954	126,129
Adelaide(a) .. ..				265,583	15,161	130,523
Western Australia(a) .. ..				193,484	14,510	88,643
Tasmania .. ..				134,000	8,203	62,617
Total .. ..				2,394,329	245,496	1,355,436

(a) Excludes pamphlets.

(ii) *Australian National University.* This library consists of two main collections; the former Australian National University Library, founded in 1948, which serves primarily the Institute of Advanced Studies, and the former Canberra University College library, founded in 1938, which serves primarily the School of General Studies. At the end of 1962, the stock comprised about 288,000 volumes including some 55,000 volumes in oriental languages. The collection serving the Institute of Advanced Studies specializes in the fields of the physical and medical sciences, excluding clinical works. In the social sciences, it aims to provide a good working collection while giving consideration to the holdings of the Commonwealth National Library. It possesses significant collections in anthropology, linguistics, mathematics and mathematical statistics. The collection serving the School of General Studies has been built up to meet the needs primarily of undergraduates studying arts, economics, law, oriental studies and science.

(iii) *University of Sydney.* The library consists of the central collection which is known as the Fisher Library, the Law Library, the Medical Branch Library, the Burkitt Library for pre-clinical medicine, and some fifty-two departmental libraries. The University Library, together with departmental libraries, held 776,548 volumes in December, 1962. Associated libraries in the University grounds bring the grand total to 1,028,483 volumes.

The first books were acquired in 1851, and shortly afterwards the library of Sydney College was added. The collection of Nichol D. Stenhouse was acquired in 1878 as the gift of Thomas Walker. In 1885, Thomas Fisher bequeathed the sum of £30,000, the income from which is used as a book fund. The Fisher Fund was matched in 1961 by establishment of the W. H. and Elizabeth M. Deane Library Fund. Perhaps the finest collection in extent and importance which has been given to the University is that of Sir Charles Nicholson. There have been numerous other benefactions, among which may be mentioned the library of Sir Francis Anderson, the W. H. Deane collection of books and manuscripts and the Dalley-Scarlett music library. In 1961, the University acquired the English literature collection of the late Hugh Macdonald. Sydney University Library has an extensive collection of mediaeval manuscripts and early printed books.

(iv) *University of New South Wales.* The libraries of this University consist of the Central Library at Kensington, and a Bio-medical Library at Kensington. There are also libraries at Newcastle and Wollongong University Colleges. The Broadway campus is serviced by the Sydney Technical College Library, where about 37,000 books from the University's library are placed. Service to university divisions at Broken Hill and Granville is also provided by the Department of Technical Education. In December, 1962, the university had approximately 232,600 volumes in its libraries and in Department of Technical Education libraries.

(v) *University of New England.* The Library was founded in 1938, when the New England University College was established. Sir William Dixon was its first benefactor. The library is now housed in a three-storied building, air-conditioned and containing all facilities. The library has approximately 120,000 volumes and receives 3,000 current periodical titles annually. The library is able to accommodate 200 readers and 278,000 volumes. A fourth floor is to be built later to house a further 120,000 volumes. The building also houses a bindery, photographic and archives division. The library has its own training officer and conducts formal courses in librarianship.

(vi) *University of Melbourne.* Early in 1854, the first allocation for books was made, but the library was housed in temporary quarters until 1959. The W. L. Baillieu Trust made available the first instalments of a £100,000 gift for building purposes, which have been followed by subsequent gifts and substantial grants from the Commonwealth and State governments, and a new building costing £700,000 was occupied at the beginning of 1959, the first in the University to be designed specifically for library purposes. It provides space for 1,300 readers and 300,000 books. During the academic year, admissions of readers to the building average 8,000 a day. Most of the books are accessible on open shelves, and though the library is intended primarily for reference purposes, borrowing, except of textbooks and certain valuable volumes, is made as easy as possible. The resources of the library are also used extensively on inter-library loan by industries and other organizations throughout Australia. The University Library, including 13 branch libraries in various departments, is administered from the centrally situated Baillieu Library, and at the end of 1962 it contained approximately 340,000 books and pamphlets. The large medical branch library is specially rich in periodicals.

(vii) *Monash University.* The library started to acquire books in 1960 and now has approximately 90,000 volumes and subscribes to 2,000 journals. It has been decided that the library organization will develop into four large units—the main library, a bio-medical library, a law library, and a library for physical sciences and engineering. The last named was occupied in January, 1962, but is functioning as the main library until that building is ready for occupation towards the end of 1963. The physical science and engineering library has been named the Hargrave Library after Lawrence Hargrave (1880–1915) and was officially opened on 15th December, 1962.

(viii) *University of Queensland.* The library was founded in 1911. The main library is in its own building in the University at St. Lucia, and there are a considerable number of departmental libraries. All books are open to access and most are available for borrowing. At 31st December, 1962, the library contained more than 289,000 volumes. Among the more important possessions of the library are its large holdings of periodicals, its geology collection, and its material relating to the history, development and culture of the countries surrounding the Pacific Ocean.

(ix) *Adelaide University.* This library bears the title of its original benefactor, Robert Barr Smith, who, with members of his family in and after 1892, gave the university over £50,000 for the library. Although readers have access to all parts of the library, the book collection is in two divisions, a collection of some 25,000 of the most frequently used books being kept in the main reading room, and the remainder, consisting of older or more specialized books, being shelved on the four levels of the extensions. Bound periodicals are shelved in steel stacks under the main reading room. Borrowing facilities are available to all matriculated students, to country students, and to graduates. There are branch libraries for medicine, law and music. The Australian Medical Association (S.A. Branch) and the Australian Physiotherapy Association (S.A. Branch) make annual contributions towards the maintenance of the medical library in return for borrowing privileges for their members. The Waite Agricultural Research Institute has a separately administered library of publications in agriculture.

(x) *University of Western Australia.* The first permanent library staff was appointed in 1927. Provision for a permanent library was not possible when the university moved to its present site, and space and facilities have consequently been inadequate. The first stage of the new library building, now under construction, is expected to be completed by October, 1963. The University Library developed very slowly in the early years, but recently has been adding about 12,000 volumes a year to its stock and making good earlier deficiencies. In addition to the Central Library, there are a number of departmental libraries of which the more important are engineering, agriculture, pre-clinical and law. There is also a medical library, in accommodation provided by the Royal Perth Hospital, for the use of the medical school.

(xi) *University of Tasmania*. Although this library was founded in 1893, a full-time librarian was appointed for the first time at the end of 1945. Since 1954, a Hobart Union List of Serials has been housed in and kept up to date by the University Library, thus providing a major reference tool for all bibliographic inquiries in the State. At the end of 1962, the library contained approximately 143,000 volumes. It receives 2,500 periodicals currently. The University Library also collects private and business archives and it has some important classical manuscripts as well as a collection of early printed books.

5. *Children's Libraries and School Libraries*.—(i) *New South Wales*. Children's libraries are being developed as departments of municipal and shire libraries. The Education Department maintains a school library service for the fostering of State school libraries, which are maintained partly by parents' and citizens' associations and partly by departmental subsidy. Secondary and central schools have trained teacher librarians.

(ii) *Victoria*. Under the auspices of the Free Library Service Board, 99 municipal children's libraries have been, or are being, established as part of the library services provided by the councils concerned. All these libraries provide comprehensive modern children's book collections which are constantly being augmented. An annual grant of £5,000, which is additional to the ordinary annual municipal library grant, is provided to assist these libraries. In addition, nine independently controlled children's libraries shared in this grant in 1961.

The Education Department is making provision for the building of library rooms in new schools. Where accommodation is available in existing schools, library furniture is provided free of cost to the schools and the government subsidizes the purchase of books. In June, 1961, 367 schools had central libraries.

A scheme of circulating libraries for small schools, particularly in remote areas, has been operating for some years. Two hundred and twenty-five schools benefited from this scheme in 1961.

The Department has a Library Service Officer with a small staff to advise and assist schools in the establishment and organization of libraries. A one-year course for the training of teacher-librarians was established at Melbourne Teachers' College in 1955. Approximately 25 teachers are trained each year.

(iii) *Queensland*. The Library Board of Queensland stresses to local bodies the importance of providing adequate library services for children. There are in Queensland 97 libraries free to children, of which 10 are conducted by the Brisbane City Council. The children's libraries at Rockhampton, Toowoomba, and Townsville are particularly active. Country children who are not catered for locally may borrow from the Country Extension Service which possesses a separate children's collection. The purchase of books in State school libraries in Queensland is financed by school committees and parents' associations, with a subsidy from the Department of Education on a £1 for £1 basis. Trainees at the Teachers' College are instructed in school library organization and management.

(iv) *South Australia*. A children's library of 27,000 volumes is used by school classes and individual children living in the metropolitan area. Except for works of reference, all books are available for loan. In August, 1957, a youth lending service was opened for young people from 13 to 18 years of age. It has a stock of 12,000 volumes.

(v) *Western Australia*. The Education Department provides library services and makes library subsidies and grants to schools. Advisory, central cataloguing and central repair and binding services are provided by the Library Services Section. The Teachers' Colleges provide courses in school library organization and management.

The Perth Technical College and Technical Schools are equipped with libraries, and an allocation for books is provided annually for each school and college department. A librarian at the College provides central ordering and cataloguing services throughout the Technical Division.

All high schools are provided with a library room and furniture, and trained teacher librarians are appointed to them. Building plans do not provide for primary school libraries, but a number of the schools have set up central libraries when rooms have become available.

One-teacher and two-teacher schools are served by the Charles Hadley Travelling Library and the Small Schools Fixed Library Schemes. Under the Fixed Library Scheme, grants are made once every three years to each school to provide additional books for the permanent libraries of reference books. The Hadley library provides recreational reading

and operates 350 boxes which are exchanged each school term in over 240 schools. Boxes are sent to small schools, mission schools and special classes. Finance is provided from a government grant and contributions from the participating schools of commission received from the Commonwealth Savings Bank.

Children in isolated areas who are unable to attend school are catered for by books sent out by the State Correspondence School's library. The children are kept in touch with the library by means of radio talks and leaflets issued periodically.

(vi) *Tasmania*. The Lady Clark Memorial Children's Libraries, at the State Library, Hobart, aim to serve all children in Tasmania. At 30th June, 1962, 180 children's libraries and depots had been established.

The Education Department provides library quarters in all high schools and in some of the larger primary schools. The purchase of books is financed by parents' associations and by departmental subsidies. Teacher-librarians are appointed in high schools. The Schools Library Service issues loan collections of books to schools and gives advice on the setting up of school libraries.

6. *Special Libraries*.—Before the 1939–45 War, the number of special libraries, apart from those maintained by government departments, was small, but during recent years many manufacturing, commercial, research and other firms, as well as statutory bodies, have found it necessary to establish special libraries to serve their staff. These libraries, which are most numerous in Sydney and Melbourne, are being administered increasingly by trained librarians.

7. *Microfilms*.—The following libraries supply microfilm or photostat copies of material usually at a small charge (the letter "P" signifies photostat supplied and "M" microfilm supplied):—*Australian Capital Territory*—Australian War Memorial (P), National Library of Australia (PM), C.S.I.R.O. (M), Australian National University (M), Patent Office (P); *New South Wales*—Metropolitan Water, Sewerage and Drainage Board (P), Public Library of New South Wales (M), Standards Association of Australia (P), School of Public Health and Tropical Medicine (M), Fisher Library, University of Sydney (PM); *Victoria*—Commonwealth Serum Laboratories (P), Technical Information Section, Munitions Supply Laboratories (PM), Public Library of Victoria (M), Standards Association of Australia (Melbourne Branch) (P), University of Melbourne (PM), C.S.I.R.O. (M); *Queensland*—Public Library (P); *South Australia*—Public Library of South Australia (PM), University of Adelaide (PM), Waite Agricultural Research Institute (P); *Western Australia*—State Library (PM); *Tasmania*—University of Tasmania (PM).

## § 2. Museums

1. *General*.—Museums have been established in all capital cities and in many provincial cities and towns. The most important are maintained by Government grants. Others are supported by municipal councils, the Universities, and private organizations or individuals. Many museums have art galleries which are housed in the same building. However, art galleries are described separately in § 3 below.

2. *Commonwealth*.—(i) *The Australian War Memorial, Canberra*. The Memorial comprises the national collection of war relics, and the building in which these are preserved. The building was opened in 1941. There is a collection of 4,000 art works, and a museum collection of more than 40,000 war relics, the gathering of which began on the battlefields of the 1914–18 War and was continued during the subsequent wars in which Australian Forces have participated. The collection has been enhanced by gifts of relics from the governments of Great Britain, the sister dominions, and of allied countries, and also by presentations made by ex-servicemen and relatives of those who died. The collection consists of items such as tanks, aeroplanes, submarines, field-guns and boats and through the widest possible range of war trophies down to the smallest items, nails, pieces of wire, wristlet watches and the like, each relic dependent for its value on its historical background. The works of art, all by Australian artists, depict battle scenes, individual officers and men, etc., and include oil and water colour paintings, drawings, statuary, bronzes, dioramas and mosaics. There is also a library, which is described in § 1, above.

(ii) *The Institute of Anatomy*. The museum of this institution is described in Chapter XVII. Public Health, p. 710.

3. *States.*—(i) *New South Wales.* The Australian Museum in Sydney, founded in 1836, is the oldest in Australia. It is incorporated under the control of trustees, and receives its finance from the State Government. Expenditure in 1960–61 was £219,995. The museum has very fine collections of Australian fauna, and important anthropological and mineral collections. The museum has a valuable library, which contained 33,500 volumes in 1961. The number of visitors to the institution during 1960–61 was 332,900, with average attendances of 837 on weekdays and 1,381 on Sundays. Courses of evening lectures are delivered and lecturers also visit suburbs and country centres. Gallery demonstrations are also given. Screenings of natural history films were attended by 11,085 persons in 1961. Day lectures are given for school children, and 15,202 children attended in 1960–61.

The Museum of Applied Arts and Sciences in Sydney is also financed by the State Government, and has collections illustrating manufacturing processes and natural products. The scientific staff conducts research work on the development of natural resources. There is a library of 9,000 volumes. Visitors number about 150,000 annually, and expenditure in 1960–61 was £72,462. There are branch technological museums at Goulburn, Bathurst and Broken Hill.

Representative collections illustrating the natural wealth of the country are displayed in the Agricultural and Forestry Museum controlled by the Department of Agriculture and in the Mining and Geological Museum controlled by the Department of Mines. The Mining Museum prepares collections of specimens for use as teaching aids in country schools. The National Herbarium and Botanical Museum is situated at the Sydney Botanic Gardens.

Three museums at the Sydney University are open to the public; these are the Nicholson Museum of Antiquities, the Macleay Museum of Natural History, and the Haswell Zoological Museum. The University also has a Museum of Morbid Anatomy.

Among historic homes which have been converted to historical museums is Vaucluse House, Sydney, the home of W. C. Wentworth.

(ii) *Victoria.* The National Museum of Victoria, Melbourne, was founded in 1854. It is devoted to natural history, geology and ethnology, and there are special Australian collections of birds, butterflies, molluscs and ethnology.

The Institute of Applied Science was founded in 1870 and has been enlarged recently by the addition of three new floors. Exhibits cover applied and economic aspects of all branches of science, with emphasis on recent scientific developments. A planetarium, to seat 116, was delivered in 1962.

There is a fine Museum of Botany and Plant Products in the Melbourne Botanic Gardens and a Geological Museum controlled by the Mines Department. Well-equipped museums of mining and geological specimens have also been established at Schools of Mines in several country towns.

Small museums are associated with art galleries in Castlemaine, Warrnambool, Mildura and Beechworth, in each case conducted by the local Council. There are a few private museums in country areas. Several historic homes of the 19th century are also maintained and exhibited to the public.

(iii) *Queensland.* The Queensland Museum, founded in 1855, is the State museum of natural science. It is a Government sub-department and is maintained by the State. The collections comprise extensive exhibited and reference series, mainly in the fields of zoology, geology and ethnology, and some mechanical and historical material is held with a view to future museum development. Lessons supported by film displays are arranged for the public, and an annual refresher course in natural science is conducted for teachers. The museum is now the recognized State depository for valuable material in natural science, and the collections are constantly being augmented. In addition, the Museum contains the outstanding library of the State in the fields of zoology, geology and anthropology. The annual number of visitors is about 200,000. Expenditure during 1960–61 was £41,637.

There is a Botanical Museum and Herbarium at the Brisbane Botanic Gardens, and the Royal Historical Society of Queensland has an historical museum at Newstead House, Brisbane, which has about 12,000 visitors each year. The University of Queensland has recently established an Anthropology Museum.

(iv) *South Australia.* The South Australian Museum has large collections of most branches of natural history and has especially rich collections of aboriginal artifacts. In 1961–62, there were at least 200,000 visitors and total expenditure was £63,335, met from State government grants.

In addition, there is a Municipal Museum possessing records and mementoes of the State and city, an Applied Science Museum with scientific and technological exhibits, and a Botanical Museum, situated in the Botanic Gardens, with a carpological collection and displays of economic plant products. Some town councils have special museums housing relics from earlier times of their districts, and several cottages once belonging to early pioneers have been restored as historical museums. These include Adam Lindsay Gordon's Cottage at Port MacDonnell and Captain Charles Sturt's Cottage, Grange.

(v) *Western Australia.* The Western Australian Museum was established in 1895. It is under the statutory management of a board of five members appointed by the State government, but operates under its own director and staff. Expenditure in 1960-61 was £63,357. It is primarily a museum of natural history, with active departments of vertebrate and invertebrate zoology, palaeontology, entomology, archaeology and anthropology. Principal research interests are in the fauna of Western Australia and the ethnology of the Western Australian aboriginal.

The Education Department of Western Australia provides a teacher to the Museum who instructs visiting classes and who is in charge of a Children's Centre during school holidays. Members of the Museum staff also take part in the teaching of undergraduates at the University of Western Australia.

There is also a Geological Museum at the School of Mines, Kalgoorlie.

The "Old Mill" Museum at South Perth, which exhibits historical objects of public interest including the old mill itself, is directed and maintained by a private business firm. A similar institution based on the Old Gaol at Toodyay is run by the local authority. Several other local bodies maintain small historical collections.

(vi) *Tasmania.* There are two main museums in Tasmania—the Tasmanian Museum in Hobart and the Queen Victoria Museum in Launceston. Both museums contain collections of botanical, mineral and miscellaneous exhibits, including valuable material illustrating the life of the now extinct Tasmanian aboriginal race. Fauna collections include many specimens of birds and marsupial animals not found in other parts of Australia. Art galleries are attached to each museum. State Government grants amounted to £32,500 in 1960-61. The Tasmanian Museum and Art Gallery is controlled by a board, which receives some assistance from the Hobart City Council, in addition to State Government grants. Expenditure in 1960-61 totalled £27,517. The Queen Victoria Museum and Art Gallery is controlled by the Launceston City Council, which met about half the total expenditure of £18,128 in 1960-61.

Several colonial houses have been converted into historical museums and there is also a privately owned museum near Burnie.

### § 3. Art Galleries

1. *New South Wales.*—The National Art Gallery of New South Wales originated in the Academy of Art founded in 1871, and is controlled by the State Government. At the end of 1961, its contents comprised 1,528 oil paintings, 979 water colours, 2,637 prints and drawings, 146 sculptures and casts, and 1,355 ceramics, works in metal, and miscellaneous. Since 1895, loan collections of pictures have been exhibited regularly in important country towns. Annual exhibitions include entries for the Archibald, Wynne and Sulman competitions. In 1960, 146 conducted lectures were given to 4,380 school children. The expenditure for 1961-62 was £66,305.

In 1959, a War Memorial Gallery of Fine Art was established at the University of Sydney.

2. *Victoria.*—At 30th June, 1961, the National Gallery in Melbourne contained 1,292 oil paintings, 8,066 objects of statuary, bronzes, ceramics, etc., and 9,204 water colour drawings, engravings and other prints. The gallery is situated in the same building as the museum and public library. Expenditure by the National Gallery in 1960-61 was £92,460, including £8,192 from government grants and legacies for purchases of works of art. Several bequests were made to the institution by private citizens. There are provincial art galleries at Ballarat, Bendigo, Castlemaine, Geelong, Hamilton, Mildura, Shepparton and Warrnambool, to which pictures are sent on loan from the National Gallery.

There are several small private art galleries in Melbourne. While some of these are commercial establishments, others exhibit the works of groups of artists or of individual artists. These works are generally for sale, but the purpose of the galleries is largely cultural. In addition, there is the annual *Herald* outdoor exhibition, an open-air exhibition of paintings and sculpture which is visited by many thousands of people each year.

3. **Queensland.**—The Queensland Art Gallery, maintained by the State government, was established in 1895. Expenditure totalled £10,936 in 1960–61 and there were 230,000 visitors. During 1959, the Government passed a new *Queensland Art Gallery Act* re-organizing the gallery, appointing a new Board of Trustees and granting a site for the building of a new art gallery. The collection has been enriched by numerous bequests. In 1959, an anonymous gift of £126,000 was devoted to the purchase of an important collection of modern French paintings. The collection as a whole comprises 669 oils and watercolours, 480 prints and drawings, 68 sculptures, and 206 art objects. During 1962, the first of what is hoped to be a regular series of travelling exhibitions to country districts was organized. In this case, the exhibition visited the coastal areas of northern Queensland.

The University of Queensland Fine Arts Committee controls the Darnell Collection, the result of a bequest by John Darnell who died in 1930. Income from the bequest is augmented by grants from the University Senate and is devoted to the purchase of works of art. The collection is exhibited at the University and includes 500 art books, 300 paintings in various media and some sculpture.

Two collections are exhibited at Toowoomba. The Gould collection, which includes paintings, pottery, ceramics, antique furniture and other art works, is displayed at the City Hall. The Sir Lionel Lindsay Art Gallery and Library was donated to the city by William Bolton and contains works of Australian artists and authors.

Other local authorities also maintain art galleries in provincial towns and there are several privately owned galleries.

4. **South Australia.**—The National Gallery in Adelaide originated in an exhibition of pictures in the public library building in 1881. Many bequests made by private citizens have materially assisted its growth. At 30th June, 1962, there were in the gallery 1,944 paintings in oil, water colours and pastels, 111 items of statuary, and large collections of drawings, prints, furniture, ceramics and coins. Special exhibitions are held from time to time. The expenditure during 1961–62 was £216,501. This included payments by the State from loan funds for alterations and additions to buildings amounting to £171,323.

Exhibitions of paintings are held regularly in private art galleries and are usually well-attended. In particular, the Royal South Australian Society of Arts presents five special exhibitions during the year, Spring, Autumn, Associate and Lay Members, Print and Drawing, and the Wholcan Prize Exhibition.

The Hahndorf Art Gallery was established in 1956, and since 1959 has operated in historic premises—the first Lutheran school built in Australia.

5. **Western Australia.**—The Western Australian Art Gallery was established in 1895. Although under the statutory management of a board of five members appointed by the State Government, it functions under its own director and staff. At 30th June, 1962, the collection included 400 oil paintings, 215 water colours, 10 pastels, 1,422 prints and drawings, 1,103 reproductions, 9 miniatures and 29 pieces of sculpture. International and interstate exhibitions are frequently held, and travelling exhibitions are sent to country centres.

There are no major private art galleries, but some municipalities maintain collections.

6. **Tasmania.**—In Tasmania, the Art Gallery in Hobart was opened in 1887. In June, 1962, it contained 236 oil paintings, 194 water colours, 127 black and white, 3 statuary and 105 etchings, engravings, etc.

The Art Gallery in Launceston was opened in 1891. In June, 1962, there were on view 250 oil paintings, 367 water colours, 144 black and white, and 258 miscellaneous exhibits.

Both galleries operate in conjunction with the museums in each city, occupy the same buildings, and are controlled by the museum authorities.

#### § 4. Botanical and Zoological Gardens\*

1. **New South Wales.**—The Zoological Gardens at Taronga Park, on the northern side of Sydney Harbour, were opened in 1916. The area is about 50 acres. The natural formation has been retained as far as practicable, with the object of displaying the animals in natural surroundings, and an aquarium has been built within the gardens. In 1960–61, admissions to the grounds were 828,698, and to the aquarium 291,408. The receipts of the

\* In addition to the zoological gardens referred to, there are numerous privately owned zoos and sanctuaries, many of them at tourist resorts, which maintain collections of Australian flora and fauna. There are also various national parks, forests, reserves, etc. dedicated for public use, which are preserved largely in their natural condition.

zoological department of the Taronga Park Trust amounted to £189,224 in 1960-61, excluding an annual State grant of £3,250, and expenditure amounted to £163,104. Exhibits at 30th June, 1961, comprised 925 mammals, 2,412 birds, 117 reptiles, and 1,036 fish.

The Sydney Botanic Gardens are situated on the shores of Farm Cove, Sydney Harbour, close to the heart of the city.

2. **Victoria.**—The main botanical gardens in the State are the Royal Botanic Gardens, an area of 88 acres situated within one mile of the centre of the City of Melbourne, and containing over 12,000 species of plants, of which there are some 30,000 individual specimens. Many species of native birds breed on islands in lakes within the gardens.

The Zoological Gardens are situated in Royal Park, and contain a wide selection of animals, birds and reptiles. Wild life sanctuaries are also maintained at Healesville and North Balwyn, and contain specimens of indigenous fauna.

3. **Queensland.**—Botanical gardens have been established in Brisbane and Rockhampton by the City Councils.

4. **South Australia.**—The Botanic Gardens, begun in 1854, occupy 45 acres planted with many tropical and sub-tropical trees, shrubs and plants.

The Zoological Gardens, opened in 1883, have an area of approximately 19 acres set among lawns and gardens and contain a fine collection of animals, reptiles and birds. There were 278,000 visitors in 1961.

5. **Western Australia.**—Arrangements have been made for the creation of a botanic garden for the native plants of Western Australia, in King's Park, a reserve of almost 1,000 acres close to the centre of Perth. A site of 25 acres has been selected for garden development during the first five years, and an arboretum of 35 acres for a collection of native trees has also been planned. Both areas have been surveyed in detail and the layout determined.

The Zoological Gardens which were opened in 1898 at South Perth have an area of 44 acres and are under the control of the Acclimatisation Committee. Animals, birds and reptiles are exhibited and sporting and recreational facilities are available to the public. During the year 1961-62, 137,614 adults and 117,680 children visited the zoo.

6. **Tasmania.**—The Hobart Botanical Gardens adjoin Government House on the Queen's Domain. The gardens contain a fine collection of exotic trees and shrubs and are controlled by a Board appointed by the State Government, which supports the gardens by annual grants.

There is no zoo in Tasmania, but a small collection of animals and birds is maintained by the Launceston City Council at the City Park.

7. **Northern Territory.**—The Darwin Botanical Gardens were established in 1873, and were planted with imported exotic plants and trees. The gardens now occupy 80 acres and feature tropical plants of both native and overseas origin. They are controlled by the Darwin City Council.

## § 5. Book Publishing

1. **Australian Book Publishing.**—Some statistics relating to Australian book publishing are compiled by the National Library of Australia as part of its bibliographical responsibilities (see p. 761). Through the deposit provisions of the *Copyright Act* 1912-1950, its overseas collection agents, and its own efforts, the library receives practically all Australian publications although not necessarily in the year of publication. Because the statistics compiled and shown hereunder are classified according to the year of publication, all figures are subject to revision as publications not yet received in the National Library come to hand.

For books published in 1961 and thereafter, the method of counting conforms with international practice. Each title is counted as one unit. The figures cover all non-periodical publications (i.e. those published at irregular intervals or regularly at intervals of one year or longer) published in Australia. They refer to all publications of five pages or more and include pamphlets, new translations and re-editions. They include government publications, educational textbooks, university theses, etc., but exclude publications not available to the general public, advertising material, publications of transitory interest, off-prints, musical works, children's picture books, maps and charts.

Figures for 1960 and previous years are less comprehensive, excluding most government publications and certain paper-backs.

2. **Number of Publications.**—The following table shows the number of books, etc., published in Australia and received by the National Library during the years 1958 to 1962. From 1958 to 1960 the figures are on the "old" basis of compilation and exclude most government publications.

**NUMBER OF PUBLICATIONS RECEIVED BY THE NATIONAL LIBRARY:  
AUSTRALIA**

Received by the National Library up to the end of—	Published during—				
	1958	1959	1960	1961	1962
1958 .. .. .	558	..	..	..	..
1959 .. .. .	680	580	..	..	..
1960 .. .. .	705	765	531	..	..
1961 .. .. .	720	814	839	1,840	..
1962 .. .. .	723	873	984	2,848	1,793

The next table shows the 1961 and 1962 publications received up to the end of 1962, classified by subject matter.

**NUMBER OF 1961 AND 1962 PUBLICATIONS RECEIVED BY THE NATIONAL LIBRARY, BY SUBJECT(a): AUSTRALIA, TO 1962**

Subject	Published during—	
	1961	1962

Travel, biography, history .. .. .	243	195
<b>Grand Total</b> .. .. .	<b>2,848</b>	<b>1,793</b>

(a) The classification is based on the divisions of the Dewey Decimal Classification.

3. **The Commonwealth Literary Fund.**—In 1908, the Commonwealth Government, under Alfred Deakin, first established the Commonwealth Literary Fund. The Fund was entirely a compassionate one devoted to literary pensions for aged or infirm authors, for the families of literary men who died in poverty, and for writers who were unable for financial reasons to continue their activities.

In 1939, in an endeavour to encourage the development of Australian literature and to foster appreciation of it, the Commonwealth Government greatly enlarged the scope of the Fund. The Fund now awards Fellowships each year, assists in the publication of manuscripts of high literary merit, makes annual grants for lectures in Australian literature, and awards pensions to writers who have achieved a nation-wide reputation for their work in the field of creative literature.

The Fellowships are awarded each year to writers who have proved their capacity in the field of creative literature, to enable them to devote their time to working on a literary project they specify. A Fellowship carries a maximum value of £2,000 per annum. The Fund does not seek out people on whom to bestow Fellowships, but considers only those who submit applications. Applications close on 30th June each year and the awards are decided at the end of the year.

The Fund also assists in the publication of manuscripts which have outstanding literary merit, but which, in the opinion of publishers, may constitute a commercial risk. This assistance takes the form of a guarantee of assistance to the publisher. The Fund does not itself enter the field of publishing, nor does it make outright grants to authors to enable them to arrange publication personally.

Since 1940, annual grants for special lectures in Australian literature have been made to all universities. In 1956, the Fund initiated a scheme of lectures to the general public and to schools mainly in country areas, with the co-operation of State Adult Education authorities and Education Departments. Annual grants are now made to the States for this purpose.

The Fund also assists certain literary magazines of long standing and recognized literary value.

The Fund is administered by a Committee consisting of the Prime Minister (Chairman) the Leader of the Country Party, and the Leader of the Opposition in the House of Representatives. The Committee is advised on all literary matters by an Advisory Board of six persons with literary qualifications.

4. **The Literature Censorship Board.**—In 1937, the Commonwealth Government introduced legislation to provide for a Literature Censorship Board to advise the Minister for Customs and Excise on imported literature. At the same time, an Appeal Censor was appointed to afford appellants an avenue of appeal which did not make expensive court proceedings necessary. The Appeal Censor was replaced by an Appeal Board in 1960.

The Boards were set up to deal with that part of the problem which provides the greatest amount of controversy—restriction on books which have a real place in the field of literature. In practice, no imported publication having literary merit is prohibited without prior reference to the Literature Censorship Board. Should the Minister decide to prohibit the importation of a book on the recommendation of the Board, an appeal against the decision may be made for reference to the Literature Censorship Appeal Board. A decision to prohibit the importation of a book may be challenged through the normal processes of the law.

The Literature Censorship Board consists of a Chairman, a Deputy Chairman and two other members, while the Appeal Board is made up of a Chairman and two other members.

The foregoing refers to imported literature. Control of indigenous matter comes under the jurisdiction of the State governments.

## § 6. Film Production

1. **Australian Film Production.**—Australia was one of the pioneers in the history of film-making, a short story film, *John Vane, Bushranger*, having been made in 1904, only a year after America's *The Great Train Robbery* (1903), which is generally considered to be the first genuine story-film. It has been claimed that *The Kelly Gang*, made in 1905-6, was the first full-length feature film produced in the world.

Following the outbreak of the 1914-18 War, a series of short patriotic films were produced. In 1917, the first of a successful series of rural comedies was made, featuring a family called the Hayseeds. In the same year, *The Kelly Gang* was remade and the first film version of *For the Term of his Natural Life* appeared. A first film version of C. J. Dennis's *The Sentimental Bloke* was made in 1919.

The year 1920 was notable for a number of productions with an authentic Australian flavour:—*On our Selection*, a first version of *Robbery Under Arms*, another remake of *The Kelly Gang*, and C. J. Dennis's *Ginger Mick*. Production continued at about the same level until the coming of sound in 1928. Altogether, approximately 160 theatrical films were produced by Australian units in the silent period (1900-1930).

Lack of equipment hampered the commencement of production of sound films in Australia, but during the 1930's nearly 60 sound films were produced.

During the 1939-45 War, commercial film production combined with the Commonwealth Government in making films. Since the war, a number of British and American companies have made films in Australia. Altogether, between 1930 and 1960, about 115 feature films were produced in Australia.

**2. The Australian National Film Board.**—The Australian National Film Board was inaugurated in April, 1945, on the recommendation of a Commonwealth Government inter-departmental committee. It was attached, for administrative purposes, to the Department of Information. With the abolition of that Department in March, 1950, administration of the Board was transferred to the News and Information Bureau, Department of the Interior.

In November, 1950, the Board was reconstituted as an advisory body to the Minister for the Interior on matters concerned with the production, acquisition and distribution of films required by Commonwealth departments for use within Australia on important matters of national interest and welfare, such as school and adult education, rehabilitation, social development, international understanding, trade and tourist expansion, and immigration; and for dissemination abroad to expand trade and commerce with other countries, to encourage tourist traffic with Australia, to improve Australia's relations with other countries and, where necessary, to explain Australia's national policies and encourage immigration.

The constitution provides for a membership of eleven, with the Secretary of the Department of the Interior, Chairman, the Director of the News and Information Bureau, Deputy Chairman, and the remainder representative of Commonwealth departments, State Government instrumentalities, and organizations interested in the production, distribution or utilization of films for national publicity.

**3. The Film Division of the News and Information Bureau.**—The first Australian Government organization for the production of motion pictures for national publicity purposes was the Cinema and Photographic Branch of the Department of Commerce, set up in Melbourne in 1920. Early in the 1939-45 War, the newly-established Department of Information was made responsible for the operation of the Cinema Branch and for an Official War Photography Unit. Production and distribution of all films required by Commonwealth Departments are now undertaken by the staff of the Film Division, News and Information Bureau, Department of the Interior, or by commercial enterprises under the supervision of officers of the Film Division. Theatrical and television distribution in Australia, and both theatrical and non-theatrical distribution overseas, of all Film Division productions are organized by the News and Information Bureau's home office or its overseas representatives. Non-theatrical distribution in Australia is organized through the National Library, Canberra, in co-operation with State film distribution agencies.

Since 1946, the Film Division has produced 409 films for general exhibition, as well as training and special purpose films. Prints are dispatched to 50 overseas centres, where distribution is arranged by News and Information Bureau officers or other Australian representatives. In Britain, there is regular distribution through more than a thousand theatres and a large non-theatrical and educational series of circuits. By arrangement with the British Broadcasting Corporation, items of topical interest photographed by the Film Division are flown to London for television. In the United States of America, there is wide non-theatrical distribution and considerable use of the films by television networks. An exchange arrangement with the National Film Board of Canada secures extensive distribution in Canada. Selected films have been recorded in French, Dutch, German, Italian, Japanese, Malay, Thai, Hindustani, Tamil and other Indian dialects.

In addition to films made on the initiative of the News and Information Bureau, the Film Division produces films under the sponsorship of, or with the co-operation of, Commonwealth Departments and many other bodies such as the Commonwealth Bank of Australia, the Road Safety Council, the Overseas Telecommunications Commission, the Snowy Mountains Hydro-electric Authority, the Australian Wine Board, the Australian National University, and the Australian Broadcasting Commission.

The Australian motion picture industry co-operates with the Commonwealth, and special films for urgent national appeals are planned, produced and distributed with the assistance of the National Film Council of the motion picture industry and its Film Production Advisory Committee.

**4. The Film Censorship Board.**—(i) *Legislation.* The Commonwealth Government's powers over censorship of films extend only to imported films and imported advertising matter and stem from the *Customs Act*. Under that Act, the Customs (Cinematograph Films) Regulations provide for the appointment of a Film Censorship Board whose function is to ensure that films and related advertising material coming within certain defined categories are not admitted into Australia. Under those regulations, the Film Censorship Board may pass films in their original form, reject them, or pass them after eliminations have been made. Legislation passed by the State Governments of Victoria, Queensland, Western Australia and Tasmania names the Commonwealth Film Censorship Board as the censorship authority and vests in it the power to classify films as suitable for general exhibition or otherwise. The State Acts give the Commonwealth Board the authority to censor films made in Australia for commercial exhibition and advertising matter made in Australia.

The Censorship organization comprises a Censorship Board of seven persons and an Appeal Censor, the headquarters being in Sydney. Importers have a right of appeal to the Minister against decisions of the Board and the Appeal Censor.

(ii) *Import of films.* (a) *35mm. Films for Exhibition in Motion Picture Theatres.* In 1962, 1,243 films comprising approximately 4.5 million feet were censored. This represents approximately 835 hours' screening time. Of these films, 447 originated in the United States of America, 424 in the United Kingdom and 372 in other countries. The principal suppliers among the last mentioned were:—U.S.S.R., 75; France, 67; Greece, 49; Italy, 41; and Germany, 16. Included in these figures are 440 full-length feature films which constitute the main theatrical attractions. This was a decrease of 10 compared with the imports for 1961. Feature films came from:—the United States of America 159, the United Kingdom 95, U.S.S.R. and Greece 40 each, Italy 31, France 24 and Germany 9. Ten feature films were rejected and cuts were made from 131. There were eight appeals, seven against rejection and one against cuts. One was allowed and seven disallowed. Feature films classified as suitable for general exhibition numbered 252 and 188 were not suitable for children. Of the latter, 23 carried the special condition that all advertising should indicate that they are suitable only for adults. These classifications are advisory only and are designed to enable picture-goers and particularly parents to obtain a general idea of the nature of any particular film. In addition to these imported films, 184 35mm. films of 162,775 feet produced in Australia were cleared. These were mainly newsreels and documentaries intended for commercial exhibition or export.

(b) *16mm. Films.* Excluding those imported for television use, 5,878 16mm. films of approximately 4 million feet were examined. There were no rejections. These were films commercially produced for screening in theatres used by business undertakings for advertising and instructional purposes and for screening in churches, schools and universities, and on home movies.

(c) *8mm. and 9.5mm. Films.* Approximately 47,000 feet of these small dimension type films were examined.

(d) *Television Films.* 7,399 films, predominantly 16mm., of approximately 8.5 million feet, for use on television, were censored. The number of films is not a true indication of volume because many of these were of short duration. In terms of screening time, the films censored for television amounted to approximately 4,000 hours. On a footage basis, the United States of America supplied approximately 80 per cent. of the total imports and the United Kingdom 16 per cent. Eleven television films were rejected outright and an additional eleven were classified as unsuitable for televising. Eliminations were made from 939. There were two appeals against classification, one of which was allowed and one disallowed, and one appeal against rejection which was allowed.

(e) *Foreign Language Films.* Countries other than the United Kingdom and the United States of America supplied 372 of the 35mm. films imported for theatrical exhibition. Of these, 186 were feature films. Generally, the dialogue is in a foreign language with explanatory English captions. A few have an English commentary, and in some cases English "dubbed" dialogue. Of 5,878 16mm. commercial films censored, 1,092 originated from non-English-speaking countries. The chief supplying countries were Germany 214, Japan 124, France 120, Malaya 84, Italy 64, Holland 55, Czechoslovakia 48, India 48, Switzerland 45 and U.S.S.R. 41.

(iii) *Export of Films.* The quantity of films exported for the year was approximately 2.5 million feet, consisting mainly of newsreels, advertising films and documentaries. This footage included in many cases several prints of the one film. It also included large quantities of exposed negatives sent overseas for processing.

### § 7. The Arts Council of Australia

Patterned on the Council for the Encouragement of Music and Arts which operated in the United Kingdom during the Second World War, an Australian organization was brought into being in 1943. In 1945, it became The Arts Council of Australia. Originating in New South Wales, Divisions exist now in all States and the Australian Capital Territory. The centre of activity has been in New South Wales, which has a country branch network of over fifty centres. A Federal Council will become effective in 1963.

The Arts Council receives State government grants through the Departments of Education in New South Wales and Queensland. In 1963, for the first time, a substantial contribution was received from a private organization.

The New South Wales Division is a member of the Adult Education Advisory Committee in that State, representing the "live art" section of adult education. The Tasmanian Division is represented on, and works closely with, the Adult Education Board of that State.

In 1950, the New South Wales Division arranged and presented the world première of the ballet *Corroboree* and in 1951, in connexion with the celebrations of the Commonwealth Jubilee, the Federal Council arranged a tour to all States of the ballet, performed by the Victorian National Theatre Ballet Company. Seasons of *Let's Make An Opera* followed later in 1951 at Sydney, Brisbane, and Canberra.

Activities of the Arts Council are directed towards decentralization of the arts for the benefit of country centres and metropolitan and country schools. It is greatly concerned with taking the arts to children as a basic cultural development. Tours of high standard companies in opera, ballet, drama, puppets, etc., are operating throughout the year.

The Young Elizabethan Players Company was formed jointly by the Arts Council and the Australian Elizabethan Theatre Trust in 1958 to take Shakespeare to schools in New South Wales and Queensland, and is still operating.

The Council handles a wide range of art exhibitions, both for city and country areas. Summer schools for drama, painting, pottery, music and other arts are an established annual feature of the work of the New South Wales and Queensland Divisions.

Yearly drama festivals are conducted for the Little Theatre movement. For 1963, the New South Wales Division is sponsoring the first arts festival for Sydney (North Side Arts Festival), with a wide range of cultural activities concentrated on the north side of Sydney Harbour.

### § 8. The Australian Elizabethan Theatre Trust

Inaugurated in 1954 to commemorate the first visit to the Commonwealth of Her Majesty The Queen, the Australian Elizabethan Theatre Trust has since presented drama, opera and ballet throughout the entire Commonwealth. The Trust receives annual grants from the Federal Government, the State Governments and city councils. Its income also includes subscriptions from members.

In the field of drama it has presented, *inter alia*, the works of Australian playwrights, including plays which were subsequently presented overseas.

The Elizabethan Trust Opera Company has given seasons of opera and has presented overseas guest artists, conductors and producers. The Australian Ballet, which commenced its inaugural season in November, 1962, will visit all mainland capitals and New Zealand

during 1963. This company also features guest appearances by renowned overseas performers. The activities of the Trust in opera and ballet are providing employment for Australian singers, dancers, musicians, designers, choreographers and composers. The Trust has also been associated with commercial managements in the presentation of overseas attractions and large-scale musicals.

Country areas have been visited by Trust companies presenting opera, drama and puppets in association with the Council of Adult Education in Victoria and The Arts Council of Australia in New South Wales. During 1963, three companies of Young Elizabethan Players will again present Shakespeare for schools in five States. To date, almost one million children have attended a performance by these players which for many of them represents their introduction to "live" theatre.

In Victoria, the Trust is associated with the University of Melbourne in the Union Theatre Repertory Company, which presented its 120th production early this year. It is also associated with the University of New South Wales in the establishment recently of the Old Tote Theatre Company. Assistance is given to the Perth Playhouse, the Festival of Perth, the National Theatre and Fine Arts Society of Tasmania and other companies. The Trust has contributed productions to the biennial Adelaide Festival of Arts.

One of the most important activities undertaken by the Trust is its association with the University of New South Wales and the Australian Broadcasting Commission in the establishment and maintenance of the National Institute of Dramatic Art. This provides a training ground for young Australian actors, producers and technicians.

### SCIENTIFIC RESEARCH

NOTE.—This section outlines first the role and organization of scientific and technological research in Australia and then refers specifically to various organizations, etc., associated with scientific research. Particulars regarding Commonwealth medical research organizations are given in Chapter XVII. Public Health.

#### § 1. Science and Technology in Australia\*

1. General.—The reputation of Australian science in pre-war days rested on the individual accomplishments of a few famous men. Many of the most able Australian scientists were attracted to posts abroad where they received better facilities, better rewards and proper recognition.

During the last twenty years, this state of affairs has altered. Attractive conditions of employment have been created for scientists, and scientific research as a national undertaking has been greatly expanded. While Australian scientists continue to go abroad for experience, many have returned to establish careers in their own country. In addition, the rapidly growing reputation of Australian scientific work is attracting to the country a steady stream of scientific talent from overseas.

The pattern of training of scientists and technologists in Australia is very much the same as that of Britain. The universities have followed the example of the British universities in teaching applied science as well as pure science. This differs from the practice in Germany, Switzerland and other continental countries, where special technical schools are the major source of highly trained technologists and engineers. A few of the Australian senior technical colleges do, however, produce engineers and technologists of professional status. The universities are currently producing some 800 graduates in science each year, and about 450 in engineering. In addition, the graduate schools in the universities are growing rapidly. In 1949, seven people received the Ph.D. degree for post-graduate work in science, agriculture and engineering, but eleven years later, in 1960, over a hundred people received it. During the period 1957 to 1962, the number of students working for higher degrees nearly doubled.

2. Pattern of Research in Australia.—The major scientific research body in Australia is the Commonwealth Scientific and Industrial Research Organization set up by an Act of the Commonwealth Government. The Organization operates in most fields of interest to industry and agriculture, and has research laboratories in all capital cities and in many country areas.

---

\* The following article was specially prepared for this issue of the Year Book by the Commonwealth Scientific and Industrial Research Organization of Australia.

A good deal of research is also carried out by the universities and individual industrial firms and a few co-operative research associations. In certain other specific fields, research is carried out by various State and Commonwealth government authorities.

At present, there are no private business organizations established primarily to conduct sponsored research for industry, but the C.S.I.R.O. and some university departments are prepared to undertake sponsored research.

In quality, the research achievements of the Australian research groups have been outstanding, and university research, until recently limited in scope and volume, is now expanding rapidly.

**3. Research in Industry.**—Relatively few firms are large enough to maintain research activities within their own organization, and not all firms strong enough to do so have chosen to set up research laboratories. In recent years, however, there have been many signs that managements of most large enterprises have come to realize the importance of research. Practically all large firms utilizing modern technologies now undertake research, and several of them invest heavily in research activities. Even some firms with very close affiliation with overseas organizations are setting up large research laboratories in Australia.

Among the smaller firms, however, little has so far been achieved. Efforts to organize co-operative research associations have not yet been very successful in Australia, partly because of the scale of industry and more particularly owing to the diffusion of the constituent units throughout the country's main industrialized areas. So far, five research associations have been established, dealing with baking, tobacco, minerals, wine-making, and coal industries. All receive financial support from the Commonwealth Government.

With certain provisos, money spent upon research by industry is deductible for income tax purposes.

**4. Research by State Authorities.**—State administrations are increasingly active in research. The greater part of this work is directed to rural industries, particularly regional problems of agriculture. State government extension services promote the application of research in rural industries. Applied research is also carried out by some of the State instrumentalities responsible for power and gas generation, water supply and sewage disposal.

**5. Research by Commonwealth Authorities.**—The Commonwealth concentrates a large part of its scientific research effort in the Commonwealth Scientific and Industrial Research Organization (*see p. 784*).

C.S.I.R.O. has devoted part of its effort to basic research, and has achieved world leadership in certain fields. In applied research, some notable successes have been achieved. Particular attention has been directed to the potentialities of Australian raw materials, and to the improvement of the industrial processes concerned with processing these resources into finished products.

The basis has been provided for the establishment of a flourishing pulp and paper industry based upon indigenous hardwoods as raw material. Wool research, supported by a statutory contribution by the industry, has been able to show the way to notable advances in manufacturing techniques, and, in particular, new moth-proofing and shrink-proofing processes have been developed. Recent outstanding successes include processes for permanently pleating woollen fabrics and for endowing woollen fabrics with "wash-and-wear" properties.

The Mansfield process for the control of evaporation from free water surfaces is preventing the loss of many million acre-feet of water a year from open storages. For arid regions this is a most important advance. A new method of producing super-pure zirconium (a "new" metal used in nuclear reactors) was developed, and overseas patent rights were sold to an American corporation.

**6. Standards.**—Activities which are extremely important in maintaining industrial standards of performance are undertaken by the Standards Association of Australia and the National Association of Testing Authorities (*see also Chapter VI. Manufacturing Industry*). The functions are linked, in that whereas the Standards Association establishes and publishes standards, the Association of Testing Authorities works to ensure that the certified testing laboratories maintain their level of competence.

The Standards Association of Australia publishes standards of many kinds for the benefit of industry and commerce. It draws representative committees from its 2,500 members representing government departments, chambers of manufacture and commerce, professional associations, universities and other groups, which draft standard specifications,

codes and tests. The Association creates its own standards and endorses also certain British standards for Australian use with or without modification. So far it has issued about 1,000 standard specifications. It has nearly 500 more projects in hand.

The National Association of Testing Authorities is the recognized organization for the co-ordination of testing facilities. It is an independent body whose objective is the organization of a comprehensive testing service to meet the needs of government, industry and commerce by registration, on a voluntary basis, of testing laboratories throughout Australia. The technical work of the Association is performed by Registration Advisory Committees, each composed of experts in the field of testing entrusted to it. Members of the committees are appointed solely on the basis of specialist qualification and experience.

Laboratories may be registered for the performance of specified tests within such fields as metrology, mechanical testing, electrical testing, heat and temperature measurement, chemical testing, biological testing, and industrial radiography and crack detection.

In 1962, there were 373 laboratories registered with the Association, which had a further 100 applications for registration before it. Membership of the Association is open to all laboratories which conform to the standards of staff and laboratory practice required by the Association.

Laboratories registered by the Association are entitled to endorse test documents in the name of the Association. The Association reassesses its registered laboratories from time to time, and investigates discrepancies in results between the different laboratories.

**7. Oversea Affiliations.**—Australia follows Britain in its system of weights, measures and units. The Commonwealth Scientific and Industrial Research Organization is the custodian of the Australian national standards of measurement of the physical quantities. Under the Australian Constitution, regulation of trade practices involving weights and measures is a function of the States, but all measurements are ultimately referred back to the national standards.

Australia is a subscriber to most of the important international standards unions, including the International Bureau of Weights and Measures, the International Organization of Legal Metrology, the International Patents Union, and the International Trade Marks Union.

**8. Science and the Industrialist.**—The research agencies mentioned are all accessible to the industrialist and are willing to assist him with information and advice. Facilities exist whereby the manufacturer can obtain the help needed to enable translation of the facts won by scientists working in research laboratories into terms of plant and processes. Some of the agencies maintain sections set up primarily for the very purpose of assisting industrialists or others needing or desiring information.

Some of the research divisions of C.S.I.R.O., for example, handle a considerable volume of requests for advice and information. The Organization also undertakes a certain amount of service work for industry, particularly in the field of metrology.

C.S.I.R.O. also undertakes a growing amount of sponsored research. University departments and technical colleges also help industry to some extent, and the Department of Metallurgy in the Melbourne University has fairly recently instituted a small section specifically to undertake research for industry. The University of New South Wales has set up an organization to undertake contract research, using the facilities of the university. Technical service departments of firms marketing chemical products and the like make a valuable contribution towards improving standards of practice in some sectors of industry. The Laboratories of the Department of Supply assist industry in respect of manufacture on defence contracts, and thus raise standards generally. In the larger cities, the services of public analysts are available.

Scientific and technical literature is available in Australia from the libraries of government institutions, public libraries, special libraries maintained by learned societies and professional institutes, universities, etc. Practically every technical journal of any importance in the English language is available in Australia, as are the more important journals published in other languages (together with the services of technical translators).

Technical information services are also available in the C.S.I.R.O., the Defence Standards Laboratories, and the Department of Trade to provide the industrial inquirer with information on new processes, raw materials and a wide variety of new developments.

Apart from the C.S.I.R.O., many Commonwealth Departments do a certain amount of research—some of them a great deal, e.g. the Department of Supply, which, in collaboration with the British Ministry of Supply, conducts the Long Range Weapons Research Establishment. The Department also maintains other laboratories, notably the Aeronautical

Research Laboratories and the Defence Standards Laboratories, both of which contribute towards technological advances in some sectors of manufacturing industry by helping in the development of new processes and products important for defence.

The Postmaster-General's Department conducts research into modern telecommunications, radio broadcasting and television, and the improvement of techniques, and has earned overseas recognition for this scientific work.

The Snowy Mountains Hydro-electric Authority has a scientific services division dealing with physical, engineering, geological and hydrological problems stemming from the developmental projects it has in hand.

More recently, the Australian Atomic Energy Commission has begun research, mainly concerned with the peaceful use of atomic energy (*see also* p. 788). Facilities are being developed and staff recruited. The Commission operates a research reactor (HIFAR) designed to operate at up to 10 Megawatts, and has also a 10-Kilowatt research reactor (MOATA). A 3-million-volt particle reactor is to be installed.

The Australian Institute of Nuclear Science and Engineering comprises the Australian Atomic Energy Commission and all Australian universities. Through operations of the Institute, Australian universities will be able to use the facilities of the Commission's laboratories at Lucas Heights, Sydney.

## § 2. Commonwealth Scientific and Industrial Research Organization

1. *General*.—By the *Science and Industry Research Act* 1949, the previously existing Commonwealth Council for Scientific and Industrial Research was re-organized under the title of the Commonwealth Scientific and Industrial Research Organization. An account of the organization and work of the former Council, and of the earlier Commonwealth Institute of Science and Industry from which the Council was formed, was given in earlier issues of the Official Year Book. (*See* No. 14, p. 1061 and No. 37, p. 1183.)

2. *Science and Industry Research Act 1949-1959*.—This Act provides for an Executive of the Organization consisting of nine members, to be appointed by the Governor-General, at least five of whom shall be persons possessing scientific qualifications; and an Advisory Council of the Organization, consisting of the members of the Executive, the Chairman of each State Committee constituted under the Act, and such other members as the Advisory Council, with the consent of the Minister, co-opts by reason of their scientific knowledge.

The powers and functions of the Organization are as follows:—(a) to initiate and carry out scientific research in connexion with primary or secondary industries in Australia; (b) to train research workers and to establish industrial research studentships and fellowships; (c) to make grants in aid of pure scientific research; (d) to establish and make grants to industrial research associations in any industry; (e) to test and standardize scientific apparatus and instruments; (f) to collect and disseminate scientific and technical information; (g) to publish scientific and technical reports and periodicals; and (h) to act as a means of liaison between Australia and other countries in matters of scientific research.

3. *Science and Industry Endowment Act 1926-1949*.—Under this Act, the Government established a fund of £100,000, the income from which is used to provide assistance to persons engaged in scientific research and in the training of students in scientific research. Provision is made for gifts or bequests to the fund, which is controlled by a trust consisting of the Executive of the Organization. In accordance with the Act, arrangements have been made to send a number of qualified graduates abroad for training in special fields of work.

4. *Work of the Organization*.—(i) *General*. The activities of the Commonwealth Scientific and Industrial Research Organization have necessitated a widespread and adaptable arrangement of its research laboratories. Centralization has been avoided, in the first place by establishing laboratories in different places in the Commonwealth wherever the necessary facilities, contacts and other suitable conditions could best be found, and secondly by the establishment of a State Committee in each of the six States. These Committees are widely representative of scientific and industrial interests, and advise the Executive or the Advisory Council on general matters and on particular questions of investigation and research.

For about twelve years after its establishment, the work of the previous Council was devoted mainly to the solution of problems affecting the agricultural and pastoral industries. Unlike manufacturing concerns, which often employ their own scientific staffs, the farmers and the pastoralists are dependent on outside help for the solution of their problems which

require research. It was a recognition of the greater need of the primary producer which directed the Council's early policy. In 1937, however, the Commonwealth Government decided to extend the activities of the C.S.I.R.O. so as to provide assistance to secondary industries, and several laboratories were established for work in that field; it was thus able to render to these industries assistance almost immediately after the outbreak of war.

(ii) *Establishments.* For the purpose of carrying out its research work, there are established within the Organization a number of Divisions and Sections. The Divisions, of which there are now thirty-one, comprise the major establishments for which special laboratory buildings have been erected and equipped; the Sections generally include establishments which have not reached a stage of development, so far as the scope and magnitude of their operations are concerned, to justify their designation as Divisions. As the Organization's investigations extend over the whole Commonwealth, and as many of the investigations which are being conducted—particularly those concerned with problems affecting the agricultural and pastoral industries—necessitate experimental work in the field, a number of field stations are established in various parts of Australia.

#### *Divisions.*

- Plant Industry, with main laboratories at Canberra and field stations.
- Entomology, with main laboratories at Canberra and field stations.
- Animal Health (laboratories in Melbourne, Sydney and Brisbane), Animal Genetics (main laboratory in Sydney) and Animal Physiology (main laboratory in Sydney), which together comprise the Animal Research Laboratories.
- Biochemistry and General Nutrition, with main laboratories at Adelaide and field stations.
- Soils, with main laboratories at Adelaide and extensive operations in the field.
- Forest Products, with main laboratories in Melbourne and field experiments.
- Food Preservation, with main laboratories at North Ryde (New South Wales), and a subsidiary laboratory in Brisbane.
- Fisheries and Oceanography, with main laboratories at Cronulla (New South Wales), and experimental work in coastal waters of Australia.
- Physics and Applied Physics, comprising the National Standards Laboratory at Sydney.
- Radiophysics, with main laboratory at Sydney and Observatory at Parkes, New South Wales.
- Physical Chemistry, Chemical Physics, Mineral Chemistry, Applied Mineralogy, Chemical Engineering, and Organic Chemistry, comprising the Chemical Research Laboratories in Melbourne.
- Tribophysics, with laboratories in Melbourne.
- Building Research, with laboratories in Melbourne.
- Mathematical Statistics, with main laboratory in Adelaide.
- Meteorological Physics, with main laboratory and field station in Melbourne.
- Land Research and Regional Survey, with headquarters in Canberra, and field stations at Alice Springs and Katherine (Northern Territory) and Kununurra (Kimberley, Western Australia).
- Protein Chemistry (Melbourne), Textile Industry (Geelong, Victoria) and Textile Physics (Sydney), which together comprise the Wool Research Laboratories.
- Coal Research, Sydney.
- Tropical Pastures, with main laboratories in Brisbane and field stations.
- Dairy Research, Melbourne.
- Wildlife Research, with main laboratories at Canberra.

#### *Sections.*

- Horticultural Research Station, Merbein (Victoria).
- Upper Atmosphere, with laboratory at Camden (New South Wales).
- Mineragraphic Investigations, Melbourne.
- Ore-dressing Investigations, Melbourne and Kalgoorlie.
- Fodder Conservation, Melbourne.
- Physical Metallurgy, Melbourne.
- Soil Mechanics, Melbourne.
- Engineering, Melbourne.
- Agricultural Research Liaison, Melbourne.
- Industrial Research Liaison, Melbourne.
- Editorial and Publications, Melbourne.
- Wheat Research Unit, Sydney.
- Sugar Research Unit, Melbourne.
- Computing Research Section, Canberra.

An Agricultural Research Liaison Section established at the Organization's Head Office assists in making results in agricultural research speedily available to State Departments of Agriculture for use in their extension work.

An Industrial Research Liaison Section has also been established at Head Office to foster liaison in the secondary and manufacturing fields.

The Organization's Head Office, with administrative and executive staff, is in Melbourne, and associated with it are the Organization's Central Library, Agricultural Research Liaison Section, Industrial Research Liaison Section and Editorial and Publications Section. The funds for the Organization are provided from two main sources, namely, from Commonwealth revenue by parliamentary appropriation, and from industry directly or indirectly by way of contributions and special grants. It has some 1,500 professional officers in its total staff of 4,500, and has an annual budget of £12 million.

C.S.I.R.O. maintains liaison offices in London and Washington, in each case as part of the British Commonwealth Scientific Office. These offices keep in close touch with developments throughout Europe and North America, and through them Australia receives advice of significant advances. These offices also play an important role in assisting scientists who are studying in the regions concerned. Numerous overseas studentships are maintained by C.S.I.R.O. as a means of raising the standard of training among its professional staff.

### § 3. Mount Stromlo Observatory

Mount Stromlo Observatory—since 1957 incorporated into the Australian National University—is the largest observatory in the southern hemisphere. It is in effect the Department of Astronomy of the Australian National University, and its staff members assist in the training of the future astronomers of Australia. In its instrumental resources, it is second only to some of the great observatories of America. Since it is located south of the Equator, it is placed especially advantageously for the conduct of research into the structure of the Milky Way System and of the Star Clouds of Magellan. The telescopes and auxiliary equipment at the Observatory provide access to parts of the sky that are forever hidden from the view of northern hemisphere astronomers. Mount Stromlo astronomers have therefore a special responsibility to do research on stars and other celestial objects at far southern declinations.

Mount Stromlo itself is a ridge of hills, approximately one mile long, situated at 35° 19' 16" South Latitude and 149° 0' 20" East Longitude, seven miles west of the city of Canberra. Its highest point is about 2,560 feet above sea level, and telescopes can be situated so as to be well screened from the lights of the city.

The first permanent installation on the site was established in 1911, but, because of the war and other circumstances, the development of the Observatory was delayed. It was not until 1925 that regular astronomical work could be undertaken. Since then, the Observatory has developed steadily, and now, under its third Director, the scientific staff consists of fifteen astronomers. This does not include ten scholars and a number of overseas astronomers visiting Mount Stromlo for periods of a year or so. With technical clerical and maintenance personnel, the total staff amounts to about 60 persons.

Mount Stromlo Observatory possesses eight mounted telescopes with apertures ranging from five inches to 74 inches. The 74-inch reflector is the largest telescope in the southern hemisphere. There are also special telescopes for the Time Service, and two overseas groups have major telescopes on the Observatory grounds. These telescopes are a 26-inch refractor from the Universities of Yale and Columbia, U.S.A., and a 26-inch Schmidt Telescope from the University of Uppsala, Sweden.

The principal fields of research at Mount Stromlo are as follows.

Studies of the structure and dynamics of the Milky Way system.

Investigation of the Large and Small Magellanic Clouds.

Studies of the physical properties of the interstellar medium of gas and dust, and its relation to the spiral structure of our galaxy.

Studies of the physics of the stars of the southern hemisphere by spectrographic means and by photoelectric techniques.

Maintenance of the National Time Service leading to studies of the variable rotation of the earth and polar motion.

Published accounts of the researches have a world-wide distribution.

The Observatory is at present engaged in a major expansion of equipment and staff. A permanent Field Station is under construction on Siding Spring Mountain (Latitude  $31^{\circ} 16'$  South; Longitude  $148^{\circ} 41'$  East; altitude, 3,820 feet) near Coonabarabran, New South Wales. This is an area having less cloud than Mount Stromlo. The principal instrument will be a modern 40-inch reflector, now being built in the United States. Other sites are being examined for the future development of astronomy in Australia.

At certain times, Mount Stromlo is open for inspection by members of the public when arrangements can be made so that the scientific work of the Observatory is not interrupted. A more detailed description of the Observatory's work is given in Official Year Book No. 46, pages 1142-4.

#### § 4. Australian Atomic Energy Commission

1. **Establishment and Functions of the Commission.**—In November, 1952, a Commission of three members was appointed to control the Commonwealth's activities in relation to uranium and atomic energy, and in April, 1953, upon the enactment of the *Atomic Energy Act 1953*, the Commission was established as a statutory authority, with powers and functions as defined in the Act. Under amending legislation, the number of Commissioners was increased to five in April, 1958. The Commission is a corporate and autonomous body, controlling its own service. It functions under the direction of the Minister for National Development.

The functions of the Commission fall under two main headings. Firstly, it is responsible for undertaking and encouraging the search for and mining of uranium, and is empowered to co-operate with the appropriate authorities of the States in connexion with these and related matters. Secondly, it is authorized to develop the practical uses of atomic energy by constructing and operating plant for this purpose, carrying out research and generally fostering the advancement of atomic energy technology.

2. **Uranium Prospecting and Mining.**—Uranium prospecting and mining in the Territories of the Commonwealth are freely open to private enterprise, subject to the *Atomic Energy Act 1953* and the Ordinances of the Territories. In the past, the Bureau of Mineral Resources, Geology and Geophysics of the Department of National Development has carried out, on behalf of the Commission, widespread aerial and ground surveys aimed at ascertaining the uranium resources of the Territories and delineating areas in which further search for uranium by private prospectors was considered worthwhile. Although rewards are no longer paid for discoveries of uranium, tax concessions are still allowed in respect of income earned from uranium mining. The Bureau of Mineral Resources provides prospectors and mining companies in the Territories with a wide range of technical and advisory services.

The development of the uranium resources of the States is governed by the legislation and policies of the States. Commonwealth assistance, in the form of aerial, geological and geophysical services, is available to the States, and State Mines Departments inspect uranium prospects and test samples submitted by prospectors.

Interest in the search for deposits of uranium has, however, declined in recent years because of world-wide over-supply.

Uranium oxide is being produced in Australia from ore deposits at Rum Jungle and South Alligator River, in the Northern Territory, and Mary Kathleen in Queensland. The Rum Jungle deposits were originally worked under arrangements between the Commonwealth and the Combined Development Agency, a joint procurement organization of the United States and United Kingdom Governments. Since 1953, mining and treatment operations have been conducted for the Commonwealth by a mining company. The treatment plant was commissioned in September, 1954, and the total production from that date to the 6th January, 1963, was sold to the Agency for defence purposes. As a result of sustained exploration in the area, a major new ore body—Rum Jungle Creek South—was discovered. This ore body was mined during the period April, 1961, to January, 1963. The Commonwealth Government has decided that treatment operations will continue at Rum Jungle, using ore stockpiled from the Rum Jungle Creek South mine. Apart from being successful financially, operations at Rum Jungle have made a significant contribution to the development of the Northern Territory. The Government decided therefore that the profits would be re-invested in the Northern Territory. The oxide produced will be available for sale at competitive prices. Exploration is continuing to determine whether or not further ore bodies exist in the area.

Uranium deposits at Radium Hill in South Australia were worked by the State Government, which built an ore concentration plant on the field and a plant for the treatment of the

concentrates at Port Pirie. Production of uranium oxide began in 1955, the output being sold to the Combined Development Agency. Operations ceased at the end of 1961, when the contract expired.

The Mary Kathleen ore body in the Mount Isa-Cloncurry district in Queensland has proved to contain Australia's largest reserve of uranium ore. A mine and treatment plant which cost over £10 million have been established in the area by a large mining company. Production from the plant is being sold to the United Kingdom Atomic Energy Authority for the British nuclear power programme under arrangements approved by the Commonwealth Government. Two other companies in the South Alligator region in the Northern Territory also had contracts with the Authority for the British nuclear power programme. These contracts were for relatively small tonnages, and one has now been completed. Both companies began production in 1959.

3. Research.—The Commission's Lucas Heights Establishment is the major Australian centre for atomic energy research and information. It has a programme of research in the development of nuclear power, the utilization of radio-isotopes, and in other associated fields, directed towards the long-term development of the resources of the country.

The major research effort of the Lucas Heights establishment is the evaluation of a high-temperature gas-cooled reactor system in which the fuel is dispersed in the moderator.

A number of reactor types, e.g. those employing graphite as the moderating material and an inert gas such as helium as the coolant, are being developed overseas. For various reasons, including the avoidance of duplication of effort, the Commission decided to investigate the feasibility of using beryllium metal or beryllium oxide as the moderator, and carbon dioxide (which is cheap and easily obtainable) as the coolant. Most work has been done on the metal system and effort is now being concentrated on the oxide or ceramic system, which appears to offer greater promise in the long run.

With all-ceramic fuel, higher operating temperatures can be achieved. This permits a reduction in the size and cost of heat exchangers and associated civil works and an improvement in steam conditions and overall efficiency.

The development of a new power reactor concept to a commercially economic stage generally takes 15 to 20 years and involves considerable expense. Since a number of different types of reactors have already been developed to a commercial stage, a new concept faces strong competition, and its development can, in general be justified only if it offers promise of some long-term advantages. The beryllium oxide moderated all-ceramic fuel reactor holds such promise.

Provided certain design problems can be satisfactorily solved, a dispersed fuel beryllium oxide based high-temperature gas-cooled reactor should yield lower plant and equipment costs than most other gas-cooled systems.

The maximum gas temperature will be limited by the ability of materials used in parts of the heat exchangers and for duct work to withstand it. Nevertheless it should be possible to achieve steam conditions equal to those likely to be used in any future conventional plants. At present, using available steels which are economically practicable, the maximum temperature of the carbon dioxide coolant would appear to be 750° C., a considerable advance on British gas-cooled stations of current design. There is no obvious reason why this temperature should not be raised as better structural materials are developed. Then gas-turbines or other plant could be used as topping sets, as has been proposed for future development in the conventional power field.

Thus there is plenty of scope for development, and the general concept is unlikely to become prematurely obsolete.

The Commission is also seeking to extend the use of radio-isotopes in Australia in scientific research and development, in the treatment of disease, in raising production and lowering costs in agriculture and in manufacturing industry. New applications are being continually devised. In Australia, these new processes are being used only in a small fraction of the possible fields. The use of isotopes is fostered by providing an advisory service which is a ready source of information on established uses, and by investigation of other projected applications. Isotopes, including short-lived isotopes which cannot be economically imported, are being produced in the high flux research reactor HIFAR, and some are being exported.

Research and development work on technical and scientific applications of radiation is also being carried out. The possibilities of radiation for such purposes as industrial

sterilization, food preservation, and the control of insect pests are being investigated. Scientists at Lucas Heights are also studying the biological effects and questions of health and safety involved in the use of radio-active materials.

Lucas Heights is a centre of specialized equipment and information. In addition to the research reactor HIFAR, used for testing materials and producing radio isotopes, there is much other equipment unique in Australia. All these facilities are available to universities and other institutions under suitable conditions. In these endeavours, the Atomic Energy Commission is working in close co-operation with the British Atomic Energy Authority, under arrangements which give Australia access to results of British research on peaceful atomic energy uses. Results of research in Australia are in like manner available to Britain. Work in Australia, though constituting a self-contained programme, is co-ordinated with the British programme to avoid overlapping of research objectives and duplication of investigations. Australia also has bilateral arrangements with the United States and Canada, and is taking part in the promotion of the peaceful uses of atomic energy through the International Atomic Energy Agency.

### § 5. Scientific Societies

1. **Royal Societies.**—The following table contains the latest available statistical information regarding the Royal Society in each State, the headquarters of which are in the capital cities.

ROYAL SOCIETIES  
(December, 1962)

Particulars	Sydney	Mel- bourne	Bris- bane(a)	Ade- laide	Perth	Hobart	Can- berra
Year of charter .. ..	1866	1859	1884	1880	1913	1844	1930
Number of members ..	355	402	270	204	209	583	196
Volumes of transactions issued ..	96	(b) 950	74	85	45	96	..
Number of books in library ..	39,000	25,000	58,500	21,500	6,000	33,840	..
Societies on exchange list ..	388	350	288	297	194	316	..

(a) 1961.

(b) Volumes of proceedings.

2. **Australian Academy of Science.**—The Australian Academy of Science is the national institution representing science in Australia. Constituted by Royal Charter presented personally by Her Majesty, Queen Elizabeth II, in Canberra on 16th February, 1954, the Academy promotes scientific knowledge and research, maintains standards of scientific endeavour and achievement in the natural sciences in Australia, and recognizes outstanding contributions to the advancement of science.

The Academy represents Australian science and scientists at the national and international level, organizes meetings of scientists, holds symposia, and arranges for visits of scientists from other countries to Australia.

In its functions, the Australian Academy is comparable with the Royal Society of London and national academies of science of many other countries. Its 100 Fellows (designated F.A.A.) are eminent in some branch of the physical or biological sciences in Australia, occupying professional positions in universities, the Commonwealth Scientific and Industrial Research Organization, other research organizations, and industry. A very few places are reserved for Fellows who have rendered conspicuous service in the cause of science.

No more than six new Fellows are elected in any one year. His Royal Highness, Prince Philip, Duke of Edinburgh, was admitted as a Royal Fellow during his visit to Canberra on 20th November, 1962.

The Australian Academy contributed substantially to the work of the International Geophysical Year and has developed plans for Australian participation in the International Year of the Quiet Sun, from April, 1964, to December, 1965.

Representation is provided at the General Assemblies of the International Scientific Unions and similar bodies relating to astronomy, geophysics, geology, physics, crystallography, mathematics, biochemistry, physiology, geography, biological sciences, chemistry, Antarctic research, space research and oceanic research.

On certain national scientific projects and matters with scientific implications, the Commonwealth Government has sought the Academy's advice.

As the Australian Academy of Science is too young a body to be financially self-sufficient, the Commonwealth Government makes annual grants of general purpose and special funds without affecting the autonomy of the Academy. These grants, together with substantial private benefactions, enable the Academy to continue its work. Research fellowships provided by industry are administered.

The Academy's £250,000 copper-domed circular conference centre was opened in 1959. It was paid for by donations from companies and individuals.

The Academy is managed by an elected council comprising a President, Treasurer, two secretaries, and eight ordinary members who are drawn equally from the physical sciences and biological sciences. Chief administrative officer is the Assistant Secretary, who is not a Fellow.

3. **The Australian and New Zealand Association for the Advancement of Science.**—This association was founded in 1887. Its headquarters are at Science House, Gloucester Street, Sydney, and congresses are held at intervals of approximately eighteen months in the various States and in the Dominion of New Zealand. The latest congress, celebrating the 75th Jubilee, was held in Sydney in August, 1962.

4. **Other Scientific Societies.**—The Linnean Society of New South Wales, with headquarters in Sydney, was founded in 1874. Sir William Macleay, who died in 1891, during his lifetime and by his will endowed the Society to the amount of £67,000, which has been increased by investment to approximately £100,000. The Society offers annually to graduates of the University of Sydney who are members of the Society and resident in New South Wales research fellowships (Linnean Macleay Fellowships) in various branches of natural history. One fellowship was awarded for 1963. The library has some 19,000 volumes. Eighty-seven volumes of Proceedings have been issued, and the Society exchanges with about 300 kindred institutions and universities throughout the world. The membership at the end of 1962 was 267.

The British Astronomical Society has a branch in Sydney, and in each of the States there is a branch of the Australian Medical Association.

There are over 200 other learned societies devoted to the study of particular sciences. Some of these, including the Royal Australian Chemical Institute and the Institute of Engineers, Australia, are qualifying bodies, admission to which is by qualification only. Others, such as the Institute of Food Technologists, are open to any interested person. Some societies, such as the Australian Biochemical Society, have annual symposia of a very high standard. A great many of these bodies publish appropriate journals.

## STATE GOVERNMENT EXPENDITURE ON EDUCATION, SCIENCE AND ART

The expenditure by each State Government on education, science and art during the year 1960-61 is shown in the following table. Since details are not available in all States, the figures exclude officers' pensions and superannuation, pay-roll tax, and interest and sinking fund on capital expended on buildings. The cost of the medical and dental inspection of school children is also excluded, as this service is more appropriately classified under public health.

STATE EXPENDITURE ON EDUCATION, SCIENCE AND ART, 1960-61  
(£'000)

State	Expenditure from—				Receipts	Net expenditure
	Revenue	Loan	Other funds	Total		
New South Wales ..	58,690	15,691	..	74,380	1,247	73,133
Victoria .. ..	40,874	12,925	..	53,799	539	53,260
Queensland .. ..	18,036	4,101	1,549	23,686	1,094	22,592
South Australia ..	15,512	4,893	..	20,405	1,694	18,711

<b>Total .. ..</b>	<b>150,655</b>	<b>42,491</b>	<b>1,618</b>	<b>194,764</b>	<b>5,300</b>	<b>189,464</b>

## CHAPTER XIX

### LOCAL GOVERNMENT

**NOTE.**—This chapter includes, in addition to information on the operation of local government authorities, information on the operation of certain semi-governmental authorities. The latter information is not comprehensive for this type of authority, and is included partly because of the association of the functions performed with those of local government authorities, and partly for convenience in preparation. Particulars of the activities of other semi-governmental authorities, e.g. transport, electricity and gas, and banking undertakings, for which only some financial statistics are given in this chapter, are included in the chapters relevant to those subjects.

#### § 1. Introduction

**1. Local Government Authorities.**—In each State of the Commonwealth, there exists a system of local government whose powers and responsibilities are in general similar, and cover such matters as the construction and maintenance of roads, streets and bridges, water, sewerage and drainage systems, and health and sanitary services, the supervision of building, and the administration of regulations relating to items such as weights and measures, slaughtering, the registration of dogs, etc. In addition to these obligatory functions, there are also many which may be performed by a local government authority either with or without the consent of the ratepayers or the Governor-in-Council. These include transport facilities, electricity, gas, and other business undertakings, hospitals, charitable institutions, recreation grounds, parks, baths, libraries, museums, etc.

The system is based on the principle of a grant of specific powers by the State legislatures to the local authorities, their autonomy, however, being more or less limited by the provision for general supervision by a department of the central government or by the Governor-in-Council. Otherwise, within the scope of the Acts under which they are constituted or which they have to administer, they are responsible only to the ratepayers.

While the broad pattern of local government throughout the States of Australia is similar, the range of activities, election of officers, methods of valuation and rating powers, etc., differ considerably.

The areas over which local government bodies exercise general control, numbering 900, are known in New South Wales as cities, municipalities and shires; in Victoria as cities, towns, boroughs and shires; in Queensland as cities, towns and shires; in South Australia as cities, corporate towns and district council areas; in Western Australia as cities, towns and shires; and in Tasmania as cities and municipalities. In New South Wales, some local government authorities in an area have combined to provide services such as electricity, water, sewerage and drainage—e.g. the county councils. Within shires, there are also some municipal units known as urban areas. Apart from the more thinly populated parts of New South Wales and South Australia, and the Commonwealth Territories, practically the whole of Australia comes within local government jurisdiction.

The financial statistics in § 2 following are classified under the headings of Ordinary Services and Business Undertakings. The former covers the obligatory and general functions referred to above. Business Undertakings include public utilities such as water supply, sewerage, electricity, gas, transport and hydraulic power undertakings, and other miscellaneous works such as abattoirs, quarries, ice works, cinemas, etc.

**2. Semi-governmental Authorities.**—In addition to local government authorities, a large number of authorities have been set up to control specific activities, which are often identical with some of those performed by either, or both, of the other classes of public authority—central government and local government—and a complete picture of any field of activity for a State or Australia as a whole cannot be obtained without reference to each class operating in that particular field. These semi-governmental authorities differ primarily from local government authorities in that their operations are restricted to the specific activity for which they were constituted—e.g. roads and bridges, water and sewerage electricity and irrigation, harbours, or tramways, etc.—i.e. each dispenses a specific service throughout an area as distinct from the general services of the local authority.

In §§ 3 to 7, which deal with debt, roads and bridges, water supply and sewerage, harbours, and fire brigades, particulars are included of the more important of these authorities which operate within the range covered by this chapter.

3. **Roads, Bridges, etc.**—The construction and maintenance of roads, bridges and ferries are generally part of the functions of local authorities, but in each State there exists a central road authority or a government department whose duties relate to the construction, reconstruction and maintenance of "main" and "developmental" roads, the distribution of funds to local bodies, and the supervision and co-ordination of road construction and policy throughout the State. Owing to difficulty in obtaining complete particulars of receipts and expenditure of the various local governing bodies in respect of roads under their control, the details of receipts and expenditure given in § 4 are those of central governments only, relating either to the supervisory board or commission in the State or to direct activities of a department. However, estimates of the aggregate net expenditure of all public authorities concerned with roads and bridges in Australia are given in paragraph 10 of that section. In § 2, some information is given of the revenue and expenditure of local government authorities in respect of roads.

4. **Water Supply and Sewerage.**—In the cities of Sydney and Melbourne, the control of water supply and sewerage is in the hands of special boards, while in Adelaide and Perth these services are under the direct supervision of government departments. In most of the other cities and towns, the municipal councils or, in some cases, water trusts, are the controlling bodies, which either construct the works out of their own resources or take them over after they have been constructed by the government.

5. **Harbours.**—The majority of the harbours in Australia are managed by boards, the members of which are either elected by persons interested, or appointed by the government. In some instances, however, they are directly controlled by the government.

6. **Fire Brigades.**—In all the States, the management of fire brigades is undertaken by boards. These boards usually comprise members elected by the councils of municipalities and insurance companies within the districts placed under their jurisdiction, and one or more members appointed by the government. Occasionally, volunteer or country fire brigades are represented.

## § 2. Local Government Authorities

1. **New South Wales.**—For purposes of local government, the whole of the Eastern and Central land divisions and a small portion of the sparsely populated Western division have been divided into cities, municipalities (most principal towns) and shires (mainly large rural areas, some of which include important towns). At the end of 1961, the area incorporated was 272,000 square miles, or nearly nine-tenths of the total area of the State.

All local government authorities in the State are subject to the general provisions of the *Local Government Act*.

Municipalities and shires may combine to form county councils for the establishment and conduct of services of joint benefit, e.g. electricity, water, sewerage. At 31st December, 1961, there were 58 county councils, including the Sydney County Council.

2. **Victoria.**—Local government is established throughout the State, the various divisions being termed cities, towns, boroughs or shires. The only unincorporated areas are French Island (41,600 acres) in Westernport Bay, Lady Julia Percy Island (652 acres) off Port Fairy, Bass Strait Islands (966 acres), part of Gippsland Lakes (81,920 acres), and Tower Hill (1,460 acres) adjacent to the Borough of Kororoit. Melbourne and Geelong were incorporated under special statutes prior to the establishment of a general system of local government, but are now subject to several provisions of the *Local Government Act*.

3. **Queensland.**—The whole of the State (except certain islands along the coast, the Dawson Valley Irrigation Area and the Somerset Dam Area) is incorporated into cities, towns and shires under the *Local Authorities Act* 1902 and its amendments.

4. **South Australia.**—The settled portion of South Australia is incorporated, being mostly under municipal corporations in the larger cities and towns, and district councils in the agricultural areas.

5. **Western Australia.**—Local government is established throughout the State, the divisions being cities, towns and shires.

6. *Tasmania*.—The whole State is divided into municipal districts, Hobart and Launceston being incorporated as cities under separate Acts.

7. *Area, Population, Dwellings and Value of Ratable Property*.—The area, population, dwellings and value of ratable property in the incorporated areas of each State are shown for the year 1960-61 in the following table. The valuations relate to ratable property only and exclude government and other non-ratable property, whose value in the aggregate is considerable. In this table, particulars of dwellings are in accordance with the definition used in the 1961 Census, and are compiled from information collected on the Census Schedules. For the purpose of the Census, a dwelling was defined as any habitation occupied by a household group living together as a domestic unit, whether comprising the whole or only part of a building. The term has, therefore, a very wide reference and includes, in addition to houses and flats, a great variety of dwellings ranging from a single-roomed shack to a multi-roomed hotel or institution. Unoccupied dwellings include vacant dwellings available for sale and renting, "week-end" and holiday dwellings, and other dwellings temporarily unoccupied on the night of the Census. Dwellings being built are not included.

(a) Particulars of population and dwellings as at Census 30th June, 1961. (b) Year ended 31st December, 1960. (c) Not available. (d) Year ended 30th September, 1961. (e) Excludes Yallourn Works Area under the jurisdiction of the State Electricity Commission. (f) Year ended 30th June, 1961. (g) Includes City of Redcliffe and that part of Pine Rivers Shire within the Metropolitan Area of Brisbane but outside the Brisbane City area. (h) Municipalities—year ended 31st October, 1961; Road Districts—year ended 30th June, 1961.

8. **Finances.**—(i) *General.* The following tables show the latest available financial statistics for local government authorities. The figures relate to the year 1960-61 except for New South Wales, where they relate to the year 1960. For further detail on local government finances, see *Finance, Part I.—Public and Private Finance*, Bulletin No. 52, 1960-61, issued by this Bureau.

(ii) *Ordinary Services.* In the returns of revenue and expenditure for 1960-61 in the following tables, the proceeds from loans and expenditure thereof have been excluded. The financial operations of business undertakings controlled by the various local government authorities are given in the next paragraph. The profits resulting from the working of these undertakings, where taken into general revenue, have been included.

### § 3. Local and Semi-Governmental Authorities' Debt

1. **General.**—Statistics of local and semi-governmental debt for the years 1956-57 to 1960-61 are given in the following paragraph. The information covers all local government authorities and those semi-governmental authorities responsible for the provision of the following services.

*New South Wales.* Water Supply, Sewerage and Drainage, Electricity Supply, Fire Brigades, and Banking. County Councils are included among these authorities.

*Victoria.* Water Supply and Sewerage, Irrigation and Drainage, Harbours, Tramways, Electricity and Gas Supply, Fire Brigades, Marketing (Buying and Selling), Industry Assistance, Grain Elevators, Housing, and Miscellaneous.

*Queensland.* Water Supply and Sewerage, Irrigation and Drainage, Harbours, Electricity Supply, Fire Brigades, University, Hospitals and Ambulances, Marketing (Buying and Selling and Agency), and Industry Assistance.

*South Australia.* Irrigation and Drainage, Tramways, Electricity Supply, Fire Brigades, Hospitals and Ambulances, Marketing (Agency), Industry Assistance, Banking, Housing, and Miscellaneous.

*Western Australia.* Water Supply and Sewerage, Irrigation and Drainage, Harbours, Tramways, Electricity Supply, Fire Brigades, Hospitals and Ambulances, Marketing (Agency), Housing, and University of Western Australia.

*Tasmania.* Harbours, Electricity Supply, Fire Brigades, Transport, and Housing.

A detailed list of the authorities included is shown in *Finance, Part I—Public and Private Finance, Bulletin No. 52, 1960-61.*

2. **Local and Semi-Governmental Authorities' Debt.**—The following table provides a summary of new money loan raisings, provisions for debt redemption, debt outstanding and interest payable by local and semi-governmental authorities for the year ended 30th June, 1961. For greater detail, see *Finance, Part I—Public and Private Finance.*

Annual Interest Payable(a) ..	n.a.	31,297	5,129	7,011	2,983	4,809	n.a.

(a) Includes debt or interest payable in London and New York. Debt in London is payable in £ sterling which have been converted at the I.M.F. rate of £Stg.100 to £A.125; New York debt is payable in U.S. dollars which have been converted at the I.M.F. rate of \$2.24 to £A.1. (b) Included in debt figures above.

In the following tables, debt includes all liabilities for which arrangements have been made for repayment over a period of one year or more, and net overdrafts. Interest capitalized and amounts due for the capital cost of assets or for services rendered

which are to be repaid over a period of one year or more are included. Current liabilities, such as interest accrued (but not capitalized), trade creditors, amounts held in trust and other debts which are to be repaid in less than one year are not included. Net overdraft is the gross overdraft of all funds less all bank credit balances (including fixed deposits) which do not form part of a sinking fund to repay a loan. New loans raised during the year include new loan liabilities incurred during the year, loans raised from the public to repay indebtedness to the Government, and interest capitalized. Loans raised and redeemed within the year, increases in overdrafts, and loans raised for conversion or redemption of existing debt are excluded. Funds provided for redemption include instalments of principal repaid and amounts credited to sinking funds established for the purpose of repaying the debt on maturity. Amounts provided for redemption from loans raised for that purpose are excluded.

In the following table, a summary is given of new money loan raisings, provisions for the redemption of debt and debt outstanding of local and semi-governmental authorities for the years 1956-57 to 1960-61.

### § 4. Roads and Bridges

1. **Commonwealth Government Grants.**—The following table shows the allocation to the States under the several *Commonwealth Aid Roads Acts* for road construction, maintenance, repair and other works connected with transport for each of the years 1957–58 to 1961–62, and to the Commonwealth for expenditure on the construction and maintenance of strategic roads and for the promotion of road safety practices for each of the years 1957–58 and 1958–59. After 1st July, 1959, when the *Commonwealth Aid Roads Act* 1959 came into operation, the Commonwealth made separate provision for expenditure on strategic roads and the promotion of road safety practices. See also Chapter XXI. Public Finance, and *Finance* bulletins.

#### ROAD CONSTRUCTION, MAINTENANCE, ETC.: GRANTS UNDER THE COMMONWEALTH AID ROADS ACTS

(£'000)

Year ended 30th June—	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	C'wealth (a)	Total
1958 ..	9,495	6,264	6,585	3,879	6,658	1,733	1,000	35,614

1960 ..	12,172	8,660	8,021	4,922	7,964	2,184	..	43,923
1961 ..	12,870	9,184	8,428	5,128	8,090	2,300	..	46,000
1962 ..	13,811	10,080	9,093	5,752	8,764	2,500	..	50,000

(a) In the years prior to 1959–60, allocations under the *Commonwealth Aid Roads Act* 1954–1956 for expenditure on the construction and maintenance of strategic roads and the promotion of road safety practices.

2. **New South Wales.**—(i) *General.* A central road authority, known as the Main Roads Board, was created by legislation in 1925 for the purpose of providing improved and uniform standards of construction, reconstruction and maintenance of the principal roads of the State and to administer government subsidies for works on those roads. In 1932, the Main Roads administration was reorganized as a separate department under the control of a Commissioner. The activities of the Department of Main Roads include works on main, developmental and tourist roads throughout the State, all roads in the unincorporated portion of the Western Division, and certain associated works, principally bridges and vehicular ferries, constructed from government funds. The Department of Main Roads co-operates with the municipal and shire councils in the work of constructing and maintaining the main roads system.

Public roads, except those within the City of Sydney, may be proclaimed as main roads on the recommendation of the Commissioner for Main Roads, who takes into consideration the representations made by the councils concerned, availability of funds for construction and maintenance purposes, and the value of the roads as connecting links between centres of population or business. The classes of main roads are (i) the State highways, which form the principal avenues of road communication throughout the State and connect with similar avenues in other States; (ii) trunk roads, which, with the State highways, form the framework of a general system of intercommunication throughout the State; (iii) ordinary main roads, which provide a network of roads connecting towns and important centres of population with the State highways and trunk roads and with each other. In addition to the main roads, there are also (i) secondary roads (in the County of Cumberland), which carry a substantial volume of through traffic and thereby relieve neighbouring main roads of traffic, (ii) developmental roads, which help to develop country districts and (iii) tourist roads, which serve to make accessible areas or districts used by tourists.

In the County of Cumberland, which for the purposes of the *Main Roads Act* is deemed to include the City of Blue Mountains and small sections of other councils' areas on the boundary of the County of Cumberland, the full cost of road and bridge construction is paid from the funds of the Department of Main Roads. The Councils contribute towards the cost at the rate of  $\frac{1}{4}$ d. in the £ on the unimproved value of ratable property. The rate payable in respect of lands used principally for primary production is one-half the rate levied on other lands. In country districts, the Department meets the full cost of road and bridge works on State highways, the full cost of bridge works and three-quarters of the cost

of road works on trunk roads, and three-quarters of the cost of bridge works and two-thirds of the cost of road works on ordinary main roads. The cost of constructing developmental roads and works is borne in full by the Department of Main Roads, but local Councils are required to maintain them in a satisfactory condition. The Department of Main Roads meets half the cost of works on secondary roads and on tourist roads.

(ii) *Length of Roads.* (a) *Proclaimed Roads.* The total length of proclaimed roads in New South Wales at 30th June, 1962, was 25,540 miles classified as:—State highways, 6,493 miles; trunk roads, 4,163 miles; ordinary main roads, 11,647 miles; secondary roads, 100 miles; developmental roads, 3,083 miles; and tourist roads, 54 miles.

The length of main roads maintained by the Department of Main Roads at 30th June, 1962, was 5,268 miles (23.5 per cent.), while the length maintained by Councils was 17,035 miles (76.5 per cent.). These figures exclude secondary, developmental and tourist roads, and unclassified roads in the Western Division of the State. In the area outside the County of Cumberland (the metropolis and adjoining areas), the proportions of main roads maintained by the Department and Councils respectively were:—State highways, 64 per cent., 36 per cent.; and trunk and ordinary main roads, 5 per cent., 95 per cent. Unclassified roads in the Western Division of the State, totalling 1,031 miles, were maintained by the Department, while developmental roads, totalling 3,083 miles, were maintained by Councils. In the County of Cumberland, the proportions of main roads maintained by the Department and Councils respectively were:—State highways, 99 per cent., 1 per cent.; and ordinary main roads, 53 per cent., 47 per cent. Secondary roads totalling 100 miles were maintained by Councils. The 54 miles of tourist roads throughout the State were maintained by Councils.

(b) *Surface of Roads.* In 1960, the total length of all roads in New South Wales was estimated at 129,752 miles. The lengths of roads, according to their surface, were as follows:—bitumen or concrete, 18,476 miles; gravel or stone, 46,775 miles; formed only, 26,966 miles; cleared only, 37,535 miles.

(iii) *Main Roads Department.* (a) *General.* Progress has continued with the implementation of the Department's plan for main roads development in the County of Cumberland. Most of the Department's proposals have been incorporated in the County of Cumberland Planning Scheme approved by Parliament under the *Local Government (Amendment) Act 1951*.

The Department's proposals for the development of the main roads system in Newcastle and the surrounding districts have been largely incorporated in the Northumberland County District Planning Scheme, and some sections of the system have been constructed.

With some modifications, the Department's proposals for the planning of the main roads in the Wollongong-Port Kembla district have been incorporated in the planning scheme prepared by the Illawarra Planning Authority.

During 1961–62, 76 new bridges were constructed. In addition, 71 concrete box culverts each having a waterway width of 20 feet or more were completed. Major bridge works under construction included steel and/or concrete bridges over the Richmond River at Wardell on the Pacific Highway (length 736 feet); over the Richmond River at Ballina Street, Lismore, on the Bruxner Highway (length, 688 feet); over the Clyde River at Nelligen (length, 827 feet); over the Hunter River at Maitland (Belmore Bridge, length, 643 feet); over the Parramatta River at Gladesville (length, 1,900 feet); over the Lane Cove River at Fig Tree (length, 749 feet); over the Macquarie River at Gin Gin (length, 330 feet); over the Parramatta River at Silverwater (length, 657 feet); over the Darling River at Tilpa (length, 407 feet); and over the George's River at Taren Point (length, 1,662 feet).

(b) *Revenue and Expenditure.* The funds of the Department of Main Roads are derived principally from motor vehicle taxation, charges on heavy commercial goods vehicles under the *Road Maintenance (Contribution) Act 1958*, grants under *Commonwealth Aid Roads Acts* (see para. 1 above and Chapter XXI. Public Finance), other grants from the State or Commonwealth Governments, and proceeds of a levy on municipal and shire councils in the County of Cumberland in accordance with the *Main Roads Act 1924–1960*. The State Government also makes repayable advances for Main Roads Department works.

Revenue and expenditure for the five years 1957–58 to 1961–62 are shown below.

**DEPARTMENT OF MAIN ROADS, NEW SOUTH WALES:

(a) Excludes repayable advances by the State Government (£150,000 in 1957-58, £800,000 in 1959-60, £575,000 in 1960-61 and £635,000 in 1961-62) and transfers from Sydney Harbour Bridge Account for Expressway construction (£100,000 in 1958-59, £362,000 in 1959-60, £768,000 in 1960-61 and £1,822,000 in 1961-62. Expenditure from these amounts is fully reflected in Expenditure. (b) Excludes debt redemption (£39,966 in 1957-58, £42,717 in 1958-59, £45,981 in 1959-60, £48,816 in 1960-61 and £53,075 in 1961-62) and repayment of government advances (£298,073 in 1958-59 and £400,000 in 1960-61). (c) Mainly purchase of assets not subject to annual depreciation charge. The purchase of other assets is omitted here because the depreciation charge for them is reflected each year in "Roads and Bridges.

The figures shown above represent the aggregate revenue and expenditure of five funds—the County of Cumberland Main Roads General and Special Purposes Funds, the Country Main Roads General and Special Purposes Funds, and the Developmental Roads Fund.

(c) *Sydney Harbour Bridge.* The Sydney Harbour Bridge was opened for traffic on 19th March, 1932. The main span is 1,650 feet and clearance for shipping 176 feet from high water level. The deck, 160 feet wide, carries a roadway of eight traffic lanes and two railway tracks, and there is also a footway on each side. The capital cost of the bridge and associated roadways to 30th June, 1962, was £11,786,864, but this amount will be reduced slightly on completion of the disposal of the remaining surplus resumed property. The portion met from repayable loan funds, over £10,100,000, is repayable from toll income. Income for 1961-62 amounted to £1,775,000, including road tolls, £1,575,180; railway passenger tolls, £143,285; and omnibus passenger tolls, £15,804. Expenditure amounted to £1,109,000; including interest, exchange, floatation expenses, etc., £426,840; sinking fund, £133,850; maintenance, £288,133; and major improvements, £22,869. The accumulated surpluses of the Bridge Account have been used to finance conversion of tram tracks to roadway and construction of city expressways. From 1957-58 to 1961-62 a total of £988,665 was expended on tram track conversion and £3,052,000 on city expressways. The account showed a deficiency of £867,106 at 30th June, 1962. During 1961-62, 30,871,000 road vehicles (excluding omnibuses and exempt vehicles), 25,371,000 rail travellers and 14,414,000 omnibus travellers crossed the bridge, contributing respectively 91 per cent., 8 per cent., and 1 per cent. of the total toll revenue.

3. *Victoria.*—(i) *General.* With the object of improving the main roads of the State, the Country Roads Board was established by legislation passed in 1912. The principal duties of the Board are to determine which roads should be declared in the various classifications; to supervise the construction, reconstruction and maintenance of these roads; to inquire into the State's resources in road materials and the most effective methods of road construction and maintenance; and to recommend deviations in existing roads or the construction of new roads in order to facilitate communications or to improve the conditions of traffic.

(ii) *Length of Roads.* (a) *Declared Roads.* The total length of roads in Victoria declared by the Country Roads Board at 30th June, 1962, was 14,506 miles, classified as follows:—State highways, 4,498 miles; main roads, 9,112 miles; by-pass roads, 9 miles; tourist roads, 426 miles; forest roads, 461 miles. The length of the surface treated (black) or higher type of pavements included in the foregoing mileage was 11,480 miles or 79 per cent. of the total.

(b) *Surface of Roads.* It is estimated that, in addition to the 14,506 miles of classified roads, there were approximately 87,000 miles of unclassified roads at 30th June, 1962. The latest detailed estimate of the length of roads and streets in Victoria (as at 30th September, 1961) provides the following information:—bitumen or concrete, 21,633 miles; gravel or stone, 32,118 miles; formed only, 22,576 miles; cleared only, 25,500 miles; total, 101,827 miles.

(iii) *Country Roads Board.* (a) *General.* During 1961–62, 1,764 miles of declared roads under the Board's control were treated with bitumen. In addition, 931 miles of undeclared roads, for which the Board contributed funds, were similarly treated. The total length of bitumen treatment carried out in 1961–62 was 2,817 miles (including 122 miles for other authorities). Of the work on the roads under the Board's control in 1961–62, 534 miles related to State highways and by-pass roads.

During 1961–62, 199 bridge projects of an estimated total value of £2,119,000 were initiated. Of these, 128, estimated to cost £800,000, were under municipal supervision.

(b) *Receipts and Payments.* The funds of the Country Roads Board are derived principally from motor registration fees, two-thirds of all money received by way of owners' certificates, one half of drivers' licence fees, fines, payments by the Commonwealth Government under the *Commonwealth Aid Roads Acts*, road charges under the *Commercial Goods Vehicles Act* and repayments by municipalities. In addition, loans have been authorized from time to time under the *Country Roads Acts* for permanent works on main and developmental roads, State highways, tourists' roads and forest roads, while the State Government has provided, free of repayment, loan moneys for restoration of flood and bush fire damage. During the year ended 30th June, 1962, loan receipts and payments each amounted to £683,000. The total loan expenditure to 30th June, 1962, was £15,353,183. This figure does not include loan expenditure from the Developmental Roads Loan Account, a fund which was created for the purpose of constructing and maintaining subsidiary or developmental roads. Loan money raised on this account was exhausted at 30th June, 1937, the total expenditure at that date being £6,425,758.

<b>Total .. .. .</b>	<b>17,579,615</b>	<b>17,746,472</b>	<b>20,948,755</b>	<b>22,579,541</b>	<b>24,040,847</b>

(a) After costs of collection. Since 1950, one half of the drivers' licence fees has been credited to the funds of the Country Roads Board while the remaining half has been credited to the Municipalities Assistance Fund. (b) Owing to the gradual change-over in currency of drivers' licences from one year to two and three years, revenue from drivers' licences increased slightly in 1958-59, reached a peak in 1959-60, and thereafter declined to normal levels. (c) Excludes portion of *Commonwealth Aid Roads Acts* advances drawn by the Public Works Department for expenditure on wharfs, jetties, etc. (d) Includes £500,000 Special Grant from Commonwealth Government.

(iv) *Melbourne and Metropolitan Board of Works.* Since assuming responsibility for carrying-out planning scheme proposals relating to metropolitan highways and bridges, a tentative £20,000,000 construction programme of urgent highway works throughout the metropolitan area of Melbourne has been adopted and is being progressively implemented by the Board of Works. Expenditure on these projects up to 30th June, 1962, was £2,617,046.

(v) *Level Crossings.* In 1954-55, the Level Crossings Fund was created under the *Country Roads and Level Crossings Funds Act 1954* to finance (a) the elimination of level crossings or the provision of alternative routes to enable road traffic to avoid level crossings; (b) the provision of lights, signs, and lighting at, and the improvement of approaches to, level crossings; and (c) generally, the reduction of danger at level crossings. The Act provides for the payment into the Fund of one-third of all moneys received by way of additional motor registration fees (owner's certificates) and money provided under any other Act. The amount available for expenditure in 1961-62 was £478,845, comprising receipts from owners' certificates, £291,463, recoups, £167,646 and the balance brought forward from 1960-61, £19,736. Expenditure from the Fund amounted to £478,845, of which £343,070 was incurred by the Railways Department and the balance by the Country Roads Board.

4. *Queensland.*—(i) *General.* Under the *Main Roads Act 1920*, a Main Roads Board was constituted, consisting of three members appointed by the Governor-in-Council. In 1925, the Board was abolished and its powers conferred upon a single Commissioner. The Main Roads Commission was constituted a Department under the name of the Department of Main Roads in February, 1951, with the Commissioner of Main Roads as its permanent head. The duties of the Commissioner are to carry out surveys and investigations necessary to determine State highways, main, developmental, secondary, mining access, farmers' and tourist roads, and tourist tracks; and the responsibility for building and maintaining these declared roads is largely that of the Commissioner. Roads of purely local importance are constructed and maintained by local authorities. In many cases, construction is financed by the State Government by means of Treasury loans. Other roads may be built by the Public Estate Improvement Branch of the Lands Department in order to open up areas of previously inaccessible or undeveloped country.

(ii) *Length of Roads.* (a) *Declared Roads.* The total length of declared roads in Queensland at 30th June, 1961, was 20,650 miles; comprising State highways, 8,247 miles; main roads, 10,273 miles; developmental roads, 230 miles; and secondary roads, 1,900 miles. By the amendments to the *Main Roads Acts* published in the Government Gazette of 6th April, 1959, mining access, farmers' and tourists roads became secondary roads, and the provisions relating to the declaration of tourist tracks were repealed.

(b) *Surface of Roads.* The total length of roads and streets in Queensland at 30th June, 1962, was:—bitumen or concrete, 11,016 miles; gravel or stone, 19,850 miles; formed only, 41,265 miles; cleared only, 48,985 miles; total, 121,116 miles.

(iii) *Department of Main Roads.* (a) *General.* During 1960–61, the Department completed 1,368 miles of roads, including new construction and stage construction. Bridges of all types to a length of 7,188 linear feet were constructed, bringing the total constructed by the Department at 30th June, 1961, to 216,737 feet. In addition, at 30th June, 1961, 6,553 feet were under construction.

(b) *Receipts and Payments.* The funds of the Department of Main Roads are obtained chiefly from motor vehicle registration and collections, fees, etc. under the *Transport Acts*, contributions under the *Commonwealth Aid Roads Acts*, and loans, grants and advances from the State Government. The total receipts and payments, including amounts for defence works, during each of the years 1956–57 to 1960–61 are shown below.

5. South Australia.—(i) *General.* The Highways and Local Government Department is administered by the Commissioner of Highways, who is empowered, subject to the approval of the Minister of Roads, to undertake the construction, maintenance and protection of the principal roads of the State, allocate grants to councils for roadworks and supervise the expenditure of these grants, and assist Councils to purchase road-making plant and to defray the cost of roadworks. In addition, the Commissioner advises Councils on technical questions concerning the construction, maintenance or repair of roads.

(ii) *Source of Funds.* Funds of the Department are derived mainly from the Highways Fund, into which are paid the proceeds from motor vehicle registration and drivers' licences (less cost of collection), appropriations from loan funds, repayments of advances made to Councils and contributions by the Municipal Tramways Trust, and from contributions under the *Commonwealth Aid Roads Acts*.

(iii) *Length of Roads.* In South Australia, there are only two classifications of roads. These are main roads proclaimed under the provisions of the *Highways Act* and all other roads, commonly designated district roads. At 30th June, 1962, there were 8,188 miles of proclaimed main roads and 54,405 miles of district roads, totalling 62,593 miles. Lengths of road classified by surface were as follows:—Bitumen or concrete, 5,614 miles; gravel or stone, 13,360 miles; formed only, 15,326 miles; cleared only, 28,293 miles.

(iv) *State Highways and Local Government Department, Receipts and Payments.* The following table shows particulars of receipts and payments, during the years 1957–58 to 1961–62, of funds controlled by the Highways and Local Government Department.

#### HIGHWAYS AND LOCAL GOVERNMENT DEPARTMENT, SOUTH AUSTRALIA: RECEIPTS AND PAYMENTS

(a) Administrative expenses, amounting to £735,738 in 1959–60, £844,780 in 1960–61 and £1,006,179 in 1961–62, have been charged to construction and reconstruction of roads and bridges and to maintenance.

The total expenditure, both revenue and loan, by State and local governments on roads, streets and bridges in South Australia during the years 1957–58 to 1960–61 was, respectively, £9,889,000, £10,556,000, £12,277,000, and £13,517,646.

6. **Western Australia.**—(i) *General.* Work connected with road construction and maintenance and associated projects in Western Australia is undertaken by the State Government, through the Main Roads Department, and by local government authorities throughout the State.

Under the provisions of the *Main Roads Act*, the Main Roads Department was established in 1930 to replace the Main Roads Board originally constituted as a central road authority in 1926. The Department operates under the *Main Roads Act* 1930–1961, and is administered by a Commissioner of Main Roads responsible to the Minister for Works. The Act makes provision for public roads in the categories of main roads, controlled-access roads and developmental roads. An additional category, that of important secondary roads, is used by the Department in determining its works programme.

Main roads are those which provide communication between a large producing area, either actual or potential, and its market or nearest port or railway station, between two or more such areas, between large centres of population, or between the capital city and a large producing area or a large centre of population. Controlled-access roads do not permit direct access from abutting property and may be entered and departed from only at certain selected road connexions located at points which are considered to serve best the traffic for which the controlled-access roads were designed. Developmental roads are those which serve to initiate or increase the development of an area. Important secondary roads are those which, though originally classified as developmental, have come to be used consistently by through traffic and therefore warrant a special allocation of funds by the Main Roads Department. The Act provides that, on the recommendation of the Commissioner, any road may be proclaimed a main road and any main road may cease to be a main road.

The construction and maintenance of main roads and controlled-access roads are the responsibility of the Main Roads Department. The Department also makes substantial financial provision for the construction and maintenance of important secondary roads and for the construction of developmental roads.

Within its own district, each local government authority is responsible for the provision and upkeep of roads other than those provided by the Main Roads Department. In addition, the local authority is required by the *Main Roads Act* to maintain any developmental road situated in its district.

(ii) *Length and Surface of Roads.* (a) *General.* The total length of roads and streets in Western Australia at 30th June, 1962, was made up as follows:—bitumen or concrete, 9,850 miles; gravel or stone, 20,097 miles; formed only, 41,283 miles; cleared only, 23,017 miles; natural state, 71 miles; total, 94,318 miles.

(b) *Roads under Main Roads Act.* The total length of roads for which financial provision was made by the Main Roads Department at the 30th June, 1962, was:—declared main roads, 3,542 miles, including 76 miles of controlled-access of which 5 miles have been constructed; important secondary roads, 7,538 miles; and developmental roads, 23,197 miles.

(iii) *Main Roads Department.* (a) *General.* During the year 1961–62, the activities of the Department included clearing, 1,884 miles; forming, 2,920 miles; gravelling, 1,790 miles; reconditioning, 5,900 miles; and stabilizing, 244 miles. In addition, 1,716 miles were primed and sealed (including widening) and 19 bridges constructed.

(b) *Receipts and Payments.* The funds of the Main Roads Department are derived principally from allocations made under the *Commonwealth Aid Roads Act* 1959. In addition, financial assistance was given by the Commonwealth Government in 1961–62 to the extent of £500,000 for the improvement of roads used for the transport of beef cattle in the Kimberley District. Further legislation during 1962 provided for an extension of this special assistance for a total of five years, involving in all £3,450,000, subject to the expenditure by the State of the same amount on such projects during this period. During 1961–62 also, the sum of £160,000 was granted by the Commonwealth Government and matched by a similar State contribution for the restoration of roads damaged during the severe floods in the north-west in early 1961. Other sources of income include one-half of the net amount of traffic fees collected in the Metropolitan Traffic Area and an allocation of Transport Board funds. (Outside the Metropolitan Traffic Area, motor vehicle licence fees are collected and retained by the local authorities.) Receipts and payments for the years 1957–58 to 1961–62 are shown in the following table.

**MAIN ROADS DEPARTMENT, WESTERN AUSTRALIA:  
RECEIPTS AND PAYMENTS**

(a) Includes amounts to be distributed to metropolitan and country local authorities early in the following year. (b) Includes administration and expenditure on hire and maintenance of road construction plant, etc., and on purchase of materials.

7. Tasmania.—(i) *General.* Under the *Road Construction (Transfer of Functions) Act* 1951, which came into operation on 1st July, 1951, the control of the construction and maintenance of roads and certain road making plant was vested in the Minister for Lands and Works. Works authorized by the Minister in respect of roads classified as State highways, tourist, and developmental roads are constructed by the Department of Public Works and financed from the State Highways Trust Fund, into which are paid the proceeds from Commonwealth Aid Roads grants, motor vehicle registration fees and taxes, licence fees for drivers and public transport, and other moneys made available by Parliament. In addition, provision was made under the *Road Construction (Transfer of Functions) Act* for certain works authorized by the Transport Commission to be carried out and constructed by the Department. The expenditure by the Public Works Department during 1960-61 on the construction of roads, tracks and bridges amounted to £6,273,000, of which £3,571,000 was charged to road funds, £28,000 to revenue, £2,624,000 to loan and £50,000 to other funds. Except in special cases, municipal councils bear the cost of maintaining country roads and a proportion of the cost of main and secondary roads.

(ii) *Length of Roads.* (a) *Classified Roads.* The mileages of classified roads in Tasmania at 30th June, 1962, were as follows:—State highways, 1,156 miles; main roads, 666 miles; secondary roads, 196 miles; tourist roads, 46 miles; developmental roads, 16 miles; other roads, 135 miles; total, 2,215 miles; total roads, excluding State roads, 9,678 miles. The mileages of sealed roads, and their proportions to the respective totals were:—State highways, 752 miles (65 per cent.); main roads, 368 miles (55 per cent.); secondary and other roads, 57 miles (17 per cent.); total, 1,177 miles (53 per cent. of all classified roads, and 10 per cent. of all roads in Tasmania).

(b) *Surface of Roads.* The length of all roads in Tasmania, including those with surfaces of lower grade, at 30th June, 1962, was as follows:—bitumen or concrete, 2,052 miles, gravel or stone, 8,340 miles; formed only and cleared only, 1,501 miles; total, 11,893 miles.

(iii) *Receipts and Payments—Combined Road Funds.* The table below shows particulars of the receipts and payments of the combined Road Funds for the years 1957–58 to 1961–62.

of £103,456 under Commonwealth Employment Stimulation Grant.

(b) Include grants

8. *Northern Territory.*—Information relating to the length of roads in the Northern Territory may be found in Chapter V. Territories, of this Year Book (see p. 118).

9. *Summary of Roads used for General Traffic.*—(i) *Proclaimed or Declared Roads.* The table hereunder is a summary of the roads proclaimed or declared under the Acts of the several States relative to the operations of the central road authorities, and shows the lengths of various classes proclaimed or declared as at 30th June, 1962. The central road authority in each State assumes responsibility under the Act for the whole, or a proportion, of the cost of construction and/or maintenance of these roads, the extent varying from State to State and with the class and locality of the roads. Before proclamation of a main road, consideration is given, in general, to the following points:—availability of funds; whether the road is, or will be, within one of several classes of main trunk routes; whether the district is, or will be, sufficiently served by railways. Provision is also made in some States for the declaration of roads other than main roads. The absence of a particular class in any State does not necessarily imply that there are no roads within that State that might be so classified; the classes are restricted only to roads proclaimed or declared under the Acts. A further point to make is that, through various causes, e.g. insufficiency of funds, man-power or materials, etc., construction or maintenance may not keep pace with gazettals of mileages, and, therefore, the condition of a road may not match its status.

**PROCLAIMED OR DECLARED ROADS: LENGTHS, 30th JUNE, 1962**  
(Miles)

10. *Aggregate Net Expenditure on Roads and Bridges in Australia.*—In most States, there are three classes of authorities concerned with roads and bridges, the State Government, the central road authority and numerous local government bodies. The Commonwealth Government, in addition to the grants it makes to the States for road purposes, is concerned with roads in the Northern Territory and the Australian Capital Territory and roads of access to Commonwealth property in the various States. Some information relating to Commonwealth grants to the States for road purposes and particulars of the expenditure on roads and bridges by local government bodies and the central road authorities are given in preceding sections of this chapter.

Most of these authorities may expend money directly on road construction or indirectly by means of grants and payments to other authorities. These indirect payments, if included in an aggregate, would duplicate expenditure; this together with the fact that some authorities are unable to supply separate information concerning their road expenditure, makes it difficult to compile precise statistics of aggregate expenditure on roads and bridges.

The information in the following table, which is partly estimated and which excludes the main indirect payments, provides an approximate measure of the aggregate net expenditure by all public authorities on roads and bridges in Australia during each of the years ended 30th June, 1958 to 1962. The figures cover expenditure from revenue and loan funds on the construction, reconstruction and maintenance of roads and bridges, and direct administration but not debt charges. Because of the difficulties associated with the indirect payments mentioned above, it is not possible to give separate net details for each authority.

**PUBLIC AUTHORITY NET EXPENDITURE ON ROADS AND BRIDGES**

### § 5. Water Supply, Sewerage and Drainage

**NOTE.**—The information in this section relates primarily to the metropolitan areas and provincial cities and towns. For information on water supply and irrigation in rural areas see Chapter VIII. Water Conservation and Irrigation.

1. New South Wales.—(i) *General.* The two largest domestic water supply and sewerage systems are controlled by statutory boards, each consisting of a president and a vice-president appointed by the State Government, and five members elected by local councils. These are (a) the Metropolitan Water, Sewerage and Drainage Board, which administers the systems in the County of Cumberland, i.e. in Sydney and in the surrounding districts, and, in addition, has jurisdiction over territory extending along the South Coast beyond Wollongong to Lake Illawarra and Shellharbour, and (b) the Hunter District Water Board serving the Newcastle-Maitland-Cessnock areas. At Broken Hill, a similar board includes a representative of the mining companies. Other systems, apart from irrigation projects and water storage systems administered by the State Government, are controlled by county, municipal or shire councils.

(ii) *Water Supply*—to 30th June, 1962. (a) *Metropolitan.* The storage reservoirs of the metropolitan system, with a combined available capacity of 577,122 million gallons, drain catchment areas of 3,788 square miles (Warragamba, 3,412 square miles, Upper Nepean, 347 square miles, and Woronora, 29 square miles). The development of a water supply system on the Warragamba River was completed with the official opening of the Warragamba Dam in October, 1960. This dam, constructed in concrete, has a storage capacity of 452,505 million gallons. Its safe net draught is estimated to be 285 million gallons a day. A hydro-electric power station at the dam generates 50,000 kWh a day. At 30th June, 1962, there were 135 service reservoirs in use with a combined capacity of 616 million gallons. Rating for water for 1961-62 was 10d. in the £1 of assessed annual value and the charge for water measured by meters 2s. 9d. per 1,000 gallons.

(b) *Hunter District.* The water supply is drawn from two sources:—the Chichester Reservoir, with a storage capacity of about 5,000 million gallons and draining a catchment of 76 square miles, and the Tomago Sandbeds, which extend northerly along the coast towards Port Stephens. Service reservoirs and tanks distributed throughout the Water Supply District have a total storage capacity of 115 million gallons. Water rating for 1961–62 was 1s. 5½d. in the £1 on assessed annual value for occupied properties and 1s. 2½d. in the £1 for unoccupied properties. The price of water to domestic and industrial consumers is 2s. 9d. per 1,000 gallons.

(c) *Water Supplied, etc.* The following tables show, for the Metropolitan and Hunter District systems, the number of properties, the estimated population supplied, and other details.

## WATER SUPPLY, METROPOLITAN(a): SERVICES

Year	Improved properties for which water mains available	Estimated population supplied	Average daily consumption	Total consumption for the year	Average daily consumption		Length of mains	Number of meters
					Per property	Per head of estimated population		
		'000	Mill. gals.	Mill. gals.	Gallons	Gallons	Miles	
1957–58 ..	561,934	2,148	183.6	67,016	331	86.1	6,055	340,364
1958–59 ..	579,900	2,212	198.9	72,624	348	91.3	6,246	362,130
1959–60 ..	598,893	2,264	200.9	73,529	335	88.7	6,450	382,180
1960–61 ..	620,944	2,341	219.1	79,988	353	93.6	6,664	411,731
1961–62 ..	634,139	2,481	220.7	80,556	348	89.0	6,945	430,588

(a) County of Cumberland, City of Greater Wollongong and Shellharbour Municipality.

## WATER SUPPLY, HUNTER DISTRICT(a): SERVICES

Year	Properties supplied	Estimated population supplied	Average daily consumption	Total consumption for year	Average daily consumption		Length of mains
					Per property	Per head of estimated population	
			Mill. gals.	Mill. gals.	Gallons	Gallons	Miles
1957–58 ..	78,954	r 266,628	29.5	10,753	373	r 110.5	1,410
1958–59 ..	81,398	r 274,881	28.2	10,281	346	r 102.5	1,439
1959–60 ..	84,497	r 285,346	28.6	10,474	339	r 100.3	1,460
1960–61 ..	86,032	r 290,530	29.7	10,854	346	r 102.4	1,483
1961–62 ..	87,792	296,502	31.7	11,555	361	106.8	1,512

(a) Newcastle, Maitland and Cessnock areas.

(iii) *Sewerage and Drainage—to 30th June, 1962.* (a) *Metropolitan.* Sydney and suburbs are served by three major sewerage systems and seven minor systems, consisting of six outfalls discharging directly into the Pacific Ocean, and four treatment works. In addition, five centres outside the metropolitan area (Camden, Campbelltown, St. Mary's, Port Kembla and Wollongong) are served by local treatment works.

Stormwater drainage channels under the control of the Metropolitan Water, Sewerage and Drainage Board at 30th June, 1962, were 178 miles long. Sewerage rating for 1961–62 was 9½d. in the £1 of assessed annual value, and drainage rating 1½d. in the £1.

(b) *Hunter District.* The main sewerage system serves the City of Newcastle and discharges into the Pacific Ocean at Merewether Gulf. There are also local treatment works at Maitland, Cessnock and some of the outlying districts.

Sewerage rates for 1961–62 were 1s. 0½d. in the £1 of assessed annual value of occupied lands and 9½d. in the £1 for unoccupied lands, and drainage rates (on certain areas served) 1½d. in the £1.

(c) *Particulars of Services.* The following table gives, for the Metropolitan system, details of sewerage services and stormwater drains.

### SEWERAGE AND DRAINAGE, METROPOLITAN(a): SERVICES

At 30th June—				Improved properties for which sewerage available	Estimated population served	Lengths of sewers	Length of stormwater channels
					'000	Miles	Miles
1958..	..	..	..	364,712	1,483	3,628	180
1959..	..	..	..	379,069	1,520	3,791	180
1960..	..	..	..	395,869	1,560	4,021	180
1961..	..	..	..	412,034	1,620	4,231	180
1962..	..	..	..	426,333	1,710	4,489	178

(a) County of Cumberland, City of Greater Wollongong and Shellharbour Municipality.

At 30th June, 1962, 61,362 premises had been connected to the Hunter District Water Board's sewerage system (Newcastle-Maitland-Cessnock areas). The total length of sewers under the Board's control was 852 miles, and the length of drains was 50 miles.

(iv) *Finances, Metropolitan and Hunter District Systems.* The following table shows the debt, revenue and expenditure of the Metropolitan Water, Sewerage and Drainage Board and the Hunter District Water Board for each of the services of water supply, sewerage and drainage during 1961-62, and for the three services combined for the years 1957-58 to 1960-61.

### WATER SUPPLY, SEWERAGE AND DRAINAGE, METROPOLITAN AND HUNTER DISTRICT: FINANCES

(a) Includes provision for renewals, long service leave, loss on exchange, etc. (b) County of Cumberland, City of Greater Wollongong, Shellharbour Municipality. (c) Newcastle-Maitland-Cessnock areas.

(v) *Country Water Supply and Sewerage Systems.* (a) *Local Government.* At 31st December, 1960, country water supply services were conducted or under construction by 52 municipalities, 80 shires and 5 county councils, and country sewerage services by 51 municipalities and 32 shires. The capital indebtedness of these schemes was £29,771,775 at 31st December, 1960, namely, £20,364,170 for water and £9,407,605 for sewerage. Debt of the municipalities amounted to £16,314,406, shires to £9,173,661 and county councils to £4,283,708. Government advances amounting to £481,700 are included in these figures. Aggregate income and expenditure amounted to £4,999,442 and £3,837,230, respectively, in 1960.

(b) *Other.* The water supply and sewerage services for Broken Hill are operated by a statutory board, the Broken Hill Water Board. Its capital indebtedness at 31st December, 1961, was £3,318,816. In 1961, income (excluding subsidies, State Government, £109,342 and mining companies, £323,942) amounted to £275,336 and expenditure (excluding debt redemption, £228,186) amounted to £480,865.

The following country water supply systems—South-West Tablelands, Junee and Fish River—are administered by the Department of Public Works. These supply water in bulk to municipalities and shires, the Railways Department, and other large consumers. Only a small quantity is sold direct to private consumers. The capital indebtedness of these systems was £6,248,139 at 31st December, 1961.

The Mulwala Water Supply and Sewerage Service was constructed as an urgent war-time work for the Commonwealth, and the Bethungra Water Supply System is administered by the Department of Public Works in conjunction with the Junee supply.

2. *Victoria.*—(i) *Melbourne and Metropolitan Board of Works.* (a) *General.* The Board consists of a Chairman and 51 Commissioners elected to represent the municipalities which lie wholly or partly within the metropolitan area. The Chairman is elected by the Commissioners for a four-year term. The principal functions of the Board are:—to control and manage the metropolitan water supply system; to provide the metropolitan area with an efficient main and general sewerage system; to deal with main drains and main drainage works; to control and manage the rivers, creeks and watercourses within the metropolitan area, and to carry out the functions of a permanent planning authority.

(b) *Water Supply.* There are six storage reservoirs serving the metropolitan area—Yan Yean, 7,233 million gallons (available for consumption, 6,649 million gallons); Toorourong, 60 million gallons; Maroondah, 6,289 million gallons (4,870 million gallons); O'Shannassy, 930 million gallons; Silvan, 8,853 million gallons (8,823 million gallons); and Upper Yarra, 45,400 million gallons (44,120 million gallons); total 68,765 million gallons (65,452 million gallons). Service reservoirs number 37, with a total capacity of 366 million gallons.

The water rate levied by the Board in 1961–62 was 8d. in the £1 on the net annual value of the properties served. The charge for water consumed in excess of the quantity which, at 2s. 0d. per 1,000 gallons, would equal the assessed water rates on each property, was 2s. 0d. per 1,000 gallons. The following table shows particulars of Melbourne metropolitan water supply services for the years 1957–58 to 1961–62.

WATER SUPPLY, MELBOURNE: SERVICES

Year	Number of houses supplied	Estimated population supplied	Average daily consumption	Total consumption for the year	Average daily consumption		Length of aqueducts, etc., mains and reticulation	Number of meters
					Per house	Per head of estimated population		
		'000	Mill. gals.	Mill. gals.	Gallons	Gallons	Miles	
1957–58 ..	454,853	1,637	128.8	47,006	283	78.7	4,721	317,670
1958–59 ..	483,410	1,740	134.0	48,917	277	77.0	4,942	344,702
1959–60 ..	496,841	1,789	145.3	53,169	292	81.2	5,109	366,905
1960–61 ..	510,078	1,836	152.9	55,822	300	83.3	5,245	392,396
1961–62 ..	519,216	1,869	157.6	57,521	304	84.3	5,477	422,318

(c) *Sewerage and Drainage.* Particulars of sewerage and drainage services for 1957-58 to 1961-62 are shown below. The rate levied in 1961-62 in respect of sewerage was 1s. 2d. in the £1 on the net annual value of the property served. The drainage rate was 2d. in the £1.

#### SEWERAGE AND DRAINAGE, MELBOURNE: SERVICES

Year	Number of houses for which sewers are provided	Estimated population for which sewers are provided	Average daily pumping	Total sewage pumped for the year	Average daily pumping		Length of sewers, etc.	Length of main drains
					Per house	Per head of estimated population		
		'000	Mill. gals.	Mill. gals.	Gallons	Gallons	Miles	Miles
1957-58 ..	373,019	1,343	75.0	27,379	201.1	55.8	3,256	169
1958-59 ..	378,738	1,363	78.7	28,716	207.8	57.7	3,350	176
1959-60 ..	384,844	1,385	83.2	30,459	216.2	60.1	3,458	181
1960-61 ..	395,109	1,422	88.1	32,159	223.0	62.0	3,550	193
1961-62 ..	399,890	1,440	83.0	30,308	207.6	57.7	3,665	198

The metropolitan sewerage system consists of the main system (serving an area of 84,842 acres) and five subsidiary systems—the Sunshine system (serving an area of 2,118 acres), the Laverton system (serving an area of 108 acres), the Kew system (serving an area of 112 acres), the South-eastern system (serving an area of 3,318 acres in Cheltenham, Parkdale, Mentone and Mordialloc), and the Maribymong system (serving an area of 125 acres). The Metropolitan Sewage Farm, 26,811 acres in extent and situated about 24 miles south-west of Melbourne beyond the township of Werribee, serves to purify and dispose of approximately 98 per cent. of the sewage flow of the metropolis before its discharge into Port Philip Bay. The total capital cost (less depreciation) of the farm to 30th June, 1962, was £4,180,671. Revenue during 1961-62 amounted to £183,339, cost of sewage disposal to £250,355, trading expenses to £126,562, interest to £211,891, and net cost of sewerage purification to £405,469. These financial particulars are included in the sewerage items of the summary below.

(d) *Finances.* The following table provides for the year 1961-62 a summary of the financial operations of the water supply, sewerage and drainage services conducted by the Melbourne and Metropolitan Board of Works, and of the combined services for the years 1957-58 to 1960-61.

#### MELBOURNE AND METROPOLITAN BOARD OF WORKS: FINANCES

1957-58	79,439,722	6,962,750	3,485,745	3,287,070	170,507	6,943,322	+ 19,428

(a) Total loan indebtedness—1961-62, £107,919,380.

(b) Statutory and general expenditure not distributed over services.

(ii) *State Rivers and Water Supply Commission.* (a) *General.* Water supply and conservation throughout Victoria (except for the area controlled by the Melbourne and Metropolitan Board of Works) is the responsibility of the State Rivers and Water Supply Commission. The events leading to the establishment of the Commission, and its works in the spheres of irrigation, domestic and stock water supply to farms, drainage, flood protection and river improvement, have already been described in Chapter VIII.; this section is therefore confined to the Commission's functions in connexion with urban water supply and sewerage.

(b) *Water Supply.* At 30th June, 1962, the Commission provided a reticulated water supply from its own works to 136 cities and towns having a combined population of 203,000 persons.

The principal systems operated by the Commission serve part of the Mornington Peninsula—Dandenong area (about 93,000 people supplied); Bendigo, Castlemaine, etc. (56,000); and about 8,000 people in the Western District. In addition, 10,000 persons in a number of towns in the Bellarine Peninsula receive supply through a Commission-operated distributary system from headworks controlled by the Geelong Waterworks and Sewerage Trust.

Outside these areas, the Commission supplies mainly small towns in the north of the State, in areas where it also supplies farms with water for irrigation or domestic and stock purposes.

Capital expenditure at 30th June, 1962, net of redemption payments, was divided up as follows between the several systems:—Mornington Peninsula, £8,350,000; Bendigo, Castlemaine, £4,075,000; Bellarine Peninsula, £800,000; Otway System (Western District), £725,000; other, £1,550,000; total, £15,500,000.

In addition to the towns supplied by the Commission, there are approximately 553,000 people in 191 cities and towns throughout the State who get a reticulated water supply from works operated by local authorities.

All these authorities operate under the supervision of the State Rivers and Water Supply Commission, largely because the government subsidizes their capital expenditure. Most new works are financed from government loan funds, but in recent years some local authorities have been able to borrow money privately. In most cases, the local authority controls both headworks and distribution system, but a few large towns—serving about 50,000 people—draw their water from the State Rivers and Water Supply Commission and are concerned only with reticulation of the water. Together, therefore, the Commission and local authorities supply 329 urban centres containing more than 750,000 people. Very few towns of any importance are now without a reticulated water supply.

The following table presents the financial position in respect of town water supply at 30th June, 1962.

**TOWN WATER SUPPLY, VICTORIA: CAPITAL LIABILITY, 30TH JUNE, 1962**  
(£'000)

Particulars	Water supply provided by—		
	Local authorities	State Rivers and Water Supply Commission	Total
Government advances .. .. .	20,650	16,225	36,875
Private loans .. .. .	1,550	..	1,550
Total Expenditure .. .. .	22,200	16,225	38,425
Redemption and repayments .. .. .	1,500	725	2,225
Loan Expenditure Outstanding .. .. .	20,700	15,500	36,200
Borne by State .. .. .	4,300	8,200	12,500
Borne locally .. .. .	16,400	7,300	23,700

The proportion of loan capital borne by the State is much higher in the case of Commission undertakings than for towns supplied by local authorities. This is because most Commission undertakings have been developmental in nature. Besides interest on capital borne by it, the State pays the difference between three per cent. and the actual rate paid on practically all the capital carried locally. The total annual subsidy on country town water supply is currently about £850,000.

(c) *Sewerage.* With the exception of the town of Eildon whose sewerage system is controlled directly by the State Rivers and Water Supply Commission, the construction and management of sewerage works in Victoria's country cities and towns are the responsibility of local authorities supervised by the Commission. Except for the Geelong Waterworks and Sewerage Trust and the Latrobe Valley Water and Sewerage Board which have special Acts dealing with their activities, all sewerage authorities operate under the *Sewerage Districts Act*.

At 30th June, 1962, there were 44 cities and towns with sewerage systems in operation. These contained about 410,000 persons, approximately a third of the total number of residents outside the metropolitan area.

Expenditure on sewerage in Victorian country towns at 30th June, 1962, was approximately £18,750,000, of which some £15,000,000 had been advanced by private lenders. The annual State subsidy on country sewerage in Victoria is currently about £250,000, provided mainly in the form of subsidies on interest rates paid, along the same lines as for town water supply. Comparatively little capital is borne directly by the State.

(iii) *Geelong Waterworks and Sewerage Trust.* (a) *General.* The Geelong Waterworks and Sewerage Trust was constituted in 1908 and reconstituted under the *Geelong Waterworks and Sewerage Act* in 1910. It was further reconstituted in September, 1950, to include a government nominee (Chairman), and provision was made for a commissioner to be elected by the ratepayers of the Shire of Corio, making a total of seven commissioners. The amount of loan money which may be raised is limited to £6,500,000 for water supply undertakings, and £5,000,000 for sewerage undertakings. The population supplied is estimated by the Trust at 96,723 persons. This and other general information relates to 30th June, 1962.

(b) *Water Supply.* The Trust operates two systems for gathering and storing water, in both systems the water being brought over fifty miles to Geelong. There are seven storage reservoirs and eleven service basins whose total storage capacity is 8,640 million gallons. The length of water mains and reticulation is 517 miles. The total expenditure on water supply to 30th June, 1962, was £5,045,085. General fund expenditure for 1961-62 comprised £156,078 for working expenses and £324,805 for interest, redemption and reserves, while revenue amounted to £501,304. The sinking fund appropriations at June, 1962, amounted to £303,555. The replacement and contingencies reserve amounted to £335,785. There is a water rate of 1s. 7d. in the £1 (with minima of 10s. for vacant land and £1 for tenements) on the net annual value of ratable properties.

(c) *Sewerage Works.* The sewerage scheme consists of a main outfall sewer to the ocean and 258.8 miles of main and reticulation sewers. The sewerage area is 11,851 acres, and the number of buildings connected within the sewered areas is 21,535. The total expenditure on sewerage works to 30th June, 1962, was £2,268,824. The revenue in 1961-62 amounted to £256,885, and the general fund expenditure comprised £93,297 on working expenses and £143,322 on interest, redemption and reserves. Sinking fund appropriations at June, 1962, were £192,660. Replacement and contingencies reserve amounted to £361,421. A general rate of 1s. 4d. in the £1 is levied on the net annual value of ratable properties.

(iv) *The Ballarat Water Commissioners and the Ballarat Sewerage Authority.* (a) *General.* The body known as the Ballarat Water Commissioners was constituted on 1st July, 1880, and the Ballarat Sewerage Authority on 30th November, 1920. The members of the Water Commissioners constitute the Sewerage Authority. The Commissioners number nine, three (one of whom is chairman) being appointed by the Government, four being elected by the Council of the City of Ballarat, one being elected by the Councils of the Borough of Sebastopol and the Shires of Buninyong and Grenville and one being elected by the Councils of the Shires of Bungaree and Ballarat. General and financial information given herein relates to the year ended 31st December, 1962.

(b) *Water Supply.* The water supply district comprises an area of about 65 square miles, containing a population of about 59,000. The total storage capacity of the seven reservoirs is 5,606 million gallons and the catchment area is 24,182 acres.

The capital cost of construction of the waterworks was £2,720,483 to 31st December, 1962. The liabilities amounted to £1,662,354 at 31st December, 1962, including loans due to the Government totalling £1,529,376. The revenue for the year 1962 was £190,632. Working expenses during 1962 amounted to £107,054 and interest and other charges to £81,336. A water rate of 1s. 1d. in the £1 on the net annual valuation is levied, with a minimum charge of £1 10s. per annum on any ratable property.

(c) *Sewerage.* The Ballarat sewerage district comprises the City of Ballarat and parts of the Shires of Ballarat, Bungaree and Grenville and the Borough of Sebastopol. There are more than 170 miles of sewers. The capital cost of sewerage construction works to 31st December, 1962, was £1,681,978. Two hundred and eighteen sewered areas had been declared as at 31st December, 1962. Assessments in the sewerage district numbered 19,621, while those in sewered areas numbered 14,866. There were 12,833 buildings connected.

The scheme is financed by debenture-issue loans from various financial institutions. The liabilities on account of loans secured for construction at 31st December, 1962, amounted to £1,376,681; redemption payments at that date totalled £329,892. House connexions financed by the Authority numbered 3,843. Revenue during 1962 amounted to £147,186, and expenditure, which included £88,188 on interest and redemption, was £146,299.

A sewerage rate of 1s. 4d. in the £1 on the net annual valuation is levied, with a minimum charge of £3 on any ratable property.

(v) *Latrobe Valley Water and Sewerage Board.* (a) *General.* The Latrobe Valley Water and Sewerage Board was constituted on 1st July, 1954. The Board consists of seven members, namely:—two Government nominees (one of whom is Manager and also Board Chairman), three members elected by water supply, sewerage and river improvement authorities within the Latrobe Valley, and one representative each of the State Electricity Commission of Victoria and the Gas and Fuel Corporation of Victoria.

(b) *Water Supply.* The Board is empowered to construct water supply works within the Latrobe Valley, but at present its main construction activities are confined to the central industrialized areas, particularly around the towns of Morwell and Traralgon. At 30th June, 1962, work was virtually completed on a reservoir with a capacity of 7,000 million gallons on the Upper Tyers River and a 60-inch diameter pipeline connecting that reservoir to the existing distribution mains. The capital cost of construction of the water works was £4,512,300 to 30th June, 1962. Liabilities amounted to £4,944,523 including loans due to the Government totalling £4,817,250. Revenue for the year was £124,046. Working expenses during 1961–62 amounted to £60,918 and interest and other charges to £57,444. The Board does not strike a rate, but supplies consumers, including local water supply authorities, by measure. The quantity supplied during the year ended 30th June, 1962, was 3,005 million gallons.

(c) *Sewerage.* The sewerage system consists of a main outfall sewer, about 50 miles in length. Wastes conveyed consist mainly of industrial wastes, such as paper wastes and gasification wastes, together with small quantities of domestic sewage. The capital cost of the sewerage construction works to 30th June, 1962, was £2,426,759. Liabilities amounted to £2,844,866 including loans due to the Government totalling £2,600,545. Revenue in 1961–62 was £113,607 and expenditure comprised £72,452 working expenses and £69,133 interest and other charges. No sewerage rate is levied, but a charge is made by measure for wastes both from industries and public authorities.

(vi) *Other Sewerage Authorities.* At 30th June, 1962, 66 other sewerage authorities had been constituted under the provisions of the *Sewerage Districts Acts* and systems were in operation in 42 districts.

3. *Queensland.*—(i) *Brisbane City Council—to 30th June, 1962.* (a) *General.* This organization conducts the water supply and sewerage systems of the City of Brisbane. Prior to 1928, water and sewerage activities had been controlled by the Metropolitan Water and Sewerage Board, but were then absorbed by the Brisbane City Council, which also supplies, in bulk, the whole of the water used by the City of Ipswich and the major portion of that used by the City of Redcliffe. Since September, 1960, Redcliffe has supplemented its supply from that of the Pine Rivers Shire Council.

(b) *Water Supply.* Water storage facilities comprise the following (available capacities are shown in parentheses):—Somerset Reservoir, 200,000 million gallons (55,000 million gallons); Lake Manchester, 5,806 million gallons (5,720 million gallons); Brisbane River, 543 million gallons (484 million gallons); Pure Water Reservoir, Holt's Hill, 8.3 million gallons (8.3 million gallons); Enoggera Reservoir, 1,000 million gallons (600 million gallons); Gold Creek Reservoir, 407 million gallons (400 million gallons). There are 16 service reservoirs with a capacity of approximately 41 million gallons. The Somerset reservoir is a dual purpose project with a designed total holding capacity of 200,000 million gallons, 55,000 million gallons to be for water storage and 145,000 million gallons for flood mitigation. Water rating at 30th June, 1962, was 4½d. in the £1 on the unimproved valuation of all ratable land, with a minimum charge of £8 for the year for each assessment. The following table is a summary of operations of the complete Brisbane City Council system (Brisbane, Ipswich and Redcliffe) for the years 1957–58 to 1961–62.

#### WATER SUPPLY, BRISBANE(a): SERVICES

Year	Services connected	Estimated population supplied	Average daily consumption	Total consumption for the year	Average daily consumption		Length of trunk and reticulation mains
					Per service	Per head of estimated population	
			Mill. gals.	Mill. gals.	Gallons	Gallons	Miles
1957–58 .. ..	157,750	575,212	41.0	14,970	260	71.3	1,995
1958–59 .. ..	163,336	594,124	41.4	15,127	254	69.7	2,059

1960–61 .. ..	171,820	626,470	46.8	17,100	273	74.8	2,196
1961–62 .. ..	178,279	649,970	45.3	16,538	254	69.7	2,284

(a) Includes Ipswich and Redcliffe.

(c) *Sewerage.* The sewage treatment works is situated at Luggage Point at the entrance to the Brisbane River. Sewerage rating at 30th June, 1962, was 3½d. in the £1 on the unimproved valuation of each portion of land with a minimum charge of £8 10s. for the year. The following table is a summary of operations of the Brisbane sewerage scheme for the years 1957–58 to 1961–62.

#### SEWERAGE, BRISBANE: SERVICES

Year					Premises connected	Estimated population served	Total sewage pumped for the year	Length of main, branch, reticulation, etc., sewers
							Mill. gals.	Miles
1957–58 .. ..	..	..	..	..	55,846	206,630	5,316	731
1958–59 .. ..	..	..	..	..	58,616	216,879	6,043	757
1959–60 .. ..	..	..	..	..	58,942	218,185	5,626	803

1960-61 ..	16,837,552	982,345	282,035	489,597	964,578	+ 17,767
1961-62 ..	17,953,552	1,035,872	296,234	564,903	1,045,578	- 9,706

(a) Total, including other expenditure.

(ii) *Country Towns.* (a) *Water Supply.* In addition to the City of Brisbane, there were at 30th June, 1961, 160 cities and towns in Queensland provided with water supply systems controlled by municipal and shire councils.

(b) *Sewerage Systems.* At 30th June, 1961, there were 26 cities or towns in addition to Brisbane with sewerage systems, and sewerage schemes were in course of construction at 13 other cities or towns.

(c) *Finances.* The receipts (other than loan and loan subsidy) of water undertakings controlled by the cities and towns referred to above amounted to £2,441,772 in 1960-61. Expenditure amounted to £2,584,001, including £1,114,346 for debt charges. In addition, expenditure from loans and loan subsidy amounted to £2,850,451. Finances of sewerage undertakings are incorporated in council general funds and are not available separately.

4. *South Australia.*—(i) *General.* The water supply and sewerage systems in this State were constructed mainly, and are maintained, by the Engineering and Water Supply Department, under the control of the Minister of Works. Works controlled by the Department are the Adelaide, Barossa, Beetaloo, Bundaleer, Moorook, Tod River, Warren, Yorke Peninsula and other country water districts systems, the Morgan-Whyalla water supply system, the metropolitan and country sewerage systems, the Metropolitan Flood Waters Scheme and works on the River Murray constructed under the River Murray Waters Agreement. Several water supply schemes on the Murray River are operated by the Department of Lands in conjunction with its irrigation works, and supplies to Woomera and Leigh Creek coalfield are controlled by the operating authorities. The following tables show particulars of metropolitan and country waterworks combined.

## WATERWORKS, SOUTH AUSTRALIA: SERVICES

Year	Assessments(a)		Area of districts supplied (a)	Capacity of reservoirs, tanks, etc.	Length of mains	Number of meters
	Number	Annual value				
		£	Acres	Mill. gals.	Miles	
1957-58..	262,430	26,810,750	12,983,539	33,949	8,260	180,815
1958-59..	269,825	28,361,294	13,003,305	33,954	8,537	197,914

1961-62..	338,636	42,702,029	13,153,869	46,328	9,634	247,972

(a) Excludes Morgan-Whyalla Water Supply—water sold by measure.

## WATERWORKS, SOUTH AUSTRALIA: FINANCES

(£ )

Year	Invested capital to 30th June	Revenue	Expenditure			Deficit
			Working expenses (a)	Interest	Total	
1957-58..	49,161,026	3,028,193	2,944,648	1,740,157	4,684,805	1,656,612
1958-59..	54,301,234	3,106,348	2,768,406	1,933,850	4,702,256	1,595,908
1959-60..	59,636,914	3,386,221	3,391,892	2,205,764	5,597,656	2,211,435
1960-61..	65,183,386	4,284,394	3,188,385	2,373,567	5,561,952	1,277,558
1961-62..	73,115,312	4,532,577	4,194,970	2,694,196	6,889,166	2,356,589

(a) Includes debt redemption.

(ii) *Adelaide Waterworks.* At 30th June, 1962, the Adelaide waterworks supplied a district of 193,923 acres. The capacity of reservoirs and storage tanks was 25,427 million gallons and there were 2,561 miles of mains. Water is also drawn from the 11,300 million gallon reservoir at South Para in the Barossa Water District.

The Mannum-Adelaide pipeline conveys water from the River Murray to Adelaide at a rate of up to 66 million gallons a day. Water is delivered to the River Torrens or, by further pumping, to the River Onkaparinga. With further development, the main will operate as a closed system connected to the metropolitan reticulation. The pipeline supplements the Warren system and other country areas.

## ADELAIDE WATERWORKS: FINANCES

(£ )

Year	Invested capital to 30th June	Revenue	Expenditure			Surplus (+) or Deficit (-)
			Working expenses (a)	Interest	Total	
1957-58..	25,900,153	2,045,625	1,612,284	915,721	2,528,005	- 482,380
1958-59..	28,719,570	2,101,768	1,437,861	1,032,464	2,470,325	- 368,557
1959-60..	32,074,743	2,311,402	1,919,538	1,136,373	3,055,911	- 744,509
1960-61..	35,078,981	2,958,675	1,731,561	1,218,096	2,949,657	+ 9,018
1961-62..	38,627,084	3,151,125	2,377,181	1,368,822	3,746,003	- 594,878

(a) Includes debt redemption.

(iii) *Adelaide Metropolitan Sewerage.* The Adelaide metropolitan sewerage system, comprising the Adelaide, Glenelg, Port Adelaide and Salisbury-Elizabeth areas of 146 square miles in all, includes a sewage farm, and treatment works at Glenelg and Port Adelaide. Work is starting on a new large treatment works at Bolivar. Financial and other particulars for 1957-58 to 1961-62 are shown hereunder.

## ADELAIDE METROPOLITAN SEWERAGE: SUMMARY

Year	Length of sewers	Number of connexions	Invested capital to 30th June	Revenue	Expenditure			Surplus
					Working expenses (a)	Interest	Total	
	miles		£	£	£	£	£	£
1957-58 ..	1,411	149,104	9,213,112	1,393,260	653,810	309,145	962,955	430,305
1958-59 ..	1,444	154,636	10,437,696	1,471,067	685,104	349,312	1,034,416	436,651
1959-60 ..	1,471	160,407	11,305,495	1,576,769	676,660	401,009	1,077,669	499,100
1960-61 ..	(b) 1,598	173,753	13,376,362	2,060,534	887,921	479,011	1,366,932	693,602
1961-62 ..	(b) 1,659	179,918	14,544,885	2,211,011	913,724	524,376	1,438,100	772,911

(a) Includes debt redemption. 1960-61; 115 miles in 1961-62).

(b) Includes sewers in the Salisbury-Elizabeth area (93 miles in

(iv) *Country Sewerage Schemes.* Sewerage schemes are operating at Port Lincoln and Naracoorte. At Port Lincoln, there are 26.5 miles of sewer with an ocean outfall. At June, 1962, there were 706 connexions. The Naracoorte system has a treatment works, covers 2.56 square miles, and comprises 26.5 miles of sewer with 563 connexions.

(v) *Country Water Supply.* Water districts systems at 30th June, 1962, comprised an area of 12,959,946 acres. Supply came from reservoirs having a total capacity of 20,901 million gallons, from the River Murray and from underground sources.

Apart from local supplies, water from the River Murray comes from branches of the Mannum-Adelaide main and from the Morgan-Whyalla main.

The principal areas of underground supplies are in the south-east of the State, where water from the Murray Basin can be had at moderate depths or from lakes, and from sand beds on Eyre Peninsula. In the year 1961-62, supplies made to Mount Gambier, Naracoorte and other towns amounted to 983 million gallons, and the Uley-Wanilla and Lincoln Basins contributed 805 million gallons to the Tod River Water District.

## COUNTRY WATERWORKS, SOUTH AUSTRALIA: FINANCES

(£ )

Year	Invested capital to 30th June	Revenue	Expenditure			Deficit
			Working expenses (a)	Interest	Total	
1957-58 ..	23,260,873	982,568	1,332,364	824,436	2,156,800	1,174,232
1958-59 ..	25,581,664	1,004,580	1,330,545	901,386	2,231,931	1,227,351
1959-60 ..	27,562,171	1,074,819	1,472,354	1,069,391	2,541,745	1,466,926
1960-61 ..	30,104,405	1,325,719	1,456,824	1,155,471	2,612,295	1,286,576
1961-62 ..	34,488,228	1,381,452	1,817,789	1,325,374	3,143,163	1,761,711

(a) Includes debt redemption.

(vi) *Morgan-Whyalla Water Supply Scheme.* This scheme, which has 223 miles of main, was officially opened on 31st March, 1944, the capital invested to 30th June, 1961, being £2,687,707. Particulars of the scheme, where applicable, are included in the tables of the combined waterworks in (i) above. Apart from supplying Whyalla, the main has been used to allow expansion of reservoir supplies in the northern agricultural area of the State, and to meet new demands caused by industrial growth at Whyalla, duplication of the main has commenced. During 1961-62, water used from the scheme amounted to 3,169 million gallons. Revenue was £489,518, working expenses £359,455, interest charges £151,865 and deficit £21,802.

5. *Western Australia.*—(i) *General.* The water supply, sewerage and drainage systems of Western Australia are principally under the management of two State Government Departments, namely, the Metropolitan Water Supply, Sewerage and Drainage Department, having as its territory the metropolitan area centred on Perth and extending to Kwinana and Serpentine in the south, Sorrento in the north and Greenmount on the east, and the Public Works and Country Water Supply Department, which controls the Comprehensive Water Supply Scheme (covering the Goldfields and Agricultural Areas Water Supply and the Great Southern Towns Water Supply) as well as supplies, from local sources, to 83 country towns not included in the scheme. Both Departments are administered under the portfolio of the Minister for Works and Water Supplies. (See also Chapter VIII. Water Conservation and Irrigation, of this Year Book, pp. 296-8.)

(ii) *Metropolitan Water Supply, Sewerage and Drainage.* (a) *General.* The sources of the metropolitan water supply are the Serpentine Dam, the Canning Dam, the Churchman Brook Reservoir, the Victoria Reservoir and the Wungong Brook Diversion Weir. The supply from these sources is supplemented as necessary from a number of artesian bores and from a pipeline link with Mundaring Weir. The largest reservoir, the Serpentine Dam, has a capacity of 39,000 million gallons. There are three treatment works included in the Department's sewerage system. The largest of these, Subiaco treatment works, serves Perth and suburbs.

(b) *Water Supply.* The following table shows particulars of water supply services for 1957-58 to 1961-62.

#### METROPOLITAN WATER SUPPLY, WESTERN AUSTRALIA: SERVICES

Year	Number of services (a)	Estimated population supplied (a)	Average daily consumption	Total consumption for year	Average daily consumption		Length of mains	Number of meters
					Per service (b)	Per head of estimated population (b)		
			Mill. gals.	Mill. gals.	Gallons	Gallons	Miles	
1957-58 ..	122,159	404,390	47.5	17,337	394	119.2	1,891	85,896
1958-59 ..	125,761	417,770	49.5	18,061	399	120.2	1,991	92,495
1959-60 ..	129,956	431,600	(c) 33.7	(c) 12,335	(c) 263	(c) 79.5	2,072	97,002
1960-61 ..	133,647	446,000	49.3	18,015	374	112.3	2,137	103,969
1961-62 ..	137,960	460,730	50.6	18,492	373	111.6	2,179	116,610

(a) Figures relate to 30th June.  
restrictions in force for 180 days.

(b) Calculated from averages for the year.

(c) Water

Water rating for 1961-62 was 1s. in the £1 on annual valuation on land used for residential purposes and 1s. 6d. in the £1 on annual valuation on land not so used.

(c) *Sewerage and Main Drainage.* Some particulars of the metropolitan sewerage and main drainage services for 1957-58 to 1961-62 are shown below.

**METROPOLITAN SEWERAGE AND MAIN DRAINAGE, WESTERN AUSTRALIA:  
SERVICES**

Year	Houses connected	Estimated population served	Length of sewers	Length of main drains
			Miles	Miles
1957-58 .. .. .	63,969	253,800	713	66
1958-59 .. .. .	64,944	257,500	714	67
1959-60 .. .. .	65,781	260,600	719	69
1960-61 .. .. .	66,664	264,000	724	72
1961-62 .. .. .	67,378	239,110	736	77

Sewerage rating for 1961-62 was 1s. 9d. in the £1 on annual valuation, while metropolitan main drainage rating was 4d. in the £1.

(d) *Finances.* The following table shows particulars of the finances of the Western Australian Metropolitan Water Supply, Sewerage and Drainage Department.

**METROPOLITAN WATER SUPPLY, SEWERAGE AND MAIN DRAINAGE

(iii) *Country Water Supplies.* Information concerning country water supplies is included in Chapter VIII. Water Conservation and Irrigation, of this Year Book (see p. 297).

6. *Tasmania.*—(i) *Waterworks.* At the end of 1960-61, there were 96 municipally operated waterworks in Tasmania. The capacity of the reservoirs was 2,225 million gallons, the estimated population served was 277,000 and the number of properties was 87,900. Two regional schemes operated by the State Government supply bulk water to several municipalities, augmenting supplies for an estimated population of 49,000 and 14,000 properties.

(ii) *Sewerage*. At the end of 1961-62, there were 21 municipal sewerage schemes in operation in Tasmania. They served an estimated population of 179,000 and the number of tenements served was 47,700.

7. *Northern Territory*.—Information relating to water supply in the Northern Territory may be found in Chapter VIII. Water Conservation and Irrigation (*see p. 300*).

8. *Australian Capital Territory*.—The water supply, sewerage and drainage systems in the Australian Capital Territory are under the control of the Commonwealth Department of Works. The sources of the water supply are:—Cotter Dam (capacity 967 million gallons) and Bendora Dam (2,360 million gallons). Six pumps are capable of pumping approximately 20 million gallons daily.

The total population in the Australian Capital Territory served was 65,500, which during 1961-62 consumed 3,115 million gallons of water. The number of water meters at 30th June, 1962, was 13,516.

In addition, during 1961-62 the Canberra water supply system supplied 239 million gallons of water to Queanbeyan, New South Wales. The total length of water lines at 30th June, 1962, was 282 miles.

The sewerage system for Canberra and suburbs consists of a treatment works and 214 miles of sewerage line (30th June, 1962). There were also 238 miles of stormwater lines.

## § 6. Harbour Boards and Trusts

NOTE.—The number and net tonnage of vessels which entered the major ports in each State during the years 1960-61 and 1961-62 are shown in Chapter XIV. Transport and Communication (*see p. 580*). Particulars of overseas and interstate cargo discharged and shipped during 1961-62 are shown on page 582 of the same chapter.

1. *New South Wales*.—(i) *Maritime Services Board of New South Wales*. (a) *General*. The Maritime Services Board of New South Wales is a corporate body of seven Commissioners comprising three full-time members and four part-time members representing shipping and other interests. The Board was constituted on 1st February, 1936, under the *Maritime Services Act 1935*, to co-ordinate the port and navigation services of the State, which had previously been administered by the Sydney Harbour Trust and by the State Department of Navigation.

The Board exercises general control over intra-state shipping, including the survey and certification of vessels, the licensing of harbour craft, and the examination and issue of certificates to officers. It is responsible for the provision of pilotage services, lights, beacons, buoys and other port facilities, imposes and collects rates and charges on goods and vessels, and is vested with the general control and management of the navigable waters and ports within the State.

At the Ports of Sydney, Newcastle, and Botany Bay, the Board is also responsible for the provision of adequate wharfage and channels, and carries out all construction, maintenance and dredging work. At other ports of New South Wales, such work is undertaken by the Department of Public Works.

(b) *Finances*. The implementation of the *Maritime Services (Amendment) Act 1960*, as from 1st May, 1961, resulted in some marked changes in the Board's accounting system. The amendment to the Act provided for a new fund known as the Maritime Services Board Fund to be established to replace the Sydney Harbour Trust Fund. All revenue earned by the Board at the Ports of Sydney, Newcastle and Botany Bay, with the exception of that earned from pilotage and navigational services, is now credited to the Maritime Services Board Fund, and all revenue expenditure incurred at the three ports is drawn from that Fund.

The following table shows particulars of the finances of the Board in respect of the Ports of Sydney, Newcastle and Botany Bay.

**MARITIME SERVICES BOARD FUND: FINANCES OF THE PORTS OF SYDNEY, NEWCASTLE AND BOTANY BAY**

(£)

Year	Revenue				Expenditure			Surplus
	Wharfage and transhipment rates	Tonnage rates and berthing charges	Other charges	Total	Administration and maintenance	Interest, debt redemption, exchange, etc.	Total (a)	
1960-61	3,130,441	631,432	927,729	4,689,602	2,565,141	2,081,110	4,646,251	43,351
1961-62	4,654,234	699,557	1,292,632	6,646,423	3,756,694	2,857,210	6,613,904	32,519

(a) Excludes capital expenditure but includes transfer to the Renewals Fund Reserve Account, 1960-61 £1,025,000, 1961-62 £1,375,000.

(c) *Port of Sydney.* The entrance to Sydney Harbour, the principal port of New South Wales, is nearly a mile wide, and the depth of its navigable channel is not less than 80 feet. Between the entrance, known as "The Heads", and the Harbour proper, a distance of four miles, there are two separate channels, each 700 feet wide, the Western Channel not less than 42 feet deep (low water ordinary spring tide) and the Eastern Channel 41 feet deep. The foreshores, which have been reduced by reclamations, are 152 miles in length, and the total area of the port is 13,600 acres, or 21 square miles, of which about one-half has a depth of 30 feet or more at low water ordinary spring tide. The mean range of tides is 3 feet 6 inches.

The wharves are situated close to the business centre of the city, about four or five miles from the Heads. At present, there are three dolphin berths each 550 feet long, and 100 effective commercial cargo berths with a total length of 46,007 feet controlled by the Board. Accommodation for harbour craft amounts to 3,355 feet, while the length of other berths including oil and private wharves totals 28,004 feet. Depth of water at wharves is up to 40 feet. Special facilities for the storage and handling of staple products such as wheat, wool, etc., are provided, and modern plant has been installed for replenishing ships' bunkers with oil or coal.

Docking facilities are available for the largest vessel afloat. The Captain Cook Graving Dock ranks amongst the largest graving docks in the world, being 1,139 feet by 147 feet 7½ inches with a depth of 45 feet 2 inches over the sill at high water. There are also several smaller dry docks and floating docks in the port.

(d) *Port of Newcastle.* As from 1st May, 1961, the Maritime Services Board of New South Wales became the single authority for the Port of Newcastle. This was brought about by the implementation of the *Maritime Services (Amendment) Act 1960*, which resulted in the Board's jurisdiction being extended to include the operation of the coal loading equipment formerly vested in the Department of Railways and the dredging, together with the maintenance and construction of wharves and other port facilities, which had been the responsibility of the Department of Public Works.

An Advisory Committee consisting of eight members, appointed by the Governor, assists the Board in matters associated with the operation of the port. It is primarily a coal-loading port, and the proximity to the coal fields has led to the establishment of important industries, including iron and steel works, in the district. Facilities are available for the shipment of wool, wheat and frozen meat, and a wharf is available for timber.

The area used by shipping is about 570 acres, excluding the entrance to the harbour and the inner basin, which together cover an area of 162 acres. The width of the harbour at the entrance is 1,500 feet, and the navigable channel, with a depth of 25 feet 6 inches at low water, is 350 feet wide. Wharfage accommodation amounts to approximately 13,700 feet, including about 2,700 feet of privately owned wharfage. There are also several dolphin berths available for tie-up purposes. A floating dock of 15,000 tons capacity is available at the port.

(e) *Botany Bay.* The Maritime Services Board of New South Wales is the administrative and controlling authority. The port is primarily a discharging centre for the oil refinery at Kurnell, near Sydney, and two berths are available as well as tanker mooring buoys. The entrance to the Bay is approximately  $1\frac{1}{4}$  miles wide, with a minimum depth of about 36 feet in the dredged swinging basin.

(f) *Port Kembla.* As from 3rd May, 1948, the Maritime Services Board assumed the administration and navigational control of Port Kembla, which had previously been administered by the New South Wales Department of Public Works. The Department, however, continues to be the constructing authority in respect of works, dredging and maintenance. An Advisory Committee consisting of eight members appointed by the Governor has been formed to assist the Board in the operation of the port. It has an area of approximately 330 acres, with depths ranging from 20 to 50 feet (low water ordinary spring tide), and wharfage accommodation totalling 6,800 feet has been provided for large ocean-going vessels. No cargo sheds are available, as the nature of trade at the port does not call for the provision of sheltered storage accommodation at the berths. It is the port of the southern coalfields and for the expanding industrial area in and about Wollongong. The developmental programme for Port Kembla includes the construction of an inner harbour to provide wharfage for the steelworks in addition to a modern fast-loading coal berth and general cargo berths.

The first stage of the inner harbour basin was opened to shipping on 28th November, 1960. Present accommodation is 1,175 feet of wharfage, with 36 feet (low water ordinary spring tide) of water, alongside. Width in the entrance to the inner harbour basin is 400 feet.

(g) *Other Ports.* In addition to the ports of Sydney, Newcastle, Port Kembla and Botany Bay, the Board controls 29 outports along the coastline of 609 miles. The shipping trade of these outports is relatively small.

(ii) *Port Charges.* The port charges payable in respect of shipping and ships' cargoes in New South Wales are imposed by the Commonwealth Government in terms of the *Light-houses Act* and the *Navigation Act*, and by the State authorities under the *Navigation Act* of New South Wales, the *Harbour and Tonnage Rates Act*, and the *Sydney Harbour Trust Act*. Since 1st February, 1936, the State enactments have been administered by the Maritime Services Board. The gross collections by the State authorities amounted to £8,753,007 in 1961-62. This figure includes the revenue for the ports of Sydney, Newcastle and Botany Bay (see table on p. 827) and State navigation service collections £1,980,517 (1961-62). Commonwealth Government revenue from light dues and navigation receipts, for the whole of Australia, amounted to £746,842 in 1961-62.

2. *Victoria.*—(i) *Melbourne Harbor Trust.* (a) *General.* Information regarding the origin and constitution of this Trust, which controls the Port of Melbourne, appears in Official Year Book No. 12, pages 970-2. The Port of Melbourne comes under the control of the Melbourne Harbor Trust Commissioners, an independent autonomous statutory organization, with a full-time Chairman and five part-time Commissioners with specialized knowledge of the requirements of exporters, primary producers, shipowners, importers and all aspects of port labour. The area of water and land under the control of the Trust is  $10\frac{1}{2}$  square miles, with sheds available for cargo in transit totalling 25,505 feet in length and covering an area of  $46\frac{1}{2}$  acres.

Two of the largest transit sheds on the Australian coast are now in operation at Appleton Dock. The sheds are 600 feet long by 150 feet wide, with a cargo stacking area of 81,000 square feet. The berths are used for the general cargo trade and have both rail and crane facilities, and modern amenities for port workers. The total length of wharves, piers and jetties in the port is 61,550 feet, covering an area of  $58\frac{1}{2}$  acres with 58,466 feet of effective berthing space.

During 1961, work was commenced at South Wharf to modify two berths as specialized cargo-handling berths for the growing container cargo trade. The second berth at the Tasmanian Ferry Terminal for the roll-on, roll-off cargo service between Melbourne and Tasmania was brought into operation in March, 1961.

The depth of water (low water ordinary spring tide) from the main channels to the principal wharves is 31 to 39 feet.

(b) *Finances.* The following table shows particulars of the financial operations of the Trust.

## MELBOURNE HARBOR TRUST: FINANCES

(£ )

Year	Gross loan indebtedness at 31st December	Revenue		Expenditure				Surplus (+) or deficit (-)
		Wharfage and tonnage rates	Total	Administration and maintenance	Interest, debt redemption, exchange, etc.	Depreciation, renewals and insurance account	Total (a)	
1957 ..	12,175,428	1,882,501	2,746,513	1,557,933	520,223	250,938	2,718,159	+ 28,354
1958 ..	12,907,279	2,043,848	3,020,913	1,310,119	603,899	631,988	2,958,686	+ 62,227
1959 ..	13,833,011	2,100,924	3,292,329	1,634,513	766,909	376,397	3,201,943	+ 90,386
1960 ..	14,199,060	2,492,139	3,948,187	1,962,110	766,532	641,175	3,872,264	+ 75,923
1961 ..	14,240,702	2,303,586	3,791,495	2,246,657	910,713	203,909	3,826,008	- 34,513

(a) Includes statutory payments to Consolidated Revenue and Geelong Harbour Trust:—1957, £389,065; 1958, £412,680; 1959, £424,124; 1960, £502,447; and 1961, £464,729. Excludes capital expenditure:—1957, £1,054,236; 1958, £1,658,589; 1959, £1,458,499; 1960, £1,280,529; and 1961, £1,348,846.

(ii) *Geelong Harbor Trust.* The Geelong Harbor Trust, constituted in 1905, is under the control of three Commissioners appointed from time to time by the Governor-in-Council. One of these, the chairman, is on a full time basis.

At the end of 1961, there were 19 effective berths in the port, plus two berths at the Commonwealth Explosives Pier, Pt. Wilson, owned and operated by the Commonwealth. Three major wharf projects are in course of planning, the first of which is expected to be under construction early in 1963. Four berths have a depth of 36 feet at low water, but a further two (at Bulk Wheat Pier) are expected to have 36 feet by March, 1963. All other berths, except Yarra Pier, 29 feet, and Commonwealth Explosives Pier, Pt. Wilson, 30 feet, have a depth of 32 feet at low water.

Revenue for the year 1961 was £1,214,782 and expenditure from revenue totalled £701,077. At 31st December, 1961, the value of the Trust's fixed assets was £8,362,888 and loans outstanding amounted to £2,797,401.

(iii) *Portland Harbor Trust.* Construction of an all weather deep-sea port of three berths with a low water depth of 36 feet was completed to operational standards in 1960. Currently work in progress on the construction of an oil tanker berth, which is scheduled for completion in February, 1963.

Operating revenue for the year ended 30th June, 1961, was £63,183 and revenue expenditure was £48,987. The value of the Trust's fixed assets, less depreciation, was £6,358,601 at 30th June, 1961, and loans and advances outstanding amounted to £6,482,122.

3. *Queensland.*—(i) *General.* The ports of Queensland, except Brisbane and certain minor ports, are administered by Harbour Boards with members representing the towns and districts served by the ports. Brisbane and the minor ports are controlled by the State Treasury through the Department of Harbours and Marine, which supervises the engineering activities of the other ports.

(ii) *Brisbane.* Brisbane accommodates comfortably, in its dredged and improved river, the largest vessels in the Australian trade. The main centres for shipping, although further downstream than formerly because of the increasing size of vessels, are still within easy access of the city. Adequate dry-docking facilities are available. The finances of Brisbane Harbour for the years 1956-57 to 1960-61 are shown below.

**BRISBANE HARBOUR: FINANCES**  
(£'000)

Year	Loan indebtedness at 30th June	Receipts		Payments	
		Harbour dues	Total	Working expenses(a)	Total
1956-57 .. ..	3,011	671	918	843	1,048
1957-58 .. ..	3,042	696	938	731	944
1958-59 .. ..	2,702	709	1,097	664	883
1959-60 .. ..	2,512	772	1,059	731	953
1960-61 .. ..	2,813	763	1,164	679	901

(a) Excludes interest and redemption included in total.

In addition to Brisbane Harbour, the Department of Harbours and Marine also controls the Brisbane Dry Dock, the Cairncross Dock, and nine smaller harbours not administered by harbour boards.

(iii) *Harbour Boards.* Harbour boards control the ports of Bowen, Bundaberg, Cairns, Gladstone, Mackay, Rockhampton and Townsville. Finances for each port for the year ended 30th June, 1961, are shown below, together with a summary for the years ended 30th June, 1957 to 1960.

**HARBOUR BOARDS, QUEENSLAND: FINANCES**  
(£)

Harbour board	Loan indebtedness at 30th June	Revenue		Expenditure (excluding loan)		Surplus(+) or deficit(-)
		Wharfage and harbour dues	Total	Working expenses	Total (including interest and redemption)(a)	
Bowen .. ..	273,982	7,750	37,430	13,477	18,315	+ 19,115
Bundaberg .. ..	2,487,273	112,420	243,931	10,557	224,574	+ 19,357
Cairns .. ..	242,546	186,136	275,164	205,583	251,696	+ 23,468
Gladstone .. ..	784,968	41,650	72,740	27,655	84,804	- 12,064
Mackay .. ..	1,331,243	167,707	374,694	73,844	409,318	- 34,624
Rockhampton .. ..	629,407	39,750	119,312	21,176	104,893	+ 14,419
Townsville .. ..	3,645,928	306,774	559,898	195,098	531,673	+ 28,225
Total, 1960-61 .. ..	9,395,347	862,187	1,683,169	547,390	1,625,273	+ 57,896
1959-60 .. ..	8,430,437	908,911	1,807,041	561,425	1,526,770	+ 280,271
1958-59 .. ..	7,099,197	898,822	1,602,409	602,391	1,696,390	- 93,981
1957-58 .. ..	5,435,172	775,436	1,226,581	603,081	1,190,356	+ 36,225
1956-57 .. ..	3,567,335	757,778	1,005,986	578,259	1,170,528	- 164,542

(a) Includes expenditure on capital works from accumulated revenue.

4. *South Australia.*—The South Australian Harbors Board. All South Australian harbours are controlled by the South Australian Harbors Board, which consists of three Commissioners appointed by the Governor for a period of five years and eligible for re-appointment. The Board is responsible to the Minister of Marine for the discharge of its duties and functions. The most important ports are the five deep sea ports of Port Adelaide,

Port Pirie, Wallaroo, Port Lincoln and Thevenard. At a few ports, the wharves or jetties are privately controlled, the principal of these being at Whyalla, Ardrossan and Rapid Bay, all of which are controlled by the Broken Hill Pty. Co. Ltd. Port Augusta is controlled by the Commonwealth Railways on behalf of the Commonwealth Government. Maximum depths of water (low water) at the wharves of the main ports range from 24 feet at Port Pirie to 35 feet at Port Adelaide (Outer Harbour). The following table shows the finances of the Board for 1957-58 to 1961-62.

### THE SOUTH AUSTRALIAN HARBORS BOARD: FINANCES

(£)

Year	Capital at 30th June (a)	Revenue	Expenditure from revenue			Surplus
			Working expenses	Interest	Total	
1957-58..	14,189,715	2,119,826	1,487,014	505,322	1,992,336	127,490
1958-59..	15,325,443	2,156,669	1,464,006	550,364	2,014,370	142,299
1959-60..	16,324,529	2,314,999	1,574,774	612,711	2,187,485	127,514
1960-61..	17,432,015	2,714,743	1,684,618	658,269	2,342,887	371,856
1961-62..	18,555,851	2,576,697	1,676,407	701,032	2,377,439	199,258

(a) State Treasurer's Funds and Reserve employed.

5. *Western Australia.*—(i) *Fremantle Harbour Trust.* The Port of Fremantle is operated and controlled by the Fremantle Harbour Trust, a body corporate administered by a Board of five Commissioners appointed triennially by the Governor. The port covers an extensive water area of some 180 square miles and comprises an inner and an outer harbour. The inner harbour includes 18 deep water land-backed berths, providing more than 690,000 sq. ft. of covered storage space and 11,148 feet of wharf berth accommodation. All inner harbour berths are dredged to a depth of 36 feet. The outer harbour includes three main anchorages, Gage Roads, Owen Anchorage and Cockburn Sound. Deep water jetties are available in the outer harbour including the oil refinery jetties in Cockburn Sound. Ocean going deep draft ships enter the Sound by means of channels dredged through Success and Parmelia Banks to a low water depth of 38 feet and a bottom width of 500 feet. In the outer harbour there are three tanker berths, each with a low water depth of 44 feet, at the Kwinana oil refinery, and one berth at the nearby steelworks jetty with a low water depth of 30 feet. There are also special berths for the off-loading of cattle and the handling of high explosives.

Gross earnings for the year 1961-62 amounted to £3,937,439, working expenses to £2,416,757, interest charges to £291,039, debt redemption to £78,807, and renewals fund to £2,000. Special loan redemptions were £291,640, and net capital totalled £8,023,190.

(ii) *Albany Harbour Board.* The Albany Harbour is controlled by a board of five members appointed by the Government. The depth of water in the entrance channel is 33 feet, at one arm of the jetty 31 feet and at the other arm 33 feet. In the approaches to wharf berths, the depth is 33 feet. Wharf accommodation consists of 1,115 feet, and in addition the Deepwater Jetty has 2,500 feet of accommodation. Gross earnings for the year 1961-62 amounted to £132,811, working expenses £63,392, interest and sinking fund charges, £94,553, and amounts debited to loan capital account, £1,898,474.

(iii) *Bunbury Harbour Board.* The Bunbury Harbour is controlled by a board of five members appointed by the Government. The depth of water in the harbour is 30 feet and berthing accommodation is 3,700 feet. Gross earnings for the year 1961-62 amounted to £164,790, working expenses £74,570, interest and sinking fund charges £94,877, and amounts debited to loan capital account, £2,298,785.

(iv) *Other Ports.* The following ports are controlled by the State Government Harbour and Lights Department:—Broome, Busselton, Carnarvon, Derby, Esperance, Geraldton, Onslow, Point Samson, Port Hedland, Wyndham and Yampi. The Port of Esperance was under the control of the Railways Commission until 22nd January, 1962.

6. *Tasmania*.—There are eight marine boards and two harbour trusts in Tasmania. The marine boards control the ports of Hobart, Launceston, Stanley (Circular Head), Burnie and Wynyard (Table Cape), Devonport, Strahan, Currie (King Island), and White-mark (Flinders Island), and the harbour trusts those of Smithton and Ulverstone. Aggregate receipts of revenue accounts of all these authorities during the year 1960–61 were £1,621,271, and expenditures £1,382,024, including loan charges £346,112. The total receipts of the Hobart Marine Board during 1960–61 were £598,545, loan charges amounted to £118,377 and total expenditure to £450,919. Launceston Marine Board receipts during 1960–61 amounted to £332,480, loan charges to £44,570 and total expenditure to £323,625. Loan indebtedness of all marine boards and trusts at 30th June, 1961, was £4,649,213, of which £1,267,201 was in respect of Hobart (including Port Huon Wharf) and £615,780 in respect of Launceston.

Hobart, Launceston, Burnie and Devonport are the principal ports of Tasmania. In addition to their interstate and intra-state traffic, there is also considerable overseas shipping. Depths of water at wharves vary, in general, between 16 and 34 feet (low water ordinary spring tide), but at Hobart there is a depth of water of from 30 to 52 feet.

## § 7. Fire Brigades

1. *New South Wales*.—A Board of Fire Commissioners, consisting of five members, one appointed by the State Government (President) and one each representing insurance companies, local government authorities, volunteer firemen, and permanent firemen, operates under the *Fire Brigades Act* 1909–1958, and 154 fire districts had been constituted at the end of 1961. The cost of maintenance of fire brigades is borne in proportions of local councils and the Government each one-eighth, and the insurance companies three-quarters. The Board's borrowing power is limited to £1,000,000.

At 31st December, 1961, the authorized strength of the Fire Brigade throughout the fire districts of New South Wales was 411 officers and 1,228 permanent and 2,564 volunteer firemen. Corresponding figures for the Sydney Fire District were 340, 1,110 and 317. The revenue for the year 1961 was £3,475,378, made up as follows:—from the Government, £434,398; municipal and shires, £434,398; fire insurance companies and firms, £2,576,805, and from other sources, £29,777. The disbursements for the year were £3,388,300. The Board of Fire Commissioners provides the fire protection services for Canberra, in the Australian Capital Territory, and the cost of these services is reimbursed by the Commonwealth Government.

Under the *Bush Fires Act* 1949–1958, a Bush Fire Fighting Fund exists from which finance is provided for the prevention and fighting of bush fires. Contributions to the Fund by the Government, councils and insurance companies are in the proportion of one quarter, one quarter and one-half, respectively. At 30th June, 1962, Volunteer Brigades equipped by means of this fund numbered 2,500 with an active membership in excess of 65,000 persons. Up to 30th June, 1962, expenditure from the Fund for equipment amounted to £1,707,268.

2. *Victoria*.—(i) *General*. In Victoria, fire brigades are controlled by the Metropolitan Fire Brigades Board consisting of ten members, including an employees' representative, and the Country Fire Authority also consisting of ten members.

(ii) *Metropolitan Fire Brigades Board*. The Metropolitan Fire Brigades Board receives contributions from the municipalities and the insurance companies in the proportion of one-third and two-thirds respectively. On 30th June, 1962, the Board had under its control 45 stations, 1,024 permanent staff, 232 special service and clerical, etc., staff, and 17 part-time firemen. The total receipts for 1961–62 were £2,162,234, comprising contributions, £1,851,410, receipts for services, £204,805 and interest and sundries, £106,019. The expenditure was £2,032,297.

(iii) *Country Fire Authority.* This authority is responsible for the prevention and suppression of fires in the "country area of Victoria", which embraces the whole of the State outside the metropolitan fire district, excluding State forests and certain crown lands. The country area has been divided into 24 fire control regions, three of which (Ballarat, Bendigo and Geelong) are wholly urban and the remainder mixed urban and rural. The Country Fire Authority receives contributions in the proportion of two-thirds from insurance companies and one-third from the Treasury. At 30th June, 1962, the *Country Fire Authority Act* applied to 206 insurance companies, 207 urban and 1,037 rural fire brigades. The effective registered strength of the brigades was 106,904 members.

Income for the year 1961-62 amounted to £690,444. Total expenditure other than loan amounted to £634,518.

3. *Queensland.*—(i) *General.* Fire Districts are constituted under the Acts of 1920-1956. For each district, there must be a Fire Brigades Board consisting of seven members, and the cost of maintenance of each brigade is proportioned as follows:—Treasury one-seventh, insurance companies five-sevenths, and local authorities one-seventh. The insurance companies' contribution is paid to the State Government and thence to Fire Brigades.

(ii) *Fire Brigade Boards.* At 30th June, 1961, there were 78 Fire Brigade Boards. The total number of stations was 143 and full-time staff numbered 853, including 23 administrative, 175 officers and 655 firemen. Volunteers numbered 98. Part-time staff numbered 1,086, including 77 administrative, 111 officers, and 898 firemen. The total revenue for the year 1960-61 was £1,351,203, received mainly from the following sources:—Government £184,179, local authorities £184,179, insurance companies £920,916. Loan receipts (Government and other) were £107,741. The total expenditure for the year was £1,314,805, the chief items being salaries and wages £959,906, and interest and redemption of loans £94,092.

4. *South Australia.*—The *Fire Brigades Act* 1936-1958 provides for a board of five members, and the expenses and maintenance of brigades are defrayed in the proportion of two-ninths by the Treasury, five-ninths by insurance companies, and two-ninths by the municipalities concerned. When the Treasury proportion exceeds £10,000, the excess is borne five-sevenths by insurance companies and two-sevenths by the municipalities. At 30th June, 1962, there were altogether 35 fire brigade stations, of which 12 were metropolitan and 23 country.

The strength of the permanent staff at 31st December, 1962, was 393, including 272 officers and men, 89 country auxiliary firemen and 32 other employees (including maintenance workers). The total revenue for the year 1961-62 was £512,960, including contributions of £430,094 made up as follows:—insurance companies £257,395, Treasury £68,201 and municipalities £104,498. The treasury contribution includes an additional grant of £55,603.

5. *Western Australia.*—By the provisions of the *Fire Brigades Act* 1942-1961 certain local government districts are constituted fire districts under the control of the Western Australian Fire Brigades Board. There were 44 fire districts at 30th September, 1962. The contribution to the Board is made in the proportion of two-ninths from the Government, two-ninths from local government authorities, and five-ninths from insurance companies. The number of local government authorities and insurance companies who contributed numbered 60 and 169 respectively. The brigades, throughout the State, controlled by the Western Australian Fire Brigades Board at 30th September, 1962, numbered 63, with a staff of 1,399, including 272 permanent officers and firemen and 1,127 volunteer brigade officers and firemen. The revenue for the year ended 30th September, 1962, was £609,642 and the expenditure £606,584.

Under the *Bush Fires Act*, a Bush Fires Board, consisting of ten members, five of whom are nominated by the Country Shire Councils Association, was set up to advise the Minister for Lands on bush fire control. The Act also provides for the registration of bush fire control officers, who numbered 1,741 at 30th June, 1962, and the establishment of bush fire brigades, 793 at 30th June, 1962. Many individual brigades are large organizations with numerous self-contained sections.

6. *Tasmania.*—The *Fire Brigades Act 1945* provided for the creation of the Fire Brigades Commission of Tasmania to co-ordinate the activities of existing fire brigade boards, while leaving the responsibility for individual control and management with the boards. The Commission consists of two persons nominated by the Minister, one person elected by the City or Municipal Councils representatives and three persons elected by the insurance representatives of the Fire Brigades Boards. Contributions towards the cost of operations are on the basis of one quarter each from the Treasury and the municipalities and one half from the insurance companies concerned. The cost for the year 1960–61 amounted to £175,000. There were, at 30th June, 1961, 23 brigades controlling 35 stations, and their aggregate staffs numbered 553, including 100 permanent officers, 371 part-time firemen, including officers, and 82 volunteers.

## CHAPTER XX

### PRIVATE FINANCE

NOTE.—Further information on the subjects dealt with in this chapter is contained in the annual bulletin *Finance, Part I.—Public and Private Finance* published by this Bureau. Current information is contained in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics* (monthly), and the monthly mimeographed statements *Australian Banking Statistics* (bulletin and preliminary statement), *Australian Savings Bank Statistics* (bulletin and preliminary statement) and *Australian Life Insurance Statistics* (bulletin). The annual mimeographed bulletin *Australian Fire, Marine and General Insurance Statistics* contains the most recent information available on this subject. Other relevant mimeographed statements are:—*Instalment Credit for Retail Sales*; *Unit Trusts, Land Trusts, and Mutual Funds*; and *New Capital Raisings by Companies in Australia* (quarterly); *Capital and Maintenance Expenditure by Private Business in Australia* (half-yearly); *Oversea Investment: Australia* (annual); *Survey of Private Pension and Retiring Allowance Schemes, 1960–61*; and *Survey of Selected Large Pension Funds, 1955–56 to 1961–62*. Preliminary monthly statements *Instalment Credit for Retail Sales* and preliminary estimates of *New Capital Raisings* and of *Oversea Investment* are issued also.

### CURRENCY

#### § 1. General

1. **Decimal Currency.**—The Decimal Currency Committee was appointed by the Commonwealth Government in February, 1959, to investigate the advantages and disadvantages of a decimal currency, and, if a decimal currency was favoured, the unit of account and denominations of subsidiary currency most appropriate for Australia, the method of introduction, and the cost involved. The Committee presented its report in August, 1960, and the Summary of Conclusions and Recommendations contained therein is as follows.

“1. After examining the advantages and disadvantages of a decimal currency, and the evidence pointing to significant savings which would result, the Decimal Currency Committee is convinced that its adoption in Australia is desirable.

2. It is impossible to assess in money terms the savings which would result, but the Committee has no doubt that the savings in time and effort would outweigh the cost and inconvenience of the change.

3. Because of the uncertainty engendered in commerce and industry by the Committee's appointment and inquiry, and its consequent effect on the sale of office and other machines which would be affected by decimalization, the Commonwealth Government is urged to announce its decision at the earliest practicable date.

4. After examining various decimal systems the Committee recommends the introduction of the 10s.-cent system as the most appropriate for Australia.

5. This system has many advantages over the only others considered practicable—the £-cent-fraction and 8s. 4d.-cent systems.

6. The evidence received on the unpopularity of the half-penny and the undesirability of fractional coins in a decimal system where these can be avoided, leads the Committee to recommend that no half-cent be provided; it is suggested that the half-penny should be utilized as a half-cent coin during the transition period, but that no further halfpence should be minted after the change-over date.

7. The Committee recommends the provision of the following subsidiary coins under a 10s.-cent decimal system:

Decimal coin	Present values
20 cents .. .. .	2s.
10 cents .. .. .	1s.
5 cents .. .. .	6d.
1 cent .. .. .	1.2d.

It is suggested that consideration be given to the minting of 50-cent (= 5s.) and 2-cent (= 2.4d.) coins, if and when a new range of decimal coins of smaller size than existing coins is minted.

8. An official conversion table should be included in the decimalization legislation and copies of it distributed for the information of the public, showing the values of £ s. d. amounts from one halfpenny to one shilling in the new currency, and of decimal amounts from one half-cent to 10 cents in the old currency.

9. A preparatory period of approximately two years is regarded as necessary for the further investigations of many aspects of decimalization which will be required, and to enable all sections of the community to make preparations for the change-over.

10. The recommended official date of introduction of the new system is the second Monday in February, 1963.

11. The existing currency should remain the only official system prior to the change-over date, but during the transition period which follows that date the concurrent use of both old and new currencies should be permitted.

12. The transition period referred to is necessary to enable the conversions of £ s. d. monetary machines, and will be of approximately two years duration.

13. Because of the nature and extent of banks' operations and their strategic role in reform of this nature it is proposed that banks should commence to operate in decimal currency as from the change-over date.

14. *For this purpose it is recommended that banks should be closed to the public on the Thursday, Friday and Saturday preceding the change-over date, so as to enable them to make the necessary internal adjustments, and have their machines converted.*

15. It is recommended that all undertakings which trade with the public should prominently display copies of the official conversion table.

16. The Committee considers that the machine conversion programme should be an officially sponsored and directed one, if extraordinary disruption and inconvenience to government and business is to be avoided and the transition period kept within acceptable limits.

17. An authority should be established by the Commonwealth Government to take charge of the machine conversion programme and co-ordinate this with the many official arrangements which will need to be made.

18. The Committee recommends that machine conversion should be carried out on the basis of definite age limits, to be determined by the supervisory body, beyond which machines will not be included in the official conversion programme. Owners of such "over-age" machines will be free to have their machines converted or replaced, at their own choice, but will have to make their own arrangements for conversions.

19. Full conversion should, where practicable, be applied to machines included in the official conversion programme.

20. It is considered that relief machines will be needed to be provided to machine users while their own £ s. d. machines are being converted, and it is suggested that this should be arranged by each of the machine companies concerned with the actual conversion work.

21. The Committee recommends that priority in machine conversions should be accorded to bank machines, but sees no need for any other priorities in this regard.

22. The Committee considers that special procedures should be adopted for the conversion of banks' machines, so as to enable them to make the change to decimal operation over a four-day period. It is thought that a plan based on measures proposed in South Africa would be practicable here also, although some minor modifications are suggested.

23. The major burden of work connected with decimalization will fall on the office machine and other companies which will have to carry out the conversion of machines. It is proposed that the supervisory body will work closely with these companies, settle the conversion charges made by them, as well as the age limits to be used in connexion with the official conversion programme, and supervise the operation generally.

24. The Committee recommends that restriction be placed upon the importation of £ s. d. machines, so as to avoid adding unnecessarily to the cost and time of the conversion programme, from the date of the announcement of intention to decimalize.

25. The Committee recommends that consideration be given by the Government to the placing of some limitations upon the importation of new decimal makes and models of machines so as to afford reasonable protection to companies carrying out conversion work.

26. The Committee provides estimates of the cost of the change-over insofar as monetary machines (excluding coin-operated machines) are concerned.

27. The estimates are given on the basis of assumptions and conditions (as set out in Chapter V. of the Report of Decimal Currency Committee), and upon two different hypotheses, the first being that all machines within the "economic lives" adopted would be converted, and the second that machines within the higher limits of the lives adopted would be replaced and the remainder converted.

28. The Committee also provides estimates of the additional cost involved in converting Banks' machines over the four-day bank closure period, under each of the hypothetical conversion conditions assumed.

29. The estimates for each of the hypotheses used, including the additional bank machine costs, are:—

					£
(a)	Conversion Cost	..	..	..	29,672,000
	Additional Bank Machine Cost	..	..	..	2,052,000
	Total Cost	..	..	..	31,724,000
(b)	Conversion Cost	..	..	..	26,755,000
	Replacement Cost	..	..	..	2,147,000
	Additional Bank Machine Cost	..	..	..	1,804,000
	Total Cost	..	..	..	30,706,000

30. The Committee points out that the age limits adopted were not referred to all parties concerned and suggests some instances where revision may be required.

31. The Committee also draws the government's attention to the increased conversion costs which would result from postponement of the decision to decimalize, and provides estimates of the increased conversion costs which might be incurred for selected types of machines if the change-over took place in 1970.

32. The Committee points out that it has made no recommendation for reimbursement for costs incurred in the change-over, for the reason that the subject was not included in its terms of reference. Many organizations were, however, obviously disturbed over this aspect of decimalization. The Committee thinks that the Government should be informed of this, and of the facts that costs will fall heavily and inequitably upon highly mechanized concerns, many of which would be hard pressed to meet the necessary expenditure.

33. It is suggested that, because South African conversion will precede adoption of the decimal currency in Australia the Commonwealth Government should, if it decides to make the change-over here, make every effort to benefit from the South African experience".

In July, 1961, the Commonwealth Government confirmed its support of decimal currency system, but considered it undesirable to make final decisions on the detailed arrangement which would be necessary to effect the change.

On 7th April, 1963, the Commonwealth Government announced that a system of decimal currency was to be introduced into Australia at the earliest practicable date, and gave February, 1966, as the tentative change-over date, subject to confirmation that all the necessary arrangements could be completed by that date so that the currency reform could be introduced with the minimum amount of inconvenience.

The new system would be based on a major unit equal to the present ten shillings. The minor unit of the new system would be one hundredth part of the major unit, and would thus be equal in value to 1.2d. in the existing coinage system. No fractions of the minor unit would be introduced.

The Government also announced that it would pay reasonable compensation to owners of a large proportion of monetary machines which would require conversion in order to be used under the new decimal system. While the general principles on which the compensation would be paid had already been determined, a vast number of points of detail would have to be negotiated with the machine companies concerned, and this would be one of the principal

duties of a statutory authority which would shortly be established to plan and administer preparations for the change-over. Legislation to set up this authority, and to provide for the new denomination of currency and other associated matters would be introduced in Parliament this year.

A Committee of Cabinet which had been appointed to consider all aspects of the decimal currency question would give its early attention to such questions as the establishment of the new statutory body and the determination of its functions and responsibilities, the name of the new major currency unit, the denominations of new banknotes and coins to be issued, and the precise design, size and metallic content of the new coins (*see below*).

The Government emphasized that the tentative target of February, 1966, would depend to a large extent upon the completion on schedule of the new National Mint in Canberra, since it would be essential to have an adequate supply of the new decimal coins available for distribution to the public at the change-over date. The new mint was expected to be completed late in 1964, and this would allow full production of new coins for at least one year before February, 1966, supplemented if possible by assistance from the existing Melbourne and Perth Mints. The Melbourne and Perth Mints would, however, be primarily concerned with the production of the present coins, which would probably remain in circulation until late in 1967.

On 5th June, 1963, the Government announced that the major unit in the new Australian decimal currency system was to be called the "Royal". The Royal, which would be a banknote, would consist of 100 "units", each equivalent in value to 1.2d. under the present £ s. d. system. Denominations up to the Royal were to be coins (the present values shown in parenthesis) of 50 cents (5s.), 20 cents (2s.), 10 cents (1s.), 5 cents (6d.), 2 cents (2.4d.), and 1 cent (1.2d.). The 50-cent coin would be known as the "Crown". It would be of silver and would be slightly larger in diameter than the present penny. The 20-cent and 10-cent coins (to be known as "florins" and "shillings") together with the 5-cent coin would be of cupro-nickel and would be indistinguishable in size and weight from the present florin, shilling and sixpence respectively. The two-cent and one-cent coins would be of bronze, the two-cent coin having a diameter between those of the sixpence and shilling, and the one-cent coin a diameter smaller than the present sixpence.\*

**2. The Present Australian Monetary System.**—The Australian monetary system is based on the British system, of which the unit is the pound (£) divided into 20 shillings (s.) each of 12 pence (d.). When the Australian currency was introduced in 1909, the Australian pound was specified as equivalent to 123.27447 grains of gold  $\frac{11}{16}$ ths fine or 113.002 grains of fine gold and, until the depression in 1930, was identical with the pound sterling. There was a gradual depreciation of the Australian pound in terms of sterling from the beginning of 1930 until 3rd December, 1931, when it was stabilized at the rate of £125 Australian = £100 sterling. This relationship has been maintained until the present time. Following the depreciation, no action was taken to define the value of the Australian pound in terms of gold until 5th August, 1947, when the Australian Government advised the International Monetary Fund, in terms of the membership agreement, that the par value of the Australian pound was 2.86507 grammes (44.2148 grains) of fine gold. From 18th September, 1949, this was reduced to 1.99062 grammes (30.720 grains) of fine gold.

When the Commonwealth was established in 1901, the currency in Australia consisted of United Kingdom gold, silver and bronze coins, notes issued by the banks, and Queensland Treasury notes. Queensland Treasury notes were in circulation in Queensland only, having superseded bank notes in that State after the 1893 crisis. Under the Commonwealth Constitution, the control of currency, coinage and legal tender and the issue of paper money was vested in the Commonwealth. The Commonwealth assumed these powers by enacting the *Coinage Act* 1909 and the *Australian Notes Act* 1910.

Australian notes are legal tender in Australia for any amount. Australian silver coins are legal tender for any amount not exceeding forty shillings and Australian bronze coins are legal tender for any amount not exceeding one shilling.

## § 2. Coinage

**1. Coins in Circulation.**—Brief historical notes relating to the Australian coinage are given in Official Year Book No. 37, pages 557 and 558. For weight, metal, composition, etc., of Australian coins in circulation *see* Official Year Book No. 39, page 697.

The silver coins issued prior to July, 1947, have a millesimal fineness of 925 (thirty-seven fortieths silver and three fortieths copper) and those issued since 1st July, 1947 (dated 1946 and later), have a millesimal fineness of 500 (one-half silver and one-half other metals).

\* On 18th September, 1963, it was announced that the new major unit would be called the "Dollar" and not the "Royal", and that the dollar and the cent would be the only units with specified names.

From 1910 to 1916, Australian coins were minted in England by the Royal Mint, London, and the Mint, Birmingham Ltd., and in 1916 and 1917 by the Indian Mints. The minting of Australian coins was undertaken by the Australian Mints in 1916, and coins have been minted at the Melbourne branch of the Royal Mint from 1916 to the present time, at the Sydney branch from 1919 until that Mint closed in 1926, and at the Perth branch in 1922 and from 1940 to the present time.

During the 1939-45 War, the two Australian mints were unable to meet the demand for Australian coins, and some coins were minted in the United States of America and India. In 1951-52 and 1952-53, some coins were minted at the Royal Mint, London, to meet the heavy demand for coins. Details of Australian coins obtained from each mint to 30th June, 1962, are as follows:—Melbourne, £53,495,000; Perth, £1,855,000; Sydney, £488,000; United Kingdom Mints, £3,016,000; United States Mints, £6,000,000; Indian Mints, £169,000; total, £65,023,000.

2. **Issues of Australian Coins.**—The net issues of Australian silver and bronze coin from 1910 to 30th June, 1962, were:—Crown (5s.), £276,000; Florin (2s.), £21,621,000; Shilling (1s.), £10,041,000; Sixpence (6d.), £6,254,000; Threepence (3d.), £6,568,000; total silver coin, £44,702,000; Penny (1d.), £2,692,000; Half-penny (½d.), £796,000; total bronze coin, £3,488,000. Except in the total, no allowance has been made for £58,000 worth of damaged silver coin, for which denominations are not available, withdrawn since 1910.

3. **Profits on Coinage of Silver and Bronze.**—Australian silver and bronze coins are token coins and, as the face value of the coins is greater than the value of the bullion they contain, a profit is made from their issue. This profit forms part of the Commonwealth Consolidated Revenue. In the following table, details are given of the value of coins issued, the cost of bullion, the cost of minting and sundry expenses connected with the issue, and the profits made on the issue of coins during the years 1957-58 to 1961-62.

**AUSTRALIAN SILVER AND BRONZE COINS: PROFITS FROM ISSUE**  
(£)

Year	Face value of coin issued (a)	Cost of bullion	Gross profit	Cost of minting and sundry charges	Net profit
<b>SILVER COIN</b>

1961-62 .. ..	3,815,832	2,760,568	1,055,264	465,860	589,404

(a) Includes selected and proof pieces.

NOTE.—Minus sign (—) denotes a loss.

4. **Australian Mints.**—(i) *General.* Soon after the discovery of gold in Australia a branch of the Royal Mint was established in Sydney. The formal opening took place on 14th May, 1855. The Melbourne branch was opened on 12th June, 1872, and the Perth

Branch on 20th June, 1899. The States of New South Wales, Victoria and Western Australia provided an annual endowment in return for which the mint receipts were paid to the respective State Treasuries. Owing to losses incurred in its operations, the Sydney branch was closed at the end of 1926.

Since their establishment, the Australian branches of the Royal Mint have been primarily concerned with the refining of gold, minting of Imperial gold coins and the production of bars and ingots of gold bullion for export. The minting of Imperial gold coins was discontinued in September, 1931. In 1916, the Melbourne branch took over the minting of Australian silver and bronze coins from the Royal Mint, London. Australian coins were also minted at the Sydney Mint from 1919 to 1926 and at the Perth Mint in 1922 and from 1940 to the present time. The Melbourne branch has also minted token coins for the Territory of New Guinea and for New Zealand.

(ii) *Gold Receipts and Issues.* (a) *Receipts.* The receipts of gold at Australian mints during 1961 and 1962 amounted to 984,517 and 981,592 fine ounces respectively (Melbourne, 118,318 and 114,838 fine ounces respectively, Perth, 866,199 and 866,754 fine ounces respectively).

(b) *Issues.* The Australian mints issue gold bullion for the use of local manufacturers (jewellers, dentists, etc.) and for export. Since September, 1931, when the United Kingdom departed from the gold standard, the minting and issue of gold coins by Australian mints has ceased. Australian exports of gold are mainly in the form of 400-oz. ingots, but in earlier years a considerable amount of gold was shipped to India in 10-oz. bars. Since early in the 1939-45 War, all gold has been acquired by the Reserve Bank, and the export and use of gold have been subject to regulation by the Commonwealth Government. From December, 1951, export of a proportion of newly-mined gold for sale on premium markets overseas was permitted. The issues from Australian mints during 1961 and 1962 amounted to 983,500 and 982,143 fine ounces respectively (Melbourne, 117,097 and 115,045 fine ounces respectively, Perth, 866,403 and 867,098 fine ounces respectively).

5. *Price of Gold.*—The following table shows the average prices of gold, the average values of the sovereign's gold content in London, and the sovereign's Reserve Bank buying price in Australia for the years 1957-58 to 1961-62. The average price of gold in Australia is based on the Reserve Bank's buying price for gold lodged with the mints.

PRICE OF GOLD: LONDON AND AUSTRALIA

Period	London		Australia		
	Average price per fine oz.	Average value of sovereign's gold content	Average price per fine oz.	Sovereign	
				Reserve Bank buying price	Equivalent to a premium on mint par value of—
	£Stg. s. d.	£Stg. s. d.	£A. s. d.	£A. s. d.	%
1957-58..	12 9 10	2 18 10	15 12 6	3 12 6	267.8
1958-59..	12 9 11	2 18 10	15 12 6	3 12 6	267.8
1959-60..	12 10 3	2 18 11	15 12 6	3 12 6	267.8
1960-61..	12 11 9	2 19 3	15 12 6	3 12 6	267.8
1961-62..	12 10 1	2 18 10	15 12 6	3 12 6	267.8

In December, 1951, arrangements were made whereby producers could sell a proportion of newly-mined gold for industrial purposes on overseas premium markets. Under these arrangements, gold is acquired by the Reserve Bank in the usual manner and sold, at the Bank's buying price, to an association representing gold producers participating in the scheme. The association pays the Bank's handling charges and the costs of preparation of the gold and makes arrangements for export and sale. The gold can be sold only against payment in United States dollars. Profits earned by the association after meeting administrative expenses are distributed to members in proportion to the quantity of gold delivered to the Reserve Bank. Until August, 1952, when permission was given for the export of fine gold, gold exported under this arrangement was not to exceed a fineness of 22 carats ( $\frac{11}{12}$ ths).

The average prices per fine ounce in Australian currency (f.o.b.) obtained for gold exported under this scheme for each month during 1961-62 for which there were sales were:—July, £15 14s. 3d.; August, £15 13s. 6d.; November, £15 12s. 6d.; December, January and February, £15 13s. 4d.

### § 3. Notes

1. **General.**—Brief historical notes relating to the circulation and issue of notes in Australia are given in Official Year Book No. 37, pages 561 and 562. The issue of notes intended for circulation as money other than by the Reserve Bank is prohibited.

2. **The Australian Note Issue.**—(i) *General.* Notes in circulation in Australia are issued by the Reserve Bank through the Note Issue Department. The Bank is authorized to issue Australian notes in denominations of 5s., 10s., £1, £5, £10 and any multiple of £10. The Reserve Bank is not required to hold a specific reserve in gold against the note issue, but the assets of the Note Issue Department must be held or invested in gold, on deposit with any bank, or in securities of the Government of the United Kingdom, the Commonwealth, or a State. Under the *Reserve Bank Act 1959*, the profits of the Note Issue Department are paid to the Commonwealth.

Australian notes are legal tender to any amount within Australia and have been issued in denominations of 10s., £1, £5, £10, £20, £50, £100 and £1,000. Notes of denominations higher than £10, however, have not been issued to the public since 1945.

(ii) *Australian Notes in Circulation.* Particulars of the average values of notes in circulation for the years 1957–58 to 1961–62 are given in the following table.

**AUSTRALIAN NOTE ISSUE**  
(£'000)

Denomination	Average of monthly statements(a) for year—				
	1957–58	1958–59	1959–60	1960–61	1961–62

In 1961–62, the net profits of the Note Issue Department amounted to £15,751,000 and were paid to the Commonwealth of Australia.

## BANKING

## § 1. Cheque-Paying Banks

1. **Royal Commission on Monetary and Banking Systems.**—A Royal Commission was appointed by the Commonwealth Government in November, 1935, to inquire into the monetary and banking systems in operation in Australia and to report whether any, and if so what, alterations were desirable in the interests of the people of Australia as a whole, and the manner in which any such alterations should be effected. The Commission presented its report on 15th July, 1937, and a summary of the recommendations appears in Official Year Book No. 31, page 1010.

2. **Banking Legislation.**—(i) *Commonwealth Legislation.* Under Section 51 of the Commonwealth Constitution, the Commonwealth Parliament has power to legislate with respect to "Banking, other than State banking; also State banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money." The principal Commonwealth Acts at present in force relating to banking are—

- (a) The *Reserve Bank Act* 1959, which provides for the constitution and management of the Reserve Bank of Australia and the management of the Australian note issue;
- (b) The *Commonwealth Banks Act* 1959–1961, which provides for the constitution and management of the Commonwealth Banking Corporation, Commonwealth Trading Bank of Australia, Commonwealth Savings Bank of Australia and Commonwealth Development Bank of Australia; and
- (c) The *Banking Act* 1959, which provides for the regulation of banking and for the protection of the currency and the public credit of the Commonwealth.

The *Banking Act* 1959, which replaced the *Banking Act* 1945–1953, was assented to on 23rd April, 1959, and came into operation on 14th January, 1960. It applies to all banks, except State banks trading in their own State, operating in Australia or the Territories of the Commonwealth. The objects of the Act are:—(a) to provide a legal framework uniform throughout Australia for regulating the banking system; (b) to safeguard depositors of the banks from loss; (c) to provide for the co-ordination of banking policy under the direction of the Reserve Bank; (d) to control the volume of credit in circulation and bank interest rates; (e) to mobilize and to provide machinery for the control of the foreign exchange and gold resources of the Australian economy. A summary of the main provisions of the Act is given in Official Year Book No. 46, pages 759 and 760.

(ii) *State Legislation.* State banking legislation relates to the incorporation of banks and the constitution and management of State banks. The Acts under which the various banks are incorporated differ. While some of the older banks were incorporated by special Act or Charter, e.g. the Bank of New South Wales by Act of Council 1817, the Bank of Adelaide by Act of the South Australian Parliament, and the Bank of New Zealand by Act of the General Assembly of New Zealand, most of the banks are incorporated under a Companies Act of the States or the United Kingdom. This is also the case with those banks which were reconstructed after the crisis of 1893. State banks, constituted under State Acts, transacting general banking business, are The Rural Bank of New South Wales, the State Bank of South Australia and The Rural and Industries Bank of Western Australia.

3. **Presentation of Banking Statistics.**—Because of the different purposes they serve in the Australian financial system, Australian banks have been divided for statistical purposes into the following five groups and a separate series is presented for each.

- (a) *The Reserve Bank of Australia.* Formerly the Commonwealth Bank, this bank is the Central Bank. It also provides special banking facilities through the Rural Credits Department. Statistics of the Central Banking Business (including the Note Issue Department) and of the Rural Credits Department are presented in separate series.
- (b) *The Commonwealth Development Bank of Australia.* This bank, which commenced operations on 14th January, 1960, under the control of the Commonwealth Banking Corporation, was formed basically from an amalgamation of the Mortgage Bank and Industrial Finance Departments of the Commonwealth Bank. Its prime purpose is to assist in the development of worth-while enterprises in the field of both primary and secondary industries which would otherwise be unable to obtain the necessary finance on reasonable and suitable terms and conditions.

- (c) *The Commonwealth Trading Bank of Australia.* This bank commenced operations on 3rd December, 1953. On that date, under the provisions of the *Commonwealth Bank Act 1953*, it took over the business of the General Banking Division of the Commonwealth Bank. On 14th January, 1960, under the provisions of the *Commonwealth Banks Act 1959*, it came under the control of the Commonwealth Banking Corporation.
- (d) *Private Trading Banks.* This group was formerly known as the Nine Trading Banks, but the number of banks included has been reduced to seven by amalgamations. With the Commonwealth Trading Bank, these banks provide the major part of the general banking facilities in Australia. The banks included in this group are—the Australia and New Zealand Bank Ltd. (an amalgamation of the Bank of Australasia Ltd. and the Union Bank of Australia Ltd.), The Bank of Adelaide, the Bank of New South Wales, The Commercial Bank of Australia Ltd., The Commercial Banking Company of Sydney Ltd., The English, Scottish and Australian Bank Ltd. and The National Bank of Australasia Ltd. (which has absorbed The Queensland National Bank Ltd. and The Ballarat Banking Co. Ltd.).
- (e) *Other Banks.* This group consists of (i) three State Government Banks—The Rural Bank of New South Wales, the State Bank of South Australia and The Rural and Industries Bank of Western Australia, (ii) one joint stock bank—The Brisbane Permanent Building and Banking Co. Ltd., which has specialized business in one district only, and (iii) branches of three overseas banks—the Bank of New Zealand, Comptoir National d'Escompte de Paris and the Bank of China, which transact limited business in Australia and are mainly concerned with financing trade, etc., between Australia and overseas countries.

In addition to the series mentioned above, a series for all cheque-paying banks is presented. This series covers the Commonwealth Trading Bank, the Private Trading Banks, and the other cheque-paying banks included in the fifth group.

Unless otherwise stated, the statistics presented are averages of weekly returns. Averages of liabilities and assets are the averages of the liabilities and assets of the banks on the weekly balance days during the period concerned. Averages of bank clearings and debits to customers' accounts are the averages of transactions for weeks ended on the balance days during the period.

4. *Banks Transacting Business in Australia.*—(i) *Number of Branches.* At 30th June, 1962, the 15 banks operating in Australia transacted all classes of banking business at 3,972 branches and 1,619 agencies. The Commonwealth Trading Bank and the Private Trading Banks have branches throughout Australia. The Rural Bank of New South Wales, the State Bank of South Australia and The Rural and Industries Bank of Western Australia, being State Government banks, have branches only in their respective States. The Brisbane Permanent Building and Banking Co. Ltd. transacts business only in Brisbane. The remaining three banks are branches of overseas banks.

**CHEQUE-PAYING BANKS: NUMBER OF BRANCHES(a) AT 30th JUNE, 1962**

Banks	New South Wales	Victoria	Q'land	South Aust.	West. Aust.	Tasmania	Nor. Terr.	Aust. Cap. Terr.	Australia

(a) At various balance sheet dates during 1962. (b) For the Commonwealth Trading Bank, the amount shown in this column is the amount specified as capital in the *Commonwealth Banks Act 1959*. For the State Bank of South Australia and The Rural and Industries Bank of Western Australia, the amounts shown in this column are capital funds provided by the respective State Governments. Capital of The Rural Bank of New South Wales consists of Inscribed Stock and Debentures issued by the bank for capital purposes. (c) Includes dividends declared but not paid at date of balance-sheet. (d) For the Commonwealth Trading Bank and the State banks, the amount shown in this column is total capital and reserves. (See footnote (b).) (e) Includes uncalled capital. (f) For the State Government banks, the net profit is the profit after writing off bank premises and payment of interest on capital. For the other banks, the net profit is the profit before writing off bank premises. (g) Dividends paid and payable out of profits earned during 1961-62. (h) This bank was in process of liquidation consequent upon the amalgamation of its business with the National Bank of Australasia Ltd.

5. The Reserve Bank of Australia.—(i) *General.* The Reserve Bank of Australia, established under the *Reserve Bank Act 1959*, which came into operation on 14th January, 1960, continued in existence the body corporate known as the Commonwealth Bank of Australia. An account of the progress and development of that bank is given in earlier issues of the Official Year Book (see No. 37, pp. 570 to 573, and No. 45, pp. 735 to 737).

The general functions of the Reserve Bank are set out in Section 10 of the *Reserve Bank Act 1959*, which states:—

“ It is the duty of the Board, within the limits of its powers, to ensure that the monetary and banking policy of the Bank is directed to the greatest advantage of the people of Australia and that the powers of the Bank under this Act, the *Banking Act 1959*, and regulations under that Act are exercised in such a manner as, in the opinion of the Board, will best contribute to,

- (a) the stability of the currency of Australia;
- (b) the maintenance of full employment in Australia; and
- (c) the economic prosperity and welfare of the people of Australia.”

In addition to its functions as a Central Bank, the bank controls the Australian note issue through a Note Issue Department, provides special banking facilities through the Rural Credits Department, and acts as banker to the Commonwealth and some of the States.

Prior to its reconstitution as the Reserve Bank, the Commonwealth Bank also provided general banking facilities through a General Banking Division up to 3rd December, 1953, when that business was taken over by the Commonwealth Trading Bank, and special banking facilities through the Mortgage Bank and Industrial Finance Departments. In addition, the Board of the Commonwealth Bank was responsible for the policy and administration of the Commonwealth Trading Bank and Commonwealth Savings Bank. On 14th January, 1960, on its reconstitution as the Reserve Bank, the Mortgage Bank and Industrial Finance Departments were amalgamated to form the Commonwealth Development Bank, and that institution, together with the Commonwealth Trading Bank and the Commonwealth Savings Bank, was placed under the control of the Commonwealth Banking Corporation, an organization established under the *Commonwealth Banks Act 1959* and entirely separate from the Reserve Bank.

(ii) *Management.* The Commonwealth Bank was managed between 1911 and 1924 by a Governor, from 1924 to August, 1945, by a Board of Directors, from August, 1945, to August, 1951, by a Governor, assisted by an Advisory Council, and since August, 1951, by a Board of Directors.

Under the provisions of the *Reserve Bank Act 1959*, the policy of the Reserve Bank is determined by a Board consisting of the Governor (Chairman), the Deputy Governor, the Secretary to the Treasury, and seven other members appointed by the Governor-General. The Bank is managed by the Governor, who acts in accordance with the policy of the Board and with any directions of the Board. The Bank is required to inform the Government of the monetary and banking policy of the Board. In the event of a disagreement between the Government and the Board as to whether the monetary and banking policy of the Bank is directed to the greatest advantage of the people of Australia, the Governor-General, acting with the advice of the Executive Council, may determine the policy to be adopted by the Bank.

(iii) *Central Banking Business.* Under the powers it possessed under the *Commonwealth Bank Act 1911–1943* and under its war-time powers under the National Security Regulations, the Commonwealth Bank gradually assumed the functions of a Central Bank. Part III. of the *Commonwealth Bank Act 1945* formally constituted the Bank as a Central Bank and granted the necessary powers to carry on the business of a Central Bank, and these powers were carried through into the present Act constituting the Reserve Bank. Under the provisions of the *Reserve Bank Act 1959*, the capital for the Central Banking Business is the capital of the Commonwealth Bank for Central Banking purposes immediately prior to 14th January, 1960, and such other sums as are transferred from the Reserve Bank Reserve Fund. The profits of the Bank are distributed as follows: (a) such sums as the Treasurer, after consultation with the Bank, determines shall be placed to the credit of the Reserve Bank Reserve Fund and (b) the remainder shall be paid to the Commonwealth.

(iv) *Note Issue Department.* The Note Issue Department, established in 1920 when the control of the Australian note issue was transferred from the Commonwealth Treasury to the Commonwealth Bank, was maintained in the same form under the *Reserve Bank Act 1959*. The Reserve Bank may, through this Department, issue, re-issue and cancel Australian notes. Under the *Reserve Bank Act 1959*, the profits of the Note Issue Department are paid to the Commonwealth.

(v) *Rural Credits Department.* The Rural Credits Department, established in 1925 for the purpose of making short-term credit available for the orderly marketing of primary produce, was continued in the same form under the *Reserve Bank Act 1959*. The Reserve Bank may, through this Department, make advances upon the security of primary produce placed under the legal control of the bank, or other security associated with the production or marketing of primary produce, to co-operative associations or marketing boards formed under the laws of the Commonwealth or a State or Territory of the Commonwealth or other bodies specified by proclamation. The period of the advance shall not exceed one year. Under the provisions of the *Reserve Bank Act 1959*, the capital of the Rural Credits Department is the capital of the Rural Credits Department of the Commonwealth Bank immediately prior to 14th January, 1960, and £2,000,000 provided by the Reserve Bank. The profits of the Rural Credits Department are dealt with as follows: (a) one half shall be placed to the credit of the Rural Credits Department Reserve Fund and (b) one half shall be placed to the credit of the Rural Credits Development Fund.

(vi) *Liabilities and Assets—All Departments.* Liabilities and assets of each Department of the Reserve Bank at 30th June, 1962, are shown in the following table.

(a) Prior to 14th January, 1960, Commonwealth Bank of Australia.

6. The Commonwealth Banking Corporation.—(i) *General.* The Commonwealth Banking Corporation was established under the *Commonwealth Banks Act 1959* and came into being on the 14th January, 1960. The Corporation is the controlling body for the Commonwealth Trading Bank, Commonwealth Savings Bank and Commonwealth Development Bank. The general functions of the corporation are set out in Section 9 of the *Commonwealth Banks Act 1959* which states:

“ It is the duty of the Board, within the limits of its powers, to ensure that the policy of the Trading Bank, of the Savings Bank and of the Development Bank are directed to the greatest advantage of the people of Australia and have due regard to the stability and balanced development of the Australian economy.”

Under the *Banking Act 1959*, the Corporation and its constituent banks are subject to the same central banking controls as are the private trading banks.

(ii) *Management.* The Board of the Corporation consists of the Managing Director of the Corporation, the Deputy Managing Director, the Secretary to the Treasury and eight other members appointed by the Governor-General of whom one is Chairman and another Deputy Chairman. In addition, there is an Executive Committee of the Board for each of the three separate banks. These Executive Committees are appointed by the Treasurer, after consultation with the Board, and are charged with taking such action as is necessary to ensure that effect is given by the respective banks to the policies laid down for them and to any directions given by the Board in relation to their affairs. Under the Board, the Corporation is managed by the Managing Director and the Deputy Managing Director. Each of the three constituent banks of the Corporation has its own statutory functions and responsibilities and its separate identity within the framework of the Corporation. Each bank is managed by a General Manager under the Managing Director of the Corporation.

In paras. 7 and 8 following, details are given of the assets and liabilities of the Commonwealth Development Bank and the Commonwealth Trading Bank. Details for the Commonwealth Savings Bank are shown in § 2 of this division, page 867.

7. **Commonwealth Development Bank of Australia.**—(i) *General.* The Commonwealth Development Bank of Australia was established by the *Commonwealth Banks Act 1959* and commenced operations on 14th January, 1960. It was formed basically from an amalgamation of the Mortgage Bank and Industrial Finance Departments of the Commonwealth Bank. Under the Act, the Bank is authorized to provide assistance for the development of worthwhile enterprises in the fields of primary and secondary industries which would otherwise be unable to obtain the necessary finance on reasonable and suitable terms and conditions. The Commonwealth Development Bank is managed by a General Manager under the Managing Director of the Commonwealth Banking Corporation, and its policy is determined by the Board of that Corporation. The capital of the Development Bank consists of the capital of the Mortgage Bank and Industrial Finance Departments of the Commonwealth Bank immediately prior to 14th January, 1960, £5,000,000 provided by the Reserve Bank, £10,000,000 provided by the Commonwealth Government in the 1961–62 Budget, and such other sums as are provided from the Commonwealth Development Bank Reserve Fund. The net profits of the Bank are paid to the Commonwealth Development Bank Reserve Fund.

(ii) *Liabilities and Assets.* The liabilities and assets of the Commonwealth Development Bank at 30th June, 1962, are shown in the following table.

1961–62.. .. .	17,512	19,944	24,362	2,955	1,235	48,496

(a) Prior to 14th January, 1960, Industrial Finance and Mortgage Bank Departments of the Commonwealth Bank of Australia.

(iv) *Profits.* The net profit of the Commonwealth Development Bank for the year ended 30th June, 1962, was £683,707. The net profit was appropriated to the Commonwealth Development Bank Reserve Fund.

8. **The Commonwealth Trading Bank of Australia.**—(i) *General.* The Commonwealth Trading Bank of Australia was established by the *Commonwealth Bank Act* 1953 and on 3rd December, 1953, took over the business of the General Banking Division of the Commonwealth Bank. It was managed by a General Manager under the Governor of the Commonwealth Bank and its policy was determined by the Board of that Bank. Under the provisions of the *Commonwealth Banks Act* 1959, which came into operation on 14th January, 1960, the Commonwealth Trading Bank was maintained in the same form but was placed under the control of the Commonwealth Banking Corporation. The Commonwealth Trading Bank is managed by a General Manager under the Managing Director of the Commonwealth Banking Corporation. The capital of the Commonwealth Trading Bank is the capital of the Commonwealth Trading Bank immediately prior to 14th January, 1960, £2,000,000 provided by the Reserve Bank, and such other sums as are transferred from the Commonwealth Trading Bank Reserve Fund. Under the Act, the Bank is liable for income taxes. The net profits of the Bank, after provision for taxation, are divided as follows:—  
(a) one-half shall be placed to the credit of the Commonwealth Trading Bank Reserve Fund and (b) one-half shall be paid to the Commonwealth.

(ii) *Liabilities and Assets.* The liabilities and assets of the Commonwealth Trading Bank at 30th June, 1962, are shown in the following table.

1961–62 .. ..	4.0	1.9	20.5	12.0	55.5	65.0	35.0

(a) Includes Territories of Papua and New Guinea.

(b) Based on averages of assets and liabilities

for the years shown.

(c) Coin, bullion, notes and cash with Reserve Bank on current account.

13. Classification of Advances within Australia—Commonwealth Trading Bank of Australia and Private Trading Banks (Major Trading Banks).—(i) *States, July, 1962.* A classification of bank advances of the Commonwealth and Private Trading Banks outstanding at 11th July, 1962, is shown in the following table.

Resident borrowers cover institutions (including branches of overseas institutions) engaged in business in Australia and persons permanently residing in Australia. Non-resident borrowers cover all other persons and institutions incorporated abroad, which, though represented, do not carry on business in Australia. Advances to resident borrowers have been classified as business advances, advances to public authorities, personal advances and advances to non-profit organizations. Business advances have been further classified to the main industry of the borrower and include advances to partnerships, companies and other institutions engaged in business in Australia, advances to persons actively engaged in business on their own behalf if the advance is mainly for business purposes, advances to mutual, co-operative and benefit societies which distribute their profits or surpluses (if any) to members by way of dividends, rebates on charges for goods and services, or increased benefits. Advances to public authorities cover advances to local and semi-governmental authorities including separately constituted government business undertakings but not the Commonwealth or State Governments. Personal advances cover advances to persons for purposes other than carrying on a business. Advances to non-profit organizations cover advances to organizations which are not carried on for the purpose of making a profit or gain to individual members, any income of the organization being used for the purposes of the organization or for the benefit of the community.

**COMMONWEALTH TRADING BANK OF AUSTRALIA AND PRIVATE TRADING

			November .. .. .	1,766.5
			December .. .. .	1,770.9

(a) Excludes limits in respect of temporary advances to woolbuyers and term loans to July, 1961—at the beginning of the month.

(b) Prior

The series on new and increased lending commitments has been compiled from information supplied by the major trading banks as at the second Wednesday of each month. Generally the series aims to cover all new and increased lending commitments entered into by banks which require the approval of a formal limit on a customer's overdraft account. Commitments in respect of temporary advances to woolbuyers and in respect of term loans are excluded. The figures represent gross new lending commitments of banks and do not take account of cancellations and reductions of existing limits. Figures for cancellations and reductions of existing limits can be obtained from this series (after adjusting the weekly average to a monthly basis) in conjunction with that of overdraft limits. However, these derived figures should be regarded as an approximation only, since there are unavoidable differences in the basis of the compiling of the two series.

16. Interest on Deposits: Rates—Cheque-paying Banks.—Particulars of interest rates since 1952 for fixed deposits are shown in the following table.

**BANK FIXED DEPOSIT RATES: AUSTRALIA**  
(Per cent. per annum)

Date from which operative	Deposits for—			
	Three months	Six months	Twelve months	Twenty-four months
29th July, 1952 .. .. .	1	1½	1½	(a) 1½
1st January, 1955 .. .. .	1½	1½	1½	2
15th March, 1956 .. .. .	2½	2½	2½	3
4th December, 1956 .. .. .	2½	2½	2½	3½
17th November, 1960 .. .. .	4(b)		4½	(c)
1st July, 1961 .. .. .	4(b)		4½	(c)
13th April, 1962 .. .. .	3½(b)		4	(c)

(a) On first £10,000; rate on amounts in excess of £10,000 was 1½ per cent. (b) Three months but less than twelve months. (c) The maximum period for fixed deposits was 12 months.

17. **Clearing House Returns—Average Weekly Clearings.**—The average weekly clearings in each capital city for the years 1957–58 to 1961–62 are shown in the following table.

**BANK CLEARINGS(a): AVERAGE WEEKLY CLEARINGS**  
(£'000)

Year	Sydney	Melbourne	Brisbane	Adelaide	Perth	Hobart	Total
1957–58 ..	124,172	114,854	25,835	24,099	15,598	4,427	308,985
1958–59 ..	135,387	128,870	27,227	25,299	15,786	4,893	337,462
1959–60 ..	167,858	156,625	34,202	30,461	19,579	6,062	414,787
1960–61 ..	190,929	172,942	40,263	35,773	23,255	7,122	470,284
1961–62 ..	200,293	194,352	41,190	39,209	24,709	7,101	506,854

(a) Excludes transactions connected with the issue and redemption of Treasury Bills.

18. **Debits to Customers' Accounts—Cheque-paying Banks.**—Statistics of debits to customers' accounts have been collected since September, 1945. Generally, they represent the total of all cheques drawn by the customers of the banks. In the following table, the average weekly debits to customers' accounts of all cheque-paying banks (including the Rural Credits Department of the Reserve Bank and the Commonwealth Development Bank) are shown for each State for the years 1957–58 to 1961–62. In this table, debits to accounts of Australian Governments in capital cities are excluded, as they are subject to abnormal influences and are not uniform for each State.

**CHEQUE-PAYING BANKS: AVERAGE WEEKLY DEBITS TO CUSTOMERS' ACCOUNTS**

(Excluding debits to Australian government accounts in capital cities)

(£'000)

(a) As at 30th June, 1962, established under International Monetary Fund Agreement. (b) No par value established. (c) Not a member of International Monetary Fund. (d) Unit of currency changed on 15th February, 1961 on basis of £S.A.1 = 2 Rands.

(ii) *Trading Bank Charges.* As from October, 1962, the trading banks instituted a system of charges on current accounts, and abolished the interstate exchange rates obtaining prior to this date. Details of interstate exchange rates prior to October, 1962, may be found in Official Year Book No. 48, page 785.

Charges on current account comprise a basic maintenance fee, a ledger activity fee and a cheque collection fee, each calculated on a quarterly basis and debited as a composite item to accounts four times a year. Details of these charges are shown below.

*Quarterly Charge.*

(a) *Basic maintenance current account fee, 5s. quarterly (non-rebatable).*

(b) *Ledger activity fee.* Up to ½ folio (20 entries), 2s. 6d.; over ½ folio to 1 folio, 7s. 6d.; over 1 folio to 2 folios, £1; over 2 folios to 3 folios, £2 5s.; over 3 folios to 4 folios, £3 10s.; over 4 folios to 5 folios, £4 15s.; over 5 folios to 6 folios, £6; over 6 folios to 7 folios, £7; over 7 folios to 15 folios, £7 plus 17s. 6d. per folio or part thereof exceeding 7; over 15 folios to 35 folios, £14 plus 15s. per folio or part thereof exceeding 15; over 35 folios, £29 plus 10s. per folio or part thereof exceeding 35. Rebates will be allowed for minimum quarterly credit balances as follows:—£300, 1 free folio; £600, 2 free folios; £1,000, 3 free folios; £1,600, 4 free folios; £2,500, 5 free folios; thereafter 1 additional free folio for each £500 minimum credit balance. Where rebates are applicable, the number of free folios will be deducted before the activity fee is calculated.

(c) *Collection fee on cheques, etc., deposited.* Up to 20 cheques per quarter, free; 21 to 100, 5s. plus 2s. 6d. per ten cheques or part thereof exceeding 20; 101 to 500, £1 5s. plus 12s. 6d. per each 50 or part thereof exceeding 100; 501 to 1,000, £6 5s. plus £1 5s. for each 100 or part thereof exceeding 500; 1,001 to 10,000, £12 10s. plus £6 per each 500 or part thereof exceeding 1,000; 10,001 to 50,000, £120 plus £7 10s. per each 1,000 or part thereof exceeding 10,000; 50,001 to 100,000, £425 plus £25 per each 5,000 or part thereof exceeding 50,000; 100,001 to 150,000, £675 plus £40 per each 10,000 or part thereof exceeding 100,000; over 150,000, £875 plus £30 per each 20,000 or part thereof exceeding 150,000.

## § 2. Savings Banks

1. *General.*—For information as to the origin of savings banks in Australia and the facilities currently available, see Official Year Book No. 46, page 779 and earlier issues.

During 1961-62, three new savings banks, the E.S. and A. Savings Bank Ltd., The National Bank Savings Bank Ltd., and the Bank of Adelaide Savings Bank Ltd., were established. These banks are associated with and operate from the same premises as existing private

trading banks. Savings banks operating at 30th June, 1962, were—the Commonwealth Savings Bank and the Australian and New Zealand Savings Bank Ltd. (in all States and Territories), the Bank of Adelaide Savings Bank Ltd. (all States except Tasmania), the Bank of New South Wales Savings Bank Ltd. (in all States and Territories except South Australia and Tasmania), the C.B.C. Savings Bank Ltd. (in all States except South Australia and Tasmania, and in the Australian Capital Territory), the E.S. and A. Savings Bank Ltd. (in all States and Territories), The National Bank Savings Bank Ltd. (in all States and Territories), The State Savings Bank of Victoria, The Savings Bank of South Australia, The Rural and Industries Bank of Western Australia, and the two trustee banks, The Launceston Bank for Savings and The Hobart Savings Bank.

All savings banks, including trustee savings banks, but not State savings banks, are subject to the *Banking Act* 1959. Details of this Act and the special provisions applyin tgo savings banks are given in Official Year Book No. 46, pages 759–60.

2. **Branches and Agencies.**—The number of branches and agencies in Australia of the various savings banks at 30th June, 1962, are given in the following table.

**ALL SAVINGS BANKS: NUMBER OF BRANCHES AND AGENCIES AT 30th JUNE, 1962**

Bank	Branches	Agencies
Commonwealth Savings Bank .. .. .	778	7,250
Australia and New Zealand Savings Bank Ltd. .. .. .	509	662
The Bank of Adelaide Savings Bank Ltd. .. .. .	83	83
Bank of New South Wales Savings Bank Ltd. .. .. .	771	2,636
C.B.C. Savings Bank Ltd. .. .. .	395	86
E.S. & A. Savings Bank Ltd. .. .. .	368	124
The National Bank Savings Bank Ltd. .. .. .	609	295
The State Savings Bank of Victoria .. .. .	423	648
The Savings Bank of South Australia .. .. .	110	641
The Rural and Industries Bank of Western Australia .. .. .	40	231
Launceston Bank for Savings .. .. .	22	44
The Hobart Savings Bank .. .. .	20	24
<b>Total .. .. .</b>	<b>4,128</b>	<b>12,724</b>

3. **Number of Operative Accounts.**—The following table shows the number of operative savings bank accounts in existence at the end of June, 1961 and 1962. It should be noted that these figures relate to the number of accounts and not necessarily to the number of depositors.

**ALL SAVINGS BANKS: NUMBER OF OPERATIVE ACCOUNTS(a)**

State or Territory	At end of June—	
	1961	1962
New South Wales .. .. .	3,151,362	3,323,975
Victoria .. .. .	2,822,324	2,984,220
Queensland .. .. .	1,187,322	1,250,343
South Australia .. .. .	962,673	1,019,184
Western Australia .. .. .	577,619	625,070
Tasmania .. .. .	316,794	331,847
Northern Territory .. .. .	16,645	19,116
Australian Capital Territory .. .. .	38,816	45,072
<b>Australia .. .. .</b>	<b>9,073,555</b>	<b>9,598,827</b>

(a) Excludes school bank accounts and inoperative accounts, i.e. accounts of less than £1 which have not been operated on for more than two years.

4. **Business Transacted.**—The following table shows details of the business transacted in Australia by savings banks during the years ended 30th June, 1961 and 1962.

### ALL SAVINGS BANKS: BUSINESS TRANSACTED IN AUSTRALIA

(£'000)

6. **Cheque Accounts.**—At most savings banks, cheque accounts are available to non-profit organizations such as friendly, co-operative and charitable societies. Similar facilities are also available to other depositors at the State Savings Bank of Victoria. Details of the transactions on these accounts during the year ended June, 1962 (excluding the Savings Bank of South Australia), together with the number of operative accounts and the amount on deposit at the end of June, 1962, were as follows:—Deposits during the year, £437,076,074; withdrawals during the year £431,569,035; interest added during the year, £1,004,372; amount on deposit at end of year, £50,395,422; number of operative accounts at the end of year, 223,658. These figures are included in the statistics in previous paragraphs.

7. **School Banking.**—With the object of encouraging principles of thrift among children, agencies of the savings banks have been established at most of the schools throughout Australia. Particulars of operative accounts within Australia at the end of June, 1958 to 1962 appear below.

## SCHOOL SAVINGS BANKS: AUSTRALIA

At end of June—	Number of school agencies	Number of operative accounts	Deposits	Deposits per operative account
			£	£ s. d.
1958..	..	..	..	..
1959..	..	..	..	..
1960..	..	..	..	..
1961..	..	..	..	..
1962..	..	..	..	..

8. **Assets.**—The assets within Australia of all savings banks as at the end of June, 1961 and 1962 are shown in the following table.

**ALL SAVINGS BANKS: ASSETS WITHIN AUSTRALIA(a)**

(£'000)

Particulars	At end of June—	
	1961	1962
Coin, bullion and Australian notes .. .. .	4,336	4,934
Deposits with Reserve Bank .. .. .	135,683	154,616
Deposits in Australia with Trading Banks .. .. .	47,441	60,786
Australian public securities—		
Commonwealth and States (including treasury bills) ..	789,332	832,565
Local and semi-governmental authorities .. .. .	312,235	352,728
Other securities .. .. .	..	450
Loans to authorized dealers in the short-term money market	7,625	13,790
Cheques and bills of other banks and balances with and due from other banks .. .. .	231	119
Loans, advances and bills discounted—

<b>Total .. .. .</b>	<b>1,662,030</b>	<b>1,823,963</b>

(a) Includes assets in Territories of Papua, New Guinea and Norfolk Island.

9. **War Savings and Savings Certificates.**—Sales of savings certificates and stamps under the War Savings and Savings Certificate schemes, particulars of which were given in earlier issues of the Official Year Book (see No. 37, page 586), were discontinued after 31st January, 1949, except for some sales made to wind up savings groups, etc. The total value of war savings and savings certificates outstanding at 30th June in each of the last five years was:—1958, £16,004,000; 1959, £10,633,000; 1960, £8,205,000; 1961, £5,989,000; 1962, £2,533,000.

10. **Commonwealth Savings Bank of Australia.**—(i) *General.* The Commonwealth Savings Bank of Australia was established as a separate institution on 9th June, 1928, having functioned previously as a department of the Commonwealth Bank (for particulars of the origin of the Savings Bank Department and the extension of its services see Official Year Book No. 46, page 783, and earlier issues of this Year Book). It has since then operated independently, publishing its own balance-sheets and profit and loss accounts. The *Commonwealth Bank Act* 1927, which provided for the establishment of the Commonwealth Savings Bank as a separate institution, provided for a Commission of three members to manage the savings bank. This Commission was never appointed, and the *Commonwealth Bank Act* 1945 placed the control of the Commonwealth Savings Bank under the Governor of the Commonwealth Bank. Under the provisions of the *Commonwealth Banks Act* 1959, which came into operation on 14th January, 1960, the Commonwealth Savings Bank was maintained in the same form, but was placed under the control of the Commonwealth Banking Corporation (see also para. 6, p. 848). Under the *Banking Act* 1959, the Commonwealth Savings Bank is subject to the same conditions as apply to the private savings banks and the trustee savings banks.

(ii) *Balance-sheet, 30th June, 1961 and 1962.* Particulars of the liabilities and assets of the Commonwealth Savings Bank as at 30th June, 1961 and 1962, are as follows.

**COMMONWEALTH SAVINGS BANK(a): LIABILITIES AND ASSETS, 30th JUNE,  
1961 AND 1962  
(£'000)**

Liabilities	1961	1962	Assets	1961	1962

			Commonwealth and States (including treasury bills) ..	492,616	505,432
			Local and semi-governmental authorities .. ..	95,682	103,320
			Other public securities .. ..	934	934
			Loans to authorized dealers in the short-term money market ..	3,280	4,050
			Loans and advances (after deducting provisions for debts considered bad or doubtful) .. ..	148,394	164,188
			Bank premises .. ..	13,146	14,477
			Bills receivable and all other assets .. ..	8,680	9,515
<b>Total .. ..</b>	<b>864,248</b>	<b>912,047</b>	<b>Total .. ..</b>	<b>864,248</b>	<b>912,047</b>

(a) Includes branches in London, the Territories of Papua, New Guinea, and Norfolk Island, and the British Solomon Islands.

(iii) *Profits.* Under the terms of the Savings Bank Amalgamation Agreements relative to the absorption of the State savings banks by the Commonwealth Bank, the profits of the Commonwealth Savings Bank in New South Wales, Queensland, Western Australia and Tasmania are equally divided between the Bank and the former controlling authorities in those States. Net profits for the years ended 30th June, 1958 to 1962, and the distribution of those profits, are shown in the following table.

**COMMONWEALTH SAVINGS BANK: DISTRIBUTION OF PROFITS  
(£)**

12. **Trustee Savings Banks, Hobart and Launceston.**—(i) *General.* Two Trustee Savings Banks, Hobart and Launceston, operate within Tasmania. These banks commenced business in 1845 and 1835 respectively. Under the *Banking Act* 1959, they are subject to the same conditions as apply to the Commonwealth Savings Bank and the private savings banks.

(ii) *Assets.* The assets of the Trustee Savings Banks as at 31st August, 1961 and 1962 are set out in the following table.

**TRUSTEE SAVINGS BANKS: ASSETS AT 31st AUGUST, 1961 AND 1962**  
(£'000)

(a) At 30th September. (b) At 30th June. (c) Separate details were:—The Australia and New Zealand Savings Bank Ltd., £94,345,000; the Bank of New South Wales Savings Bank Ltd., £180,635,000; C.B.C. Savings Bank Ltd., £52,779,000.

(iii) *Net Profit.* The net profit of the three private savings banks, after allowing for all expenses and providing for reserves and contingencies, etc., for the year ended 30th June, 1962, in respect of the C.B.C. Savings Bank Ltd. and the E.S. and A. Savings Bank Ltd. and the year ended 30th September, 1962, for the other banks, was (1961 figures in parentheses):—The Australia and New Zealand Savings Bank Ltd., £275,493 (£238,963); The Bank of Adelaide Savings Bank Ltd., £2,507; The Bank of New South Wales Savings Bank Ltd., £520,749 (£506,043); C.B.C. Savings Bank Ltd., £200,547 (£172,371); E.S. and A. Savings Bank Ltd., £25,056; The National Bank Savings Bank Ltd., £12,802; total, £1,037,154 (£917,377).

14. **Classification of Depositors' Balances.**—The classification of deposits published by savings banks does not permit a fully detailed analysis with respect to Australia as a whole, but the classification of deposits as at 30th June, 1958 to 1962, of the combined State Savings Banks of Victoria and South Australia, is shown below.

STATE SAVINGS BANKS: CLASSIFICATION OF DEPOSITS  
(Per cent.)

At 30th June—					£500 and under	£501-£1,000	Over £1,000
1958 ..	..	..	..	..	37.64	28.03	34.33
1959 ..	..	..	..	..	36.99	26.05	36.96
1960 ..	..	..	..	..	36.43	24.24	39.33
1961 ..	..	..	..	..	(a)	(b) 59.66	40.34
1962 ..	..	..	..	..	(a)	(b) 57.31	42.69

(a) Not available separately.

(b) £1-£1,000.

15. Rates of Interest on Deposits.—The following table shows the rates of interest allowed by Savings Banks at 30th June, 1958 to 1962.

**SAVINGS BANKS: INTEREST RATES ON DEPOSITS(a)**

(Per cent. per annum)

Size of account	Interest rates at 30th June—				
	1958	1959	1960	1961	1962
<b>Ordinary accounts(b)—</b>					
£1 to £1,000 .. .. .	2½	3	3	3½	3½
£1,001 to £1,500 .. .. .	1½	3	3	3½	3½
£1,501 to £2,000 .. .. .	..	3	3	3½	3½
£2,001 to £2,500 .. .. .	..	..	..	3½	3½
£2,501 to £3,000 .. .. .	..	..	..	..	3½
<b>Friendly and other society accounts—</b>

£2,001 to £2,500 .. .. .	1½	1½	1½	3½	3½
£2,501 to £3,000 .. .. .	1½	1½	1½	1½	3½
£3,001 and over .. .. .	1½	1½	1½	1½	2

(a) Predominant rates. Certain State Savings Banks allow a slightly higher rate of interest.  
 (b) No interest is payable on amounts in excess of the maximum amount shown.

**REGISTERED BUILDING AND CO-OPERATIVE SOCIETIES**

**§ 1. Registered Building Societies**

1. Summary.—During 1959–60 and 1960–61, returns were received from 1,571 and 1,698 societies respectively, but the information was not exhaustive, as particulars regarding a number of organizations were not included. In the following table, general information is given relating to the societies in each State for the year 1960–61 and to the combined States for 1959–60.

**REGISTERED BUILDING SOCIETIES: SUMMARY, 1959-60 AND 1960-61**

Particulars	1960-61							1959-60

(a) Years 1961 and 1960; excludes Co-operative Housing Societies, for details of which see para. 3.

**REGISTERED BUILDING SOCIETIES: ASSETS, 1959-60 AND 1960-61**  
(£'000)

State	1960-61			1959-60
	Advances on mortgage (a)	Other assets	Total assets	Total assets
New South Wales .. ..	169,356	3,996	173,352	159,317
Victoria(b) .. ..	20,659	1,188	21,847	20,486
Queensland .. ..	17,778	871	18,649	15,009
South Australia .. ..	4,997	395	5,392	4,712
Western Australia .. ..	10,716	320	11,036	9,134
Tasmania .. ..	5,357	489	5,846	5,255
<b>Total .. ..</b>	<b>228,863</b>	<b>7,259</b>	<b>236,122</b>	<b>213,913</b>

(a) Includes advances on mortgages of terminating societies which are on a gross basis. Net advances may be derived by subtracting the liability item Borrowing members' funds. See preceding table. (b) Years 1961 and 1960; excludes Co-operative Housing Societies, for details of which see para. 3.

3. **Co-operative Housing Societies, Victoria.**—In addition to the information shown above, the following details of co-operative housing societies in Victoria have been extracted from the Annual Reports of the Registrar of Co-operative Housing Societies. At 30th June, 1961 (1960 in parentheses), 632 (518) co-operative housing societies were registered in Victoria with 41,389 (36,641) members who had subscribed for 1,781,982 (1,544,714) shares, giving a nominal share capital subscribed of £90,366,608 (£79,914,179). For the twelve months ended 30th April, 1961 (1960), returns were submitted by 540 (507) societies, the total income of those societies being £454,150 (£430,725) and total expenditure, £411,508 (£372,846). The liabilities at 30th April, 1961 (1960), of the societies submitting returns were:—bank or other loans £59,874,502 (£53,156,151), subscriptions £10,106,190 (£8,851,046), surplus interest and management expenses £1,015,477 (£847,099), other liabilities £2,827,878 (£2,320,360), total liabilities £73,824,047 (£65,174,656). Assets at the same date consisted of:—advances £73,263,999 (£64,819,623), other assets £560,048 (£355,033), total assets £73,824,047 (£65,174,656).

## § 2. Co-operative Societies

Co-operative societies are divided into three classes—(i) those engaged in the manufacture and marketing of primary products and trade requirements; (ii) those engaged in retailing general household requirements; and (iii) those engaged in activities covered by both classes (i) and (ii). The first class may be described briefly as Producers' Co-operative Societies and the second as Consumers' Co-operative Societies. The particulars given for New South Wales relate to societies registered under the *Co-operation Act* 1923–1954. A summary of the business of all co-operative societies for the years 1960–61 or 1961 for all States except Western Australia is given in the following tables. Separate particulars for each of the three types of Co-operative Societies are given in the annual bulletin *Finance, Part I.—Public and Private Finance*, and issue No. 52, 1960–61, contains details for 1959–60 or 1960.

## INSURANCE

## § 1. Introductory

1. **Legislation.**—Section 51 of the Commonwealth Constitution confers the necessary powers on the Commonwealth Parliament to legislate with respect to “insurance other than State insurance; also State insurance extending beyond the limits of the State concerned”. Commonwealth legislation includes the *Marine Insurance Act 1909* defining the limits of marine insurance and regulating the terms of contracts, etc., the *Insurance Act 1932–1937* requiring the lodgment of deposits by insurance companies, and the *Life Insurance Act 1945–1961* generally regulating life insurance business in Australia. The *Marine Insurance Act 1909* and the *Insurance Act 1932–1937* have limited application, and, except for life insurance business, which is regulated by the *Life Insurance Act 1945–1961*, insurance business is conducted almost entirely under State laws.

2. **Insurance Act 1932–1937.**—Companies, persons or associations of persons carrying on insurance business in Australia or in any Territory of Australia are required to lodge a deposit with the Commonwealth Treasurer.

Money deposited is invested by the Treasurer in prescribed securities selected by the depositor, and all interest is paid to depositors. Deposits remain as security against liability to policy holders, and are available to satisfy judgments obtained in respect of policies.

Deposits held by States on 1st February, 1932, could, however, remain with the States subject to the conditions embodied in the laws of the States, and depositors to the extent of the value of these deposits were exempt from liability to make deposits under the Commonwealth Act.

The following are not regarded as insurance business under the Act:—

Staff superannuation schemes; schemes of religious organizations solely for insurance of their property; friendly society, union and association schemes involving superannuation or insurance benefits to employees.

This Act does not apply to State insurance within the limits of the State concerned, and, under the *Life Insurance Act 1945–1961*, ceased to apply to life insurance business.

3. **Life Insurance Act 1945–1961.**—The objects of this Act are:—(a) to replace all State legislation on the subject of life insurance, except that relating to the life insurance operations of State insurance offices within the State concerned, and to provide uniform legislation for the whole of Australia; (b) to appoint an Insurance Commissioner to exercise active supervision of the activities of life insurance companies, with a view to securing the greatest possible protection for policy holders; (c) to set up adequate machinery for dealing with any company that fails to maintain a required minimum standard of solvency.

The Act was assented to on 16th August, 1945, and came into operation on 20th June, 1946. A summary of the provisions of the Act is given in *Official Year Book No. 37*, pages 595–7.

The provisions of the Act relating to the establishment of a Commonwealth Government Insurance Office were repealed under the *Life Insurance Act No. 94 of 1953*.

4. **Export Payments Insurance Corporation Act 1956.**—Details of the operations of the Export Payments Insurance Corporation set up under this Act may be found in § 5 of Chapter XIII. Oversea Trade (*see p. 544*).

5. **Deposits under Insurance Acts.**—Deposits lodged under the Insurance Acts at 30th June, 1962, totalled £14,097,528, comprising £1,746,080 held by the Commonwealth in respect of life insurance and £12,129,158 held by the Commonwealth and £222,290 held by the State in respect of other forms of insurance. The deposits consisted of Commonwealth government securities £8,820,773, United Kingdom government securities £525,000, fixed deposits £16,120, bank guarantees and undertakings £3,597,000, corporation debentures and stock £387,960, and titles and mortgages £750,675.

## § 2. Life Insurance

1. **General.**—Since 1947, returns lodged under the *Life Insurance Act 1945–1961* have been used to compile life insurance statistics. Except where otherwise indicated, the figures in the succeeding paragraphs refer only to Australian business. Business in the Territories of Papua and New Guinea is, however, included in the Australian figures.

The information shown has been compiled from returns of life insurance business submitted in the financial years which ended during the year stated.

2. **Offices Transacting Business.**—The number of offices which transacted life insurance business in Australia during 1962 was 41, including 12 overseas companies. Of the 29 Australian offices, 6 are purely mutual, including one which transacts general business in respect of which share capital is used, 21 are public companies, and 2 are State Government institutions. Of the total offices, 28 transacted ordinary business only and the remainder both ordinary and industrial business. Where possible, ordinary, industrial and superannuation business have been kept separate in the following tables.

3. **Australian Business—Policies in Existence.**—In the following table, details of policies on the registers in each State and in the Australian Capital Territory are given for the year 1961.

#### LIFE INSURANCE: POLICIES EXISTING IN AUSTRALIA, 1961

State or Territory(a)	Insurance and endowment policies				Annuity policies

(a) Includes superannuation business.

8. **Liabilities and Assets.**—(i) *General.* The liabilities of the Australian offices consist mainly of their insurance funds, but in the case of public companies there is a further liability on account of the shareholders' capital. The assets consist chiefly of government and municipal securities, mortgages, loans on policies, landed and house property, etc. Loans on personal security are granted by very few of the Australian offices. Separate details of liabilities in respect of Australian business are not available.

(ii) *Total Liabilities and Assets.* In the two tables which follow, the details of liabilities and assets relate to all business (Australian and overseas) of Australian companies, the life insurance business of the two State Government offices, all business of the Provident Life Assurance Co. Ltd. (incorporated in New Zealand), and the Australian business only of the other eleven overseas companies operating in Australia. For various reasons, several offices do not attempt the dissection of liabilities and assets between industrial and ordinary business, and, therefore, the figures in the following tables relate to ordinary and industrial business combined. Details of the total liabilities of life insurance offices for the year 1961 are given in the following table.

**ORDINARY AND INDUSTRIAL LIFE INSURANCE: TOTAL LIABILITIES, 1961**

(a) State or Territory of location of mortgage, registration of policy, or residence of borrower.

(b) Includes Territories of Papua and New Guinea.

(c) Includes the Northern Territory.

### § 3. Fire, Marine and General Insurance

1. **General.**—The following statistics, which are in respect of the Australian business of companies operating in Australia and State government insurance offices, conform to the following definitions and should be interpreted in accordance therewith.

(a) Premiums represent the full amount receivable in respect of policies issued and renewed in the year, less returns, rebates and bonuses paid or credited to policy-holders during the year. They are not adjusted to provide for premiums unearned at the end of the year and consequently the amounts differ from "earned premium income" appropriate to the year. When business is increasing, as in recent years, premiums receivable (as shown in the statistics) are greater than "earned premium income" appropriate to the year. The converse applies when business is declining.

(b) Claims or losses include provision for outstanding claims and represent claims or losses incurred in the year. Salvage and other amounts recoverable have been deducted.

(c) Contributions to fire brigades, commission and agents' charges, and expenses of management represent mainly charges paid during the year.

(d) Taxation represents mainly payments made during the year, and includes income tax, pay-roll tax, licence fees, stamp duty (where paid by the company), etc. Income tax paid during the year is based on the income of earlier years.

The figures relate to selected items of statistics and are not construable as "Profit and Loss" statements or "Revenue Accounts".

In cases where the business is underwritten in one State and the risk is situated in another, the business is included in the State in which the policy was issued.

During 1961-62, revenue from premiums amounted to £209,216,000, and that from net interest on investments, etc., to £12,315,000, a total of £221,531,000. Expenditure on claims amounted to £130,820,000, contributions to fire brigades, £5,566,000, commission and agents' charges £19,078,000, expenses of management £36,145,000, and taxation £6,814,000, a total of £198,423,000.

2. **States.**—The following table shows, for each State, the aggregate premium income less returns, rebates and bonuses, and claims or losses less amounts recoverable, for all classes of insurance other than life for the years 1957-58 to 1961-62.

**FIRE, MARINE AND GENERAL INSURANCE: PREMIUMS AND CLAIMS—STATES**  
(£'000)

**INSTALMENT CREDIT FOR RETAIL SALES BY RETAIL BUSINESSES AND NON-RETAIL FINANCE BUSINESSES**

1. **General.**—Information relating to instalment credit for retail sales in Australia is given in the following tables. Information in more detail may be found in the annual bulletin *Finance, Part I.—Public and Private Finance* and in the monthly and quarterly statements relating to instalment credit for retail sales issued by this Bureau (*see NOTE* at beginning of this chapter).

The statistics cover operations of all types of instalment credit schemes which relate primarily to the financing of retail sales of goods, whether the credit is advanced by a retail business or by a non-retail finance business. In general, the term "instalment credit" is defined as relating to schemes in which repayment is made by regular pre-determined instalments. Types of schemes covered include hire purchase, time payment, budget account, and personal loan schemes which relate primarily to the financing of retail sales of goods. In these statistics, the term "retail sales" relates not only to retail sales by retail establishments coming within the scope of the Censuses of Retail Establishments conducted periodically by this Bureau, but includes also other sales of goods to final purchasers (e.g. plant and machinery).

2. **New Retail Agreements.**—Details of amount financed on new retail agreements in the years 1956–57 and 1958–59 to 1961–62 are given in the following tables.

(d) Includes hiring charges, interest and insurance.

# **NEW CAPITAL RAISINGS BY COMPANIES IN AUSTRALIA**

1. *General.*—Information relating to capital raised by companies in Australia is given in the following tables. More detailed information may be found in the annual bulletin *Finance, Part I.—Public and Private Finance* and in quarterly bulletins dealing with capital raisings (see NOTE at beginning of this chapter).

The statistics (the collection of which commenced in July, 1954) relate to capital raised by companies through issues of shares, and in the case of companies listed on stock exchanges, through the issue of debentures, notes and similar securities and the acceptance of deposits, and in the case of unlisted companies, by way of loans secured over the entire assets of the company. Capital obtained by way of bank overdraft, trade credit, temporary advances, and loans secured over part only of the assets of the company is not included, and, in the case of unlisted companies, capital raised through loans not secured over any of the assets of the company is excluded.

Separate statistics are given for listed and unlisted companies. Listed companies are companies incorporated in Australia or the Australian territories and listed on one or more of the Australian stock exchanges. All other companies incorporated in Australia, including subsidiaries of listed companies, are classified as unlisted companies. Companies incorporated overseas, whether listed on an Australian stock exchange or not, are excluded from the statistics of share issues. However, subsidiaries of overseas companies, if incorporated in Australia, are included. The statistics of new capital raised through issues of debentures, notes, etc., and the acceptance of deposits, include, in addition to capital raised by Australian companies, capital raised in this way from Australian sources by overseas public companies through their Australian offices.

The following are explanatory notes relating to some of the items shown in the tables.

**New Money.** This is the net amount of cash transferred from the investing public to the companies. For this purpose, the "investing public" includes banks and life insurance companies (except when subscribing to issues by associated companies), and government and private superannuation funds, but excludes other government agencies. Subscriptions by associated companies, whether local or overseas, are excluded. In the tables which follow, the amount of new money is obtained by deducting from the total cash raised the "amount not involving a net transfer of funds from the investing public".

**Amounts not involving new money.** These amounts include cash subscriptions received by issuing companies from associated companies. Such subscriptions represent inter-company transfers only, and do not involve a receipt of funds from the "investing public". Also included are amounts which, although subscribed by the "investing public" (i.e. subscribers other than "associated companies"), are not retained by the issuing company or its associates, but are used to redeem shares, debentures or unsecured notes, etc., or are used to purchase from individuals existing shares, debentures, etc., in other companies, including existing shares, etc., in associated and subsidiary companies. The funds used in this way are thus returned to another section of the "investing public", and do not represent a net transfer of cash from the "investing public" to the companies. (Besides these purchases of existing shares, etc., from individuals, purchases of existing shares, etc., from companies other than associates of the issuing company might also be included in this item, but the amounts involved are small and separate details have not been collected.)

2. Companies Listed on Stock Exchanges.—Details of new capital raised through issues of shares, debentures, or registered notes, or through accepting deposits, are given in the following table for each of the years 1957–58 to 1961–62.

**LISTED AUSTRALIAN COMPANIES(a): NEW CAPITAL RAISED THROUGH ISSUES OF SHARES, DEBENTURES, OR REGISTERED NOTES, ETC.(b), OR ACCEPTING DEPOSITS(c)**

(£ million)

(a) Includes preference shares. (b) Excludes deposits accepted by banks, insurance companies, pastoral companies and building societies, and loans to authorized dealers in the short-term money market.  
 (c) Includes only loans which are secured by charges over the companies' entire assets. (d) Not available for publication. (e) Small share issues of less than £1,000 for which returns have not been collected have not been included in the industrial classification but are included in Total, All Industries.

## OVERSEA INVESTMENT BY PRIVATE INVESTORS

1. *General.*—A survey of Oversea Investment has been conducted since 1947–48 to obtain particulars of certain types of private capital flows to and from Australia. The survey, when supplemented by other information, provides statistics of overseas investment in companies in Australia and in Australian public authority securities domiciled in Australia, and statistics of Australian investment in companies overseas and in foreign government securities. Particulars of investment income from most of those classes of investment are also obtained from the survey.

Certain types of private overseas investment are not included in the statistics which follow. Investment in real estate (except when made through companies), investment by means of bank deposits and advances, and loans between Australian individuals and non-resident individuals are not covered. Nor are changes in short-term liabilities between exporters and importers in Australia and overseas covered, except in so far as they arise from exports and imports between branches or subsidiaries and their home offices—in this case, they are included in the figures of investment in branches or subsidiaries.

In some cases, the capital invested in a company in Australia may be received from a company in one overseas country even though the ultimate ownership and control of that capital may rest with a parent company in a second overseas country. In the tables which classify investment in Australia according to country of origin, the investment is shown as an inflow from the country which is the immediate source of the capital rather than from the country in which the parent company with ultimate ownership and control is domiciled. Income payable overseas is classified on a similar basis, i.e., it is classified to the country to which it is directly payable.

Remittances between Australia and overseas by Australian life insurance companies are regarded as capital transactions made to bring assets located in overseas countries into line with commitments in those countries, and are shown as a flow of investment between Australia and overseas in the table in para. 4 below. Similar considerations apply to overseas life insurance companies with branches in Australia.

The following are some explanatory notes relating to terms used in the tables.

*Overseas.* For the purpose of these statistics, “overseas” includes Papua and New Guinea.

*Companies.* In these statistics, the term “companies” relates to both incorporated and unincorporated businesses.

*Subsidiary.* For the purpose of these statistics, this term is applied to all companies in which there is a “direct” holding, irrespective of the degree of control, if any, which is actually exercised. A holding is treated as “direct” when there is ownership of 25 per cent. or more of a company’s ordinary shares (or voting stock) by one company or a number of companies incorporated in one country, or ownership of 50 per cent. or more of a company’s ordinary shares (or voting stock) by individuals or companies in one country.

*Portfolio Investment.* Investment in company shares, debentures, etc., other than direct investment in such securities of a subsidiary company.

*Unremitted profits.* For these statistics, this represents the net earnings of branches during the year after tax, less remittances during the year by the branches to their home offices of net earnings and interest (irrespective of the period to which the earnings and interest relate). “Net earnings” of Australian branches of overseas companies is, in general based on the value of their income for taxation purposes.

*Undistributed profits.* This term refers, in the case of Australian “subsidiaries”, to the equity of the overseas parent in the net earnings of the Australian company, less tax (or tax provision) and less dividends declared. “Net earnings” of Australian subsidiaries of overseas companies is, in general, based on the value of their income for taxation purposes. In the case of overseas subsidiaries of Australian companies, this term represents the equity of the Australian parent in the book value of the net earnings of the subsidiary after tax, less dividends paid or payable.

*Finance Bulletin, Part I.—Public and Private Finance* and the *Annual Bulletin of Oversea Investment: Australia* contain additional figures relating to overseas investment, including a longer range of years covered, and also more detailed description of the figures.

2. Private Oversea Investment in Companies in Australia and Investment Income Payable Overseas by Companies in Australia.—The inflow of private overseas investment in companies in Australia since 1956-57, and a classification by country of origin, are shown in the following two tables.

**ANNUAL INFLOW OF PRIVATE OVERSEA INVESTMENT IN COMPANIES IN AUSTRALIA, BY TYPE OF COMPANY IN WHICH CAPITAL INVESTED(a)**  
(£A. million)

Year	Direct investment					Portfolio investment (b)	Annual inflow of overseas investment in companies
	Australian branches		Australian subsidiaries		Total direct investment		
	Unremitted profits	Other investment	Undistributed profits	Other investment			
1956-57 ..	9.4	7.7	38.3	40.6	96.0	8.9	104.9
1957-58 ..	4.6	5.8	38.8	47.4	96.6	7.9	104.5
1958-59 ..	11.6	9.5	51.7	32.8	105.6	19.7	125.3
1959-60 ..	9.5	21.7	59.2	69.3	159.7	33.6	193.3
1960-61 ..	2.8	24.7	54.8	105.4	187.7	48.4	236.1

(a) Increases in investment by some overseas investors are offset against withdrawals of investment by other overseas investors. (b) Partly estimated.

**ANNUAL INFLOW OF PRIVATE OVERSEA INVESTMENT IN COMPANIES IN AUSTRALIA, BY DOMICILE OF INVESTOR AND CATEGORY OF INVESTMENT(a)**  
(£A. million)

1959-60.. ..	0.4	4.3	-0.1	3.8	8.4
1960-61.. ..	1.4	4.5	..	3.7	9.6

(a) Unremitted profits of Australian branches plus undistributed profits of Australian subsidiaries.

4. **Net Annual Flow of Investment.**—The net annual flow of investment between Australia and overseas, and its classification by country, are shown in the following two tables. Changes in classifications have been made to these tables in order to conform with the presentation in *The Australian Balance of Payments*, 1958-59 to 1962-63. The annual inflow of investment in Australian public authority debt domiciled overseas and net overseas remittances by the insurance companies have been incorporated into both tables.

**NET ANNUAL FLOW OF INVESTMENT BETWEEN AUSTRALIA AND OVERSEA COUNTRIES, BY CATEGORY OF FLOW(a)(b)**

(£A. million)

Year	Annual inflow of investment				Annual outflow of investment				Net annual flow of investment to Australia
	In companies in Australia (c)	In public authority securities domiciled in Australia	In Australian public authority debt domiciled overseas	Total	In companies overseas	In foreign government securities	Net remittances from Australia by life insurance companies	Total	
1956-57 ..	104.9	-1.3	2.3	105.9	10.5	..	1.1	11.6	94.3
1957-58 ..	104.5	-1.9	12.4	115.0	6.5	..	4.8	11.3	103.7
1958-59 ..	125.3	-4.5	34.8	155.6	10.8	..	5.0	15.8	139.8
1959-60 ..	193.3	-2.3	34.8	225.8	3.4	..	2.4	5.8	220.0
1960-61 ..	236.1	-2.0	11.5	245.6	4.4	..	0.2	4.6	241.0

(a) These totals differ from that of private (net) capital items shown in Table 1 of *The Australian Balance of Payments*, 1958-59 to 1962-63.  
 (b) Increases in investment by some investors are offset against withdrawals of investment by other investors.  
 (c) The inflow to Australian companies through portfolio investment is partly estimated.

# NET ANNUAL FLOW OF INVESTMENT BETWEEN AUSTRALIA AND OVERSEAS COUNTRIES, BY REGION

(£A. million)

Year	United Kingdom	New Zealand	U.S.A. and Canada	I.B.R.D. (a)	Other	Net annual flow of investment to Australia
1956-57 ..	59.9	0.3	27.6	3.1	3.4	94.3

NOTE.—Minus sign (—) denotes outflow.

## UNIT TRUSTS, LAND TRUSTS, AND MUTUAL FUNDS

1. **General.**—Statistics relating to operations in Australia of unit trusts, land trusts and mutual funds have been collected quarterly since March, 1961, and are shown in the following tables. The figures do not include details of superannuation funds conducted by unit trusts management companies.

2. **Transactions of Trusts and Funds.**—Particulars of cash transactions in trust units and fund shares and of purchases and sales of investments by trusts and funds are given below.

## TRANSACTIONS OF TRUSTS AND FUNDS

(£ million)

Period	Cash transactions in respect of trust units and fund shares		Purchases and sales of investments(a)	
	Total amount received for trust units and fund shares issued (b)	Total amount paid for trust units and fund shares repurchased (c)	Purchases (d)	Sales (e)
Year ended—				
June, 1962 .. .. .	17.5	6.9	11.7	3.5
Quarter ended—				
March, 1961 .. .. .	2.6	1.8	3.6	1.6
June, 1961 .. .. .	3.2	2.0	2.7	1.4
September, 1961 .. .. .	4.3	1.9	3.2	1.1
December, 1961 .. .. .	3.2	1.5	2.2	0.7
March, 1962 .. .. .	4.9	1.6	3.4	0.7
June, 1962 .. .. .	5.1	1.9	2.9	1.0
September, 1962 .. .. .	4.1	1.3	3.8	0.8
December, 1962 .. .. .	3.7	1.8	4.1	1.7

(a) Commonwealth government, local government and semi-governmental securities, shares, debentures, unsecured notes, loans, deposits on term or notice of three months or longer, land and buildings, etc.

(b) Includes re-issues and new issues. Includes fees and expenses.

(c) Includes those units and fund shares intended for re-issue. (d) Payments for assets acquired during quarter. Includes brokerage and stamp duty.

(e) Receipts for assets sold or redeemed during quarter. Excludes brokerage and stamp duty.

3. Analysis of Purchases and Sales of Investments.—Details of purchases and sales of investments by trusts and funds during 1961–62 are given in the following table.

### ANALYSIS OF PURCHASES AND SALES OF INVESTMENTS BY TRUSTS AND FUNDS, 1961-62

(£ million)

Particulars	Shares (including preference shares)	Debentures, unsecured notes, deposits (a)	Common- wealth Government, local authority, and semi- governmental securities	Other (b)	Total
Purchases . . . . .	9.1	1.4	0.1	1.1	11.7
Sales . . . . .	2.7	0.2	0.2	0.4	3.5

(a) Excludes cash on hand and at bank, loans to authorized dealers in the short-term money market, and other deposits under three months term or notice. (b) Includes land and buildings, mortgages on land and buildings, and other investments.

4. Market Value of Trusts and Funds, and Cash and Short-term Deposits of Trusts and Funds.—The total market value of trusts and funds and the cash and short-term deposits of trusts and funds are shown in the following table.

### TOTAL MARKET VALUE OF TRUSTS AND FUNDS, AND CASH AND SHORT-TERM DEPOSITS OF TRUSTS AND FUNDS

December, 1962 ..	29.4	19.7	25.4	17.1	15.5	107.1

(a) Compiled from returns supplied by major pastoral finance companies. Advances are classified according to the location of the branch holding the advance, which in some cases may differ from the State of residence of the borrower. The statistics refer to the total advances outstanding at the end of the month shown.

## SHORT-TERM MONEY MARKET

1. **General.**—For some years prior to 1959, leading stockbrokers had been actively engaged in the acceptance of short-term funds against the security of government securities, but their operations were limited by the absence of suitable short-term securities and their liquidity requirements,

In February, 1959, the Commonwealth Bank (now the Reserve Bank) gave official status to the market by announcing that under certain conditions it would act as lender of last resort to authorized dealers in the short-term money market.

The form of organization so far developed consists of several companies authorized to act as dealers in the market. These dealers accept loans overnight, at call or for fixed periods in amounts of at least £25,000, and invest the funds in "money market securities", which have been defined as Commonwealth Government securities with currencies not exceeding three years.

Dealers are required to provide for a minimum capitalization and, in addition, to lodge with the Bank part of their capital in the form of money market securities as general backing for their operations. These lodgments which are referred to as "margins" are required to be equivalent on market values to at least:—(a) one per cent. of the total holdings by the dealer of securities maturing in one year; (b) two per cent. of the total holdings by the dealer of securities maturing within one to two years; and (c) four per cent. of the total holdings by the dealer of securities maturing within two to three years.

The Bank approves for each dealer the maximum portfolio of money market securities which may be carried and establishes a line of credit in favour of the dealer to the extent of that approved maximum portfolio. Under the line of credit, which is subject to renewal from time to time, the dealer may borrow in the last resort from the Bank against lodgment of security.

2. **Selected Assets and Liabilities of Authorized Dealers and Rates of Interest on Loans Accepted.**—In the following table, details of selected assets and liabilities of authorized dealers and the interest rates on loans accepted by dealers are given for June, 1959 to 1962, and for each month January to December, 1961 and 1962.

**SHORT-TERM MONEY MARKET: SELECTED ASSETS AND  
LIABILITIES OF AUTHORIZED DEALERS**

**FRIENDLY SOCIETIES**

1. General.—The total membership of friendly societies in Australia is about 450,000, but as certain benefits, such as medical attendance and free medicines, and in many cases funeral expenses, are granted to members' families as well as to members themselves, this figure must be more than doubled to arrive at an estimate of the number of persons who receive some direct benefit from these societies, even when due allowance is made for young and unmarried members. Legislation has conferred certain privileges on friendly societies, but, on the other hand, it insists on their registration, and it is the duty of the Registrars in the various States, prior to registering a new society, to see that its proposed rules conform to the law, and that the scale of contribution is sufficient to provide the promised benefits. Societies are obliged to forward to the Registrar annual returns about their membership and their finances, and reports are published in most of the States dealing with the returns received.

2. **Societies, Members and Revenue.**—The following table sets out the number of societies, members, etc., revenue and expenditure, and funds of registered societies for the year 1960–61. More detailed information is available in the bulletins *Finance, Part 1.—Public and Private Finance*, and issue No. 52, 1960–61, contains particulars for the year 1959–60.

#### FRIENDLY SOCIETIES(a), 1960–61

(a) Excludes juvenile branches, dispensaries, medical institutes and certain miscellaneous societies. Receipts and payments of subsidy under the Commonwealth medical and hospital benefit schemes are excluded. (b) Includes the Australian Capital Territory. (c) Year 1961.

#### L. PROBATES AND LETTERS OF ADMINISTRATION

The following table gives some particulars of the number and value of estates of deceased persons in each State for the latest year for which information is available. Owing to differences in legislation in the various States, the figures are not entirely comparable. From 1959–60 figures shown for Queensland relate to all estates dealt with; previous figures shown related only to estates dealt with by the Supreme Court.

#### PROBATES AND LETTERS OF ADMINISTRATION

(b) Estates dealt with by the

LOTTERIES AND BETTING

§ 1. Lotteries

State governments operate lotteries in New South Wales, Queensland and Western Australia. Tattersall Lotteries are operated under government licence in Victoria. Tasmanian Lotteries were operated under government licence until 30th September, 1961 when they surrendered their licence. In general, revenue derived by the State Governments from these lotteries is used directly or indirectly to provide funds for expenditure on hospitals, charities, etc. For information as to the origin, purpose and method of payment of proceeds or taxes to State revenues see Official Year Book No. 46, page 808 and earlier issues.

Details of ticket sales, prizes allotted, and taxes paid and other net contributions to State government revenues, relating to lotteries drawn during each of the years 1957-58 to 1961-62, are given in the following table.

LOTTERIES: VALUE OF TICKET SALES, PRIZES ALLOTTED, TAXES PAID AND OTHER NET CONTRIBUTIONS TO STATE GOVERNMENT REVENUES

(a) Estimated from taxes on totalizators.

(b) Estimated from taxes on betting with licensed bookmakers.

**PENSION AND SUPERANNUATION SCHEMES**

**§ 1. Government, Local Government and Semi-governmental Pension and Superannuation Schemes**

1. **General.**—The Commonwealth and all State governments have established pension and superannuation schemes for their employees. These schemes are operated through funds to which both the governments and the employees make contributions.

Employees of local government and semi-governmental authorities are covered either by the Commonwealth and State government schemes or by a separate scheme of the authority which is operated either through a separately constituted fund or through a life insurance office.

2. **Schemes operated through Separately Constituted Funds.**—In the table on page 907, particulars cover the following funds and authorities.

- (i) *Commonwealth.* The Superannuation Fund; Defence Forces Retirement Benefits Fund.
- (ii) *New South Wales.* The State Superannuation Fund; Government Railways Superannuation Fund; Police Superannuation and Reward Fund; State Government Non-contributory Pensions and Gratuities; Metropolitan Meat Industry Board—Officers' Endowment Fund and Wage Employees' Provident Fund; Local Government Provident Fund.
- (iii) *Victoria.* The State Superannuation Fund; Police Pensions and Police Superannuation Fund; Melbourne Harbor Trust Superannuation Fund; Geelong Harbor Trust Superannuation Fund; Melbourne and Metropolitan Board of Works Superannuation Fund; State Electricity Commission Provident Fund; Country Fire Authority Superannuation Fund; Gas and Fuel Corporation Superannuation Fund; Victorian Inland Meat Authority Staff Superannuation Fund; State Savings Bank of Victoria Superannuation Fund; Melbourne University Provident Fund; Port Phillip Pilots Sick and Superannuation Fund; Married Women Teachers Pensions Fund; and Local Authorities Superannuation Fund.
- (iv) *Queensland.* The Public Service Superannuation Fund; Railways Superannuation Fund; Police Superannuation Fund.

- (v) *South Australia.* The State Superannuation Fund; Police Pensions Fund.
- (vi) *Western Australia.* The State Superannuation Fund and Provident Account; Metropolitan (Perth) Passenger Transport Trust Provident Fund; State Electricity Commission—Electricity and Gas Department—Superannuation Fund; Western Australian Fire Brigades Board Superannuation Fund; University of Western Australia Superannuation Scheme.
- (vii) *Tasmania.* The State Public Service Fund; Public Service "Old" Fund; State Teachers Superannuation Fund; Police Provident Fund; Hobart and Launceston Marine Boards Superannuation Funds; Metropolitan Transport Trust (Hobart) Employees Retiring Allowance Fund; University of Tasmania Superannuation Fund and Invalidity Pensions Fund.

For details of approved authorities contributing to the State Superannuation Funds see annual bulletin *Finance, Part I.—Public and Private Finance, 1960–61.*

## § 2. Parliamentary Pension and Superannuation Schemes

Pensions and superannuation schemes have been established for members of the Commonwealth and State Parliaments. Details of these schemes, except for Tasmania, are given in pages 91 to 99 of Official Year Book No. 38. Details of the Tasmanian scheme are given on page 72 of Official Year Book No. 44. All the schemes are operated through funds to which the members of Parliament and the Commonwealth or State governments contribute.

## § 4. Private Superannuation, Pension and Retiring Allowance Schemes

1. General.—(i) *Private Superannuation, Pension and Retiring Allowance Schemes conducted by Private Businesses.* In this section, details are given of the results of a survey of private superannuation, pension and retiring allowance schemes conducted by private businesses, for the benefit of their employees, during the year ended June, 1961, or the accounting period nearest to that year. Similar surveys were conducted in 1951-52 and 1955-56.

Separate information was requested for the following:—

- (a) Schemes operated through life insurance offices, friendly societies, unit trusts, etc.;
- (b) Superannuation, pension and retiring allowance funds; and
- (c) Direct payments by the employer of pensions and/or retiring allowances.

The survey was based upon a sample of all businesses with a payroll of over £200 a week. Government airlines and banks were included, if contributing to their own separate funds rather than to State or Commonwealth superannuation funds, but other government businesses were excluded. Also excluded were rural industries, private domestic services and statutory coal miners' pension funds.

The figures shown in this statement are estimates for the whole field from which the sample was drawn. Some indication of the extent of the field surveyed is given by the fact that the figures relate to approximately 79 per cent. of all employees in private employment, excluding those employed in rural industries and private domestic service.

(ii) *Self-employed and other Superannuation and Retirement Schemes.* A second survey was carried out to obtain details for 1960-61 of other superannuation and retirement schemes run by private organizations for accredited members, whether they were self-employed persons, employees whose contributions were paid or supplemented by an employer, or employees contributing on their own behalf independently of any arrangements made by their employers. Paragraph 4 on page 912 relates to this survey.

2. **Types of Private Superannuation, Pension and Retiring Allowance Schemes.**—The survey showed that some type of scheme was operated by 53 per cent. of businesses (State branches and subsidiary companies being treated as separate businesses). The percentage varied between industries, 54 per cent. of businesses in manufacturing industry operating schemes, 64 per cent. in wholesale and retail trade, and 45 per cent. in other industries. Ninety-three per cent. of large businesses (monthly pay-roll over £20,000) operated schemes; 69 per cent. of medium businesses (monthly pay-roll £3,000 to £20,000); and 43 per cent. of small businesses (monthly pay-roll £860 to £3,000). Of the businesses which operated schemes, 66 per cent. operated a life insurance scheme but no superannuation, etc., fund; 14 per cent. operated both a life insurance scheme and superannuation, etc., fund; 19 per cent. operated a superannuation, etc., fund but no life insurance scheme; and one per cent. operated only direct payments. The percentage of businesses using a life insurance scheme without a superannuation, etc., scheme was greater among small businesses than among large.

3. **Financial Operations of Private Superannuation, Pension and Retiring Allowance Schemes.**—(i) *Operated through Life Insurance Offices, etc.* The following table shows details of the contributions to these schemes and of benefits paid through them during 1960–61.

**PRIVATE SUPERANNUATION, ETC. SCHEMES OPERATED THROUGH LIFE INSURANCE OFFICES, ETC.(a): AMOUNTS CONTRIBUTED AND LUMP SUM BENEFITS PAID, 1960–61**

(£ million)

Industry	Contributions			Lump sum benefits paid(b)		
	Employee	Employer	Total	On retirement or death	On resignation or dismissal	Total
Manufacturing ..	4.9	7.7	12.6	2.1	1.0	3.1
Non-manufacturing ..	5.2	9.0	14.2	2.0	1.2	3.2
<b>Total ..</b>	<b>10.1</b>	<b>16.7</b>	<b>26.8</b>	<b>4.1</b>	<b>2.2</b>	<b>6.3</b>

(a) Includes schemes operated partly through life insurance offices, etc. totalling £m. 0.4 were paid.

(b) In addition, pensions

The average contributions per employee covered by these schemes were:—by employees £42.0; by employers, £70.3; total, £112.3. Of the amounts contributed, employees paid 38 per cent. in 1960–61 (39 per cent. in 1955–56 and 1951–52), and employers 62 per cent. in 1960–61 (61 per cent. in 1955–56 and 1951–52).

(ii) *Superannuation, Pension and Retiring Allowance Funds.* (a) *Income and Expenditure.* The following table shows particulars of the income and expenditure during 1960–61 of these funds.

**SUPERANNUATION, PENSION AND RETIRING ALLOWANCE FUNDS:  
INCOME AND EXPENDITURE, 1960–61**

(£ million)

Industry	Income				Expenditure			
	Contributions			Total	Pensions paid	Lump sum payments	Other (a)	Total
	Em- ployee	Em- ployer	Other					
Manufacturing ..	3.8	7.4	6.1	17.3	1.0	3.1	1.2	5.3
Non-manufacturing ..	6.4	13.4	11.7	31.5	3.4	4.6	0.7	8.7
<b>Total ..</b>	<b>10.2</b>	<b>20.8</b>	<b>17.8</b>	<b>48.8</b>	<b>4.4</b>	<b>7.7</b>	<b>1.9</b>	<b>14.0</b>

(a) Includes administrative expenses payable from funds (£m.0.1), loss on sale of investments, life insurance premiums paid, etc.

The average contributions per employee covered by these schemes were:—by employees, £42.1; by employers, £85.9; total, £128.0. Of the total income in 1960–61, employee contributions constituted 21 per cent., employer contributions 43 per cent., and other income 36 per cent. Corresponding percentages in 1955–56 were 22, 50 and 28; and in 1951–52, 23, 55 and 22.

(b) *Assets of Funds.* In 1960–61, the assets of superannuation, pension and retiring allowance funds totalled £m. 297.2. Liabilities to sundry creditors amounted to £m. 2.3, leaving £m. 294.9 as the amount of funds in existence at the end of 1960–61. The composition of the assets is shown below, together with comparative information for previous surveys.

**BOOK VALUE OF SUPERANNUATION, PENSION AND RETIRING ALLOWANCE FUNDS, BY TYPE OF ASSET**

(Per cent.)

Survey	Cash and bank balances	Common-wealth Government securities	Local government and semi-governmental securities	Shares in companies, debentures, loans, etc.	Other	Total
1951–52.. ..	8	42	19	19	12	100
1955–56.. ..	8	30	25	24	13	100
1960–61.. ..	3	19	22	46	10	100

(iii) *Direct Payments by the Employer of Pensions and, or, Retiring Allowances.* Some businesses make direct payments of pensions and retiring allowances, either instead of, or in addition to, operating a scheme through a life insurance office, or a superannuation, pension and retiring allowance fund. In 1960–61, 10,200 direct payments of pensions were made, totalling £m. 2.8, and 3,800 retiring allowances were paid, totalling £m. 2 5. Payments per head of recipient in 1960–61 were:—Pensions, £275; retiring allowances, £657. Corresponding figures in 1955–56 were £221 and £632, and in 1951–52, £161 and £333.

**4. Self-employed and Other Superannuation and Retirement Schemes.**—Income and expenditure of these schemes during 1960–61 are shown in the table below.

**SELF-EMPLOYED AND OTHER SUPERANNUATION AND RETIREMENT SCHEMES: INCOME AND EXPENDITURE, 1960–61**

(£'000)

Particulars							Amount
<b>Income—</b>							
Contributions by members	..	..	..	..	..	..	1,275.5
Other income	..	..	..	..	..	..	230.7
<i>Total</i>	..	..	..	..	..	..	1,506.2
<b>Expenditure—</b>							
Superannuation and retiring benefits paid				..	..	..	63.5

Other expenditure	..	..	..	..	..	..	80.8
<i>Total</i>	..	..	..	..	..	..	159.4

The assets at book value of these schemes totalled £m. 2.9 at the end of 1960–61.

## CHAPTER XXI

### PUBLIC FINANCE

**NOTE.**—The subject of “Public Finance” is dealt with in this chapter under the two major divisions of Commonwealth Finance and State Finance. The close financial relations between the Commonwealth and States, however, particularly since the Financial Agreement has been in operation, demand also a combination of these two divisions under the heading of Commonwealth and State Finance. Under the Financial Agreement, the Commonwealth assumed the liability to bondholders for the States’ Securities existing at the date of the Agreement and now arranges for all borrowings for and on behalf of the Commonwealth or any State and for all conversions, renewals, redemptions and consolidations of such securities. In view of this, it is convenient to deal with the Commonwealth and State Government Securities on Issue in a separate division of this chapter (p. 955).

The subject of income taxes is also dealt with in a separate division at the end of this chapter.

For further detailed information on the subjects covered by this chapter, *see* the annual bulletins *Finance, Part I.—Public and Private Finance* and *Part II.—Commonwealth Taxation*, published by this Bureau. Current information in summarized form is contained in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, and the *Digest of Current Economic Statistics*.

#### COMMONWEALTH FINANCE

##### § 1. Financial Provisions of the Constitution

The main provisions of the Constitution relating to the initiation and development of the financial system of the Commonwealth are contained in Sections 81 to 105A of the Commonwealth Constitution (*see* pp. 17–20 of this Year Book). Two other sections which have a most important bearing on questions of Commonwealth finance are Sections 69 and 51.

Section 69 provides for the transfer from the States to the Commonwealth of certain specified departments, and Section 51, in outlining the powers of the Commonwealth Parliament, implies the transfer or creation of other departments. Sections 87 and 96 deal with the financial relations between the Commonwealth and the States. These matters have been treated in previous issues of the Official Year Book, and on pages 932–6 of this issue a summary is given of the present provisions for Commonwealth financial assistance to the States.

The *Audit Act* 1901–1961 lays down the procedure which must be followed in accounting for the receipt and disbursement of public funds. The general administration of Commonwealth finances is the responsibility of the Treasurer of the Commonwealth.

##### § 2. Commonwealth Public Account

**1. Nature of Account.**—The Commonwealth Public Account includes the Consolidated Revenue Fund, the Trust Fund and the Loan Fund. Ordinary revenues from taxation and other sources are paid into the Consolidated Revenue Fund, from which the main expenditures are for defence, war and repatriation services, social services, payments to the States, Commonwealth business undertakings (mostly postal, telephone and telegraph) and administration. The Trust Fund covers special transactions outside the ordinary operations of departmental expenditures, such as pension funds and moneys held for expenditure by the Commonwealth at some future time. The Loan Fund receives its funds from the sale of Commonwealth securities, and expenditures from the Fund are made in accordance with the purpose of issue of each loan. The main disbursements from the Loan Fund are to the States, either by way of distribution of the proceeds of loans raised by the Commonwealth on their behalf or in accordance with the provisions of the Commonwealth and State Housing Agreements, and the remaining disbursements are for Commonwealth purposes such as defence or war service land settlement.

**2. Summary of Receipts and Expenditure.**—A summary of transactions on the Commonwealth Public Account for 1961–62 and the four preceding years is given in the table below.

**COMMONWEALTH PUBLIC ACCOUNT: SUMMARY OF TRANSACTIONS**  
(£ million)

(a) Excludes payments to Loan Consolidation and Investment Reserve:—1957-58, £104.4 million; 1958-59, £27.9 million; 1959-60, £41.4 million; 1960-61, £142.6 million; 1961-62, £22.2 million.

### § 3. Commonwealth Consolidated Revenue Fund

#### REVENUE

1. **Sources of Revenue.**—The following table shows details of the revenue from each source and the amount per head of population under each of the main headings during the years 1957-58 to 1961-62. Taxation constitutes the main sources of Commonwealth revenue, accounting for 86.3 per cent. in 1961-62.

#### COMMONWEALTH CONSOLIDATED REVENUE FUND: SOURCES OF REVENUE (£'000)

<b>Total .. ..</b>	<b>231,334</b>	<b>236,254</b>	<b>252,111</b>	<b>257,409</b>	<b>265,645</b>

(iv) *Other Taxation.* (a) *General.* Taxes other than customs and excise and the various export charges are, in general, assessed and collected by the Commissioner of Taxation. The organization comprises a Head Office in Canberra, an office in each State assessing the returns of taxpayers whose interests are restricted to that State, and a Central Office situated in Melbourne assessing taxpayers whose interests are in more than one State.

For detailed statistics relating to Commonwealth income taxes, estate duty, gift duty and sales tax, see the annual bulletin *Finance, Part II.—Commonwealth Taxation*, issued by this Bureau.

(b) *Sales Tax.* The sales tax was first imposed in August, 1930. The operation of the tax is controlled chiefly by a system of registration of taxpayers whereby all manufacturers and wholesale merchants, who are the taxpayers under the Act in respect of goods sold in Australia, must be registered with the Department. The tax on imports subject to sales tax is collected by the Customs Department at ports of entry.

Since the inception of the tax, certain exemptions have been allowed. These exemptions, which have been extended from time to time, relate mainly to goods of an essential nature or those for use in primary production. The most recent exemptions were those granted from 15th August, 1961.

A general rate of tax is levied on all goods other than those specified in the schedules to the *Sales Tax (Exemptions and Classifications) Act 1935-1962*. These schedules set out details of goods exempt from sales tax and those subject to special rates. The general and special rates which operated from 7th August, 1952, were:—

Period	General rate	Special rates
7th August, 1952, to 9th September, 1953 ..	12½ per cent. ..	20, 33½ and 50 per cent.
10th September, 1953, to 18th August, 1954 ..	12½ per cent. ..	16½ per cent.
19th August, 1954, to 14th March, 1956 ..	12½ per cent. ..	10 and 16½ per cent.
15th March, 1956, to 3rd September, 1957 ..	12½ per cent. ..	10, 16½, 25 and 30 per cent.
4th September, 1957, to 15th November, 1960 ..	12½ per cent. ..	8½, 16½, 25 and 30 per cent.
16th November, 1960, to 21st February, 1961 ..	12½ per cent. ..	8½, 16½, 25 and 40 per cent.
22nd February, 1961, to 15th August, 1961 ..	12½ per cent. ..	8½, 16½, 25 and 30 per cent.
16th August, 1961, to 6th February, 1962 ..	12½ per cent. ..	2½, 16½, 25 and 30 per cent.
From 7th February, 1962 .. ..	12½ per cent. ..	2½, 22½ and 25 per cent.

Particulars of the net amount of sales tax payable and the sales of taxable and exempt goods in each State for 1961-62 are given in the following table. The figures relate to sales during the period 1st July to 30th June. The figures for sales tax payable differ from those for net collections shown on page 915 because the latter include some adjustments in respect of earlier tax years and include only tax payable on returns lodged during the year, which in general cover sales for the period June to May.

(a) Includes Australian Capital Territory.

Sales of taxable and exempt goods and sales tax payable for Australia as a whole are shown in the following table for the years 1957-58 to 1961-62.

### SALES TAX AND AMOUNT OF SALES

(£'000)

Year					Net sales on which sales tax was payable	Sales of exempt goods by registered persons	Total sales of taxable and exempt goods	Sales tax payable
1957-58	..	..	..	..	849,347	2,105,688	2,955,035	138,259
1958-59	..	..	..	..	890,293	2,152,026	3,042,319	143,296
1959-60	..	..	..	..	1,020,033	2,354,204	3,374,237	167,839
1960-61	..	..	..	..	1,040,552	2,447,126	3,487,678	171,584
1961-62	..	..	..	..	1,049,841	2,415,896	3,465,737	148,565

In the foregoing tables, sales include goods transferred to stock for sale by retail, goods imported by persons other than registered taxpayers, and goods used in the business of the taxpayer. Exempt sales relate to goods exempted from sales tax under the *Sales Tax (Exemptions and Classifications) Act 1935-1962*. The figures shown do not represent the total sales of all commodities, as vendors trading only in exempt goods are not required to be registered, and consequently the volume of their sales is not included in the statistics above. In addition, non-taxable sales (i.e., goods sold by one registered taxpayer to another registered taxpayer) are excluded.

(c) *Land Tax*. Commonwealth Land Tax was levied annually from 1910-11 to 1951-52 on the unimproved value of land. It was abolished from 1st July, 1952.

(d) *Pay-roll Tax*. The *Pay-roll Tax Act 1941* and the *Pay-roll Tax Assessment Act 1941-1942* imposed a pay-roll tax of 2½ per cent. on all wages and salaries in excess of £20 a week paid by an employer after 30th June, 1941. Employers who are liable for tax are required to register and to furnish a monthly return of all wages paid. These measures formed part of the Commonwealth scheme of child endowment, the revenue from the tax being designed to provide part of the money required. However, the collections now form part of the general revenues of the Commonwealth. For particulars of the present method of financing the National Welfare Fund, out of which Child Endowment is paid, see para. 5, page 926. The exemption was increased to £80 a week (£4,160 per annum) from 1st October, 1953, to £120 a week (£6,240 per annum) from 1st September, 1954, and to £200 a week (£10,400 per annum) from 1st September, 1957. Employers whose export sales have increased above the annual average of export sales effected during a base period of two years ended 30th June, 1960, are entitled under the Commonwealth Government's export incentive scheme to a rebate of pay-roll tax of twelve and one half times the percentage increase in export sales.

(e) *Income Taxes*. Details of taxes on income are given in the division, Taxes on Income, at the end of this chapter.

(f) *Wool Sales Deduction*. The Wool Sales Deduction scheme operated from 2nd December, 1950, until 17th November, 1951. For particulars, see Official Year Book No. 46, page 819.

(g) *Estate Duty*. Commonwealth Estate Duty was first levied in 1914. Particulars of exemptions allowed and the rates imposed prior to November, 1957, are given in earlier issues of the Year Book (see No. 43, p. 758).

Under the *Estate Duty Assessment Act 1914-1957*, Estate Duty is assessed on the net value of the estate less a statutory exemption determined in accordance with the following formula:—(a) where the whole of the estate passes to the widow, children (including adopted children, step-children and ex-nuptial children), or grand-children of the deceased, the sum of £5,000 decreasing by £1 for every £3 by which the value exceeds £5,000 and ceasing to apply at £20,000; (b) where no part of the estate passes to the widow, children or grand-children, the sum of £2,500 decreasing by £1 for every £3 by which the value exceeds £2,500 and ceasing to apply at £10,000; and (c) where only part of the estate passes to the widow, children or grand-children, the statutory exemption is to be calculated proportionately under (a) and (b).

An amendment to this Act, assented to on 20th November, 1957, provided for rebates of duty on estates which become liable for duty on two or more occasions within a period of five years.

The rates of duty levied under the *Estate Duty Act 1914-1941* increase as the value of the estate increases, as follows:—£1 to £10,000, 3 per cent.; £10,001 to £20,000, 3 per cent. to 6 per cent.; £20,001 to £120,000, 6 per cent. to 26 per cent.; £120,001 to £500,000, 26 per cent. to 27.9 per cent.; over £500,000, 27.9 per cent.

Particulars of the number and value of estates and duty assessed, for each of the assessment years 1956-57 to 1960-61, are given in the following table.

#### ESTATE DUTY ASSESSMENTS

Particulars	1956-57	1957-58	1958-59	1959-60	1960-61
Number of estates .. ..	12,784	13,599	11,794	13,978	14,196
Gross value assessed .. .. £'000	213,253	227,310	202,899	233,560	244,976
Deductions .. .. £'000	37,376	39,707	35,589	40,453	45,683
Statutory exemption .. .. £'000	28,661	30,492	26,555	31,597	33,051
Dutiable value .. .. £'000	147,216	157,111	140,755	161,510	166,241
Duty payable .. .. £'000	13,580	13,967	13,013	14,116	15,589
Average dutiable value .. .. £	11,516	11,553	11,934	11,555	11,710
Average duty per estate .. .. £	1,062	1,027	1,103	1,010	1,098

(h) *Gift Duty*. The *Gift Duty Act 1941-1947* and the *Gift Duty Assessment Act 1941-1957* impose a gift duty on all gifts made after the 29th October, 1941. A gift has been defined as any disposition of property which is made otherwise than by will without adequate consideration in money or money's worth. There is a liability on both the donor and the donee to furnish a return, and both are jointly and severally liable for payment of the duty.

The following rates of duty are levied under the *Gift Duty Act 1941-1947* and relate to the value of all gifts made by the donor within a period of eighteen months:—not exceeding £2,000, nil; £2,001 to £10,000, 3 per cent.; £10,001 to £20,000, 3 per cent. to 6 per cent.; £20,001 to £120,000, 6 per cent. to 26 per cent.; £120,001 to £500,000, 26 per cent. to 27.9 per cent.; £500,001 and over, 27.9 per cent.

An amendment which operated from 3rd June, 1947, provides that gift duty shall not exceed one-half of the amount by which the value of the gift exceeds £2,000.

(i) *Entertainments Tax*. The Commonwealth levied an Entertainments Tax from 1st October, 1942, to 30th September, 1953. Details of rates are given in earlier issues of the Official Year Book (see No. 40, pp. 672 and 673).

(j) *Wool Levy*. The *Wool Tax Act 1936* and *Wool Tax Assessment Act 1936* provided for a levy on all wool grown in Australia and shorn on or after 1st July, 1936. Details of this levy are given in earlier issues of the Official Year Book. This levy was suspended from 1st July, 1946, until 30th June, 1952, while the Wool Contributory Charge was imposed.

With the repeal of the Wool Contributory Charge, however, a levy on wool produced in Australia was re-introduced from 1st July, 1952. The *Wool Tax Acts (Nos. 1 and 2)* of 1952 provided for the payment of a levy of four shillings a bale until 30th June, 1953, after which date the rate of tax could be varied within prescribed limits. There was no variation until 1st July, 1957, when the rate was increased to six shillings a bale. The purpose of the tax is to provide funds for publicity and research previously provided by the Wool Contributory Charge. Collections during 1957-58, 1958-59, 1959-60, 1960-61 and 1961-62 were £1,328,000, £1,389,000, £1,542,000, £1,655,000 and £2,854,000 respectively.

(k) *Wool Contributory Charge*. The *Wool (Contributory Charge) Act 1945* and the *Wool (Contributory Charge) Assessment Act 1945* imposed a charge on all wool produced in Australia and sold, manufactured or exported. Wool sold by the Australian Wool Realization Commission was not liable to the charge. Details of the rate of the charge and collections made were given in earlier issues of the Official Year Book (see No. 40, p. 675).

The various *Wool (Contributory Charge) Acts* were repealed by the *Wool Tax Assessment Act 1952* and the charge superseded by the wool levy.

(l) *Wheat Export Charge and Wheat Tax*. A summary of the provisions of the *Wheat Export Charge Acts 1946, 1948, 1952 and 1954* is contained in previous issues of the Official Year Book (see No. 40, p. 676, No. 41, p. 604 and No. 46, p. 820).

The *Wheat Export Charge Act 1958* repealed the *Wheat Export Charge Act 1954* and provided for an export charge on wheat and wheat products for the seasons 1958-59 to 1963-64 inclusive. The charge levied is the excess of the export price over the cost of production or 1s. 6d. per bushel whichever is the less. Under the *Wheat Industry Stabilization Act 1958*, to which the Wheat Export Charge is complementary, the Commonwealth Government guarantees a return to wheat-growers of the ascertained cost of production of up to 100 million bushels of wheat harvested each season exported from Australia. Collections from the wheat export charge are paid into the Wheat Prices Stabilization Fund, out of which payments will be made to the Australian Wheat Board, when required, for the purpose of building up the average export price for any season to the guaranteed price. If the fund is exhausted, additional payments will be made from the Consolidated Revenue Fund.

Collections of the wheat export charge amounted to £443,000 in 1957-58, £1,211,000 in 1958-59 and £1,000 in 1959-60, and were nil in 1960-61 and 1961-62.

The *Wheat Tax Act 1957* imposed a tax of ¼d. for each bushel of wheat—

- (a) which has been delivered to the Wheat Board on or after the first day of October, 1956, and before the date of commencement of the Act; or
- (b) which is delivered to the Wheat Board on or after that date.

The Act also provided that where, before the commencement of the Act, a person delivering to the Board wheat upon which tax is imposed by the Act authorized the Board to deduct an amount from the moneys payable to him and to pay the amounts so deducted to a person, authority or association for the purposes of soil fertility research or other research likely to benefit the wheat industry, and the Board did so, the tax otherwise payable upon that wheat is to be reduced by the amount so deducted.

The *Wheat Research Act 1957* provided for the establishment of a Wheat Research Trust Account to receive moneys payable under the *Wheat Act 1957*, and for the setting up of a Wheat Industry Research Council to direct the expenditure of moneys from that Trust Account for research, etc., to benefit the wheat industry.

Collections of Wheat Tax amounted to £185,000 in 1957-58, £207,000 in 1958-59, £187,000 in 1959-60, £261,000 in 1960-61 and £234,000 in 1961-62, and were paid to the Wheat Research Trust Account.

(m) *Miscellaneous Export Charges.* These consist of charges levied on exports of apples and pears (*Apple and Pear Export Charges Act 1938-1960*), canned fruits (*Canned Fruits Export Charges Act 1926-1959*), dairy produce (*Dairy Produce Export Charges Act 1924-1937*), dried fruits (*Dried Fruits Export Charges Act 1924-1929*), eggs (*Egg Export Charges Act 1947*) and meat (*Meat Export Charges Act 1935-1954*), and on grapes used in the manufacture of wine (*Wine Grapes Charges Act 1929-1954*). The collections are paid into special funds to be applied, for the purposes of Export Boards established under various Acts, in controlling the quantity and quality of produce exported.

Collections for the last five years were as follows:—1957-58, £390,000; 1958-59, £566,000; 1959-60, £540,000; 1960-61, £529,000; and 1961-62, £617,000.

(n) *Stevedoring Industry Charge.* The *Stevedoring Industry Charge Act 1947* and the *Stevedoring Industry Charge Assessment Act 1947* imposed a charge of 4½d. a man-hour on the employer of a waterside worker after 22nd December, 1947.

The amounts received are paid to the Stevedoring Industry Board for the payment of attendance money to waterside workers and for other expenses of the Board.

Since 1947, the charge has been amended as follows:—11th October, 1949, a reduction to 2½d. a man-hour; 11th December, 1951, an increase to 4d. a man-hour; 28th October, 1952, an increase to 11d. a man-hour; 4th May, 1954, a reduction to 6d. a man-hour; 30th October, 1956, an increase to 1s. 7d. a man-hour; and from 21st May, 1957, an increase to 2s. a man-hour.

A further amendment under the *Stevedoring Industry Charge Act 1958* which came into operation on 1st April, 1958, provided for an increase of the charge to 3s. a man-hour until 1st July, 1959, and a reduction to 2s. 6d. a man-hour on or after 1st July, 1959.

Collections during the years 1957-58 to 1961-62 were as follows:—1957-58, £3,337,000; 1958-59, £4,572,000; 1959-60, £3,717,000; 1960-61, £3,844,000; and 1961-62, £3,433,000.

(o) *Tobacco Industry Charge.* The *Tobacco Charge Acts* (Nos. 1, 2 and 3) 1955 and the *Tobacco Charges Assessment Act 1955*, which came into operation on 1st January, 1956, provided for charges on tobacco leaf grown in Australia.

The *Tobacco Charge Act* (No. 1) 1955 imposed a maximum charge of ½d. a pound on all Australian tobacco leaf sold to a manufacturer.

The *Tobacco Charge Act* (No. 2) 1955 imposed a charge at twice the rate to be levied under the *Tobacco Charge Act* (No. 1) on all Australian tobacco leaf purchased by a manufacturer.

The *Tobacco Charge Act* (No. 3) 1955 imposed a charge on all Australian tobacco leaf grown by a manufacturer and appropriated by him for manufacturing purposes. Where the manufacturer grew, in Australia, not less than nine-tenths of the tobacco leaf used by him in manufacturing, the charge was at the rate imposed by the *Tobacco Charge Act* (No. 1). In other cases, the charge was at twice that rate.

The charges collected under the *Tobacco Charges Assessment Act 1955* were paid into the Tobacco Industry Trust Account which was established by the *Tobacco Industry Act 1955*. Moneys in this account are used for the promotion of the tobacco industry.

Collections in 1957-58, 1958-59, 1959-60, 1960-61 and 1961-62 amounted to £61,000, £72,000, £112,000, £136,000 and £164,000 respectively.

(p) *Dairy Produce Levy.* The *Dairy Produce Levy Act 1958* imposed a levy on the manufacture of butter and cheese for the purpose of financing a research and sales promotion scheme for the dairy industry. The maximum rates of the levy are fixed at three-sixteenths of a penny a pound on butter and three-thirty-seconds of a penny on cheese. In 1958-59, 1959-60, 1960-61 and 1961-62, collections amounted to £151,000, £334,000, £350,000 and £390,000.

(q) *Canning Fruit Charge.* The *Canning Fruit Charge Act* 1959 imposed a levy on apricots, peaches and pears accepted by canneries as of canning quality or for use in the production of canned fruit, for the purpose of promoting the sale of Australian canned fruits both overseas and in Australia. The rate of the charge was ten shillings per ton of fruit delivered to canneries or such lesser rate as may be prescribed from time to time. In 1959-60, 1960-61 and 1961-62, collections amounted to £35,000, £30,000 and £45,000 respectively.

(r) *Cattle Slaughter Levy.* The *Cattle Slaughter Levy Act* 1960 imposed a levy upon the slaughter of cattle for human consumption at rates to be prescribed from time to time but not exceeding two shillings per head of cattle slaughtered. The proceeds of this levy may be expended on purposes associated with scientific, economic, or technical research related to the raising of cattle or the production or distribution of beef and other products of the slaughter of cattle. In 1960-61 and 1961-62, collections amounted to £84,000 and £210,000.

3. *Business Undertakings.*—(i) *Postmaster-General's Department.* Particulars of net receipts for each of the financial years 1957-58 to 1961-62 are given in the following table.

**POSTMASTER-GENERAL'S DEPARTMENT: NET RECEIPTS**  
(£'000)

Particulars	1957-58	1958-59	1959-60	1960-61	1961-62 (a)
Telegraph .. .. .	6,169	6,321	6,804	7,275	7,448

<b>Total .. .. .</b>	<b>96,776</b>	<b>103,467</b>	<b>121,631</b>	<b>136,165</b>	<b>139,814</b>

(a) Owing to changes in accounting practices, exact comparisons cannot be made with previous years.

Further particulars of the Postmaster-General's Department's receipts to 1961-62 are given in Chapter XIV. Transport and Communication, of this Year Book (see p. 621).

(ii) *Broadcasting and Television Services.* Following the amendment of the *Australian Broadcasting Act* 1942-1946 by Act No. 64 of 1948, the Australian Broadcasting Control Board was set up on 15th March, 1949. (See also Chapter XIV. Transport and Communication, pp. 630-8).

Details of net receipts for the years 1957-58 to 1961-62 are shown in the following table.

**BROADCASTING AND TELEVISION SERVICES: NET RECEIPTS**  
(£'000)

Particulars	1957-58	1958-59	1959-60	1960-61	1961-62
Listeners' licence fees .. .. .	5,371	5,693	5,656	5,536	5,413

(iii) *Commonwealth Railways.* The Commonwealth Government is responsible for four railways—the Trans-Australian, the Central Australia, the North Australia and the Australian Capital Territory. The following table shows the amounts paid to the credit of the Consolidated Revenue Fund on account of each of these railways for the years 1957-58 to 1961-62.

COMMONWEALTH RAILWAYS REVENUE  
(£'000)

Railway	1957-58	1958-59	1959-60	1960-61	1961-62
Trans-Australian .. ..	2,821	2,927	3,249	4,091	4,187
Central Australia .. ..	1,554	1,635	1,601	1,867	1,821
North Australia .. ..	182	203	272	149	155
Australian Capital Territory .. ..	19	46	25	42	59
<b>Total .. ..</b>	<b>4,576</b>	<b>4,811</b>	<b>5,147</b>	<b>6,149</b>	<b>6,222</b>

Further particulars to 1961-62 are given in Chapter XIV. Transport and Communication (see pp. 591-2 and 594-5).

4. **Other Sources of Revenue.**—Revenue derived by the Consolidated Revenue Fund from the Territories of the Commonwealth during 1961-62 amounted to £5,996,000 (Australian Capital Territory £3,993,000; Northern Territory £2,001,000; Cocos (Keeling) Islands £2,000). Of other sources of revenue, amounting to £60,633,000, the following are noteworthy:—interest £17,069,000; defence £4,806,000; net profit on Australian note issue £15,751,000.

For details of the revenue of the Territories see Chapter V. of this Year Book.

## EXPENDITURE

1. **Details of Expenditure from Consolidated Revenue.**—The following table shows details of expenditure from the Consolidated Revenue Fund during the years 1957-58 to 1961-62.

COMMONWEALTH CONSOLIDATED REVENUE FUND: EXPENDITURE

(a) Excludes payments to or for the States under the Financial Agreement (see pp. 932-3).  
 (b) Redemption, conversion and loan management, etc., expenses. (c) Excludes Tuberculosis Benefits—maintenance grants, included in Payments to or for the States—1957-58, £4,495,000; 1958-59, £4,767,000; 1959-60, £4,299,000; 1960-61, £4,157,000; 1961-62, £4,314,000.

Further details of the expenditure in each section are given in paragraphs 2 to 12 following.

2. **Defence Services.**—Details of the expenditure on defence services, including works and services, but excluding debt charges, etc., by the Departments of Defence, Navy, Army, Air and Supply are shown in the following table. This table covers expenditure by the service and associated departments only, and includes the cost of maintaining forces in oversea posts.

The figures represent the combined expenditures from Consolidated Revenue and Loan Funds for the years 1957–58 to 1961–62. In earlier issues of this Year Book, this table covered expenditure from Trust Funds also, but there has been no expenditure from this source on defence services in recent years.

**DEFENCE SERVICES(a): COMMONWEALTH EXPENDITURE FROM REVENUE AND LOAN FUNDS**

(a) Excludes expenditure on debt charges, audit charges, pension and superannuation payments and Defence Division of the Department of the Treasury.

3. War and Repatriation Services.—Expenditure from Consolidated Revenue and Loan Fund for war and repatriation services (excluding debt charges) in relation to both the 1914–18 and 1939–45 Wars is shown in the following table for the years 1957–58 to 1961–62. Expenditure on the maintenance of forces in oversea posts and the cost of arms and equipment is included in Defence Services.

**WAR AND REPATRIATION SERVICES: COMMONWEALTH EXPENDITURE

(a) Munitions stores, etc., supplied to the British Government and other administrations. Includes repayments and waiver of war-time indebtedness of other administrations.

NOTE.—Minus sign (–) indicates excess of credits or repayments over expenditure.

4. Subsidies and Bounties.—The following table shows details of Commonwealth expenditure from revenue on subsidies, bounties and assistance to primary producers for the years 1957–58 to 1961–62. Expenditure on special relief such as drought, frost, flood and bush fire, etc., is not included here (included under items in table, para. 12), nor is expenditure from the proceeds of certain taxes on primary products and profits from marketing schemes, which have been paid to trust funds for the purpose of price or other stabilization schemes or for distribution to producers (see paragraph 11, p. 936). Payments to the States for Cattle Tick Control, Dairy Industry Extension and Agricultural Advisory Services are also not included under this heading, but under the heading Payments to or for the States (see para. 10, p. 931).

Further information relating to assistance to primary producers is given in Chapter XXII, Rural Industry. Details of price stabilization subsidies and of various forms of assistance to primary producers for earlier years may be found on pages 414 and 1014–15, respectively, of Official Year Book No. 38.

(a) Dairy products.

(b) Separate details not available.

5. **National Welfare Fund.**—The National Welfare Fund was established for the purpose of providing a fund for the payment of Commonwealth social services benefits. During the year 1949-50, an amount equivalent to the total collections of pay-roll tax and social services contribution was paid to the fund from Consolidated Revenue. During 1950-51, the social services contribution was amalgamated with the normal income tax, and it became necessary to base the contribution on another formula. For the year 1950-51, the amount paid to the fund was the total of collections of pay-roll tax and social services contribution plus £30,000,000. In 1951-52, the amount paid to the fund was the amount paid in 1950-51 increased in the same proportion as collections of pay-roll tax increased over the collections of pay-roll tax in 1950-51. By an amendment to the *National Welfare Fund Act 1943-1950*, the amount to be paid to the fund in 1952-53 and subsequent years was changed to the amount of moneys paid out of the fund. In addition to these payments from Consolidated Revenue, the fund received interest from investments.

In the following table, details are given of the income and expenditure of the National Welfare Fund and the balance in the fund at the end of each year for the years 1957-58 to 1961-62. For a detailed account of the establishment of the National Welfare Fund, the services provided and the numbers and amounts of benefits paid, see Chapter XV. Welfare Services.

(a) Includes Tuberculosis Benefits maintenance grants elsewhere included in Payments to or for the States—1957-58, £4,495,000; 1958-59, £4,767,000; 1959-60, £4,299,000; 1960-61, £4,157,000; 1961-62, £4,314,000.

6. **Loan Consolidation and Investment Reserve Trust Account.**—The *Loan Consolidation and Investment Reserve Act 1955* established the Loan Consolidation and Investment Reserve Trust Account for the purpose of repurchase or redemption of securities representing portion of the public debt of the Commonwealth.

Payments from the Consolidated Revenue Fund were made as follows:—1957-58, £104,378,000; 1958-59, £27,947,000; 1959-60, £41,382,000; 1960-61, £142,561,000; and 1961-62, £22,155,000. Expenditure from the Trust Account on repurchase of securities was £132,767,000 in 1957-58; £100,046,000 in 1958-59; £79,885,000 in 1959-60;

(a) Excludes Railways, see para. 8 (iii), page 929.

9. Works and Services.—In the following table, details are given of Commonwealth expenditure on works and services during each of the years 1957-58 to 1961-62. The table covers all expenditure on works and services made from the Consolidated Revenue Fund and the Loan Fund. In earlier issues of this Year Book, this table covered expenditure from Trust Funds also, but there has been no expenditure on works and services from this source in recent years.

NOTE.—Minus sign (—) indicates excess of credits or repayments over expenditure.

10. Payments to or for the States.—(i) *General.* An outline of the provisions of the Constitution requiring the Commonwealth to make payments to the States, and of the systems which followed, is given in earlier issues of the Official Year Book (see No. 37, pp. 633 to 638). In the following paragraphs, reference is made to the arrangements at present in operation.

(ii) *Amounts Paid.* (a) *Year 1961-62.* The table below shows particulars of the amounts paid to each of the States as grants for the several purposes referred to in subsequent paragraphs.

<b>Total</b> ..	<b>1,332,820</b>	<b>898,557</b>	<b>576,032</b>	<b>440,681</b>	<b>482,500</b>	<b>191,982</b>	<b>3,927,572</b>

(a) Includes non-recurring grants from excess receipts, but excludes payments on account of the Morgan-Whylla Waterworks, amounts provided for relief of wheat-growers and other primary producers, and other payments for medical research, social services, etc.

(b) Under various States Grants Acts. (c) Under *States Grants (Income Tax Reimbursement) Act* 1942.

(d) Under *States Grants (Entertainments Tax Reimbursement) Act* 1942. (e) Under *States Grants (Tax Reimbursement) Act* 1946-48.

(f) Under *States Grants (Additional Tax Reimbursement) Act* 1950. (g) Under *States Grants (Special Financial Assistance) Acts* 1951 and 1952.

(h) Under *States Grants (Additional Assistance) Act* 1958. (i) Under *States Grants Act* 1959. (j) Under *States Grants (Additional Assistance) Act* 1962.

(k) Includes natural disaster (flood, cyclone, bush fire, drought, etc.) payments, unemployment relief, metalliferous mining, forestry, local public works, grants for price control reimbursement, coal strike emergency grant, grants for imported houses, Port Augusta-Port Pirie railway, Western Australian waterworks, cattle tick control, dairy industry extension, agricultural advisory services, cattle roads, coal-loading works, etc.

(l) Under *Main Roads Development, Federal Aid Roads, Federal Aid Roads and Works and Commonwealth Aid Roads Acts*.

(m) Expenditure not allocable between States.

(n) Under the *Railway Standardization (South Australia) Agreement Act* 1949 and the *Railway Standardization (New South Wales and Victoria) Agreement Act* 1958. Includes repayable advances.

Particulars of special Commonwealth grants for the relief of primary producers are not included in the foregoing tables. See para. 4, Subsidies and Bounties, page 925, and para. 12, Other Expenditure, page 937.

(iii) *Financial Agreement*. Details of the Financial Agreement between the Commonwealth and the States are given in Official Year Book No. 37, pages 685-90. Under this Agreement, the Commonwealth undertook to contribute £7,584,912 per annum towards interest payable on the State loan securities for a period of 58 years from 1st July, 1927. This amount is distributed among the States as follows:—New South Wales, £2,917,411; Victoria, £2,127,159; Queensland, £1,096,235; South Australia, £703,816; Western Australia, £473,432; Tasmania, £266,859.

These amounts are equal to the sums paid by the Commonwealth to each State in the year 1926-27 at the rate of 25s. per head of population, the rate at which the Commonwealth had contributed annually to the States since 1st July, 1910, as compensation for the States relinquishing, after federation, the right to levy customs and excise duties.

In addition, under the Financial Agreement, the Commonwealth agreed to make certain contributions to the National Debt Sinking Fund for redemption of State loan securities. Details of these are given on pages 955-6 of this chapter.

(iv) *Special Grants.* The Constitution provides in Section 96 for the granting of special financial assistance to the States. Prior to 1933, financial assistance of varying amounts was granted by the Commonwealth to South Australia, Western Australia and Tasmania. Details of this may be found in earlier issues of the Official Year Book (*see* No. 40, p. 695).

In 1933, the Commonwealth Government appointed the Commonwealth Grants Commission of three members to inquire into and report upon claims made by any State for a grant of financial assistance and any matters relevant thereto.

Applications have been received from South Australia, Western Australia and Tasmania each year from 1933 onwards, and the recommendations of the Commission in respect of the years 1958-59 to 1962-63 are shown in the following table. Commencing with 1949-50, the Commission has divided the grants recommended into two parts. One part is the Commission's estimate of the indispensable need of the claimant State for the year in which the payment is to be made after allowing a sufficient margin for safety. The other part is an adjustment of this estimate for an earlier year after an examination of the audited accounts for that year. Thus the grants for 1962-63 include an estimate of the indispensable need of the claimant State for 1962-63 and an adjustment to the estimated grant for 1960-61. South Australia agreed with the Commonwealth not to apply for special grants in other than exceptional circumstances after 1st July, 1959, when the new financial arrangements under the *States Grants Act* 1959 came into operation (*see* sub-para. (v) below).

#### COMMONWEALTH GRANTS COMMISSION: GRANTS RECOMMENDED

(a) Adjustment to estimated grant paid two years previously.  
payment of £1,027,000 in 1959-60.

(b) Includes the final adjusting

(v) *Financial Assistance Grants.* The *States Grants Act* 1959 repealed the *States Grants (Tax Reimbursement) Acts* of 1946, 1947 and 1948 and provided for payment of financial assistance to the States in 1959-60 amounting to £244,500,000 to be distributed among the States as follows:—New South Wales, £83,450,000; Victoria, £60,625,000; Queensland, £36,375,000; South Australia, £27,675,000; Western Australia, £25,462,000; Tasmania, £10,913,000. In subsequent years, the financial assistance grant payable to each State has been determined by increasing its grant for 1959-60 in accordance with a formula which takes into account movements in population in each State and the increases (if any) in the level of average wages per person employed as shown in returns submitted under the *Pay-roll Tax Assessment Act* 1941-1961. In 1961-62, the grants determined according to this formula were as follows:—New South Wales, £99,249,000; Victoria, £73,015,000; Queensland, £43,730,000; South Australia, £33,225,000; Western Australia, £30,085,000; Tasmania, £12,836,000.

Details of the *States Grants (Income Tax Reimbursement) Act* 1942 and the *States Grants (Entertainments Tax Reimbursement) Act* 1942 are given in earlier issues of the Official Year Book (*see* No. 37, pp. 635-7). These Acts provided for grants to the States as compensation for vacating the fields of income tax and entertainments tax. Grants under these Acts ceased after 1945-46 and were replaced by grants under the *States Grants (Tax Reimbursement) Act* 1946-1948 which expired after 1958-59. *See* Official Year Book No. 46, pages 837-8.

(vi) *Special Financial Assistance Grants.* During the years 1954–55 to 1958–59, there were heavy additions to the financial needs of the States, and special assistance grants amounting to £19,902,000, £15,348,000, £19,405,000, £24,145,000 and £30,437,000, respectively, were made. For details of amounts paid to each State see earlier issues of the Official Year Book or the annual bulletin *Finance, Part I.—Public and Private Finance.*

(vii) *Additional Financial Assistance.* The *States Grants (Additional Assistance) Act* 1958 provided for the payment of £5,000,000 from the Consolidated Revenue Fund for financial assistance to the States.

During 1961–62, an additional assistance grant of £10,000,000 was provided to the States on a non-repayable basis under the authority of the *States Grants (Additional Assistance) Act* 1962 for expenditure on employment-giving activities, mainly in the works field.

(viii) *Grants for Road Construction.* (a) *Main Roads Development Act* 1923–1925, *Federal Aid Roads Acts* 1926, 1931 and 1936, *Federal Aid Roads and Works Act* 1937, *Commonwealth Aid Roads and Works Act* 1947–1949, *Commonwealth Aid Roads Act* 1950, *Commonwealth Aid Roads Act* 1954, and *Commonwealth Aid Roads (Special Assistance) Act* 1957. Details of these Acts are given in earlier issues of the Official Year Book (see No. 38, pp. 787–8, No. 41, p. 62, and No. 46, p. 838) and in the annual bulletin *Finance, Part I.—Public and Private Finance.*

(b) *Commonwealth Aid Roads Act* 1959. A new scheme of Commonwealth assistance to the States for roads was established by the *Commonwealth Aid Roads Act* 1959. Under this Act, which is to operate for a period of five years from 1st July, 1959, the Commonwealth has undertaken to make available up to £250,000,000 to the States for the construction, reconstruction, maintenance and repair of roads.

Of this amount, a total of £220,000,000 will be paid to the States as basic grants for roads over five years. The basic grants are fixed annual amounts which rise progressively by £2,000,000 a year from £40,000,000 in 1959–60 to £48,000,000 in 1963–64. In each year, the grants will be distributed between the States on the basis of 5 per cent. of the total to Tasmania and the balance shared between the other five States, one-third in proportion to their respective populations at the date of the last preceding Census, one-third in proportion to their respective areas, and one-third in proportion to the respective number of motor vehicles registered in these States at 31st December preceding the year of payment.

The balance of up to £30,000,000 over the five years will be made available to the States as matching assistance for roads. The total amounts of matching assistance will increase by £2,000,000 a year from £2,000,000 in 1959–60 to £10,000,000 in 1963–64. Up to the limit of its share of the total matching assistance available in any year, each State qualifies for £1 of matching assistance from the Commonwealth for each £1 by which the amount it allocates in that year from its own resources for expenditure on roads exceeds the amount so allocated in 1958–59. The share of each State in the total matching assistance available in any year is determined by the same formula as is used to determine its share of the basic grant in that year.

The full amount of the matching assistance available to each State in any year is being paid during that year on the understanding that the road grants to the State in the following year will be adjusted if it is subsequently found that the State did not qualify in full for the matching assistance paid to it in that year.

The legislation relating to the years 1947–48 to 1958–59 provided for annual allocations to the Commonwealth for expenditure on strategic roads and the promotion of road safety practices. No such provisions are contained in the present legislation, the Commonwealth making separate provision for these purposes.

(ix) *Tuberculosis Act* 1948. The *Tuberculosis Act* 1948 provided for the reimbursement by the Commonwealth of capital and maintenance expenditure incurred by the States in the provision of facilities for the diagnosis, treatment and control of tuberculosis.

Re-imbursments from the National Welfare Fund of maintenance expenditure on tuberculosis hospitals equal the amounts by which such expenditures of the States in any financial year exceed those for the year 1947–48. As from 1st July, 1948, the States have also been reimbursed from annual appropriations of the Department of Health for all their capital expenditure on buildings, furnishings, equipment and plant.

(x) *States Grants (Mental Institutions) Act* 1955. This Act provides for financial assistance to the States for capital expenditure on mental institutions to a maximum amount of £10,000,000. Each State is entitled to one-third of expenditure made on or after 1st July, 1955, on buildings or equipment of a mental institution.

(xi) *Other Payments.* (a) *Western Australian Waterworks.* The *Western Australia Grant (Water Supply) Act* 1948–1957 provides for grants to Western Australia not exceeding

an aggregate of £5,000,000 for the development of the Agricultural Areas, Great Southern Towns and Goldfields Water Supply schemes. The amount provided by the Commonwealth is not to exceed half the total expenditure on the scheme.

(b) *Coal Mining Industry—Long Service Leave.* To provide funds for the payment for long service leave in the coal mining industry, the Commonwealth imposed an excise duty of 6d. a ton on coal produced from 1st November, 1949. The rate of duty was raised to 7½d. a ton from 26th August, 1951, and to 8d. a ton from 30th May, 1952. The proceeds of this excise duty are paid to a trust fund out of which the States are reimbursed for expenditure incurred in granting long service leave to employees in the coal mining industry.

(c) *Encouragement of Meat Production.* To develop meat production in Queensland and Western Australia, grants are made to these States for the provision and improvement of roads and other facilities for the movement of live-stock. Provision is made for the Commonwealth to meet the cost of the construction and improvement of certain specified roads in both States and the construction of eight cattle loading and unloading points in Queensland. Provision is also made for the Commonwealth to meet half the cost of improving watering facilities on specified stock routes in both States. The amount of the grants for improving watering facilities on stock routes is limited to £150,000 in Queensland and £50,000 in Western Australia.

(d) *Grants to Universities.* Payments to the States for universities were first introduced in 1951–52 under the *States Grants (Universities) Act 1951*, and were continued under similar legislation passed in 1953, 1955, 1956 and 1957. Following on the Government's acceptance of the main recommendations of the Committee on Australian Universities, the provisions of the 1957 Act relating to financial assistance for 1958 were superseded by the *States Grants (Universities) Act 1958*, which operated from 1st January, 1958.

This legislation authorized the Commonwealth to make payments to the States for universities of up to £21,400,000 over the three calendar years 1958 to 1960, inclusive, where certain conditions have been satisfied. These payments include increased contributions towards the running expenses of universities, new grants for capital works and equipment and new emergency grants.

Under the *States Grants (Universities) Act 1960*, which carried on the principle of grants for capital works and equipment introduced in the 1958 legislation, payments of up to £42,000,000 over the three calendar years 1961, 1962 and 1963 are to be made to the States. (See also Chapter XVIII. Education, Cultural Activities, and Research, pp. 748–51.)

(e) *Cattle Tick Control.* Since 1926–27, the Commonwealth has subsidized the cost of eradication and control of cattle tick in New South Wales. From 1950–51, the subsidy was increased on a £1 for £1 basis up to an agreed maximum. The payments are charged to the departmental expenditure of the Department of Health.

(f) *Western Australia Northern Development.* The Commonwealth provides financial assistance of up to £5,000,000 to the State of Western Australia under the *Western Australia Grant (Northern Development) Act 1958–59* in respect of developmental expenditure by the State in the area of Western Australia north of the twentieth parallel of latitude during the period of five years commencing on 1st July, 1958. Under the scheme, Commonwealth assistance is provided in respect of projects, nominated by the State, which the Commonwealth is satisfied will contribute to the development of the area and which could not reasonably be expected to be carried out during the period of five years without the grant of Commonwealth assistance.

Payments to the State during 1961–62 amounted to £1,705,000, bringing total payments by the Commonwealth in respect of the scheme to £3,568,000.

(g) *Dairy Industry Extension Grant.* The Commonwealth provides financial assistance, with a maximum annual limit of £250,000, to promote improved farm practices in the dairy industry. The grants are charged to the departmental expenditure of the Department of Primary Industry.

(h) *Expansion of Agricultural Advisory Services.* These payments were introduced in 1952–53 to encourage expansion of agricultural advisory services by the State Departments of Agriculture and to promote increased farm efficiency. The payments are charged to the departmental expenditure of the Department of Primary Industry.

(i) *Grants for Railway Projects.* Under the *Railway Standardization (South Australia) Agreement Act 1949*, the Commonwealth is providing funds for the conversion of lines in the south-eastern division of the State as an initial step towards eventual standardization of 4' 8½" gauge. The State is to repay three-tenths of the cost of this work over a period of 50 years and is to bear the full cost of subsequent conversion from broad to standard gauge.

Under the *Railway Standardization (New South Wales and Victoria) Agreement Act* 1958 the Commonwealth provided funds for the construction of the standard gauge rail link between Albury and Melbourne on the basis that the States of Victoria and New South Wales will each bear 15 per cent. of the cost by instalments over a period of 50 years.

The total expenditure on railway standardization (the 30 per cent. advances to the States and the 70 per cent. grants to the States) is charged to the capital works and services vote of the Department of Shipping and Transport.

(j) *Cattle Roads Grants.* The *Queensland Grant (Beef Cattle Roads) Act* 1961 provides for a grant of £5,000,000 to be paid to Queensland over the five-year period commencing 1st July, 1961, for expenditure on approved roads for the transport of beef cattle. In 1961-62, an amount of £650,000 was paid to the State.

Under the *Western Australia Grant (Beef Cattle Roads) Act* 1961, a special grant of £500,000 was made to Western Australia in 1961-62 for certain work on roads and bridges in the north of the State.

(k) *Coal Loading Works—New South Wales.* Under the *Coal Loading Works Agreement (New South Wales) Act* 1961, the Commonwealth is providing financial assistance to New South Wales of up to £2,650,000, partly by way of repayable advances from the Consolidated Revenue Fund and partly by grants from the Coal Industry Fund of the Joint Coal Board, for improvements to coal loading facilities at Newcastle, Port Kembla and Balmain. In 1961-62, repayable advances amounted to £284,000 and grants to £172,000.

(l) *Natural Disaster Payments.* Special Commonwealth payments are provided to assist State schemes for the relief of personal hardship and distress caused by serious floods, cyclones or bush fires in the States and for restoration of damaged public assets such as roads and bridges.

11. **Primary Production Research and Sales Promotion, Export Funds, etc.**—Expenditure under this item includes the proceeds of special industry taxes and profits from marketing schemes which are paid to trust funds or other authorities for the purposes of the industries concerned. Information relating to the taxes levied is given in sub-section Revenue, of this section (see pp. 920-2). Details of expenditure from the trust funds are included in § 4, Commonwealth Trust Funds. Details of expenditure from the Consolidated Revenue Fund during the last five years are given in the following table.

**PRIMARY PRODUCTION—RESEARCH AND SALES PROMOTION, EXPORT FUNDS, ETC.: EXPENDITURE FROM COMMONWEALTH CONSOLIDATED REVENUE FUND**

## § 5. Commonwealth Loan Fund

Brief historical notes relating to the Commonwealth Loan Fund are given in earlier issues of the Official Year Book (see No. 37, p. 640). In the following table, details are given of the net expenditure from the Commonwealth Loan Fund for the years 1957-58 to 1961-62 and of the aggregate expenditure to 30th June, 1962. The figures shown relate to disbursements for Commonwealth purposes only and represent "net" loan expenditure, i.e., after adjustments have been made for refunds of amounts expended in earlier years.

(a) Financial assistance to the States in connexion with war service land settlement. (b) Excludes amounts charged to War Loan Fund. (c) Includes administration and other public buildings, Australian Capital Territory. (d) Payment to National Debt Sinking Fund. (e) Payment to Swiss Loan Trust Account. (f) Payment to Canadian Loan Trust Account.

NOTE.—Minus sign (—) indicates excess of repayments to Loan Fund.

Information relating to the Commonwealth Government securities on issue is given in the Division, Government Securities on Issue, Commonwealth and States, of this chapter.

## STATE FINANCE

## § 1. General

1. **Functions of State Governments.**—In comparing the financial returns of the States, allowances must be made for the various functions discharged by the respective governments, and for local conditions in each case. Direct comparisons of the revenue, expenditure, and debt of the individual States are difficult, owing to the fact that functions which in

one State are assumed by the central government are in another delegated to local government or semi-governmental bodies which are vested with certain defined borrowing powers and whose financial transactions are not included with those of the central government. Care is needed, therefore, in making comparisons, and the particulars contained in this chapter should be read with those contained in Chapter XIX. Local Government. In many respects, moreover, the budgets of the Australian governments differ materially from those of most European countries, owing to the inclusion therein of the revenue and expenditure of departments concerned with rendering public services, such as railways, tramways, water supply, etc., which in other countries are often left to private enterprise.

**2. Accounts of State Governments.**—The various financial transactions of the States are in each case mainly concerned with one or other of three funds—the Consolidated Revenue Fund, the Trust Fund, and the Loan Fund. All revenue (except certain items paid into special funds) collected by a State is paid into its Consolidated Revenue Fund, from which payments are made under authority of an annual *Appropriation Act* passed by the legislature, or by a permanent appropriation under a special Act.

Figures in § 2 below relating to New South Wales represent the transactions of the Consolidated Revenue Fund and the business undertakings included in the annual budget papers. These undertakings are:—railways, tramways and omnibuses, and Sydney Harbour Trust Section of the Maritime Services Board. Adjustments have been made to the Budget figures, however, in order to eliminate duplications caused by inter-fund payments. Particulars for all other States relate to the transactions of the Consolidated Revenue Fund.

The Trust Fund comprises all moneys held in trust by the government, and includes such items as superannuation funds, road funds, insurance companies' deposits, etc.

The Loan Fund is debited with all loan moneys raised by the State, and credited with the expenditure therefrom on public works or other purposes.

**3. Inter-relation of Commonwealth and State Finances.**—A statement in some detail, covering the inter-relation of Commonwealth and State finances during the period from the inception of federation to the passing of the *Financial Agreement Act* 1928, was published in Official Year Book No. 22, pages 379–380. Changes in the financial relations between the Commonwealth and States since the passing of the *Financial Agreement Act* have been described in issues of the Official Year Book from year to year (*see also* pp. 955–6).

## § 2. State Consolidated Revenue Funds

### REVENUE

**1. General.**—The principal sources of State revenue are:—(a) taxation; (b) the business undertakings controlled by the State governments; (c) sale of and rental from crown lands; (d) interest on advances; (e) payments by the Commonwealth Government under the Financial Agreements, Special Grants and Financial Assistance Acts, etc.; (f) Commonwealth National Welfare Fund payments; and (g) miscellaneous sources, comprising fines, fees, etc.

Of these sources, that yielding the largest revenue to the Consolidated Revenue Funds for the States as a whole in the year 1961–62 was Commonwealth payments under financial assistance and other grants (40.2 per cent. of the total revenue). Next in magnitude was the group of business undertakings (30.1 per cent.), the principal contributors being the government railways and tramways, followed by taxation receipts (16.1 per cent.). More than one-quarter of the total State taxation collections are not paid into Consolidated Revenue Funds, however, but into special funds (*see para. 3 (ii) (b) following*). Of the remaining sources of revenue, interest (n.e.i.) constituted 3.8 per cent., land revenue 2.0 per cent., and National Welfare Fund payments 1.4 per cent.

**2. Revenue Received.**—The following table shows particulars of the total amounts, and the amounts per head of population, of Consolidated Revenue received by the several States during the years 1957–58 to 1961–62.

## STATE CONSOLIDATED REVENUE

Year	N.S.W.(a)	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Total

Total .. ..	74 17 5	66 6 9	76 16 9	90 18 3	100 9 3	87 14 7	76 10 0

(a) See § 1, para. 2, p. 941.

(b) Tasmanian transport services are under separate control of the Transport Commission.

(c) In all States, certain taxation collections are not paid into Consolidated Revenue Fund. For total collections see next page.

(d) Excludes Commonwealth payments paid to trust funds.

(e) Includes payments under Financial Agreement, special grants, financial assistance, grants to universities, etc.

(f) Consolidated Revenue Fund receipts only. Excludes payments to Trust Funds.

(ii) *Revenue from Taxation.* (a) *General.* In the tables on taxation collections in these paragraphs, the collections have been grouped according to the nature of the tax rather than the method of collection. For example, stamp duties on betting tickets and bookmakers' licences have been included under Racing instead of under Stamp duties and Licences respectively.

Prior to federation, customs and excise duties were the principal source of revenue from taxation. Thereafter, until the introduction of the uniform income tax scheme in 1942-43, the most productive State taxes were the various income taxes which, in 1941-42, included unemployment relief, State development and hospital taxes. From 1942-43 to 1958-59, the States were reimbursed by the Commonwealth for the revenue lost by the discontinuance of these taxes. Commencing with 1959-60, however, a new scheme for the payment of financial assistance to the States was instituted (for details see para. 10 (v), p. 933). Information relating to the State income taxes which were levied prior to 1942-43 may be found in earlier issues of the Official Year Book.

(b) *Net Collections, 1961-62.* The following tables show, for the year 1961-62, details of the collections in each State from the various types of tax in operation, irrespective of whether such moneys have been paid into the Consolidated Revenue Funds or not. For this reason, the particulars hereunder differ from those shown in the tables relating to the Consolidated Revenue Funds and present a comprehensive statement of all taxation collections by the government in each State.

(iii) *Business Undertakings.* (a) 1961-62. A very large proportion of State gross revenue is made up of receipts from business undertakings under the control of the governments. The most important of these are railways and tramways, harbour works, water supply and sewerage, and electricity supply, and, in addition, State batteries for the treatment of auriferous ores in Western Australia and various minor revenue-producing services rendered by the governments of all States are included. For the year 1961-62, the revenue from these sources was £242,436,000 or 30.1 per cent. of the revenue from all sources. Details of revenue are as follows.

## STATE REVENUE FROM BUSINESS UNDERTAKINGS, 1961-62

For further information on the finances of the various types of business undertakings in the States, see Chapters XIV. Transport and Communication and XIX. Local Government of this Year Book.

(iv) *Lands.* The revenue from the sale and rental of Crown lands has, with few exceptions, been treated from the earliest times as forming part of the Consolidated Revenue Funds, and has been applied to meet ordinary expenses. The following table shows the revenue from sales and rentals of Crown lands for the year 1961-62.

### STATE LAND REVENUE, 1961-62 (£'000)

Source	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Total
Sales ..	666	265	..	155	58	14	1,158
Conditional purchases ..	207	..	..	10	136	..	353
Rentals(a) ..	3,402	671	3,636	237	320	47	8,313

Other ..	92	138	280	379	46	11	946
<b>Total ..</b>	<b>5,623</b>	<b>3,269</b>	<b>3,916</b>	<b>781</b>	<b>1,642</b>	<b>554</b>	<b>15,785</b>

(a) Includes mining royalties, rents, etc.

The total land revenue for all States for the years 1957-58 to 1961-62 respectively was:—£15,050,000, £12,890,000, £14,324,000, £15,269,000 and £15,785,000.

(v) *Commonwealth Grants.* Commonwealth grants to the States represent a considerable proportion of the States' revenue. In 1961-62, the total amount (excluding sundry minor items) paid to the Consolidated Revenue Funds of the States was £323,086,000 (40.2 per cent.). Details were as follows:—contribution towards interest on States' debts under the Financial Agreement, £7,585,000; special grants to the States of Western Australia and Tasmania, £11,231,000; financial assistance, £292,140,000; additional assistance, £9,340,000; grants to universities, £2,370,000; and other grants, £420,000.

In addition to these, the States receive a number of other grants which are paid to trust funds. The main items in this class are the contribution to the sinking fund on States' debts (£6,739,000 in 1961-62) paid to the National Debt Sinking Fund, grants for Commonwealth Aid Roads (£50,000,000 in 1961-62), and grants for universities (£11,791,000 in 1961-62) paid to State trust funds.

More detailed information concerning Commonwealth grants to the States is given on pages 930-6.

(vi) *Commonwealth National Welfare Fund Payments.* The States also receive payments from the Commonwealth in respect of hospital and pharmaceutical benefits, nutrition of children and reimbursement of maintenance expenditure on tuberculosis sanatoria. These receipts are paid into Consolidated Revenue Funds or trust funds according to the varying accounting procedures in the States. In 1961-62, the total amount paid to State Consolidated Revenue Funds was £11,658,000 (1.4 per cent.). This amount was made up of hospital benefits, £4,068,000; pharmaceutical benefits, £2,178,000; milk for school children, £1,330,000; tuberculosis—reimbursement of maintenance expenditure, £4,035,000; other, £47,000.

(vii) *Interest and Miscellaneous.* In addition to the foregoing, there are in each State several miscellaneous sources of revenue, including such items as interest, fines, fees, etc. Interest, mainly from loans to local governing bodies, on public account balances, and for soldier land settlement amounted to £30,423,000 in 1961-62, while miscellaneous revenue, which includes fines of the courts and fees for services, amounted to £51,989,000 in 1961-62.

## EXPENDITURE

1. *General.*—The principal heads of State expenditure from Consolidated Revenue Funds are:—(a) interest, exchange and debt redemption charges in connexion with debt; (b) working expenses of business undertakings; (c) education; (d) health and charitable expenditure; (e) justice; (f) police; (g) penal establishments; and (h) all other expenditure, under which heading are included public works, lands and surveys, agriculture and forestry, legislative and general administration, pensions, and miscellaneous.

The working expenses of railways and tramways are the largest item of State government expenditure. In 1961-62, the working expenses of the railways, tramways and omnibuses were 24.8 per cent. of the total expenditure from the State Consolidated Revenue Funds; next in magnitude were education, 20.3 per cent.; debt charges, 17.0 per cent.; charitable, public health and hospitals, 14.1 per cent.; and law, order and public safety, 5.9 per cent.

As stated at the beginning of this division, figures relating to New South Wales represent the transactions of the Consolidated Revenue Fund and the business undertakings included in the annual budget papers. These undertakings are:—railways, tramways and omnibuses, and Sydney Harbour Trust Section of the Maritime Services Board. Adjustments have been made to the Budget figures, however, in order to eliminate duplications caused by inter-fund payments. Particulars for all other States relate to the transactions of the Consolidated Revenue Fund.

2. *Total Expenditure.*—The total expenditure from the Consolidated Revenue Funds of the several States and the expenditure per head of population during each of the years 1957-58 to 1961-62 are shown in the following table.

(a) See para. 1, p. 947.

NOTE.—Minus sign (—) indicates deficit.

## § 3. State Trust Funds

In addition to the moneys received as revenue and paid to the credit of the Consolidated Revenue Funds, considerable sums are held in trust for various purposes by the State governments. The balances of trust funds held at 30th June for each of the years 1958 to 1962 were as follows.

## STATE TRUST FUND BALANCES

(£'000)

At 30th June—	N.S.W.(a)	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Total
1958 .. ..	51,776	34,415	53,921	5,650	14,565	1,560	161,887

(a) Special Deposits Account and Special Accounts.

## § 4. State Loan Funds

1. *General.*—State public borrowing is due mainly to the fact that the State governments, in addition to ordinary administrative duties, undertake functions such as the construction and operation of the railway systems, which in other countries are usually entrusted to local authorities or left to private enterprise. Loan moneys have also been largely used for improvements to harbours and rivers, and for the construction of roads, water supply and sewerage works. The State debt thus consists chiefly of moneys raised and expended with the object of assisting the development of the resources of the country, and is to a very large extent represented by tangible assets.

Statements relating to "gross" loan expenditure are shown below. The gross expenditure represents the amounts disbursed during each year. Details of "net" loan expenditure, i.e., gross expenditure less any credits to the Loan Fund during the year on account of repayments of advances to local governing bodies, settlers, etc., the sale of assets, and transfers from other funds, may be found in the bulletin *Finance, Part I.—Public and Private Finance*. Such moneys are credited to the Loan Fund in the year of repayment irrespective of when the advance was made.

2. *Gross Loan Expenditure.*—(i) 1961–62. Particulars of gross loan expenditure on works, services, etc., are shown in the following table.

STATE GROSS LOAN EXPENDITURE ON WORKS, SERVICES, ETC., 1961–62

(a) Expenditure from loan funds and on account of loans; includes expenditure from loan funds, from Treasurer's Advance Account and from State Loans Repayment Fund. (b) Excludes expenditure from Commonwealth loans under Commonwealth-State Housing Agreement. (c) Included in item Advances to settlers. (d) Includes Rural Finance Corporation, for advances to rural industries, £661,000.

NOTE.—The negative amounts shown for Queensland represent transfers of liability on account of expenditure incurred in earlier years. The amounts involved have been debited against the item Loans and grants to local bodies, and included in the expenditure shown for 1961–62.

(ii) 1957-58 to 1961-62. Particulars of gross loan expenditure on works, etc., for these years are shown in the following table.

### STATE GROSS LOAN EXPENDITURE ON WORKS, SERVICES, ETC.

(a) Includes exchange, discounts and flotation expenses, revenue and general cash deficits.

(b) From Consolidated Revenue Fund.

NOTE.—Minus sign (—) indicates excess of repayments to loan fund.

Information relating to the government securities on issue on behalf of the States is given in the division on Government Securities on Issue: Commonwealth and States (*see p. 957*).

## COMMONWEALTH AND STATE FINANCE

1. *Revenue and Expenditure.*—(i) *Consolidated Revenue Funds.* The following table shows the aggregate revenue and expenditure of the Consolidated Revenue Funds of the Commonwealth and States for each of the years 1957-58 to 1961-62. In the table, the combined Commonwealth and State totals have been adjusted to exclude major duplications, but the separate Commonwealth and State figures are as shown in other divisions of this chapter. The items excluded from the total figures are:—payments made by the Commonwealth to the States and included in the State Consolidated Revenue Funds on account of tax reimbursements up to 1958-59, and financial assistance grants in 1959-60 to 1961-62, interest under the Financial Agreement, special grants, special financial assistance, coal strike emergency grants, price control reimbursements, grants to universities, cattle tick control, *Tuberculosis Act* capital expenditure, National Welfare Fund payments, and estimated payments of pay-roll tax by the States to the Commonwealth. There are other relatively minor payments for which adjustments have not been made, and the adjusted figures are therefore still slightly overstated.

## COMMONWEALTH AND STATES: REVENUE AND EXPENDITURE

Year ended 30th June—	Revenue			Expenditure		
	Common- wealth	States	Total	Common- wealth	States	Total
	£'000.	£'000.	£m.	£'000.	£'000.	£m.

**GOVERNMENT SECURITIES ON ISSUE: COMMONWEALTH AND STATES**

**NOTE.**—For the following reasons, Government Securities on Issue, as set out in the tables in this division, may not be aggregated without adjustment to indicate what is sometimes described as the “public debt” or “net public debt” of the Commonwealth and State governments.

There are forms of debt not evidenced by the issue of securities. Again, some of the securities included in the tables are held by the governments themselves. For example, a State government may hold temporarily, or even for long periods, securities issued by the Commonwealth government. The Commonwealth government itself, through such institutions as the National Debt Commission, or through the Trust Funds, holds large investments in securities issued, either directly by itself or on behalf of the States. In addition, some of the securities issued on behalf of the States and held by the Commonwealth government represent the proceeds of overseas loans, securities for which were issued directly by the Commonwealth government. From the point of view of the aggregate net debt of the Commonwealth and the States, it would thus involve duplication if the sum of the securities on issue were to be regarded as representing the “net public debt”.

**§ 1. General**

Under the Financial Agreement between the Commonwealth and the States in 1927, the Commonwealth government accepted responsibility for the securities of the State governments then on issue, and was empowered to arrange for all future borrowings on behalf of the Commonwealth and the States and to issue Commonwealth securities for all money borrowed. The Commonwealth is reimbursed by the States for interest, exchange, etc., paid on their behalf, and the securities are redeemed from the National Debt Sinking Fund to which both the Commonwealth and State governments make contributions.

In the statistical tables relating to government securities, details of securities on issue, annual interest liability and average rate of interest liability, except in § 3, paras. 3 and 4, are shown in the currencies in which they are repayable or payable respectively. Australian currency equivalents for overseas loans have been calculated using the rates of exchange ruling at 30th June in each year shown. Rates of exchange to £A. at 30th June, 1962, were as follows:—£Sterling, 0.8000; United States dollars, 2.2400; Canadian dollars, 2.4216; Swiss francs, 9.7955; Netherlands guilders, 8.1088; German Deutsche marks, 8.9600.

**§ 2. The Financial Agreement between the Commonwealth and the States**

1. **General.**—Full details of the Financial Agreement between the Commonwealth and the States are given in earlier issues of the Official Year Book (*see* No. 37, pp. 685–90). In this issue, a summary of the main provisions only is given.

2. **Australian Loan Council.**—The Australian Loan Council was set up to co-ordinate the borrowings of the Commonwealth and the States. It consists of the Prime Minister of the Commonwealth, or another Minister nominated by him in writing, as Chairman, and the State Premiers, or Ministers nominated by them in writing. Each year, the Loan Council examines the loan programmes of the Commonwealth and the States and determines the total amount to be borrowed during the year. Borrowings by the Commonwealth for defence purposes are not subject to decisions of the Loan Council.

3. **Loan Raisings for the Commonwealth and States.**—Subject to the decisions of the Loan Council, the Commonwealth arranges for all borrowings for or on behalf of the Commonwealth or any State, and for all conversions, renewals, redemptions, and consolidations of the securities issued on behalf of the Commonwealth and of the States.

If the Loan Council unanimously decides, however, a State may borrow outside Australia in its own name, and may issue securities for the amount so borrowed. The Commonwealth then guarantees that the State will fulfil all its obligations to bond-holders in respect of the money so borrowed, and the money is deemed to be borrowed by the Commonwealth for and on behalf of the State.

Subject to any maximum limits decided upon by the Loan Council for interest, brokerage, discount and other charges, the Commonwealth or any State may borrow within its own territory, for any purpose, money from any authorities, bodies, funds or institutions (including savings banks) constituted or established under Commonwealth or State law or practice; borrow from the public by means of counter sales of securities; and use any available public moneys.

However, any securities issued for money so borrowed or used must be Commonwealth securities on terms approved by the Loan Council.

4. **Taking over of State Government Securities.**—The Commonwealth took over on 1st July, 1929, securities issued by each State existing on 30th June, 1927; and all other

securities of each State existing on 1st July, 1929, for money borrowed by that State deemed by the Agreement to be money borrowed by the Commonwealth for and on behalf of the State; and in respect of these securities assumed, as between the Commonwealth and the States, the liabilities of the States to bond-holders.

5. **Transferred Properties.**—In relation to State properties transferred to the Commonwealth under Section 85 of the Constitution, the States, as from 1st July, 1929, were discharged from any liability in respect of principal, interest or redemption on so much of the securities bearing interest at 5 per cent. per annum taken over by the Commonwealth as amounted to the agreed value of these properties, namely £10,924,323.

6. **Payment of Interest.**—For a period of 58 years from 1st July, 1927, the Commonwealth agreed to contribute the sum of £7,584,912 each year towards the interest payable on the State securities. The balance of the interest payable on the State securities is paid to the Commonwealth by the States.

7. **Sinking Fund.**—(i) *State Securities existing at 30th June, 1927.* A sinking fund at the rate of 7s. 6d. per annum for each £100 of the securities of the States existing on 30th June, 1927, and conversions thereof, was established under the terms of the Agreement. The Commonwealth contributes annually from revenue 2s. 6d. per £100 on the securities of the States existing at 30th June, 1927, and each State contributes annually 5s. per £100 on its securities at 30th June, 1927. The payments of the Commonwealth and of all States except New South Wales will continue for a period of 58 years from 1st July, 1927, and those of New South Wales for a similar period from 1st July, 1928.

(ii) *New Borrowings.* On new borrowings after 1st July, 1927 (except those for redemptions or conversions, or funding a State deficit), a sinking fund at the rate of 10s. per £100 per annum was established, and the State and the Commonwealth contribute from revenue equal shares for a period of 53 years from the date of raising. (New South Wales did not commence sinking fund contributions in respect of new loans raised in the financial year 1927–28 until 1st July, 1928.)

(iii) *Loans raised to meet a Revenue Deficit.* In respect of any loan (except any of the loans referred to in sub-para. (iv) below) raised by a State after 30th June, 1927, to meet a revenue deficit accruing after that date, no sinking fund contribution is made by the Commonwealth, but the State makes a sinking fund contribution at the rate of not less than 4 per cent. per annum of the loan for a period sufficient to provide for the redemption of the loan, the contributions being deemed to accumulate at the rate of 4½ per cent. per annum compound interest.

(iv) *Loans raised to meet Revenue Deficits between 30th June, 1927, and 1st July, 1935.* Special contributions are payable in respect of loans raised by a State or by the Commonwealth on behalf of a State, on the security of Commonwealth Treasury Bills, to meet a revenue deficit which accrued after 30th June, 1927, and before 1st July, 1935. Details of these contributions are given in Official Year Book No. 37, pages 688–9.

(v) *National Debt Commission.* The sinking funds established are controlled by the National Debt Commission, which may arrange with any State to act as its agent in connexion with payments due to bond-holders. Except where the conditions relating to sinking funds, redemption funds, and funds of a like nature held by a State on 30th June, 1929, precluded such transfer, all such funds were transferred to the National Debt Commission.

(vi) *Operation of Sinking Fund.* Sinking fund contributions made in respect of the securities of a State, and funds of that State transferred to the National Debt Commission, are not accumulated, but must be applied, whenever expedient, to the redemption and repurchase of loan securities. When such a loan security is repurchased or redeemed by the National Debt Commission, it is cancelled, and the State, in addition to sinking fund contributions otherwise payable, pays a further annual sinking fund contribution at the rate of 4½ per cent. on the face value of the cancelled security for the balance of the period during which the original contribution is payable in respect of that debt.

(vii) *Oversea Securities on Issue.* Sinking fund contributions in respect of overseas securities shall be calculated at the mint par of exchange prevailing on 1st July, 1927.

8. **Borrowing by Semi-Governmental Authorities.**—It was realized from the inception of the Loan Council that, in the interests of co-ordinated borrowing, the Council should be advised of the borrowing of large amounts by semi-governmental authorities. In May, 1936, all resolutions passed by the Loan Council in connexion with semi-governmental borrowings were consolidated into one set of rules, which superseded all previous resolutions. This set of rules provides, *inter alia*, for the submission of annual loan programmes in respect of semi-governmental authorities proposing to raise £100,000 or more in a year, for the consideration of such programmes in conjunction with the loan programme of the government concerned, and for the fixing of the terms of individual semi-governmental loans coming within the scope of the annual programme.

## § 3. Government Securities on Issue: Commonwealth and States

1. Government Securities on Issue, Annual Interest Payable and Average Rate of Interest, 30th June, 1962.—In the following tables, details are given of government securities on issue on account of the Commonwealth and States, annual interest payable and average rate of interest at 30th June, 1962.

7. **Short-term Securities on Issue.**—Particulars of the short-term securities (Treasury bills and seasonal securities) of the Commonwealth and States in Australia at intervals from 30th June, 1958, to 30th June, 1962, are shown in the following table. These securities are included in the government securities on issue as shown elsewhere. No short-term securities have been raised overseas since September, 1956, when all such securities held in London were expatriated to Australia.

30th June, 1962 .. ..	208,000	..	..	208,000

(a) Excludes overdrafts and internal Treasury bills.  
inscribed stock.

(b) Seasonal Treasury notes and seasonal

(c) Treasury bills.

The Treasury bill discount rate in Australia has remained at 1 per cent. since 29th July, 1952.

The 1961–62 issues of seasonal securities, which were readily cashable, transferable and interchangeable at any time, were redeemable at par on maturity at the end of three months, and all such securities were redeemed and cancelled before 30th June, 1962. Seasonal securities were issued in multiples of £1,000 over the minimum subscription of £5,000 at a price of £99 0s. 6d. per cent., and yielded a return of approximately 3.7 per cent. if held for three months. Such increases in value were taxable, but carried the right of rebate of two shillings in the pound as with Commonwealth loan interest.

8. **Government Securities on Issue on Account of the States; Local Government and Semi-governmental Authority Securities on Issue.**—In some States, certain public utilities, such as tramways, water supply and sewerage, harbour services, etc., are controlled by boards or trusts, which in addition to receiving advances from the central government, raise loans by borrowing on their own behalf, while in other States these services are controlled by the central government. Direct comparisons between States of the securities on issue on account of the several States should therefore be made with caution. The table following shows for 1956–57 to 1960–61 particulars of the securities on issue on account of the States, the securities on issue by local government and semi-governmental authorities, and the aggregates of these.

(a) Excludes amounts due to the central government. Includes bank overdrafts. (b) Oversea holdings have been converted to Australian currency at the rates of exchange current at 30th June of each year shown.

#### § 4. Commonwealth Loan Raisings

1. General.—Under the Financial Agreement between the Commonwealth and the States, the Commonwealth is responsible for raising all loan moneys required either by the Commonwealth or by the State Governments. Details of loan transactions given in this section relate, therefore, to all loans raised for the Commonwealth and the States.

2. New Loans Raised, 1959-60 to 1961-62.—(i) *Australia*. The following table shows details of new loans raised in Australia by the Commonwealth during the three years 1959-60 to 1961-62.

(a) Includes loans raised for redemption of Treasury Bills, but excludes conversion loans, loans for redemption of debt maturing in London, short-term debt and certain miscellaneous debt (see p. 971).  
 (b) Special issue. For details see following paragraph. (c) Special Bonds open for continuous subscription, redeemable at prices commencing at par and increasing to a premium of £3 per cent. if held until maturity in 1966-69. Interest increases from 4 per cent. to 5 per cent. over period of currency.

The loans of £55,000,000, £90,000,000 and £7,000,000 raised in June, 1960, 1961 and 1962, respectively, were for the purpose of fulfilling an undertaking given by the Commonwealth that the States would have access to loan funds for their works programmes up to the approved Loan Council borrowing programmes. These programmes totalled £220,000,000 in 1959-60, £230,000,000 in 1960-61 and £247,500,000 in 1961-62. Subscriptions to these special loans for the three years covered came from the Loan Consolidation and Investment Reserve Trust Account.

Finance for the approved Loan Council programmes from 1959-60 to 1961-62 was provided from the following sources.

**LOAN COUNCIL PROGRAMME: SOURCE OF FINANCE**  
(£'000)

Source	1959-60(a)	1960-61	1961-62
Public loans, domestic raisings, etc. . . . .	148,300	117,900	225,100
Oversea loans and special Commonwealth assistance	71,700	112,100	22,400
<b>Total . . . . .</b>	<b>220,000</b>	<b>230,000</b>	<b>247,500</b>

(a) Excludes amounts provided for emergency wheat storage, £6,937,000 and for rehabilitation of the Mount Isa-Townsville-Collinsville railway line, £20,000,000.

In addition to the new loans raised as shown in the foregoing tables and the redemption and conversion loans shown in the following paragraph, there were other miscellaneous loan operations during 1961-62, namely:—Savings Certificates and War Savings Certificates (Five and Seven Years' Series), a decrease of £3,456,000, and "over the counter sales" (small amounts borrowed by the States by virtue of certain statutory rights), £3,089,000. Advance loan subscriptions in hand increased from £781,000 at the end of 1960-61 to £2,156,000 at the end of 1961-62.

(ii) *London.* The only new loan raised in London during the three years ended 1961-62 was for £Stg.12,000,000, 5½ per cent. interest, price of issue £Stg.99 per £Stg.100, maturing 1980, raised during 1959-60.

(iii) *New York.* The following table gives details of the loans raised during the period 1958-59 to 1961-62.

**COMMONWEALTH NEW LOANS RAISED IN NEW YORK**

(a) Special Bonds.

NOTE.—Minus sign (—) indicates reduction in liability for interest.

(ii) *London.* The following table shows particulars of loans raised in London during the years 1958-59 and 1960-61 for the purpose of redeeming and converting London loans. None was raised during 1961-62.

## COMMONWEALTH LOANS RAISED FOR THE CONVERSION AND REDEMPTION OF LOANS MATURING IN LONDON

Month of raising	Old loan		New loan					Increase in annual liability for interest and exchange (a)
	Amount	Rate of interest per annum	Amount raised in—		Rate of interest per annum	Price of issue per £100	Year of maturity	
			Australia	London				
			£Stg. '000	Per cent.				
1958-59— March ..	20,675	3½	..	20,000	5½	99	{ 1973 1979	{ 470
1960-61— July ..	13,925	3	..	13,925	6	98	{ 1977-80 1975	{ 522
January ..	20,579	3½	..	20,000	6	97½	{ 1981-83	{ 664

(a) No account has been taken of the cost of issuing the conversion loans at a discount. Exchange calculated at £A.125 = £Stg.100.

(iii) *New York*. During 1946-47, four loans totalling \$128,000,000 were raised in New York to redeem loans which became due for redemption or which the Commonwealth had the option of redeeming. No further loans were raised in New York for this purpose until December, 1954. The loan raised in New York for this purpose in March, 1957, amounted to \$17,114,000, at 5 per cent. interest, issued at par, maturing in 1972. No loans were raised for the purpose of redeeming loans which became due for redemption or which the Commonwealth had the option of redeeming during 1958-59 and 1960-61. In 1961-62, a re-financing loan of \$30,000,000 was raised at 5½ per cent. interest, issued at par, maturing in 1982.

4. *International Bank for Reconstruction and Development Loans*.—To provide dollar funds for the purchase of certain types of capital equipment and plant which were indispensable to the furtherance of development in Australia and which could be obtained only in the United States of America or Canada, the Commonwealth Government arranged six loans from the International Bank for Reconstruction and Development between August, 1950, and December, 1956, amounting to \$317,730,000, repayable over periods of from 10 to 25 years, at rates of interest of from 4½ to 4¾ per cent. The proceeds of the latest of these loans were finally drawn in March, 1959.

The capital equipment and plant purchased from the proceeds of these loans are made available to Commonwealth and State Government departments and agencies and private firms and individuals for use in the development of Australian resources. The goods are imported and distributed through normal channels and payment made through the Australian banking system.

5. *Swiss Loans*.—To foster industrial development in Australia and to stimulate trade relations between the two countries, the Commonwealth Government arranged for the issue in Switzerland in November, 1953, February, 1955, March, 1960, and March, 1961, of four public loans each of 60,000,000 Swiss francs. The loans were underwritten by a Swiss banking group headed by the Swiss Bank Corporation, the Crédit Suisse and the Union Bank of Switzerland. Certain Swiss taxes connected with the issue and servicing of the loans were paid on an agreed basis by the Australian Government.

The first loan was for a period of 15 years with an option on the part of the Commonwealth Government to repay the loan in full or in part after 12 years. The rate of interest was 4 per cent. and the issue price £99. Bondholders have the option of requiring payment either in Australian pounds or in the foreign currency equivalent of Australian pounds.

The second loan was for a period of 15 years with an option to redeem after 10 years. The rate of interest was 3¾ per cent. and the issue price £99 10s. Bonds and interest are payable only in Swiss francs. The third loan was for a period of fifteen years with an option to redeem after 10 years. The rate of interest was 4½ per cent. and the issue price £99. The fourth loan was issued at par in March, 1961, at the rate of 4½ per cent. maturing in April, 1976. Payments of interest and repayments of principal are to be made only in Swiss francs.

The loans were fully subscribed, and Swiss franc proceeds, after deducting borrowing expenses, were sold by the Commonwealth Government to the Commonwealth Bank in return for an equivalent amount of Australian currency.

6. *Canadian Loans*.—In October, 1955, the Commonwealth Government arranged for the issue in Canada of a public loan of 15,000,000 Canadian dollars raised to assist Australia's development programme. The loan was for a period of 15 years with an option on the part of the Australian Government to repay the loan in full or in part at any time prior to 1st November, 1970. The rate of interest was 4 per cent., payable half-yearly, and the issue price \$98.50. A second loan, of 20,000,000 Canadian dollars, was raised in March, 1961, on the security of the Commonwealth of Australia, 5½ per cent. twenty-year Wonds being issued at the rate of \$98½ per cent. Bonds and interest are payable in Canadian dollars in each case.

The loans were fully subscribed, and the net Canadian dollar proceeds were sold to the Commonwealth Bank for Australian currency.

7. **Dutch Guilders Loan.**—In 1961, the Commonwealth arranged for a public flora on in the Netherlands of a loan of 40,000,000 Dutch guilders at par, with an interest rate of 5 per cent. per annum. The proceeds were used to assist the loan programmes of the Commonwealth and States.

The loan is to be repaid in fifteen annual instalments from 1967 to 1981, but, at the Commonwealth's option, an earlier redemption date may be negotiated on and after 15th December, 1971.

8. **Summary of Loan Transactions, 1957-58 to 1961-62.**—The following table contains a summary of loan transactions on behalf of the Commonwealth and State Governments during the five years 1957-58 to 1961-62.

#### COMMONWEALTH LOAN TRANSACTIONS: SUMMARY

## TAXES ON INCOME

1. **General.**—A description of the development of income taxes in Australia appeared in Official Year Book No. 35, page 926. Since July, 1942, the Commonwealth, under the uniform tax arrangement, has been the only authority imposing taxes on income. Taxes on income are assessed and imposed under the *Income Tax and Social Services Contribution Assessment Act 1936-1962* and the *Income Tax and Social Services Contribution Act 1962*. The latter Act is an annual measure and its primary purpose is to declare the rates of tax and contribution payable for the financial year. The rates for the financial year are levied, in the case of individuals, on the income of that year and, in the case of companies, on the income of the preceding year. Thus tax for the financial year 1962-63 is levied on the income of individuals in 1962-63 and on the income of companies in 1961-62.

2. **Present Taxes.**—For individuals, a single tax known as the Income Tax and Social Services Contribution is levied. All companies are liable for primary income tax and, in addition, private companies are subject to tax on undistributed income.

3. **Assessable Income.**—Income taxes in Australia are levied, primarily, on all income derived from Australian sources by any person, rather than on income derived from all sources by Australian residents. Thus a non-resident is taxed on income derived in Australia, while a resident is, in general, not taxed on income (other than dividends) derived from overseas, if the income is taxed in the country in which it is derived.

Certain types of Australian income are exempt from tax in Australia, the more important being (i) pensions, child endowment and other payments under the *Social Services Act* 1947–1962 and the *Tuberculosis Act* 1948, (ii) income from gold-mining and uranium mining, (iii) twenty per cent. of certain mining profits, (iv) dividends paid out of exempt mining profits, and (v) income received from a scholarship, bursary or other education allowance.

No amount is included in assessable income on account of a house occupied by its owner. Profits derived from the sale of property are not assessable income if such property was not purchased with a view to resale at a profit.

Expenses incurred in earning income, certain subscriptions to business associations, and trade union dues, are allowable deductions. Losses incurred in previous years may be carried forward as a deduction.

Because of uncongenial climatic conditions, isolation, and high cost of living, taxpayers living in certain areas are allowed an additional deduction. Two zones have been prescribed, and the allowances are:—Zone A, £270 plus an amount equal to one half of the total deductions allowable to the taxpayer for the maintenance of dependants; and Zone B, £45 plus an amount equal to one twelfth of the deductions allowable to the taxpayer for the maintenance of dependants. A deduction equal to the deduction allowed to residents of Zone A is also allowed to members of the defence forces serving for more than one half of the year of income at declared localities outside Australia. The boundaries of Zones A and B are as defined in the Second Schedule, *Income Tax and Social Services Assessment Act* 1936–1962.

Income Tax and Social Services Contribution is levied on the taxable income remaining after making these deductions and the concessional deductions to which reference is made in the following paragraph.

4. **Concessional Deductions.**—Concessional allowances for dependants, medical expenses, life insurance and superannuation contribution, etc., are made by way of a deduction from income. The maximum deduction allowed for each dependant, for a parent or parent-in-law, or for a housekeeper employed by the taxpayer, for the financial year 1962–63, is shown in the following table.

#### CONCESSIONAL DEDUCTIONS FOR DEPENDANTS, ETC.(a)

(£)

Dependant, etc. (resident)	Maximum deduction
Spouse .. .. .	143
Daughter-housekeeper (b) .. .. .	143
Housekeeper (b) having care of taxpayer's children under 16 years of age .. .. .	143
Parent or parent-in-law .. .. .	143
One child under 16 years of age .. .. .	91
Other children under 16 years of age .. .. .	65
Invalid relative (c) .. .. .	91
Child 16 to 21 years receiving full-time education (d) .. .. .	91

(a) These deductions are allowed only if the dependant, parent or parent-in-law is a resident of Australia. If the dependant is maintained for part only of the year, a partial deduction is allowed. (b) Of a widower or widow. (c) Child, step-child, brother or sister over 16 years of age. The amount of the deduction is reduced by any invalid pension received. (d) The amount of the deduction is reduced by the value of any assistance provided by the Commonwealth or a State.

When the dependant or person maintained derives separate income, the amount of the concessional deduction allowable is reduced as follows. In the case of a spouse or daughter housekeeper, by £2 for every £1 by which the separate net income exceeds £65; for each parent or parent-in-law maintained, by £1 for each £1 of separate income; and for each dependent child or invalid relative, by £2 for every £1 by which the separate net income exceeds £52.

For the 1962-63 financial year, medical expenses paid by a taxpayer who is a resident, in respect of himself or dependants, including children under 21 years of age, up to £150 for each person, are allowed as a concessional deduction. Medical expenses include payments made to a legally qualified medical practitioner, nurse or chemist, or to a hospital, in respect of an illness or operation, payments for dental services, payment for therapeutic treatment and eye tests, expenditure on medical or surgical appliances, artificial limbs or eyes, hearing aids and spectacles, and the remuneration of an attendant of a person who is blind or confined to bed or invalid chair.

Other concessional deductions allowed to resident taxpayers include (i) payments of life, etc., insurance premiums and contributions to superannuation funds and friendly societies, not exceeding an aggregate of £400, (ii) payments to medical or hospital benefits funds, (iii) funeral expenses of a dependant not exceeding £30 and (iv) expenditure incurred for the full-time education of children or dependants who are less than 21 years of age (maximum £100 per child or dependant).

In addition to concessional deductions, all taxpayers (resident and non-resident) are allowed a deduction from income of rates and taxes on land which are annually assessed, gifts to charitable, benevolent or patriotic funds and one-third of amounts paid as calls to certain mining, forestry and oil-prospecting companies. Resident taxpayers only are allowed a deduction from income of the full amount paid as calls and as application and allotment moneys to certain companies engaged in the search for oil in Australia and New Guinea.

**5. Effective Exemption from Tax.**—For the financial years 1950-51 to 1962-63, resident taxpayers without dependants were exempt from Income Tax and Social Services Contribution if their income did not exceed £104. The effect of the deductions for dependants was to exempt taxpayers up to the incomes shown hereunder.

#### RESIDENT TAXPAYERS: EFFECTIVE EXEMPTIONS FROM TAX

(£)

Taxpayer with—					Income Tax and Social Services Contribution— Financial years 1950-51 to 1952-53	Income Tax and Social Services Contribution— Financial years 1953-54 to 1956-57	Income Tax and Social Services Contribution— Financial years 1957-58 to 1962-63

„ „ three children	..	..	..	..	390	416	468
„ „ four children	..	..	..	..	442	468	533

For the 1962-63 financial year, an aged person (i.e., a man who has attained the age of 65 years or a woman who has attained the age of 60 years) is exempt from Income Tax and Social Services Contribution if his net income (i.e., gross income less expenses of earning that income) does not exceed £455. A married couple both of whom qualify by age for the concession are exempt from tax if their combined net incomes do not exceed £1,293.

**6. Rates of Income Tax and Social Services Contribution on Individuals.**—The following table shows the rates of income tax and social services contribution for the financial years 1953-54 to 1962-63.

16,000	upwards	9,157 5 10	168	8,417 18 4	160

(a) For the 1959-60, 1961-62 and 1962-63 financial years, provision was made for a rebate to reduce by 5 per cent. the income tax and social services contribution otherwise payable.

For primary producers, the rate of Income Tax and Social Services Contribution for the current year is determined by the average of the taxable incomes for the five years up to and including the current year. A taxpayer may elect not to have these averaging provisions applied to his assessment, but the election, once made, is irrevocable. The application of the averaging provisions is limited to that part of the taxable income which does not exceed £4,000, and when the taxable income exceeds £4,000, the balance is taxed at the ordinary rates applicable to that part. When the taxable income is less than £4,000, the rate of tax for averaging purposes is limited to the rate on a taxable income of £4,000.

Commencing with 1953-54, the taxable income, including any abnormal receipts, of actors, artists, composers and inventors, is taxed at the rate appropriate to the normal taxable income plus one-third of the abnormal receipts.

Interest on Commonwealth loans issued prior to 1st January, 1940, is subject to the condition that it shall not be taxed at rates higher than those for 1930-31. Interest on Commonwealth loans issued after 1st January, 1940, and interest on certain State semi-governmental loans issued free of State income tax are subject to a rebate of 2s. for each £1 included in the taxable income.

The minimum amount of Income Tax and Social Services Contribution payable is 10s. and the amounts payable and rebates are calculated to the nearest shilling.

7. *The Income Tax (International Agreements) Act 1953.*—This Act provided for relief from double taxation of incomes flowing between Australia and the United States of America. It also provided similar relief in respect of the United Kingdom, which had been covered by the *Income Tax Assessment Act* since 1947.

8. *Taxes on Specified Incomes.*—The following table shows the Income Tax and Social Services Contribution payable by taxpayers, with various incomes and numbers of dependants, on income derived in each year from 1954-55 to 1962-63.

(a) Provision was made for a rebate to reduce by 5 per cent. the amount of income tax and social services contribution otherwise payable.

**9. Pay-as-you-earn.**—(i) *Salary and Wage Earners.* Salary and wage earners are subject to instalment deductions for payment of tax at current rates out of weekly (or fortnightly) earnings. Employers are required to deduct tax and contribution from each payment of wages or salary to an employee at the appropriate rate, in accordance with a prescribed instalment scale. This scale shows the amount to be deducted according to the income and number of dependants of the employee.

Under the group scheme of deduction, which covers most employers of more than ten persons, the amount deducted is remitted to the Taxation Department, and after 30th June each year each employee is given a group certificate by his employer showing the amount of deductions made during the year. This certificate is forwarded to the Taxation Department with the employee's return of income for the year. If the tax assessed on the basis of this return is less than the amount shown on the group certificate, a refund is forwarded to the employee with his assessment. If the tax assessed is greater than the amount shown on the group certificate, the employee is required to pay the balance.

Under the stamp scheme used by small employers, a stamp deduction sheet in two parts is used. Each four weeks, the employer purchases stamps (also in two parts) for the amount of the deductions made each pay day and sticks one part on each half of the sheet. At the end of the year, the employer gives the employee one half of the sheet and sends the other half to the Taxation Department. The employee's half is then used in the same way as a group certificate.

(ii) *Taxpayers with Income other than Salary and Wages.* These taxpayers pay provisional tax in respect of income other than salary and wages. Collection of tax and contribution for the current year are made at the same time as collection and assessment for the previous year are adjusted. The notice of assessment shows an amount of provisional tax and contribution for the current year. This provisional amount is an approximation to the tax and contribution which will be payable after the return of income for the current year has been lodged. It is ascertained by assuming that the income of the current year will be the same as that for the previous year (for which a return has already been lodged), but the rates for the current year are applied to the income and not the rates for the year in which it was derived. The assessment notice shows the provisional tax and contribution paid in the previous year as a credit against the tax and contribution assessed on the basis of the return for that year. On receipt of his assessment, the taxpayer may elect to substitute his own estimate of income for the current year and pay tax on the basis of this estimate. To protect the revenue, a penalty is imposed if the taxpayer elects to pay provisional tax on an estimate of income more than 20 per cent. lower than the income of the previous year and he underestimates his income by more than 20 per cent.

An employee with income of £100 or more from sources other than salaries or wages is required to pay provisional tax in respect of that income.

**10. Lodgment of Returns and Assessment of Tax.**—All persons with assessable income in excess of £104 are required to lodge returns by 31st July each year (31st August for business incomes). The Income Tax and Social Services Contribution payable is assessed, and assessment notices showing the amounts payable are issued during the year following the year of income (in most cases from September to June following the lodgment of the return). The approximate amount payable, however, has already been collected during the income year—from employees by deductions from wages and from non-employees by a provisional tax. The amount shown on the assessment notice is therefore adjusted against the amount already paid and any difference either collected or refunded.

**11. Company Income Taxes.**—(i) *General.* For taxation purposes, companies are divided into two main groups—public and private. A private company is defined as a company in which all the issued shares are held by not more than twenty persons or which is capable of being controlled by not more than seven persons, and which is not a company in which the public is substantially interested or a subsidiary of a public company. All other companies are regarded as public companies. Both public and private companies pay primary Income Tax and Social Services Contribution assessed on a taxable income ascertained on the same principles as for individuals.

Dividends received are assessable income, but resident companies receive a rebate at the average rate on the amount of dividends included in the taxable income. This rebate is not allowed to non-resident companies.

(ii) *Rates of Tax.* The rates of Primary Tax, in the case of public companies, and Primary and Additional Tax for private companies, for the financial years 1956-57 to 1962-63 are shown in the table below.

Super Tax and Undistributed Income Tax ceased to be levied on public companies in the 1951-52 financial year and Additional Income Tax and Social Services Contribution ceased in the 1953-54 financial year. For details, see Official Year Book No. 39, page 846 and No. 40, page 743.

# RATES OF TAX: COMPANIES, 1956-57 TO 1962-63 FINANCIAL YEARS

(Pence per £)

Other(b) .. .. .	72	96	66	90	72	96	..
Life insurance—							
Mutual .. .. .	60	84	54	78	60	84	..
Other—							
(1) Mutual income .. .. .	60	84	54	78	60	84	..
(2) Other income(c) .. .. .	(d) 84	96	(d) 78	90	(d) 84	96	..
Other .. .. .	(d) 84	96	(d) 78	90	(d) 84	96	..
Interest paid to a non-resident(e) .. .. .	96	96	90	90	96	96	..

(a) Incomes not exceeding £104 are exempt from tax. (b) Where the taxable income does not exceed £228 (1956-57) or £231 (1957-58 to 1959-60) or £260 (1960-61 to 1962-63) the tax may not exceed eleven-twentieths (1956-57) or one-half (1957-58 to 1962-63) of the amount by which the taxable income exceeds £104. (c) The rate of 84d. (1956-57, 1960-61 to 1962-63) or 78d. (1957-58 to 1959-60) is levied on the amount of £5,000 less the mutual income. (d) For non-resident companies dividends included in this part of taxable income are taxed at 72d. (1956-57, 1960-61 to 1962-63) and 66d. per £1 (1957-58 to 1959-60). (A resident company is allowed a rebate of tax in respect of dividends received.) (e) If the non-resident is not a company, tax is paid only on income in excess of £104.

A private company incurs liability for additional tax on its undistributed income if it fails to make a sufficient distribution of income within a specified period after the close of the year of income. The tax is levied on the undistributed amount which, for practical purposes, is the taxable income less—(a) primary income tax and social services contribution payable; (b) retention allowance (i.e., the proportion of the reduced distributable income which a company may retain without incurring liability for undistributed income tax); and (c) certain dividends paid by the company.

For the financial years 1953-54 to 1958-59, the retention allowance was the following proportion of the reduced distributable income:—on the first £1,000 or part, 50 per cent.; on the next £1,000 or part, 40 per cent.; on the next £1,000 or part, 35 per cent.; on the next £1,000 or part, 30 per cent.; on the balance, 25 per cent.; and 10 per cent. of distributable income from property, except dividends from other private companies.

For 1959-60 to 1962-63, the minimum retention allowance in relation to business profits has been increased to 35 per cent. The new rates are as follows:—on the first £1,000 or part, 50 per cent.; on the next £1,000 or part, 40 per cent.; and on the balance, 35 per cent.

The retention allowance in respect of distributable income from property, except dividends from other private companies, is unchanged at 10 per cent.

For the financial years 1953-54 to 1962-63, the reduced distributable income is calculated by deducting from the taxable income the primary tax payable and the amount of all property income included in taxable income. The additional tax on undistributed income was imposed at a flat rate of 10s. in the £1 on the undistributed amount.

12. *Yield of Income Taxes.*—(i) *Collections from Income Taxes.* The following table shows the collections of taxes imposed on income for the years 1957-58 to 1961-62.

## INCOME TAX COLLECTIONS

(£'000)

Year	Total		
	Common-wealth	State(a)	Total
1957-58 .. .. .	650,419	33	650,452
1958-59 .. .. .	608,660	15	608,675
1959-60 .. .. .	671,294	8	671,302
1960-61 .. .. .	807,266	7	807,273
1961-62 .. .. .	828,150	..	828,150

(a) Amounts shown are arrears of State income taxes existing prior to the introduction of the uniform tax arrangement.

(ii) *Commonwealth Income Tax Assessed.* The amounts of Commonwealth taxes assessed on the income of recent years are shown in the following table. The amounts are shown under the year in which most of the assessments were made, i.e., the year following the income year. Income taxes assessed on income for past years and for the years shown after the close of the normal assessing period are not included.

(a) Assessments in respect of 1959-60 incomes issued to 31st December, 1961. Assessments issued after that date are not included.

(b) Actual income is defined briefly as "Gross income including exempt income less expenses incurred in gaining that income".

(c) Taxable income is the income remaining after deducting from assessable income all allowable deductions.

(d) Excludes additional tax levied on the undistributed income of private companies, £1,460,000.

(ii) *Commonwealth Income Tax on Residents—Grades of Income.* Individual income taxes assessed on residents are distributed according to grades of actual income in the following table. The year shown in each case refers to the year in which assessment was made, i.e., the year following the income year. The figures relate only to assessments made on the income of the previous year during the normal assessing period. Assessments issued after the normal assessing period are not included.

(a) Actual income is defined briefly as "Gross income including exempt income less expenses incurred in gaining that income".

## CHAPTER XXII

### RURAL INDUSTRY

**NOTE.**—This chapter, which incorporates the three separate chapters Agricultural Production, Pastoral Production and Farmyard, Dairy and Bee Products of previous issues, is divided into four major parts:—

- Introduction, dealing with general rural activity in Australia;
- Agricultural Production;
- Pastoral Production; and
- Other Rural Industries, which includes the dairying, poultry and bee industries.

For greater detail on the subjects dealt with in this chapter, see the annual bulletins *Primary Industries, Part I.—Rural Industries, Part II.—Non-Rural Industries and Value of Production, and Secondary Industries* (butter, cheese, etc., factories) issued by this Bureau. Current information on commodities produced is obtainable in the *Quarterly Summary of Australian Statistics, Monthly Review of Business Statistics, Monthly Bulletin of Production Statistics and Digest of Current Economic Statistics* (monthly). The series of bulletins *Classification of Rural Holdings by Size and Type of Activity, 1959–60*, shows particulars of rural holdings classified by size, nature and area of crops, and numbers of livestock, and also according to main type of activity. The mimeographed annual *Report on Food Production and the Apparent Consumption of Foodstuffs in Australia* contains details of the production and utilization of foodstuffs. The following mimeographed publications also contain considerable detail on the particular subjects dealt with.

**General.**—*Value of Production and Indexes of Price and Quantum of Farm Production* (annual), *Value of Primary Production (Preliminary Statement)* (annual), *Tractors on Rural Holdings* (annual), *Tractors on Rural Holdings, 31st March, 1960* (detailed information), *New Tractors: Receipts, Sales and Stocks* (quarterly), and *New Agricultural Machinery* (quarterly).

**Agricultural Production.**—*Rural Land Use and Crop Production* (annual), *The Wheat Industry* (two per year), *The Fruit Growing Industry* (annual), and *Agricultural Statistics* (annual).

**Pastoral Production.**—*Livestock Statistics* (annual), *Livestock Numbers* (annual), *The Meat Industry* (monthly), *Wool Production* (annual), and *Wool Production and Utilization* (annual).

**Other Rural Production.**—*The Dairying Industry* (monthly and half-yearly), *Livestock Statistics* (annual), *Livestock Numbers* (annual), *Manufacturing Industries No. 21.—Butter, Cheese and Condensed, Concentrated, etc., Milk* (annual), *Production Summary No. 36.—Preserved Milk Products* (monthly), *Production Summary No. 55.—Butter and Cheese* (monthly), and *Bee-farming* (annual).

Values of Australian overseas trade shown throughout this chapter are expressed as £A. f.o.b. port of shipment.

#### INTRODUCTION: RURAL ACTIVITY.

##### § 1. Number and Area of Rural Holdings.

**1. Number and Area.**—A holding in Australia has been defined by statisticians on a more or less uniform basis, and discrepancies which exist are not of sufficient importance to prevent comparisons. For the purpose of these statistics, a holding has been defined as land of one acre or more in extent, used in the production of agricultural produce, the raising of livestock or the products of livestock.

There are considerable fluctuations from time to time in the numbers of very small holdings, and it is very difficult to determine in some cases whether or not they are rural holdings within the definition.

In addition, in the very dry parts, such as the far west of New South Wales and Queensland and the remoter parts of South Australia and Western Australia, there are large areas of marginal lands sporadically occupied for extensive grazing under short-term lease or other arrangement, and the areas so occupied tend to fluctuate with the seasons. Similarly, there are rugged areas in the mountain country of some States which are also occasionally occupied.

The following table shows the recorded number and area of the holdings in each State for the seasons 1957–58 to 1961–62.

## RURAL HOLDINGS: NUMBER AND AREA

Season	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
NUMBER OF RURAL HOLDINGS									
1957-58 ..	78,120	69,590	43,457	27,971	21,593	11,389	230	225	252,575
1958-59 ..	77,857	69,770	43,290	28,105	21,563	11,374	243	221	252,423
1959-60 ..	77,499	69,778	42,912	28,527	21,832	11,202	269	224	252,243
1960-61 ..	76,871	69,623	43,155	28,711	21,922	11,201	275	224	251,982
1961-62 ..	76,949	69,866	43,287	28,886	22,082	11,117	284	217	252,688
TOTAL AREA OF RURAL HOLDINGS ( <sup>'000</sup> acres)									
1957-58 ..	173,278	37,822	368,833	152,045	236,667	6,547	167,210	392	1,142,794
1958-59 ..	172,978	37,755	370,240	152,312	238,264	6,573	156,897	381	1,135,400
1959-60 ..	172,721	37,737	371,794	155,437	244,619	6,511	158,806	382	1,148,007
1960-61 ..	172,697	37,934	373,995	156,456	247,737	6,510	161,099	374	1,156,802
1961-62 ..	172,327	37,754	374,501	156,897	252,783	6,551	171,245	377	1,172,435

2. **Classification by Size and Type of Activity.**—Some of the information obtained from the 1959-60 Agricultural and Pastoral Census was classified by size of principal characteristics (area of holdings, area of sown grasses and clovers, area of selected crops and numbers of livestock). In addition, all holdings were classified according to type of activity. Tables showing this information, for statistical divisions and States, and an outline of the methods used have been published in a series of bulletins, *Classification of Rural Holdings by Size and Type of Activity*, 1959-60. Similar information on size classification for each State was published in a series of bulletins for the year 1955-56.

## § 2. Employment on Rural Holdings

1. **Persons Engaged.**—The following table shows, for each State, the recorded number of males working on rural holdings at 31st March, 1962. Particulars for females are not available. Additional particulars relating to the number of males employed in agriculture up to 1941-42 are shown in Official Year Book No. 36, page 852, and previous issues. Similar details for later years are not available.

## MALES(a) ENGAGED ON RURAL HOLDINGS AT 31st MARCH, 1962

Particulars	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.(b)	A.C.T.	Aust.
Permanent—									
Owners, lessees or share-farmers .. ..			45,746	24,061	20,555	7,614	239	165	
Relatives of owner, lessee or share-farmer over 14 years of age, not receiving wages or salary .. ..			3,426	1,734	1,367	93	17	20	
Employees, including managers and relatives working for wages or salary .. ..	(c)	(c)	18,254	7,947	9,305	4,090	685	136	(c)
Total, Permanent Males .. ..			67,426	33,742	31,227	11,797	941	321	
Temporary .. ..			10,950	15,140	2,956	5,332	1,502	34	
Total, Males .. ..			78,376	48,882	34,183	17,129	2,443	355	

(a) Details for females not available.

(b) 1,326 male full-blood aboriginals employed are included as temporary employees.

(c) Not available; subject to investigation.

The next table shows the number of persons working full-time on rural holdings in Australia at 31st March of the five years 1954 to 1958. Data for subsequent years are the subject of investigation and are not available at this stage.

**PERSONS ENGAGED ON RURAL HOLDINGS: AUSTRALIA(a)**

Particulars	31st March—				
	1954(b)	1955(b)	1956	1957	1958
<b>Permanent—</b>					
<b>Males—</b>					
Owners, lessees or share-farmers ..	241,149	240,879	245,621	244,111	241,247

(a) Australian totals for years subsequent to 1958 are not available. (b) Excludes Northern Territory.

**§ 3. Technical Aspects of Rural Industry.**

**1. Farm Machinery on Rural Holdings.**—The history of the development of large-scale field crops and sown pastures in Australia is essentially also the history of the mechanization of the rural industries. This may be divided into four phases.

# AREA OF CROPS: AUSTRALIA, 1900-01 TO 1961-62

# WHEAT FOR GRAIN

## AUSTRALIA, 1935-36 TO 1961-62

# PRODUCTION OF OATS, BARLEY AND RAW SUGAR AUSTRALIA, 1935-36 TO 1961-62

# PRODUCTION OF POTATOES AND ONIONS

## AUSTRALIA, 1935-36 TO 1961-62

The first phase extended from initial settlement to the mid-nineteenth century, when agriculture was primarily local and non-commercial, and confined by hand methods to small areas and low production per farm worker.

The invention of an effective wheat stripper in South Australia in 1843, and the extension of its use into Victoria and New South Wales, however, greatly increased the area which could be harvested in a season. This initiated the second phase, which continued with the development of stump-jump implements in the 1870's, and the scrub roller and mulleniser in the 1890's. These later developments made possible an extension of the wheat belt into the drier mallee lands of Victoria and South Australia. By the turn of the century, machinery had thus been developed to conduct all cropping operations on an extensive basis.

The third major change in farm machinery followed the 1914-18 War, when tractor power became increasingly available in a variety of models and sizes. The increase in numbers of tractors on rural holdings and higher operating speeds led in turn to new and improved types of farm machinery drawn by tractors. These trends were interrupted by the economic depression of the 1930's.

After the 1939-45 War, there was a widespread expansion of labour-saving machinery and devices in all sectors of rural industry. Clearing methods were extended with the bulldozer, log, chain and hi-ball units, and cultivation was improved by means of large disc ploughs and disc harrows, and seeding and harvesting machinery. These methods were extended to crops for which methods involving greater use of manpower (manual labour) had previously been employed. Milking machines almost entirely replaced hand milking on dairy farms, and labour-saving machinery was introduced into farm and station development and maintenance operations. These operations included fencing, bulk transport of grain and fodder, pasture treatments, fodder conservation and pasture improvement.

The table below shows data for the principal types of farm machinery on rural holdings in the several States and Territories at 31st March, 1962. A more detailed analysis of tractors on rural holdings according to horse-power, type of fuel used and age of tractor was published in Statistical Bulletin: *Tractors on Rural Holdings—Australia, 31st March, 1960*, issued on 8th September, 1961.

FARM MACHINERY ON RURAL HOLDINGS, 31st MARCH, 1962

(a) Incomplete. Excludes some types of disc cultivator ploughs in Queensland.  
 available. Details are collected at triennial intervals only.

(b) Not

2. **Fertilizers.**—(i) *General.* In the early days of settlement in Australia, the principles of scientific cultivation were little understood. It was common for the land to be cropped continuously until the natural fertility was almost exhausted. More scientific methods have been adopted in recent decades, much of the improvement in this regard being due to the assistance and guidance offered to farmers by various State and Commonwealth departments and authorities.

Fertilizer is generally applied to pastures at the time of sowing, and periodical (usually annual) top-dressings are carried out afterwards to keep the pastures in good condition. The introduction of the modern seed-drill, acting also as a fertilizer-distributor, has greatly facilitated the use of artificial manures, and much land formerly regarded as useless for cultivation has now been brought into production. With the rapid increase in the area of sown pastures, particularly since the 1939–45 War, large quantities of artificial fertilizers

have been used. In addition, increasing areas of native pastures have been top-dressed. The utilization of aircraft, in particular, has enabled the fertilizing of some areas which would otherwise be inaccessible. In 1961-62, pastures (sown and native) accounted for nearly 60 per cent. of both the total area fertilized and the total quantity of fertilizer used.

(ii) *Local Production.* The Australian output of prepared fertilizers is derived chiefly from imported rock phosphate. Complete information regarding local production of fertilizers is not available. The number of firms engaged in the manufacture of chemical fertilizers in Australia for the year 1961-62 was 47, made up as follows:—New South Wales, 12; Victoria, 6; Queensland, 4; South Australia, 10; Western Australia, 7; and Tasmania, 8. The production of superphosphate in Australia during 1961-62 amounted to 2,591,000 tons.

(iii) *Quantities Used Locally.* Information regarding the area treated with artificial fertilizers and the quantity of artificial fertilizers (superphosphate, bonedust, nitrates, etc.) used in each State during the 1961-62 season is given in the following table.

AREA FERTILIZED AND QUANTITY OF ARTIFICIAL FERTILIZERS USED,  
1961-62

(iv) *Imports and Exports.* The chief sources of Australia's supplies of rock phosphate are Nauru, Christmas Island (Indian Ocean) and the Gilbert and Ellice Islands. Sodium nitrate is obtained chiefly from Chile.

The imports of artificial fertilizers during the five years ended 1961-62 are shown in the following table.

### ARTIFICIAL FERTILIZERS: IMPORTS INTO AUSTRALIA

(a) Less than £500.

Exports of fertilizers (practically all of which were manufactured locally) amounted to 1,955 tons valued at £56,054 in 1961-62 compared with 15,442 tons valued at £294,858 in 1960-61.

3. *Aerial Agriculture.*—During recent years, an increasing use has been made of aircraft for top-dressing and seeding, for spraying and dusting of crops and pastures, and for pest and vermin extermination. For 1956-57 (the first year for which data are available), the total area treated was about 20 per cent. of the area treated in 1961-62. The following table shows details of area treated and materials used for each State for the year ended 31st March, 1962.

## AERIAL AGRICULTURE: OPERATIONS DURING 1961-62

(a) Areas treated with more than one type of material in one operation are counted once only.  
 (b) Includes 4,750 acres baited for rabbit destruction. (c) Includes 64,952 acres baited for rabbit destruction.  
 (d) Includes 69,702 acres baited for rabbit destruction. See footnotes (b) and (c).

NOTE.—The information contained in this table was collected by the Department of Civil Aviation.

4. **Pasture Improvement.**—(i) *Indigenous Species.* The earliest Australian pastoralists encountered a diversity of indigenous vegetation which had developed according to the varying conditions of soil and climate. The value of these plants as fodder, together with the local water supply, determined the capacity of each region as a grazing district.

The incursion of herds and flocks following the opening-up of new grazing districts resulted in many changes in the composition of native pastures. Species which were especially attractive to domestic stock were grazed more heavily, and in consequence suffered more than those which were hardier and less palatable. Where forests and bush were cleared, species requiring a shady aspect were frequently replaced by others which were normally found in exposed and drier areas. However, such species were not always well suited to the higher rainfall of the newly cleared regions, and new species had to be introduced from other countries to replace them. This introduction marked the beginning of pasture improvement.

The indigenous vegetation which is suitable for grazing may be classified into three groups according to growth habit—perennial grasses, annual grasses and perennial shrubs and trees.

The perennial grasses generally have the capacity to resist dry periods. The upper portions of these plants die off, and the crowns, which are usually at soil level, remain dormant. In northern Australia, where the rain falls mainly in the summer months, these plants hibernate during the colder winter months. Of the many species occurring, the best known are Mitchell grass (*Asprella* spp.) and Flinders grass (*Iseilema* spp.). Spinifex (*Triodia* spp.) is a widespread desert type. In areas of southern States where summers are hot and dry, common aestivating species are wallaby grass (*Danthonia* spp.), spear or corkscrew grass (*Stipa* spp.), and panic or millet grass (*Panicum* spp.). In wetter areas, tussock grass (*Poa australis*) flourishes.

Members of the annual group generally have a short life cycle which coincides with the rainy season, and are both numerous and varied in Australia. In many districts, they are a valuable addition to the more permanent perennials.

The third group consists of shrubs and small trees, many of which provide satisfactory grazing for stock. Prominent species include acacias such as mulga and myall (*A. pendula*), kurrajongs (*Brachychiton spp.*), wilga (*Geyera parviflora*) and numerous species of salt bush (*Atriplex*, *Bassia* and *Kochia spp.*).

(ii) *Plant Introduction.* Exotic pasture plants introduced into Australia were characteristic of pastures in the United Kingdom and Europe. These included the rye grasses (*Lolium spp.*), cocksfoot (*Dactylis glomerata*), clovers—white (*Trifolium repens*), red (*T. pratense*), subterranean (*T. subterraneum*), and strawberry (*T. fragiferum*)—and lucerne (*Medicago sativa*). From America, paspalum (*Paspalum dilatatum*), and from Africa, rhodes (*Chloris spp.*), veldt (*Erharta calycina*), buffel (*Cenchrus ciliaris*), birdwood (*Cenchrus setigera*) and kikuyu (*Pennisetum clandestinum*), grasses were introduced. A large number of other species arrived as impurities in seed or in stock fodder which occasionally entered Australia by ship. Two of these introduced species developed very effectively in their new environment, the medics and subterranean clover. The latter is recorded as being established in South Australia before 1900.

(iii) *Pasture Research.* Australian research into improved pasture commenced some time prior to 1926, when Professor (later Sir George) Stapleton visited Australia. His work and visit gave a fresh impetus to improved pasture research which continued on into the 1930's. All State Departments of Agriculture, the Commonwealth Scientific and Industrial Research Organization, and some universities have staffs permanently engaged on this research. Progress has resulted from following three main lines of research.

The first is based upon the belief that a pasture, though usually a complex of various species, behaves like a crop in that it requires a fertile soil as well as suitable climatic conditions for active growth. Under grazing, considerable quantities of the various chemical elements are removed, and, unless the soil is well supplied with these basic elements and they are readily available to the plants, deficiencies are likely to appear. If this limited supply is depleted, less favourable species which require smaller quantities of these elements may appear, and in time assume dominance. If these species are of lower grazing value, this leads to pasture deterioration. The simplest case is of phosphatic deficiency which is widespread in many Australian soils. The response of pastures to the application of superphosphate was first demonstrated soon after the 1914–18 War. Since then, the practice has become an integral part of improved pasture maintenance programmes. At present, many millions of acres of pastures are top-dressed with superphosphate each year. On the other hand, Australian research into trace element deficiencies in soils and the methods developed for rectifying these has resulted in improved pastures being established on millions of acres of virgin land previously considered infertile. In this way, research into fertilizers and their application has greatly assisted research into improved pastures and their management.

The second line of research is based upon the fact that most species of pasture plants comprise a variety of forms, each of which has its own peculiarities of growth and development. These characteristics are often extremely significant in determining the success or failure of the species under certain soil and climatic conditions. For this reason, State Departments of Agriculture have introduced seed certification schemes aimed at guaranteeing that farmers obtain pure seed of a variety suitable for their district. A major problem still unsolved, however, involves the development of varieties which will provide a high yield of top quality feed in the summer rainfall areas of northern Australia. Varieties are also being sought which will thrive in the southern areas of the continent where limitations are imposed on plant growth by highly variable rainfall conditions.

Finally, research has been directed into the effect of grazing animals upon standing pastures, for if a pasture is to be maintained over the years it is necessary that the animals grazing on it be managed with due regard to the characteristics of the plant in the pasture.

The general level of pasture quality has improved steadily as these three lines of research have been developed, and the results have been applied at the farm level.

5. *Soil Conservation.*—(i) *Land Use and Soil Erosion.* The threat of soil erosion is not new. Many of the civilizations of the ancient world continually struggled against its advance into their farmlands. In recent times, the virtually uncontrolled exploitation of large areas of the newly settled continents, America and Australia, has resulted in a serious loss of natural soil resources over wide areas. Soil erosion on such a scale is usually caused by poorly conceived and badly implemented land use. The clearing of hills and slopes, bare fallowing of marginal lands, and excessive grazing by domestic and wild animals have resulted in widespread erosion in settled areas.

(ii) *Agents of Erosion.* The erosion of soil may take place through the agency of water or wind. The major types of water erosion are:—sheet erosion, where the surface soil is removed over large areas; gully erosion, where the soil and sub-soil is gouged out in localized areas to produce gullies; tunnel erosion, where the sub-soil is washed downhill beneath the surface with a resultant collapse of the unsupported surface soil; and stream erosion, which results in an undermining and subsidence of the banks of flooding rivers and creeks.

Each of these types of erosion may have apparently harmless beginnings, but the speed at which they may develop, if uncontrolled, is rapid and dramatic.

Wind erosion is the dominant type of erosion in dry areas where plant growth is sparse and soil particles are loose and free to move. Wind erosion has a similar effect to sheet erosion caused by water, in that it leaves the surface bare and scalded, retarding plant growth and rendering the land agriculturally useless. Coarse particles may be eddied by the wind into local dunes, but the smaller, lighter particles blow for many miles as dust. Dunes shift continually unless colonized by plant life, and may cover fences, roads, paddocks and even buildings.

The presence of soluble salts in the surface layers of the soil has been a contributing cause to both wind and water erosion over large areas of South Australia and Western Australia. The destruction of plants by comparatively small amounts of residual salt in the top soil and breakdown in the soil structure considerably increase susceptibility to agents of erosion.

(iii) *Prevention and Control.* Effective techniques for checking, as opposed to avoiding, both water and wind erosion have been devised. Of these, the formation of contour banks, contour ploughing, the growing of wind breaks and the stabilizing of loose soil by crops are the simplest. Contour ploughing of hillsides frequently prevents water from flowing downhill. In other cases, where the slope is greater, contour banks will successfully retain and divert water flow into absorption areas. On gently sloping grazing land, run-off can often be successfully controlled by well-spaced furrows, ploughed on the contour. Trees planted in the form of shelter belts and windbreaks can provide excellent counters to wind erosion in exposed areas. Superior to all these techniques, however, is the stabilization of surface soil by the provision of permanent, adequate vegetative cover. Hence a considerable volume of research has been devoted to selecting plants suitable for vegetative regeneration in areas which experience long dry periods.

(iv) *Soil Conservation Service.* The seriousness of the threat of soil erosion to Australia was not generally appreciated until the early 1930's. But in 1936, all States were requested by the Commonwealth government to form soil conservation committees to promote and co-ordinate efforts to combat this wastage of soil resources. From this time onward, interest in soil conservation has continued to expand.

With the introduction of the *Soil Conservation Act* of 1938 and the subsequent establishment of the Soil Conservation Service, New South Wales was the first Australian State to establish an organization to be concerned solely with soil conservation. Victoria followed next, in 1940, when the *Soil Conservation Act* was passed to authorize the establishment of the Soil Conservation Board (now Soil Conservation Authority). Although the other Commonwealth States and Territories do not possess separate bodies devoted to soil conservation, they do have specialized conservation sections within their Departments of Agriculture. In all cases, a common aim of conserving the soil provides these soil conservation groups with a wide charter. This involves the protection of the catchment areas, advice and assistance to land-holders, and the close co-operation of all Commonwealth, State and local government authorities concerned with matters of conservation. In some States, conservation research stations provide facilities where research into the prevention and control of erosion may be conducted.

In 1946, a Commonwealth Standing Committee on Soil Conservation was established on the recommendation of the Australian Agricultural Council. This Committee consists of heads of the State soil conservation organizations and representatives from the Commonwealth Departments of Primary Industry and Interior and the Commonwealth Scientific and Industrial Research Organization. The main functions of the Committee are to co-ordinate the work of State soil conservation services, to obtain the co-operation and assistance of trained personnel in related fields, and to undertake special research projects in consultation or collaboration with the States.

## AGRICULTURAL PRODUCTION

NOTE.—In general, statistics in this chapter relating to agricultural production are derived from "census" returns supplied by approximately 250,000 farmers who utilize one acre or more of land for agricultural or pastoral purposes. The latest figures available are those for the year 1961–62. The returns are collected on a substantially uniform basis in all States at 31st March each year, and relate to areas sown and crops produced in the previous twelve months. Where harvests are not completed by March (e.g. potatoes), provision is made in some States for a special collection after the harvest is completed and in others for the inclusion of the total estimated yield expected from the complete harvest. In cases where additional data are available from marketing authorities or other sources, these are used in conjunction with the "census" returns. The statistics published in this chapter are therefore shown in "agricultural" years. For most purposes, there will be little error involved in considering them as applying to years ending 30th June.

Details of the weights and measures used in recording production of agricultural commodities appear in the introduction to the bulletin *Primary Industries, Part I.—Rural Industries*.

### § 1. Progress, Assistance and Control

1. **Early Development.**—The coastal districts of southern Australia are characterized to a large degree by leached soils of low fertility, with limited areas suitable for intensive crop cultivation. This, combined with an unfamiliar climate and problems associated with the clearance of scrub-land, severely checked early attempts to establish crops.

A brief reference to these attempts at cultivation by the first settlers in New South Wales and to the discovery of suitable agricultural land on the Parramatta and Hawkesbury Rivers prior to the year 1813 and west of the Blue Mountains thereafter is contained in early issues of the Official Year Book. (See No. 22, p. 670.)

In an *Account of Live Stock and Ground under Crop in New South Wales, 19th August, 1797*, Governor Hunter gives the acreage of crops as follows:—wheat, 3,361 acres; maize, 1,527 acres; barley, 26 acres; potatoes, 11 acres; and vines, 8 acres.

The following details of crops were collected in 1808:—wheat, 6,874 acres; maize, 3,389 acres; barley, 544 acres; oats, 92 acres; peas and beans, 100 acres; potatoes, 301 acres; turnips, 13 acres; orchards, 546 acres; and flax and hemp, 37 acres.

By the year 1850, the area of crops had increased to 491,000 acres, of which 198,000 acres were cultivated in what is now the State of New South Wales, and 169,000 acres in Tasmania. At the end of 1850, the area under cultivation in Victoria, which was then the Port Phillip District of New South Wales, was 52,190 acres. The bulk of the arable land in this part of the colony was devoted to the extensive grazing of sheep.

The gold discoveries of 1851 (at Bathurst in New South Wales and later at Ballarat and Bendigo in Victoria) had at first a very disturbing effect on agricultural progress. The area of crops declined from 491,000 acres in 1850 to 458,000 acres in 1854, as landowners and rural labourers joined in the various gold rushes. The demand for agricultural products occasioned by the large influx of population was, however, soon reflected in the increased area cultivated, for at the end of 1858 the land under crop in Australia exceeded a million acres. There was still a shortage of rural labour, and the increased acreage was due largely to the increasing mechanization of crop operations.

2. **Progress of Cultivation.**—The following table shows the area of crops in each of the States and Territories of Australia at ten-yearly intervals since 1860–61 and during each of the ten seasons 1952–53 to 1961–62. On page 993 there is a graph showing the area of crops in Australia from 1900–01 onward.

(a) Not available.

The progress of agriculture was practically uninterrupted from 1860–61 to 1915–16, when, as the result of a special effort to increase wheat production during the 1914–18 War, 18.5 million acres were cultivated in Australia. There was a temporary setback in later war years, but after the end of the war the area continued to expand, and increased steadily to the record area of 25.2 million acres in 1930–31. In the following years, the slump in wheat prices seriously depressed incomes in the agricultural industry, and the area of crops decreased to just under 20 million acres in 1935–36.

By 1938–39, the industry was recovering from the depression, and the total area under cultivation reached the high level of 23.5 million acres. Thereafter, as a result of war-time man-power shortages and shipping difficulties, the area declined to less than 16 million acres in 1943–44. After that year, production gradually increased again until, in 1947–48, 22.5 million acres were sown to crops. This upward trend was reversed after 1948–49, largely because many primary producers transferred from wheat to wool production as a result of the high prices of wool. Since 1951–52, however, when the area sown was 20.0 million acres, the area under crops has increased steadily, except for 1956–57, when excessively wet conditions caused reductions in the area sown to wheat. Since that year, the area of all crops has shown an upward trend in each year, reaching a record level of 29.6 million acres in 1961–62. As the area under wheat in Australia constitutes a large proportion of the total area cropped (46 per cent. during the five years ended 1961–62), fluctuations in the former have in the past been largely responsible for year to year variation in total crop area.

3. **Control and Assistance by Governmental Authorities.**—(i) *General.* The influence of governmental and semi-governmental authorities on Australian rural industry is most apparent in the fields of guaranteed prices, subsidies and controlled marketing. Many of these aspects of intervention at the national level take place indirectly through the Australian Agricultural Council.

(ii) *Australian Agricultural Council.* Arising out of a conference of Commonwealth and State Ministers on agricultural and marketing matters, held at Canberra in December, 1934, a permanent organization known as the Australian Agricultural Council was formed. The Council consists of the Commonwealth Ministers for Primary Industry and Territories

and the State Ministers of Agriculture, with power to co-opt the services of other Commonwealth and State Ministers as required. The principal functions of the Council are:—the promotion of the welfare and development of agricultural industries generally; the exchange of information on agricultural production and marketing; the improvement of the quality of agricultural products and the maintenance of high grade standards; to ensure, as far as possible, balance between production and available markets; and organized marketing.

In addition, a permanent Standing Committee on Agriculture was formed to advise the Council, to secure co-operation and co-ordination in agricultural research, to advise State and Commonwealth Governments on the initiation and development of agricultural research, and to secure co-operation between all Governments in respect of quarantine measures against pests and diseases of plants and animals.

(iii) *Bounties paid to Producers.* Direct financial assistance to primary producers by the Commonwealth Government takes the form of bounties, subsidies and other financial assistance. Brief details of some of the more important payments are given below.

(a) *Cotton Bounty.* The *Cotton Bounty Act* provides for payment of a bounty on seed cotton of a grade higher than "strict good ordinary" delivered to a ginnery and processed at the ginnery into raw cotton for sale for use in Australia. The present rate of bounty is designed to give growers an average return of 14d. per lb. for seed cotton which is one grade higher than "strict good quality". The total payment in 1960–61 was £373,487 and in 1961–62 it was £315,105.

(b) *Flax Fibre Bounty.* The period covered by the bounty terminated on 31st October, 1960. (See Official Year Book No. 47, p. 939, and previous issues, for details of, and payments under, the bounty.)

(iv) *Other Financial Assistance.* Other forms of assistance to producers include payments for cattle tick control, the Commonwealth Dairy Industry Extension Grant, Commonwealth Extension Service Grant, flood, drought and bush fire relief, fisheries research and farm mechanization research.

Over recent years, legislative research schemes, financed by matching contributions from the Commonwealth and industry and/or States, have been initiated in regard to wheat, wool, tobacco, dairy produce, beef cattle and wine. Non-legislative schemes, on a similar financial basis, have been operative in relation to brown rot, Australian plague locusts, tractor testing, peanut drying, sugar-cane harvesting mechanization, barley research, banana research and fruit fly research.

For further information on these matters, see Chapter XXI. Public Finance, pages 935–6.

(v) *Agricultural Training and Research.* Agricultural colleges have been established in all States except Tasmania. The primary function of these colleges is the training of students in the various phases of agriculture and livestock husbandry. Students are required to undertake a considerable amount of practical work in addition to lectures and theory. A secondary function of the colleges is agricultural research and experimentation. To a lesser degree, they carry out extension work in the form of public field days. Upon graduation, students receive diplomas in agriculture, dairying, etc., according to the course undertaken.

Experimental farms have been set up by State Departments of Agriculture in all States. They are primarily concerned with agricultural research and experimentation, each farm concentrating on problems specific to the district in which it is located. The results of the work undertaken are passed on to farmers at field days which are held at regular intervals, through publication in various agricultural or scientific journals, and through the agricultural extension services of the State Departments of Agriculture.

The Commonwealth Scientific and Industrial Research Organization has field stations in many parts of Australia, and sometimes undertakes research jointly with the appropriate State authorities. It also has regional laboratories in several States, conducting research into agronomic and livestock problems as they occur in each particular region (see also Chapter XVIII. Education, Cultural Activities and Research). The State Departments of Agriculture study problems of particular significance within their own boundaries. In addition, the universities carry out valuable work in their laboratories and on their experimental farms.

## § 2. Distribution, Production and Value of Crops

1. *Distribution.*—(i) *General.* The wide range of climatic and soil conditions over the agricultural regions of Australia has resulted in a diversity of crops being grown throughout the Commonwealth. Generally, cereal crops (excluding rice and sorghum) are grown in all States over wide areas, while industrial crops are confined to specific locations in a few States.

(ii) *Area of Crops in States and Territories.* The following table shows the areas in the several States and Territories of each of the crops for the season 1961–62.

## AREA OF CROPS, 1961-62

(v) *Size Classification of Principal Crops.* In Australia there is, in many cases, a close correlation between the type of crop and the size of holdings upon which it is usually grown. A special series of tabulations relating to rural holdings in Australia was compiled for 1959-60 and has been published in full detail in a series of bulletins, *Classification of Rural Holdings by Size and Type of Activity, 1959-60*. Tables in these bulletins show a classification by area of holding and area of crop for wheat, oats and barley by States and statistical divisions. These tables thus provide a guide to the regional distribution of the holdings growing the major crops, sown grasses and clovers. Classifications of holdings according to major crops grown, livestock carried and type of activity are also shown.

2. *Production.*—(i) *Production of Crops in States and Territories.* The following table shows production of crops in the various States and Territories for the season 1961-62.

## PRODUCTION OF CROPS, 1961-62

Vineyards—						
Grapes (a) .. .. .	"	4.42	4.33	3.62	4.32	5.14

(a) Per acre of productive crops.

3. *Value of Agricultural Production.*—(i) *Gross Value of Agricultural Production in Australia.* The following table shows the gross value of principal crops and of total agricultural production in Australia for the five years ended 1961-62.

Further reference to the value of production of agriculture and other industries in Australia as well as a brief explanation of the terms used may be found in Chapter XXIX. Miscellaneous.

## GROSS VALUE(a) OF AGRICULTURAL PRODUCTION: AUSTRALIA

(£'000)

Crop	1957-58	1958-59	1959-60	1960-61	1961-62
Cereals for grain—					
Barley .. ..	17,555	33,304	16,623	31,072	21,933
Maize .. ..	4,995	4,629	4,029	5,264	5,285
Oats .. ..	15,951	30,964	18,396	25,535	20,001
Rice .. ..	4,045	4,731	4,450	4,125	3,832
Wheat .. ..	66,892	144,087	137,762	195,678	186,172
Hay .. ..	39,277	46,503	34,433	50,181	37,746
Green fodder .. ..	8,571	6,966	7,572	9,647	8,743
Industrial crops—					
Cotton, unginned .. ..	213	249	556	917	647
Hops .. ..	1,137	1,273	1,159	1,179	1,242
Sugar-cane .. ..	47,346	47,276	44,774	50,580	49,608
Tobacco (dried leaf) .. ..	6,202	7,920	11,215	13,051	12,122
Vegetables for human consumption—					
Onions .. ..	1,274	1,920	2,841	1,833	2,547
Potatoes .. ..	9,969	13,109	13,460	19,365	20,697
Other vegetables for human consumption .. ..	25,359	25,243	26,611	29,718	28,743
Grapes .. ..	18,337	18,496	14,698	17,868	19,815
Fruit and nuts .. ..	59,150	54,025	51,763	59,773	63,364
All other crops .. ..	14,573	19,197	20,012	19,895	21,675
Total .. ..	340,846	459,892	410,354	535,681	504,172

(a) Includes amounts paid as bounty, relief, etc.

(ii) *Gross, Farm and Net Values in States and Territories.* Values of agricultural production in the various States and Territories are shown for 1961-62 in the following table.

In computing the net value of production, no deduction has been made for the cost of maintenance of farm buildings and fences, nor for the depreciation of farm plant.

## GROSS, FARM AND NET VALUES OF AGRICULTURAL PRODUCTION, 1961-62

(£'000)

State	Gross production valued at principal markets	Marketing costs	Gross production valued at farm	Value of materials used in process of production	Net value of production (a)
New South Wales .. ..	127,352	24,431	102,921	(b) 9,063	93,858
Victoria .. ..	115,112	16,374	98,738	10,493	88,245
Queensland .. ..	105,275	12,517	92,758	17,682	75,076
South Australia .. ..	62,011	7,454	54,557	9,090	45,467
Western Australia .. ..	74,383	9,526	64,857	13,532	51,325
Tasmania .. ..	19,835	4,895	14,940	2,595	12,345
Northern Territory .. ..	75	(c)	75	(c)	75
Australian Capital Territory .. ..	129	12	117	5	112
Australia .. ..	504,172	75,209	428,963	62,460	366,503

(a) No deduction has been made for depreciation and maintenance. (b) No allowance has been made for costs of power, power kerosene, petrol and other oils. (c) Not available.

(iii) *Net Values of Agricultural Production, 1957-58 to 1961-62.* In the following table, the net value of agricultural production and the net value per head of population are shown by States for the years 1957-58 to 1961-62.

#### NET VALUE OF AGRICULTURAL PRODUCTION(a)

Year	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
NET VALUE (£'000)									
1957-58	44,754	64,971	62,898	32,318	27,338	12,050	52	149	244,530
1958-59	82,472	73,661	68,716	50,571	42,746	10,496	59	222	328,943
1959-60	78,518	68,912	65,357	24,246	44,044	10,645	79	150	291,951
1960-61	98,171	104,031	73,471	58,323	46,708	10,939	80	138	391,861
1961-62	93,858	88,245	75,076	45,467	51,325	12,345	75	112	366,503

#### NET VALUE PER HEAD OF POPULATION (£)

1957-58	12.2	24.2	44.2	36.5	39.4	36.3	2.4	3.8	25.1
1958-59	22.1	26.8	47.4	55.7	60.6	31.0	2.6	5.1	33.1
1959-60	20.7	24.4	44.2	26.0	61.4	30.9	3.2	3.0	28.7
1960-61	25.4	36.0	48.9	60.9	64.0	31.2	3.1	2.5	37.7
1961-62	23.8	29.8	49.1	46.4	68.8	34.6	2.8	1.8	34.6

(a) No deduction has been made for depreciation and maintenance.

4. **Indexes of Quantum and Price of Agricultural Production.** Indexes of quantum and price of agricultural production are shown in the following table. The quantum indexes relate to gross output of farm products valued at constant prices. The quantities of each farm product produced each year have been re-valued at the unit gross value for the period 1936-37 to 1938-39. The price indexes relate to average "prices" of farm products realized at the principal markets of Australia. Average quantities of each product marketed in the period 1946-47 to 1950-51 have been used as fixed weights. Further details on weights used, etc., are to be found in Chapter XXIX. Miscellaneous.

#### INDEXES OF QUANTUM(a) AND PRICE OF AGRICULTURAL PRODUCTION

(Base: Average 3 years ended June, 1939 = 100)

Particulars	1957-58	1958-59	1959-60	1960-61	1961-62
<b>Quantum Produced—</b>					
Wheat .. .. .	59	131	121	166	150
Other crops .. .. .	141	187	152	184	171
<i>Total, All Crops</i> .. .. .	<i>109</i>	<i>165</i>	<i>140</i>	<i>177</i>	<i>163</i>
<i>Per head of population</i>	<i>77</i>	<i>114</i>	<i>95</i>	<i>117</i>	<i>106</i>
<b>Price—</b>					
Wheat .. .. .	339	337	350	355	380
Other crops .. .. .	333	310	313	344	323
<i>Total, All Crops</i> .. .. .	<i>336</i>	<i>322</i>	<i>329</i>	<i>349</i>	<i>348</i>

(a) Indexes of value at constant prices, i.e. quantities revalued at average unit values of the base years (1936-37 to 1938-39).

### § 3. Cereal Crops

1. *Wheat.*—(i) *General.* Wheat is grown on a large scale in all States except Tasmania, and is the most important crop in Australia in terms of area, production and exports. The present limits of the wheat belt have been established after considerable fluctuation over the last four decades.

In January, 1934, a Royal Commission was appointed to inquire into and report upon the economic condition of the growing, handling and marketing of wheat, and the manufacturing, distributing and selling of flour and bread. The Report of this Royal Commission provides an authoritative description of all aspects of the industry up to that time.

Two of the aspects of governmental and semi-governmental assistance and control which have contributed to the development of the industry are the organization of oversea marketing and of research.

(ii) *The Australian Wheat Board.* The Australian Wheat Board was constituted in September, 1939, under National Security (Wheat Acquisition) Regulations, to purchase, sell, or dispose of, wheat or wheat products, and to manage and control all matters connected with the handling, storage, protection, shipment, etc. of wheat acquired, and such other matters as were necessary to give effect to the regulations.

Details of the operations of the Wheat Stabilization Board in licensing wheat grown during the seasons 1941–42 to 1948–49 will be found in Official Year Book No. 38, pages 940–1. The Board ceased to function on 31st December, 1948.

The Board was reconstituted for five years, with similar powers, under the Commonwealth *Wheat Stabilization Act* 1948, to administer the stabilization plan. The new Board commenced to function on 18th December, 1948. The Board has been continued in existence by the Commonwealth *Wheat Industry Stabilization Acts* 1954 and 1958 for the purpose of administering the second and third five-year stabilization plans.

(iii) *Marketing of Wheat.* (a) *Stabilized Marketing.* As a large proportion of the Australian wheat crop is normally exported, the marketing of wheat occupies an important part in the industry. A detailed survey of legislation relating to stabilization of the wheat industry, including controls exercised during the 1914–18 and 1939–45 Wars and legislation establishing the Wheat Stabilization Plan in 1948, is given in the Appendix to Official Year Book No. 37, pages 1295–99.

Details of more recent plans were published in Official Year Book No. 40, pages 841 and 842 (1947–48 to 1952–53 Plan), and No. 44, page 861 (1953–54 to 1957–58).

In 1958, a new Plan for the period 1958–59 to 1962–63 was enacted. Details appear in Official Year Book No. 48, pages 903 and 904.

(b) *Cost of Production.* The cost of production of wheat, which for the first season of the current Wheat Stabilization Plan, 1958–59, was fixed at 14s. 6d. a bushel by the legislation, rose to 14s. 10d. a bushel for the 1959–60 season and to 15s. 2d. a bushel for the 1960–61 season. The guaranteed price for the seasons 1959–60 and 1960–61 was therefore 14s. 10d. and 15s. 2d. a bushel respectively, while the home consumption price, in each case including a loading of 2d. a bushel to cover costs of shipment of wheat to Tasmania, became 15s. and 15s. 4d. a bushel respectively. For the 1961–62 season, the guaranteed price was 15s. 9d. a bushel and the home consumption price was 15s. 10d. a bushel, including the Tasmanian loading of 1d. a bushel. For the 1962–63 season, these prices were 15s. 10d. and 15s. 11½d. a bushel, respectively, the latter including the Tasmanian loading of 1½d. a bushel.

(c) *F.A.Q. Standard of Wheat.* Sales and shipments of grain in bulk overseas are made on a “fair average quality” (f.a.q.) basis. Samples of wheat are obtained each year from the different wheat districts, and mixed to give a representative sample of the whole crop in each State. From this representative sample, the f.a.q. weight for each State is determined by the use of the Schopper 1-litre scale chondrometer. This standard is used as a basis for sales of each crop and it varies from year to year and from State to State. F.a.q. is an Australian term, and the method of selling differs from that of other countries, which sell according to sample, or (as in Canada) according to grades, which are fixed and do not vary from year to year. The f.a.q. method does not, however, take protein quantity and quality into account, and it gives no indication therefore of the baking strength of the resulting flour.

The f.a.q. weight of a bushel of wheat in each of the four main wheat-producing States for the 1961-62 season's crop was as follows:—New South Wales, north, 63½ lb., south and west, 61 lb.; Victoria, 64 lb.; South Australia, semi-hard, 63 lb., soft, 63½ lb.; and Western Australia, 65 lb.

(d) *Bulk Handling and Storage of Wheat.* A detailed description of the bulk handling system, including its advantages and disadvantages compared with other methods of handling, appears on pages 954-8 of Official Year Book No. 39.

New South Wales, Victoria and Western Australia have operated bulk handling systems for a number of years, and, in more recent years, other States have also introduced bulk systems. The various bodies concerned with the administration of bulk handling in the various States are:—Grain Elevators Board of New South Wales, Victorian Grain Elevators Board, State Wheat Board (Queensland), South Australian Co-operative Bulk Handling Ltd., Co-operative Bulk Handling Ltd. (Western Australia), and the Tasmanian Government.

The table below sets out the bulk handling capacities of the several States and Australia for the years 1958-59 to 1962-63.

**WHEAT: TOTAL CAPACITY OF BULK HANDLING FACILITIES(a)**  
(’000 bushels)

State	1958-59	1959-60	1960-61	1961-62	1962-63
New South Wales .. ..	69,950	73,420	73,440	75,270	79,486
Victoria .. ..	70,052	71,870	72,206	72,808	78,219
Queensland .. ..	4,142	4,196	6,216	7,486	8,730
South Australia .. ..	10,550	12,950	14,290	17,380	25,600
Western Australia .. ..	79,798	82,236	94,257	97,356	105,384
Tasmania .. ..	640	960	960	960	960
<b>Australia .. ..</b>	<b>235,132</b>	<b>245,632</b>	<b>261,369</b>	<b>271,260</b>	<b>298,379</b>

(a) Includes terminals, sub-terminals and country installations.

Particulars of the operation of the bulk handling and storage systems in each State are set out on pages 916 and 917 of Official Year Book No. 48.

(e) *International Wheat Agreements.* Details of the first and second International Wheat Agreements operative from 1st August, 1949, to 31st July, 1953, and from 1st August, 1953, to 31st July, 1956, respectively, were published in Official Year Book No. 42 (see pp. 840-1) and previous issues. Details of the third and fourth International Wheat Agreements which covered the period from 1st August, 1956, to 31st July, 1959, and 1st August, 1959, to 31st July, 1962, were published in Official Year Book Nos. 43 (p. 836) and 48 (p. 906), respectively.

A fifth International Wheat Agreement, ratified by the required number of wheat exporting and importing countries, came into force on 1st August, 1962. The new Agreement covers the three-year period from 1st August, 1962, to 31st July, 1965.

The new Agreement, negotiated at an international conference convened by the United Nations, continues the basic arrangements covered by previous Agreements. The Agreement seeks to obtain an element of stability in world wheat marketing by providing that a significant proportion of wheat entering international trade will be bought and sold at prices within a prescribed price range. The maximum and minimum prices fixed under the Agreement are expressed in terms of "Canadian currency per bushel, at the parity of the Canadian dollar determined for the purposes of the International Monetary Fund". Member exporting countries compete to supply at prices within the prescribed range, which is from 202.5 cents or about 18s. 2d. current Australian currency to 162.5 cents, or about 14s. 6d. per bushel. The maximum of the range is based on the price of Canada's No. 1 Northern

Manitoba wheat in bulk in store at Fort William/Port Arthur. The minimum f.o.b. price for each exporter is the equivalent of the c. and f. price in the United Kingdom of the minimum price of Canada's No. 1 Northern Manitoba wheat in bulk in store at Fort William/Port Arthur, using currently prevailing transportation costs and exchange rates. In determining these prices, allowance is made for such differences in quality as may be agreed between the exporting and importing countries concerned.

Member importing countries have undertaken to buy each year from member exporting countries a stated percentage of their total commercial requirements at prices within the agreed range.

The new Agreement empowers the International Wheat Council to make an annual review of the world wheat situation, including the international implication of national policies in respect to wheat production, stocks and marketing, and the disposal of wheat surpluses on non-commercial terms.

Provision has also been made for the right of appeal against excessive discounts from the minimum price on the basis of differences in quality between the basic wheat—Canada's No. 1 Northern Manitoba wheat—and the wheat supplied by other member importing countries.

Member countries of the fifth International Wheat Agreement are as follows.

*Exporters.* Argentina, Australia, Canada, France, Italy, Mexico, Spain, Sweden, Union of Soviet Socialist Republics, and the United States of America.

*Importers.* Austria, Belgium and Luxembourg, Brazil, Costa Rica, Cuba, Dominican Republic, El Salvador, Federal Republic of Germany, Federation of Rhodesia and Nyasaland, Finland, Greece, Iceland, India, Indonesia, Ireland, Israel, Japan, Liberia, Libya, the Netherlands, New Zealand, Nigeria, Norway, Peru, Philippines, Portugal, Republic of Korea, Saudi Arabia, Sierra Leone, South Africa, Switzerland, United Arab Republic, United Kingdom, Vatican City, Venezuela, and Western Samoa.

(iv) *Research into the Wheat Industry.* The extension and growth of the wheat industry in the past has been made possible to a large extent through research into new varieties of seed, crop rotation and fertilizer treatments by governmental, university and private research organizations. In recent years, there has been a growing awareness of the value of this research, and funds are being raised by a direct levy on the growers' returns.

In 1957, the Commonwealth Parliament passed legislation providing for a levy of a farthing a bushel on wheat handled by the Australian Wheat Board. This money, contributed by the growers, is to be spent by the Wheat Research Committees set up in the wheat-growing States. These Committees, which consist of representatives of wheatgrowers, universities and State Departments of Agriculture, also received a total of £284,000 under the provisions of the *Wheat Acquisition (Undistributed Moneys) Act 1958*.

The Commonwealth Government has undertaken to supply additional funds for research (with a maximum of £1 for £1 against the growers' contribution) and has set up the Wheat Industry Research Council to make recommendations on the appropriate expenditure of the Commonwealth contribution.

The Council, at its inaugural meeting in February, 1958, considered that possible avenues of research would include the breeding of better varieties, cereal chemistry, soil fertility, mechanization, the industry's cost structure and marketing problems.

The Council and the State Committees have incurred an estimated expenditure of £933,507 up to the end of June, 1961, including grants to the Commonwealth Scientific and Industrial Research Organization, State Departments of Agriculture, universities and agricultural colleges.

(v) *Wheat Farms: Number and Classification by Activity.* (a) *Number.* Particulars of the number of farms growing 20 acres and upwards of wheat for grain during each of the years 1957-58 to 1961-62, are shown in the following table. A farm worked on the share system or as a partnership is included as one holding only.

### NUMBER OF FARMS GROWING 20 ACRES AND UPWARDS OF WHEAT FOR GRAIN

State or Territory	1957-58	1958-59	1959-60	1960-61	1961-62
New South Wales .. ..	12,111	14,997	16,798	16,959	17,489

<b>Australia .. ..</b>	<b>40,209</b>	<b>44,819</b>	<b>48,395</b>	<b>49,503</b>	<b>52,023</b>

(b) *Size Classification of Wheat Holdings.* In Australia, there exists a widespread combination of wheat growing with other rural activities. The next table provides a classification of rural holdings by the area of wheat grown and by type of activity.

Further details of definitions, and of classifications by States, are available in the bulletins *Classification of Rural Holdings by Size and Type of Activity, 1959-60, No. 1 to No. 6.*

### RURAL HOLDINGS, BY AREA OF WHEAT FOR GRAIN AND TYPE OF ACTIVITY: NUMBER OF HOLDINGS, AUSTRALIA, 1959-60

Area of wheat for grain (acres)	Type of activity									
	Sheep- cereal grain	Sheep	Cereal grain	Beef cattle	Dairying	Vine- yards	Fruit (other than vine)	Vegetables		Poultry
								Potatoes	Other and mixed

(vi) *Varieties of Wheat Sown.* (a) *General.* The breeding of wheat suitable to local conditions has long been established in Australia. Farrer (1845-1905) did invaluable work in pioneering this field, and the results of his labour and the continued efforts of those who have followed him have proved of immense benefit to the industry. Their efforts have resulted in the development of disease-resistant varieties, better average yields, and a greater uniformity of sample, with which have accrued certain marketing advantages, as well as an improvement in the quality of wheat grown. More than 1,000 different varieties of Australian wheats have been catalogued by the Commonwealth Scientific and Industrial Research Organization, but the number of principal varieties grown during each season is restricted to about 45.

(b) *States, 1961-62.* The principal varieties of wheat sown and the percentage of each to the total area sown in the five main wheat-producing States of Australia were as follows (New South Wales 1960-61 season; other States 1961-62 season):—New South Wales, Glenwari (20.4), Bencubbin (10.1), Gabo (9.0); Victoria, Insignia (47.1), Pinnacle (23.7), Olympic (16.7); Queensland, Festival (36.2), Spica (23.4); South Australia, Insignia (29.4), Gabo (19.7), Sabre (13.2); and Western Australia, Gabo (37.3), Insignia (16.2), Insignia 49 (11.2). A detailed table of wheat varieties sown in the latter four States appears in the annual bulletin: *The Wheat Industry*, No. 102, January, 1963.

(vii) *Area, Production and Yield per Acre.* (a) *Summary.* Prominent factors in the early development were the increase in population following the discovery of gold and the redistribution of labour after the surface gold had been won. The economic depression of 1893 interrupted its progress, but its subsequent recovery was assisted by the invention of mechanical appliances, the use of superphosphates as an aid to production, and the introduction of new and more suitable varieties of wheat for Australian conditions. The establishment of closer settlement schemes and the settling of returned soldiers and others on the land were additional factors in its expansion.

The area, production and yield per acre of wheat for grain in each State are shown below for the years 1957-58 to 1961-62 in comparison with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

## WHEAT FOR GRAIN: AREA, PRODUCTION AND YIELD PER ACRE

1960-61 .. ..	20.8	25.3	15.9	23.6	15.9	21.4	28.5	20.4
1961-62 .. ..	17.4	20.0	16.0	15.2	15.0	22.2	22.7	16.8

(a) 60 lb. per bushel.

A graph showing the area sown to wheat for grain in Australia since 1900-1 appears on page 993, while a map showing the distribution of areas growing wheat for grain throughout Australia in 1954-55 appeared on page 833 of Official Year Book No. 43. Similar maps showing the distribution of wheat areas in 1924-25, 1938-39 and 1947-48 appeared respectively in Official Year Books No. 22, page 695, No. 34, page 451 and No. 39, pages 977-8.

(b) *Production.* Apart from the variations in the area sown, the size of the wheat harvest in Australia is largely determined by the nature of the season, resulting in considerable year-to-year fluctuations in production.

The main wheat-producing States of Australia are New South Wales, Victoria, South Australia and Western Australia. Queensland production normally approaches local demands, but Tasmania imports wheat from the mainland to satisfy its needs, though it exports flour made from local wheat which is particularly suitable for biscuits.

Production of wheat in 1961-62 at 247,178,000 bushels was 10 per cent. less than in the previous season, with the major States except Queensland and Western Australia recording decreases. The most notable decreases in 1961-62 compared with 1960-61 occurred in Victoria and South Australia, where production diminished by 10,708,000 bushels (16 per cent.) and 12,541,000 bushels (27 per cent.), respectively.

(c) *Yield per Acre.* Short-term variations in yield per acre are due chiefly to seasonal influences. High yields per acre for Australia for single seasons since 1901 were obtained in 1920-21, 16.1 bushels; in 1942-43, 16.8 bushels; in 1949-50, 17.8 bushels; in 1952-53, 19.1 bushels; in 1953-54, 18.4 bushels; in 1955-56, 19.2 bushels; in 1958-59, 20.7 bushels (a record); in 1959-60, 16.3 bushels; and in 1960-61, 20.4 bushels. The yield per acre for 1961-62 was 16.8 bushels.

(d) *Decennial Averages, 1861-70 to 1951-60.* The following table shows the average area, production and yield per acre for decennial periods since 1861 together with similar details for the latest season, 1961-62. Repeated cropping and short rotations (mainly in the eastern States) are believed to have led to the decline in yield to 1900, while fallowing and the widespread use of artificial fertilizers contributed to the increased yields in the decade following. The increase in yield since 1950 has been generally ascribed to the impact of improved pastures and ley-farming (broadly, the alternation of crops and pastures) upon soil fertility in wheat-growing areas.

#### WHEAT FOR GRAIN: AVERAGE AREA AND PRODUCTION, AUSTRALIA

Period	Area	Production	Yield per acre
Yearly average—	'000 acres	'000 bushels	Bushels
1861-70 .. .. .	831	10,622	12.8
1871-80 .. .. .	1,646	17,711	10.8
1881-90 .. .. .	3,258	26,992	8.3
1891-1900 .. .. .	4,087	29,934	7.3
1901-10 .. .. .	5,711	56,058	9.8

Year—			
1961-62 .. .. .	14,723	247,178	16.8

(viii) *Price of Wheat.* (a) *Home Consumption.* The prices charged by the Australian Wheat Board for wheat sold to millers for gristing into flour for consumption in Australia and for wheat sold as stock feed were as follows:—year ended 30th November, 1959, 14s. 8d.; 1960, 15s. 0d.; 1961, 15s. 4d.; 1962, 15s. 10d.; and 1963, 15s. 11½d. These prices include a loading to meet freight charges incurred on wheat shipped to Tasmania (2d. from 1958 to 1961; 1d. in 1962; and 1½d. in 1963).

(b) *Export Wheat Prices.* The Wheat Board's monthly basic export selling prices for f.a.q. bulk wheat f.o.b. basis, both for wheat sold under the International Wheat Agreement and for "free" wheat sold on the open market, fell in the following ranges:—season ended 31st July, 1959, 13s. 4d. to 14s. 6½d.; 1960, 13s. 3d. to 13s. 6d.; 1961, 13s. 5d. to 13s. 9d.; 1962, 13s. 10½. to 14s. 10½d. Actual selling prices have been lower than the basic prices in some cases, particularly where other exporting countries enjoy a geographical freight advantage.

The 1959 International Wheat Agreement set the maximum price at 200 cents a bushel and the minimum at 150 cents for f.a.q. wheat sold under the Agreement. Under the current 1962 Agreement operative from 1st August, 1962 (see paragraph 1 (iii) (e), p. 1014), the agreed price range is between 202.5 cents and 162.5 cents. Directly converted into Australian currency these limits are approximately 18s. 2d. and 14s. 6d. a bushel respectively.

Details of export wheat prices in previous years, including those received for wheat sold under the terms of the 1949-1953 International Wheat Agreement, are given in Official Year Book No. 40, pages 849-50, and statistical bulletin: *The Wheat Industry, Australia*, No. 95 of April, 1959, and in previous issues of these publications.

(ix) *Value of the Wheat Crop.* The estimated gross value of the wheat crop in each State and in Australia during the season 1961-62 and the value per acre are shown below.

#### WHEAT FOR GRAIN: VALUE OF CROPS(a), 1961-62

Particulars		N.S.W.	Victoria	Q'land	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value	£'000	58,371	42,697	9,035	25,757	50,012	276	24	186,172
Value per acre ..	£	13.0	15.0	12.1	11.5	11.4	17.8	16.9	12.6

(a) Gross value of total crop, including wheat used for seed and for stock feed on farms. Also includes payment of £7,288,000 by the Commonwealth Government.

(x) *Production and Disposal of Wheat in Australia.* In the following tables, details are given of Australian Wheat Board transactions and of total production and disposal of wheat during each of the years ended 30th November, 1958 to 1962. (For particulars of production and yield from 1935-36 see graphs, p. 994.)

(a) *Wheat Acquired.* Particulars of wheat acquired by the Australian Wheat Board from the 1958-59 to 1961-62 harvests are shown in the following table.

#### AUSTRALIAN WHEAT BOARD: WHEAT ACQUIRED

('000 bushels)

Pool	Harvest	New South Wales	Victoria	Queensland	South Australia	Western Australia	Tasmania	Australia
21 .. ..	1957-58	4,617	29,547	5,247	12,535	29,306	74	81,326

(d) Subject to additional £8,024,000 (of which the Commonwealth Government provided £3,022,000) withdrawn from Wheat Prices Stabilization Fund and payment of £187,000 to Wheat Industry Research Fund. (e) Subject to additional £8,884,000 provided by the Commonwealth Government and payment of £261,000 to Wheat Industry Research Fund. (f) Subject to additional £7,288,000 provided by the Commonwealth Government and payment of £233,000 to Wheat Industry Research Fund.

NOTE.—Details of earlier pools will be found in previous issues of the Year Book.

(xi) *Imports of Wheat.* Wheat and flour have been imported in substantial quantities on three occasions since 1900; in 1902-3, the wheat harvest was only 12,378,000 bushels, and wheat and flour representing 12,468,000 bushels of wheat were imported. An equivalent of 7,279,000 bushels was imported in 1914-15 to supplement the yield of 25 million bushels produced in that season. Owing to drought conditions in 1957-58, wheat supplies were insufficient for local requirements and, as a result, 1,485,000 bushels were imported from Canada in 1958. No wheat has since been imported.

(xii) *Exports of Wheat and Flour.* Statistics in this sub-paragraph relate to years ended 30th June. Export figures relate to the exports of Australian produce only.

(a) *Quantity and Value.* The following table shows particulars of the exports of wheat and flour and the total of both, in terms of wheat, for each of the years 1957-58 to 1961-62.

**WHEAT AND FLOUR: EXPORTS FROM AUSTRALIA**

Year	Quantity				Value		
	Wheat	Flour		Total (in terms of wheat)	Wheat	Flour(a)	Total
		As flour (a)	In terms of wheat				
	'000 bushels	Short tons	'000 bushels	'000 bushels	£A.'000 f.o.b.	£A.'000 f.o.b.	£A.'000 f.o.b.
1957-58 .. ..	39,572	479,985	22,223	61,795	28,494	15,059	43,553
1958-59 .. ..	54,626	467,697	21,654	76,280	38,381	14,001	52,382
1959-60 .. ..	91,244	557,999	25,835	117,079	61,680	15,811	77,491
1960-61 .. ..	152,981	679,179	31,446	184,427	102,426	19,637	122,063
1961-62 .. ..	203,137	602,665	27,903	231,040	142,446	18,164	160,610

(a) White flour, sharps and wheatmeal for baking.

NOTE.—One short ton (2,000 lb.) of flour is taken to be equivalent to 46.3 bushels of wheat.

(b) *Destination of Wheat.* The following table shows the exports of wheat to various countries for each of the five years ended 1961-62.

## WHEAT: EXPORTS FROM AUSTRALIA

(xiii) *World Area and Production of Wheat.* The figures in the following table of the world area and production of wheat by principal countries and by continents have been compiled from the statistics published by the Foreign Agricultural Service of the United States Department of Agriculture. Years shown refer to years of harvest in the northern hemisphere. Harvests of the northern hemisphere countries are combined with those of the southern hemisphere which immediately follow; thus, the crop harvested in the northern hemisphere in 1961 is combined with preliminary forecasts for the southern hemisphere harvests which began late in 1961 and ended early in 1962.

(a) Figures refer to harvested areas as far as possible. For Australia, area sown is shown.  
 (b) Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown. (c) Estimated.

(xiv) *Principal Exporting and Importing Countries.* The following table shows the quantities of wheat traded by the chief exporting and importing countries for the years 1959–60 to 1961–62, based on statistics recently published by the Food and Agriculture Organization of the United Nations.

While Australia's production of wheat averages less than 3 per cent. of the world's total, its exports account for a much higher proportion of the total quantities shipped. In 1961–62, for example, Australia's share of world wheat exports amounted to 14.5 per cent.

(a) Preliminary. (b) Unofficial estimate. (c) Total exports do not necessarily agree with total imports because of the time lag between shipments and arrivals. (d) Less than .05 of the unit shown.

NOTE.—One short ton (2,000 lb.) of flour is taken to be equivalent to 46.3 bushels of wheat.

Estimates of exports to, and imports from, the U.S.S.R. and Mainland China in the table above are based entirely on available trade returns of the trading partners outside the Sino-Soviet bloc. No account is taken of trade within this bloc because of the incomplete nature of the data.

2. Oats.—(i) *General.* This cereal is widely grown in all agricultural areas which have autumn, winter and spring rainfall, and is tolerant to wet conditions and heavy soils. It has excellent feed value, and produces a higher yielding crop than other winter cereals. It needs less cultivation, but requires ample fertilizer. Oats has a variety of uses: as a pasture plant when rough sown into stubble or heavy clover pastures, as silage if cut before maturity, as a hay crop when mown and baled or cut for chaff, or as a grain when stripped (the stubble then being grazed off). The grain is sold on a "fair average quality" basis through voluntary pools in Victoria, South Australia and Western Australia. Excessive bulk in the husk and a fluctuating export price limit the extent of oversea trade.

(ii) *Area, Production and Yield per Acre.* Oats is usually next in importance to wheat among the grain crops cultivated in Australia. However, while wheat grown for grain in 1961-62 accounted for 50 per cent. of the area of all crops, oats grown for grain represented only 10 per cent. The area, production and yield per acre of oats in each State are shown below for the years 1957-58 to 1961-62 in comparison with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

### OATS FOR GRAIN: AREA, PRODUCTION AND YIELD PER ACRE

1958-59 .. ..	24.5	24.0	21.3	24.9	17.0	22.1	26.6	21.9
1959-60 .. ..	19.6	18.9	18.4	5.0	15.8	23.2	24.8	15.5
1960-61 .. ..	23.5	24.7	15.0	22.4	16.4	16.8	20.9	20.9
1961-62 .. ..	18.5	21.1	15.4	13.6	16.4	21.8	18.7	17.8

(a) Less than 500 acres.

(b) 40 lb. per bushel.

(c) Less than 500 bushels.

Graphs showing the area sown to oats and production of oats in Australia appear on pages 993 and 995 respectively.

In 1958-59, extremely favourable seasonal conditions for all cereal crops were experienced, and production of oats reached the record level of 86,905,000 bushels, the previous record having been 56,487,000 bushels in 1955-56.

A record yield was also established in 1958-59 at 21.9 bushels per acre. The next highest yield was 19.3 bushels per acre in 1947-48. The lowest yield recorded was 4.4 bushels per acre in the abnormally dry season of 1944-45.

(iii) *Price of Oats.* The average wholesale price in the Melbourne market for oats of good milling quality was 7s. 0½d. a bushel in 1961-62, compared with 7s. 1½d. in 1960-61.

(iv) *Value of Oat Crop.* The estimated gross value of the oat crop in each State for the 1961-62 season and the value per acre were as follows.

#### OATS: VALUE OF CROP, 1961-62

Particulars	N.S.W.	Victoria	Q'land	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £'000	4,959	5,732	180	1,313	7,525	286	6	20,001
Value per acre .. £	7.0	7.4	6.7	4.1	6.1	10.6	6.9	6.4

(v) *Exports.* The production of oats in Australia is sufficient to allow for an export trade which fluctuates with the incentive offered by overseas prices. The quantities and values of Australian produced oats exported from Australia during the years 1957-58 to 1961-62 are shown below.

#### OATS: EXPORTS, AUSTRALIA

Particulars	1957-58	1958-59	1959-60	1960-61	1961-62
Quantity .. .. '000 bus.	2,240	17,557	11,969	19,005	19,064
Value .. .. £A.'000 f.o.b.	1,008	6,512	5,031	6,854	7,479

In 1961-62, the principal countries of destination were the Federal Republic of Germany (9,728,000 bushels), the Netherlands (4,647,000 bushels), Republic of China (Mainland) (2,615,000 bushels), and the United Kingdom (1,118,000 bushels). Imports of oats into Australia are not recorded separately.

(vi) *Oatmeal and Other Oat Products.* In 1961-62, the production of oatmeal was 15,611 tons for porridge and 18,616 tons for other purposes. This was equivalent to about 3,422,800 bushels of oats.

(vii) *World Production.* The world's production of oats for the year 1961, according to figures released by the United States Department of Agriculture, amounted to 3,505 million bushels, harvested from 99.1 million acres, representing an average yield of 35.4 bushels per acre. This compared with an estimated production in the previous year of 3,955 million bushels from an area of 105.5 million acres and an average yield of 37.5 bushels an acre.

3. **Barley.**—(i) *General.* This cereal contains two main groups of varieties: 2-row and 6-row. The former is generally, but not exclusively, preferred for malting purposes.

Barley was formerly stubble-sown, but is now grown principally on pasture land worked up early in the year of sowing. In this way, it forms an important phase in the rotation of the land. Like oats, it may also be sown for fodder production or for grain. When sown for fodder, sowing may take place either early or late in the season, as it has a short growing period. It may thus provide grazing or fodder supplies when other sources are not available. Barley grain may be crushed to meal for stock (especially pigs) or sold for malting. Crops sown for malting purposes require well-worked, weed-free paddocks of even soil, and are thus restricted to specific districts.

The main barley-growing areas in Australia are situated in Victoria (Mallee, North Wimmera, Mt. Gambier region and Geelong) and South Australia (Eyre and Yorke Peninsulas). In Western Australia, it is grown in the higher rainfall areas on the western edge of the wheat belt.

(ii) *Barley Boards.* The bulk of the barley crop in the various States is acquired and marketed by grower-controlled boards. Pooled returns from sales are distributed to growers at standard rates for the individual grades and varieties delivered. The Victorian and South Australian crops are marketed by the Australian Barley Board (a joint board established by the two State governments) and the Queensland and Western Australian Barley Boards handle the crops of their respective States.

(iii) *Australian Barley Board Operations.* Particulars for the proportion of barley production which was received by the Australian Barley Board (for Victoria and South Australia), together with details of quantity sold, advances and total payments to growers, are presented below.

#### AUSTRALIAN BARLEY BOARD: BARLEY RECEIVED, SOLD, ETC.

Pool			Quantity received	Quantity sold(a)	Total advances made per bushel on 2-row No. 1 Grade less freight	Total net payments to growers
			'000 bushels	'000 bushels	s. d.	£'000
No. 19 (1957-58 Crop)	..	..	18,023	18,195	11 9. 61	9,152
" 20 (1958-59 "	)	..	42,550	42,560	10 10. 1	19,617
" 21 (1959-60 "	)	..	11,773	11,797	10 0. 51	4,904
" 22 (1960-61 "	)	..	44,624	44,680	9 3. 26	16,989
" 23 (1961-62 "	)	..	20,081	20,059	(b) 10 6	8,596

(a) Includes surplus in out-turn except for No. 23 Pool, for which this surplus has not yet been determined.

(b) As at 15th May, 1963. At that date, it was estimated that the amount still to be paid to growers was 13.28d. per bushel.

(iv) *Area, Production and Yield per Acre.* There has been a substantial increase in the area of barley sown for grain in recent years (particularly in Western Australia and Queensland), and in 1960-61 the area sown reached the record level of 2,830,000 acres. The area sown in 1961-62, at 2,383,000 acres, was 16 per cent. less than the area in 1960-61. The production of barley for grain in 1961-62, at 41,504,000 bushels, was 39 per cent. less than the record production of 67,970,000 bushels in 1960-61. The area, production and yield per acre of barley for grain in the several States for the years 1957-58 to 1961-62, compared with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59, are shown in the following table.

## BARLEY FOR GRAIN: AREA, PRODUCTION AND YIELD PER ACRE

Total ..	20.6	20.6	20.0	16.8	14.8	32.4	..	17.4

(a) Less than 500 acres.

(b) 50 lb. per bushel.

(c) Less than 500 bushels.

For Australia (excluding Tasmania), 75 per cent. of the area of barley for grain in 1961-62 was sown with 2-row barley, while the remainder consisted of 6-row varieties. The proportion, however, varied considerably in the several States. The utilization of barley during the season ended November, 1962, was as follows:—exports, 18,491,000 bushels; malting and distilling, 10,301,000 bushels; pearl barley, 143,000 bushels; seed and stock feed, 8,853,000 bushels.

The following table sets out the acreage and production of 2- and 6-row barley in Australia during the seasons 1957-58 to 1961-62 and the averages for the three years ended 1938-39, 1948-49 and 1958-59.

## BARLEY, 2- AND 6-ROW: AREA AND PRODUCTION, AUSTRALIA

Period	Area ( <sup>'000</sup> acres)			Production ( <sup>'000</sup> bushels)(a)			Yield per acre (bushels)(a)		
	2-row	6-row	Total	2-row	6-row	Total	2-row	6-row	Total
Average for three years ended—

1961-62 ..	(b)1,777	(b)587	2,383	b 31,739	(b)9,158	41,504	(b)16.1	(b)15.6	17.4

(a) 50 lb. per bushel.

(b) Excludes Tasmania.

A graph showing the production of barley in Australia since 1935-36 appears on page 995.

(v) *Prices.* The average wholesale price for 2-row English malting barley in the Melbourne market during 1961-62 was 14s. 9d. compared with 14s. 11d. in 1960-61.

(vi) *Value of Barley Crop.* The estimated gross value of the barley crop in each State for the 1961-62 season and the value per acre are shown in the following table.

## BARLEY FOR GRAIN: VALUE OF CROP, 1961-62

Particulars		N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Aust.
Aggregate value ..	£'000	2,428	2,450	1,797	11,476	3,415	289	21,855
Value per acre ..	£	12.1	10.9	10.2	9.0	6.9	15.4	9.2

(vii) *Exports.* Exports of barley during the five years ended 1961-62 averaged 27,907,000 bushels. South Australia was the principal exporting State, while the United Kingdom, Federal Republic of Germany, Republic of China (Mainland), the Netherlands and the United States of America were the principal countries to which barley was shipped. Particulars of exports of Australian produced barley for the years 1957-58 to 1961-62 are shown in the following table.

## BARLEY: EXPORTS, AUSTRALIA

Particulars		1957-58	1958-59	1959-60	1960-61	1961-62
Quantity ..	'000 bus.	19,265	29,924	25,013	33,900	31,435
Value ..	£A.'000 f.o.b.	9,474	16,898	11,541	14,329	14,954

Imports of barley into Australia are not recorded separately.

In addition to exports of barley grain, there are also exports of Australian pearl and Scotch barley, the total for 1961-62 amounting to 1,349,728 lb., valued at £23,469, consigned mainly to the United Kingdom.

(viii) *Malt.* (a) *Production.* Details of the quantity of grain used and the production of barley malt in the years 1957-58 to 1961-62 are given in the following table.

## BARLEY MALT: GRAIN USED AND MALT PRODUCED, AUSTRALIA

Particulars		1957-58	1958-59	1959-60	1960-61	1961-62
Grain used ..	'000 bus.(a)	8,508	8,198	8,539	9,020	10,312
Malt produced..	'000 bus.(b)	8,197	8,108	8,435	9,015	10,207

(a) 50 lb. per bushel.

(b) 40 lb. per bushel.

(b) *Exports.* Since 1952-53, the production of malt in Australia has been sufficient to meet local requirements and to provide a margin for export. Exports of Australian produce amounting to 2,055,445 bushels (value £1,985,109) and 2,871,668 bushels (value £2,712,157) were recorded in 1960-61 and 1961-62 respectively.

(ix) *World Production.* In comparison with the barley production of other countries, that of Australia is extremely small. The main producers in 1961 were the United States of America, France, and the United Kingdom. China is also normally a major producer, but details for 1961 are not available. Australian production in that year was approximately two per cent. of the world total.

According to estimates made by the United States Department of Agriculture, world production of barley in the year 1961 amounted to 3,410 million bushels harvested from 141.2 million acres, equivalent to a yield per acre of 25.1 bushels. This compared with the production of 3,560 million bushels in the previous year from 142.0 million acres, and a yield per acre of 25.1 bushels.

4. *Sorghum for Grain.*—Grain sorghum is similar to maize in that it is a perennial and summer grower, and is drought-resistant and palatable to stock. It requires a summer rainfall. The growing of this crop for grain on an extensive scale is a comparatively recent development in Australia and, as with other cereals, operations are highly mechanized.

The climatic conditions of Queensland and northern New South Wales are particularly suited to the growing of sorghum, and so far development has been restricted mainly to these areas, more particularly to Queensland. The grain produced is fed to livestock and has become an important source for supplementing other coarse grains for the feeding of live-stock. Other sorghums are grown in Australia mainly as green fodder, hay and silage (sweet sorghums and Sudan grass) and for the production of brush for broom manufacture (broom millet).

In Queensland, the growing of grain sorghum is concentrated in the Burnett, Dawson-Callide areas and in the central highlands. In New South Wales, the north western slopes and Murrumbidgee Irrigation Area are the main areas. This crop is also suitable for the semi-tropical areas of Northern Territory and the Kimberleys.

Particulars of the area and production of sorghum grown for grain in recent years are given in the following table.

GRAIN SORGHUM: AREA, PRODUCTION AND YIELD PER ACRE

Season	Area			Production(a)			Yield per acre(a)		
	N.S.W.	Q'land	Aust. (b)	N.S.W.	Q'land	Aust. (b)	N.S.W.	Q'land	Aust. (b)

1961-62 ..	70,134	292,397	362,666	1,307,508	8,053,590	9,361,244	18.6	27.5	25.8

(a) 60 lb. per bushel.

(b) Includes small areas sown and quantities produced in other States.

5. *Maize for Grain.*—(i) *General.* Like sorghum, maize is a summer cereal demanding specific soil and climatic conditions. It is grown for grain chiefly in the south-east and Atherton Tablelands of Queensland and the north coast and northern tablelands of New South Wales. The area so cropped in these States during 1961-62 season was 98 per cent. of the total for Australia. On the Atherton Tablelands in Queensland, and generally in New South Wales and Victoria, it provides a stock feed for dairy cattle, fat stock and pigs. In times of drought, it is also used as a sheep feed. In all States, except South Australia, however, this crop is grown to some extent for green fodder and silage, particularly in connexion with the dairying industry. There is practically no difference between grain and fodder varieties.

There has been a considerable increase in recent years in the growing of maize from hybrid strains of seed. Varieties have been developed which are capable of producing yields per acre considerably in excess of the older open pollinated types. The expansion in areas sown to hybrid maize has led to a parallel development in the specialized industry of growing hybrid strains for seed.

(ii) *Area, Production and Yield per Acre.* The area, production and yield per acre of maize for grain in each State for the years 1957-58 to 1961-62 compared with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59 are given in the following table. Separate details for hybrid and other varieties are shown for New South Wales, Victoria and Queensland for 1961-62.

(a) Not available for publication. (b) Incomplete. See footnotes to individual States.  
(c) 56 lb. per bushel. (d) Less than 500 bushels.

The average yield for Australia for the five-year period ended 1961-62 was 34.6 bushels per acre. Among principal producing countries during 1961, the United States of America averaged 61.8 bushels per acre and Italy 47.0 bushels.

(iii) *Price of Maize.* The average wholesale price of maize in the Melbourne market in 1961-62 was 18s. 1½d. a bushel compared with 20s. 4½d. in 1960-61.

(iv) *Value of Crop.* The estimated gross value of the crop in each State for the 1961-62 season and the value per acre were as follows.

## MAIZE FOR GRAIN: VALUE OF CROP, 1961-62

Particulars	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Aust.
Aggregate value .. £'000	1,830	124	3,330	..	1	..	5,285
Value per acre .. £	35.6	37.5	21.4	..	33.8	..	25.1

(v) *Exports of Maize and Maize Products.* Details of exports of Australian-produced maize for the five years ended 1961-62 are shown on the next page.

## MAIZE: EXPORTS, AUSTRALIA

Particulars				1957-58	1958-59	1959-60	1960-61	1961-62
Quantity	..	..	.. '000 bus.	48	15	22	3	2
Value..	..	..	£A.'000 f.o.b.	30	10	15	4	3

Imports of maize into Australia are not recorded separately.

Exports of cornflour in 1961-62 were 16,100 lb., valued at £1,033, compared with 129,700 lb. valued at £2,652 in 1960-61. These figures include some quantities of "cornflour" made from wheat. Imports of cornflour into Australia are not recorded separately.

(vi) *World Production.* According to figures issued by the United States Department of Agriculture, world production of maize in the year 1961 amounted to 7,430 million bushels, harvested from 240 million acres, giving an average yield per acre of 31.0 bushels. This compared with production in the previous year of 7,595 million bushels from 244 million acres, and an average of 31.1 bushels per acre.

The United States of America is the most important maize-producing country in the world, and during the three years ended 1961 the area sown to maize in that country averaged 67 million acres or 28 per cent. of the world total. During the same period, production averaged 3,785 million bushels or about 51 per cent. of the world total.

6. Rice.—(i) *General.* The principal rice-growing areas of the world are confined almost entirely to Asia, although limited quantities are grown in other countries. In Australia, rice was first cultivated at the Yanco Experimental Farm in New South Wales, but it was not grown commercially until 1924-25, when 16,240 bushels were produced from 153 acres. Favoured by high average yields and protected by tariff, rice culture made rapid progress in the Murrumbidgee Irrigation Area until local requirements were met and a surplus became available for export. The acreage sown in this area is controlled, as the quantity of water available is limited.

Until recent years, rice-growing in Australia was practically confined to the Murrumbidgee Irrigation Area in New South Wales. However, there is now some experimental rice-growing in Western Australia and the Northern Territory, but particulars are not available for publication. Small quantities have also been produced in Queensland in some years.

(ii) *Area, Production and Exports.* Details relating to area, production, and Australian-produced exports for the years 1957-58 to 1961-62 are shown in the following table.

## RICE: AREA, PRODUCTION AND EXPORTS, AUSTRALIA(a)

Season	No. of holdings growing rice(b)	Area	Production (paddy rice)		Average yield (paddy) per acre	Exports(c)	
			Quantity	Gross value(d)		Un-cleaned	Cleaned
		Acres	'000 bushels (e)	£'000	Bushels (e)	Cwt.	Cwt.
1957-58 ..	743	46,774	5,658	4,045	121.0	211,315	418,372
1958-59 ..	775	47,054	6,619	4,731	140.7	182,583	704,360
1959-60 ..	848	48,950	6,732	4,450	137.5	265,449	1,055,821
1960-61 ..	787	46,117	6,001	4,125	130.1	359,441	876,175
1961-62 ..	875	50,185	7,045	3,832	140.4	280,540	748,920

(a) Particulars of area and production for Western Australia and Northern Territory are not available for publication, and are excluded. (b) Twenty acres or more in area. (c) Imports into Australia are not recorded separately. (d) Excludes the value of straw. (e) 42 lb. per bushel.

The bulk of Australia's exports of rice in 1961-62 was shipped to Papua and New Guinea, the Pacific Islands and the United Kingdom.

## § 4. Fodder Crops

1. Hay.—(i) *General.* Because of the comparatively unreliable nature of rainfall in Australian agricultural and pastoral areas, hay as a fodder crop occupies a position of importance. In 1961–62, hay represented 8 per cent. of the total area of crops.

Up to 1946–47, hay, in terms of area, was second only to wheat for grain, but in more recent years it has been supplanted by green fodder (for feeding-off), oats for grain and barley for grain.

Hay is generally considered to include cereal hay, meadow hay and lucerne hay. Cereal crops cut early for hay contain a higher level of protein than those cut late.

In most European countries, hay is made almost entirely from meadow pastures, but in Australia a very large proportion is made from cereals and lucerne, the hay being stored loose, in sheaves or baled. Because of its bulk, hay is usually produced for individual or local use, except in times of drought, when large inter-regional transfers may take place.

Meadow hay requires greater care in preparation than cereal hay. Baling must be spaced carefully behind mowing to ensure that the bales are dry enough to prevent moulding, but not so dry as to result in excessive leaf loss. The leaves contain the bulk of the protein. Lucerne hay requires similar attention.

(ii) *Area and Production.* For a number of reasons, particularly the variations in the relative prices of grain and hay and whether the season is favourable or not for a grain crop, the area of hay is apt to fluctuate considerably. The area, production and yield per acre of hay of all kinds in the several States during the years 1957–58 to 1961–62 and the averages for the three-year periods ended 1938–39, 1948–49 and 1958–59 are shown below.

## HAY: AREA, PRODUCTION AND YIELD PER ACRE

Season	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust. (a)
AREA ('000 ACRES)

1961–62 ..	1.55	1.72	2.22	1.37	1.35	1.82	2.17	1.62

(a) Includes small amounts grown in the Northern Territory.

A graph showing the area under hay since 1900-01 appears on page 993.

(iii) *Varieties Grown.* Information regarding areas cut for hay in 1961-62 is given in the following table.

**HAY: AREA OF VARIOUS KINDS GROWN, 1961-62**  
(Acres)

State or Territory	Wheaten	Oaten	Lucerne	Other	Total
New South Wales .. ..	90,490	64,786	231,549	207,198	594,023
Victoria .. ..	31,121	172,366	61,241	657,304	922,032
Queensland .. ..	9,542	3,889	74,415	7,512	95,358
South Australia .. ..	33,527	82,664	24,046	68,404	208,641
Western Australia .. ..	40,302	144,399	969	107,879	293,549
Tasmania .. ..	2,365	17,371	899	136,603	157,238
Northern Territory .. ..	..	..	..	422	422
Australian Capital Territory ..	127	302	1,477	536	2,442
<b>Australia .. ..</b>	<b>207,474</b>	<b>485,777</b>	<b>394,596</b>	<b>1,185,858</b>	<b>2,273,705</b>

For all States and the Territories combined, the proportions of the areas sown to the principal kinds of hay in 1961-62 were 21.4 per cent. for oaten, 17.4 per cent. for lucerne, 9.1 per cent. for wheaten, and 52.1 per cent. for other hay.

(iv) *Value of Hay Crop.* The following table shows the estimated gross value, and the value per acre, of the hay crop of the several States for the 1961-62 season.

**HAY: VALUE OF CROP, 1961-62**

Particulars	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value .. £'000	9,562	15,637	4,188	2,213	3,757	2,341	42	(a)37,746
Value per acre .. £	16.1	17.0	43.9	10.6	12.8	15.0	17.2	16.6

(a) Includes £6,000 in the Northern Territory.

(v) *Farm Stocks of Hay.* Particulars of stocks of hay held on farms at 31st March in each year 1958 to 1962 are given in the table below.

**STOCKS OF HAY HELD ON FARMS**  
(Tons)

31st March—	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
1958 ..	553,691	1,643,876	89,897	384,143	211,069	256,199	3,492	3,142,367
1959 ..	1,463,334	2,464,050	166,657	679,003	290,988	311,825	9,323	5,385,180
1960 ..	1,535,252	1,766,857	203,675	304,227	292,086	255,471	10,778	4,368,346
1961 ..	1,704,486	2,640,249	155,209	648,267	258,859	327,696	12,338	5,747,104
1962 ..	1,775,977	1,847,725	231,335	496,564	254,377	305,108	12,241	4,923,327

(vi) *Exports.* Under normal conditions, hay, whether whole or in the form of chaff, is somewhat bulky for overseas trade, and consequently does not figure largely among Australian exports. During 1961-62, exports amounting to 2,328 tons, valued at £47,571, were made principally to Singapore, the Federation of Malaya, and Hong Kong. There were no imports of hay in 1961-62.

2. *Green Fodder.*—(i) *General.* Considerable areas are devoted to the growing of green fodder, usually as an adjunct to cereal operations or as a minor crop in irrigation areas. The areas recorded in respect of green fodder include areas of crops cut for feeding to live-stock as green fodder or ensilage, together with areas fed off to stock as green forage.

Included with the latter are areas which may have been sown with the intention of harvesting for grain, but which, owing to adverse conditions, showed no promise of producing grain or even hay and were fed off to live-stock. The principal crops cut for green fodder are oats, wheat and lucerne, while small quantities of barley, sorghum, maize, rye and sugar cane are also used in this way. In 1961-62, the area under green fodder (4,701,588 acres) consisted of oats (1,938,562 acres), lucerne (1,789,774 acres), wheat (238,640 acres), barley (152,410 acres), sorghum (142,501 acres), maize (40,862 acres), rye (21,648 acres), sugar cane (1,347 acres) and other crops (375,844 acres). Particulars concerning the area of green fodder in the several States during each of the years 1957-58 to 1961-62 are given in the following table.

**GREEN FODDER: AREA**  
(Acres)

Season	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
1957-58 ..	993,039	465,009	714,048	748,089	770,739	54,094	4	1,032	3,746,054
1958-59 ..	1,238,314	319,150	638,667	550,366	769,199	61,322	273	667	3,577,958
1959-60 ..	1,578,759	422,237	725,155	595,713	708,793	62,229	240	968	4,094,094
1960-61 ..	1,691,408	430,920	874,702	743,538	606,039	59,563	144	1,247	4,407,561
1961-62 ..	1,829,867	539,020	864,461	787,388	622,067	57,000	588	1,197	4,701,588

In the 1961-62 season, green fodder ranked second to wheat in area of crops throughout Australia. A graph showing the area sown to green fodder appears on page 993.

(ii) *Value of Green Fodder Crops.* The value of these crops is variously estimated in the several States, but the Australian total, excluding Western Australia, may be taken as approximately £9,600,000 for the 1960-61 season and £8,700,000 for the 1961-62 season.

3. *Ensilage.*—(i) *General.* Ensilage is produced from herbage compacted tightly to exclude air and kept from contact with air and extraneous moisture to avoid moulding. Fermentation results in a dark mass of high protein and lactic acid content. Molasses may be added to hasten fermentation. Ensilage may be stored in pits or stacks or in constructed silos. In recent years, there has been an increasing tendency to produce more ensilage.

(ii) *Government Assistance.* The several State Governments devote a considerable amount of attention to the education of the farming community with regard to the value of ensilage. Monetary aid is afforded in the erection of silos, and expert advice is supplied in connexion with the design of the silos and the cutting and packing of the ensilage.

(iii) *Production and Stocks.* Information regarding production and farm stocks of ensilage for the years ended 31st March, 1958 to 1962, is given in the following table.

**ENSILAGE: PRODUCTION AND FARM STOCKS**  
(Tons)

## § 5. Industrial Crops

1. **Sugar Cane.**—(i) *General.* The growing of sugar cane is restricted to those coastal areas in northern New South Wales and Queensland which have suitable climatic and soil conditions. Considerable areas in more southern coastal districts of New South Wales previously devoted to this crop are now used for dairying owing to the uncertainty of rainfall.

The Bureau of Sugar Experiment Stations in Queensland renders useful service to the sugar industry by advocating and demonstrating better methods of cultivation and the more scientific use of fertilizers, lime, etc., and by producing and distributing improved varieties of cane.

(ii) *Sugar Agreements and Marketing Arrangements.* (a) *In Australia.* Reference was made in Official Year Book No. 37, pages 940–1, to the agreement operating between the Commonwealth and Queensland Governments in respect of the sugar industry in Australia. Briefly, the agreement places an embargo on sugar importations and fixes the price of sugar consumed in Australia. The current agreement is for the period from 1st September, 1961 to 31st August, 1967. The Commonwealth Government appointed a Committee of Enquiry in 1960 to investigate all facets of the sugar and canned fruits industries. The Committee presented its report, publication of which was restricted to a summary of conclusions and recommendations, towards the end of 1961. There was no variation of the consequent Agreement.

Production is regulated by the limited export quotas allocated under the International Sugar Agreement (*see (b) below*). At the mill level, this is established by means of mill peaks. The central collecting system used considerably assists in controlling the industry.

The Queensland Government acquires the whole of the sugar production of that State and of New South Wales by legislation and private agreement respectively. The net proceeds of all sugar sold are pooled and a uniform price paid to mills.

(b) *International Sugar Agreement.* The International Sugar Agreement of 1937 was superseded by the International Sugar Agreements of 1953 and 1958. Details of the 1937 and 1953 Agreements were given in Official Year Books No. 40, pages 881–2, and No. 43, page 936, respectively.

The 1958 Agreement, which came into operation on 1st January, 1959, establishes basic export quotas for exporting countries. The British Commonwealth is allocated a total quota, the distribution of which remains a matter for internal arrangement by the countries and territories concerned (*see (c) below*). The Australian quota for 1960 and 1961 was approximately 651,000 tons.

The quota and price provisions of the International Sugar Agreement cover only the first three years to 31st December, 1961. A conference in Geneva in 1961 failed to reach agreement on quota provisions for 1962 and 1963. The conference adjourned with a resolution that it be reconvened if circumstances became favourable for an agreement on quotas. In any event, consideration is to be given in the second half of 1963 to convening an international conference to prepare a new agreement in place of the current agreement which expires at the end of 1963.

The principal practical effect of the adjournment of the 1961 conference is that former export limitations on participating exporting countries, including Australia, do not apply until such time as agreement on this question is again reached at a resumed session of that conference, or at a newly convened conference.

(c) *British Commonwealth Sugar Agreement.* On 1st January, 1953, the British Commonwealth Sugar Agreement became effective. This agreement, which has been extended to 1969, provides for Australia to export a maximum of 600,000 tons per annum, subject to annual review. Of the 600,000 tons, 315,000 tons are purchased by the United Kingdom Government at an annually negotiated price and the balance is sold at world market prices plus tariff preferences where applicable. The negotiated prices for 1961 and 1962 were £stg.45 2s. and £stg.45 15s. 3d. In 1960 and 1961, Australia had an additional quota of 51,000 tons as its share of the increased allocation to Commonwealth exporters under the current International Sugar Agreement. This tonnage was not to receive the benefit of tariff preferences. Export limitations under the International Sugar Agreement are not applicable to 1962 and 1963 (*see para. (ii) (b), above*).

(iii) *Fruit Industry Sugar Concession Committee and Sugar Rebates.* The Fruit Industry Sugar Concession Committee was established by agreement between the Commonwealth and Queensland Governments and administers a fund contributed by the Queensland Government on behalf of the sugar industry.

Until 15th May, 1960, a rebate of £2 4s. per ton of refined sugar used in processing approved fruit products was paid to Australian manufacturers, provided they bought the fresh fruit at prices not lower than those declared by the Committee as reasonable. This was increased to £5 per ton from 16th May, 1960.

An export sugar rebate is also paid by the Committee to exporters of approved fruit products to ensure that manufacturers do not pay higher prices for Australian sugar than the price for which the cheapest imported sugar could be landed duty free in Australia.

Under the Sugar Agreement for 1961-67, the Queensland Government contributes to the fund £264,000 annually and also reimburses the Committee for the actual expenditure on export sugar rebates. Any money remaining in the fund after the payment of rebates and administrative expenses may be used by the Committee for the promotion of the use and sale of fruit products, or for scientific research for the purpose of increasing the yield per acre of Australian fruit.

(iv) *Bulk Handling of Sugar.* The conversion of the Australian sugar industry to bulk handling and mechanized loading and unloading of raw sugar is well advanced. About 92 per cent. of raw sugar in Australia is now handled in bulk without being bagged at any stage.

Terminals for the bulk loading of sugar were opened at Mackay in 1957, at Lucinda and Bundaberg in 1958, at Townsville in 1959, and at Mourilyan in 1960. Work is in progress for the erection of a terminal at Cairns and the provision of additional storage capacity at Mackay.

Bulk receiving facilities are in operation at all Australian refineries.

(v) *Area.* A brief outline of the development of the industry was included in earlier issues of the Official Year Book (see No. 38, p. 985). The area of sugar cane in Australia for the seasons 1957-58 to 1961-62 and the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59 are shown in the following table.

#### SUGAR CANE: AREA(a)

(Acres)

Season	New South Wales			Queensland			Australia			Total
	Area crushed	Area of stand-over and newly-planted cane	Area cut for plants	Area crushed	Area of stand-over and newly-planted cane	Area cut for plants	Area crushed	Area of stand-over and newly-planted cane	Area cut for plants	
Average for three years ended—										
1938-39	10,468	10,366	(b)	247,632	89,690	(b)	258,100	100,056	(b)	(b)

1958-59	11,094	9,462	619	360,709	110,786	12,596	371,803	120,248	13,215	505,266
Year—										
1957-58	10,734	9,241	720	364,985	107,424	12,946	375,719	116,665	13,666	506,050
1958-59	13,368	9,727	616	356,210	118,200	12,391	369,578	127,927	13,007	510,512
1959-60	14,248	10,510	392	299,732	151,114	11,039	313,980	161,624	11,431	487,035
1960-61	13,657	11,385	568	327,246	110,704	11,574	340,903	122,089	12,142	475,134
1961-62	14,655	11,299	482	372,223	87,831	12,339	386,878	99,130	12,821	498,829

(a) Excludes areas cut for green fodder.

(b) Not available.

The areas shown in the preceding table do not include the small acreage cut for green fodder, which in 1961-62 amounted to 1,347 acres. The whole area planted is not cut for crushing during any one season, there being always a considerable amount of young and "stand-over" cane as well as a small quantity required for plants.

(vi) *Production of Cane and Sugar.* In recent years, production of sugar cane has generally fluctuated between nine and nine and a half million tons, although in 1958-59 production reached the record level of 10.2 million tons. A graph showing the production of raw sugar since 1935-36 appears on page 995.

In the following table, production data relating to cane and raw sugar are shown for the seasons 1957-58 to 1961-62 and averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

### SUGAR CANE: PRODUCTION OF CANE AND RAW SUGAR

(Tons)

Season	New South Wales		Queensland		Australia	
	Cane	Sugar(a)	Cane	Sugar(a)	Cane	Sugar(a)

(a) Raw sugar at 94 net titre.

(vii) *Average Production of Cane Sugar.* Owing to climatic variations, the crop in New South Wales matures in from 20 to 24 months, whereas in Queensland a period of from 12 to 16 months is sufficient. The average yields of cane and sugar per acre for the years 1957-58 to 1961-62 and for the three-year periods ended 1938-39, 1948-49 and 1958-59 are shown below. Allowance should be made in interpreting these figures for the disparity in maturing periods noted above.

### SUGAR CANE AND SUGAR: YIELD PER ACRE

(Tons)

Season	New South Wales			Queensland			Australia		
	Cane per acre crushed	Sugar per acre crushed	Cane to each ton of sugar	Cane per acre crushed	Sugar per acre crushed	Cane to each ton of sugar	Cane per acre crushed	Sugar per acre crushed	Cane to each ton of sugar

(viii) *Production and Utilization.* Details of the production and utilization of sugar for the years 1957-58 to 1961-62 are shown below. Consumption is shown in terms of refined sugar, including that consumed in manufactured products.

### SUGAR: PRODUCTION AND UTILIZATION, AUSTRALIA

Year	Changes in stocks	Pro-duction (raw)	Exports (a)	Miscel-laneous uses(b)	Consumption in Australia(a)	
					Total	Per head
	'000 tons	'000 tons	'000 tons	'000 tons	'000 tons	lb.
1957-58 .. ..	-21.1	1,222.2	733.8	29.4	480.1	110.4
1958-59 .. ..	+10.3	1,353.4	827.4	18.4	497.3	112.0
1959-60 .. ..	+25.6	1,270.6	725.2	18.6	501.2	110.4
1960-61 .. ..	-10.7	1,324.8	815.6	21.0	498.9	107.5
1961-62 .. ..	-4.5	1,404.2	862.6	20.0	526.1	111.1

(a) Includes sugar content of manufactured products exported. quantities used in golden syrup and treacle.

(b) Includes refining, losses and

(ix) *Consumption in Factories.* The quantity of refined sugar used in factories in 1961-62 amounted to 321,125 tons compared with 307,000 tons in 1960-61 and 293,822 tons in 1959-60. Particulars of sugar used in establishments not classified as factories are not available, and consequently these quantities are deficient to that extent. In 1961-62, consumption by factories engaged in the production of jams, jellies and preserved fruit amounted to 103,346 tons, by those producing confectionery, ice cream, etc., to 64,295 tons, by breweries to 44,051 tons, and by factories producing aerated waters, cordials, etc., to 45,984 tons.

(x) *Sugar By-products.* Large quantities of molasses are produced as a by-product in sugar mills. Other by-products include industrial chemicals and building boards. These boards are made from the residue of crushed fibre after removal of the sugar content from sugar cane, and possess high insulating and sound-absorbing properties which make them particularly suitable for use in walls and ceilings.

(xi) *Sugar Prices and Returns.* The prices of sugar in Australia, from 1957 to 1961 in the case of raw sugar, and from 1956 to 1962 in the case of refined sugar (as determined under the Sugar Agreement in Australia—see para. ii (a) above), are shown in the following table.

### SUGAR: PRICES IN AUSTRALIA

Year	Raw sugar, 94 net titre			Refined sugar		
	Average return per ton received by millers and growers for—			Date of determination	Wholesale price to retailer per ton	Retail price, capital cities per lb.
	Home consumption	Exports(a)	Whole crop (a)			
	£ s. d.	£ s. d.	£ s. d.		£ s. d.	d.
1957 ..	54 3 0	45 16 8	49 7 6	14.5.56 to 15.5.60	82 1 0	10
1958 ..	54 15 0	39 8 2	45 9 11	16.5.60 to 31.12.62	90 5 2	11
1959 ..	56 8 6	40 6 2	47 9 11			
1960 ..	62 10 6	39 19 6	49 2 1			
1961 ..	62 9 6	37 15 0	48 4 4			

(a) Includes "excess" sugar.

Details of the disposal of the crop, net value of exports and the average price realized during each of the years 1957-58 to 1961-62 are shown in the following table.

### RAW SUGAR(a): NET RETURNS, AUSTRALIA

(Source: The Queensland Sugar Board.)

Year	Proportion exported	Net value of exports per ton	Average price per ton for whole crop	Estimated value of crop
	Per cent.	£ s. d.	£ s. d.	£'000
1957-58 .. ..	57.44	45 16 8	49 7 6	63,829
1958-59 .. ..	60.53	39 8 2	45 9 11	64,263
1959-60 .. ..	55.42	40 6 2	47 9 11	61,131
1960-61 .. ..	59.53	39 19 6	49 2 1	67,869
1961-62 .. ..	57.66	37 15 0	48 4 4	66,653

(a) 94 net titre.

The estimated value of the raw sugar produced has been based upon details taken from the audited accounts of the Queensland Sugar Board. The values stated represent the gross receipts from sales in Australia and overseas, less refining costs, freight, administrative charges, etc., and export charges, but including concessions to the fruit industry and other rebates which in 1961-62 amounted to £1,000,000. The value thus obtained represents the net market value of all raw sugar sold, which, less the rebates, is divided between the growers and millers in the approximate proportions of 70 per cent. and 30 per cent. respectively.

(xii) *Exports of Sugar.* Particulars of the exports of Australian-produced cane sugar (raw and refined) for each year from 1957-58 to 1961-62 are as follows.

### SUGAR: EXPORTS, AUSTRALIA

Particulars	1957-58	1958-59	1959-60	1960-61	1961-62
Quantity .. .. tons	707,805	802,971	701,319	796,496	843,528
Value .. .. £A.'000 f.o.b.	34,996	32,163	26,671	35,071	33,814

2. *Peanuts.*—(i) *General.* Peanuts, or groundnuts, are a sub-tropical legume (and hence summer growers) the pods of which mature beneath the surface of the soil. They thus require well drained, light textured soils. At harvest, the plant is pulled, wind-rowed, field-cured for two to four weeks and then threshed to recover the pods. The main products of the industry are nuts, peanut oil, oil cake and synthetic protein fibre.

The production of peanuts in Australia is confined mainly to Queensland, although small quantities are grown in New South Wales, Western Australia and the Northern Territory.

(ii) *Area and Production.* Details of the area and production of peanuts are given in the table below for the years 1957-58 to 1961-62.

### PEANUTS: AREA AND PRODUCTION

Season	Area (acres)				Production (cwt.)			
	N.S.W.	Q'land	N.T.	Aust.(a)	N.S.W.	Q'land	N.T.	Aust.(a)
1957-58 .. ..	686	34,739	156	35,581	8,014	366,518	302	374,834
1958-59 .. ..	867	59,279	211	60,357	11,623	621,687	2,412	635,722
1959-60 .. ..	837	41,547	388	42,772	10,639	360,314	4,306	375,259
1960-61 .. ..	788	41,659	335	42,782	9,578	446,215	1,215	457,008
1961-62 .. ..	573	33,131	307	34,011	6,003	292,267	1,343	299,613

(a) Excludes Western Australia, for which details are not available for publication.

(iii) *Value, Consumption and Trade.* The gross value of the 1961-62 crop was £1,342,000 which was approximately £750,000 less than in 1960-61. All production is consumed in Australia.

In recent years, considerable quantities of peanut kernels have been imported, chiefly from India, for the extraction of oil. Total supplies available for consumption in Australia in 1961-62 were 576,580 cwt. (shell equivalent), after allowing for a decrease in stocks held by the Peanut Marketing Board of 96,840 cwt. Supplies were made up of 390,280 cwt. from Australian production received into store by the Board and 89,460 cwt. imported.

3. *Hops.*—(i) *General.* Hops are grown from perennial rootstocks over deep, well-drained soils in localities sheltered from the wind. The hop-bearing vine shoots are carried upon wire and coir trellises, from which they are later harvested, principally by hand. The green hops are kiln-dried and bleached with sulphur dioxide fumes, following which the cured hops are pressed into bales.

Hop growing in Australia is confined to the Derwent, Huon and Channel areas of Tasmania and the Ovens and King Valleys in Victoria. A small area is also under hops in Western Australia, near Manjimup, but the details are not available for publication.

(ii) *Production and Imports.* The production of hops in Australia is insufficient to meet local requirements, and additional supplies are imported to meet the needs of the brewing industry. In the following table, details of the production and imports of hops and the quantity of hops used in breweries are shown for each of the years 1957-58 to 1961-62. Exports of hops are not recorded separately, but are negligible.

#### HOPS: PRODUCTION AND DISPOSAL, AUSTRALIA

Year	Production(a)		Imports	Net available supplies (b)	Quantity used in breweries
	Quantity	Gross value			
	Cwt.	£'000	Cwt.	Cwt.	Cwt.
1957-58 .. .. .	32,710	1,137	4,502	37,212	39,370
1958-59 .. .. .	36,499	1,273	8,471	44,970	38,664
1959-60 .. .. .	31,790	1,159	..	31,790	40,357
1960-61 .. .. .	33,099	1,179	991	34,090	40,018
1961-62 .. .. .	32,936	1,242	5,569	38,505	39,000

(a) Excludes production in Western Australia for which details are not available for publication.  
 (b) Disregards movements in stocks.

4. *Flax.*—(i) *Flax for Fibre.* This crop has a winter-growing season in Australia. The whole plant, after harvesting, is retted and scutched at local mills to recover the linen fibre and tow. The seeds may be sold to oil mills and the refuse used for stock feed.

In Victoria and South Australia (until production ceased in 1957-58), production has been directed and controlled by the Flax Commission, which took over the Commonwealth flax undertakings from the Flax Production Committee on 1st November, 1954. In Western Australia, the industry is carried on by a co-operative company.

In November, 1957, the Commonwealth Government approved a three-year extension of bounty assistance to flax producers and decided that the Commonwealth should withdraw from flax fibre production. In accordance with the decision, growing of flax under contract to the Flax Commission was discontinued in 1959, all of the Commonwealth mills ceasing to operate before the end of the year.

One important factor which influenced the Government in making this decision was the view expressed by the defence authorities that the industry no longer has the same defence significance as it had when the Flax Commission was first established.

Details of the area under flax and the production of fibre are given in the following table.

## FLAX FOR FIBRE: AREA AND PRODUCTION

Season					Victoria	S. Aust.	W. Aust.	Australia
AREA (ACRES)								
1957-58	..	..	..	..	5,550	1,410	1,002	7,962
1958-59	..	..	..	..	..	..	2,015	2,015

1961-62	..	..	..	..	514	..	183	697

(ii) *Flax for Linseed.* Fibre varieties are uneconomic for seed production, and prior to 1948-49, the growing of flax for linseed oil had not been developed extensively in Australia. Since then, however, action has been taken to develop this industry, the ultimate objective being the production of sufficient linseed to meet Australia's total oil requirements.

The question of assistance to the industry was investigated by the Commonwealth Tariff Board in 1953, and its conclusions are contained in its Report on *Linseed and Linseed Products* dated 23rd October, 1953.

The main producing areas are the Darling Downs in Queensland, the wheatbelt of New South Wales, and the western and north-eastern districts of Victoria.

Details of the area and production of flax for linseed are shown in the following table for the seasons 1957-58 to 1961-62.

## FLAX FOR LINSEED: AREA AND PRODUCTION

Season	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Aust.
AREA (ACRES)						
1957-58..	2,251	4,091	90,255	221	549	97,367
1958-59..	4,622	8,817	22,839	703	244	37,225
1959-60..	11,933	24,850	60,837	1,687	186	99,493
1960-61..	11,823	6,179	75,088	2,115	483	95,688
1961-62..	7,266	17,711	34,390	1,513	1,253	62,133
PRODUCTION (TONS OF LINSEED)						
1957-58..	36	1,149	7,279	49	68	8,581
1958-59..	1,196	2,769	6,510	151	42	10,668
1959-60..	2,922	7,391	16,247	191	48	26,799
1960-61..	1,870	1,013	10,394	218	70	13,565
1961-62..	856	6,093	5,187	275	178	12,589

5. *Cotton.*—(i) *General.* This annual shrub requires a hot climate and inter-row weed control. Lint (long fibres) is extracted from the seed cotton in the ginneries, and is used for yarn. The residue, consisting of linters (short fibres), kernels and hulls (outer seed coat), is treated in oil mills. From linters and kernels are produced such items as short-fibred cotton, cotton-seed oil for human consumption and industrial purposes, and meal cakes for stock feed. The hulls may be used as fuel.

The production of cotton in Australia has, until recently, been restricted mainly to the coastal river valleys of Queensland. In recent years, however, it has been grown experimentally in some other States, namely along the Murray river in New South Wales, Victoria,

and South Australia, at Narrabri in New South Wales, and in the Kimberleys in Western Australia. The first commercial crop grown outside Queensland was harvested at Robinvale in Victoria in the 1960 season. Details of this production are not, however, available for publication.

Cotton spinning and weaving industries are referred to in Chapter VI. Manufacturing Industry.

(ii) *Cotton Bounty.* The *Cotton Bounty Act* of 1951 guaranteed a net average return to cotton-growers of 9½d. per lb. of seed cotton for five years from 1st January, 1951. This Act was amended in 1952 to provide for a guaranteed return of 14d. per lb. of seed cotton for the 1953 crop, and for variation by regulation of the guaranteed return, in succeeding seasons, with a minimum of 9½d. per lb. The Act, as amended in 1952, 1955 and 1957, was extended in 1958 to cover production up to 31st December, 1963. The guaranteed return has remained at 14d. per lb. of seed cotton since the 1953 season.

(iii) *Area and Production.* In the five seasons 1957–58 to 1961–62, the area sown and quantity of unginned cotton produced have increased nearly threefold. The yield per acre in the same period has risen by 16 per cent.

The area under cultivation and the production in Australia for the years 1957–58 to 1961–62 are shown hereunder.

#### COTTON: AREA AND PRODUCTION, AUSTRALIA(a)

Season	Area sown	Production of cotton			Average yield per acre sown	
		Unginned		Ginned(b)	Unginned	Ginned
		Quantity	Gross value			
	Acres	'000 lb.	£'000	'000 lb.	lb.	lb.
1957–58.. ..	10,364	3,390	213	1,345	327	129
1958–59.. ..	10,493	4,004	249	1,492	382	142

1960–61.. ..	37,048	15,544	917	5,540	420	150
1961–62.. ..	28,844	10,948	647	3,830	380	133

(a) Incomplete; excludes Victoria and Western Australia, particulars for which are not available for publication. (b) Source: Queensland Cotton Marketing Board.

(iv) *Consumption of Raw Cotton.* The following table shows details of the availability and actual consumption of raw cotton in Australian factories during each of the five years ended 1961–62.

#### RAW COTTON: PRODUCTION, IMPORTS AND CONSUMPTION, AUSTRALIA ('000 lb.)

Year	Production(a)	Imports	Total	Consumption of raw cotton
1957–58 .. ..	1,345	42,578	43,923	49,054
1958–59 .. ..	1,492	43,984	45,476	47,323
1959–60 .. ..	3,592	41,519	45,111	51,689
1960–61 .. ..	5,540	41,842	47,382	45,432
1961–62 .. ..	3,830	37,735	41,565	44,543

(a) Source: Queensland Cotton Marketing Board.

6. *Tobacco.*—(i) *General.* This summer-growing annual requires a temperate to tropical climate, adequate soil moisture and a frost-free period of approximately five months. These requirements necessarily restrict its growth to particular areas. These include the Mareeba area (northern Queensland), the neighbourhood of Texas (Queensland and New South Wales border), and near Myrtleford (Victoria). Smaller quantities are grown also near Manjimup in Western Australia. The best quality Australian tobaccos are grown in Queensland.

In Australia, flue-curing is the main method of drying used.

(ii) *Marketing.* Between 9th May, 1941, and 24th September, 1948, all leaf was under the direct control of the Australian Tobacco Board, and prices were paid on leaf appraisal. Subsequently, sales have been by open auction through the Tobacco Leaf Marketing Board (Queensland and northern New South Wales) and the Victorian Tobacco Growers Association Ltd. (southern New South Wales and Victoria). The 1961-62 Western Australian crop was also marketed through the Victorian Association.

(iii) *Central Tobacco Advisory Committee.* The Australian Agricultural Council formed the Standing Advisory Committee on Tobacco during 1950. This Committee consisted of representatives of tobacco growers, tobacco manufacturers and the Commonwealth and State governments. Its main functions were to review the industry and make recommendations on its problems.

The Committee was reconstituted by the Agricultural Council during 1952-53. The terms of reference of this committee are given in Official Year Book No. 47, page 935.

In 1955, the Committee formulated a programme for increased research and advisory activities. The capital costs of establishing this programme were estimated at £168,000, of which the Commonwealth Government and tobacco manufacturers each agreed to contribute half. Annual contributions are made to the fund by the Commonwealth and State Governments, tobacco growers and manufacturers. A Tobacco Industry Trust Account was established to receive these contributions. This programme commenced in 1956. During the first six years of the operation of the Trust Account, £1,058,687 was paid by State and Commonwealth departments. The allocation for 1962-63 was £259,290.

A sub-committee on curing was formed in 1960 to investigate new curing methods. A grant of up to £10,000 was made available for initial investigations. In 1961, a Research Sub-Committee was established to review annually scientific programmes and finance in relation to the Tobacco Industry Trust Account and make recommendations to the Central Tobacco Advisory Committee.

(iv) *Other Assistance and Research.* Details of the recommendations by the Tobacco Inquiry Committee and grants periodically approved by the Commonwealth Government up to 30th June, 1953, are given in Official Year Book No. 40, pages 895-6, and in previous issues. In 1962, the Commonwealth Government agreed to make available a further annual grant of £24,000 for additional tobacco extension services by State Departments of Agriculture.

The Commonwealth Scientific and Industrial Research Organization has been investigating many fundamental problems connected with tobacco culture. One of the major achievements of this organization was the development in the mid-1930's of a technique to control blue mould in the seed bed. State Departments of Agriculture are also carrying out investigations over a wide range of problems, being concerned mainly with variety trials, irrigation, disease and pest control, crop rotation and cultural practices. The New South Wales Department of Agriculture has developed a commercial blue mould resistant hybrid.

(v) *Tobacco Factories.* Manufacturers of Australian cigarettes and tobacco are granted a lower rate of duty on imported tobacco leaf, provided it is blended with a prescribed minimum percentage of Australian leaf. These percentages were increased from 3 per cent. for cigarettes and 5 per cent. for tobacco in November, 1946, to 43 per cent. and 40 per cent. respectively from 1st July, 1962. The percentage to apply to both cigarettes and tobacco from 1st July, 1963, is 40 per cent. and from 1st July, 1964, 41.5 per cent. In 1961-62, the quantity of cured leaf used in tobacco factories in Australia amounted to 49.7 million lb., of which 18.1 million lb. was of local origin. The balance was imported, chiefly from the United States of America and Rhodesia.

(vi) *Area and Production.* In 1960-61, the area planted was a record, exceeding the previous highest post-war level, reached in 1959-60, by 49 per cent. The production of dried leaf in 1960-61 was also a record. Both area and production of tobacco in 1961-62 are considerably below 1960-61 levels.

In the following table, particulars of the area and production of tobacco are given by States for each of the seasons 1957-58 to 1961-62, together with averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

## TOBACCO: AREA AND PRODUCTION

Season	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	Aust.
AREA (ACRES)								
Average for three years ended—

## PRODUCTION OF DRIED LEAF ('000 lb.)

Average for three years ended—								
1938-39 ..	471	1,603	2,173	17	741	104	(b)	5,109
1948-49 ..	380	670	1,725	..	523	..	..	3,298
1958-59 ..	1,066	3,770	5,563	..	1,016	..	(b)	11,415
Year—								
1957-58 ..	1,235	3,683	5,618	..	1,031	..	..	11,567
1958-59 ..	1,158	4,885	6,729	..	1,198	..	..	13,970
1959-60 ..	1,437	7,401	9,149	..	(c) 1,370	..	..	(c) 19,357
1960-61 ..	3,538	9,728	15,308	..	(d) 1,288	..	..	(d) 29,862
1961-62 ..	3,116	6,515	12,751	..	(e) 196	..	..	(e) 22,578

(a) Less than one-half acre. (b) Less than 500 lb. (c) Includes 289,000 lb. of unsold leaf.  
 (d) Includes 655,000 lb. of unsold leaf. (e) Includes 110,000 lb. of unsold leaf.

(vii) *Oversea Trade.* Imports of tobacco and tobacco manufactures into Australia during 1961-62 were valued at £9.7 million. This included 23.7 million lb. of unmanufactured tobacco valued at £8.1 million. Exports of tobacco and tobacco manufactures, including the re-exports of imported tobacco, during 1961-62 were valued at £563,625.

## § 6. Vegetables for Human Consumption

1. *Area, Production and Trade.*—(i) *General.* Vegetables were initially grown on a large scale near the main cities, where there was ready access to reliable water supplies and to markets. More recently, the expansion of irrigation areas and improvement in transport services have resulted in their production being extended into many other areas. At present, because of the wide diversity of climatic conditions across Australia, supplies for main city markets are drawn from widely different areas, depending upon the times of maturity of the various crops. Apart from potatoes and onions, which are sold in some States through marketing boards, the bulk of vegetable trading takes place at the metropolitan markets of the cities concerned.

(ii) *Area and Production of Fresh Vegetables.* Details of the areas planted and production of individual kinds of vegetables are shown below for the seasons 1959-60 to 1961-62. Certain particulars shown are incomplete in that details for specific vegetables in some States are either not available, or are not available for publication. For further information, see the bulletin *Primary Industries, Part I.—Rural Industries.*

## FRESH VEGETABLES FOR HUMAN CONSUMPTION: AUSTRALIA

Vegetable	1959-60		1960-61		1961-62	
	Area sown	Production	Area sown	Production	Area sown	Production
	Acres	Tons	Acres	Tons	Acres	Tons
Asparagus .. ..	3,450	4,210	3,085	4,329	3,263	5,179

Turnips, swede and white	1,886	12,345	1,759	8,701	1,859	12,269
All other .. ..	30,992	..	30,939	..	30,734	..
<b>Total .. ..</b>	<b>265,045</b>	<b>..</b>	<b>256,153</b>	<b>..</b>	<b>267,150</b>	<b>..</b>

(iii) *Processed Vegetables.* Total production of canned vegetables in 1961-62 amounted to 125,366,000 lb., the principal types produced being green peas (including mint-pro peas), 43,237,000 lb.; green beans, 6,593,000 lb.; baked beans (including pork and beans), 19,850,000 lb.; asparagus, 8,790,000 lb.; beetroot, 14,608,000 lb.; and mushrooms, 5,687,000 lb.

The production of dehydrated vegetables during 1961-62 amounted to 947,200 lb., while the production of potato crisps, chips and flakes was 9,853,000 lb.

There has been rapid development in the quick-frozen vegetable industry. Data were collected for the first time in 1957-58, when 13,846,000 lb. of frozen vegetables were produced, made up primarily of 10,131,000 lb. of peas and 2,540,000 lb. of beans. In 1961-62, production had risen to 47,232,000 lb., of which 36,196,000 lb. were peas and 7,147,600 lb. were beans.

(iv) *Consumption of Vegetables.* Details of the estimated consumption of vegetables for a series of years ending 1961-62 are shown in Chapter XXIX. Miscellaneous.

(v) *Imports and Exports of Vegetables (Values in £A. f.o.b.).* The quantity and value of oversea exports of pulse and fresh vegetables during 1961-62 were respectively:—pulse, 6,036 tons, £301,995; onions, 2,369 tons, £108,589; potatoes, 4,122 tons, £159,999; other vegetables, 2,683 tons, £263,384. Imports of pulse amounted to 6,882 tons, valued at £497,205, while imports of fresh vegetables in total were 8,155 tons, valued at £1,022,088.

In 1961-62, exports of vegetables preserved in liquid consisted of:—asparagus, 763,604 lb., £106,120; beans (including baked), 96,470 lb., £8,019; peas, 196,185 lb., £16,143; tomatoes, 104,164 lb., £8,680; other vegetables, 475,332 lb., £52,392.

2. *Potatoes.*—(i) *General.* This crop requires deep friable soils, which in Australia are usually basaltic, alluvial, or swampy in origin. Fertilizer requirements, which are generally high, vary with the type of soil. Potatoes are killed by heavy frost, but require only moderate temperatures for growth. Mechanical planters and diggers are used to a variable extent depending upon a variety of factors including terrain, state of the soil and scale of operations.

Seed certification schemes, which operate in all States except Queensland, provide a supply of seed which is free from viral, fungal and bacterial diseases.

In Australia, potatoes are used almost entirely for human consumption and not for the production of starch or alcohol. They are rarely used as stock feed.

(ii) *Marketing.* Potato marketing boards were established in all States under separate State legislation after Commonwealth control of potato marketing under war-time legislation ceased at the end of 1948. The life of the Queensland Board was not extended when its term ended in 1954, and the New South Wales Board was voted out by growers in 1956. As the Victorian Board does not acquire the State crop, potato marketing is now conducted chiefly on an open marketing system. The boards in South Australia and Western Australia are still in operation.

(iii) *Area, Production, and Yield per Acre.* Victoria possesses particular advantages for the growing of potatoes, as the rainfall is generally satisfactory and the climate is unfavourable to the spread of Irish blight; consequently, the crop is widely grown. The principal areas of that State are the central highlands and the south-western and Gippsland districts. Until 1958-59, Tasmania (where production is mainly in the north-west) came next in order of acreage sown, although production exceeded that of Victoria in some of the war years. Since 1958-59, however, New South Wales, which had previously occupied third position, has supplanted Tasmania as the second most important State in area sown. New South Wales production is chiefly in the tablelands districts.

The area sown, production, and yield per acre of potatoes in each State during the years 1957-58 to 1961-62 and the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59 are shown hereunder. A graph showing production since 1935-36 appears on page 996.

(a) Not available for publication.

(b) Incomplete; excludes Northern Territory.

(iv) *Gross Value.* The estimated gross value of the potato crop of each State for the 1961-62 season and the value per acre are shown in the following table.

#### POTATOES: VALUE OF CROP, 1961-62

Particulars	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £'000	4,498	6,524	3,806	2,047	1,937	1,877	8	20,697
Value per acre £	222	179	263	385	284	169	27	219

(v) *Consumption.* The annual consumption of potatoes in Australia during each of the three years 1959-60 to 1961-62 amounted to 523,671 tons, 400,619 tons and 453,529 tons respectively, or 115.4 lb., 86.4 lb. and 95.8 lb. respectively per head of population. These figures exclude the quantities used for seed, which averaged about 46,700 tons annually over this period.

(vi) *Exports.* Details showing exports for the years 1957-58 to 1961-62 are given in the following table.

#### POTATOES: EXPORTS, AUSTRALIA

Particulars	1957-58	1958-59	1959-60	1960-61	1961-62
Quantity .. .. tons	7,410	4,470	4,742	5,219	4,121
Value .. .. £A.'000 f.o.b.	227	151	134	195	160

Imports of potatoes into Australia in 1961-62 amounted to 3,233 tons, valued at £108,765, coming solely from New Zealand.

3. *Onions.*—(i) *Area, Production, and Yield.* Until recently Australia's onion supply came chiefly from Victoria. However, during the last five years, Victorian production has decreased until in one season, 1960-61, it was exceeded by that of Queensland. The Victorian crop consists almost entirely of brown onions, and the bulk of the crop is grown in a small section of the Western Division of the State, where the volcanic ash soils have been found to be particularly suitable for onion growing on a commercial scale. Most of Queensland's onion production is grown in the Lockyer Valley, and consists mainly of brown varieties. Details of the area, production and yield per acre are given in the following table for the years 1957-58 to 1961-62 together with averages for the three-year periods ended 1938-39, 1948-49 and 1958-59. A graph showing production since 1935-36 appears on page 996.

1960-61 ..	6.31	4.61	5.62	9.05	12.52	4.83	8.00	5.87
1961-62 ..	6.29	5.34	5.65	9.18	13.13	5.45	(a)	(b) 6.20

(a) Not available for publication. (b) Includes a small area and production in Northern Territory but excludes Australian Capital Territory.

(ii) *Gross Value.* The estimated gross value of the onion crop and the value per acre are shown in the following table for the 1961-62 season.

ONIONS: VALUE OF CROP, 1961-62

Particulars	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
Aggregate value £'000	204	794	955	341	237	15	1	(a)	(b)2,547
Value per acre £	416	178	301	452	495	250	388	(a)	(b) 271

(a) Not available for publication.

(b) Incomplete; excludes Australian Capital Territory.

(iii) *Consumption.* The annual consumption of onions in Australia averaged 57,300 tons or 12.4 lb. per head of population during the three years ended 1961-62.

(iv) *Exports.* Onions are the only root crop, other than potatoes, in which any considerable overseas trade is carried on by Australia. In 1961-62, exports amounted to 2,369 tons, valued at £108,589, and were shipped mainly to Singapore, Canada and New Caledonia. The quantity of exports in 1960-61 was 2,453 tons, valued at £88,668. Imports of onions amounted to 2,809 tons, valued at £91,214 in 1960-61, and 260 tons, valued at £7,866 in 1961-62.

## § 7. Fruits and Vines

1. *Orchards and Fruit Gardens.*—(i) *General.* The varieties of fruit grown differ in various parts of the States, ranging from pineapples, papaws and mangoes in the tropics, to strawberries, raspberries and currants in the colder parts of the temperate zone. In New South Wales, citrus fruits (oranges, lemons, etc.) and bananas are the principal crops, although apples, peaches, plums, pears and cherries are grown extensively. The principal varieties grown in Victoria are apples, pears, peaches, oranges and apricots. In Queensland, apples, pineapples, bananas, oranges, mandarins, peaches and plums are the varieties most largely cultivated. In South Australia, in addition to oranges, apples, peaches, apricots and pears, almonds and olives are grown extensively. In Western Australia, apples, oranges, plums and pears are the chief varieties. In Tasmania, apples occupy over three-quarters of the fruit-growing area, but small fruits, such as currants, raspberries and gooseberries, are grown extensively, the balance of the area being mainly taken up with pears and apricots.

(ii) *Overseas Marketing of Fruit.* (a) *Apples and Pears.* The *Apple and Pear Organization Act 1938-1960* provides for the establishment of an Australian Apple and Pear Board comprising representatives of growers, exporters, employees and the Commonwealth Government. A representative in London has also been appointed by the Board. An export levy to meet the expenses of the Board is provided for in the *Apple and Pear Export Charges Act 1938-1960*.

The function of the Board is the organization and control of exports of fresh apples and pears, and it has the power to regulate shipments, determine export quotas, allocate consignments from each State and recommend the licensing of exporters. The Board contributes to apple and pear publicity activities overseas.

(b) *Canned Fruits.* The *Canned Fruits Export Control Act 1926-1959* was introduced with the object of organizing the overseas marketing of canned fruit. The Australian Canned Fruits Board, comprising members representing the Commonwealth Government, canners of apricots, peaches, pears, pineapples and fruit salad, and a representative of the growers of canning apricots, peaches and pears, was appointed to organize the overseas marketing of canned fruit and also to recommend the licensing of exporters. The Board establishes terms and conditions of sale overseas and contributes to overseas publicity connected with the canned fruit industry. It also maintains an office in London. The *Canned Fruits Export Charges Act 1926-1956* provides for a levy on exports to meet the Board's expenses.

In 1959, the Australian Canned Fruit Sales Promotion Committee was established to promote the sale of canned deciduous fruits on the home market and overseas. The operations of the Committee are financed by a levy on fruit accepted by the canneries for the production of canned fruit. The Committee comprises representatives of growers and processors of canning fruit and a representative of the Commonwealth Government.

(iii) *Area and Production of Fruit.* The area of orchards and fruit-gardens in Australia has been increasing steadily in recent years, until a record level was reached in 1961-62. Increases have been recorded in all States, with the exception of Tasmania. The following table sets out the area of orchards and fruit-gardens in the several States for the seasons 1957-58 to 1961-62.

**ORCHARDS AND FRUIT-GARDENS: AREA**  
(Acres)

(v) *Production of Jams and Jellies and Preserved Fruit.* In Australia, considerable quantities of fruit are used in the production of jams and jellies and for preserving. During 1961-62, output of jams, conserves, fruit spreads, etc., amounted to 98,313,000 lb., while output of preserved fruit amounted to 450,484,000 lb. Of the latter figure, pears accounted for 139,743,000 lb., peaches 148,482,000 lb. and pineapples 49,220,000 lb.

The recorded consumption of fruit in factories for all purposes, including that used for juice and cordial manufacture and for drying, was 227,000 tons in 1961-62.

(vi) *Consumption of Fruit and Fruit Products.* Details of the estimated consumption of fruit and fruit products per head of population for a series of years ending 1961-62 are shown in Chapter XXIX. Miscellaneous.

(vii) *Imports and Exports of Fruit.* (a) *General.* The imports of fresh fruit into Australia are negligible, while those of dried fruit consist mainly of dates.

A considerable export trade in both fresh and dried fruit is carried on by Australia with overseas countries. The values (£A. f.o.b.) of the shipments in 1961-62 amounted to £13,362,678 and £10,356,728 respectively. Apples constitute the bulk of the fresh fruit exported, although exports of pears and citrus fruit are considerable.

(b) *Fresh Fruit.* Particulars of the Australian export trade in fresh and frozen fruit for each of the years 1957-58 to 1961-62 are shown in the following table.

## FRESH AND FROZEN FRUIT: EXPORTS, AUSTRALIA

Year	Apples		Pears		Citrus		Total value(a)
	Quantity	Value	Quantity	Value	Quantity	Value	
	'000 bus.	£A.'000 f.o.b.	'000 bus.	£A.'000 f.o.b.	'000 bus.	£A.'000 f.o.b.	£A.'000 f.o.b.
1957-58 .. ..	5,891	9,074	1,448	2,755	572	882	13,060
1958-59 .. ..	4,948	6,625	1,100	1,783	415	664	9,413
1959-60 .. ..	4,889	6,123	1,328	1,970	589	918	9,294
1960-61 .. ..	5,729	7,321	1,235	2,080	419	664	10,369
1961-62 .. ..	7,083	9,396	1,639	2,575	673	1,086	13,363

(a) Includes exports of all other fresh and frozen fruit.

(c) *Dried Tree Fruit.* The quantity and value of overseas imports and exports of dried fruit, other than raisins and currants, for the years 1957-58 to 1961-62 are shown below. Normally, the bulk of the imports consists of dates obtained almost entirely from Iraq and Iran. The export figures include particulars of some re-exported dried fruits.

## DRIED TREE FRUIT(a): IMPORTS AND EXPORTS, AUSTRALIA

Year	Imports(b)		Exports	
	Quantity	Value	Quantity	Value
	'000 lb.	£A.'000 f.o.b.	'000 lb.	£A.'000 f.o.b.
1957-58 .. ..	8,683	209	1,366	186
1958-59 .. ..	8,411	203	3,352	482
1959-60 .. ..	10,791	310	6,221	703
1960-61 .. ..	9,178	303	8,199	932
1961-62 .. ..	8,266	314	5,961	782

(a) Excludes raisins and currants referred to separately under Vineyards (see p. 1056). (b) Dates and figs only.

(d) *Jams and Jellies.* Exports of jams and jellies in 1961-62 were 6,671,000 lb., valued at £A.473,000 f.o.b., compared with 6,331,000 lb., valued at £A.493,000 f.o.b. in 1960-61. Imports of jams and jellies are negligible.

(e) *Preserved Fruit (values in £A. f.o.b.).* The total value of fruit preserved in tins or other airtight containers, or pulped, imported into Australia during 1961-62 was £166,809. Large quantities of fruit preserved in tins or other airtight containers are normally exported from Australia, the quantity recorded in 1961-62 being 84,261 tons valued at £11,918,915. Exports in 1961-62 were principally made up of pears (38,957 tons), peaches (24,223 tons), pineapples (7,147 tons) and apricots (4,463 tons). In addition, the exports of pulped fruits during 1961-62 amounted to 1,137 tons valued at £234,146.

2. *Vineyards.*—(i) *General.* Grapes require a warm to hot climate and a predominantly winter rainfall of seventeen inches or more. Freedom from late spring frosts is essential.

Grapes are grown for wine-making, table use and drying. In Australia, wine is generally produced from non-irrigated crops, and dried fruits from the inland irrigation areas, but table grapes and grapes for fortified wines may be produced in both areas. The main wine producing areas are the Barossa valley (South Australia), Hunter valley (New South Wales), Rutherglen and Stawell districts in Victoria, and the Swan valley (Western Australia). Nearly all the dried fruits are produced along the River Murray and its tributaries, with small localized areas in the other States.

(ii) *Area of Vineyards.* The area under vineyards in the 1961-62 season in Victoria and South Australia constituted 78 per cent. of the total area of vineyards. The total area of vines in the several States during each of the years 1957-58 to 1961-62 and the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59 are shown in the following table.

## VINEYARDS: AREA

Drying .. ..	7,413	37,336	..	10,757	3,624	59,130
<b>Total .. ..</b>	<b>17,607</b>	<b>45,105</b>	<b>3,203</b>	<b>57,836</b>	<b>9,017</b>	<b>132,768</b>

(a) Excludes particulars for Northern Territory and Australian Capital Territory.

NOTE.—There are no vineyards in Tasmania.

(iii) *Wine Industry.* (a) *General.* A large proportion of the wines produced in Australia are of the sweet fortified Spanish and Portuguese types, the remainder including Burgundy type wines and the light table wines, such as clarets and hocks.

Details of the Wine Research Trust Fund are given in Official Year Book No. 47, page 927.

(b) *Oversea Marketing of Wine.* The *Wine Overseas Marketing Act* 1929-1961 was introduced to place the oversea marketing of surplus wine on an orderly basis. The Australian Wine Board, consisting of representatives from wineries and distilleries, grape-growers and the Commonwealth Government, supervises the sale and distribution of Australian wine exported and recommends conditions under which export licences should be issued. The Board also engages in wine publicity and trade promotion activities both in Australia and overseas. In London, the Board maintains an office and an Australian Wine Centre, which is both a retail outlet for Australian wines and brandy and a medium for promoting interest in these products. The *Wine Grapes Charges Act* 1929-1961 provides for the imposition of a levy on all grapes used in Australia for the manufacture of wine, brandy and spirit used for fortifying wine. The proceeds of the levy are used to defray the administrative and other expenses of the Board, and provision is made for such exemptions from the levy as the Board may recommend.

(c) *Production and Consumption.* In 1961-62, the total production of wine (beverage and distillation) in Australia was 41.8 million gallons, while total consumption of beverage wine was 12.0 million gallons (1.13 gallons per head of population). Similar particulars for 1960-61 are 33.8 million gallons and 11.7 million gallons (1.12 gallons per head of population) respectively.

The quantity of wine produced in the several States during the 1957-58 to 1961-62 seasons, together with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59, are shown in the following table.

**WINE: PRODUCTION(a)**  
(<sup>'000</sup> gallons)

Season	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Aust.
Average for three years ended—

1961-62 .. ..	6,442	3,605	36	30,831	867	41,781

(a) Net factory and farm production of beverage and distillation wine excluding the liquid gallage of spirits added in wine fortifying.

(d) *Exports and Imports of Wine (values in £A. f.o.b.).* Imports for 1961-62 amounted to 82,153 gallons valued at £176,013 compared with 98,004 gallons valued at £205,286 in the previous year. During 1961-62, Italy supplied 29,527 gallons valued at £36,394, France supplied 18,802 gallons valued at £70,578, and the Federal Republic of Germany supplied 8,582 gallons valued at £24,717.

Exports in 1961-62 totalled 1,670,129 gallons, of which the United Kingdom received 1,160,607 gallons, Canada 336,885 gallons, New Zealand 35,865 gallons, Hong Kong 16,982 gallons, and other countries 119,790 gallons. Exports of Australian-produced wine for the five years ended 1961-62 are shown in the following table.

**WINE: EXPORTS FROM AUSTRALIA**

Year	Quantity (gallons)			Value (£A. f.o.b.)		
	Sparkling	Other	Total	Sparkling	Other	Total
1957-58 .. ..	4,872	1,484,609	1,489,481	18,194	978,484	996,678
1958-59 .. ..	5,185	1,740,280	1,745,465	10,861	1,139,840	1,150,701
1959-60 .. ..	6,436	1,738,616	1,745,052	19,625	1,245,241	1,264,866
1960-61 .. ..	11,441	1,884,978	1,896,419	29,786	1,273,079	1,302,865
1961-62 .. ..	5,145	1,664,984	1,670,129	17,100	1,368,930	1,386,030

(iv) *Dried Vine Fruit Industry.* (a) *General.* The dry, frost-free November to March period of the lower Murray valley makes this an ideal area for dried vine fruits. Harvesting for drying takes place at the end of summer. The sun-drying process is often accelerated by using a dip of cold potash.

(b) *Oversea Marketing of Dried Fruits.* The *Dried Fruits Export Control Act* 1924-1953 was passed to organize oversea marketing of Australian dried vine fruits. The *Dried Fruits Control Board*, consisting of growers' representatives, members with commercial experience in marketing dried fruits, and a Government representative, controls the sale and distribution of dried fruit exports, recommends the licensing of exporters, and contributes to dried vine fruits publicity activity overseas. In conjunction with its London office, the Board has improved dried fruit marketing overseas by its system of appraisement, regulation of shipments and advertising.

*The Dried Fruits Export Charges Act 1924-1929* provides for a levy on exports of dried fruits to defray costs and expenses incurred by the Board.

For details of the agreements which were negotiated between the Governments of the United Kingdom and Australia during the period 1946-1953, see Official Year Book No. 40, page 888. From 1st December, 1953, exports have been made on a trader to trader basis.

(c) *Production and Disposal of Dried Vine Fruit.* As the production of dried vine fruit is far in excess of Australia's requirements, considerable quantities are available for export. Total production during the 1961-62 season amounted to 96,498 tons, while exports for the year ended December, 1962, were 70,708 tons, leaving an estimated 24,944 tons available for Australian consumption from that season's production. Australian consumption includes amounts delivered to biscuit manufacturers, bakeries, etc., as well as retail sales for household consumption.

The production of dried vine fruit during each of the seasons 1957-58 to 1961-62 and the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59 are shown in the following table.

**DRIED VINE FRUIT: PRODUCTION**

(a) Including sultanas and lexias.

(d) *Exports.* The following table shows the exports of dried vine fruit during each of the years 1957-58 to 1961-62.

**DRIED VINE FRUIT(a): EXPORTS, AUSTRALIA**

Year	Raisins, Sultanas and Lexias		Currants		Total	
	Quantity	Value	Quantity	Value	Quantity	Value
	Tons	£A.'000 f.o.b.	Tons	£A.'000 f.o.b.	Tons	£A.'000 f.o.b.
1957-58 ..	52,297	8,019	7,398	938	59,695	8,957
1958-59 ..	68,240	11,213	7,580	1,050	75,820	12,263
1959-60 ..	45,634	7,726	4,540	637	50,174	8,363
1960-61 ..	48,805	7,133	7,838	1,032	56,643	8,165
1961-62 ..	60,169	8,955	4,564	620	64,733	9,575

(a) Excludes quantities exported as mincemeat.

The chief countries importing Australian dried vine fruit are the United Kingdom, Canada, New Zealand and the Federal Republic of Germany. The quantities exported to these countries in 1961-62 were 33,791 tons, 16,152 tons, 7,126 tons and 4,377 tons respectively.

(v) *Table Grapes.* Grapes for table use are grown in all States except Tasmania, but the area of this type was only about 7 per cent. of the productive area of vines in 1961–62. The quantities of table grapes produced during the season 1961–62 in each State are shown in § 2 of this division. (See p. 1009.)

## PASTORAL PRODUCTION

### § 1. Introduction

1. *Livestock Numbers.*—A detailed account of the various enumerations of livestock in Australia made prior to 1860 was given in previous issues of the Year Book. Since 1860, annual enumerations have been made, based, with few exceptions, on actual collections made through the agency of the State police or by post. Particulars concerning the numbers of each of the principal kinds of livestock in Australia at decennial intervals from 1860 to 1950, and from 1958 onwards in single years, are given in the following table, and are shown continuously since 1870 on the graph on page 1061.

LIVESTOCK: AUSTRALIA  
(‘000)

Year	Horses	Cattle	Sheep	Pigs	Year	Horses	Cattle	Sheep	Pigs
1860 ..	432	3,958	20,135	351	1940 ..	1,699	13,080	119,305	1,455
1870 ..	717	4,276	41,594	543	1950 ..	1,057	14,640	112,891	1,123
1880 ..	1,069	7,527	62,184	816	1958 ..	694	16,892	149,315	1,423
1890 ..	1,522	10,300	97,881	891	1959 ..	671	16,257	152,685	1,289
1900 ..	1,610	8,640	70,603	950	1960 ..	640	16,503	155,174	1,424
1910 ..	2,166	11,745	98,066	1,026	1961 ..	598	17,332	152,679	1,615
1920 ..	2,416	13,500	81,796	764	1962 ..	562	18,033	157,712	1,652
1930 ..	1,793	11,721	110,568	1,072					

While livestock numbers (particularly sheep) have increased substantially since 1860, marked fluctuations have taken place during the period, mainly on account of widespread droughts which have from time to time left their impressions on the pastoral history of Australia. These occurred in 1868, 1877, 1883–84, 1892, 1893, 1895, 1901–02, 1912, 1914, 1918, 1919, 1922–23, 1925–26, 1927–28, 1929–30, 1940–41 and 1944–45 to 1946–47.

The years in which the numbers of livestock attained their peaks are as follows:—horses, 1918 (2,527,000); cattle, 1962 (18,033,000); sheep, 1962 (157,712,000); and pigs, 1941 (1,797,000).

The distribution throughout Australia of beef cattle, dairy cattle, sheep and pigs at 31st March, 1955, is shown in the maps on pages 909–12 of Official Year Book No. 43.

The numbers of horses, beef cattle and sheep in each State and Territory are shown later in this chapter; similar information for dairy cattle and pigs appears in the division Other Rural Industries of this chapter.

2. *Carrying Capacity of Pastoral Holdings.*—The carrying capacity of pastoral holdings has been increased in recent years, owing in some measure to the succession of good seasons experienced since 1946 (with the exception of the 1957–58 season, when prevailing dry conditions caused a slight decline in cattle and sheep numbers). Other important factors contributing to the progressive increase over this period have been the increased attention given to pasture improvement and the reduction of rabbit infestation, principally due to the introduction, in 1950, of the disease myxomatosis. Some information on pasture improvement in Australia is given on pages 1001–2.

3. *Size Classification of Cattle Herds and Sheep Flocks.*—A special series of tabulations relating to rural holdings in Australia was compiled for 1959–60 and has been published in full detail in a series of bulletins, *Classification of Rural Holdings by Size and Type of Activity*, 1959–60. Tables in these bulletins relating to beef, dairy cattle and sheep show classifications according to size of herd or flock, area of holding, area of wheat for grain, area of sown pastures, and type of activity. These data are presented by statistical division. An earlier series, prepared for the year 1955–56, presents similar data, but only by State.

4. *Value of Pastoral Production.*—(i) *Gross, Local and Net Values, 1961–62.* Values of pastoral production for each State are shown for 1961–62 in the following table. Further details of the source of the information and an explanation of the terms used in this compilation will be found in Chapter XXIX. Miscellaneous. Maintenance costs have not been computed in all States and depreciation has not been deducted; consequently the net values are inflated to the extent of these amounts.

**GROSS, LOCAL AND NET VALUES OF PASTORAL PRODUCTION, 1961–62**  
(£'000)

State or Territory	Gross production valued at principal markets	Marketing costs	Gross production valued at farm	Value of materials used in process of production	Net value of production (a)
New South Wales .. ..	218,914	18,799	200,115	(b) 17,113	183,002
Victoria .. ..	143,880	16,906	126,974	11,446	115,528

<b>Australia .. ..</b>	<b>593,659</b>	<b>54,910</b>	<b>538,749</b>	<b>57,411</b>	<b>481,338</b>

(a) No deduction has been made for depreciation and maintenance. (b) No allowance has been made for costs of power, power kerosene, petrol and other oils. (c) Not available.

(ii) *Net Values, 1957–58 to 1961–62.* The net value of pastoral production by State and the net value per head of population are shown below.

**NET VALUE OF PASTORAL PRODUCTION(a)**

Year	N.S.W.(b)	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Aust.(c)
NET VALUE (£'000)							
1957–58 ..	157,679	115,970	80,301	44,863	36,947	(b) 8,078	447,247
1958–59 ..	162,366	110,392	90,760	38,425	30,582	6,652	443,622
1959–60 ..	198,380	135,630	99,884	50,067	39,659	7,846	536,215
1960–61 ..	159,960	116,181	94,346	36,119	39,978	6,403	458,169
1961–62 ..	183,002	115,528	86,449	45,628	41,328	5,854	481,338

**NET VALUE PER HEAD OF POPULATION  
(£)**

1957–58 ..	43.1	43.2	56.5	50.6	53.3	24.3	45.9
1958–59 ..	43.5	40.1	62.6	42.3	43.3	19.6	44.6
1959–60 ..	52.3	48.1	67.6	53.6	55.3	22.8	52.8
1960–61 ..	41.3	40.2	62.7	37.7	54.8	18.3	44.1
1961–62 ..	46.4	39.1	56.6	46.6	55.4	16.4	45.4

(a) No deduction has been made for depreciation and maintenance. Payments to woolgrowers of profits from the war-time wool disposal plan, which were virtually completed by 30th June, 1959, have been excluded. (b) No allowance has been made for costs of power, power kerosene, petrol and other oils. (c) Includes Northern Territory and Australian Capital Territory.

5. **Indexes of Quantum and Price of Pastoral Production, 1957-58 to 1961-62.**—The quantum indexes relate to gross output of farm products valued at constant prices. The quantities of each farm product produced each year have been re-valued at the unit gross value for the period 1936-37 to 1938-39. The price indexes relate to average "prices" of farm products realized in the principal markets of Australia. Average quantities of each product marketed in the period 1946-47 to 1950-51 have been used as fixed weights. For further details of the methods of calculating these indexes and of the weights used, see Chapter XXIX. Miscellaneous.

### INDEXES OF QUANTUM(a) AND PRICE OF PASTORAL PRODUCTION: AUSTRALIA

(Base: Average 3 years ended June, 1939 = 100)

Particulars	1957-58	1958-59	1959-60	1960-61	1961-62
<b>QUANTUM(a) PRODUCED</b>					
Wool .. ..	148	164	172	165	174
Other products .. ..	134	152	153	136	160
<i>Total, Pastoral</i> ..	<i>142</i>	<i>159</i>	<i>163</i>	<i>152</i>	<i>167</i>
Per head of population	100	110	110	100	108
<b>PRICE</b>					
Wool .. ..	473	370	440	397	412
Other products .. ..	377	435	500	513	433
<i>Total, Pastoral</i> ..	<i>435</i>	<i>396</i>	<i>464</i>	<i>443</i>	<i>421</i>

(a) Index of value at constant prices, i.e. quantities revalued at average unit values of base years, 1936-37 to 1938-39.

## § 2. Sheep

1. **Distribution throughout Australia.**—With the exception of a short period in the early eighteen-sixties, when the flocks of Victoria outnumbered those of New South Wales, the latter State has occupied the premier position in sheep-raising, depasturing nearly one-half of the sheep of Australia.

Maps showing the distribution of sheep in Australia have been published in previous issues of the Official Year Book (see No. 43, p. 911, for 1955; No. 39, p. 907, for 1948; No. 34, p. 432, for 1938-39; and No. 22, p. 659, for 1924-25). Graphs showing the number of sheep in Australia from 1870 onwards appear on pages 1061-2.

The numbers of sheep in the several States and Territories at 31st March of each year 1958 to 1962 compared with average numbers for the three-year periods ended 1939, 1949 and 1959 are shown in the following table.

### SHEEP: NUMBER

('000)

Period	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
<b>Average for three years ended—</b>									
1939 ..	51,202	17,845	21,889	8,916	8,972	2,460	23	251	111,558
1949 ..	46,525	17,900	16,442	8,793	10,368	2,060	24	227	102,339
1959 ..	67,006	26,615	22,537	15,285	15,609	3,259	25	265	150,601
<b>Year—</b>									
1958 ..	65,410	27,090	22,274	15,236	15,724	3,298	27	256	149,315
1959 ..	67,936	26,925	22,148	15,634	16,215	3,536	19	272	152,685
1960 ..	71,000	26,597	23,332	14,025	16,412	3,494	15	299	155,174
1961 ..	68,087	26,620	22,135	14,952	17,152	3,439	16	278	152,679
1962 ..	69,498	27,533	22,125	16,415	18,314	3,531	10	286	157,712

Except when affected by drought, the relative numbers of sheep in the different States have remained fairly constant in recent years. The percentage distribution in 1962 was:—New South Wales, 44; Victoria, 18; Queensland, 14; South Australia, 10; Western Australia, 12; and Tasmania, 2.

2. **Numbers of Sheep on Rural Holdings.**—(i) *Size of Sheep Flocks.* Details of the size of sheep flocks on rural holdings in Australia for 1959–60 have been published in a series of publications entitled *Classification of Rural Holdings by Size and Type of Activity*, 1959–60.

(ii) *Sheep Numbers.* A record level of 157.7 million sheep was reached at 31st March, 1962. This figure is 2.5 million more than the previous maximum in 1960. In 1961, sheep numbers were only 152.7 million, the reduction being due primarily to dry conditions in Queensland and northern New South Wales.

The following table shows the approximate movement in sheep numbers in Australia in each year 1957–58 to 1961–62.

#### SHEEP AND LAMBS: ANALYSIS OF MOVEMENT IN NUMBERS, AUSTRALIA

('000)

Season	Lambs marked	Excess of exports	Sheep and lambs slaughtered	Estimated number of deaths from disease, drought, etc.(a)	Number at 31st March	Annual net increase (+) or decrease(—)
1957–58.. ..	36,850	120	24,417	12,800	149,315	— 487
1958–59.. ..	38,748	136	26,963	8,279	152,685	+ 3,370
1959–60.. ..	44,150	(b) 226	32,088	9,347	155,174	+ 2,489
1960–61.. ..	39,792	(b) 148	32,582	9,557	152,679	— 2,495
1961–62.. ..	45,596	(b) 201	33,317	7,045	157,712	+ 5,033

(a) Balance figure.

(b) No imports in this year.

3. **Classification of Sheep According to Age, Sex and Breed.**—In the following table, numbers of sheep in Australia are classified according to age and sex at 31st March.

#### SHEEP: AGE AND SEX, AUSTRALIA

('000)

Description	1958	1959	1960	1961	1962
Rams, 1 year and over ..	1,883	1,919	1,898	1,934	1,956
Breeding ewes (including ewes intended for mating) ..	66,059	69,470	68,455	69,662	70,693
Other ewes, 1 year and over ..	9,795	8,295	9,276	8,951	8,729
Wethers, 1 year and over ..	43,688	43,578	43,046	42,912	43,021
Lambs and hoggets, under 1 year .. ..	27,890	29,423	32,499	29,220	33,313
<b>Total, Sheep and Lambs</b>	<b>149,315</b>	<b>152,685</b>	<b>155,174</b>	<b>152,679</b>	<b>157,712</b>

Particulars relating to the principal breeds of sheep at 31st March, 1962, the latest date for which these data are available (details are collected on a triennial basis), are shown in the following table.

# LIVESTOCK: AUSTRALIA, 1870 to 1962

RATIO GRAPH

NOTE:— VERTICAL SCALE IS LOGARITHMIC, AND THE CURVES RISE AND FALL ACCORDING TO RATE OF INCREASE OR DECREASE; ACTUAL NUMBERS ARE INDICATED BY SCALE.

# SHEEP NUMBERS AND WOOL PRODUCTION: AUSTRALIA 1870 TO 1961-62

**SHEEP: PRINCIPAL BREEDS, 31st MARCH, 1962**  
( '000)

Breed	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
Merino ..	54,096	12,116	21,754	13,772	16,902	337	10	247	119,234
Other recognized breeds ..	7,203	6,990	48	1,149	587	1,959	..	11	17,947
Merino come-backs(a) ..	1,865	2,570	74	307	215	429	..	7	5,467
Crossbreeds(b) ..	6,334	5,857	249	1,187	610	806	..	21	15,064
Total ..	69,498	27,533	22,125	16,415	18,314	3,531	10	286	157,712

(a) Merino comeback is the progeny of a crossbred merino ewe and a merino ram, i.e. finer than half-bred.  
(b) Half-bred and coarser.

4. **Imports and Exports of Sheep.**—The overseas exports of live sheep from Australia are of comparatively minor importance. On 27th November, 1929, the export of stud merino sheep was prohibited, except with the approval of the Minister for Primary Industry. Exports of sheep are now principally for slaughter overseas. Consignments for this purpose in recent years were made chiefly from Western Australia to Singapore. Since June, 1958, an embargo has been imposed on the import of sheep in order to prevent the introduction of the disease blue-tongue. The following table shows the imports and exports of all sheep for the years 1957–58 to 1961–62.

**SHEEP: IMPORTS AND EXPORTS, AUSTRALIA**

Year	Imports		Exports	
	No.	Value	No.	Value
		£A.'000 f.o.b.		£A.'000 f.o.b.
1957–58 .. ..	2,256	90	122,628	466
1958–59 .. ..	5	1	135,720	393
1959–60 .. ..	(a)	(a)	225,757	805
1960–61 .. ..	(a)	(a)	147,592	461
1961–62 .. ..	(a)	(a)	200,883	697

(a) An embargo was placed on the import of sheep in June, 1958; see text above.

5. **Comparison with other Countries.**—In 1961–62, Australian flocks numbered 158 million sheep, compared with an estimate of 240 million for the U.S.S.R., China, and eastern Europe combined, about 49 million in New Zealand, and about 46 million in Argentina. World sheep numbers were estimated at about 920 million in 1961–62. These figures relate only to woolled sheep, non-woolled sheep accounting for about 5 per cent. of the world total of all types of sheep. Further details of sheep numbers in the principal wool producing countries of the world are given in the table on page 1075.

### § 3. Cattle

1. **Objects of Cattle-raising.**—Cattle-raising is carried out in all the States, the main object in certain districts being the production of stock suitable for slaughtering purposes, and in others the raising of profitable dairy herds. While dairy cattle are mainly restricted to coastal districts, beef cattle are more widely distributed, particularly in the eastern States, and are raised in areas unsuitable for dairy cattle, such as the tropical area of northern Queensland, the Northern Territory, and the Kimberley district in the north of Western Australia.

2. **Distribution throughout Australia.**—Although cattle numbers declined after 1957 because of drought conditions and heavy slaughtering, they began to rise again in 1960, and in 1962 reached a record level of 18,033,000.

A graph showing the number of cattle in Australia from 1870 onwards appears on page 1061.

The numbers of cattle (beef and dairy) in the several States and Territories in each year 1958 to 1962, compared with averages for the three-year periods ended 1939, 1949 and 1959, are shown below.

**CATTLE: NUMBER**  
(<sup>'000</sup>)

1961 ..	4,242	2,864	7,004	561	1,100	394	1,154	13	17,332
1962 ..	4,399	3,156	7,098	659	1,218	425	1,064	14	18,033

Although the proportion was not as high as it has been in some previous years, Queensland was carrying 39 per cent. of the cattle in Australia in 1962. The percentage in each State and Territory during that year was:—New South Wales, 24; Victoria, 18; Queensland, 39; South Australia, 4; Western Australia, 7; Tasmania, 2; and Northern Territory, 6.

Maps showing the distribution of beef and dairy cattle in Australia have been published in previous issues of the Official Year Book (*see* No. 43, pp. 909–10, for 1955; No. 39, pp. 905–6, for 1948; No. 34, pp. 453–4, for 1938–39; and No. 22, p. 660, for 1924–25).

3. *Classification of Cattle.*—(i) *According to Purpose.* Of the total number of cattle in Australia in 1962, 12,987,000 or 72 per cent. were classified as beef cattle. The numbers classified as beef cattle in the several States and Territories during the years 1958 to 1962, compared with averages for the three-year periods ended 1949 and 1959, are shown in the following table.

**BEEF CATTLE: NUMBER**  
(<sup>'000</sup>)

Period	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
Average for three years ended—									
1949 ..	1,832	686	4,592	171	604	100	1,006	6	8,997
1959 ..	2,462	1,023	5,882	341	763	165	1,173	7	11,816
Year—									
1958 ..	2,429	1,026	5,917	338	771	167	1,244	6	11,898
1959 ..	2,382	998	5,643	328	784	171	1,099	6	11,411
1960 ..	2,562	946	5,757	260	814	168	1,111	8	11,626
1961 ..	2,961	1,147	5,790	313	876	180	1,155	9	12,431
1962 ..	3,127	1,332	5,890	385	983	196	1,063	11	12,987

Particulars relating to dairy cattle numbers will be found in the division Other Rural Industries of this chapter. (*See* p. 1086.)

(ii) *According to Size of Cattle Herds.* Details of size of cattle herds on rural holdings in Australia for 1959–60 have been published in a series of publications entitled *Classification of Rural Holdings by Size and Type of Activity*.

4. *Cattle and Beef Research Schemes.*—In May, 1960, legislation was enacted to provide for a Commonwealth scheme for an expanded programme of research into the scientific, technical and economic problems connected with the Australian beef industry.

Funds are raised by a levy on all cattle weighing over 200 lb. dressed which are slaughtered for human consumption, and the Commonwealth provides a matching contribution on a £1 for £1 basis to meet expenditure on new research. The scheme is administered by the Australian Cattle and Beef Research Committee, whose main function is to formulate plans for projects on which the funds may be expended. The research is undertaken by existing bodies such as the universities, C.S.I.R.O. and State Departments of Agriculture.

The Minister for Primary Industry has approved a research programme of £483,000 for 1963-64.

At its first meeting in June, 1960, the Committee agreed to recommend to the Minister for Primary Industry that the levy be fixed at the maximum provided in the Act, namely 2s. per head. The levy was operative from 1st July, 1960. It was suspended in October, 1960, as a result of a High Court writ being issued by certain meat operators challenging the validity of the Act. Amending legislation was enacted in October, 1961, and the levy again became operative from the 14th October, 1961. The three Acts covering the research arrangements and collection of the levy are the *Cattle and Beef Research Act 1960-1961*, the *Cattle Slaughter Levy Collection Act 1960-1961*, and the *Cattle Slaughter Levy Act 1960*. The *Cattle Slaughter Levy (Suspension) Act 1961* covers the suspension of levy from 14th October, 1960, to 13th October, 1961.

5. **Imports and Exports of Cattle.**—In 1961-62, most of the cattle exported from Australia were sent to Hong Kong for slaughtering, the number exported thereto being 5,280 head valued at £121,343. The number of cattle imported is small and consists mainly of valuable animals for stud purposes. Since June, 1958, an embargo has been imposed on the import of cattle in order to prevent the introduction of the disease blue-tongue. Details for the years 1957-58 to 1961-62 are shown in the following table.

#### CATTLE: IMPORTS AND EXPORTS, AUSTRALIA

Year	Imports		Exports	
	No.	Value	No.	Value
		£A.'000 f.o.b.		£A.'000 f.o.b.
1957-58 .. .. .	272	174	23,933	932
1958-59 .. .. .	37	62	13,900	493
1959-60 .. .. .	(a)	(a)	13,602	456
1960-61 .. .. .	(a)	(a)	10,159	404
1961-62 .. .. .	(a)	(a)	7,304	303

(a) An embargo was placed on the import of cattle in June, 1958; see text above.

6. **Comparison with Other Countries.**—The following table shows the number of cattle in Australia and in some of the principal cattle-raising countries of the world at the latest available date.

#### CATTLE: NUMBER IN VARIOUS COUNTRIES

(Source: *World Agricultural Production and Trade*, United States Department of Agriculture) ('000)

(a) Subject to revision.

(b) Includes buffaloes.

### § 4. Horses

1. **Distribution throughout Australia.**—About 80 per cent. of the horses in Australia are in the States of New South Wales, Victoria and Queensland. In the following table, figures are shown for each State and Territory for the years 1958 to 1962.

#### HORSES: NUMBER

('000)

Year	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
1958 ..	221	98	243	35	44	13	39	1	694
1959 ..	214	91	240	33	41	12	39	1	671
1960 ..	204	81	234	30	41	11	38	1	640
1961 ..	192	65	224	27	40	9	40	1	598
1962 ..	168	61	217	25	40	9	41	1	562

The number of horses in Australia reached a peak of 2,527,000 in 1918. Since then, it has declined, because of mechanization of transport and farming, at an average rate of 45,000 a year. A graph showing the number of horses in Australia since 1870 appears on page 1061.

The percentage distribution of the number of horses in each State and Territory for 1962 was:—New South Wales, 30; Victoria, 11; Queensland, 39; South Australia, 4; Western Australia, 7; Tasmania, 2; and Northern Territory, 7.

2. **Overseas Trade in Horses.**—Exports of horses in 1961–62 numbered 579, valued at £354,483 (Australian produce 492 for £261,346; re-exports 87 for £93,137), made up of horses for breeding (111 valued at £33,935), horses for racing (336 valued at £287,492, shipped principally to Singapore) and horses for other purposes (132 valued at £33,056).

The few horses imported into Australia are mainly stud animals from the United Kingdom and racehorses from New Zealand. The total number imported in 1961–62 was 563 valued at £504,195.

### § 5. Pastoral Products: Wool

1. **General.**—With about one-sixth of the world's woolled sheep, Australia produces more than one-quarter of the world's wool and more than half of the world's fine-quality merino wool. The bulk of the production is exported, mainly as greasy wool, although substantial amounts of scoured and carbonized wool, wool on sheep skins and small quantities of semi-manufactured wool are also shipped. The remainder, which is used by Australian manufacturers, has amounted to only about 7 per cent. of the total production (greasy basis) in recent years.

The important position held by Australia among the principal sheep and wool producing countries of the world is shown in the table on page 1075.

2. **Wool Marketing, Promotion and Research.**—Details of past marketing schemes and agreements, including the 1914–18 War Imperial Purchase Scheme, the British Australian Wool Realization Association Ltd., the 1939–45 War Acquisition Scheme, Joint Organization and Minimum Reserve Price Plan, are given in previous issues of the Official Year Book.

3. **Auction System.**—More than ninety per cent. of the Australian wool clip is disposed of at auction. (During both world wars, however, auction selling was suspended and replaced by bulk purchase schemes.)

There are thirteen recognized wool-selling centres, namely Sydney, Goulburn, Newcastle, Albury, Melbourne, Geelong, Ballarat, Brisbane, Adelaide, Perth, Albany, Hobart and Launceston. At these centres, wool-selling brokers operate large stores where wool received from growers is held awaiting sale.

Each year a wool-selling programme is drawn up jointly by the selling brokers and wool-buyers on the basis of the expected clip. Selling dates and the quantities to be offered are then determined for each centre.

Before each sale, the selling brokers, who act as agents for the woolgrowers, display a representative portion of the wool to be sold on show floors for buyers' inspection and valuation. Auction sales are attended by buyers purchasing on behalf of wool users in over fifty countries.

**4. Wool Marketing Committee of Inquiry and Wool Industry Act.**—In January, 1961, the Commonwealth Government appointed an independent committee to inquire into the marketing and promotion of Australian wool and related matters (*see* Official Year Book No. 48, page 977, for further details). The Committee presented its report to the Government in February, 1962. Its most important recommendation was that the promotion of wool and research into the industry should be brought under the control of a single body, which should also act as an advisory authority on wool marketing. The other recommendations of the Committee largely depended upon this recommendation to establish a central authority. The *Wool Industry Act* was passed by Parliament in December, 1962. Parts 1, 2, 5 and 6 were proclaimed on 1st May, 1963, and Part 3 on 1st July, 1963. Part 4 has not yet been proclaimed. This Act provided for the establishment of the Australian Wool Board.

**5. Australian Wool Board.**—This Board took over the functions of the Australian Wool Bureau, the Wool Research Committee and the Australian Wool Testing Authority. Details of these bodies appear in Official Year Book No. 48, pages 977–81. In addition to these functions, the new Wool Board will investigate all aspects of wool marketing on a continuing basis and advise on measures which should be adopted to meet changing marketing conditions.

The Wool Board consists of a Chairman, six members to represent woolgrowers, a representative of the Commonwealth Government and three other members. The first Chairman of the Board was appointed by the Minister for Primary Industry after consultation with the Australian Wool Industry Conference (*see* below). Subsequent Chairmen will be appointed on the nomination of the Board. The six woolgrower representatives have been appointed by the Minister on the nomination of the Conference, while the three other members have been appointed from a panel of names submitted by the Conference. These three members have been drawn from the separate fields of wool-marketing and manufacturing, research, finance and commerce.

Under the Act, the Wool Board will be required to establish a Wool Marketing Committee, whose function will be to initiate and maintain a continuing investigation into all aspects of wool marketing. The Committee will report its findings to the Board, which in turn, will make recommendations to the Australian Wool Industry Conference on any proposed significant alterations to the marketing system. It is the stated policy of both federal woolgrower organizations, with which the Commonwealth Government agrees, that no fundamental change should be made in the present system of wool-marketing without the approval of woolgrowers at a referendum except in a state of national emergency. The Board will not have any executive powers over marketing.

The Board will be required to establish similar committees to administer wool testing and to advise it on wool research. Details relating to the Australian Wool Testing Authority and the Wool Research Committee under prior legislation are given in Official Year Book No. 48, pages 978 and 981.

**6. The Australian Wool Industry Conference.**—The Australian Wool Industry Conference is at present composed as follows:—one independent Chairman, twenty-five woolgrowers nominated by the Australian Woolgrowers' and Graziers' Council and twenty-five woolgrowers nominated by the Australian Wool and Meat Producers' Federation.

This Conference is a non-statutory body, but is the recognized national forum of woolgrowers. It was constituted jointly by the Council and the Federation on 24th October, 1962.

The principal functions of the Conference are to nominate the six woolgrower representatives for appointment to the Australian Wool Board; consult with the Minister for Primary Industry concerning the appointment of the three other members to the Board; recommend the maximum and operative rates of levy to be collected from woolgrowers to finance the activities of the Board; and consult with the Wool Board on the activities of the Board.

**7. Wool Levy.**—Legislation between 1936 and 1952 provided for a direct levy upon woolgrowers' returns for wool promotion and research. Details of these Acts have been given in Official Year Book No. 48, page 978.

In 1957, new *Wool Tax Acts* were passed to provide for the collection of a contribution for wool research as part of the levy on woolgrowers. The wool levy thus became a composite charge consisting of the wool promotion levy (i.e. the amount collected for wool promotional purposes), which was left unchanged at 4s. a bale, and the wool research levy, which was fixed at 2s. a bale.

In 1960, the wool promotion levy was raised to 5s. a bale, and the following year amending legislation set the levy for 1961-62 at 10s. a bale. However, the operation of this rate was subsequently extended for the year 1962-63. The wool research levy has remained unchanged at 2s. a bale since 1957.

The imposition and collection of the wool levy is governed by three complementary Acts, the *Wool Tax Acts (Nos. 1 and 2)* 1957-1962 and the *Wool Tax Assessment Act* 1936-1962.

**8. Wool Production.**—(i) *General.* Wool as shorn from the sheep contains an appreciable amount of grease, dirt and other extraneous matter, and is termed "greasy wool". The quantity of grease and other matter in a fleece differs not only between countries, but between districts in the same country. It fluctuates with the vagaries of the season, and with the breed and the condition of the sheep.

To allow for this factor, the weight of greasy wool is sometimes given on a "clean" basis, i.e. minus the estimated amount of impurities. The net wool fibre content of greasy wool, expressed as a percentage, is termed "clean yield".

From 1946-47 to 1952-53, the Australian Wool Realization Commission, and from 1953-54, the Wool Statistical Service, have assessed annually the clean yield of the Australian wool clip. During the period of assessment, the clean yield has shown a continuous rise up to 1951-52, when it reached 57.5 per cent. It has since fluctuated between 55.8 per cent. and 57.7 per cent.

Wool scoured, washed and carbonized in Australia before export, however, has a clean yield somewhat lower than for the whole clip, because the grade of greasy wool treated locally for export as scoured, washed or carbonized includes a large proportion of dirty and low-grade wool. In recent years, it has approximated 54 per cent. The quantity of this wool exported during 1961-62 was about 12 per cent. of the total raw wool exports (excluding wool exported on skins) in terms of greasy.

For the clean yield of Australian scoured wools, a standard factor of 93 per cent. is taken.

(ii) *Production.* The production of wool in the States and Territories varies broadly in accordance with the number of sheep depastured and with seasonal conditions which affect clip per head (see para. 8 (iii), p. 1069). In general, however, South Australia obtains from its large-framed merinos a much heavier fleece per sheep than the Australian average, while Tasmania generally obtains from its predominantly non-merino flocks a lighter fleece per sheep. In addition, as a result of better management (improved pastures, fodder conservation, better breeding, control of diseases, etc.), the long-term trend has been towards higher fleece weights.

The following table shows details of total wool (i.e. shorn, dead and fellmongered, and exported on skins) produced by each of the States and Territories during the years 1957-58 to 1961-62 compared with averages for the three-year periods ended 1938-39, 1948-49 and 1958-59. A graph showing the production of wool in relation to sheep numbers from 1870 onwards appears on page 1062.

#### PRODUCTION OF WOOL (IN TERMS OF GREASY) (<sup>000</sup> lb.)

Period	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.

The bulk of the Australian wool production (about 91 per cent. in recent years) is shorn from live sheep. The remainder is obtained by fellmongering (about 2 per cent.), or is exported on skins (about 7 per cent.). The following table shows details of total wool production according to method of obtaining wool, and also the gross value of wool produced. Gross value is based, for shorn wool, upon the average price realized for greasy wool sold at auction, and, for skin wools, on prices recorded by fellmongers and skin exporters.

**QUANTITY (IN TERMS OF GREASY) AND VALUE OF WOOL PRODUCED:  
AUSTRALIA**

Period	Shorn (incl. crutchings)	Dead and fell- mongered	Exported on skins	Total production

(a) Excludes Northern Territory.

(iv) *Classification of Wool According to Quality.* The following table provides a detailed analysis of wool sold at auction, according to quality, for the years 1957-58 to 1961-62. These data are compiled by the Wool Statistical Service on the basis of catalogues of auction sales. "Quality" ("64's, 60's, 58's," etc.) is a measure of the fineness and texture of wool for spinning purposes. Broadly, it means the maximum number of hanks of yarn, each of 560 yards length, which can be spun from 1 lb. of combed wool. For instance, wool of 64's quality is of a fineness and texture which will produce 64 hanks, each of 560 yards, from 1 lb. of tops (combed wool) of that particular wool.

**CLASSIFICATION OF GREASY WOOL SOLD AT AUCTION(a): AUSTRALIA**  
(Bales of approximately 300 lb.)

Pre-dominating quality	1957-58		1958-59		1959-60		1960-61		1961-62

(a) All greasy wool sold at auction except "wool re-offered account buyer".

9. *Price and Value.*—(i) *Price.* During 1961-62, the price of greasy wool sold in the selling centres of Australia averaged 54.1d. per lb. compared with the average price of 52.1d. per lb. in 1960-61 and 57.8d. in 1959-60.

The prices quoted above, except for United Kingdom contract prices, are as compiled by the National Council of Wool Selling Brokers and represent the average price realized for all greasy wool, of whatever type or quality, marketed during the years indicated.

(ii) *Value.* Fluctuation in Australian wool prices has a marked effect on the nation's rural and national income. In 1945-46, the gross value of wool production was £58,597,000, representing 17.4 per cent. of the gross value of production of all rural industries, while in 1950-51, when prices reached a peak, wool was valued at £651,902,000 or 55.6 per cent. of the total value of production for all rural industries. The value of wool production fell in subsequent years even though the quantity produced increased substantially, and in 1961-62 was £372,554,000. This figure represented 27.2 per cent. of the gross value of production of rural industries.

Details of the value of wool production for the years 1957-58 to 1961-62 are shown in the following table.

**ESTIMATED GROSS VALUE OF TOTAL WOOL PRODUCTION(a)**  
(£'000)

Season	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.(b)	A.C.T.	Aust.
1957-58 ..	143,337	76,255	53,836	42,354	39,209	7,742	67	606	363,406
1958-59 ..	134,764	59,471	45,075	33,797	30,915	6,844	36	513	311,415
1959-60 ..	168,112	75,952	54,573	42,691	39,334	8,254	35	810	389,761

(a) Includes shorn, dead and fellmongered wool and wool exported on skins.

(b) Estimated.

10. **Stocks of Wool.**—Stocks of raw wool held in Australia at 30th June, 1962, amounted to 232.7 million lb. (greasy basis), of which 58.0 million lb. (37.1 million lb. as greasy and 20.9 million lb. as scoured and carbonized) were held by woollen mills, wool scourers and fellmongers, and 174.7 million lb., assumed to be all greasy, were held by brokers. Of the wool held by brokers, 58.3 million lb. were unsold wool and 116.4 million lb. were sold wool held awaiting shipment. These stocks exclude wool on skins, since this wool is not recorded as production until fellmongered in Australia or exported on skins.

11. **Consumption of Wool.**—(i) *Consumption of Raw Wool.* Statistics of raw wool consumption published in recent years for the purposes of broad international comparisons are based on the quantities of scoured or carbonized wool used on the woollen and worsted systems (mill consumption), plus quantities used in such processes as felting. Consumption estimates compiled on this basis have obvious defects, as they disregard oversea trade in semi-processed wool (e.g. tops and yarns) as well as woollen goods. Estimates of raw wool used on the woollen and worsted systems and by felt manufacturers in Australia are shown in the following table for the years 1957–58 to 1961–62.

ESTIMATED CONSUMPTION OF RAW WOOL IN AUSTRALIA  
(’000 lb.)

Year	Greasy basis			Clean basis		
	Used on woollen and worsted systems	Used for felt manufacture (including hats)	Total	Used on woollen and worsted systems	Used for felt manufacture (including hats)	Total
1957–58 ..	103,704	4,480	108,184	63,153	2,128	65,281
1958–59 ..	103,180	3,992	107,172	62,834	1,896	64,730
1959–60 ..	123,529	5,092	128,621	75,226	2,419	77,645
1960–61 ..	104,801	3,896	108,697	63,414	1,851	65,265
1961–62 ..	111,330	3,608	114,938	67,365	1,714	69,079

(ii) *Consumption of Locally Processed Wool.* As considerable quantities of tops, noils and yarn are exported from Australia, the series on raw wool consumption shown above is over-stated to this extent. The series entitled “Estimated Consumption of Locally Processed Wool in Australia” provides a more reliable indication of wool consumption in Australia, as allowance has been made for exports of wool in semi-processed form. This series is shown in the following table for the years 1957–58 to 1961–62. Briefly, the series measures consumption of wool in terms of yarn used in Australian mills and other factories to produce woollen cloth and other woollen goods, yarn used for hand knitting purposes, and scoured wool used for felt manufacture. No allowance has been made for oversea trade in woollen piece goods, clothing, etc., because of the obvious difficulties of estimating accurately the wool content of these products.

ESTIMATED CONSUMPTION OF LOCALLY PROCESSED WOOL IN AUSTRALIA  
(’000 lb.)

(a) Includes hand knitting yarns used.  
of wool and other fibres.

(b) Includes wool content of yarns containing a mixture

12. **Exports of Wool.**—(i) *Quantities.* (a) *Greasy.* Of the total shipments in 1961–62, 31 per cent. went to Japan, 15 per cent. to the United Kingdom, 11 per cent. to Italy, 10 per cent. to France and 8 per cent. to Belgium-Luxembourg. The following table shows the quantities of greasy and slipe wool exported, and the principal countries of consignment.

(ii) *Total Value of Exports.* The value of wool (other than wool on sheepskins) exported from Australia during 1961-62 was 36 per cent. of the total value of exports of merchandise of Australian origin, while the proportion for the five years ended 1961-62 averaged 38 per cent. The value for the five years ended 1961-62, together with the principal countries to which wool was exported, is shown in the following table.

## VALUE OF WOOL EXPORTS: AUSTRALIA(a)

(£'000)

(a) Greasy, slipe, washed and scoured, and carbonized.

Australian wool represented 38 per cent. of the total quantity imported into the United Kingdom during 1962. New Zealand supplied 26 per cent., while the total quantity received from Commonwealth countries constituted 69 per cent. of all United Kingdom imports of wool.

13. *World Sheep Numbers, Wool Production and Trade.*—(i) *Numbers and Production.* The following table shows particulars of the woolled sheep numbers and total production of wool, in terms of greasy, in the principal wool-producing countries of the world, together with estimates of world production of merino, crossbred, and carpet type wool for the latest available years.

In 1961-62, Australia produced 30 per cent. of the world total of all types of wool, the share of all British Commonwealth countries combined representing approximately 45 per cent. The principal wool producers, other than Australia, were New Zealand with 10 per cent. of the world total, Argentina, 7 per cent., United States of America, 6 per cent., and Republic of South Africa, 6 per cent. Production in the U.S.S.R., China and eastern European countries together amounted to 20 per cent. World production of wool (all types) in 1961-62 exceeded the pre-war average for the years 1934 to 1938 by approximately 1,925 million lb. or 51 per cent.

Australia's wool clip is predominantly merino. New Zealand and Argentina produce mainly crossbred wool, while the clip of the U.S.S.R. is largely of the carpet type. World production of merino wool in 1961-62 was 45 per cent. above the average for the years 1934 to 1938, and the production of crossbred types has risen by about 66 per cent. Carpet wool production has risen by about 35 per cent.

Germany, Federal Re- public of .. ..	(c)	73.3	28.3	37.1	24.8	56.4	219.9

(a) Greasy basis, 1961-62. (b) Actual weight of greasy and scoured wool. (c) Not available. (d) Imports are in terms of estimated clean content of greasy and scoured wool. Actual weight of total United States of America imports was 335.4 million lb.

As a considerable transit trade exists between European countries, it must not be assumed that the whole of the imports recorded by these countries is retained for their own consumption. The countries chiefly concerned with the transit trade are the United Kingdom and Belgium.

## § 6. Pastoral Products: Meat

1. General.—(i) *Australian Meat Board.* The Australian Meat Board, consisting of representatives of producers, processors, exporters and the Commonwealth Government, is responsible for the control of all exports of Australian meat and meat products. Further information on the powers, etc., conferred on the Board under the *Meat Export Control Act 1935–1960* is given on page 801 of Official Year Book No. 40.

(ii) *United Kingdom Long-term Purchase Agreements.* Details of the long-term meat contracts with the United Kingdom Government from the outbreak of the 1939–45 War up to 30th June, 1952, and of the Fifteen Year Meat Agreement (1952–67) are given on page 710 of Official Year Book No. 41 and in earlier issues.

The Fifteen Year Meat Agreement (1952–67) between the United Kingdom and Australian Governments has as its objectives the promotion of meat production in Australia, enabling increased exports to be made to the United Kingdom, and the provision of a satisfactory market in the United Kingdom for such meat. It covers beef and veal, and mutton and lamb.

(iii) *Reversion to Private Trading.* Following the announcement in September, 1953, that the United Kingdom Ministry of Food would cease bulk purchasing of meat, arrangements were made between the Australian Meat Board and the Ministry for the reversion to private trading in the United Kingdom. The main features of the arrangements were given in previous issues of the Year Book (see No. 47, p. 960).

Details of the minimum prices operating in recent years under private trading agreements, and an outline of the Acts relevant to the administration of the scheme, appear in Official Year Book No. 48, page 973.

(iv) *Minimum Prices and Deficiency Payments.* From 1st October, 1955, until April, 1958, beef prices in the United Kingdom were consistently below the level of the guarantee and consequently Australia "earned" deficiency payments which enabled the Australian Meat Board to make substantial bounty payments on beef exported to the United Kingdom. The rates of payment made during the 1954–55 and 1955–56 seasons are given on pages 888–9 of Official Year Book No. 43 and those for 1956–57 on pages 920–1 of Official Year Book No. 44. No deficiency payments have been received for beef since 1956–57, but a deficiency payment was earned on lamb for the first time during the 1960–61 season, and as a result a bounty was paid at the rate of 2s. per carcass and ¾d. per lb. for piece lamb entered into cold stores for export to the United Kingdom during the period 1st August, 1961, to 28th April, 1962. A further deficiency payment was earned during the 1961–62 season.

For the 1962–63 lamb export season, the Australian Meat Board has guaranteed exporters a minimum price of 18d. per lb. f.o.b. on all lambs 36 lb. and under, shipped to the United Kingdom during the period September to November, 1962; and 16.5d. per lb. for the following three months, December to February. The higher guaranteed price for the initial period was aimed at stimulating early shipments, because normally the most opportune time for selling Australian lamb on the United Kingdom market is early in the export season. Any commitment by the Board is payable from moneys accrued in the Lamb Deficiency Payments Account under the Fifteen Year Meat Agreement.

(v) *"Chiller" Export Beef.* In 1958, a new "chiller" grade of export beef was introduced. Exporters of the new grade, whether exporting beef in the chilled or frozen form, received a bounty of 5d. per lb. The bounty on boneless piece beef was increased from 4d. to 5d. per lb., and that on certain classes of carcass piece beef from 3d. to 5d. per lb. The basic rate of 3d. per lb. was maintained for other 1st and 2nd quality quarter beef. The bounty payments were discontinued on 27th December, 1958, because of the relatively high prices being obtained in the United Kingdom.

2. **Beef and Veal.**—(i) *Cattle Slaughtered.* The numbers of cattle slaughtered during each of the years ended June, 1958 to 1962, compared with averages for the three-year periods ended June, 1939, 1949 and 1959, are shown in the following table.

**CATTLE (INCLUDING CALVES) SLAUGHTERED**  
(‘000)

Period	Slaughterings passed for human consumption									Total slaughtering including boiled down

1938–39 ..	181	123	199	26	28	10	1	1	569
1948–49 ..	160	106	206	27	30	9	3	1	542
1958–59 ..	248	176	305	41	41	19	5	2	837
Year—									
1957–58 ..	233	181	270	41	39	20	5	2	791
1958–59 ..	275	189	328	42	45	20	5	2	906
1959–60 ..	217	159	267	33	46	23	5	2	752
1960–61 ..	168	125	247	27	42	17	6	1	633
1961–62 ..	234	176	278	30	47	20	4	2	791

(iii) *Consumption of Beef and Veal.* The highest post-war consumption of beef and veal was 132.7 lb. per head in 1956–57. With the buoyant overseas market for beef and the high prices ruling in Australia during the following four years, consumption per head fell substantially, and in 1960–61 amounted to only 88.3 lb. In 1961–62, there was a considerable rise in consumption per head to 95.8 lb., consisting of 92.9 lb. carcass weight and 2.9 lb. (carcass equivalent) of canned meat. There has been a marked substitution of mutton and lamb for beef in Australia since 1956–57.

The figures quoted in the preceding paragraph include the consumption of canned beef and veal, and differ on that account from the figures shown in the last column of the next table.

In the following table, details of the production and disposal of beef and veal are shown for the years 1957-58 to 1961-62, compared with the averages for the three years ended 1938-39, 1948-49 and 1958-59.

### PRODUCTION AND DISPOSAL OF BEEF AND VEAL (CARCASS WEIGHT): AUSTRALIA

('000 tons)

Period	Net change in stocks	Production	Exports (a)	For canning	Apparent consumption in Australia	
					Total	Per head per annum
Average for three years ended—						lb.
1938-39 .. ..	n.a.	569	121	18	430	140.3
1948-49 .. ..	+ 1	542	101	67	373	109.1
1958-59 .. ..	+ 5	837	209	85	538	123.8
Year—						
1957-58 .. ..	+ 4	791	155	88	544	125.1
1958-59 .. ..	+ 8	906	296	80	522	117.6
1959-60 .. ..	- 11	752	262	55	446	98.4
1960-61 .. ..	+ 4	633	190	43	396	85.4
1961-62 .. ..	+ 6	791	299	46	440	92.9

(a) Includes carcass equivalent of boneless beef exported and ships' stores.

(iv) *Exports of Beef and Veal.* In 1961-62, chilled beef exports were 1,623,000 lb. valued at £140,000, while frozen beef exports amounted to 443,139,000 lb. valued at £57,946,000.

While beef and veal were previously shipped largely in carcass form, there has been in recent years a substantial increase in the amount of boneless beef exported. From 1958-59 to 1961-62, the quantity of boneless beef shipped exceeded that exported in carcass form. The trade in boneless beef has been developed principally with the United States of America.

Since 1958-59, the United States has surpassed the United Kingdom as the principal market for Australian beef exports. The total value of beef and veal shipped to these two countries during 1961-62 was £45,895,000 and £7,765,000 respectively.

The quantity and value of Australian frozen beef and veal exported from Australia in each year 1957-58 to 1961-62 are shown in the following table. Figures in this table represent actual weight shipped, not carcass equivalent.

### EXPORTS OF FROZEN AND CHILLED BEEF AND VEAL: AUSTRALIA

Year	Exports of frozen and chilled beef		Exports of frozen veal	
	Quantity	Value	Quantity	Value
	'000 lb.	£A.'000 f.o.b.	'000 lb.	£A.'000 f.o.b.
1957-58 .. ..	276,607	20,961	5,397	609
1958-59 .. ..	499,371	54,154	10,869	1,331
1959-60 .. ..	414,749	54,568	6,827	897
1960-61 .. ..	295,686	39,447	4,506	663
1961-62 .. ..	444,762	58,086	5,834	754

3. **Mutton and Lamb.**—(i) *Sheep Slaughtered.* The following table shows the numbers of sheep slaughtered in the several States during each of the years ended June, 1958 to 1962, compared with averages for the three-year periods ended June, 1939, 1949 and 1959.

### SHEEP (INCLUDING LAMBS) SLAUGHTERED

(iii) *Consumption of Mutton and Lamb.* In 1959-60, consumption of mutton and lamb exceeded that of beef and veal for the first time on record. A small decline followed in 1960-61, when the amount of mutton and lamb consumed per head was estimated as 103 lb. There was a further decline in 1961-62 when the estimated consumption per head was 99 lb. This figure is still, however, about 3 lb. per head more than the consumption per head of beef and veal in 1961-62. Figures quoted in this paragraph include the consumption of canned mutton, and differ on that account from the figures in the last column of the table following.

The following table gives details of the production and disposal of mutton and lamb.

# **PRODUCTION AND DISPOSAL OF MUTTON AND LAMB (CARCASS WEIGHT): AUSTRALIA**

('000 tons)

1961-62	..	..	..	-1	219	17	..	203	43.0

(a) Includes carcass equivalent of boneless mutton exported.

(iv) *Exports of Frozen Mutton and Lamb.* The quantities and values of exports of Australian frozen mutton and lamb in each year 1957-58 to 1961-62 are shown in the following table.

## **EXPORTS OF FROZEN MUTTON AND LAMB: AUSTRALIA**

Year		Exports of frozen mutton		Exports of frozen lamb		Exports of frozen mutton and lamb	
		Quantity	Value	Quantity	Value	Quantity	Value
		'000 lb.	£A.'000 f.o.b.	'000 lb.	£A.'000 f.o.b.	'000 lb.	£A.'000 f.o.b.
1957-58..	..	42,270	2,253	64,352	6,132	106,622	8,385
1958-59..	..	74,650	5,851	91,192	8,151	165,842	14,002
1959-60..	..	71,763	4,719	59,264	4,389	131,027	9,108
1960-61..	..	83,075	7,437	64,430	5,790	147,505	13,227
1961-62..	..	109,113	8,156	37,399	2,624	146,512	10,780

The principal customer for Australian frozen mutton and lamb was formerly the United Kingdom, although the United States of America has become a major buyer of mutton in recent years. In 1961-62, exports of mutton and lamb to the United Kingdom represented 15 per cent. and 71 per cent., respectively, of the total quantities exported. Forty-six per cent. of the mutton exported went to the United States of America, largely in the form of boneless meat, and the proportion of lamb exported to that country was seven per cent.

4. **Consumption of Meat and Meat Products.**—The apparent consumption per head of meat (including cured and canned meat) and edible offal in Australia is shown in the table below for the years 1957-58 to 1961-62 in comparison with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

**MEAT (INCLUDING CURED AND CANNED) AND EDIBLE OFFAL AVAILABLE FOR CONSUMPTION: AUSTRALIA**

(lb. per head per year)

(d) Includes

## § 7. Other Pastoral Products

1. **Tallow.**—(i) *Marketing.* Reference is made in Official Year Book, No. 47, page 976, to the now inoperative contracts relating to the sale of tallow to the United Kingdom.

(ii) *Consumption in Factories.* Details of consumption are collected from the principal factories using tallow. Consumption of inedible tallow in these factories (soap and candle, chemical and woolscouring works) for the five years 1957-58 to 1961-62 was as follows:—1957-58, 1,280,984 cwt.; 1958-59, 1,216,668 cwt.; 1959-60, 1,278,546 cwt.; 1960-61, 1,196,137 cwt.; 1961-62, 1,077,627 cwt. These figures are, however, deficient to the extent that no allowance has been made for small unrecorded amounts used in other types of establishments. Details of edible tallow consumed in factories are not available.

(iii) *Exports.* Particulars of exports of edible and inedible tallow of Australian produce are shown in the following table for the five years 1957-58 to 1961-62.

**TALLOW: EXPORTS, AUSTRALIA**  
(cwt.)

Particulars	1957-58	1958-59	1959-60	1960-61	1961-62
Edible .. ..	116,986	73,056	118,848	50,436	130,012
Inedible .. ..	878,060	1,022,844	1,533,734	1,079,191	1,853,161
<b>Total .. ..</b>	<b>995,046</b>	<b>1,095,900</b>	<b>1,652,582</b>	<b>1,129,627</b>	<b>1,983,173</b>

2. **Oversea Trade in Hides and Skins.**—(i) *Values.* The value of cattle and horse hides, sheep and other skins, and skin pieces, sent overseas during 1961-62 amounted to £32,044,000, compared with a total of £27,077,000 in 1960-61 and £31,728,000 in 1959-60.

(ii) *Sheepskins with Wool.* Of the total exports of sheepskins with wool during 1961-62, amounting to 174,379,000 lb. valued at £24,208,000, 118,291,000 lb. valued at £16,071,000 (66 per cent. of total value) were shipped to France, 23,537,000 lb. valued at £3,735,000 (15 per cent.) to Italy, and 13,019,000 lb. valued at £1,613,000 (7 per cent.) to the United Kingdom. In the previous year, France received about 69 per cent. (by value) of all sheepskins with wool exported, Italy 11 per cent. and the United Kingdom 8 per cent. The exports of sheepskins with wool during each of the years 1957-58 to 1961-62 were as follows.

(iii) *Sheepskins without Wool.* Up to 1943-44, sheepskins without wool were exported chiefly to the United States of America which, during 1943-44, accounted for 97 per cent. of the total shipments. In subsequent years, however, there has been a decline in the proportion shipped to the United States of America which received 66 per cent. in 1958-59, but in 1959-60, 1960-61 and 1961-62 only 28, 11 and 33 per cent. respectively. In 1961-62, skins to the value of £77,402 (33 per cent.) were shipped to the United States of America; £75,141 (32 per cent.) to France; £30,183 (13 per cent.) to United Kingdom; and £12,094 (5 per cent.) to Italy. In 1961-62, a total of 803,000 sheepskins without wool were exported, valued at £231,000. Since 1954-55, the number exported has exceeded two million once only (in 1958-59), and the value has fluctuated about £350,000.

(iv) *Hides.* The export trade in cattle hides and calfskins during 1961-62 was distributed amongst the main importing countries as follows:—Japan, £3,559,000; Germany (Federal Republic), £316,000; United States of America, £287,000; Italy, £276,000; and United Kingdom, £169,000. The total quantity exported was 73,295,000 lb., valued at £5,379,000.

(v) *Furred Skins.* The exports of furred skins in 1961-62 were valued at £1,342,000, of which rabbit and hare skins constituted £900,000. This is considerably less than the highest total value of £2,013,000, recorded in 1955-56, when rabbit and hare skins accounted for £1,711,000. In 1960-61, they accounted for £954,000 out of a total of £1,479,000.

Skins were shipped principally to the United States of America, the United Kingdom, Italy, Belgium and Luxembourg, the values shipped to each in 1961-62 being:—United States of America, £956,000; United Kingdom, £182,700; Italy, £61,600; and Belgium-Luxembourg, £53,700.

Imports of cattle hides and calfskins are fairly substantial, the chief sources of supply being New Zealand and the Pacific Islands. The quantity of cattle hides, including calfskins, imported into Australia during the year 1961-62 amounted to 6,440,000 lb. valued at £636,000.

## OTHER RURAL INDUSTRIES: DAIRYING, POULTRY AND BEE-FARMING

## § 1. The Dairying Industry

1. Introduction.—(i) *General.* The introduction of cattle into Australia and the early history of the dairying industry are treated in some detail in earlier issues of this Year Book. It may be noted here that an increased and improved milk supply has resulted from the crossing of imported stud cattle with the original stock and from the further judicious crossing of strains. In Australia, dairy cattle thrive in the open throughout the year, local climatic conditions demanding no protection other than tree plantations for shelter and, in certain districts, rugging in the coldest weather. Indigenous and imported grasses furnish feed during the greater part of the year, and winter fodder, when necessary, is given to the cattle in the open. With the wider application of scientific methods in the treatment of animals and pastures and in the processes of manufacture, coupled with herd testing and effective State supervision, the dairying industry has shown rapid expansion. It has been demonstrated that Australian production and marketing methods do not adversely affect the vitamin content of the butter and that the losses during cold storage even for as long as two years are insignificant. This aspect has important implications for butter marketed overseas.

Apart from the specialized dairy farms, which are centred mainly in the wetter coastal areas, dairying is carried on extensively in mixed farming areas. Originally, dairying on mixed farms was conducted mainly in conjunction with agriculture, but in more recent times it has been combined with various types of grazing. In regions further inland, it is generally conducted in association with agriculture and sheep-raising. The extent to which dairy cattle were run in conjunction with beef cattle, sheep, and pigs in 1959–60 is shown in the relevant tables published in a series of bulletins *Classification of Rural Holdings by Size and Type of Activity*, 1959–60.

(ii) *Official Supervision.* Dairy experts of the various State agricultural departments give instruction in approved methods of production, and inspect animals, buildings and marketable produce, with the result that a high standard of cleanliness prevails in the industry.

The export trade is regulated by the terms of the *Commonwealth Customs Act* 1901–1954 and the *Commonwealth Commerce (Trade Descriptions) Act* 1905–1950, and regulations thereunder. This legislation requires that the true trade description, etc., be marked on all produce intended for export, while official inspection ensures the maintenance of purity and quality. Upon request of the exporter, the goods are given a certificate by the inspector.

(iii) *Marketing of Dairy Products.* (a) *Dairy Produce Export Control Act* 1924–1962. Details of this Act, and of the Australian Dairy Produce Board constituted under it, were given in previous issues of the Official Year Book (see No. 48, pp. 999–1000).

(b) *Dairy Produce Export Charges Act*, 1962. This Act provides for the imposition of a levy on all butter, cheese and other specified dairy produce exported from Australia to cover the administrative expenses of the Australian Dairy Produce Board and for advertising and other purposes. The rate of the levy is fixed by the Act.

(iv) *Equalization Schemes.* (a) *Butter and Cheese.* Reference is made to these schemes in Official Year Book No. 48, pp. 998–9.

Details are given in para. 2 (ix) on page 1093 of the returns realized on local and overseas sales and of the average equalization rate for the years ended June, 1958 to 1962. Details are also given in para. 2 (vii) of the wholesale prices of butter and cheese for home consumption as determined by the Commonwealth Dairy Produce Equalization Committee Ltd.

(b) *Casein.* An equalization scheme for casein similar to that for butter and cheese has been operated by the Commonwealth Dairy Produce Equalization Committee Ltd. since 1952. Average realizations per cwt. under the scheme were 185s. 3.6d. in 1957–58, 171s. 7.9d. in 1958–59, 175s. 7.5d. in 1959–60 and 174s. 10.9d. in 1960–61. The interim equalization value for 1961–62 has been fixed at 163s. 0d. and for 1962–63 at 153s. 0d. per cwt.

(v) *Commonwealth Subsidies and Stabilization Plans.* (a) *Butter, Cheese and Processed Milk Products.* Under the provisions of the various *Dairy Industry Assistance Acts*, the first of which was passed in 1942, the Commonwealth Government has provided subsidies

on milk supplied for the manufacture of butter and cheese. Subsidies were paid on a seasonal basis prior to 1st April, 1946, but from that date have been on a flat rate basis. Subsidies are distributed by the Commonwealth Dairy Produce Equalization Committee Ltd. through factories to milk producers by payments on butter and cheese manufactured. Subsidy on milk supplied for the manufacture of processed milk products was also payable from 1942 until 30th June, 1948, and again from 1st July, 1949, to 30th June, 1952. The Commonwealth Government has provided, under the *Processed Milk Products Bounty Act* 1962, for the payment of a maximum amount of £350,000 as a bounty on exports of processed milk products in 1962-63.

The first of the three five-year stabilization plans came into operation on 1st July, 1952. Under this plan, the Commonwealth Government, with the approval of the States, determined the ex-factory prices of butter and cheese, guaranteed to dairy farmers a return, based upon costs of efficient production, in respect of quantities of butter and cheese sold within Australia, plus an additional 20 per cent. (if produced), and agreed to make available an amount by way of subsidy to lift the return on that part of output covered by the guarantee to the guaranteed level. The second five-year stabilization plan, which came into operation on 1st July, 1957, continued all the important features of the first plan. A new feature, however, was that any subsidy made available under the scheme should be a fixed amount in any dairy year.

The actual amount of subsidy paid by the Commonwealth Government was in excess of its original commitment in 1955-56, when, to assist in offsetting a fall in export returns, the Government agreed to increase subsidy payments to £14,500,000. In each of the years 1956-57 to 1961-62, £13,500,000 was provided.

In 1958, following a period of low incomes due to drought and low export returns, the Government decided to give additional support to the dairy industry. This support took the form of underwriting a final equalization payment to factories on total production of butter and cheese for the 1958-59 season. The amount underwritten for butter was 40d. per lb. commercial butter basis. The Government also decided that it would consider applying the same principle of underwriting a final equalized return at levels determined by it each year, after an examination of all relevant factors for the remaining period of the 1957-62 five-year stabilization plan. For the 1959-60, 1960-61 and 1961-62 seasons, the underwriting of a final minimum return of 40d. per lb. commercial butter was again determined. The principal value underlying this guarantee is that it enables the Commonwealth Dairy Produce Equalization Committee Ltd. to make a higher initial payment to factories than would otherwise be possible without risk of over-payment.

Following representations by industry organizations, the Commonwealth Government, in November, 1946, established the Joint Dairy Industry Advisory Committee comprising a chairman nominated by the Government, four representatives of Commonwealth Government departments and four industry representatives from the several States. The Committee's functions, broadly, were to advise and assist in conducting cost and other surveys of dairy farm production and to act as an advisory body to the Government in these matters. From 1st April, 1947, to 30th June, 1952, the rates of overall return to milk producers determined by the Commonwealth Government for the purpose of subsidy payments were based on recommendations made by the Committee following surveys of production costs in the dairy industry.

Early in 1953, the Dairy Industry Investigation Committee, an independent body consisting of three members, was appointed to advise the Commonwealth Government on the guaranteed return to producers during 1953-54. The Committee was re-established in March, 1954, to advise the Government on the guaranteed return for each year of the remaining three-year period of the Stabilization Plan. For the second five-year plan, the Committee was re-appointed to determine the cost of efficient production of butter-fat only.

Several new features have been introduced into the third Five-Year Stabilization Plan, which came into operation on 1st February, 1962. These are as follows:—a fixed bounty of £13,500,000 will be provided for each year of the plan; the Dairy Industry Investigation Committee has been disbanded; the Australian Dairy Industry Council assumes responsibility for determining local prices of butter and cheese instead of the Minister for Primary Industry as previously; products containing 40 per cent. or more of butter-fat will be eligible for bounty payment provided they are taken into the Equalization Pool.

Amounts realized on exports of butter and cheese in excess of the f.o.b. equivalent of the guaranteed return have been credited to the Dairying Industry Stabilization Fund, which was established in July, 1948, for the purpose of stabilizing returns from exports. During 1951-52, the Stabilization Fund met the deficiency in respect of all exports which did not return sufficient to meet the basic return to the factory. From 1st July, 1952, to 30th June, 1957, it was available to the industry to be used, in whatever manner it considered desirable, to make good any deficiency in respect of all exports other than the 20 per cent. provided for under the Commonwealth Government's Five-year Stabilization Plan. The Act was amended in 1957 to enable the Board to use the fund for such other purposes as are approved by the Minister for Primary Industry. After allowing for outstanding debits, the amount standing to the credit of the Dairying Industry Stabilization Fund at 30th June, 1962, totalled approximately £1,945,000.

(b) *Whole Milk.* In addition to the subsidies referred to above, the Commonwealth Government subsidized the production of whole milk consumed directly from 1943-44 to 1948-49. Details of the amounts distributed during each year will be found in Official Year Book No. 38, page 1031.

(vi) *Extension, Research and Promotion.* (a) *Dairy Industry Extension Grant.* An annual grant of £250,000, to be expended by State Governments for the purpose of promoting improved farming practices in the dairying industry, was first made by the Commonwealth Government for the five years from 1st July, 1948. This assistance was continued for further periods of five years from 1st July, 1953, and from 1st July, 1958, at the same rate. For the five years from 1st July, 1963, the amount of the annual grant has been increased to £350,000.

(b) *Dairy Industry Research and Sales Promotion.* At the request of the Australian Dairy Industry Council, legislation was enacted in 1958 to provide for a sales promotion campaign for butter and cheese in Australia and also for research into industry problems. The legislation provides for a statutory levy (the Dairy Produce Levy) to be imposed on all butter and cheese manufactured in Australia. The maximum rates of levy are  $\frac{1}{8}$  d. per lb. on butter and  $\frac{3}{8}$  d. per lb. on cheese, but the initial rates which commenced in November, 1958, were  $\frac{1}{8}$  d. per lb. on butter and  $\frac{1}{8}$  d. per lb. on cheese. Until November, 1959, the proceeds from the levy were divided equally between research and sales promotion, but after that date one-third was allocated to research and two-thirds to sales promotion. The rates of levy operative from November, 1959, were increased to the maximum provided under the Act, the increase being utilized solely for the purposes of intensifying the sales promotion campaign.

The Commonwealth Government agreed to contribute one half of the costs incurred on approved projects included in the programme of research, with a maximum contribution of £1 for £1 against funds raised by way of levy and allocated to research. The sales promotion programme is financed solely by the levy. The following table lists the amounts of levies collected, and the amounts allocated to research and sales promotion, during the four years 1958-59 to 1961-62.

#### DAIRY PRODUCE LEVY: AMOUNTS COLLECTED AND ALLOCATED

(£)

Particulars	1958-59	1959-60	1960-61	1961-62
Allocated to—				
Research(a) .. ..	75,447	126,519	116,591	130,000
Sales promotion .. ..	75,447	206,918	233,181	260,000
<b>Total Collected(a) ..</b>	<b>150,894</b>	<b>333,437</b>	<b>349,772</b>	<b>390,000</b>

(a) Excludes amounts contributed by the Commonwealth Government.

The scheme is administered by the Australian Dairy Produce Board, which, in respect of research, is advised by a statutory committee, the Dairy Produce Research Committee.

2. **Dairy Cattle and Dairy Products.**—(i) *Dairy Herds.* Lack of uniformity in the forms used by the various States in the collection of livestock statistics makes it impossible to measure with complete accuracy the growth of dairy herds prior to 1943. Statistics of dairy cows—which form the largest part of herds—are, however, available on a comparable basis for a much longer period of years. The number of dairy cows in Australia at 31st March, 1962, was 3,229,587, compared with 3,162,449 in the previous year. A record level of 3,451,450 was attained in 1957.

There is a preponderance of dairy cattle in Victoria and Tasmania, while in New South Wales and South Australia the proportion of dairy to all cattle is high. In Queensland, the Northern Territory, and Western Australia, other cattle predominate, the main use of cattle in these areas being for the production of beef. The numbers of dairy cattle in Australia are shown in the following tables.

#### NUMBER OF DAIRY CATTLE: AUSTRALIA

Period	Dairy cows (in milk and dry)	Dairy heifers 1 year and over	Dairy calves under 1 year	Dairy bulls	Total dairy cattle
Average for three years ended 31st March—					
1939 .. .. .	3,210,324	n.a.	n.a.	n.a.	n.a.
1949 .. .. .	3,133,266	827,609	712,688	107,708	4,781,271
1959 .. .. .	3,365,390	839,048	670,956	110,656	4,986,050
Year ended 31st March—					
1958 .. .. .	3,361,574	851,407	667,836	112,892	4,993,709
1959 .. .. .	3,283,147	830,116	628,710	104,317	4,846,290
1960 .. .. .	3,243,472	781,862	752,107	99,925	4,877,366
1961 .. .. .	3,162,449	857,642	776,829	103,852	4,900,772
1962 .. .. .	3,229,587	875,103	836,882	104,543	5,046,115

The following table shows the total dairy cattle in each State and the Australian Capital Territory for the same periods as in the previous table, except that details for 1939 are not available.

#### NUMBER OF DAIRY CATTLE: STATES

Period	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Average for three years ended 31st March—

Maps showing the distribution of dairy cattle in Australia at 31st March, 1955 and 1948, appear on page 910 of Official Year Book No. 43 and page 906 of Official Year Book No. 39, respectively.

(ii) *Growth of the Dairying Industry.* The following table gives some indication of the growth of some features of the dairying industry since 1916-17.

### DAIRYING INDUSTRY: AUSTRALIA

Period	Number of dairy cows at 31st March			Production of—			Milking machines (no. of units)(a)
	In milk	Dry	Total	Whole milk for all purposes	Butter (factory and farm)	Cheese (factory and farm)	
Average for three years ended—				million gallons	tons	tons	
1918-19..	1,281,820	569,611	1,851,431	565.1	84,043	11,403	n.a.
1928-29..	1,689,887	626,180	2,316,067	791.2	122,750	13,159	n.a.
1938-39..	2,552,092	658,232	3,210,324	1,142.0	190,827	24,848	n.a.
1948-49..	2,278,043	855,223	3,133,266	1,153.2	157,064	42,343	135,137
1958-59..	2,333,147	1,032,243	3,365,390	1,330.9	187,393	41,567	213,555
Year—							
1957-58..	2,281,571	1,080,003	3,361,574	1,264.4	175,757	35,976	213,716
1958-59..	2,363,569	919,578	3,283,147	1,370.2	193,568	43,509	216,287
1959-60..		3,243,472		1,406.5	197,552	44,854	221,260
1960-61..		3,162,449		1,339.3	181,653	46,925	223,815
1961-62..		3,229,587		1,443.6	198,621	55,527	228,228

(a) "Number of units" indicates the number of cows that can be milked simultaneously—i.e. the cow capacity of installed milking machines.

(iii) *Size of Dairy Herds.* For information on the size of dairy herds see references to bulletins *Classification of Rural Holdings by Size and Type of Activity*, 1959-60, in § 1, para. 1, page 1083.

(iv) *Production of Milk.* (a) *Production per Cow.* The quantity of milk produced by a dairy cow can be as high as 1,000 gallons a year, and varies greatly with breed, locality and season. For all dairy cows and for all seasons for the whole of Australia prior to 1916, production averaged considerably less than 300 gallons per annum. Largely owing to an improvement in the quality of the cattle, and the increased application of scientific methods, the 300-gallon average was exceeded in each year since 1924. In six of the last eight years, an average of more than 400 gallons per cow has been obtained. In 1961-62, the average yield was 452 gallons. The annual average yields per cow shown in the following table are obtained by dividing the total production of whole milk for the year ended June by the mean of the number of dairy cows (in milk and dry) at 31st March of that year and of the preceding year. They are, in effect, based on the approximate number of dairy cows which were in milk during any part of the year. The average shown is, therefore, less than that for cows which were yielding during the greater part of the year, but it may be accepted as sufficiently reliable to show the general trend.

### AVERAGE MILK PRODUCTION PER DAIRY COW (Gallons)

Period	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Average for three years ended—								
1938-39 .. ..	315	439	298	442	353	349	349	354

1961-62 .. ..	387	571	306	614	462	562	471	452

(b) *Total Production of Whole Milk.* In the following table, particulars of the production of whole milk in the various States are shown for the years 1957-58 to 1961-62 compared with the averages for the three years ended 1938-39, 1948-49 and 1958-59. Victoria is the principal milk-producing State, and in 1961-62 the output from that State, 630.9 million gallons, represented 44 per cent. of total production. Output from New South Wales in 1961-62 was 344.7 million gallons (24 per cent. of the total) and that of Queensland 239.8 million gallons (17 per cent.). Production in the remaining States accounted for 15 per cent. of the total Australian output.

**TOTAL PRODUCTION OF WHOLE MILK**  
(<sup>'000</sup> Gallons)

Period	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.

(a) Includes 9,341,000 gallons of milk, the produce of New South Wales, sent as cream to factories in Victoria and Queensland. (b) Includes 1,600,000 gallons of milk, the produce of Victoria, sent as cream to New South Wales. (c) Includes 508,000 gallons of milk, the produce of Queensland, sent as cream to New South Wales. (d) Includes butter made from cream, the produce of Victoria and Queensland. (e) Includes butter made from cream, the produce of New South Wales.

There has been a gradual decline over the years in the proportion of milk used for butter-making. In 1961-62, 64 per cent. of the total milk supply was used for butter, 9 per cent. for cheese, 5 per cent. for preserved milk products and 22 per cent. for other purposes.

Details of the production of whole milk for various purposes are shown in the following table for each of the years 1957-58 to 1961-62 compared with the averages for the three year periods ended 1938-39, 1948-49 and 1958-59.

### PRODUCTION AND UTILIZATION OF WHOLE MILK: AUSTRALIA

('000 Gallons)

Period	Total production	Quantity used for—			
		Butter (factory and farm)	Cheese (factory and farm)	Preserved milk products	Other purposes (a)
Average for three years ended—					
1938–39.. ..	1,142,006	891,742	54,934	33,226	162,104
1948–49.. ..	1,153,248	738,377	91,642	78,739	244,490
1958–59.. ..	1,330,853	865,347	90,561	79,687	295,258
Year—					
1957–58.. ..	1,264,421	811,583	78,550	79,864	294,424
1958–59.. ..	1,370,197	893,626	94,900	81,074	300,597
1959–60.. ..	1,406,501	912,271	100,856	82,636	310,738
1960–61.. ..	1,339,302	839,596	104,470	76,619	318,617
1961–62.. ..	1,443,562	919,301	122,340	78,028	323,893

(a) Principally fluid milk for domestic purposes.

(vi) *Production of Butter, Cheese and Preserved Milk Products.* (a) *General.* The establishment of large central butter factories, either on a co-operative or independent basis, has resulted in a considerable reduction in the cost of manufacture. The product is also of a more uniform quality, and whereas formerly the average quantity of milk used per pound of hand-made butter was about three gallons, factory butter requires only about two gallons. In addition, subsidy payments by the Commonwealth Government are made only on factory-produced butter. As a result, the production of farm-made butter has declined substantially, and in 1961-62 represented only about 0.7 per cent. of all butter made. A similar position exists in the cheese-making industry where a negligible amount is now made on farms.

In 1961-62, factories in Australia engaged in the processing of milk into butter or cheese or the various preserved milk products numbered 353 and were distributed among the States as follows:—New South Wales, 72; Victoria, 127; Queensland, 71; South Australia, 44; Western Australia, 18; and Tasmania, 21. More details regarding numbers of factories, output, etc., are given in Chapter VI. Manufacturing Industry (see p. 239).

(b) *Production of Butter.* Production in 1961-62 at 198,621 tons was 16,968 tons (9.3 per cent.) more than the amount produced in 1960-61, but 10,290 tons (4.9 per cent.) less than the record post-war production of 1955-56. The foregoing figures include butter produced on farms, which has shown a steady decline from about 4,000 tons in the early 1950's to 1,365 tons in 1961-62.

The following table shows production of butter in factories and on farms in each State for the years 1957-58 to 1961-62 compared with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

### BUTTER PRODUCTION IN FACTORIES AND ON FARMS (Tons)

(a) Includes small quantities produced in the A.C.T. There is no recorded production in the Northern Territory.

(c) *Production of Cheese.* In 1961-62, production reached a record figure of 55,527 tons which was 6,470 tons (13.2 per cent.) greater than the previous record of 49,057 tons in 1953-54 and 8,602 tons (18.3 per cent.) greater than production in 1960-61.

The following table shows production of cheese in factories and on farms in each State in the years 1957-58 to 1961-62 compared with the averages for the three years ended 1938-39, 1948-49 and 1958-59.

1961-62 .. ..	5,953	23,919	8,973	14,659	1,364	605	55,473	55,527

(a) Northern Territory and Australian Capital Territory: nil.

(d) *Production of Preserved Milk Products.* The production in 1961-62 of all full-cream milk products and milk by-products, with the exception of condensed, concentrated and evaporated sweetened full-cream milk, increased in comparison with 1960-61. Between the same years the quantity of whole milk used in the manufacture of preserved milk products increased from 76.6 million gallons in 1960-61 to 78.0 million gallons in 1961-62.

Preserved milk products are manufactured mainly in Victoria, which produced 60.6 per cent. of the total (in terms of whole milk equivalent) in 1961-62. New South Wales accounted for 20.9 per cent. and the remaining States for 18.5 per cent.

The following table shows details of the output of preserved milk products during the years 1957-58 to 1961-62, compared with the averages for the three years ended 1938-39, 1948-49 and 1958-59.

### PRODUCTION OF PRESERVED MILK PRODUCTS: AUSTRALIA

Particulars	Average for three years ended—			1957-58	1958-59	1959-60	1960-61	1961-62
	1938-39	1948-49	1958-59					

### PRODUCTION (TONS)

Full cream milk products—								
Condensed, concentrated and evaporated full cream milk(a)—

### WHOLE MILK EQUIVALENT (h) ('000 GALLONS)

Preserved milk products ..	33,226	78,739	79,687	79,864	81,074	82,636	76,619	78,028
----------------------------	--------	--------	--------	--------	--------	--------	--------	--------

(a) Includes mixtures of full cream and skim milk and mixtures of full cream, skim and buttermilk. (b) Includes coffee and milk. (c) Includes malted milk and milk sugar (lactose). (d) Not available separately—included in condensed, concentrated and evaporated full cream milk. (e) Not available separately—included in powdered full cream milk. (f) Excludes powdered whey. (g) Not available. (h) That is, the estimated quantity of whole milk used to produce preserved milk products. Quantities of milk used to produce two or more products (for example, initially as full cream milk and subsequently as skim milk) are counted once only.

(vii) *Wholesale Price of Butter and Cheese in Australia.* Details of prices operating in each of the States since 1st July, 1952, are shown in the following table. The prices presented are those determined by the Commonwealth Dairy Produce Equalization Committee for choicest grade bulk butter and cheese.

(viii) *Local Consumption of Butter and Cheese.* Following the cessation of butter rationing after the 1939–45 War, consumption per head rose to 31.2 lb. in 1951–52. However, in later years it gradually declined, and in 1961–62 it reached its lowest level since the war. At 24.0 lb. per head in 1961–62 it was 4 per cent. below the level of 1960–61.

Consumption of cheese per head in 1961–62 was 6.5 lb.; the third highest figure recorded. The highest figure recorded was 6.8 lb. per head in 1957–58.

The following table shows details of the production and disposal of butter and cheese for each of the years 1957–58 to 1961–62 compared with the averages for the three years ended 1938–39, 1948–49 and 1958–59.

**PRODUCTION AND DISPOSAL OF BUTTER AND CHEESE: AUSTRALIA**

1961-62 .. .. .	49.392	5.339	44.053

(x) *Oversea Trade in Dairy Products. (a) General.* The production of butter and cheese in Australia is considerably in excess of local requirements, and consequently a substantial surplus is available for export overseas. In normal circumstances, the extent of this surplus is chiefly dependent upon seasonal conditions.

Exports of butter in 1961-62 amounted to 78,005 tons, compared with 61,137 tons in 1960-61. Exports of cheese in these years were 22,378 tons and 18,037 tons respectively. As in previous years, the principal importing country for Australian butter and cheese was the United Kingdom. In 1961-62, 87 per cent. of butter and 78 per cent. of cheese exported was consigned to the United Kingdom.

Total quantities and values of exports of Australian origin of butter, cheese and preserved milk products are shown in the table at the foot of the page.

(b) *Butter and Cheese Exports graded according to Quality.* All butter and cheese exported comes under the provisions of the Exports (Dairy Produce) Regulations and is subject to the supervision, inspection and examination by officers appointed for that purpose. These commodities are graded according to quality which has been fixed by regulation as follows:—flavour and aroma, 50 points; texture, 30 points; and condition, 20 points. Butter and cheese graded at 93 to 100 points is of choicest quality; at 90 to 92 points, first quality; at 86 to 89 points, second quality; and at 80 to 85 points, pastry or cooking quality or, in the case of cheese, third quality.

In the following table, particulars are given of the relative proportions of butter and cheese graded for export according to quality. Further details, which include actual quantities by States, are to be found in *Primary Industries, Part I.—Rural Industries, 1960-61*, Bulletin No. 55.

**BULK BUTTER AND CHEESE GRADED FOR EXPORT: AUSTRALIA**  
(Per cent.)

Grade	Butter			Cheese		
	1959-60	1960-61	1961-62	1959-60	1960-61	1961-62

3. **Pigs and Pig Products.**—(i) *Pig Numbers.* At 31st March, 1962, 1,652,323 pigs were recorded, representing a small increase on numbers a year earlier. The number of pigs in each State and Territory for each of the five years ended 1958 to 1962 compared with the averages for the three-year periods ended March, 1939, 1949 and 1959, are given in the following table.

NUMBER OF PIGS

Period	N.S.W.	Vic.	Q land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
Average for three years ended—									
1938–39 ..	374,963	285,465	299,707	74,329	74,657	42,802	404	481	1,152,808

1961–62 ..	471,579	325,120	432,609	170,133	174,182	75,754	2,762	184	1,652,323

A long-term comparison of pig numbers is given in the division Pastoral Production of this chapter. Maps showing the distribution of pigs in Australia at 31st March, 1955 and 1948, appear on page 912 of Official Year Book No. 43 and on page 908 of Official Year Book No. 39, respectively.

(ii) *Size of Pig Herds.* Details of the size of pig herds have been published in a series of bulletins entitled *Classification of Rural Holdings by Size and Type of Activity*, 1959–60.

(iii) *Pigs Slaughtered.* The number of pigs slaughtered during each of the years 1957–58 to 1961–62, compared with the averages for the three-year periods ended 1938–39, 1948–49 and 1958–59, is shown in the following table. A graph showing the number of pigs in Australia from 1870 onwards appears on page 1061.

PIGS SLAUGHTERED

('000)

Period	Slaughterings passed for human consumption							Total slaughtering (including boiled down)
	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Aust. (a)	
Average for three years ended—								
1938–39 ..	562	503	530	155	109	65	1,925	1,961

(a) Excludes trimmings from baconer carcasses.

(b) *Bacon and Ham.* Production of bacon and ham amounted to 39,868 tons in 1961-62. This amount is 6 per cent. above the amount of 37,411 tons produced in 1960-61. The record output of 56,246 tons was attained in 1944-45.

Details of production are shown by States in the following table for each year 1957-58 to 1961-62, compared with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

## PRODUCTION OF BACON AND HAM (CURED CARCASS WEIGHT) (a)

(Tons)

Period	N.S.W.	Victoria	Q'land	S. Aust.	W. Aust.	Tas.	Australia
Average for three years ended—							
1938-39 ..	10,396	7,556	8,759	2,940	1,838	1,022	32,511
1948-49 ..	14,436	10,787	9,846	4,580	4,209	1,196	45,054
1958-59 ..	11,132	8,302	10,294	3,275	2,987	1,078	37,068
Year—							
1957-58 ..	11,468	8,335	9,682	3,340	2,952	1,056	36,833
1958-59 ..	11,606	8,852	11,299	3,069	2,955	1,126	38,907
1959-60 ..	11,012	8,634	9,948	3,115	3,061	1,144	36,914
1960-61 ..	11,328	9,211	9,442	3,141	3,169	1,120	37,411
1961-62 ..	11,145	9,102	12,221	2,757	3,512	1,131	39,868

(a) Pressed and canned bacon and ham have been converted to cured carcass weight for periods subsequent to 1948-49.

(v) *Consumption.*—(a) *Pork.* Apparent consumption of pork per head rose to 13.1 lb. in 1961-62, an increase of 15 per cent. on the previous year. The 1961-62 level was the highest since the war. In recent years, consumption of pork per head has not fallen below 10 lb.

In the following table, details of the production and disposal of pigmeat are shown for the years 1957-58 to 1961-62 compared with the averages for the three-year periods ended 1938-39, 1948-49 and 1958-59.

**PRODUCTION AND DISPOSAL OF PIGMEAT (CARCASS WEIGHT): AUSTRALIA**

Period	Change in stocks	Production	Exports	Curing and canning	Apparent consumption (as pork or smallgoods) in Australia	
					Total	Per head per annum
	'000 tons	'000 tons	'000 tons	'000 tons	'000 tons	lb.
Average for three years ended—						
1938-39 .. ..	..	88.5	13.7	48.6	26.2	8.5
1948-49 .. ..	-1.2	92.8	6.3	63.4	24.3	7.1
1958-59 .. ..	..	97.4	0.8	53.0	43.6	10.1

## § 2. The Poultry Industry

1. **General.**—Originally the poultry industry was conducted in conjunction with other branches of rural activity, mainly dairying, but it is now a specialized and distinct industry. It is from this source that the bulk of the commercial production is obtained. Practically all farm households keep poultry for the purpose of supplying their own domestic requirements and some supplies from this source are also marketed. In addition, many private homes in both rural and suburban areas keep small numbers of fowls in back-yard runs to help satisfy domestic needs. Because of the incompleteness of data available on poultry throughout Australia, details of poultry numbers are not published.

2. **Marketing of Eggs.**—(i) *Markets.* Details of the annual contracts entered into between the United Kingdom and Australian Governments up to 1952-53 and of the results of trading under free market conditions in the four years following appear in previous issues of the Official Year Book.

Over the period 1951-52 to 1961-62, Australian exports of shell eggs to the United Kingdom fell by 82 per cent. and total exports of shell eggs fell by 64 per cent. The main outlets for Australian eggs in 1961-62, other than the United Kingdom, were the United States of America (449,000 dozen) and Saudi Arabia (335,000 dozen).

The United Kingdom remains virtually the only export market for egg pulp. Australian exports of pulp to this country were approximately 11,000 tons in 1960-61 and 12,200 tons in 1961-62.

(ii) *Egg Export Control Act 1947.* Details of this Act were given in previous issues of the Official Year Book (see No. 47, p. 997).

3. **Recorded Production of Eggs and Egg Products.**—(i) *Shell Eggs.* Available statistics of the production and disposal of eggs in Australia are restricted to those recorded by the Egg Marketing Board of New South Wales and the Australian Egg Board. Details of production as recorded by these authorities are shown in the following table.

SHELL EGGS: PRODUCTION(a) RECORDED BY EGG BOARDS  
(<sup>000</sup> Dozen)

State	1957-58	1958-59	1959-60	1960-61	1961-62
New South Wales ..	49,168	45,221	53,495	62,156	62,867
Victoria ..	25,956	23,447	26,521	28,215	29,939
Queensland ..	7,894	8,692	10,007	10,810	10,176
South Australia ..	11,219	9,692	10,041	10,491	11,387

Tasmania ..	(b)	(b)	(b)	(b)	(b)
<b>Total(c)</b> ..	<b>102,839</b>	<b>94,629</b>	<b>107,540</b>	<b>119,005</b>	<b>121,927</b>

(a) Receipts from consignors and sales by producer agents.  
Tasmania.

(b) Not available.

(c) Excludes

(ii) *Egg Pulp, etc. Production.* Particulars of the production of whole egg pulp as recorded by the Egg Marketing Board for the State of New South Wales and the Australian Egg Board for the other States are shown in the following table.

# LIQUID WHOLE EGG PULP: PRODUCTION RECORDED BY EGG BOARDS

('000 lb.)

State	1957-58	1958-59	1959-60	1960-61	1961-62
New South Wales .. ..	13,198	9,808	17,791	21,446	20,916
Victoria .. ..	6,591	3,473	6,460	7,948	12,000
Queensland .. ..	1,658	2,011	2,767	3,716	3,321
South Australia .. ..	4,461	2,495	3,210	3,394	3,374
Western Australia .. ..	2,855	1,600	1,122	916	620
Tasmania .. ..	(a)	(a)	(a)	(a)	(a)
Total(b) .. ..	28,763	19,387	31,350	37,420	40,231

(a) Not available.

(b) Excludes Tasmania.

In addition to liquid whole egg, production was also recorded of liquid egg whites and liquid egg yolks. Output in 1961-62 amounted to 2,416,000 lb. and 1,784,000 lb., respectively, compared with 3,888,000 lb. and 2,798,000 lb., respectively, in the previous year. These figures exclude small quantities produced in Tasmania for which details are not available.

4. *Consumption of Eggs and Egg Products.*—Because of the operations of producers in areas outside the control of the Egg Boards and the extent of "back-yard" poultry-keeping, for which no statistics are collected, figures relating to total egg production must be accepted with some reserve. The production shown in the following table, together with details of exports and consumption, is based upon the records of Egg Boards of production from areas under their control, plus estimates of production from uncontrolled areas and from "back-yard" poultry-keepers.

# ESTIMATED PRODUCTION AND DISPOSAL OF EGGS IN SHELL: AUSTRALIA

Period	Change in stocks	Estimated total production	Exports	For drying and pulping(a)	Apparent consumption in Australia	
					Total	Per head per annum
Average for three years ended—	Mill. doz.	Mill. doz.	Mill. doz.	Mill. doz.	Mill. doz.	Dozen

Poultry, live(a) ..	Number	443,376	283,365	555,908	64	41	75

(a) Includes day-old chicks.

During 1961-62, about 474,000 lb. of canned chicken (valued at £46,000) were imported from the United States of America; during 1960-61, 2,016,000 lb. (valued at £227,000) were imported from the United States.

## § 3. The Bee-Farming Industry

1. Production of Honey and Bees-wax.—Although practised as a separate industry, bee-farming is also carried on in conjunction with other branches of farming. In recent years, there has been considerable growth in the number of itinerant apiarists operating on a large scale with mobile equipment. Some of these apiarists move as far afield as from Victoria to Queensland in an endeavour to provide a continuous supply of nectar from flora suitable for their bees. The returns of honey from productive hives during 1961-62 shows an average of 126 lb. per hive and the average quantity of wax was 1.7 lb. per productive hive.

The number of hives and the production of honey and bees-wax during the year 1961-62 are shown in the following table.

## BEEHIVES, HONEY AND BEES-WAX, 1961-62

State or Territory	Beehives			Honey produced		Bees-wax produced	
	Pro- ductive	Unpro- ductive	Total	Quantity	Gross value	Quantity	Gross value

(a) Less than 500.

(b) Less than £500.

The production of honey and bees-wax fluctuates considerably and is determined mainly by the flow of nectar from flora, particularly the eucalypts, which varies greatly from year to year.

The table below shows the production of honey and bees-wax for periods from 1938-39 to 1961-62.

## HONEY AND BEES-WAX PRODUCTION

('000 lb.)

Period	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Aus- tralia(a)

1961-62 ..	208	135	22	123	94	4	587

(a) Includes Australian Capital Territory and Northern Territory.

2. **Oversea Trade in Bee Products.**—The quantity of honey exported in 1961–62, 25.4 million lb., was 51 per cent. more than in 1960–61. The Federal Republic of Germany was the principal importer, taking 54 per cent. of total exports.

Annual exports of bees-wax have been about 200,000 lb. in recent years. There were no imports of bees-wax into Australia in 1961–62.

Total quantities and values of exports of honey and bees-wax for the years 1959–60 to 1961–62 are shown below.

#### EXPORTS OF HONEY AND BEES-WAX: AUSTRALIA

## CHAPTER XXIII

### FORESTRY

NOTE.—For further details on subjects dealt with in this chapter see the annual bulletins *Primary Industries, Part II.—Non-Rural Industries and Value of Production*, and *Secondary Industries* (sawmills, etc., operations).

All values of Australian oversea trade shown throughout this chapter are expressed as £A. f.o.b., port of shipment. The export table on page 1119 relates to exports of Australian produce, but quantities and values quoted in the text sometimes include re-exports, the amounts involved, however, being generally small.

#### § 1. Source of Statistics

Statistics relating to forestry are, in general, provided by the various authorities concerned with forestry administration. In each State, suitable areas of Crown land have been reserved for forestry purposes, either as State forests or other reserves, and the administration of these is the responsibility of the respective State Government forestry authorities. In addition, in some States, areas of forests on Crown lands dedicated as national parks and the like are administered by government departments other than the forestry authorities. There are timber resources on private land in each State, but details concerning these areas and production therefrom are not complete for all States. Forestry activities in the Northern Territory and the Australian Capital Territory are administered by the Commonwealth Government.

Particulars of forested areas contained in this chapter have been collected by the Statisticians of the several States, mainly from information provided by the State forestry authorities. The Forestry and Timber Bureau of the Commonwealth has provided figures for the Northern Territory and the Australian Capital Territory and, in addition, has made available certain other data.

Statistics of timber and by-products have been compiled from the annual factory collections undertaken by the Statisticians in the several States. Figures of production of gums, resins and tanning barks have been provided by the State forestry authorities.

Data of imports and exports of forest products and timber and timber products have been compiled in the Commonwealth Bureau of Census and Statistics as part of the statistics of oversea trade.

The figures shown relate, in general, to years ended 30th June.

Forested areas shown in this chapter relate to areas administered by the State or Commonwealth authorities, or to those reserved by government legislation. They are not based on any inventory of forest resources using standard and uniform definitions throughout Australia. It should be stressed, therefore, that the figures are not comparable between States owing to the lack of uniformity in the definition of a forest.

## § 2. Forestry in Australia

1. **Objects of Forestry.**—The main object of forestry authorities is to manage the forests of the country in a manner that will provide the maximum benefits, both direct and indirect. Direct benefits include the provision of essential commercial commodities such as structural timber, pulpwood, plywood, veneers, firewood, bark products, tars, oils and resins. Indirect benefits include protection of soil and stock from wind and exposure, regulation of stream flow, provision of recreational facilities, and aesthetic effects. Forestry also aims at improving existing forests and woodlands by properly controlled exploitation, by protection from such destructive agencies as fire and insect attack, and by inducing regeneration where it is desirable. The provision of a partial tree cover on denuded lands where this cover is necessary for protective purposes, and a complete cover when the land is better under forest than under any other land use, are further aims of forestry.

2. **General Account of Forests and Timbers.**—(i) *General.* The area of land in Australia suitable for the production of commercial timber as a primary crop is very small in comparison with the size of the continent. Only 6 per cent. of the total land area supports tree growth as the dominant vegetation. This area includes large tracts of mallee and other land carrying timber either too low in quality or too inaccessible to be exploited economically. Hardwoods cover 97 per cent. of the total forested area, and approximately 94 per cent. of the hardwood area is occupied by eucalypts.

(ii) *Eucalypts.* The genus *Eucalyptus* is remarkable in that it includes over 600 species ranging in size from the mighty forest giants, mountain ash (*E. regnans*) of Victoria and karri (*E. diversicolor*) of Western Australia, down to the small mallee species which inhabit vast areas of the inland. The habitats range from the dry inland areas to the high mountain areas in the Australian Alps, from areas with the annual rainfall as low as 10 inches to those where it is 250 inches. Of the 600 species, only about 100 are used for sawmilling, and not more than 40 of these are exploited extensively.

The better class of eucalypt forest is concentrated mainly in the higher rainfall areas such as the east coast, the highlands of southern New South Wales, Victoria and Tasmania and the south-western corner of Western Australia. The more important species include blackbutt (*E. pilularis*), tallowwood (*E. microcorys*), flooded gum (*E. grandis*) and red mahogany (*E. resinifera*) of New South Wales and Queensland, alpine ash (*E. delegatensis*) of New South Wales, Victoria and Tasmania, mountain ash (*E. regnans*), messmate (*E. obliqua*) and blue gum (*E. bicostata*) of Victoria and Tasmania, and karri (*E. diversicolor*) of Western Australia. For height and grandeur, mountain ash and karri are unequalled among the hardwoods of the world, and are excelled only by a few North American softwood species.

In the coastal regions with lower rainfall, the eucalypt forests contain many durable species such as the ironbarks, grey gums and bloodwoods of the east coast and jarrah (*E. marginata*) and tuart (*E. gomphocephala*) of Western Australia. The spotted gum (*E. maculata*) occurring in New South Wales and Queensland is another example.

Along most of the inland streams and adjacent flood-plains, there are riverain forests consisting mainly of river red gum (*E. camaldulensis*), a very durable hardwood which has supplied large quantities of sawn timber, railway sleepers and fence posts.

Eucalypts also occur in open forest and savannah woodland formations in areas receiving a reliable annual rainfall of about 10 to 20 inches per annum, as on the goldfields of Western Australia where salmon gum (*E. sa'monophloia*), brown mallet (*E. astringens*) and wandoo (*E. wandoo*) occur. These forests are of considerable value for firewood, as mining timbers and for fencing. Minor forest products such as sandalwood, tan bark, essential oils, etc., also come from isolated areas in this type of country, and in the more arid areas.

The table below shows the quantities of timber sawn from the main types of eucalypts in 1960–61.

## SAWN TIMBER PRODUCED FROM EUCALYPTS(a), AUSTRALIA, 1960-61

(Source: Forestry and Timber Bureau)

('000 super. ft.)

Species							Sawn timber
Messmate ( <i>E. obliqua</i> )	..	..	..	..	..	..	230,071
Blackbutt ( <i>E. pilularis</i> )	..	..	..	..	..	..	220,239
Alpine ash ( <i>E. delegatensis</i> )	..	..	..	..	..	..	152,029
Jarrah ( <i>E. marginata</i> )	..	..	..	..	..	..	148,014
Karri ( <i>E. diversicolor</i> )	..	..	..	..	..	..	39,302
Red gum ( <i>E. camaldulensis</i> )	..	..	..	..	..	..	38,995
Mountain ash ( <i>E. regnans</i> )	..	..	..	..	..	..	37,601
Other eucalypts(b)	..	..	..	..	..	..	201,753
<b>Total, Eucalypts</b>	..	..	..	..	..	..	<b>1,068,004</b>

(a) Includes the volume of sawn sleepers and the sawn equivalent of ply and veneer. (b) Separate figures are not available for the production of other species, but the probable order of importance of the next three eucalypt species is: spotted gum (*E. maculata*), tallowwood (*E. microcorys*) and silvertop ash (*F. sieberiana*).

(iii) *Other Hardwoods*. Hardwood genera other than *Eucalyptus* cover a comparatively small portion of the forested land in Australia (some 6 per cent.), but these areas provide a great variety of timbers suitable for a multitude of uses. There are two basic types of forest containing supplies of hardwoods other than eucalypts, namely, the tropical and subtropical rainforests of coastal New South Wales and Queensland, and the temperate rainforests of southern Victoria and Tasmania, both of which yield species known collectively as rainforest or brushwood species. The total volume of brushwood species produced in 1960-61 was 69,764,000 super. feet, i.e. less than seven per cent. of the total hardwood cut in Australia.

The tropical and subtropical rainforest along the eastern coast of Australia contains a large number of different species. Tropical rainforest occurs in northern Queensland in the vicinity of Cairns and on the Atherton Tableland, providing such well-known cabinet woods as Queensland maple (*Flindersia brayleyana*), Queensland walnut (*Endiandra palmerstonii*) and the silky oaks. The subtropical rainforest found in southern Queensland and northern New South Wales yields the tulip oaks, crab apple (*Shizomeria ovata*) and white beech (*Gmelina leichhardtii*). Coachwood (*Ceratopetalum apetalum*) and sassafras (*Doryphora sassafras*) occur in regions to the south near Dorrigo and have yielded valuable timber produce for many years.

Turpentine (*Syncarpia glomulifera*), an excellent harbour pile timber resistant to marine borer attack, and brush box (*Tristania conferta*), a superior structural decking timber, are found in association with some eucalypts in the wetter rainfall areas on the north coast of New South Wales and in southern Queensland.

Temperate rainforest which is to be seen in southern parts of Victoria and western Tasmania consists mainly of myrtle beech (*Nothofagus cunninghamii*), but produces also southern sassafras (*Atherosperma moschata*) and blackwood (*Acacia melanoxylon*).

(iv) *Softwoods*. The most important species of softwood is a conifer, the cypress pine (*Callitris hugelii*). Although this species is widely distributed throughout Australia, the main cypress pine forests of commercial value occur in New South Wales and southern Queensland west of the Great Dividing Range, covering about 2.5 per cent. of the total forest area of Australia. The trees are comparatively small, but the timber has particular value owing to its durability and resistance to termites. It is suitable for use as scantlings, flooring, linings, weatherboards, poles and posts. As much of the area originally covered by cypress pine has been cleared for wheat farming and grazing, the production from the remaining State forests is now strictly regulated to ensure a continuous supply. The volume of cypress pine cut in 1960-61 was approximately 72.0 million super. feet, but in 1961-62 this cut dropped to approximately 66.5 million super. feet.

Previously the most important softwood resources of Australia were the forests of hoop pine (*Araucaria cunninghamii*) in southern Queensland and New South Wales. The greater part of the original hoop pine forests has been exploited, but considerable areas have been replanted with this species in Queensland and, to a lesser extent, in New South Wales. Hoop pine also occurs in subtropical rainforest, in association with tulip oaks, crab apple, white beech, coachwood and sassafras.

Other native softwoods which have played a useful but minor part in the Australian timber industry include bunya and kauri pines (*Araucaria bidwillii* and *Agathis palmerstonii*) of Queensland, and celery top, Huon and King William pines (*Phyllocladus asplenifolius*, *Dacrydium franklinii* and *Athrotaxis selaginoides*) of Tasmania. Kauri pine is found in the tropical rainforest of northern Queensland in association with non-eucalypt hardwoods, while bunya pine occurs in the subtropical rainforests. In the temperate rainforests of Tasmania, celery top, Huon and King William pines are found in association with myrtle beech, southern sassafras and blackwood. Supplies of Huon and King William pines are now almost exhausted.

3. **Forested Areas.**—(i) *Extent of Forests.* Information on Australian forest resources is imperfect. It is not possible to give a reliable estimate of the forest area needed to meet future demands because of the unknown variables involved, in particular, the yield capacity per acre, future consumption of different classes of timber, and the future population.

According to estimates made for the Eighth British Commonwealth Forestry Conference held in Kenya in 1962, the total area of forest in Australia is 512.2 million acres, or about 27 per cent. of the total land area of the continent. However, about four-fifths of this area carries only sparse stunted tree growth. Only 19.2 million acres of the total forested area consists of residual prime native forest. It has not been possible to show the distribution of the forested areas by States, but other particulars are set out in the table below.

### CLASSIFICATION OF FOREST AREA(a): AUSTRALIA

(Source: Forestry and Timber Bureau)

('000 acres)

Type of forest	Area
<b>LANDS</b>	
Accessible forests—	
Productive forests in use—	
Coniferous (softwood) .. .. .	492
Non-coniferous (broadleaved) .. .. .	24,352
Mixed woods .. .. .	5,636
Open areas .. .. .	245
Total, Productive Forests in Use .. .. .	30,725
Productive forests not in use .. .. .	(b) 31,961
Unproductive accessible forests .. .. .	(c) 257,687
Total, Accessible Forests .. .. .	(d) 320,373
Inaccessible forests .. .. .	191,795
Total, Forested Area .. .. .	512,168

NOTE.—For footnotes, see next page.

## CLASSIFICATION OF FOREST AREA(a): AUSTRALIA—continued

(Source: Forestry and Timber Bureau)

('000 acres)

Type of forest							Area
OWNERSHIP OF ACCESSIBLE FORESTS							
Publicly-owned forests—							
State forests	..	..	..	..	..	..	23,534
Other forests	..	..	..	..	..	..	150,329
<i>Total, Publicly-owned Forests</i>							<i>173,863</i>
Privately-owned forests	..	..	..	..	..	..	145,537
Ownership not yet determined	..	..	..	..	..	..	973
<b>Total, Accessible Forests</b>							<b>320,373</b>

(a) Based on the 1960 classification of forests. (b) Includes approximately 25 million acres capable of producing fuelwood only. (c) This area carries only sparse, stunted trees. (d) Includes approximately 256 million acres of land carrying only stunted trees.

(ii) *Forest Reservations.* According to statements furnished by State and Commonwealth authorities, reservations of forest areas in Australia as at 30th June, 1962, totalled 39.0 million acres, of which 23.5 million acres were dedicated State forests and 15.5 million acres were timber and other reserves. The distribution of those areas is shown by States in the following table.

## AREA OF FOREST RESERVATIONS, 30TH JUNE, 1962

('000 acres)

State or Territory			State forests	Timber reserves (Forest Acts)	Other reserves (a)	Total
New South Wales	..	..	6,664	1,402	(b) 1,535	9,601
Victoria	..	..	4,868	(c) 861	(b) 368	6,097
Queensland	..	..	5,170	3,033	928	9,131
South Australia	..	..	277	1	760	1,038
Western Australia	..	..	4,348	(d) 2,561	321	7,230
Tasmania	..	..	(e) 2,154	137	(f) 1,207	3,498
Northern Territory	..	..	..	9	(g) 2,272	2,281
Australian Capital Territory	..	..	..	..	(h) 131	131
<b>Australia</b>	<b>..</b>	<b>..</b>	<b>23,481</b>	<b>8,004</b>	<b>7,522</b>	<b>39,007</b>

(a) Includes national parks and scenic reserves. (b) Reserved under Lands Acts. (c) Includes 151,000 acres reserved under Lands Acts. (d) Includes 775,000 acres reserved under Lands Acts. (e) Includes 465,000 acres of State forests under pulpwood concessions and 266,000 acres under exclusive and general forestry permits. (f) Includes 612,000 acres of Crown land under pulpwood concessions and 360,000 acres of Crown land under exclusive forestry permits. (g) Comprises a fauna and flora reserve on Coburg Peninsula (352,000 acres), land covered by pastoral leases (820,000 acres) and land within Welfare Reserves (1,100,000 acres). (h) Forest land not specifically reserved.

A considerable proportion of the permanently reserved areas is in inaccessible mountainous country, and many of the forests contain a mixture of species, only some of which are at present of commercial value. Much of the area consists of inferior forest, and a large proportion of the whole has been seriously degraded by recurrent fires. Moreover, the indigenous forest does not contain adequate supplies of softwood, and Australia's requirements have had to be met largely by imports.

(iii) *Plantations.* As a result of the planned policy of the forest services and of several private commercial organizations, the area of softwood plantations, mainly of exotic species, is steadily increasing. It was natural that this aspect of forestry should receive earliest attention in South Australia, as this is the State most poorly endowed with natural forest. South Australia now has a larger area of planted softwoods than any other State in Australia, and for some years has been exploiting considerable quantities of timber from these plantations. The total production is now over 200 million super. feet per annum and is expected to be increased substantially during the next decade. Production is also increasing in the other States, and the thinnings from their plantations are already supplying a significant volume of timber.

New areas are usually planted during the winter. Data are now compiled as at 30th September each year, so that, in the main, 1962 plantings are included in the figures of softwood plantations shown in the following table.

#### SOFTWOOD PLANTATIONS, 30TH SEPTEMBER, 1962

(Source: Forestry and Timber Bureau)

(Acres)

State or Territory	Government			Private (mainly <i>P. radiata</i> )	Total
	<i>Pinus radiata</i>	Other species	Total		
New South Wales .. ..	73,556	19,399	92,955	(a) 20,000	112,956
Victoria .. ..	(b) 43,922	11,097	(b) 55,019	67,600	122,619
Queensland .. ..	2,120	96,917	99,037	6,720	105,757
South Australia(c) .. ..	107,329	9,311	116,640	37,444	154,084

Australian Capital Territory ..	23,358	2,238	25,596	100	25,696
<b>Australia .. ..</b>	<b>279,911</b>	<b>163,941</b>	<b>443,852</b>	<b>139,648</b>	<b>583,500</b>

(a) Estimated. (b) Includes approximately 4,000 acres of plantations owned by State instrumentalities other than the Forests Commission. (c) Excludes plantings during 1962.

A special article prepared by the Forestry and Timber Bureau giving a detailed account of the history and development of softwood plantations and of the characteristics of individual species, is included in Official Year Book No. 44, page 975.

Hardwood plantations (mainly *Eucalyptus spp.*) comprise a much smaller area, and the total acreage at 30th June, 1962, was 32,000 acres, about two-thirds of which was mallet. Plantations of this species have been established in Western Australia for tan bark production.

4. *Forest Administration and Research.*—(i) *Forestry Activities of the Commonwealth Government.* (a) *General.* Although control of forests is a function of the State Governments, the Commonwealth Government has entered the research field with the aim of

assisting both public and private enterprise. The two main research authorities administered by the Commonwealth Government are the Commonwealth Forestry and Timber Bureau and the Division of Forest Products of the Commonwealth Scientific and Industrial Research Organization. A brief account of the activities of these two organizations is given below.

(b) *Commonwealth Forestry and Timber Bureau.* The activities of the Forestry and Timber Bureau include forestry education and research, the study of timber supply and the management of certain forests.

The Australian Forestry School, located in Canberra, trains professional foresters. Training at the school covers the third and fourth years of a four-year degree course in forestry. The first two years of the course are spent in a study of prescribed science subjects at one of the Australian universities. The third and fourth years are spent at the Forestry School studying specialized forestry subjects. Students who complete the course satisfactorily graduate in Forestry at their home university and are awarded the Commonwealth Diploma in Forestry. The Commonwealth Diploma in Forestry or the Diploma in Forest Technology may also be awarded to suitable graduates from Australia or overseas who complete a course at the Australian Forestry School.

In 1961, the Commonwealth Government decided to expand forestry research in Australia and combined the research activities of the existing Divisions of Silvicultural Research and Forest Management Research to form the Forest Research Institute. The research work carried out by the existing sections of the Forest Research Institute covers a wide range of studies, including the following:—factors affecting tree growth, tree breeding, introduction of exotic species, forest nutrition, forest botany, forest entomology and pathology, fire protection, watershed management, forest mensuration, forest management and management economics, and aerial inventory. At the present time, there are forest experimental stations at Mt. Burr in South Australia, at Dover in Tasmania and at Dwellingup in Western Australia, which are run on a co-operative basis with the forest services of those States. The station at Traralgon, Victoria, is operated in conjunction with a private forestry company, and the Darwin station works on behalf of the Northern Territory Administration. The Hobart Airport station is a joint venture by the Forestry and Timber Bureau and the Commonwealth Scientific and Industrial Research Organization acting on behalf of the National Sirex Fund. A new station is under construction at Mt. Gambier in South Australia.

Advice is currently made available to government departments and private enterprise on timber supply matters. Research is undertaken on logging methods and machines and on matters associated with the marketing of timber products.

A Division of the Bureau manages the forests of the Australian Capital Territory, while the Darwin research station advises on the management of the forests of the Northern Territory. In addition, advice is made available to the Administrations of the Australian External Territories on the management of the forests in those Territories.

(c) *Commonwealth Scientific and Industrial Research Organization, Division of Forest Products.* Fundamental investigations connected with the properties and uses of timber and forest products generally are carried out by the Division of Forest Products of the Commonwealth Scientific and Industrial Research Organization. These investigations cover a very wide field, e.g. structure and chemistry of wood, tans, etc.; properties and uses of wood; methods of production of sawn timber, pulp, paper, etc.

(ii) *Forestry Activities of the States.* The powers and functions of State forest authorities are laid down under forest Acts and Regulations. In each State, there is a department or commission to control and manage State forests, etc. Its functions include the introduction of proper measures for the control and management of forest land; the protection of forest land; the conversion, marketing and economic utilization of forest products; the securing of an adequate and permanent reservation of State forests; the establishment and maintenance of coniferous forests to remedy the existing deficiency of softwoods in Australia. All State forest services are actively engaged on research programmes involving problems of a more practical nature as opposed to the fundamental research being carried out by the federal authorities. The Forest Commission of Victoria maintains a Forestry School at Creswick, where recruits are trained for employment in the Commission or in other avenues of forestry. Annual reports are issued by each State forest authority.

In addition to developing permanent forest reserves in each State, foresters are surveying all timber lands with a view to obtaining dedications of new State forests to add to the permanent forest estate or to release areas unsuitable for forestry for other uses. State forest authorities also usually control all timber on unoccupied Crown lands as well as over 10 million acres of timber reserves, national parks, etc.

The universities in all States provide facilities for forestry graduates attending the universities or, in some cases, for forestry graduates working within, or outside, the States to proceed to advanced degrees. The University of Melbourne has established a School of Forestry to assist both undergraduate and post-graduate students.

(iii) *Private Forestry.* A number of private forestry companies are now operating in Australia. They are concerned mainly with the supply of raw materials to specific wood processors (often parent companies). The majority have professional foresters on their staff, several being engaged on research.

An estimate of the area of softwood plantations established by private companies and individuals is included in the table on pages 1108-9.

**5. Fire Protection.**—Fire control measures in Australia are the responsibility of the individual State governments, and the provision of adequate fire protection is one of the main problems facing forest authorities. Of some 52 million acres of forest land requiring protection, the forest services maintain a high degree of protection over a relatively accessible area of about 20 million acres; about 19 million acres, being more difficult of access, are not so highly protected; about 13 million acres are, at present, not protected.

The responsibility for the protection of private property outside urban areas rests with volunteer bush fire brigade organizations which are co-ordinated in each State by a committee or board carrying out functions of an advisory or educational nature and fostering the growth and organization of the bush fire brigade movement. Throughout the main agricultural and forest areas of Australia, there are over 5,000 registered volunteer bush fire brigades with a membership approaching 250,000. Although forest and rural fire organizations are entirely separate entities, a high degree of co-operation and liaison is maintained.

In addition to the forest service and rural organizations, various private and semi-governmental bodies in each State maintain fire protection organizations, which are generally concerned with the protection of private forestry operations and hydro-electric and water catchment areas.

Over the five-year period 1958 to 1962, the annual cost of protecting from fire the 39 million acres of forest land for which State forest services provide protection is estimated at £2,100,000 or about 1s. 1d. an acre. The cost of rural fire control as a whole cannot be estimated with any degree of accuracy, because by far the greatest contribution comes from the personal efforts of volunteer brigade members.

The Australian fire season is very variable, with an average of one particularly bad fire season every seven years or so. Such years as 1926, 1939, 1944, 1952 and 1957 account for a large proportion of the average annual burn. Over 80 per cent. of the area burnt carries little commercial timber, being mainly firewood and protection forest. The number of fires and the forest area burnt during the last five years is shown in the following table.

#### NUMBER OF FIRES AND FOREST AREAS BURNT: AUSTRALIA

(Source: Forestry and Timber Bureau)

Year				Number of fires	Forest areas burnt	Burnt areas as a proportion of total forest areas
				No.	'000 acres	Per cent.
1957-58	..	..	..	2,908	2,078	5.11
1958-59	..	..	..	1,175	456	1.10
1959-60	..	..	..	1,504	1,314	2.48
1960-61	..	..	..	2,667	1,294	2.47
1961-62	..	..	..	1,761	297	0.57

Intensive research work is being undertaken on fire problems, and several governmental groups are working on such projects as the study of fire behaviour and associated fuel and meteorological conditions, the use of chemical aids in fire suppression, the development of protective clothing and devices to aid fire-fighters, and the development of more efficient fire-fighting equipment.

Since fire prevention is one of the most important aspects of the problem, intensive campaigns are being conducted to reduce the incidence of man-caused fires. A study of fire causes in recent years reveals that human agencies account for approximately 90 per cent. of all fires, and of this figure at least 80 per cent. were preventable. It is estimated that "burning-off" (much of which is started illegally) accounts for 30 per cent. of all fires. Lightning accounts for a little over 10 per cent. of all fires in Australia, although the incidence of fires caused by lightning is much higher in certain areas, especially the Southern Highlands region in New South Wales and Victoria. Although lightning is a relatively small numerical cause of fire, the percentage area burnt from this cause is estimated at about 20 per cent. This high percentage is due to the multiple fire outbreaks causing fire fighting difficulties and to the inaccessibility of the areas in which such fires generally occur.

### § 3. Employment in Forestry

1. **Persons Engaged in Forestry Activities.**—In the following table, which shows particulars collected in the Population Censuses of Australia of 30th June, 1947, 1954 and 1961, the numbers of persons whose industry was stated to be "forestry (excluding sawmilling)" are shown, together with the numbers engaged in all primary industries and the total work force.

#### PERSONS ENGAGED IN FORESTRY: AUSTRALIA

Particulars	Census, 30th June—		
	1947	1954	1961
Persons engaged in—			
Forestry (excluding sawmilling) .. .. .	24,793	15,468	13,725
All primary industries .. .. .	563,607	560,100	472,670
Total work force .. .. .	3,196,431	3,702,022	4,225,098
Persons employed in forestry (excluding sawmilling) as a proportion of—			
All primary industries .. .. . %	4.4	2.8	2.9
Total work force .. .. . %	0.8	0.4	0.3

2. **Employment by Forestry Departments.**—In the table below, details are shown of the number of persons employed by State forestry departments, and by the Forestry and Timber Bureau in the Australian Capital Territory and the Northern Territory, at 30th June, 1962.

#### PERSONS EMPLOYED BY FORESTRY DEPARTMENTS, 30th JUNE, 1962

Occupational group	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
Professional staff	229	207	91	75	61	32	5	9	709
Non-professional field staff ..	220	222	97	8	148	87	11	1	794
Clerical staff ..	300	255	187	101	51	85	3	8	990
Extraction of timber ..	1,266	104	123	38	28	..	(a) 14	..	6,475
Milling of timber		19	..	739	15	..	..	..	
Labour (forest workers, etc.)	839		2,015	264	554	298	(b) 111	48	8,968
Total ..	2,015	1,646	2,513	1,225	857	502	144	66	

(a) Includes 13 full-blood aboriginals.

(b) Includes 97 full-blood aboriginals.

3. **Employment in Milling Operations.**—Details of the average number of persons employed, including working proprietors, in sawmills during the year 1961–62 are shown in the next table. Further details regarding the operations of sawmills in 1960–61 are shown in Chapter VI. Manufacturing Industry.

#### NUMBER OF SAWMILLS AND NUMBER OF PERSONS EMPLOYED, 1961–62

Particulars	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas. (a)	Aust.(b)
Number of sawmills .. .. .	866	463	556	82	217	329	2,513
Average number of persons employed during year—							
Males .. .. .	8,162	6,045	5,341	2,115	3,653	2,604	27,920
Females .. .. .	409	241	285	189	58	80	1,262
Total .. .. .	8,571	6,286	5,626	2,304	3,711	2,684	29,182

(a) Includes plywood mills.

(b) Excludes Northern Territory and Australian Capital Territory.

### § 4. Forest Production

1. **Forest Products.**—The table below shows details of production of forest products in each State and Territory in 1961–62.

#### FOREST PRODUCTION, 1961–62

Product	Unit	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Logs for sawing, peeling, slicing or pulping—										
Forest hardwoods .. .. .	'000 cub. ft.	48,076	60,789	21,123	574	50,094	42,572 (a)	7	154 <sup>b</sup>	223,389

Total Value of Forest Products	"	14,790	17,965	7,914	(i)3,764	(n)5,552	5,860 (a)	24	(i)124	(b)55,993

(a) Incomplete; no details available of production from private land. (b) Incomplete: see footnotes to individual State and Territory figures. (c) Includes mill waste used as firewood. (d) Less than 500 tons. (e) Includes sleepers, transoms, girders, bridge timbers, mining timber, poles, piles, timber used for tannin extract, etc. (f) Not available. (g) Excludes timber used for tannin extract, details of which are not available for publication. (h) Less than £500. (i) Incomplete: see footnotes to individual items. (j) Includes an estimate of the value of timber taken from private land. (k) Includes charcoal (forest production only), tanning bark, essential oils, sandalwood, eucalyptus leaves, crude rutin, etc. (l) Incomplete, details of some production from private land not available. (m) Excludes value of sandalwood and substitutes, details of which are not available for publication. (n) Includes timber used for tannin extract and sandalwood and substitutes.

The following table gives particulars of the production of forest products in Australia.

## FOREST PRODUCTION(a): AUSTRALIA

Product	Unit	1957-58	1958-59	1959-60	1960-61	1961-62
Logs for sawing, peeling, slicing or pulping—						
Forest hardwoods .. ..	'000 cub. ft.	234,253	239,968	243,940	242,142	223,389
Brushwoods and scrubwoods ..	"	13,398	14,518	14,287	14,689	11,890
Softwoods—						
Indigenous forest "pines"—						
Cypress .. ..	"	14,167	13,861	14,457	13,483	12,351
Other .. ..	"	6,571	5,746	4,716	4,726	3,676
Plantation grown "pines" ..	"	29,671	38,858	42,859	39,850	42,245
Total logs .. ..	"	298,060	312,951	320,259	314,890	293,551
Value of logs .. ..	£'000	36,097	37,157	38,983	38,475	35,588
Hewn and other timber (not included above)—						
Firewood(b)(weight) .. ..	'000 tons	3,923	4,081	3,997	3,705	3,514
Other (value)(c) .. ..	£'000	9,299	8,191	8,066	8,320	7,779
Value of hewn and other timber(d)	"	20,162	20,479	20,347	20,544	19,741
Other forest products(e) (total value)	"	528	448	345	372	421
Total Value of Forest Products(f)	"	57,044	58,170	59,863	59,764	55,993

(a) Excludes some production from private land thought to be relatively small, details of which are not available. (b) See footnote (c) to previous table. (c) See footnotes (e), (f) and (g) to previous table. (d) Incomplete, see footnotes (f) and (g) to previous table. (e) See footnotes (k) and (m) to previous table. (f) Includes timber used for tannin extract and sandalwood and substitutes in Western Australia; but excludes timber other than logs and firewood in South Australia.

2. Value of Production.—(i) *General*. While statistics of both the gross value (at principal markets) and local value (at place of production) of the forestry industry are available, particulars of the value of materials used in the process of production are not available for all States. For this reason, values cannot be stated on a net basis, as has been done with most other industries.

(ii) *Gross and Local Values, 1961-62*. The following table shows gross and local values of forestry production for each State in 1961-62. A more detailed reference to the value of production of forestry and other industries in Australia, as well as a brief explanation of the terms used, will be found in Chapter XXIX. Miscellaneous.

GROSS AND LOCAL VALUE OF FORESTRY PRODUCTION, 1961-62  
(£'000)

State or Territory	Gross value(a)	Marketing costs	Local value(b)
New South Wales .. ..	14,790	359	14,431
Victoria .. ..	17,965	1,516	16,449
Queensland .. ..	7,914	2,019	5,895
South Australia .. ..	3,764	30	3,734
Western Australia .. ..	5,552	361	5,191
Tasmania .. ..	5,860	770	5,090
Northern Territory .. ..	24	} n.a. {	24
Australian Capital Territory ..	124		124
Australia .. ..	55,993	5,055	50,938

(a) Gross production valued at principal markets.

(b) Gross production valued at place of production.

(iii) *Local Values, 1957-58 to 1961-62.* In the following table, the local value of forestry production and the local value per head of population are shown by States for the years 1957-58 to 1961-62.

### LOCAL VALUE OF FORESTRY PRODUCTION

Year	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Aust.(a)
LOCAL VALUE (£'000)							
1957-58 .. ..	15,341	15,253	9,414	3,587	5,112	4,547	53,471
1958-59 .. ..	15,574	16,148	8,356	4,103	5,067	4,887	54,358
1959-60 .. ..	15,169	17,618	8,469	3,929	5,085	5,556	56,001
1960-61 .. ..	15,300	16,713	7,149	3,729	5,167	5,735	53,975
1961-62 .. ..	14,431	16,449	5,895	3,734	5,191	5,090	50,938

### LOCAL VALUE PER HEAD OF POPULATION (£)

1957-58 .. ..	4.2	5.7	6.6	4.0	7.4	13.7	5.5
1958-59 .. ..	4.2	5.9	5.8	4.5	7.2	14.4	5.5
1959-60 .. ..	4.0	6.2	5.7	4.2	7.1	16.1	5.5
1960-61 .. ..	3.9	5.8	4.8	3.9	7.1	16.4	5.2
1961-62 .. ..	3.7	5.6	3.9	3.8	7.0	14.3	4.8

(a) Includes Northern Territory and Australian Capital Territory.

## § 5. Timber and Timber Products

1. *Mill Production of Timber.*—Particulars of logs treated and the production of sawn, peeled and sliced timber by sawmills and other woodworking establishments are shown in the following table. These figures have been compiled from the annual factory collections in each State which cover virtually all sawmills. The only omissions are some small portable mills operated by itinerants, e.g. sleeper cutters.

### OUTPUT OF AUSTRALIAN-GROWN TIMBER: ALL MILLS, 1961-62 (<sup>'000</sup> super. feet)

Particulars	N.S.W.	Vic.	Q'land	S.A.	W.A.	Tas.	Aust.(a)
LOGS TREATED (TRUE VOLUME)							
Hardwood ..	589,797	612,931	214,497	9,771	601,111	364,187	2,392,294

Softwood .. ..	264,027	301,175	312,450	262,212	289,016
<i>Total</i> .. ..	<i>1,391,177</i>	<i>1,459,974</i>	<i>1,521,045</i>	<i>1,415,208</i>	<i>1,352,123</i>

(a) Excludes Australian Capital Territory and Northern Territory.

In addition to the mill production of timber shown in the preceding tables, a large amount of hewn and round timber, e.g. sleepers, piles, poles, fencing timber, timber used in mining, and fuel, is obtained directly from forest and other areas. Complete information in respect of the volume of this output is not available.

2. Veneers, Plywood, etc.—Cutting of timber for the manufacture of veneers, plywood etc., has been carried out in most States for a number of years. In recent years, this has been considerably extended, since plywood manufacture has allowed the use of some species unsuitable for sawing. Special attention has been paid to ensure that logs suitable for peeling are diverted to ply factories. However, because of insufficient supplies of Australian-grown logs, 43 per cent. of the logs used in 1961-62 were imported.

The following table shows the production of plywood.

**PLYWOOD PRODUCED**  
(<sup>0</sup>000 square feet:  $\frac{3}{8}$ -in. basis)

State	1957-58	1958-59	1959-60	1960-61	1961-62
New South Wales .. ..	45,647	56,378	62,701	64,930	56,184
Queensland .. ..	131,206	139,743	134,825	112,414	98,086
Other States .. ..	35,784	40,083	44,574	46,045	48,536
<i>Australia</i> .. ..	<i>212,637</i>	<i>236,204</i>	<i>242,100</i>	<i>223,389</i>	<i>202,806</i>

Of the total plywood produced in 1961-62, 153,382,000 square feet ( $\frac{3}{8}$ -in. basis) were classed as "Commercial", 31,012,000 as "Waterproof", 1,418,000 as "Case", and 16,994,000 as "Sliced Fancy".

During 1961-62, 504.2 million square feet ( $\frac{1}{16}$ -in. basis) of veneers were produced by the rotary process for the manufacture of plywood, and 221.1 million square feet ( $\frac{1}{16}$ -in. basis) were sold or added to stock, the bulk of which would eventually be used in the production of plywood. In addition, 60.2 million square feet of sliced veneers were produced.

3. **Manufactured Boards.**—(i) *Hardboard.* There were five factories producing hardboard in Australia during 1961-62 (two in New South Wales, and one in each of Victoria, Queensland and Tasmania), and during the three years ended 30th June, 1962, the following quantities were produced:—1959-60, 31,645,000 square yards; 1960-61, 31,085,000 square yards; and 1961-62, 28,772,000 square yards.

(ii) *Other Manufactured Boards.* Production of softboards (made of fibre), resin-bonded boards (made from wood chips, wood wool, sawdust, etc.) and other types of manufactured boards other than hardboards amounted to 3,862,000 square yards during 1961-62.

4. **Wood Pulp and Paper.**—(i) *Wood Pulp.* During 1961-62, seven wood pulp mills were operating in three States, and production was 152,175 tons of chemical pulp and 67,495 tons of mechanical pulp, a total of 219,670 tons. During the previous year, production was 148,640 tons of chemical pulp and 64,569 tons of mechanical pulp.

(a) *Victoria.* In Victoria, wood pulp is produced at Maryvale in Gippsland by a chemical process known as the Kraft or Sulphate process. The pulpwood used at this mill consists mainly of eucalypt timber below sawmilling quality, together with a quantity of plantation pine thinnings.

(b) *South Australia.* Three wood pulp mills operate in the south-eastern part of South Australia, using raw material in the form of logs from the State forests.

(c) *Tasmania.* In Tasmania, three mills are making pulp from indigenous hardwoods. At Burnie, on the north-west coast, a company is producing fine writing and printing paper, parchment and other specialty papers, and hardboard. A mill at Boyer, in the Derwent Valley, is the only producer of newsprint in Australia. Here wood pulp is produced from hardwoods drawn from State timber concession areas. A semi-chemical pulp mill has recently been completed at Geeveston, 37 miles south of Hobart. This plant utilizes eucalypt timber unsuitable for sawmilling from southern forests and, with its capacity of 25,000 tons of pulp a year, requires some 19 million super. feet of timber annually. The pulp from this mill is bulkloaded for shipping to Sydney where it is converted to paper and paper board.

(ii) *Paper and Paper Board.* Paper and paper board are manufactured in all States, but the greater part of the industry is in New South Wales, Victoria and Tasmania. During 1961-62, twenty-two paper mills were operating, ten in Victoria, four in New South Wales, three in Tasmania, two each in Queensland and South Australia and one in Western Australia. A wide variety of paper and paper board is produced in Australian mills. The table below gives details of the production of some of these items.

#### PRODUCTION OF PAPER PRODUCTS: AUSTRALIA

Type of paper	Quantity (tons)			Value (£'000)		
	1959-60	1960-61	1961-62	1959-60	1960-61	1961-62

Tanning substances ..	cwt.	148,542	164,596	145,329	435	402	380
Sandalwood oil ..	lb.	1,402	1,540	1,508	8	9	14

(a) Non-pored woods.

(b) Pored woods.

Imports of softwood logs in recent years have come almost exclusively from the Solomon Islands and Sarawak, and more than two-thirds of the imports of hardwood logs have come from North Borneo. Imports of undressed softwood timber comprise mainly Douglas fir (Oregon pine) from Canada and the United States of America and Radiata pine from New Zealand. Imports of undressed hardwood timber come mainly from Malaya and Sarawak. Timbers from Scandinavian countries provide most of the dressed timber imports.

Imports of timber products are mainly veneers and plywoods. The Australian Trust Territory of New Guinea and Japan provide most of the plywood imports, and the United Kingdom and New Guinea supply about 54 per cent. of Australia's imports of veneer.

Tanning substances are the only other forest products imported in significant quantities. The most important of these is wattle bark produced in South Africa.

2. Exports.—Details of exports of Australian forest and timber products in the years 1959–60 to 1961–62 are given in the table below.

## EXPORTS OF AUSTRALIAN FOREST PRODUCTS, TIMBER AND TIMBER PRODUCTS(a)

Particulars	Unit of quantity	Quantity			Value (£A.'000 f.o.b.)		
		1959–60	1960–61	1961–62	1959–60	1960–61	1961–62
Logs not sawn	'000 sup. ft.	4,099	6,494	8,190	237	371	309
Undressed timber(b)—							
Sleepers ..	"	32,090	17,779	27,410	1,775	931	1,518

Eucalyptus oil ..	'000 lb.	257	235	310	95	80	104
Acaroid resin, grass tree and yacca gum ..	cwt.	9,068	8,949	15,714	18	17	32

(a) Excludes re-exports.

(b) Excludes stumps and the like.

(c) Non-pored woods.

(d) Pored woods.

Of the exports of logs in 1961-62, 51 per cent. were consigned to New Zealand and 48 per cent. to Japan. In the same year, 42 per cent. of the sleepers exported were consigned to the United Kingdom and 26 per cent. to New Zealand, while of all undressed timber exported, 44 per cent. were consigned to New Zealand and 16 per cent. to the United Kingdom. Consignments to the United States of America accounted for 78 per cent. of the exports of tanning substances in 1961-62.

## CHAPTER XXIV

### FISHERIES

NOTE.—Further information on subjects dealt with in this chapter is contained in the annual printed bulletin *Primary Industries, Part II.—Non-Rural Industries and Value of Production* and in the annual mimeographed statistical bulletin *Fishing and Whaling*, particularly as regards types of fish, etc., caught.

#### § 1. Resources, Development and National Aspects

1. **Natural Resources.**—(i) *Edible Fauna.* (a) *Fish.* Australian fishery resources, by comparison with those of some other areas, are not large. It has been calculated that there are approximately 2,000 species of fish in Australia and the waters surrounding it (including freshwater species), but the stocks of each species are comparatively small. Australia lacks adequate resources of such highly productive species as the herrings, cods, halibuts and true salmon (except for the Tasmanian whitebait and acclimatized freshwater species) on which the major proportion of world fisheries production is based.

The marine life of northern Australia is similar to that of the south-east Asian region; for example, the giant perch (*Lates calcarifer*) of northern Australia is also taken in Thailand and Malaya, and the parrot fishes (*Labridae*) are also distributed over the region. Some similarities with the fishes of South Africa can also be noted. For instance, the barracouta (*Leionura atun*) of Australia is found also in South Africa. Mulletts, which form the basis of Australia's largest single species catch, occur throughout the world, as do the tunas.

Fishing is carried out continuously in estuarine, coastal and off-shore Australian waters in the east and south from Port Douglas in Queensland to Ceduna in South Australia, in Western Australia from Esperance to Shark Bay, and sporadically in the Onslow, Broome, Darwin and Karumba areas in the north. Most fishing is done in waters over the continental shelf, which varies greatly in width around the continent, but tuna is sometimes fished beyond the shelf. As in other countries, fisheries in Australia may be divided into three types: the estuarine fisheries, located in the tidal waters of rivers and coastal lakes; the pelagic fisheries which exploit species inhabiting the surface layers of the open ocean; and the demersal fisheries, which fish the bottom layers of the sea. The estuarine fisheries produce considerable quantities of the table varieties, such as mullets (*Mugil cephalus* and associated species), breams (*Acanthopagrus spp.*), and some crustaceans. In addition to these, there is a small freshwater commercial fishery, principally in New South Wales and South Australia, exploiting Murray cod (*Maccullochella macquariensis*) and golden perch (*Plectroplites ambiguus*). The pelagic fisheries produce species exploited during their seasonal migration, such as Australian "salmon" (*Arripis trutta*), which is a member of the perch-like group, or Perciformes, tunas (*Fam. Thynnidae, Katsuwonidae, Sardidae*), barracouta (*Leionura atun*) and mackerels (*Cybius spp.*). These fisheries, with the exception of some tuna, mackerel and reef fisheries, are concentrated in the temperate waters around the southern half of the continent. The off-shore demersal fisheries include those pursued on the reefs which may be found virtually right around the continent, and which yield such species as snapper (*Chrysophrys auratus*), the so-called "cods" (*Epinephelus, Choerodon, Callyodon spp.*), and associated species; those pursued on the trawling grounds, which produce species such as flathead (*Neoplatycephalus, Trudis spp.*), morwong (*Nemadactylus spp.*), John dory (*Zeus faber*), etc.; and the important fishery for edible shark (school shark, *Galeorhinus australis*, and gummy shark, *Mustelus antarcticus*), in south-eastern Australia.

(b) *Crustaceans.* Crustaceans taken in Australia include crayfish, prawns, crabs and freshwater lobsters. Crayfish (southern, *Jasus lalandei*; western, *Panulirus cygnus*; and eastern, *Jasus verreauxi*) is the most important crustacean exploited in Australia, and various species occur on the reefs of the continental shelf in all States. The commercial fishery, for technological reasons and through lack of knowledge of numbers, has not extended to the tropical species (*P. ornatus*, etc.), but is concentrated on species found around the southern

part of Australia. Prawns (*Penaeus* and *Metapenaeus* spp.) are taken in the estuarine, coastal and offshore waters of New South Wales and Queensland, and in the Shark Bay region of Western Australia. Crabs (*Scylla* and *Portunus* spp.) are taken mainly in Queensland and Western Australia, but small quantities are also taken in the other States. Fresh-water lobsters (*Euastacus serratus*) are caught in inland streams in New South Wales, and one species, marron, forms the basis of an amateur fishery in the south-west of Western Australia.

(c) *Molluscs*. Edible molluscs produced in Australia include oysters (mainly *Crassostrea commercialis*), scallops, mussels and some of the cephalopods (squid, octopus, cuttlefish). Naturally-grown oysters are produced in all States except South Australia. In New South Wales and, to a lesser extent, in Queensland, edible oysters are cultured commercially. Scallops (*Equichlamys bifrons*) are taken mainly in Tasmania but fishing for saucer scallops (*Amusium balloti*) is being developed in Queensland. The scallop resources in the Shark Bay area of Western Australia have not been developed, and are still the subject of scientific investigations. Mussels (*Mytilus planulatus*) are gathered mainly in Victoria. Small quantities of cephalopods, mainly squid (*Loligo* spp.), are produced in many localities. Other edible molluscs which have been taken from time to time include abalone (*Haliotis* spp.) and pipis (*Plebidonax deltoides*).

(ii) *Pearl-shell and Trochus-shell*. Pearl-shell (*Pinctada maxima*), which is used for the manufacture of buttons, knife handles, etc., is fished in the tropical waters of Australia from Onslow in Western Australia to Cairns in Queensland. Trochus-shell is found mainly on coral reefs off the Queensland coast, although very small quantities occur in Western Australia.

(iii) *Whales*. Baleen whales, particularly humpback (*Megaptera nodosa*), migrate during winter from their summer feeding grounds in Antarctic waters to their breeding and nursery grounds in warmer waters off the north-east and north-west coasts of Australia. Since the war, the Australian whaling industry has exploited humpback whales on both coasts during the winter migrations. However, the same stocks are available to Antarctic whalers in the summer, and this, together with their slow reproduction rate, has resulted in the stocks of Antarctic humpback whales being subjected to exploitation greater than they can sustain.

Sperm whales (*Physeter catodon*) have been taken in the south-eastern waters of Western Australia since 1955.

(iv) *Marine Flora*. Seaweeds of possible commercial value occur in coastal waters of New South Wales, Tasmania and Western Australia. During 1962, a venture was launched to exploit seaweed (*Macrocystis pyrifera*) beds for their derivatives, such as agar and alginates, in Tasmanian waters.

2. *Development of Fisheries in Australia*.—At the beginning of this century, Australian fisheries were principally estuarine and onshore, and the deeper offshore resources were comparatively unknown. Vessels were generally sail-powered, and catching and preservation methods were primitive.

From 1904 to 1914, a Commonwealth vessel was engaged in research into fisheries resources around Australia. As a result of this exploration, trawling in the eastern waters began in 1915. There have been several years of high production from this fishery, but in each case the peak year was followed by a period of low production. Danish seine trawlers entered this fishery in 1936. In 1958–59, steam trawling vessels used in this area were taken out of service, and a modern diesel trawler was introduced. This fishery is now stabilized at a relatively low level of production.

The tuna fishery began with the establishment in 1937 of a cannery at Narooma in New South Wales to exploit the occurrences, mainly of southern bluefin tuna (*Thunnus thynnus maccoyii*), which had been revealed by aerial surveys in 1936. However, landings were insignificant for over a decade. In 1950, the Commonwealth Government sponsored the visit of a Fijian tuna clipper to instruct fishermen in the pole-and-live-bait method of catching tuna. Development of the South Australian tuna fishery followed the visit of two American tuna experts in 1954. Recent developments in tuna fishing include the use of gill netting and long-lining. Techniques of taking species of tuna other than southern bluefin are being investigated.

The crayfishery, which is pursued off south-eastern Australia and off the west coast of Western Australia, was for many decades on a small scale. It was not until 1944 that the major sector, the western crayfishery, began to develop into what is now Australia's most productive single marine resource. Between 1944 and 1947, production from the shallow areas of Houtman's Abrolhos was used for canning for the armed forces. From 1948 to 1953, mechanization of the fleet was introduced progressively and deeper waters were worked. The United States market for frozen craytails was established during this period. The period 1954 to 1962 saw the introduction of larger and more powerful vessels, of conservation measures designed to maximize the sustainable yield, and of increased processing facilities. In the southern crayfishery, development has followed similar lines, but on a smaller scale because of the smaller crayfish numbers.

The prawn fishery was pursued for many decades on a small scale, but it was not until the discovery of the need for prawns to spawn at sea that interest developed in catching them during this phase of their life cycle. The discovery in 1947 of stocks of prawns in Stockton Bight and off Evans Head (both in New South Wales) initiated the development of deep-sea prawning in Australia. Since that time, the prawn fishery has expanded to the offshore grounds. In 1962, a commercial prawn fishery was commenced in Shark Bay, Western Australia.

Whaling has been undertaken from time to time in Australia since the early days of settlement. Humpback whaling has been carried out from stations on the west coast of Australia since 1949, and off the east coast since 1952. A station was established on Norfolk Island in 1956. Prior to 1939, despite large-scale mechanized whaling in the Antarctic, whale stocks were able to sustain themselves. However, by the end of the 1962 whaling season, whale stocks had been depleted to the extent that the stations on the east coast and Norfolk Island had either gone into liquidation or otherwise disposed of their assets. On the west coast, the station at Albany, by 1962, had virtually completely changed its operations to sperm whaling, and the station at Carnarvon was extending its activities into other fisheries fields.

**3. Government Administration of the Fishing Industry.**—The fisheries within territorial waters (that is, within three miles of the shore) are administered by State departments and Territory administrations. The Fisheries Division of the Department of Primary Industry develops and administers fisheries in extra-territorial waters and co-ordinates fisheries administration.

The fisheries legislation of each State and Territory and of the Commonwealth provides for the licensing of boats used in commercial fishing operations and of commercial fishermen. The provisions are broadly similar in each State, the general requirement being that any person who takes fish for sale, and any boat used in such fishing operations, must be licensed in the State or Territory concerned. Some States extend the licensing requirements to amateur or part-time fishermen. Australian nationals who fish commercially outside the territorial waters of a State or Territory, but within Australian waters as proclaimed under the Commonwealth *Fisheries Act 1952–1959*, are required to take out licences and to register their boats under that Act.

Fish stocks inhabiting Australian waters are a common property resource. With the exception of the Western Australian crayfishery and the Shark Bay prawn fishery, there is no restriction on recruitment of men and vessels to any fishery. It has, therefore, been necessary for governmental action to be taken in an endeavour to provide rules of operation in certain fisheries which are vulnerable to depletion. The policy basic to the management of these fisheries is the greatest sustainable yield consistent with economic operations. Where a fishery, for economic reasons, is not producing its maximum yield, efforts to discover new methods of utilization of the catch are made.

The Commonwealth *Pearl Fisheries Act 1952–1953* aims at the management of the pearl-shell resources in accord with Australia's proclamation of sovereign rights over the natural resources of the sea bed and subsoil to the 100 fathom line. It requires that all pearlers, vessels, etc., must be licensed, and prohibits the removal of live shell from Australian waters except with the written permission of the Minister for Primary Industry.

The Commonwealth controls whaling from Australian stations in accordance with the conditions laid down by the International Whaling Commission. This Commission was established by the International Convention for the Regulation of Whaling, 1946, to organize world-wide conservation measures.

4. **Research.**—The aim of all fisheries research in Australia is to achieve the greatest sustainable yield of fish and to assist in the development of an efficient industry. To this end, much of the biological research already undertaken has been directed at formulating recommendations for conservation measures in various fisheries. Future work is expected to concentrate on the discovery, development and conservation of new fisheries, on the expansion of under-exploited fisheries, on the economics of the industry and on the improvement of equipment.

The organizations, committees, etc., in Australia at present engaged in research into fisheries matters are:—

- (i) Division of Fisheries and Oceanography, C.S.I.R.O. (biological and oceanographic research);
- (ii) Division of Food Preservation, C.S.I.R.O. (research into handling, storage, processing and transport of fish);
- (iii) the several State fisheries departments (general biological research);
- (iv) Fisheries Division, Department of Primary Industry (economic and management research, gear technology, extension work to the industry);
- (v) Southern Pelagic Project Sub-committee and the Western Fisheries Sub-committee of the Commonwealth-State Fisheries Conference (co-ordination and planning of research); and
- (vi) Advisory Committee to the Minister for Primary Industry on the Fisheries Development Trust Account (consideration and recommendation to the Minister on projects to be subsidized from the Account, which was set up from the sale of the Commonwealth Government's whaling assets in 1956).

## § 2. Collection and Presentation of Statistics

Statistics presented in this chapter have been collected by a number of authorities. The various State fisheries authorities have supplied, through the Deputy Commonwealth Statisticians in the States, the details of employment, boats, equipment, and production of the general fisheries and the pearl and shell fisheries. The Fisheries Division of the Department of Primary Industry has supplied particulars of the whaling industry. Statistics of the processing of general fisheries products and of overseas trade in the products of fishing and whaling have been compiled in the Commonwealth Bureau of Census and Statistics.

The statistics refer, in general, to fiscal years. However, pearl and shell fishing data refer to the season ended in the fiscal year shown. Whaling statistics are shown by calendar years, and refer to the season (from May to October) in the calendar year. All overseas trade information refers to fiscal years.

In the preparation of Australian fisheries production statistics, the quantities of individual products are, generally, in terms of the form in which they are taken from the water. For example, the statistics of fish production published in this chapter are in terms of "estimated live weights" which are calculated from landed weights by using conversion factors for each species in each State. These conversion factors allow for the fact that the quantities of fish reported are frequently in a gutted, headed and gutted, or otherwise reduced condition. Crustaceans are reported on a "whole weight" basis, and molluscs (edible) on a "gross (in-shell) weight basis". The figures of pearl-shell and trochus-shell refer to the actual quantities of dry shell for sale and exclude the weight of the fish.

The catch is generally shown according to the State in whose waters it was taken. However, a quantity of sharks and crayfish taken by Victorian-based fishermen in Tasmanian waters, but marketed in Victoria, is included in the Victorian catch, since the economy of that State is most directly affected. Similarly, pearl-shell taken by Queensland luggers operating in Northern Territory waters is included in the Queensland take. Pearl-shell taken by Japanese fishermen operating in Australian waters is excluded from Australian production figures, although the quantities taken are shown as a footnote to the table on page 1131.

Details of production given in this chapter refer in most cases only to the recorded commercial production. In view of the importance of amateur fishermen in certain types of fishing, details shown cannot be taken as representing the total catch. In addition, it is likely that the figures shown understate to some extent the full commercial catch, because no information is available on fish taken for sale by persons not licensed as professional fishermen.

The details of employment, equipment, and production of the whaling industry shown in this chapter include whaling operations based on Norfolk Island, but for the purposes of Australia's overseas trade statistics Norfolk Island is regarded as an overseas country. The production figures do not include production from sperm whales, but sperm whale products are included in the statistics of overseas trade in whale products.

### § 3. The Fishing Industry

1. **Persons Engaged in Fisheries.**—In the following table, which shows particulars collected in the Population Censuses of Australia at 30th June, 1947, 1954 and 1961, the numbers of persons whose industry was stated to be "fishing and whaling" are shown together with the numbers engaged in all primary industries and the total work force.

#### PERSONS ENGAGED IN FISHERIES: AUSTRALIA

Particulars	Census, 30th June—		
	1947	1954	1961
Persons engaged in—			
Fishing and whaling .. .. .	10,656	8,637	8,124
All primary industries .. .. .	563,607	560,100	472,670
Total work force .. .. .	3,196,431	3,702,022	4,225,098
Persons engaged in fishing and whaling as a proportion of—			
All primary industries .. .. . %	1.9	1.5	1.7
Total work force .. .. . %	0.3	0.2	0.2

2. **General Fisheries.**—(i) *Employment, Boats and Equipment.* The boats used for the estuarine fisheries are mostly small vessels, propelled by diesel or petrol engines of low power. The offshore vessels range in length from 30 feet to 120 feet and are almost invariably powered by diesel engines. Many of them have insulated holds to carry fish in ice, and some of the crayfish boats are fitted with wells in which the catch is kept alive. Some vessels have dry refrigeration, and others, including some of the tuna live-bait pole-fishing vessels, are equipped with brine refrigeration.

Almost every type of fishing equipment is used. The following table sets out the main types of fish, crustaceans and molluscs and the equipment most commonly used.

#### FISHING EQUIPMENT USED IN AUSTRALIA

Type of fish	Equipment used
Mullet .. .. .	Beach seine, gill net
Shark (edible) .. .. .	Long-lines
Salmon .. .. .	Beach seine
Barracouta .. .. .	Trolling lines
Flathead .. .. .	Danish seine, otter trawl
Snapper .. .. .	Long-lines, traps
Morwong .. .. .	Danish seine, otter trawl, traps
Whiting .. .. .	Handlines, Danish seine
Garfish .. .. .	Gill net, beach seine
Mackerel .. .. .	Trolling lines
Tuna(a) .. .. .	Poles and live-bait, trolling lines
Prawns .. .. .	Otter trawl, beam trawl, seine net
Crayfish .. .. .	Pots, traps
Scallops .. .. .	Dredge, otter trawl

(a) Lampara nets and purse seines are used for taking live bait for tuna.

The following two tables show details of persons, boats and equipment employed in the taking of fish, crustaceans and edible molluscs, and data relating to oyster leases. These statistics are derived mainly from the licensing records of the various State fisheries authorities. Because the definitions and licensing procedures used by these authorities are not uniform, the statistics should not be used to compare the relative productivities of the fishing industries in the several States.

Some of the figures for 1959-60, 1960-61 and 1961-62 are not comparable with those for previous years for the following two reasons:—in Queensland, numbers of men employed and boats engaged now refer only to those licensed to take fish for sale, whereas previously all licensed men and boats were included; and in South Australia, the value of boats and equipment has been adjusted upward compared with previous years.

Boats and persons engaged in more than one type of fishing are classified according to their main activity, and so may be classified differently from one year to the next.

The table below gives details by States for 1961-62.

**EDIBLE FISHERIES: BOATS AND EQUIPMENT IN USE, PERSONS ENGAGED, ETC., 1961-62**

Particulars	Unit	N.S.W.	Vic.	Q'ld	S.A.	W.A. (a)	Tas.	N.T.	Aust.

(a) Excludes freshwater fish caught in Queensland, particulars of which are not available  
10935/62.—35

(b) *Crustaceans*. In terms of gross value of catch, the importance of crustaceans has increased in recent years, and in 1961-62 was greater than that of fish. The crayfish is the most important crustacean. The bulk of Australian production of crayfish is exported, nearly all going to the United States of America. Details of the production of crustaceans in each State and the Northern Territory in 1961-62 are shown in the following table.

**CRUSTACEANS: PRODUCTION BY TYPE, 1961-62**  
(\*000 lb. whole weight)

Type	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	Aust.

<b>Total(d) .. .. .</b>	<b>14,905</b>	<b>17,955</b>	<b>19,204</b>	<b>21,808</b>	<b>18,815</b>

(a) Excludes pipis, particulars of which are not available for publication. (b) Excludes Western Australia. (c) Excludes Northern Territory. (d) Incomplete; see notes to individual types.

(iii) *Marketing.* The greater part of Australian fisheries production is marketed fresh or frozen. For practical purposes, the whole of the tuna and Australian "salmon" catches are canned, as is a large proportion of the barracouta catch.

Marketing arrangements for fresh fish vary from State to State. In New South Wales, fish marketing is controlled by the Chief Secretary's Department, which operates the Metropolitan and Wollongong fish markets. In other coastal centres of New South Wales, Fishermen's Co-operatives may become registered as local fish markets. Fish for industrial use does not pass through any of these markets. The Queensland Fish Board sells all production on behalf of fishermen in that State, and has branches in 18 centres, as well as depots at eight others. The Board also purchases fish on its own account to stabilize prices. In Victoria, Western Australia and Tasmania, the marketing of fish is undertaken through agents. In South Australia, the great majority of the fishermen are members of the South Australian Fishermen's Co-operative Ltd., which handles the whole of their production.

Quick-freezing is widely used at sea and ashore to preserve fisheries products before delivery to consumers. The main techniques employed in Australia are brine freezing, which is used in the tuna and salmon fisheries, and air blast freezing, which is used chiefly for crayfish and scallops. Cold preservation with ice is still widely used.

(iv) *Processing.* Fish canning in Australia on a modern scale dates from 1937, prior to which the only fish canning carried out was on an occasional basis in factories handling other foodstuffs. In 1961-62, there were 20 fish canneries operating in Australia. The main canneries handle tuna (Eden, Melbourne, Port Lincoln), salmon (Eden, Melbourne, Margate, Port Lincoln, Adelaide, Albany, Perth), and barracouta (Melbourne, Margate, Portland). A long-established general cannery in Sydney handles a small quantity of tuna each year, as well as prawns and fish paste, and a general cannery in Melbourne produces paste and other fish products.

Apart from canning, other processes used on fish products include smoking and bottling. These processes take place only on a small scale.

There are few by-products derived from fish, crustaceans, and molluscs taken in Australia. Small quantities of fish meal are produced from scrap products. Oil from the livers of sharks was produced on a small scale until 1962, when cheaper substitutes became available.

The following table gives further details of fish processing in Australia during the years 1957-58 to 1961-62.

### FISH PROCESSING (EXCEPT FREEZING): AUSTRALIA

Particulars	1957-58	1958-59	1959-60	1960-61	1961-62
Number of factories .. ..	14	18	19	18	20
Fish used(a)—	'000 lb.	'000 lb.	'000 lb.	'000 lb.	'000 lb.
Whole .. ..	9,293	10,603	12,507	13,737	15,613
Headed and/or gutted .. ..	5,600	4,825	3,773	3,758	6,354
<i>Estimated live weight equivalent(b)</i> .. ..	15,900	16,300	16,900	18,200	23,100
Production(c)—					
Canned fish(d)—					
Australian salmon .. ..	5,198	4,756	4,550	3,480	5,818
Tuna .. ..	1,300	1,609	1,983	3,070	3,629
Other .. ..	1,358	1,417	1,585	1,647	2,473
<i>Total</i> .. ..	7,856	7,782	8,118	8,197	11,920
Smoked fish .. ..	439	286	296	301	172
Fish paste .. ..	1,700	1,314	1,379	1,261	1,037
Fish meal(e) .. ..	1,294	1,442	1,718	2,041	2,633

(a) Fish used for canning (including fish loaf), smoking and the manufacture of fish paste, but excluding the weight of oysters, other shellfish and crustaceans used for canning. (b) The weight of headed and/or gutted fish is taken as 85 per cent. of live weight. (c) Excludes canned crayfish, lobsters, prawns, oysters and clams, details of which are not available for publication. (d) Includes fish loaf, fish cakes, etc. (e) Excludes whale meal.

3. Pearls, Pearl-shell and Trochus-shell.—(i) *Employment, Boats and Equipment.* Ketch-rigged luggers about 55 feet long and with crews of 8 to 14 members are used for pearl and shell fishing around Australia. Divers using suits collect the shells from the sea bed, at depths ranging from 3 to 45 fathoms. Details of employment of persons and equipment in the shell fisheries in 1961-62 are contained in the following table.

### PEARL-SHELL AND TROCHUS-SHELL: BOATS AND EQUIPMENT IN USE, PERSONS ENGAGED, 1961-62

Particulars	Unit	Q'land	W. Aust.	N.T.	Aust.(a)
Boats engaged .. ..	No.	36	17	3	56
Value of boats and equipment .. ..	£'000	155	82	17	254
Persons engaged .. ..	No.	500	187	37	724

(a) Excludes Japanese pearlers operating in Australian waters.

The following table gives similar details for Australia for the years 1957-58 to 1961-62.

**PEARL-SHELL AND TROCHUS-SHELL: BOATS AND EQUIPMENT IN USE, PERSONS ENGAGED, AUSTRALIA (a)**

Particulars	Unit	1957-58	1958-59	1959-60	1960-61	1961-62
Boats engaged .. ..	No.	151	110	85	85	56
Value of boats and equipment ..	£'000	790	647	515	467	254
Persons engaged .. ..	No.	1,487	1,419	1,120	995	724

(a) Excludes Japanese pearlers operating in Australian waters.

(ii) *Production.* The production of cultured pearls was introduced into Australia in 1956, when a station was established off the north coast of Western Australia. The industry has since expanded, and in 1962, there were nine pearl culture farms in operation in Queensland and Western Australia. Particulars of cultured pearl production are not available for publication.

In recent years, plastics have replaced pearl-shell in many uses. However, since the introduction of pearl culture, live pearl-shell has been in demand for this purpose. The following table gives details of pearl-shell and trochus-shell production in Australia in the years 1957-58 to 1961-62.

**PEARL-SHELL AND TROCHUS-SHELL: PRODUCTION**  
(<sup>0</sup>000 lb.)

Particulars	1957-58	1958-59	1959-60	1960-61	1961-62
<b>Pearl-shell(a)—</b>					
Queensland(b) .. ..	1,131	889	1,082	1,821	1,008
Western Australia(c) ..	2,218	1,687	1,138	1,270	802

<i>Australia</i> .. ..	<i>1,229</i>	<i>916</i>	<i>869</i>	<i>319</i>	<i>457</i>

(a) Excludes pearl-shell taken by Japanese pearlers operating in Australian waters. The quantities taken were as follows:—1957-58, 1,572,000 lb.; 1958-59, 1,064,000 lb.; 1959-60, 763,000 lb.; 1960-61, 860,000 lb.; 1961-62, 813,000 lb. (b) Season ended January of years shown. Shell taken by Queensland luggers operating in Northern Territory waters is included in Queensland. (c) Season ended December of years shown.

Particulars of the production of natural pearls in Australia are not available.

4. *Whaling.*—The whaling industry is highly mechanized. Standard equipment includes aircraft to locate whales, steam and diesel powered catchers of about 100 to 125 feet in length, and tow-boats.

Whale meat is marketed as pet food. Oil from baleen whales is used in the manufacture of margarine, soap and cosmetics. Oil from sperm whales is used in the manufacture of soap, plastics and watch lubricants, and in automatic transmission systems in motor cars.

In 1962, 591 sperm whales were taken off Western Australia, but particulars of the production from sperm whales are not available. The table below gives further details of the whaling industry in Australia and Norfolk Island during the years 1958 to 1962.

Average length of whales processed .. ..	ft	40.8	40.3	40.3	38.7	38.0

(a) Statistics of whales taken and processed and of oil and by-products produced exclude details of sperm whales. (b) Includes 2 two-man catchers. (c) Includes 3 tow-boats and 4 aircraft. (d) Includes 1 tow-boat and 4 aircraft. (e) Estimated. (f) The sex of 2 whales processed was not recorded. (g) Excludes 4 blue and 2 bryde whales taken, under special permits, for scientific research. (h) For quota purposes, 1 blue whale is taken as the equivalent of 2 fin, 2½ humpback, 6 sei or 6 bryde whales. (i) 6 barrels = 1 ton. (j) Includes produce from whales taken for scientific research. (k) Taking account of whales taken for scientific research.

5. Value of Production.—(i) *Gross Value of Products.* The following table shows details of gross values of production at principal markets of edible fishes products, pearl-shell, and trochus-shell in each State and the Northern Territory in 1961–62.

## FISHERIES PRODUCTION: GROSS VALUE, 1961–62

(£'000)

Product	N.S.W.	Vic.(a)	Qld	S. Aust.	W. Aust.	Tas.(a)	N.T.	Aust.
Fish(b) .. ..	2,016	1,575	670	870	666	255	23	6,075
Crustaceans .. ..	837	406	678	720	3,879	711	(c)	7,231
Molluscs (edible) ..	(d) 992	35	41	..	2	181	1	1,252
Pearl-shell(e) .. ..	..	..	(f) 231	..	(g) 156	..	(f) 29	416
Trochus-shell .. ..	..	..	(f) 28	..	..	..	..	28

(a) Victorian figures include catch by Victorian fishermen in Tasmanian waters (shark, £93,000, crayfish, £130,000, in 1961–62). (b) Includes shark livers for oil extraction; excludes freshwater fish caught in Queensland, particulars of which are not available. (c) Less than £500. (d) Excludes pipis, particulars of which are not available for publication. (e) Excludes pearl-shell taken by Japanese pearlers in Australian waters. Queensland figure includes pearl-shell taken by Queensland luggers operating in Northern Territory waters. (f) Season ended January. (g) Season ended December.

The table below gives this information for Australia for the years 1957–58 to 1961–62.

## FISHERIES PRODUCTION: GROSS VALUE, AUSTRALIA

(£'000)

Product	1957–58	1958–59	1959–60	1960–61	1961–62
Fish(a) .. ..	5,228	5,294	5,851	5,907	6,075
Crustaceans .. ..	3,772	4,584	5,561	5,906	7,231
Molluscs (edible)(b) ..	825	1,037	1,089	1,186	1,252
Pearl-shell(c)(d) .. ..	995	561	558	724	416
Trochus-shell(d) .. ..	184	106	78	27	28

(a) Includes shark livers for oil extraction; excludes freshwater fish caught in Queensland in 1960–61 and 1961–62. (b) Excludes pipis in New South Wales for all years, scallops in Western Australia and oysters in the Northern Territory for years prior to 1960–61, and oysters in Western Australia for 1957–58 and 1958–59. (c) Excludes pearl-shell taken by Japanese pearlers in Australian waters. (d) Season ended December (Western Australia) or January (Queensland and Northern Territory) of years shown.

(ii) *Gross and Local Values, 1961–62.* Gross and local values of fishing and whaling production for each State are shown in the following table. A more detailed reference to the value of production of fishing and whaling and other industries in Australia, as well as a brief explanation of the terms used, is included in Chapter XXIX. Miscellaneous.

**FISHING AND WHALING: GROSS AND LOCAL VALUE OF PRODUCTION,  
1961-62  
(£'000)**

State or Territory	Gross value(a)	Marketing costs	Local value(b)
New South Wales .. ..	3,871	583	3,288

(a) Includes Northern Territory.

#### § 4. Consumption of Fish

Particulars of the estimated supplies of fish, crustaceans and molluscs available for consumption per head of population, in terms of edible weight, are included in the table below. For the purpose of compiling this table, the non-commercial fish catch has been estimated at ten per cent. of the recorded catch.

#### FISHERIES PRODUCTS: ESTIMATED SUPPLIES AVAILABLE FOR CONSUMPTION, AUSTRALIA

(lb. edible weight per head per annum)

#### § 5. Oversea Trade in Products of Fishing and Whaling

NOTE.—Values shown are expressed as £A. f.o.b. port of shipment. The tables of exports relate to Australian produce only, but quantities and values quoted in the text sometimes include re-exports, the amounts involved, however, generally being small.

1. **Edible Products.**—A large proportion of the fish consumed in Australia is imported. Of the edible products imported in 1961-62, those originating in Japan were valued at £2.5 million (29 per cent. of the total value); United Kingdom, £1.7 million (20 per cent.); and South Africa, £1.3 million (15 per cent.).

South Africa supplied 10.5 million lb. (33 per cent., valued at £0.8 million) of the fresh or frozen fish products imported in 1961-62, and the United Kingdom 6.9 million lb. (21 per cent., valued at £0.9 million). Of the smoked or dried fish products imported in 1961-62, South Africa supplied 6.4 million lb. (76 per cent., valued at £0.5 million). Japan supplied 10.4 million lb. (47 per cent., valued at £2.4 million) of the canned fish products imported in 1961-62.

The value of exports of edible products in 1961-62 was 48 per cent. greater than that in 1960-61. The value of crayfish tails exported in 1961-62 was 93 per cent. of the value of all exports of edible products. Of all crayfish tails exported in 1961-62, 99 per cent. (9,765,000 lb., valued at £5,956,000) were consigned to the United States of America.

The table below gives further details of Australia's oversea trade in edible products in the years 1959-60, 1960-61 and 1961-62.

## OVERSEA TRADE IN EDIBLE FISHERIES PRODUCTS: AUSTRALIA

Products not elsewhere included	..	..	..	22	2	3
Grand Total .. ..	..	..	..	4,163	4,380	6,468

(a) Excludes frozen smoked, which is included with "Smoked and dried". (b) Includes extracts and caviare. (c) Excludes frozen smoked, which is included in item Products not elsewhere included. (d) Not available separately.

2. Pearls.—Cultured pearls valued at £189,000 were imported into Australia in 1961–62. This was 23 per cent. greater than the value imported in 1960–61 (£153,000). In 1961–62, imports of cultured pearls valued at £179,000 (95 per cent. of the total value of cultured pearl imports) originated in Japan.

Cultured pearls exported from Australia in 1961–62 were valued at £53,000, 21 per cent. lower than the value exported in 1960–61 (£67,000). In 1961–62, cultured pearl exports consigned for Japan were valued at £52,000, 98 per cent. of the value of all cultured pearls shipped in that year.

The value of natural pearls exported from Australia in 1961–62 was £27,000, 70 per cent. lower than that in 1960–61 (£92,000).

3. Unmanufactured Shells.—Of the pearl-shell exported in 1961–62, 717,000 lb. (36 per cent.) were consigned to the Federal Republic of Germany, and 628,000 lb. (31 per cent.) to the United States of America. More than 73 per cent. (436,000 lb.) of the trochus-shell exported was consigned to Italy.

Imports of unmanufactured shells included quantities of pearl, trochus and green snail shell from New Guinea, Papua and the Pacific Islands, which were subsequently re-exported from Australia.

Further particulars of Australia's overseas trade in unmanufactured shells are shown in the table below.

## OVERSEA TRADE IN UNMANUFACTURED SHELLS: AUSTRALIA

(a) Includes sperm whale oil, for which production statistics are not available.

## CHAPTER XXV

### MINERAL INDUSTRY

NOTE.—Further detailed information on the subjects dealt with in this chapter is contained in the annual printed Bulletin *Primary Industries, Part II.—Non-Rural Industries and Value of Production* issued by this Bureau, and in *The Australian Mineral Industry—Annual Review* and other publications issued by the Bureau of Mineral Resources, Geology and Geophysics, which also issues, in co-operation with this Bureau, a quarterly publication *The Australian Mineral Industry*, comprising two parts—Part I.—Quarterly Review, and Part II.—Quarterly Statistics. The mimeographed statistical bulletin *Mining and Quarrying* of this Bureau contains annual statistics of the industry prepared and published as soon as possible after the data have been compiled. A monthly statistical bulletin *The Gold Mining Industry, Australia* is issued also, and other current information on mining or mine products is contained in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics*, and the *Monthly Bulletin of Production Statistics*.

Values of Australian oversea trade shown throughout this chapter are expressed as £A. f.o.b. port of shipment, except where otherwise indicated.

#### § 1. Introduction

1. **Occurrences of Minerals.**—The greatest part of the area of outcropping rock on the Australian continent is Precambrian in age. These basement rocks form the western and central core of the continent and are flanked by younger Palaeozoic rocks which, along the eastern edge of the continent, form a belt several hundred miles wide extending from north Queensland to Tasmania. Smaller areas of Palaeozoic rocks occur in other States. Mesozoic sediments overlie large areas of the continent and reach their greatest development in central Queensland. Cainozoic rocks occur mainly in the southern parts of Victoria and South Australia and as residual basalt cappings over an extensive area of the Palaeozoic rocks of eastern Australia.

Minerals occur widely throughout the Precambrian and Palaeozoic rocks of the continent. Palaeozoic mineralization is perhaps more varied, but the deposits now being worked are in general smaller than those found in Precambrian rocks. Most of the larger deposits of minerals now being mined in Australia are shown in the following table according to the geological era in which they were formed.

**PRINCIPAL AUSTRALIAN MINERAL DEPOSITS**

Age of geological formation in which located	Metal or mineral	State or Territory	Locality
Precambrian (more than 520 million years old)	Copper ..	Queensland ..	Mount Isa
		Northern Territory	Tennant Creek
	Gold .. ..	Western Australia	Kalgoorlie and other localities
	Iron .. ..	South Australia ..	Middleback Ranges
		Western Australia	Yampi Sound
	Lead-Silver-Zinc	New South Wales	Broken Hill
		Queensland ..	Mount Isa
Palaeozoic (between 200 and 520 million years old)	Uranium ..	Queensland ..	Mary Kathleen
		South Australia ..	Radium Hill
		Northern Territory	Rum Jungle and South Alligator River area
	Black coal ..	New South Wales	Hunter Valley, Lithgow, South Coast
		Queensland ..	Baralaba, Blair Athol, etc.
		Western Australia	Collie
	Copper-Gold ..	Queensland ..	Mount Morgan
		Tasmania ..	Mount Lyell
	Lead-Silver-Zinc	Tasmania ..	Mount Read and Rosebery
	Tin (lode) ..	Queensland ..	Herberton
	Tungsten ..	Tasmania ..	North-east of State
		Tasmania ..	King Island and north-east of State

PRINCIPAL AUSTRALIAN MINERAL DEPOSITS—*continued*

Age of geological formation in which located	Metal or mineral	State or Territory	Locality
Mesozoic (between 75 and 200 million years old)	Black Coal ..	Queensland ..	Ipswich
		South Australia ..	Leigh Creek
		Tasmania ..	St. Marys
	Mineral Sands(a)	New South Wales	North coast
		Queensland ..	South coast
Cainozoic (less than 75 million years old)	Brown Coal ..	Victoria ..	Gippsland
	Tin (alluvial) ..	New South Wales	Tingha
		Queensland ..	Herberton
		Tasmania ..	North-east of State

(a) The deposition of mineral sands, derived from Palaeozoic granites, continued throughout the Cainozoic Era.

The large bauxite (aluminium) deposits of Cape York Peninsula in Queensland, from which production has now commenced, were formed during the early part of the Cainozoic Era.

Of the non-metallic minerals, many, such as clay, sand and silica, etc., are not restricted to the rocks of any particular era. However, Precambrian rocks do contain important deposits of asbestos in Western Australia, limestone and dolomite in South Australia, and mica in the Northern Territory. All crude salt is produced by the evaporation of water from pans constructed along the sea coast or from inland lakes.

2. **Mineral Concentrates.**—Concentration is a physical process involving the removal of mineral impurity from the ore. Most mines now dispatch ore in concentrate form, as this considerably reduces the transport costs and produces a salable product in the form required by smelters. Most concentrates are nearly pure mineral, and the ore-dressing processes (with the exception of that for uranium) involve no chemical change to the mineral being won. Various methods are used in concentration. Sulphide ores, which now comprise the greatest tonnages treated, are, in most instances, separated from the gangue by flotation. In this method of concentration, the ore is ground finely enough to liberate the individual mineral particles, aerated, and agitated in tanks of water to which chemicals have been added. Under certain conditions, particles of one sulphide mineral adhere to the froth bubbles and are collected in the froth overflow, while gangue and even other sulphides are depressed. By treating the tailings of one flotation process with different chemicals and conditions, it is often possible to separate a further concentrate, as is done at Broken Hill where the zinc sulphide is recovered from the tailings of the lead sulphide concentration process.

Other methods of concentration used are gravity (alluvial tin, mineral sands, some lead-zinc ores), electromagnetic (wolfram, scheelite, glauconite and mineral sands), and electrostatic (mineral sands).

Particulars of an average Broken Hill ore mined during 1961, showing metal contents before and after differential flotation, are shown in the following table. It should be stressed that in both the ore and the concentrate, lead and zinc are contained in the form of lead sulphide and zinc sulphide respectively. Most of the silver is contained in minerals which are collected with the lead sulphide.

**ORE TREATED AND CONCENTRATES PRODUCED BY DIFFERENTIAL  
FLOTATION AT BROKEN HILL, (a) 1961**

Particulars	Quantity	Proportion of weight of ore mined	Average assays			Proportion of metal distribution		
			Lead	Silver	Zinc	Lead	Silver	Zinc
	tons	per cent.	per cent.	f. oz.	per cent.	per cent.	per cent.	per cent.
Ore treated ..	1,894,679	100.0	10.9	3.9	12.1	100.0	100.0	100.0
Flotation products—								
Lead concentrate	264,209	13.9	75.4	25.5	4.1	96.4	92.3	4.7
Zinc concentrate	398,314	21.0	0.8	0.7	52.8	1.6	3.9	91.6
Residues(b) ..	1,232,156	65.1	0.3	0.2	0.7	2.0	3.8	3.7

(a) Average particulars for the four operating companies. (b) These are of no economic use at present and are either pumped as filling for underground workings or otherwise discarded.

3. **Government Aid to Mining, and Mineral Control.**—(i) *Aid to Mining—Commonwealth.*  
 (a) *Income Taxation Concessions.* One-fifth of the net income derived from mining for prescribed minerals in Australia or the Territory of Papua and New Guinea is exempt from tax. The metals or minerals to which this concession applies are as follows:—asbestos, bauxite, chromite, emery, fluorspar, graphite, ilmenite, kyanite, magnesite, manganese oxides, mica, monazite, pyrite, quartz crystals (piezo-electric quality), radio-active ores, rutile, sillimanite, vermiculite and zircon; and ores of antimony, arsenic, beryllium, bismuth, cobalt, columbium, copper, lithium, mercury, molybdenum, nickel, osmiridium, platinum, selenium, strontium, tantalum, tellurium, tin, tungsten and vanadium.

Income derived from mining principally for gold in Australia or the Territory of Papua and New Guinea is exempt from tax. The exemption is also available in respect of income derived from mining principally for gold and copper if the value of the gold obtained is not less than 40 per cent. of the value of total output.

Income attributable to uranium obtained from working a mining property in Australia or the Territory of Papua and New Guinea, or from the treatment of ore in Australia or the Territory to recover uranium concentrates, is exempt from tax for residents of Australia and the Territory of Papua and New Guinea. The exemption is, however, conditional upon the uranium recovered being owned by the Commonwealth or disposed of to a person approved by the Commonwealth.

Dividends paid wholly and exclusively out of exempt mining income are also exempt from tax.

Further information is given in a booklet entitled *Income Tax for the Mining Industry*, issued by the Commissioner of Taxation.

(b) *Assistance to the Gold-Mining Industry.* The assistance to the gold-mining industry by subsidy was introduced at a time of rising costs in the industry and a fixed official world price for gold. Because many producers were faced with the likelihood of closing down, the Government decided to subsidize marginal producers in Australia and the Territory of Papua and New Guinea. Under the *Gold-Mining Industry Assistance Act 1954*, a producer the value of whose gold output exceeded 50 per cent. of the total value of his mine output was eligible for assistance, subject to certain conditions, on the production of gold from 1st July, 1954. The rate of subsidy payable under the original Act was increased under amendments enacted on 22nd October, 1957, and 22nd May, 1959. Under the Act as it now stands, the subsidy payable to small producers whose annual output does not exceed 500 fine oz. is £2 8s. 0d. per fine oz., irrespective of cost of production or rate of profit. For large producers, subject to certain provisions, subsidy is paid at the rate of three quarters of the excess of the average cost of production over £13 10s. 0d. per fine oz. with a maximum amount of subsidy of £3 5s. 0d. per fine oz. A producer whose output during the year exceeds 500 fine oz. may elect to be treated as a small producer. In this case, the subsidy rate payable per fine ounce on total production is £2 8s. 0d. reduced by one penny for each fine ounce by which output exceeds 500 fine ounces. Where a producer receives an amount in excess of the official price of £15 12s. 6d. per fine oz. as a result of sales on overseas premium markets or otherwise, the subsidy payable is reduced by the amount of the excess. The subsidy is also limited, in the case of large producers, to the extent that the annual net profit of a producer shall not, with the addition of the subsidy, exceed 10 per cent. of the capital used in the production and sale of gold. The maximum expenditure on development allowable in determining costs is £5 5s. 0d. per fine oz. A further condition of the Act is that the recovery rate of the mine shall not fall below nine-tenths of that for the year previous to the commencement of the Act. Payments under the Act are to apply to production until 30th June, 1965.

Payments under the Act commenced in March, 1955, and the amounts paid to gold producers in the various States and Territories of Australia in each of the years 1958 to 1962 are shown in the table on page 1158.

The purpose of the *Gold Mines Development Assistance Act 1962* is to provide assistance to gold producers in Australia and the Territories of Papua and New Guinea not receiving subsidy under the *Gold-Mining Industry Assistance Act 1954–1962*, in order to increase the rate of their development work and so to add to their proved reserves of gold-bearing minerals. In recent years, these reserves had declined to the extent that the long-term prospects of the industry were jeopardized. The Act, which applies to 1962–63 and the next two financial years, provides that a development allowance is payable to a mine approved for the purposes of the scheme equal to the amount by which its allowable expenditure on development in a year, as defined in the Act, exceeds a defined base amount, which normally will be the average annual amount spent by the mine on development during the three years preceding 1962–63. The payment of allowance is also subject to a number of other conditions and limits provided for in the Act.

(c) *Assistance to the Copper Mining Industry.* After a Tariff Board investigation, assistance was accorded to the industry in 1958, partly by import duty and partly by bounty. The assistance to the industry was reviewed in 1960, and the present bounty assistance will continue until 31st December, 1963. Under the *Copper Bounty Act 1958-1960*, bounty is payable, subject to specified conditions, on refined copper sold for use in Australia. The rate of bounty is £35 per ton when the overseas price, as determined by the Minister for Customs and Excise, is £290 (£Stg.232) or less. When the overseas price rises above £290, the bounty falls by the same extent, so that no bounty is payable when the overseas price is £325 (£Stg.260) or more. A duty is imposed on imports of copper when the overseas price falls below £290 per ton, to the extent of £1 for each £1 that the price falls below £290. Including freight and other charges, the landed cost of imported copper is thus expected not to fall below about £305 per ton.

(d) *Search for Oil.* The Commonwealth Government has encouraged the search for oil in Australia, Papua and New Guinea, and considerable sums have been spent during recent years in geological and geophysical surveys and in drilling operations.

The Bureau of Mineral Resources, in close co-operation with the Mines Departments of the States, has continued regional geological and geophysical surveys throughout Australia. In 1957, the Commonwealth Government introduced the *Petroleum Search Subsidy Act 1957*, whereby stratigraphic drilling operations were subsidized to the extent of 50 per cent. of cost. The *Petroleum Search Subsidy Act 1959* widened the scope of operations for which subsidy was offered to include all types of geophysical surveys and off-structure drilling operations. Another amendment in 1961 further widened the scope of the 1959 Act to provide subsidy for test drilling and detailed structure drilling operations. It also provided for the calculation of drilling subsidies on a footage basis as an alternative to the total cost basis. A sum of £5 million was allocated to the oil search subsidy scheme for 1962-63. This amount was almost double the allocation of £2.7 million provided in the previous year. In spite of the increased allocation, applications for subsidy increased to such an extent that the maximum rate of subsidy was reduced from 50 per cent. of the allowable cost of approved operations to 30 per cent. in 1962-63.

To the end of 1962, actual payments of subsidy totalling more than £5 million had been made in accordance with the terms of the subsidy Acts, and it is expected that this amount will be greatly increased during the next two years because of vigorous oil search activities. Further particulars of government assistance in oil exploration will be found in Official Year Book No. 48, pages 1095-6.

(e) *Assistance to Producers of Sulphuric Acid and Iron Pyrites.* Following recommendations of the Tariff Board, the *Sulphuric Acid Bounty Act* was extended for a period of five years from 1st July, 1960. Arising from these same recommendations, the *Pyrites Bounty Act 1960* was enacted on 15th December, 1960, to be operative for a period of four and a half years from 1st January, 1961. The Acts provide for bounties to be paid, subject to specified conditions, on sulphuric acid produced from prescribed materials of Australian origin and to producers of iron pyrites.

(f) *Bureau of Mineral Resources, Geology and Geophysics.* The Bureau of Mineral Resources, Geology and Geophysics has sections dealing with geology, geophysics, mining engineering, petroleum technology and mineral economics. The geological section provides geologists to conduct all surveys required in Commonwealth Territories, and makes detailed and regional surveys in conjunction with or by arrangement with the State Mines Departments, surveys of possible oil-fields in Australia and New Guinea, surveys of mines for which financial assistance is sought, and investigations of deposits of radio-active minerals. The geophysical section conducts investigations throughout Australia and New Guinea connected with the search for metalliferous radio-active and other mineral deposits; investigations connected with exploration for coal, oil and water; regional magnetic and gravity surveys; engineering and military geophysics; and the operation of geophysical (magnetic and seismic) observatories. The Bureau works in close co-operation with the Mines Departments of the States. It has assumed full responsibility for geological and geophysical surveys in Commonwealth Territories, but suitable arrangements have been made to ensure that the local Administrations have the necessary technical advice directly available to them.

(g) *Ore-dressing and Mineragraphic Investigations.* These investigations are conducted by the Commonwealth Scientific and Industrial Research Organization as required by the industry. Ore-dressing investigations are carried out at the Ore-Dressing Laboratory, situated in the Department of Mining, University of Melbourne, and at the Ore-Dressing Laboratory, Kalgoorlie, situated at the School of Mines. The Mineragraphic Investigations Section is located in the Geology Department, University of Melbourne.

These two groups of laboratories perform complementary services—the Mineragraphic Investigations Section assesses microscopically the state of dispersion and the mineral association of ore bodies, while the Ore-Dressing Laboratories investigate the composition of ores and provide advice on suitable methods for their full-scale treatment. Much of this research is carried out on a co-operative research basis with the mining industry.

(h) *Department of Territories.* For particulars of the Northern Territory Administration, see paragraph (h) under section (ii) *Aid to Mining—States*, following.

(ii) *Aid to Mining—States.* (a) *General.* In addition to free assays and determinations of rocks and minerals carried out for prospectors by the Mines Departments of the States and Territories, technical officers of these departments provide advice to the mining and allied industries where required, carry out field examinations of mining prospects, advise on exploration and development, select sites for water supply, and in general give a free technical service to the mining industry.

(b) *New South Wales.* State aid to assist metalliferous mining may consist of grants to assist the prospecting and/or mining for gold and minerals, and for the purchase, removal and installation of mining plant or equipment. A quantity of mechanical equipment is also available in several localities for hire at reasonable rentals to prospectors and small mine operators, and District Inspectors have geiger counters and scheelite detectors which are loaned to approved persons.

(c) *Victoria.* Loans may be granted to assist prospecting and development or the purchase of machinery for gold mining. The Mines Department has stamp batteries in different parts of the State to crush ore for prospectors at nominal rates. Small mining companies may avail themselves of these facilities. Drilling with diamond, rotary and percussion drills is carried out by the Mines Department for mining companies and for general mineral exploration.

(d) *Queensland.* Various forms of assistance to mining are made available by the Queensland Department of Development and Mines. Grants are made from the Consolidated Revenue Fund for use on construction and maintenance of roads in mining areas. Advances are made from the Gold Mining Encouragement Fund for mining development work. This assistance is restricted to gold mines, and advances are repayable from proceeds of the mine, if any. From the Assistance to Metalliferous Mining Fund, plant, such as jackhammers, compressors and pumps, is purchased and maintained. Such plant is made available on hire, the rental payments being credited back to the fund. Prospecting assistance is made available in approved cases, the rates being £2 10s. a week for a single man and £3 10s. a week for a married man with dependants. This is not repayable. From the Advances to Mining Fund, assistance by way of subsidy is advanced for mine development. This is repayable from proceeds of the mine. The department also maintains a treatment works for tin ores, etc., at Irvinebank, an assay office at Cloncurry, and diamond-drilling plants in several parts of the State. The Venus State mill at Charters Towers is available for the treatment of gold-bearing ores.

(e) *South Australia.* The Department of Mines provides the following services and facilities to the mineral industry:—(i) hire of boring plant and mining equipment, boring and testing of mineral deposits, financial subsidies in approved cases for prospecting and mining development, development of sub-surface water supplies for farming, pastoral, irrigation and mining purposes, and purchase of basic metal ores from prospectors; (ii) geological examination of mineral deposits, water supply, dam foundation and drainage problems, guidance on mining legislation, and publication and issue of geological bulletins and maps. It also provides, through the Australian Mineral Development Laboratories, chemical and metallurgical and analytical and assay investigation, testing and treatment of ores and minerals, and petrographic, mineragraphic and radiometric determinations. Pilot scale metallurgical and chemical treatment plants are maintained and operated for the development of mineral extraction processes.

(f) *Western Australia.* Assistance is given to prospectors to the extent of £5 a week south of the 26th parallel of latitude, and of £6 a week north of that parallel; also provision is made for the supply of some tools required for prospecting.

There are twenty State batteries operating intermittently throughout the goldfields for the treatment of ore from prospectors and small mine-owners, at a nominal charge. A cartage subsidy is also granted to such operators sending ore to State batteries for treatment.

Provision is made for loans to mine-owners who require assistance to develop mines. The Government also has a drilling scheme, financing mine-owners on a £1 for £1 basis.

(g) *Tasmania.* The Department of Mines provides financial assistance to mining lessees for the purchase of plant and machinery, for sinking, repairing or de-watering of shafts, for construction of dams and water races, for testing and proving a deposit of any mining product, for developmental work, and for diamond and other types of drilling. The Department has available for hire percussion and diamond drills for exploration, as well as a complete plant for small shaft sinking and tunnelling. Other assistance is rendered to the industry by geological and engineering advice, through ore-dressing research into metallurgical recoveries, and the selection and design of treatment plant.

(h) *Northern Territory.* To encourage the development of the mining industry, the Northern Territory Administration has erected four government batteries for the treatment of miners' ores. Only two of these, at Tennant Creek and Mount Wells near Burrundie, are now in operation. The re-opening of the other two batteries will depend on the revival of small scale wolfram and tin mining in Hatches Creek and Maranboy where these batteries are located.

The crushing charges are subsidized by government grants. In addition, the Administration provides cartage subsidies and financial advances to encourage miners to carry out developmental work. Roads and water supply services are provided and maintained for mines under active development throughout the Territory.

(iii) *Controls on Minerals and Metals.* Export controls are maintained over certain minerals and metals. These controls are enforced by means of the Customs (Prohibited Exports) Regulations as amended from time to time by Statutory Rules. To export these materials, it is necessary to obtain a clearance from the following Commonwealth authorities:—

Department of National Development—mineral sands in all forms (including concentrates) containing zircon, rutile or ilmenite; lithium ores and concentrates; beryllium ores and concentrates; manganese ores; iron ores, beneficiated iron ores and iron concentrates;

Department of Trade—iron, steel and ferrous alloys;

Department of Primary Industry—phosphate rock, phosphate and superphosphate, and fertilizers containing phosphate or superphosphate;

Australian Atomic Energy Commission—all radio-active minerals, metals and compounds, including uranium, thorium and monazite; lithium metal and alloys; beryllium metal, alloys and compounds; zirconium metal, alloys and compounds.

Further information concerning the Atomic Energy Commission appears in Chapter XVIII. Education, Cultural Activities and Research.

## § 2. The Mineral Industry

1. *Sources of Statistics.*—In the main, the data contained in this chapter consist of official statistics of the Mines Departments of the several States and of the Northern Territory Mines Branch. The particulars shown have been compiled as far as practicable on the standardized basis which has been used in Australia since 1950, and this presentation has involved some rearrangement of official statistics published by the Mines Departments in some States. These statistics have been supplemented, as necessary, by data obtained from the Statisticians of the several States, the Commonwealth Bureau of Mineral Resources, the Joint Coal Board, the Australian Mines and Metals Association (Inc.), the Division of Minerals of the United States Bureau of Mines, and from several other sources.

2. *Presentation of Mineral Statistics.*—(i) *Mineral Industry Data.* The mineral industry includes all mining and quarrying and the recovery of minerals from ore dumps, tailings, etc. Ore-dressing and elementary smelting of metallic minerals (e.g. in the case of gold) and miscellaneous treatment of non-metallic minerals, where these are carried out in an associated plant at or near the mine, are included in the mineral industry. However, establishments primarily engaged in smelting and/or refining (including the smelting and refining sections of the large plants operated at Mount Morgan and Mount Isa in Queensland and at Mount Lyell in Tasmania) are omitted and classified to the manufacturing industry.

For mines and quarries which produce more than one product, it is not possible to apportion some particulars relating to the operations of the mine (employment, salaries and wages paid, and costs incurred in production) to the minerals produced. It is, therefore, the practice to record these data only as a total for each mine and then to classify each mine to the industry of the most important mineral produced. Thus a mine producing, say, both tin and tungsten minerals, would be classified as a tin mine if tin were the more important product by value, and as tungsten if tungsten were the dominant product.

The mineral industries are classified into four major groups, namely, Metal Mining, Fuel Mining, Non-metal (excluding Fuel) Mining, and Construction Material Quarrying.

Mineral industry data have been obtained annually, since 1952, from the Mining and Quarrying Census. This census is carried out in collaboration with the several Mines departments and involves the uniform collection of particulars from all establishments employing on the average four or more persons during the period worked by the mine. A representative specimen collection form is included in the bulletin *Primary Industries, Part II.*, No. 55, 1960-61, pages 47 and 48. For smaller mines, either simplified Census returns covering number of persons employed and value of output are collected, or these particulars are compiled from data made available by the Mines departments.

Statistics of oil search operations have been excluded in accordance with the definition of the mining industry set out above, but a special article on developments in the search for oil, contributed by the Commonwealth Bureau of Mineral Resources, may be found in Official Year Book No. 48, pages 1094-9. More recent developments are outlined in § 13 of this chapter. Details of the activities of establishments engaged in the mining and treatment of uranium ore have been excluded because of the confidential nature of these operations.

(ii) *Mineral Product Data.* In the preparation of Australian mineral production statistics, the quantities and values of individual minerals produced are recorded in terms of the products in the form in which they are dispatched from the locality of each mine. For example, in the case of a metal mine, the output is recorded as ore when no treatment is undertaken at the mine, or as a concentrate where ore-dressing operations are carried out in associated works in the locality of the mine. In addition to the basic quantity data, the contents of metallic minerals and contents or average grade of selected non-metallic minerals are recorded. Whenever practicable, contents (based on assay) of metallic minerals are shown for each metal which is a "pay metal" or a "refiners' prize" when present in the particular mineral. In general, other metallic contents which are not recovered are excluded.

Minerals are divided into four major groups, namely, Metals, Fuels, Non-metals (excluding Fuels) and Construction Materials. In this chapter, individual mineral products are arranged in these four groups. Particulars relating to uranium-bearing minerals are excluded.

3. Number of Mines and Quarries.—The following table shows the number of mines and quarries which operated in each State and Territory in 1961.

MINING AND QUARRYING: NUMBER OF MINES AND QUARRIES, 1961

Industry	N.S.W.	Vic.	Q'land	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.

(a) Incomplete.  
in Victoria.

(b) Not strictly comparable with previous years, owing to extension of coverage

4. **Employment in Mining and Quarrying.**—(i) *Persons Engaged.* Statistics of persons employed in the mining and quarrying industry are derived mainly from the annual census of that industry.

Data on the work force employed in the industry are also obtained from the Population Censuses of Australia. The Population Census figure for mining and quarrying includes a number of persons excluded by definition from the mining and quarrying census employment figure, e.g. prospectors, head office employees, etc.

In the following table, which shows particulars collected in the Population Censuses of Australia at 30th June, 1947, 1954, and 1961, the numbers of persons whose industry was stated to be "mining and quarrying" are shown together with the numbers engaged in all primary industries and the total work force.

### PERSONS ENGAGED IN MINING AND QUARRYING, AUSTRALIA

Particulars	Census, 30th June—		
	1947	1954	1961
<b>Persons engaged in—</b>			
Mining and quarrying .. .. .	57,574	62,107	52,941
All primary industries .. .. .	563,697	560,100	472,670
<b>Total work force</b> .. .. .	<b>3,196,431</b>	<b>3,702,022</b>	<b>4,225,098</b>
<b>Persons engaged in mining and quarrying as a proportion of—</b>			
All primary industries .. .. . %	10.2	11.1	11.2
<b>Total work force</b> .. .. . %	<b>1.8</b>	<b>1.7</b>	<b>1.3</b>

The following table is derived from mining census data and shows the average numbers engaged in the various mining industries in each State or Territory in 1961.

## MINING AND QUARRYING: EMPLOYMENT(a), 1961

(a) Average employment during whole year, including working proprietors. (b) Not available for publication. (c) Includes persons engaged by one mine which has both underground and opencut workings. (d) Incomplete for some industries outside the normal administrative control of State Mines Departments (e.g. clays and salt). (e) Incomplete, owing to difficulties of coverage. (f) Includes Australian Capital Territory. (g) Not available for publication; included with Northern Territory.

The following table shows particulars of mining employment in Australia for the years 1957 to 1961. The figures show the average number of persons employed during the whole year, including working proprietors.

## MINING AND QUARRYING: EMPLOYMENT, AUSTRALIA

Industry	1957	1958	1959	1960	1961
Metal mining—					
Gold mining ..	6,205	5,901	5,948	5,544	5,438
Lead-silver-zinc mining ..	10,354	9,461	9,031	8,731	8,158
Copper-gold mining ..	2,151	2,057	2,301	2,364	2,322
Tin mining ..	856	944	926	946	1,131
Mineral sands mining ..	2,062	1,102	1,019	1,127	1,141
Other metal mining ..	1,300	1,030	1,031	1,177	1,097
<i>Total, Metal Mining</i>	22,928	20,495	20,256	19,889	19,287
Fuel mining—					
Black coal mining ..	22,345	20,795	18,678	18,529	16,957
Brown coal mining ..	1,579	1,540	1,519	1,399	1,441
<i>Total, Fuel Mining</i>	23,924	22,335	20,197	19,928	18,398
Non-metal (excluding fuel) mining (a) ..	2,749	2,728	2,975	2,925	2,942
<i>Total, All Mining</i>	49,601	45,558	43,428	42,742	40,627
Construction material quarrying (a) ..	4,640	4,581	4,116	5,016	5,498
<i>Total, All Mining and Quarrying ..</i>	54,241	50,139	47,544	47,758	46,125

(a) Incomplete.

(ii) *Size Classification of Mines and Quarries.* Most of the mines and quarries worked during 1961 employed less than four persons, including working proprietors. However, more than half of the persons engaged in mining and quarrying were in the 48 mines each employing 200 persons or more. The following table shows the distribution of the total number of mines into various size groups according to the average number of persons employed during the period worked by each mine in 1961. For particulars of the method of compiling these industry statistics, see para. 2 (i), pages 1144-5.

#### MINING AND QUARRYING: SIZE CLASSIFICATION OF ESTABLISHMENTS, 1961

Mines and quarries employing on the average(a)—	N.S.W.	Vic.	Q'land	S.A.	W.A.	Tas.	N.T. and A.C.T.	Aust.

Persons ..	12,182	1,907	4,041	566	4,539	1,744	221	25,200
Total—								
Establishments ..	998	340	538	394	340	134	80	2,824
Persons ..	21,798	4,696	8,934	2,367	7,397	2,945	542	48,679

(a) Average during period worked. Includes working proprietors.

(iii) *Accidents in Mining.* Particulars of numbers of persons killed and injured in accidents in mines and associated treatment plants are recorded by State Mines Departments. Numbers injured are not reported on a uniform basis in all States, as varying criteria are used in determining what constitutes injury. In 1961, 28 persons were recorded as killed and 1,394 as injured in mining (excluding quarrying) accidents. Recorded deaths and injuries in that year were highest in black coal mines (11 and 368, respectively), lead-silver-zinc mines (4 and 359), gold mines (5 and 322), and copper-gold mines (4 and 142). Persons killed and injured in the construction material quarrying industry numbered 10 and 74, respectively, in 1961.

5. *Production Costs in Mining and Quarrying.*—(i) *Salaries and Wages Paid.* Salaries and wages paid in the mining and quarrying industries in Australia during each year 1957 to 1961 are shown in the following table. Information regarding rates of wages paid in the mining industry is shown in Chapter XII. Labour, Wages and Prices (p.469) and also in the *Labour Report*.

Talc .. .. .	"	14,441	15,393	16,376	15,670	13,545

NOTE.—See next page for footnotes.

## QUANTITIES OF PRINCIPAL MINERALS PRODUCED: AUSTRALIA—continued

Mineral	Unit	1957	1958	1959	1960	1961
CONSTRUCTION MATERIALS(i)						
Sand .. .. .	'000 tons	4,125	4,118	4,623	5,934	7,427
River gravel and gravel boulders .. .. .	"	1,759	2,265	2,524	2,932	6,018
Dimension stone .. .. .	"	230	272	283	318	533
Crushed and broken stone .. .. .	"	15,587	15,543	19,822	22,843	27,303
Other (decomposed rock, etc.) .. .. .	"	12,546	12,722	13,699	15,264	16,482

(a) Includes cupreous ore for fertilizer. (b) Includes a small quantity of gold ore.  
 (c) Bullion, alluvial, retorted gold, etc. (d) Gross weight not available. (e) Iron oxide for metal extraction.  
 (f) Includes lead-silver, lead-silver-zinc and lead-zinc ores. (g) Incomplete; figures relate only to production reported by Mines Departments. (h) Excludes quantities used directly as a building or road material. (i) Incomplete owing to difficulties of coverage; 1961 figures are not strictly comparable with previous years owing to extension of coverage in Victoria.

NOTE.—Particulars of uranium concentrate produced are not available for publication and have been excluded.

(iii) *Contents of Metallic Minerals Produced.* The following table shows the contents of metallic minerals produced in 1961 which were "pay metals" or which were recovered as "refiners' prizes". Further particulars for earlier years are shown in the following paragraph and in the sections later in this chapter covering principal contents.

## CONTENTS OF METALLIC MINERALS PRODUCED, 1961

NOTE.—Particulars of production of uranium oxide ( $\text{U}_3\text{O}_8$ ) are not available for publication and are excluded.

### § 3. Gold

1. *Historical.*—A brief history of gold-mining in Australia may be found in previous issues of the Year Book (see No. 48, p. 1059).

2. *Methods of Mining and Treatment.*—Gold ores can be divided into two types, namely, free-milling and refractory. Free-milling ores are those that, when finely ground, will yield their gold content to amalgamation and/or cyanidation, and these are found in most of the gold deposits of Australia.

Some refractory ores, which are not amenable to amalgamation, allow their gold to be dissolved by cyanidation, from which solution the gold is then precipitated. However, on the Coolgardie field, where gold-bearing sulphide and telluride minerals occur, it is necessary first to recover these from gangue by flotation. This concentrate is then roasted, and the resulting calcine, an impure oxide containing free gold, is cyanided to yield gold. This is usually smelted as bullion, in which form it leaves the vicinity of the mine.

3. *Mine Production.*—The following table shows the mine production of gold (gold content of minerals produced) during 1961 according to the mineral in which it was contained and the State or Territory of origin. A small quantity of gold recovered from pyrite concentrate produced at Kalgoorlie, Western Australia, for sulphuric acid manufacture is included with gold ore, concentrate, etc.

### GOLD: MINE PRODUCTION, 1961

(Fine oz.)

Mineral in which contained	N.S.W.	Vic.	Q'land	S.A.	W.A.	Tas.	N.T.	Aust.
Copper ore, concentrate, etc. ..	2,556	..	49,690	..	2,983	7,242	18,354	80,825
Gold ore, concentrate, etc. ..	753	26,229	15,096	55	867,675	446	57,291	967,545
Lead concentrate ..	7,088	..	..	..	..	3,889	..	10,977
Lead-copper concentrate ..	..	..	..	..	..	12,572	..	12,572
Zinc concentrate ..	1,637	..	..	..	..	2,736	..	4,373
<b>Total Gold ..</b>	<b>12,034</b>	<b>26,229</b>	<b>64,786</b>	<b>55</b>	<b>870,658</b>	<b>26,885</b>	<b>75,645</b>	<b>1,076,292</b>

The principal sources of production during 1961 were as follows.

(i) *New South Wales.* There was only one mine employing four or more persons engaged solely in gold-mining. Most of the gold produced during 1961 was contained in lead and zinc concentrates produced at Broken Hill and copper, lead, and zinc concentrates milled at Captain's Flat.

(ii) *Victoria.* At Chewton, near Castlemaine, one mine produced more than half of the State's production. Only one other gold mine, located in the north-east of the State, produced more than 1,000 fine oz. during the year.

(iii) *Queensland.* The copper concentrate produced at Mount Morgan contained more than three-quarters of the State's output of gold, nearly all the remaining production coming from a mine at Cracow.

(iv) *South Australia.* The only gold produced was won by prospectors.

(v) *Western Australia.* More than half the total production came from the East Coolgardie goldfield, while most of the remaining production came from the Dundas, Murchison and Yilgarn goldfields. A single mine at Fimiston maintained its position as the largest gold producer in Australia, mining 166,031 fine oz. during 1961, and two other mines each produced over 100,000 fine oz. in the same period.

(vi) *Tasmania.* Lead-copper, lead and zinc concentrates milled at Rosebery contained more than two-thirds of the gold produced in Tasmania during 1961, nearly all the remaining production being contained in copper concentrate produced at Mount Lyell.

(vii) *Northern Territory.* Gold production is centred around Tennant Creek.

The following table shows the recorded mine production of gold (i.e. gold content of minerals produced) in the several States and in Australia as a whole during each year 1958 to 1962 and total output since the first major discovery of gold in 1851. Owing to defective information in the earlier years, it is likely that the total production figures fall considerably short of the actual totals.

## GOLD: MINE PRODUCTION(a)

State or Territory	1958	1959	1960	1961	1962(b)	Total(b) 1851-1962
	f. oz.	f. oz.	f. oz.	f. oz.	f. oz.	'000 f. oz.

(a) Gold content of minerals produced.

(b) Subject to revision.

4. **Refinery Production.**—Amalgam and gold slimes from cyanide extraction are treated at the mines to produce gold bullion, which at some mines may be partly refined before dispatch to the Royal Mints, located in Melbourne and Perth. By-product gold from lead smelting is refined at Port Pirie in South Australia, while the gold contained in copper refinery sludges resulting from electrolytic copper refining at Mount Lyell and Port Kembla, is recovered at Port Kembla. Gold bullion and other gold-bearing materials are also refined in Sydney.

Details of the refinery production of gold in Australia and the value of refined newly-won gold of Australian origin are shown in the following table for each of the years 1958 to 1962. The value of the refined newly-won gold is based on the price fixed by the Reserve Bank, but allowance is made for premiums on sales of gold overseas and for industrial purposes in Australia.

5. **Changes in Stocks of Gold held in Australia.**—The following table shows particulars of production and consumption, imports and exports of gold and changes in stocks of gold held in Australia for each of the years 1958 to 1962.

**CHANGES IN STOCKS OF GOLD HELD IN AUSTRALIA**  
(Fine oz.)

Particulars	1958	1959	1960	1961	1962 (a)
Mine production of gold(b) ..	1,103,980	1,085,104	1,086,709	1,076,292	1,073,147
Imports of gold(c)(d) ..	160,232	136,674	144,033	146,279	135,087
<i>Total</i> .. ..	<i>1,264,212</i>	<i>1,221,778</i>	<i>1,230,742</i>	<i>1,222,571</i>	<i>1,208,234</i>
Exports of gold(c) .. ..	128,550	128,052	2,513,906	1,099,701	314,971
Gold content of ores and concentrates exported ..	22,453	17,941	25,803	39,835	44,166
Net industrial consumption of gold .. ..	29,135	33,938	40,972	35,429	47,881
<i>Total</i> .. ..	<i>180,138</i>	<i>179,931</i>	<i>2,580,681</i>	<i>1,174,965</i>	<i>407,018</i>
Changes in stocks of gold held in Australia(e) .. ..	+1,084,074	+1,041,847	-1,349,939	+ 47,606	+ 801,216

(a) Subject to revision. (b) Gold content of minerals produced in Australia. (c) Includes gold contained in matte. Excludes specie, leaf and foil and gold in unrefined forms other than the gold content of unrefined gold and silver bullion. (d) Excludes gold imported in some minor minerals. (e) Includes changes in holdings in Australia by Official and Banking Institutions both on their own behalf and that of non-residents, together with the gold content of change in stocks of minerals awaiting refining. The sign near the figure indicates increase (+) or decrease (-) in stocks during the period shown.

6. **Prices of Gold.**—Under existing legislation, all gold produced in Australia is sold to the Reserve Bank. The official price of gold is fixed by the Reserve Bank. On 1st May, 1954, it was raised from £15 9s. 10d. to £15 12s. 6d. per fine oz. and has remained unchanged since that date. The current price reflects the "parity" value of Australian currency established by the *International Monetary Agreement Act 1947*. Prior to 1947, the price of gold was based on the price for which it could be sold abroad in official markets, less cost of movement.

Average prices of gold per fine oz. at mints in Australia and on the London gold market are shown in the following table for the years 1958 to 1962.

**PRICES OF GOLD: AUSTRALIA AND LONDON**  
(per fine oz.)

Place of sale	1958	1959	1960	1961	1962
At mints in Australia £A. s. d.	15 12 6	15 12 6	15 12 6	15 12 6	15 12 6
London .. .. £stg. s. d.	12 9 9½	12 9 10½	12 11 2½	12 11 0	12 10 1

7. **Sales of Gold on Oversea Premium Markets.**—In November, 1951, the Commonwealth Government decided to allow Australian gold producers to benefit from the higher prices then being paid for gold on some overseas markets. To implement this decision, producers formed the Gold Producers' Association Limited in December, 1951, and the first sales were made in that month. By arrangement with the Reserve Bank of Australia, the total quantity of newly-won gold delivered to the Bank by members of the Association in any calendar month, less the quantity required for industrial purposes in Australia, is available to the Association for sale on overseas premium markets during the ensuing two calendar months. The net proceeds from premium sales are distributed to members in proportion to their production of gold. The actual volume of sales on overseas premium markets has been dependent largely on the premium over the Australian fixed price.

The following table shows the quantity and value of gold sold on overseas premium markets and the average price realized for these sales during the years 1958 to 1962.

### GOLD SOLD ON OVERSEA PREMIUM MARKETS

Particulars	Unit	1958	1959	1960	1961	1962

# MINE PRODUCTION OF PRINCIPAL METALS AND PRODUCTION OF COAL

(METALLIC CONTENT OF MINERALS)

AUSTRALIA, 1935 TO 1962

## § 4. Lead, Silver and Zinc

1. **Historical.**—A brief history of silver-lead-zinc mining in Australia may be found in previous issues of the Year Book (see No. 48, p. 1065).

2. **Lead-Zinc Study Group.**—With the cessation of stock-pile buying of lead and zinc by the United States Government in 1958, world producers were faced with the prospect of a serious unbalance between world supply and demand for these metals. To meet this problem, a series of meetings of interested governments was held, at which Australia was represented. The meeting culminated in the formation of the Lead-Zinc Study Group in mid-1959. This group has met on several occasions and embarked on basic studies of productive capacity of lead and zinc, prices, and consumption trends. Since the group was established, it has recommended reduced production and sales (mainly lead) from time to time which have meant curtailments in both mine and metal production in Australia. No reduction was planned for 1963.

3. **Methods of Mining and Treatment.**—Nearly all ores now mined are composed of deep-lying sulphide minerals and it is therefore necessary to mine these ores by underground methods. At all large mines, it is the practice to produce separate lead and zinc concentrates with the lead concentrate containing most of the silver. These concentrates are prepared by differential flotation except in cases where a satisfactory concentrate can be obtained by gravity methods. In flotation plants, the ore is finely ground and by differential flotation a lead concentrate is first produced, with the zinc concentrate subsequently separated from the tailings.

Particulars of representative Broken Hill lead and zinc concentrates are shown in para. 2, page 1140.

4. **Mine Production.**—The following table shows the mine production (metal content of ores and concentrates produced) of lead, silver and zinc in Australia, and the respective minerals in which these metals were contained.

LEAD, SILVER AND ZINC: CONTENT OF ORES AND CONCENTRATES

(a) Includes lead-silver and lead-silver-zinc ore.

(b) Less than half a ton.

(c) Estimated.

The principal sources of production of lead, silver and zinc during 1961, were as follows.

(i) *New South Wales.* Lead and zinc concentrates, produced only at Broken Hill and Captain's Flat, contained nearly all the New South Wales production of lead and silver and all the zinc. During 1961, New South Wales mines produced (in terms of the content of all ores and concentrates produced) more than three-quarters of Australia's lead and zinc and more than half of the silver.

(ii) *Victoria.* All the silver produced was obtained from gold mining operations. No zinc-bearing minerals are mined in Victoria and lead was last mined in 1957.

(iii) *Queensland.* Mount Isa produced all the lead and zinc concentrates in Queensland during 1961. These contained most of the State's production of lead and silver and all the zinc. Nearly all the remaining silver was contained in copper concentrate produced at Mount Morgan.

(iv) *South Australia.* A small quantity of zinc ore for fertilizer was mined during 1961; there was no mine production of lead or silver during the year.

(v) *Western Australia.* Most of the silver produced was obtained from gold bullion produced by the gold-mining industry. All the lead produced was contained in lead concentrate. No zinc was produced during 1961.

(vi) *Tasmania.* All the lead, silver and zinc was produced from mines on the West Coast. All the zinc and most of the lead and silver were produced from mines at Rosebery and Williamsford and milled at Rosebery to produce separate lead, zinc, and lead-copper concentrates.

(vii) *Northern Territory.* Almost all the silver was contained in copper concentrates produced from Tennant Creek and Rum Jungle. In addition, a small quantity of lead ore containing silver, lead and zinc was produced.

The table hereunder shows the quantities of lead, silver and zinc contained in minerals won in the several States and the Northern Territory during the years 1957 to 1961.

5. *Smelter and Refinery Production.*—(i) *Lead Concentrate.* The bulk of lead concentrate produced at Broken Hill is railed to Port Pirie, in South Australia, for smelting and refining. Lead-silver bullion is produced from initial smelting, and lead, silver and gold are then refined. Cadmium is obtained from smelter fumes and refined to produce rods of metal. The sulphur dioxide gas formed during pre-smelter sintering operations is used to manufacture sulphuric acid. The antimony contained in the concentrate is alloyed with lead to form marketable antimonial lead while the copper is recovered in various products which are sent to copper refineries for copper extraction. Because of the continued low price of lead, production of refined metal at Port Pirie was below capacity in 1961.

In 1961, a new smelter was commissioned at Cockle Creek, New South Wales. It draws its supplies of lead and zinc concentrates from Broken Hill. This plant is unique in Australia in that the zinc content of lead concentrate is recovered. Previously this zinc content had accumulated in lead smelter slags. The bullion produced at this plant is exported for treatment while the refined zinc is used domestically. Sulphuric acid and cadmium are recovered as by-products. Some of the Broken Hill concentrate not treated at Port Pirie and Cockle Creek is exported.

Lead ore and concentrate produced at Mount Isa is smelted at the mine to derive a lead bullion which is rich in silver. All this bullion is exported to the United Kingdom for refining. A lead-copper dross is produced as a by-product of lead smelting and this is also exported.

Lead and lead-copper concentrates produced in Tasmania and lead concentrates produced in Western Australia are exported.

(ii) *Zinc Concentrate.* A large proportion of the zinc concentrate produced at Broken Hill is exported, and the remainder is either shipped from Port Pirie to Risdon, near Hobart, or railed to Cockle Creek for smelting and refining. At Risdon, the Broken Hill concentrate, together with all zinc concentrate produced in Tasmania, is roasted to form zinc oxide or calcine. Sulphur dioxide formed during this roasting process is used for the manufacture of sulphuric acid. The calcine is leached with a weak solution of sulphuric acid to form a zinc sulphate solution which, after purification, is electrolysed. Zinc of high purity is deposited on the cathodes and this zinc is melted and cast into ingots. Cadmium metal and cobalt oxide are also recovered. Lead-silver residues are recovered and forwarded to Port Pirie for smelting with lead concentrates. Copper residues are sent to Port Kembla for treatment.

Zinc concentrate produced at Mount Isa is refined overseas.

In the following table, details are given of the production and sales of refined primary lead, silver and zinc as recorded from data received from the Bureau of Mineral Resources and the Australian Mines and Metals Association. The figures shown for refined silver production include small quantities recovered from imported materials.

6. Prices of Lead, Silver and Zinc.—The following table shows average prices of lead, silver and zinc in Australia and on the London Metal Exchange during the years 1958 to 1962.

## PRICES OF LEAD, SILVER AND ZINC

Particulars	1958	1959	1960	1961	1962
<b>Australian prices, in Australian currency—</b>					
Lead, per ton(a) .. £	87	100	100	99	82
Silver, per fine oz.(b) s. d.	7 11½	8 2½	8 3½	8 4½	9 6½
Zinc, per ton(c) .. £	51	105	113	102	103
<b>London Metal Exchange prices, in sterling—</b>					
Lead, per ton .. £	73	72	72	65	57
Silver, per fine oz. s. d.	6 4½	6 7	6 7½	6 7½	7 7½
Zinc, per ton .. £	65	80	88	78	68

(a) The minimum price was fixed at £100 per ton on 23rd December, 1958. This was reduced to £95 per ton on 14th November, 1961, £85 per ton on 30th January, 1962, and £75 per ton on 10th August, 1962. On 1st December, 1962, the price was increased to £80 per ton. (b) Silver prices shown represent export parity calculated from London Metal Exchange prices. (c) Average market price was used subsequent to 30th June, 1959. On 1st January, 1958, a minimum price was fixed at £90 and this minimum was raised to £100 on 22nd December, 1958. The minimum price was abolished on 1st July, 1959.

7. Production in Principal Countries.—The following table shows, for the years 1957 to 1961, particulars of lead, silver and zinc production (mine basis) in principal producing countries, together with the estimated world total.

## § 5. Copper

1. **Historical.**—A brief history of copper-mining in Australia may be found in previous issues of the Year Book (see No. 48, p. 1070).

2. **Assistance to the Copper Mining Industry.**—For particulars, see para. 3(i)(c), page 1142.

3. **Methods of Mining and Treatment.**—Most of the large copper ore bodies contain the mineral chalcopyrite, an iron-copper sulphide. Copper ore is mined by open-cut methods at Mount Morgan, Mount Isa and Mount Lyell and by underground methods at Mount Isa and Ravensthorpe (Western Australia). Oxidized copper ore is mined at Mount Isa and at numerous other localities, mainly in Western Australia.

It is the practice for the sulphide ore to be finely ground and for the chalcopyrite contained in it to be recovered by flotation. At Mount Lyell and Mount Morgan, the tailings from the copper flotation are subjected to a further flotation and a pyrite concentrate is produced. The oxidized ore mined at Mount Isa is not concentrated and is fed direct to the smelters.

4. *Mine Production.*—The following table shows for 1961 the copper content of all minerals produced in the several States and the Northern Territory.

**COPPER: CONTENT OF ORES AND CONCENTRATES PRODUCED, 1961**  
(Tons)

Mineral in which contained	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	Aust.
Copper ore, concentrate, etc. ..	983	8	65,983	2	2,206	11,694	10,652	91,528
Lead concentrate ..	2,045	..	522	..	..	79	..	2,646
Lead-copper concentrate ..	..	..	..	..	..	731	..	731
Zinc concentrate ..	482	..	..	..	..	239	..	721
<b>Total .. ..</b>	<b>3,510</b>	<b>8</b>	<b>66,505</b>	<b>2</b>	<b>2,206</b>	<b>12,743</b>	<b>10,652</b>	<b>95,626</b>

The following were the principal sources of copper during 1961.

- (i) *New South Wales.* Most of the copper produced was contained in lead concentrate milled at Broken Hill. At Captain's Flat, nearly all the copper was contained in copper concentrate, but reserves were nearly exhausted. (The mine has since closed down.)
- (ii) *Victoria.* One mine produced a small quantity of copper ore during 1961.
- (iii) *Queensland.* Mount Isa was the most important copper producing centre in Australia, its 1961 output being 60 per cent. of the Australian total. The copper produced at Mount Isa is contained in copper sulphide concentrate, oxidized copper ore and lead concentrate. Copper concentrate produced at Mount Morgan contained most of the remainder.
- (iv) *South Australia.* Only a small quantity of copper ore for fertilizer was produced during 1961.
- (v) *Western Australia.* Two-thirds of the copper mined was contained in copper concentrate produced at Ravensthorpe. The remainder was contained in copper ore won at various localities in the State for fertilizer manufacture.
- (vi) *Tasmania.* Most of the State's production was at Mount Lyell, where copper was contained in copper concentrate, ore and precipitate. Lead-copper concentrate, lead concentrate and zinc concentrate milled at Rosebery made up most of the remainder of Tasmania's production.
- (vii) *Northern Territory.* Copper concentrate from Tennant Creek and copper concentrate and precipitate from Rum Jungle contained almost all of the Territory's output of copper.

The table hereunder shows the quantities of copper contained in minerals produced in the several States and the Northern Territory during the years 1957 to 1961.

**COPPER: CONTENT OF ORES AND CONCENTRATES PRODUCED**  
(Tons)

State or Territory	1957	1958	1959	1960	1961
New South Wales .. ..	4,382	4,023	3,728	3,572	3,510

Northern Territory .. ..	7,313	8,660	9,953	9,764	10,652
<b>Australia .. ..</b>	<b>59,255</b>	<b>75,715</b>	<b>94,950</b>	<b>109,435</b>	<b>95,626</b>

In New South Wales, the search for ore in the Cobar mining field was continued during 1961. The prospecting methods employed included geological mapping, geophysical and geochemical surveys and diamond drilling from the surface and from underground shafts. In 1962, development work started on the site of an old mine, 7 miles north of Cobar. This mine is expected to produce about 80,000 tons of copper annually after 1965.

**5. Smelter and Refinery Production of Copper.**—Most of the copper concentrate milled in Australia is smelted locally, blister copper being produced at Mount Isa, Mount Morgan, Mount Lyell and Port Kembla.

Blister copper smelted at Mount Isa is railed to Townsville for electrolytic refining. Mount Lyell blister copper is electrolytically refined at Mount Lyell and the bulk is re-melted and cast into primary shapes at Port Kembla. Mount Morgan blister copper is shipped to Port Kembla, where together with blister produced at Port Kembla, it is refined. Most Port Kembla copper is electrolytically refined. Fire refining, which is a cheaper process and undertaken when there are no other metals to be recovered, has been used to a lesser extent. Copper by-products from lead smelting operations at Port Pirie are also treated at Port Kembla.

At Port Kembla, gold and silver contained in electrolytic refining tank house slimes from Mount Lyell, Townsville, and Port Kembla are recovered.

In the following table, details are given of the production of blister copper, and the production and exports of refined copper for the years 1957 to 1961.

#### METALLIC COPPER: PRODUCTION AND EXPORTS, AUSTRALIA

(b) Smelter production.

**§ 6. Tin**

1. **Historical.**—A brief history of tin-mining in Australia may be found in previous issues of the Year Book (see No. 48, p. 1073).

2. **Methods of Mining and Treatment.**—All tin produced in Australia is contained in tin concentrate, which is usually of the mineral cassiterite (tin oxide). The greater proportion of the production is obtained from alluvial workings as a gravity concentrate. In the lode deposits, tin is usually not associated with other recoverable minerals. However, at two mines in Tasmania tin is associated with wolfram and sulphide minerals. At these mines, a gravity concentrate of tin, wolfram and sulphide minerals is obtained and from this the wolfram is separated by electromagnetic means. The tin and sulphide minerals are separated by flotation, the sulphides being floated off and the tin remaining as tailings.

3. **Mine Production.**—The following table sets out the tin content of tin concentrate produced in Australia during the years 1957 to 1961. No tin is recorded from minerals other than tin concentrate.

**TIN: CONTENT OF TIN CONCENTRATES PRODUCED**

(Tons)

State or Territory	1957	1958	1959	1960	1961
New South Wales .. ..	211	239	174	223	173
Victoria .. .. .	(a)	..	..	..	..
Queensland .. .. .	772	1,019	(b) 1,104	(b) 885	(b) 1,350
Western Australia .. ..	182	94	174	190	231
Tasmania .. .. .	777	883	890	884	986
Northern Territory .. ..	10	2	9	20	5
<b>Australia .. .. .</b>	<b>1,952</b>	<b>2,237</b>	<b>2,351</b>	<b>2,202</b>	<b>2,745</b>

(a) Less than half a ton.

(b) Estimated.

The following were the principal sources of production in 1961.

- (i) *New South Wales.* Virtually all production was from alluvial deposits. The New England region, mainly around Tingha, Deepwater, Emmaville and Tenterfield, produced over 80 per cent. of the total production.
- (ii) *Queensland.* Most of the tin concentrate produced was from the Herberton field, principally alluvial tin concentrate being produced. Tin concentrate was also produced in the Chillagoe, Kangaroo Hills and Cooktown districts.
- (iii) *Western Australia.* Nearly all the tin concentrate produced was alluvial tin won from the Pilbara field.
- (iv) *Tasmania.* Most of the tin concentrate produced was won in the north-east part of the State, from both lode and alluvial deposits. Wolfram concentrate, as well as tin concentrate, was produced.
- (v) *Northern Territory.* Almost the whole output of tin came from a single mine at Moun! Masson.

4. **Smelter and Refinery Production.**—Except for occasional small parcels of concentrate shipped to overseas smelters, all local production is treated by the two tin smelters located in Sydney.

The production of refined tin in Australia from locally produced tin concentrate during recent years, as recorded by the Bureau of Mineral Resources, was as follows:—1958, 2,121 tons; 1959, 2,226 tons; 1960, 2,254 tons; 1961, 2,546 tons; and 1962, 2,704 tons.

Consumption of refined tin has increased substantially in recent years following the introduction of tin-plate production in Australia; hot-dip plating began in 1957 and the electrolytic plant at Port Kembla, New South Wales, commenced operations early in 1962.

5. **Prices.**—Details of the movement in average market prices of tin for the years 1958 to 1962 are given in terms of Australian currency and sterling in the following table.

#### AVERAGE PRICE OF TIN IN AUSTRALIA AND THE UNITED KINGDOM

(£ per ton)

Country	1958	1959	1960	1961	1962

6. **Production in Principal Countries.**—World production of tin reached its maximum in 1941, when 241,400 tons were recorded. Australia's contribution to the world's tin production is slightly above 1 per cent.

The mine production of tin for the principal producing countries and the estimated world totals in 1960 and 1961 were as follows.

## TIN: PRODUCTION IN PRINCIPAL COUNTRIES

## § 7. Iron

1. **Historical.**—Iron ore was first mined in New South Wales to supply raw material for the ironworks that were established near Mittagong in 1852. Iron ore for the ironworks established later at Lithgow was drawn from Carcoar, near Bathurst.

In South Australia, the iron ore deposits of the Middleback ranges, near Whyalla, were first mined by the Broken Hill Proprietary Co. Ltd. in 1900 to provide a flux for lead smelting operations at Port Pirie. When that company opened its Newcastle steelworks in 1915, it greatly expanded ore production from the Middleback Ranges and most of the Australian steel industry's requirements of iron ore still come from this source.

Regular shipments of iron ore from Yampi Sound, north of Derby in Western Australia, to the steelworks at Port Kembla commenced in 1951. Iron ore for the iron smelter at Wundowie, which commenced operations in 1948, has in recent years been provided entirely from the deposits at Koolyanobbing, near Southern Cross. The Koolyanobbing deposits will be worked on a very much larger scale eventually and will supply the ore for an iron and steel industry to be established at Kwinana, south of Perth. A blast furnace is expected to be in operation in 1968.

In December, 1960, the Commonwealth Government announced a partial relaxation of the embargo on the export of iron ore which had been in force since 1938. Permission has been granted for the export of iron ore from Talling Peak-Koolanooka and of pelletized ore from the Scott River area, both in Western Australia, and from small deposits in New South Wales and Queensland.

The modification of the export embargo has greatly increased exploration for iron ore. Of particular importance was the discovery of extensive deposits in the Pilbara district, in the north-west of Western Australia. An extensive testing programme is in hand to determine the size and grade of these deposits. Early in 1963, the Western Australian Government announced that reserves in that State were conservatively estimated at 8,000 million tons, the bulk of which was in the Pilbara region.

Recent work at Mount Goldsworthy, Western Australia, and Savage River, Tasmania, has indicated that reserves are substantially greater than originally estimated. Further testing was made of other ore deposits located at Roper River (Northern Territory) and at Constance Range (Queensland).

Besides the large quantities of iron ore that are mined for metal extraction purposes, smaller quantities of iron oxide are mined for other purposes, such as gas purification, cement manufacture, coal washing and fluxing.

**2. Methods of Mining and Treatment.**—Currently all iron ore and iron oxide is won by opencut mining. The ore is selectively mined, crushed and screened to provide a standard assay and size for blast furnace use. Some concentration of lower grade ore from the Iron Knob area in South Australia is now carried out. Early in 1963, a scree treatment plant began operating at Iron Knob. Concentrates produced had an iron content of over 60 per cent. and recovery was of the order of 85 per cent. Sintering is now carried out at both Newcastle and Port Kembla to provide an improved blast furnace feed.

**3. Mine Production of Iron Ore.**—Iron oxide deposits exist in all States and in the Northern Territory, but at present iron oxide for metal extraction purposes, termed iron ore in this chapter, is produced in two States only. The following table shows the estimated iron content of iron ore produced during the years 1957 to 1961.

#### IRON: ESTIMATED IRON CONTENT OF IRON ORE PRODUCED

(Tons)

State	1957	1958	1959	1960	1961
South Australia .. ..	2,199,981	2,173,922	2,218,846	2,227,551	2,581,313
Western Australia .. ..	262,519	365,275	480,769	586,404	852,663
<b>Australia .. ..</b>	<b>2,462,500</b>	<b>2,539,197</b>	<b>2,699,615</b>	<b>2,813,955</b>	<b>3,433,976</b>

The producing centres during 1961, were as follows.

- (i) *South Australia.* 3,982,493 tons of iron ore were drawn from the Iron Monarch and Iron Baron deposits in the Middleback Ranges. Selected foundry grade ore was diverted as required to the Whyalla blast furnace, but the greater part was shipped to Newcastle and Port Kembla for smelting. Production of beneficiated iron ore commenced at Iron Knob in the latter part of 1962.
- (ii) *Western Australia.* Ore shipped from Yampi Sound, north of Derby, to New South Wales for sintering and smelting amounted to 1,284,768 tons. A quantity of 74,780 tons was mined at Koolyanobbing, near Southern Cross, for pig iron production at Wundowie.

**4. Mine Production of Iron Oxide.**—Production of iron oxide, excluding that used for metal extraction (iron ore) and mineral pigments, in the several States during 1961, according to end use, is shown in the following table.

#### IRON OXIDE PRODUCTION, 1961

(Tons)

Use	New South Wales	Victoria	Queensland	South Australia	Tasmania	Australia
For gas purification ..	565	690	..	..	191	1,446
For cement manufacture ..	17,922	..	1,746	..	2,118	21,786
For coal washing ..	1,260	..	..	..	..	1,260
For fluxing .. ..	..	..	..	8,850	..	8,850
<b>Total .. ..</b>	<b>19,747</b>	<b>690</b>	<b>1,746</b>	<b>8,850</b>	<b>2,309</b>	<b>33,342</b>

The principal sources of iron oxide production during 1961 were as follows.

- (i) *New South Wales.* Quantities of iron oxide for gas purification were obtained from deposits near Port Macquarie, while that used for cement manufacture was mined from the Lithgow, Mudgee and Rylstone mining divisions. Magnetite, used in coal washing, was produced in the Copmanhurst mining division and also from beach sand deposits near Murwillumbah.
- (ii) *Victoria.* Limonite ore used for gas purification was mined at Buchan.
- (iii) *Queensland.* Iron oxide produced for cement manufacture was mined near Townsville.
- (iv) *South Australia.* A quantity of 8,850 tons drawn from the Middleback Ranges was dispatched to Port Pirie for use as a flux in lead smelting operations.
- (v) *Tasmania.* Iron oxide for gas purification and cement manufacture was mined in the vicinity of Penguin.

Particulars of Australian production of iron oxide according to end use are shown in the following table.

#### IRON OXIDE PRODUCTION: AUSTRALIA

(Tons)

Use	1957	1958	1959	1960	1961
For gas purification ..	5,338	2,864	4,355	2,970	1,446
For cement manufacture ..	9,759	6,093	9,485	15,776	21,786
For coal washing ..	4	25	30	386	1,260
For fluxing ..	4,650	8,100	9,600	9,600	8,850
<b>Total ..</b>	<b>19,751</b>	<b>17,082</b>	<b>23,470</b>	<b>28,732</b>	<b>33,342</b>

5. **Iron and Steel Production.**—The production of pig-iron and steel ingots in Australia, of which New South Wales is the main producing State, is shown in the following table.

#### PIG-IRON AND INGOT STEEL: PRODUCTION, AUSTRALIA

(Tons)

Year ended 31st May	Pig-iron (a)	Steel ingots (b)	Year ended 31st May	Pig-iron (a)	Steel ingots (b)
1953 ..	1,691,693	1,801,028	1958 ..	2,283,925	3,037,705
1954 ..	1,826,711	2,116,813	1959 ..	2,293,709	3,203,584
1955 ..	1,868,841	2,208,708	1960 ..	2,655,237	3,519,719
1956 ..	1,910,521	2,320,289	1961 ..	3,001,800	3,748,037
1957 ..	2,098,352	2,773,995	1962 ..	3,380,334	4,075,699

(a) Includes pig-iron for castings; excludes ferro-alloys.

(b) Includes recovery from scrap.

In 1962, ten blast furnaces were operating in Australia; four at Port Kembla and three at Newcastle, in New South Wales, two at Wundowie in Western Australia, and one at Whyalla, South Australia. Production of pig-iron throughout 1962 was at a record level and during October, 1962, the No. 4 blast furnace at Port Kembla produced 92,680 short tons of pig-iron, claimed to be a new world production record for a single unit. A fourth blast furnace with a daily capacity of 1,400 tons of pig-iron was commissioned at Newcastle in July, 1963.

During 1962, the bulk of Australia's ingot steel production was obtained from 27 open hearth furnaces (13 at Port Kembla and 14 at Newcastle). In addition, 3 other open hearth furnaces and 14 electric furnaces were in operation during 1962 for the production of special steels and ferro-alloys. In March, 1962, the fifth and largest furnace of the No. 2 open hearth shop at Port Kembla was commissioned. By the end of 1962, all furnaces in this shop were using oxygen lancing equipment, thereby increasing capacity at Port Kembla from 2.9 million tons to 3.25 million tons of ingot steel per annum. In December, 1962, the first basic oxygen steelmaking furnace was commissioned at Newcastle, and a second unit was commissioned in January, 1963. Although these two units will eventually replace ten of the open-hearth furnaces, the net capacity of the Newcastle steelworks will be increased from 1.3 million tons to 1.6 million tons per annum.

6. **Production of Iron and Steel in Principal Countries.**—Particulars of the production in the principal countries and the estimated world total production during the calendar years 1960 and 1961 are shown in the following table.

## § 8. Mineral Sands

1. **Historical.**—Since the war, the growing world demand for rutile as a coating for electric welding rods and as a source of titanium metal, and for ilmenite in the production of titanium pigments, has brought about a rapid expansion of Australian mineral sands mining. Australia is the largest producer of rutile and zircon in the world, and nearly all this production comes from the mineral sands deposits on the east coast. The ilmenite produced on the east coast has proved unsuitable for titanium oxide pigment manufacture, and most of the production is discarded. However, ilmenite produced from mineral sands mined in Western Australia since 1956 has a much lower chromic oxide content than east coast ilmenite and is therefore suitable for pigment production. Operators produce separate concentrates of rutile, zircon and ilmenite and, in addition, a few companies produce high-grade monazite concentrate.

Following the record post-war output of rutile in 1957, production was on a reduced scale during the period 1958–60, mainly because of greatly reduced prices offering on world markets. However, during the second half of 1961 and throughout 1962, the price of rutile improved and production increased. Strengthening of the rutile market was due in part to the rationalization of the Australian industry and also to increased demand for rutile.

2. **Methods of Mining and Treatment.**—Mining on the east coast of Australia is mainly by suction dredging. In Western Australia, ilmenite is mined hydraulically or by earth-moving equipment. Heavy mineral concentrates are recovered by wet gravity concentration, using a combination of concentrating spirals and shaking tables. The constituent minerals of the heavy-mineral concentrates, mainly rutile, zircon, ilmenite and monazite are separated by electromagnetic and electrostatic methods.

3. **Mine Production.**—(i) *Titanium Dioxide.* The following table shows the quantities of titanium dioxide contained in rutile and ilmenite concentrates produced during the years 1957 to 1961.

## TITANIUM DIOXIDE: CONTENT OF CONCENTRATES PRODUCED

(Tons)

State	1957	1958	1959	1960	1961

<b>Australia .. ..</b>	<b>87,703</b>	<b>58,745</b>	<b>112,352</b>	<b>101,494</b>	<b>134,483</b>

(a) Estimated.

(iii) *Other Products.* During 1961, small quantities of monazite concentrate, magnetite and garnet concentrate were also recovered from mineral sands.

(iv) *Sources of Production.* The principal sources of mineral sands treated during 1961 were as follows.

(a) *New South Wales and Queensland.* The main deposits of mineral sands occur along the eastern Australian coast from Wyong in New South Wales to Curtis Island, Queensland. At present, the principal mining operations are located between Lake Munmorah and Newcastle in the south, between Laurieton and Crescent Head on the central coast, and between Byron Bay and North Stradbroke Island in the north. Most mining operations are now confined to dunes and swampy areas lying behind beaches where high-grade deposits are now exhausted.

(b) *Western Australia.* The chief deposits of mineral sands occur in the south-west corner of the State, between Bunbury and Wonnerup. During 1961, the bulk of production was from inland deposits in the Capel-Yoganup area.

## § 9. Aluminium

1. *Mine Production.*—The source of aluminium is bauxite. Until recent years, the only bauxite production in Australia was from small deposits in Queensland, New South Wales and Victoria. Production from these deposits has been used mainly by the chemical and steel industries.

Large deposits of bauxite exist at Weipa (North Queensland), Gove (Northern Territory) and Darling Range (Western Australia). The deposits at Weipa and the Darling Range are now being developed, and trial shipments from both deposits have been sent to Japan for smelting. There have also been some shipments from Weipa to the Bell Bay alumina plant. The Weipa deposit is being developed for the production of alumina (plant capacity 360,000 tons annually) at that centre and also for the export of bauxite. This plant will supply the requirements of an aluminium smelter (plant capacity 120,000 tons annually) to be installed at Invercargill (New Zealand) and at least part of the requirement of the Bell Bay smelter in Tasmania. At Kwinana (Western Australia), an alumina plant (capacity 200,000 tons annually) is being constructed to use Darling Range bauxite. The alumina will be shipped to Geelong (Victoria) for the production of metal. In addition, some alumina is likely to be exported from Kwinana. Deposits at Gove are to be developed in the first instance for the export of bauxite to Japan. It is envisaged that 10 million tons will be shipped over a period of eighteen years. Investigations are to be made into the possibility of establishing an alumina plant at Gove. The alumina content of bauxite produced in Australia during the years 1957 to 1961 is shown in the following table.

**ALUMINA: CONTENT OF BAUXITE PRODUCED**  
(Tons)

State	1957	1958	1959	1960	1961
New South Wales .. ..	1,354	633	1,648	1,386	929

Queensland(b) .. ..	494	596	..	14,442	(a)
Western Australia(b) .. ..	..	..	3,275	13,259	..
<b>Australia .. ..</b>	<b>3,758</b>	<b>3,533</b>	<b>6,914</b>	<b>(c) 31,393</b>	<b>(c) 7,464</b>

(a) Not available for publication.

(b) Estimated.

(c) Partly estimated.

2. **Refinery Production.**—There is a refinery for the production of alumina and refined aluminium at Bell Bay on the River Tamar in Northern Tasmania. The location of this refinery was determined by the availability of large supplies of hydro-electric power. Production of alumina commenced in February, 1955, and of refined aluminium in September, 1955. The capacity of the Bell Bay plant was increased to 35,000 tons in 1962 and will be further increased to 52,000 tons in 1963. A new smelter with an ultimate capacity of 40,000 tons is under construction at Geelong (Victoria). The plant is expected to come into production in 1963. The following table shows the production of alumina and refined aluminium in Australia during the years 1957 to 1961. Details of production in 1962 are not available for publication.

**ALUMINA AND REFINED ALUMINIUM: PRODUCTION, AUSTRALIA**  
(Source: Bureau of Mineral Resources)  
(Tons)

Alumina .. ..	20,116	22,490	26,900	29,801	29,468
Refined aluminium .. ..	10,624	10,869	11,370	11,655	13,204

### § 10. Uranium

Uranium concentrate has been produced in Australia since 1954, but particulars of the quantity of  $U_3O_8$  concentrate produced and its value are not available for publication. All  $U_3O_8$  concentrate is exported overseas. During 1962, the principal producing centres were as follows.

- (i) *Queensland.* Uranium ore was mined by opencut methods at Mary Kathleen, 33 miles east of Mount Isa.
- (ii) *South Australia.* The Radium Hill mine closed down in December, 1961, and the Port Pirie plant ceased production of uranium oxide late in February, 1962.
- (iii) *Northern Territory.* At Rum Jungle, uranium-copper and copper ores were treated to produce  $U_3O_8$  concentrate, copper concentrate and copper precipitate. Production of concentrates was from ore stockpiled when mining operations at Rum Jungle ceased late in 1958. Shipments of uranium oxide from the Rum Jungle plant to the Combined Development Agency were expected to be completed early in 1963. After this, ore from the Rum Jungle Creek South deposit will be treated at the Rum Jungle plant.

In the South Alligator River area, the El Sherana mine was operated to supply ore to a concentrating plant at Moline.

The contract for the supply of uranium oxide to the United Kingdom Atomic Energy Authority from Mary Kathleen was expected to be completed by the end of 1963. Domestic production from then on will be confined to Rum Jungle and Moline. Existing contracts with the U.K. Atomic Energy Authority are expected to keep the Moline plant operating until 1965. Operations at Rum Jungle will be maintained at current levels and the uranium oxide produced will be available for sale overseas.

## § 11. Other Metallic Minerals

1. **Tungsten.**—In recent years, Tasmania has been the principal State producing tungsten ores, scheelite being mined on King Island in Bass Strait and wolfram being mined in association with tin ores in the north-east part of the State. Because of low world prices, scheelite production on King Island ceased in August, 1958, but production was recommenced in 1960. Low prices have persisted and production during 1962 was on a limited scale.

Particulars of the production of tungstic oxide contained in scheelite and wolfram concentrates produced during the years 1957 to 1961 are shown in the following table.

**TUNGSTIC OXIDE (WO<sub>3</sub>): CONTENT OF CONCENTRATES PRODUCED**  
(Tons)

State	1957	1958	1959	1960	1961
<b>CONTAINED IN SCHEELITE CONCENTRATE</b>					
New South Wales .. ..	1	1	(a)	(a)	(a)

Northern Territory .. ..	49	7	8	16	16
<i>Australia</i> .. ..	459	372	653	820	827

(a) Less than half a ton.

2. **Manganese.**—In recent years, Western Australia has been the principal State producing manganese ore, mined mainly from the Pilbara goldfield.

The following table shows the manganese content of metallurgical grade and the manganese dioxide content of battery and other grades of manganese ore produced during the years 1957 to 1961.

**MANGANESE: CONTENT OF MANGANESE ORE PRODUCED**  
(Tons)

Year	Metallurgical grade In terms of manganese (Mn) content				Battery and other grades In terms of manganese dioxide (MnO <sub>2</sub> ) content				
	N.S.W.	Q'land (a)	W. Aust.	Aust.	N.S.W.	S. Aust.	W. Aust.	N. Terr.	Aust.
1957 ..	391	557	33,956	34,904	385	..	186	668	1,239
1958 ..	516	3,181	21,926	25,623	511	..	195	2,113	2,819
1959 ..	620	4,350	35,996	40,966	907	..	162	1,406	2,475
1960 ..	342	1,670	26,561	28,585	623	45	9	940	1,617
1961 ..	..	1,109	39,880	40,989	632	(a) 192	204	76	1,104

(a) Estimated.

(b) Includes Victoria (12 tons).

The quantity of manganese dioxide recovered at the Risdon, Tasmania, refinery during 1961 amounted to 3,073 tons, of which 372 tons were sold for chemical processing and trace element fertilizer.

3. **Other.**—Production in 1961 (1960 shown in parentheses) of other metallic minerals are listed in the following paragraphs.

(i) *Antimony.* The antimony content of antimony-bearing minerals produced was 680 tons (786 tons). Of this amount, 563 tons (632 tons) were in lead concentrate and 117 tons (154 tons) in 190 tons (256 tons) of antimony ore and concentrate.

(ii) *Beryllium.* Production of beryllium ore was 306 tons (190 tons), which came mainly from Western Australia where the Pilbara and Gascoyne goldfields were the main producing areas. The beryllium oxide content of the ore was 3,585 units of 22.4 lb. (2,221 units).

(iii) *Chromite.* No chromite was produced in 1961. In the previous year, 529 tons were produced with an estimated chromic oxide content of 265 tons.

(iv) *Tantalite-columbite.* The production of tantalite-columbite concentrate was 31,808 lb. (23,677 lb.) and the whole of this output came from Western Australia. The tantalum pentoxide and columbium pentoxide content of the concentrates was 13,814 lb. (11,500 lb.).

(v) *Other.* Three ounces of platinum concentrate containing 2 oz. of platinum were obtained in New South Wales as a by-product of gold refining.

## § 12. Coal

1. **Historical.**—A brief history of coal-mining in Australia may be found in previous issues of the Year Book (*see* No. 48, p. 1086).

2. **Joint Coal Board.**—For details of the powers and functions of this Board, which has functioned since 1947, *see* page 887 of Official Year Book No. 39.

3. **Australia's Coal Reserves.**—The latest available estimates of the measured and indicated coal reserves of Australia are those prepared by the Mines Departments in the various States for the Coal Utilization Research Advisory Committee whose report was issued by the Department of National Development in 1962. This information is shown in the following table. It should be noted that reserves can only be included in the "measured and indicated" categories when sufficient exploratory and testing work has been completed.

### ESTIMATED COAL RESERVES OF AUSTRALIA

(Source: State Mines Departments)

(Million Tons)

State	Type of coal	Measured and indicated	Inferred
New South Wales .. ..	Bituminous.. ..	(a) 3,050	(b)
Victoria .. ..	" .. ..	20	10
" .. ..	Brown .. ..	54,700	43,000
Queensland .. ..	Bituminous, sub-bituminous ..	950	(c)
South Australia .. ..	Sub-bituminous .. ..	130	..
" .. ..	Lignite .. ..	530	..
Western Australia .. ..	Sub-bituminous .. ..	274	1,603
Tasmania .. ..	Bituminous.. ..	(d)	(e) 137

(a) Recoverable reserves. (b) In excess of 30,000 million tons. (c) In excess of 10,000 million tons. (d) Very small; measured reserves in Tasmania amount to only several thousand tons. (e) Includes both indicated and inferred reserves.

4. Mine Production of Black Coal.—Production of black coal according to rank in the several States during the years 1957 to 1961 is set out in the following table. The tonnages produced by underground mining and opencut mining are also shown.

**BLACK COAL: PRODUCTION**  
(Tons)

Particulars	1958	1959	1960	1961	1962
<b>NEW SOUTH WALES</b>

(a) Bituminous coal from underground mines.

(b) Sub-bituminous coal from an opencut mine.

(c) Sub-bituminous coal.

The principal producing centres during 1961 were as follows.

- (i) *New South Wales.* The principal deposits worked were in the vicinity of Newcastle, Cessnock and Singleton (northern field), Lithgow (western field), and Wollongong (southern field). Tonnages mined in 1961 were: northern field, 10,378,000 tons; southern field, 7,057,000 tons; and western field, 1,586,000 tons. All opencut coal was from the northern field.

The coal fields of New South Wales, predominantly bituminous, are the most important in Australia, in respect of the magnitude, quality and accessibility of reserves and the extent to which the deposits are being worked. Coal from the various seams differs in properties, coal from the Greta seam worked in the vicinity of Cessnock being particularly suitable for gas-making, while coal from the Victoria tunnel, Dudley, Young Wallsend and Borehole seams, all of which are mined near Newcastle, have coking properties and are used in the steelworks. Coking coal is also obtained from the Bulli seam which is mined near Wollongong and in the Burragorang Valley. A multi-purpose coal is available in the Singleton area, and steaming coals are mined around Newcastle, Lithgow, Cessnock and Wollongong.

- (ii) *Victoria.* Production of black coal was restricted to the Gippsland district. The State Coal Mine at Wonthaggi was the main producer, and the remaining production came from small privately-owned mines.
- (iii) *Queensland.* The principal producing centres were Ipswich, 1,666,243 tons; Mount Morgan, 325,111 tons; Bowen, 297,642 tons; and Clermont, 155,859 tons. Opencut methods were used on the Bowen, Clermont and Mount Morgan fields, and the total coal won by this means was 22 per cent. of total production.

- (iv) *South Australia.* Coal was mined only at Leigh Creek, 377 miles north of Adelaide.
- (v) *Western Australia.* The only coal deposits which have been developed on a commercial scale are at Collie in the south-west of the State, and all production during 1961 was from this source.
- (vi) *Tasmania.* Most of the coal produced was won in the north-east of the State, the principal producing centres in 1961 being Fingal, 111,272 tons; St. Mary's, 91,046 tons; and Avoca, 44,182 tons.

5. **Production of Black Coal Per Man-shift.**—(i) *Underground Mines.* The following table shows particulars of estimated black coal output per man-shift worked, (a) at the coal face, and (b) by all employees, in respect of underground mines for each State concerned and for Australia for the years 1957 to 1961. These estimates have been calculated by the Joint Coal Board from data collected fortnightly in respect of coal production and the number of man-shifts actually worked. In South Australia, black coal is won only by opencut mining.

**PRODUCTION OF BLACK COAL PER MAN-SHIFT: UNDERGROUND MINES**  
(Tons)

Year	N.S.W.	Vic.	Q'land	W. Aust.	Tas.	Australia
------	--------	------	--------	----------	------	-----------

**PRODUCTION PER MAN-SHIFT WORKED AT COAL FACE**

1957	..	..	13.19	2.01	7.13	5.88	7.60	11.02
1958	..	..	14.48	2.04	7.28	6.67	8.01	11.96
1959	..	..	18.07	2.10	7.53	7.60	7.34	14.13
1960	..	..	20.64	2.16	8.37	8.12	7.64	16.08
1961	..	..	24.61	2.15	8.69	8.09	8.77	19.04

**PRODUCTION PER MAN-SHIFT WORKED BY ALL EMPLOYEES**

1957	..	..	3.99	0.85	2.82	2.77	3.76	3.65
1958	..	..	4.35	0.89	2.90	3.02	3.91	3.95
1959	..	..	4.90	0.93	2.95	3.35	3.72	4.37
1960	..	..	5.39	0.94	3.19	3.62	3.87	4.81
1961	..	..	6.23	0.83	3.46	4.00	4.09	5.55

(ii) *Opencut Mines.* In the next table, the Joint Coal Board's estimates of production of black coal per man-shift worked by all employees in opencut mines are shown. There are no opencuts producing black coal in Victoria.

**PRODUCTION OF BLACK COAL PER MAN-SHIFT: OPENCUT MINES**  
(Tons)

Year			N.S.W.	Q'land	S. Aust.	W. Aust.	Tas.	Australia
1957	..	..	11.11	12.17	9.89	6.04	7.68	10.25
1958	..	..	11.31	13.63	11.46	6.78	10.42	11.47
1959	..	..	12.47	12.50	10.36	7.64	10.47	11.08
1960	..	..	22.15	10.96	12.46	8.01	9.38	13.79
1961	..	..	22.29	11.43	14.91	9.63	10.79	14.60

6. **Mine Production of Brown Coal.**—Brown coal is mined only in Victoria, and production in recent years has been as follows:—1958, 11,643,629 tons; 1959, 13,034,605 tons; 1960, 14,967,202 tons; 1961, 16,279,168 tons; and 1962, 17,137,436 tons. In the past ten years, the output of brown coal has nearly doubled.

7. **Value at the Mine in New South Wales.**—Particulars of the average values at the mine (or at screens or mine washeries where these are at a distance from the mine) of salable coal for each district and for New South Wales as a whole are shown in the following table for the years 1957 to 1961. Salable coal excludes miners' coal, coal consumed at the mines, and refuse, etc., removed by the use of hand-picking belts or at mine washeries. In calculating these values, most coal won by producer consumers is also excluded, and in respect of stocks of coal held at grass by the Commonwealth Government, only actual sales have been taken into account. No deduction has been made in respect of excise duty operative from 1st November, 1949.

**AVERAGE SELLING VALUE AT THE MINE PER TON OF SALABLE COAL:  
NEW SOUTH WALES**

(s. d.)

Year	Northern District	Southern District	Western District	Average for State
1957.. ..	58 3	55 7	50 7	56 9
1958.. ..	56 1	55 0	47 5	54 10
1959.. ..	52 5	54 4	47 6	52 7
1960.. ..	51 11	55 1	48 1	52 8
1961.. ..	51 5	55 11	46 9	52 3

8. **Values in New South Wales, United Kingdom and the United States of America.**—The following table shows for the years 1957 to 1961 average values of coal produced in New South Wales, Great Britain and the United States of America. The figures give an indication of changes in average value or price within each country, but they do not necessarily show the relative levels as between the countries concerned.

**PRODUCTION VALUES OF COAL PER TON: NEW SOUTH WALES, UNITED KINGDOM AND UNITED STATES OF AMERICA**

Country	1957	1958	1959	1960	1961
	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>
New South Wales—bituminous(a) ..	56 9	54 10	52 7	52 8	52 3
United Kingdom—deep-mined(b) ..	82 1	85 7	83 5½	86 1½	90 10½
United States of America— bituminous and lignite(c) ..	\$ 5.08	\$ 4.86	\$ 4.77	\$ 4.69	\$ 4.58

(a) Average selling value at the mine per ton of 2,240 lb.; the figures relate to salable coal and include excise duty. (b) Average value in sterling at the mine per ton of 2,240 lb. (c) Average value in United States currency at the mine per ton of 2,000 lb.

9. **Consumption of Coal in Australia.**—(i) *Black Coal.* Details of the production of black coal in Australia and its disposal are shown in the following table for the years 1957–58 to 1961–62.

**BLACK COAL: PRODUCTION AND CONSUMPTION**  
(<sup>'000</sup> Tons)

Particulars	1957-58	1958-59	1959-60	1960-61	1961-62
Production(a) .. ..	20,362	20,459	21,223	22,947	24,432

Balance—unrecorded consumption, other purposes(e) ..	1,041	1,049	466	852	512
<b>Grand Total .. ..</b>	<b>20,371</b>	<b>20,467</b>	<b>21,231</b>	<b>22,954</b>	<b>24,437</b>

(a) Includes miners' and colliery coal. (b) Government railways only. (c) Figures refer only to New South Wales consumption by oversea, interstate and intrastate vessels. (d) Prior to 1959-60, figures refer only to New South Wales. Later figures include Tasmania. (e) Includes net change in stocks.

After the 1939-45 War, it was found necessary to augment local supplies of black coal in Australia by increasing imports. The quantity imported reached a post-war peak of 597,866 tons in 1950-51, but has since declined as production has expanded considerably. Since 1952-53, exports have exceeded imports by a wide margin; in 1961-62, exports of black coal were 3,469,552 tons and imports were 4,792 tons. These imports were of black coal only for special purposes.

(ii) *Brown Coal.* The table following shows the production and consumption of brown coal and the production of briquettes in Victoria for the years 1957-58 to 1961-62.

**BROWN COAL: PRODUCTION AND CONSUMPTION, VICTORIA**  
(<sup>'000</sup> Tons)

Particulars	1957-58	1958-59	1959-60	1960-61	1961-62
Production .. ..	10,866	12,243	14,101	15,723	16,729
Consumption as fuel—					
Electricity generation ..	7,830	9,289	10,498	9,970	10,981
Briquette factory .. ..					
Other factories .. ..					
<b>Total .. ..</b>	<b>1,297</b>	<b>1,293</b>	<b>1,248</b>	<b>951</b>	<b>860</b>
Consumption as raw material—					
Briquette manufacture ..	1,619	1,639	2,396	4,764	5,457
Balance(a) .. ..	+ 120	+ 22	- 41	+ 38	- 569
<b>Briquettes manufactured ..</b>	<b>626</b>	<b>643</b>	<b>975</b>	<b>1,807</b>	<b>1,820</b>

(a) The sign (+) indicates that the balance shown is available for other consumption and accumulation of stocks; the sign (-) indicates a reduction in stocks.

The State Electricity Commission of Victoria produces brown coal briquettes at Yallourn and Morwell, both situated on the brown coal deposits in Gippsland. The former commenced commercial production of briquettes in 1925, and initial output of the Morwell plant was in 1960. Output of briquettes (Yallourn and Morwell combined) was 1,806,619 tons in 1960-61, and 1,819,954 tons in 1961-62.

In December, 1956, the Lurgi high pressure brown coal gasification plant at Morwell was opened by the Gas and Fuel Corporation of Victoria. This plant operates on briquettes supplied by belt conveyor from the State Electricity Commission's Morwell works, and produces town gas which is sent to Melbourne through 103 miles of pipeline.

10. **Exports.**—The quantities and values of the overseas exports of Australian coal and of bunker coal for overseas vessels for the five years 1957-58 to 1961-62 are shown in the following table. These shipments were made mainly from New South Wales.

**COAL: OVERSEA EXPORTS AND BUNKER, AUSTRALIA**

Year	Oversea exports(a)		Bunker coal for overseas vessels	
	Quantity	Value	Quantity	Value
	Tons	£	Tons	£
1957-58 .. ..	836,336	3,390,628	11,608	50,656
1958-59 .. ..	645,249	2,676,042	8,187	37,808
1959-60 .. ..	1,087,844	4,326,810	8,117	25,380
1960-61 .. ..	1,888,415	7,682,223	179	1,716
1961-62 .. ..	3,469,552	13,611,122	37	410

(a) Excludes bunker coal.

New South Wales, in addition to meeting requirements within the State, supplies considerable quantities of coal to other States and for export overseas. Of the total of 19,083,000 tons produced in 1961-62, 1,315,000 tons (6.9 per cent.) were exported interstate and 3,180,000 tons (16.7 per cent.) were exported overseas. The demand for bunker coal continues to decline, and in 1961-62 a total of 101,000 tons (0.5 per cent.) of New South Wales production was supplied for interstate, intrastate and overseas vessels.

11. **Production in Principal Countries.**—The following table shows the production of coal in the principal countries and estimated world totals in 1960 and 1961.

**COAL: PRODUCTION IN PRINCIPAL COUNTRIES**

(a) Includes lignite.  
Department Report, 1961.

(b) Included with black coal.

(c) Source: New Zealand Mines

12. **Coke and Other By-products from Coal.**—(i) *Coke.* The production of metallurgical coke in Australia during 1961–62 was 2,716,894 tons, compared with the record production of 2,738,505 tons during 1960–61.

In addition to metallurgical coke referred to above (which is produced by specialized coke works), considerable quantities of coke are produced in gas works as a by-product of the manufacture of gas. Production in gas works in 1961–62 was 761,355 tons. To date, there has been no production of petroleum coke at Australian oil refineries.

In order to avoid duplication with coal values, the figures for coke have not been included in the general tables of mineral production in the early part of this chapter.

In the following table, particulars of the production of coke in coke works and gas works in Australia are shown for the years 1957–58 to 1961–62. The figures exclude output of coke breeze, which amounted to 376,123 tons in 1960–61 and 456,719 tons in 1961–62.

### COKE PRODUCTION: AUSTRALIA

(Tons)

Industry			1957–58	1958–59	1959–60	1960–61	1961–62
Coke works	..	..	2,295,737	2,210,621	2,376,097	2,738,505	2,716,894
Gas works	..	..	831,615	815,464	758,668	764,626	761,355
Total	..	..	3,127,352	3,026,085	3,134,765	3,503,131	3,478,249

(ii) *Other By-products from Coal.* In addition to coke, other products are obtained from the treatment of coal by coke and gas works. Some of the main items produced, principally in coke and gas works, during 1961–62 (1960–61 in parentheses) were: crude tar, 56,883,264 gallons (57,132,117 gallons); refined tar, 24,070,783 gallons (29,672,825 gallons); and ammonium sulphate, 105,754 tons (98,988 tons).

## § 13. Oil Exploration in Australia

1. **Introduction.**—A comprehensive survey of developments in the search for oil was presented on pages 1094–8 of Year Book No. 48. A summary of later developments is given below.

2. **Developments in 1962.**—The effort in the search for oil increased considerably during 1962, following the success obtained at the Moonie field in southern Queensland. The greatest concentration of effort in 1962 was in Queensland. The development of the Moonie field continued, and of the ten wells drilled to the end of 1962, nine were productive: in one well the sand was found to contain water. The field has proven to cover an area of at least eight square miles. In December, 1962, an encouraging show of oil was found in Sunnybank No. 1, which is about 90 miles northwest of Moonie. However, later testing of this well did not match early production rates. The same company also found gas at a depth of over 12,300 feet in Westgrove No. 3, about 100 miles north of Roma.

Although attention during 1962 has been focussed on Queensland, encouraging signs of oil and/or gas were also found near Grafton (Clifden No. 3) in New South Wales, and at North Seaspray No. 1 near Bairnsdale in south-east Victoria. Drilling in the Perth Basin of Western Australia has also yielded encouraging results.

During the year, a contract was let for the construction of a 10-inch pipe line from the Moonie field to Brisbane, a distance of nearly 200 miles. The cost of the line was estimated at about £5 million, and it is envisaged that the line will be in use by the end of 1963. The line will be a common carrier and oil from any other area can be fed into it.

During 1962, expenditure by private enterprise was of the order of £13.5 million, excluding Commonwealth subsidies totalling £2,965,400 paid under the *Petroleum Search Subsidy Acts*. In addition, £1,013,200 was spent by the Bureau of Mineral Resources on regional geological and geophysical surveys. The total expenditure to date by both government and private enterprise is of the order of £100 million. Further information regarding Government assistance in the search for oil is given in para. 3 (i) (d) on page 1142.

3. **Footage Drilled in the Search for Oil.**—The following table shows details of footage drilled in the search for oil in Australia, Papua and New Guinea during the years 1958 to 1962.

#### FOOTAGE DRILLED IN THE SEARCH FOR OIL

### § 14. Sulphur

1. **Mine Production.**—There is no production of elemental sulphur (brimstone) in Australia. However, while sulphur is itself non-metallic, considerable quantities are contained in certain metallic minerals produced. Large quantities of the lead and zinc concentrates produced are exported, and the sulphur they contain is not available for utilization in Australia.

The following table shows the sulphur content of the metallic minerals produced during 1961 from which sulphur was subsequently recovered.

#### SULPHUR: CONTENT OF METALLIC MINERALS PRODUCED, 1961

(Tons)

Mineral in which contained	N.S.W.	Q'land	S. Aust.	W. Aust.	Tas.	Australia
Lead concentrate..	42,667	..	..	(a) 84	2,531	45,282

(a) Estimated.

(b) Partly estimated.

The principal producing centres during 1961 were as follows.

(i) *New South Wales.* All the sulphur produced was contained in lead and zinc concentrates produced at Broken Hill and in lead, zinc and pyrite concentrates produced at Captain's Flat.

(ii) *Queensland.* Sulphur was contained in zinc concentrate milled at Mount Isa and in pyrite concentrate produced at Mount Morgan. Zinc concentrate produced at Mount Isa was exported.

(iii) *South Australia.* A pyrite concentrate containing sulphur was produced from ore mined at Nairne, 22 miles east of Adelaide.

(iv) *Western Australia.* Sulphur was recovered from pyrite concentrates produced at Norseman and at Kalgoorlie.

(v) *Tasmania.* A pyrite concentrate was recovered at Mount Lyell after the separation of the copper sulphide mineral. Recoverable sulphur was contained also in lead, lead-copper and zinc concentrates milled at Rosebery, but only that contained in zinc concentrate was recovered in Australia.

The following table shows for the years 1957 to 1961 the sulphur content of minerals from which sulphur was recovered.

#### SULPHUR: CONTENT OF METALLIC MINERALS PRODUCED

(Tons)

State	1957	1958	1959	1960	1961
New South Wales .. ..	207,604	197,736	188,892	204,358	194,659

(a) Partly estimated.

(b) Estimated.

2. *Production of Sulphuric Acid.*—The principal use of sulphur is in the manufacture of sulphuric acid, which is produced in all States and in the Northern Territory. Most of this is used for fertilizer manufacture, although small quantities are used in the rubber and chemical industries and in the preparation of uranium concentrates. Sulphur contained in lead concentrate is used for acid manufacture at Port Pirie and sulphur in zinc concentrate is used at Risdon. In June, 1961, acid production from lead-zinc sinter gases commenced at Cockle Creek, near Newcastle, New South Wales. Pyrite concentrate is used as a source of sulphur for acid manufacture at Cockle Creek and at Port Kembla in New South Wales, and at Melbourne, Brisbane, Adelaide, Perth and Fremantle. However, about half the sulphuric acid produced in Australia is made from imported elemental sulphur. The next table shows, for the years 1958 to 1962, the Australian production of sulphuric acid and the quantity of sulphur in the acid produced from various sources.

## SULPHUR USED IN SULPHURIC ACID PRODUCTION: AUSTRALIA

(Tons)

Item	1958	1959	1960	1961	1962
Production of sulphuric acid (mono) .. .. .	1,009,064	1,000,458	1,109,751	1,137,501	1,229,256
Sulphur in sulphuric acid (mono) produced from—					
Sulphur (elemental)(a) ..	162,881	153,195	179,752	182,554	202,659

<b>Total Sulphur Content</b>	<b>329,963</b>	<b>327,149</b>	<b>362,887</b>	<b>371,963</b>	<b>401,966</b>

(a) All imported.

## § 15. Non-metallic Minerals

1. **Asbestos.**—Production of asbestos has been confined mainly to crocidolite in Western Australia, principally at Wittenoom Gorge in the north-western part of the State. The only deposits of chrysotile, located mainly at Nunyerry in Western Australia and at Baryulgil in New South Wales, are relatively small and widely scattered.

The production of chrysotile and crocidolite in Australia during the five years 1957 to 1961 is shown in the following table.

## PRODUCTION OF ASBESTOS

(Short tons of 2,000 lb.)

Year	Chrysotile			Crocidolite
	New South Wales	Western Australia	Australia	Australia(a)
1957 .. .. .	676	1,556	2,232	12,438
1958 .. .. .	712	1,543	2,255	13,313
1959 .. .. .	726	707	1,433	16,442
1960 .. .. .	1,072	69	1,141	14,472
1961 .. .. .	794	175	969	15,777

(a) Produced in Western Australia.

2. **Clays.**—Statistics of clay production in Australia are not entirely satisfactory, mainly because of differences between States in the classification of the various types of clays. In addition, the statistics are incomplete, as some clays are outside the normal administrative control of some State Mines Departments. In the following table, the recorded production of the main types of clays produced in each State of Australia is shown for the year 1961.

### PRODUCTION OF CLAYS, 1961 (Tons)

Type	New South Wales	Victoria	Queensland	South Australia	Western Australia	Tasmania	Australia
Bentonite and bentonitic clay ..			307		587		894
Brick clay and shale ..	2,005,679	1,089,000	299,594	311,257	484,996	153,156	4,343,682
Cement clay and shale ..	158,527	(b)	(b)	11,651	17,864	(b)	(c) 188,042
Damouritic clay ..				508			508
Fireclay, n.e.i. ..	113,055	25,584	11,587	25,576	26,384		202,186
Fuller's earth ..	151				41		192
Kaolin ..	37,866	9,016	60	2,142	772	1,232	51,088
Stoneware clay ..	107,614		2,135	46,829			156,578
Tile clay ..	144,555	(b)	(b)	(b)	(b)	6,075	(c) 150,630
Other clays ..	5,169	(a) 142,083	(b)	(b)	(b)	14,553	(c) 161,805

(a) Estimated.

(b) Not available.

(c) Incomplete.

3. **Gypsum.**—There are very extensive deposits of gypsum in Australia, but only the more accessible and easily worked deposits have been exploited. These deposits lie in four main regions, (a) in New South Wales stretching from around Griffith to near Broken Hill, (b) in the north-west corner of Victoria, the south-west corner of New South Wales and adjoining parts of South Australia, (c) in South Australia on both sides of St. Vincent Gulf and extending to Lake MacDonnell in the west, and (d) between Perth and Kalgoorlie in Western Australia. The South Australian deposits are the most important, and more than half the total Australian production of gypsum in 1961 came from that State, where the main centres of production are Stenhouse Bay on Yorke Peninsula and Lake MacDonnell.

The building industry is the main user of the gypsum produced in Australia. The greatest part is used in the manufacture of plaster and most of the remainder in cement manufacture. A small amount is also used as fertilizer. A considerable quantity is exported, mainly to New Zealand for use in the plaster industry. Substantial quantities of gypsum are also exported to Malaya and the Philippines.

The production of gypsum in Australia is set out in the following table for the five years 1957 to 1961.

### PRODUCTION OF GYPSUM (Tons)

Year	New South Wales	Victoria	South Australia	Western Australia	Australia
1957 .. ..	101,491	68,647	274,945	33,353	478,436
1958 .. ..	90,664	72,010	306,749	35,515	504,938
1959 .. ..	101,143	81,101	296,816	37,731	516,791
1960 .. ..	95,514	100,386	340,762	44,216	580,878
1961 .. ..	97,250	80,223	387,289	45,145	609,907

4. **Limestone.**—Limestone is quarried in all States, being used mainly for the manufacture of cement. Other uses are in agriculture, in the steel industry as a metallurgical flux, and in the chemical industry.

The recorded statistics of limestone production in each State of Australia are shown in the following table. Details of limestone produced for use as building or road material are not included.

### PRODUCTION OF LIMESTONE(a) (\*000 Tons)

Year	N.S.W.	Vic.	Q'land	S.A.	W.A.	Tas.	Aust.
1957 .. ..	1,897	846	(b)	1,135	(b)	205	4,572
1958 .. ..	2,061	859	(b)	1,220	(b)	235	5,324
1959 .. ..	2,056	1,120	(b)	1,017	(b)	230	5,305
1960 .. ..	2,400	1,157	(b)	1,064	(b)	215	5,669
1961 .. ..	2,576	1,243	(b)	1,105	(b)	204	6,146

(a) Includes shell and coral.

(b) Not available for publication, included in total for Australia.

5. **Magnesite.**—The major sources of magnesite at present are deposits at Fifield, Thuddungra and Lake Cargelligo in central New South Wales, and at Ravensthorpe in Western Australia. Production at Ravensthorpe is expected to increase substantially in the near future. Most of the output of magnesite in Australia is used for refractory purposes, particularly in the steel industry, and small amounts are used in chemical, paper, glass, rubber, and ceramic industries. Particulars of the production of magnesite in each State for the years 1957 to 1961 are set out in the table below.

#### PRODUCTION OF MAGNESITE

(Tons)

Year				New South Wales	Queensland	South Australia	Western Australia	Australia
1957	..	..	..	83,271	..	202	..	83,473
1958	..	..	..	69,030	20	341	..	69,391
1959	..	..	..	59,777	..	790	19	60,586
1960	..	..	..	61,668	..	498	..	62,166
1961	..	..	..	88,511	..	659	9,625	98,795

6. **Mica.**—Production during 1961 was confined to the Northern Territory, where 185,920 tons of crude and film mica were produced during the year. Mining in the Northern Territory came to a standstill in 1962, and the Commonwealth Mica Pool has ceased operations.

The following table shows the quantity of muscovite mica produced in Australia during the five years 1957 to 1961.

#### MUSCOVITE MICA PRODUCTION

(lb.)

Particulars				1957	1958	1959	1960	1961
New South Wales—								
Scrap	..	..	..	..	15,680	7,000	..	..
Queensland—								
Scrap	..	..	..	..	21,728	..	..	..
Northern Territory—								
Trimmed	..	..	..	36,713	42,479	44,665	9,500	..
Crude and film	..	..	..	..	35,840	170,000	649,600	185,920
Scrap	..	..	..	40,600	..	..	..	..

7. **Salt.**—Salt is obtained in Australia by evaporation of saline lakes and clay pans. Production satisfies local requirements and provides a considerable surplus for export. Recorded production in South Australia (the chief producing State) is shown in the following table for the years 1957 to 1961. Estimates of total Australian production are also shown.

#### SALT PRODUCTION

('000 Tons)

Particulars				1957	1958	1959	1960	1961
South Australia				339	336	358	359	387
Estimated Australian total				428	430	468	463	509

8. **Other Non-metallic Minerals.**—(i) *General.* Many other non-metallic minerals are produced in Australia in considerable quantities, and are listed separately in the following paragraphs.

(ii) *Barite.* The principal centre producing first-grade barite is at Oraparinna in the North Flinders Range in South Australia. The production of barite in Australia during 1961 was 19,217 tons, of which 19,157 tons came from South Australia and 60 tons from New South Wales.

(iii) *Diatomite.* Production of diatomite is carried on mainly in the eastern States of Australia. In 1961, 5,417 tons were produced, of which New South Wales produced 4,331 tons, mainly at Coonabarabran and Barraba. The remaining 1,086 tons were produced in Queensland (579 tons) and Victoria (507 tons).

(iv) *Dolomite.* In 1961, South Australia continued to supply the bulk of the requirements of the iron and steel industry from quarries at Ardrossan. During the year, production in the various States was South Australia, 183,214 tons; New South Wales, 4,796 tons; Queensland, 2,132 tons; Tasmania, 1,108 tons; and Western Australia, 374 tons; making an Australian total of 191,624 tons.

(v) *Felspar.* The main demand for felspar comes from the glass and ceramic industries. Most of the Australian production of felspar comes from New South Wales, which produced 5,378 tons of the Australian total of 8,209 tons in 1961. Of the remainder, 1,641 tons came from South Australia and 1,190 tons from Western Australia.

(vi) *Gemstones.* (a) *Opals.* Most of the opals won in recent years came from the Coober Pedy and Andamooka fields in South Australia, which produced opals worth £765,000 in 1961. Other production in 1961 was from Lightning Ridge in New South Wales, valued at £65,000.

(b) *Sapphires.* In 1961, sapphires produced in the Inverell District of New South Wales were valued at £3,000 and production from the Anakie field in Central Queensland was valued at £5,000.

(vii) *Phosphate Rock.* During 1961, 4,874 tons of phosphate rock were produced, of which 4,759 tons came from South Australia and the remaining 115 tons from Western Australia. In the course of a search for deposits of uranium ore near Rum Jungle in 1961, the Bureau of Mineral Resources discovered phosphate rock deposits in the area. A programme was conducted in 1962 to make a preliminary assessment of the extent and grade of the new deposits.

(viii) *Silica.* The production of silica is not recorded in Victoria and production recorded in all other States may not be complete. The output of silica, which includes glass sand, quartz, quartzite, sand, sandstone, and silicious abrasives, but does not include production for use as building or road material, was 150,891 tons in New South Wales; 29,226 tons in Queensland; 22,769 tons in South Australia; 8,274 tons in Western Australia; and 1,415 tons in Tasmania; making a total of 212,575 tons recorded for those States during 1961.

(ix) *Sillimanite.* In 1961, 1,787 tons of sillimanite were produced in Australia, 1,533 tons of which came from South Australia and 254 tons from New South Wales.

(x) *Talc.* The Australian output of talc (including steatite) was 13,545 tons in 1961, South Australia produced 7,571 tons, Western Australia 5,149 tons, and New South Wales 825 tons.

(xi) *Other.* Other non-metallic minerals produced in Australia in small quantities during 1961 were fluorspar, garnet concentrate, foundry loam, lithium ores, mineral pigments, pebbles for grinding, perlite, pyrophyllite, rhodonite and serpentine.

## § 16. Value of Production

1. **Local Value of Mining and Quarrying Production, 1961.**—The following table shows particulars of the local value of production for individual mining industry groups and quarrying for the year 1961. It should be stressed that these statistics are on an industry basis and not by product. For particulars of the method of compiling these industry statistics, see para. 2 (i), pages 1144–5. A more detailed reference to the value of production of mining and quarrying and other industries together with a brief explanation of terms used will be found in Chapter XXIX. Miscellaneous.

(a) Value of output or selling value of products at the mine or quarry. (b) Not available for publication. (c) Incomplete. (d) Less than £500. (e) Includes Australian Capital Territory. (f) Not available for publication; included with Northern Territory.

2. Local Values, 1957 to 1961.—In the following table, the local value of mining and quarrying production is shown by States and Territories.

## MINING AND QUARRYING: LOCAL VALUE OF PRODUCTION(a)

(£'000)

Year	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.(b)	Aust.
1957 ..	83,170	12,728	25,576	11,872	20,979	8,421	2,365	165,111
1958 ..	71,414	13,694	27,632	12,308	20,777	7,358	2,772	155,955
1959 ..	71,090	14,935	33,329	13,209	21,787	7,639	2,996	164,985
1960 ..	79,641	16,267	37,608	13,952	22,166	8,067	3,539	181,240
1961 ..	78,171	c 21,254	32,220	15,912	22,496	7,959	3,366	181,378

(a) Value of output or selling value of products at the mine or quarry. (b) Includes Australian Capital Territory. (c) Not strictly comparable with previous years owing to extension of coverage of quarrying activities.

3. Net Value of Mining and Quarrying Production.—The following table shows particulars of net value of production for individual mining industry groups and construction material quarrying for the year 1961.

## MINING AND QUARRYING: NET VALUE OF PRODUCTION(a), 1961

(£'000)

Industry	N.S.W.	Vic.	Q'land	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Metal mining—

(a) Local value (i.e. value of output at mine) less cost of power, fuel, light and other materials and stores used; depreciation and maintenance costs have not been deducted. (b) Not available for publication. (c) No allowance has been made for costs of power, fuel, light and other materials and stores used, particulars of which are not available. (d) See footnote (c). (e) Cost of materials used, etc., exceeded value of output. (f) Incomplete. (g) Less than £500.

(h) Includes Australian Capital Territory. (i) Not available for publication; included with Northern Territory.

4. Net Value of Production, 1957 to 1961.—In the following table, the net value of mining and quarrying production and the value per head of population are shown by States and Territories.

## MINING AND QUARRYING: NET VALUE OF PRODUCTION(a)

Year	N.S.W.	Vic.	Q'land	S.A.	W.A.	Tas.	N.T. and A.C.T.	Aust.
NET VALUE OF PRODUCTION(a) (£'000)								
1957 ..	66,091	9,944	18,810	9,320	14,889	5,897	1,851	126,802
1958 ..	55,801	10,987	19,796	9,999	14,454	5,168	2,131	118,336
1959 ..	56,331	12,101	24,481	10,698	14,765	5,398	2,381	126,155
1960 ..	63,214	13,158	27,460	11,404	15,444	5,476	2,871	139,027
1961 ..	60,684	(b)17,286	23,434	13,103	15,553	5,203	2,789	138,052

NET VALUE OF PRODUCTION(a) PER HEAD OF POPULATION  
(£)

1957 ..	18.2	3.7	13.2	10.5	21.5	17.8	30.6	13.0
1958 ..	15.0	4.0	13.6	11.0	20.5	15.3	32.3	11.9
1959 ..	14.8	4.3	16.6	11.5	20.6	15.7	31.9	12.4
1960 ..	16.3	4.5	18.3	11.9	21.2	15.6	35.5	13.4
1961 ..	15.4	(b) 5.9	15.4	13.4	20.9	14.6	31.4	13.0

(a) Local value, or value of output, less cost of power, fuel, light and other materials and stores used; depreciation and maintenance costs have not been deducted. (b) Not strictly comparable with previous years owing to extension of coverage of quarrying activities.

5. Local Value of Minerals Produced, 1957 to 1961.—Particulars of the estimated values of minerals (mine and quarry products) produced are shown in the following table. The values represent the estimated selling value at the mine or quarry of minerals produced during the years concerned.

LOCAL VALUE OF MINERALS PRODUCED: AUSTRALIA  
(£'000)

Mineral	1957	1958	1959	1960	1961
METALLIC MINERALS					
Copper ore, concentrate, etc.(a) ..	12,345	14,770	21,165	25,439	21,249

FUEL MINERALS					
Coal, black ..	52,279	51,658	49,211	55,201	57,081
Coal, brown ..	5,228	5,418	6,123	6,845	7,722
<i>Total, Fuel Minerals</i> ..	<i>57,507</i>	<i>57,076</i>	<i>55,334</i>	<i>62,046</i>	<i>64,803</i>
NON-METALLIC (EXCLUDING FUEL) MINERALS					
<i>Total, Non-metallic (excluding Fuel) Minerals</i> ..	<i>(c) 9,002</i>	<i>(c) 10,192</i>	<i>(c) 10,533</i>	<i>10,843</i>	<i>11,494</i>

NOTE.—See next page for footnotes.

**LOCAL VALUE OF MINERALS PRODUCED: AUSTRALIA—continued.**  
(£'000)

Mineral	1957	1958	1959	1960	1961
<b>CONSTRUCTION MATERIALS(d)</b>					
Total, Construction Materials .. ..	17,840	18,497	21,597	24,541	(e) 28,998
<b>TOTAL</b>					
Total, All Minerals and Construction Materials(d) .. ..	165,111	155,955	164,985	181,240	181,378

(a) In 1957, the value of lead-copper concentrate was included with copper ore, concentrate, etc.  
 (b) Includes the value of iron oxide for fluxing. (c) Excludes Australian Capital Territory, details of which are included with construction materials. (d) Incomplete owing to difficulties of coverage.  
 (e) Not strictly comparable with previous years, owing to extension of coverage in Victoria.

NOTE.—Particulars of the value of uranium concentrate produced are not available for publication and have been excluded from the table above.

Owing to the necessity of classifying individual mines according to the principal mineral produced, the values in the tables on pages 1192 and for mining industry groups differ slightly in some cases from totals of the corresponding groups of mine products shown in the table above.

## § 17. Oversea Trade in Minerals and Mineral Products

Particulars of the quantity and value (£A. f.o.b. port of shipment) of the principal mineral and mineral product items imported into and exported from Australia during the years 1959 to 1961 are shown in the following table.

### IMPORTS AND EXPORTS OF PRINCIPAL MINERALS AND MINERAL PRODUCTS: AUSTRALIA

Item	Unit of quantity	Quantity			Value (£A.'000 f.o.b.)		
		1959	1960	1961	1959	1960	1961

(a) Includes gold contained in matte. (b) Includes re-exports. (c) Less than £500.  
(d) Includes lead-copper concentrate.

Considerable quantities of metallic ores, concentrates, slags and residues are exported from Australia for refining overseas. The following table shows the quantities of such items exported during 1961 and their principal metallic content as estimated by assay.

**PRINCIPAL METALLIC CONTENTS OF SPECIFIED ORES AND CONCENTRATES,  
ETC., EXPORTED FROM AUSTRALIA DURING 1961**

Ores and concentrates, etc.	Quantity exported	Metallic contents—estimated from assay

(a) Includes lead-copper concentrate.

## CHAPTER XXVI

### DEFENCE

#### § 1. Department of Defence

1. **Functions and Organization.**—(i) *Functions.* The functions of the Department of Defence include:—defence policy; joint Service matters and matters having an inter-departmental defence aspect; the financial requirements of defence policy and the allocation of the funds made available; the supply aspect of defence policy including the review of production programmes and capacity; important matters of policy or principle affecting the Defence Forces and their requirements, including the strength, organization and disposition of the forces, higher appointments in the Services, their weapons and equipment, and defence research and development.

(ii) *Organization, higher Defence machinery and the control of the joint Service machinery.* The joint Service and inter-departmental advisory machinery of the Department consists of various committees headed by the Defence Committee, the Chiefs of Staff Committee, the Defence Administration Committee and the Joint War Production Committee.

The Defence Committee is a statutory body consisting of the Secretary, Department of Defence, who is Chairman; the Chairman of the Chiefs of Staff Committee; the Chiefs of Staff of the three Services; the Secretary, Prime Minister's Department; the Secretary, Department of External Affairs; and the Secretary to the Treasury. Its function is to advise the Minister for Defence on—the defence policy as a whole and the co-ordination of military, strategic, economic, financial and external affairs aspects of defence policy; matters of policy or principle and important questions having a joint Service or an inter-departmental defence aspect; and such other matters having a defence aspect as are referred to the Committee by or on behalf of the Minister for Defence.

The Chiefs of Staff Committee meets regularly for the discussion of technical matters on a joint service basis, and is responsible in peace for the preparation of military appreciations and plans. The functions of the Defence Administration Committee are the regular review of the progress of the Defence Programme, the co-ordination or integration of Service activities where appropriate in the interests of improved efficiency and economy and the improvement of methods and organization. The function of the Joint War Production Committee is, briefly, to examine the relation between strategic plans and their requirements to ensure the war potential for them exists. The major committees subordinate to the Defence Committee and/or the Chiefs of Staff Committee comprise the Principal Administrative Officers Committee (Maintenance and *Materiel*), the Principal Administrative Officers Committee (Personnel), the Defence Research and Development Policy Committee, the Joint Planning Committee, the Joint Intelligence Committee and the Joint Administrative Planning Committee.

In addition, the Defence Business Board furnishes advice on business matters of common interest to the three Services, or important subjects on which the collective advice of the Board is desired from the business aspect, with a view to promoting efficiency and economy in the execution of the Defence Programme. The Board comprises businessmen who serve in a part-time honorary capacity and consists of an independent chairman and deputy chairman and the business advisers of the three Service Departments.

2. **Basis of Current Defence Policy.**—The basic aim of Australia's defence policy is to ensure the security of Australia's mainland and its island territories. This aim requires Australian participation in a policy of collective defence in south-east Asia which is the area of primary defence interest to Australia. Australia is party to the various collective security arrangements which have been developed in the area—SEATO, ANZUS and British Commonwealth arrangements for defence co-operation (*see also* Chapter XXVIII. International Relations).

Global war as a deliberate act of policy is considered unlikely, and the main aim of Australia's defence preparations is continually to improve the capability of its forces to make a prompt and effective contribution to any allied effort required in a limited war or insurgency situation in south-east Asia, while at the same time having a capacity for independent action to meet the initial shock of an emergency.

**3. The Defence Programme.—(i) Objectives.** The defence programme must be maintained at a level that will enable Australia to meet its regional and home defence responsibilities. In the present strategic circumstances, emphasis is placed on progressively increasing our military capacity and preparedness by having both regular and citizen forces more readily available, and improving their means of strategic and tactical mobility. The forces are also being extensively re-equipped with modern conventional weapons which are standard or compatible as far as possible with those used by United States forces with whom Australia is associated in defence arrangements.

The naval programme provides for the continuing modernization and development of the Royal Australian Navy into a well-balanced operational fleet with emphasis on anti-submarine and air defence capability. Three modern guided missile destroyers of the *Charles F. Adams* type are being obtained from the United States, and the first two will be delivered in 1965. Four *Oberon* class submarines are being purchased to replace the submarines which have been maintained on the Australia station for some years by arrangement with the Royal Navy. The Carrier H.M.A.S. *Melbourne* will continue in full service with its Gannet and Venom aircraft until they reach the end of their service life, which is expected to be about 1967. These aircraft are to be used in conjunction with Westland Wessex helicopters already under delivery. Three Type 12 anti-submarine frigates incorporating the most advanced equipment for detecting and destroying submarines are in commission, and a fourth will be completed next year; these ships and the guided missile destroyers will be fitted with the Ikara anti-submarine missile which is being developed in Australia with United States co-operation. The R.A.N. also has in commission three Daring class destroyers, two battle class destroyers, six "Ton" class minesweepers, the fast transport H.M.A.S. *Sydney*, and the fleet replenishment ship H.M.A.S. *Supply*. A new survey ship is under construction in Australia and a 15,000 ton maintenance ship will also be built in Australia. The present target strength of the R.A.N. is about 14,300.

The Army plans to increase the strength of the Regular operational force and of the Citizen Military Forces which are available for service anywhere. Regular Army strength is to be increased to 28,000, including a third regular battle group, and the target strength of the Citizen Military Forces has been increased to 35,000. The Pacific Island Regiment in Australian New Guinea will be doubled to 1,400 as soon as possible. The combat elements of the Army are based on the pentropic divisional organization, and the approved objective in the equipment field is to provide the equipment and reserves needed by the Regular Army and Citizen Military Forces components of a complete pentropic division of five battle groups with appropriate combat support and logistic units. The tactical flexibility and mobility of the field force is being greatly improved by the acquisition of landing ships, light aircraft and helicopters for the Army light aircraft squadron, and also utility helicopters and short take-off and landing fixed-wing aircraft in the R.A.A.F. programme.

The Air Force is an operational force consisting of three bomber squadrons, four fighter squadrons, two maritime reconnaissance squadrons and three transport squadrons. The fighter squadrons are being re-equipped with the advanced supersonic jet fighter, the Mirage III, of which 100 are now on order. Air frames and engines are being manufactured to a substantial extent in Australia. Two new control and reporting units are being purchased, and in the field of tactical air transport support, 24 utility helicopters are being obtained and 18 Caribou fixed wing aircraft which have a proved capability as a short take-off and landing aircraft in south-east Asian conditions. In addition to the current programme of airfield construction, extensions, and installations at Australian airfields, major improvements are to be effected at Boram near Wewak in New Guinea. The present target strength of the Air Force is of the order of 18,300.

In the field of research and development, Australia is making its principal contribution through the long-range weapons establishment at Woomera and Salisbury in South Australia, which is a joint United Kingdom/Australian effort for the testing of guided weapons. The executive authority for this project is the Department of Supply. Woomera is also to be used for European Launcher Development Organization.

**(ii) Financial.** Details of defence expenditure for 1961-62, and the allocation of the Defence Vote for 1962-63 are set out in the two tables which follow.

**DEFENCE EXPENDITURE**  
(£'000)

Service or Department	Maintenance	Capital material requirements, machinery, plant and equipment	Capital buildings, works and acquisition of sites	Total expenditure
<b>DEFENCE EXPENDITURE, 1961-62</b>				
Defence .. .. .	1,346	88	226	1,660
Navy .. .. .	35,223	10,987	1,534	47,774
Army .. .. .	51,670	10,429	3,058	65,157
Air .. .. .	46,912	14,350	3,945	65,207
Supply .. .. .	16,174	2,855	2,615	21,644
Other Services .. .. .	1,171	109	386	1,666
<b>Total .. .. .</b>	<b>152,496</b>	<b>38,818</b>	<b>11,764</b>	<b>203,078</b>

<b>DEFENCE VOTE, 1962-63</b>				
Defence .. .. .	1,617	1,049	107	2,771
Navy .. .. .	32,653	15,265	1,482	49,400
Army .. .. .	54,426	10,525	3,549	68,500
Air .. .. .	48,244	15,131	3,825	67,200
Supply .. .. .	16,501	4,045	2,454	23,000
Other Services .. .. .	1,578	210	41	1,829
<b>Total .. .. .</b>	<b>155,019</b>	<b>46,223</b>	<b>11,458</b>	<b>212,700</b>

(iii) *Personnel Strengths.* The personnel strengths of the Services at 31st March, 1963, are shown in the following table.

**PERSONNEL STRENGTHS: SERVICES, MARCH, 1963**

Category	Navy	Army	Air Force	Total
Permanent Forces .. .. .	11,650	22,412	15,827	49,889
Citizen Forces (Volunteers) .. .. .	5,650	28,614	711	34,975
<b>Total Forces .. .. .</b>	<b>17,300</b>	<b>51,026</b>	<b>16,538</b>	<b>84,864</b>

4. **Australian Forces Serving Overseas.**—Australia has participated with the United Kingdom and New Zealand in the Commonwealth Strategic Reserve in Malaya since it was first established in 1955. The strength of the Australian component of the Reserve is as follows:—Navy—two destroyers or frigates, with an annual visit by an aircraft carrier; Army—one infantry battalion and supporting units; Air Force—one light bomber squadron, two fighter squadrons and supporting units. At the request of the Government of the Federation of Malaya, the Strategic Reserve continues to be stationed in that country and to assist in border security operations against the communist terrorists.

Australia has also recently deployed to Thailand, at the invitation of the Government of Thailand, a contingent of Sabre fighter aircraft in pursuance of its obligations under the SEATO Treaty. A small number of Army instructors has also been provided, at the invitation of the Government of South Vietnam, to assist that country in training for jungle warfare, village defence and other related activities.

## § 2. Naval Defence

1. **General.**—Prior to 1901, naval defence systems were organized under the State Governments. Information regarding these systems is given in Official Year Book No. 2, page 1084. An outline of the development of Australian naval policy is given in Official Year Books No. 3, page 1060, and No. 12, page 1012. An account of the building of the Australian Navy, its cost, the compact with the Imperial Government, and other details appears in Official Year Book No. 15, pages 921–3. The growth and the activities of the Royal Australian Navy during the 1939–45 War are shown in Official Year Book No. 36, pages 1023–7.

Under the provisions of the Commonwealth Constitution, the Minister of State for the Navy administers the Department of the Navy. Under the *Naval Defence Act 1910–1952*, the Royal Australian Navy is administered by the Naval Board. The Naval Board consists of the Minister as Chairman, four Naval Members, and the Secretary, Department of the Navy.

Strong links between the Royal Australian Navy and the Royal Navy are maintained by a constant exchange of officers for extended tours of duty, and by a full exchange of information and ideas. A liaison staff is maintained by the Royal Australian Navy in London, and by the Royal Navy in Australia. Advanced training and staff courses in the United Kingdom are provided by the Royal Navy for Royal Australian Navy officers.

A liaison staff is also maintained by the Royal Australian Navy in Washington and a comprehensive exchange of information is provided by this link. Staff courses in the United States are also attended by officers of the Royal Australian Navy.

The defined limits of the Australia Naval Station are as follows.

*Eastern*—from 3° 30' North, 169° East, south to 1° South, thence east to 170° East, thence south along this meridian to 30° South, thence to 45° South, 160° East, thence south along this meridian.

*Northern*—from 3° 30' North, 169° East, west to 125° East, thence south to the coast of Celebes, thence west along the coast of Celebes to 120° East, thence south along this meridian to 10° South, thence west to 78° East.

*Western*—from 10° South, 78° East, south along this meridian.

2. **Ships of the Royal Australian Navy.**—The following ships were in commission or in reserve in June, 1963.

In commission:—*Melbourne*—aircraft carrier; *Sydney*—fast troop transport; *Supply*—fast fleet replenishment tanker; *Anzac*, *Vampire*, *Vendetta* and *Voyager*—destroyers; *Stuart*, *Parramatta*, *Quiberon*, *Yarra*, *Diamantina* (training), *Gascoyne* (training), *Barcoo* (survey), and *Warrego* (survey)—frigates; *Kimbla* (trials)—boom defence vessel; *Hawk*, *Gull*, *Ibis*, *Teal*, *Curlew* and *Snipe*—minesweepers; *Bass* (survey) and *Banks* (fishery protection)—general purpose vessels; *Paluma* (survey)—coastal survey vessel.

In reserve:—*Arunta* and *Tobruk*—destroyers; *Culgoa*, *Queenborough*, *Quickmatch* and *Swan*—frigates; *Kangaroo*, *Karangi*, *Kookaburra* and *Koala*—boom working vessels; *Sprightly*—fleet tug.

Under dockyard control:—*Derwent*—frigate (completing).

3. **Ships' Service Outside Australian Waters.**—During the year ended June, 1963, H.M.A. Ships *Melbourne*, *Supply*, *Vampire*, *Voyager*, *Yarra*, *Parramatta*, *Quiberon*, and *Queenborough* served on the Far East Station as units of the Commonwealth Strategic Reserve with headquarters at Singapore. H.M.A. Ships *Diamantina* and *Gascoyne* also made visits beyond the limits of the Australia Station. H.M.A.S. *Supply* and the six minesweepers of the 16th Minesweeping Squadron made passage from the United Kingdom via Suez and Singapore to Australia on their delivery voyage between October and December, 1962.

4. **Personnel.**—The authorized establishment strength of the Royal Australian Navy will be 14,300 officers and ratings. In December, 1962, the actual strength of the Naval Forces, permanent and reserves, serving full time, was 1,195 officers and 9,539 ratings, including 97 native ratings of the Papua and New Guinea Division of the Royal Australian

Navy. Seventy-five cadet midshipmen, including 22 not on pay, were undergoing training at the Royal Australian Naval College. Sixteen officers and 403 ratings were serving in the Women's Royal Australian Naval Service. Reserve strength in December, 1962, comprised 989 officers and 4,942 ratings.

The established personnel strength of the W.R.A.N.S. is 16 officers and 490 ratings. They serve in the shore establishments in the following categories: radio-operators, regulating, writers, stores assistants, sick berth attendants, motor transport drivers, Wrans (radar plot), cooks and stewards.

Members of the Royal Australian Naval Reserve are the drilling reserve of the Citizen Naval Forces. They carry out weekly training and 13 days' annual continuous training.

Officers are commissioned and may serve until retiring age is reached. Ratings engage for a period of three years. Other branches of the Citizen Naval Forces are the R.A.N. Emergency List, Royal Australian Fleet Reserve and Royal Australian Naval Volunteer Reserve. These are a non-drilling reserve, but members may volunteer for periods of annual continuous training. Pay for members of Reserve Forces is approximately that paid to members of the Permanent Naval Forces. Special courses and service for long periods are available to all selected Reservists.

The Papua and New Guinea Division of the Royal Australian Navy was inaugurated in 1951. It is based at H.M.A.S. *Tarangau*, Lohrum, Manus Island, and consists of indigenous ratings from all districts of Papua and New Guinea. There are at present 96 chief petty officers, petty officers and junior ratings employed as seamen, engineering mechanics, stores assistants, cooks, writers, and in various trades. H.M.A.S. *Banks*, now attached to H.M.A.S. *Tarangau*, has a large proportion of Papua-New Guinea ratings as members of ship's company.

**5. Fleet Air Arm.**—The Fleet Air Arm of the Royal Australian Navy is maintaining two front line squadrons embarked in the operational carrier, H.M.A.S. *Melbourne*. This ship is fitted with an angled deck, steam catapult and mirror deck-landing sights. Training and support squadrons for H.M.A.S. *Melbourne's* Sea Venom jet all-weather fighter and ground attack aircraft and Gannet turbo-prop anti-submarine aircraft are based at the Naval Air Station H.M.A.S. *Albatross* at Nowra, New South Wales. Westland Wessex anti-submarine helicopters are being delivered and will be embarked in H.M.A.S. *Melbourne* in mid-1963. Training and support squadrons for the helicopters will also be based at the Naval Air Station.

**6. Ship Construction and Repair.**—There are three naval dockyards, at Garden Island and Cockatoo Island, New South Wales, and at Williamstown, Victoria. The dockyard at Cockatoo Island is operated by the Cockatoo Docks and Engineering Company Pty. Ltd., by agreement with the Commonwealth.

Under the present ship construction programme, two anti-submarine frigates are being completed at Cockatoo Island and Williamstown and will commission in June, 1963, and January, 1964, respectively. All three dockyards are also engaged on ship refitting work for the Navy.

It is intended to obtain four submarines of the Oberon class, and initial tenders have been called in the United Kingdom. A survey vessel, for which Scout helicopters have already been purchased for the speedy establishment of triangulation points, is being built at the State Dockyard, Newcastle. Two destroyers of the *Charles F. Adams* class are being built at the Defoe Shipbuilding Yard in the United States, and a third destroyer of this class will be ordered from the United States. There is also a 15,000 ton escort maintenance ship to be constructed in Australia.

**7. Naval College and other Training Establishments.**—The Royal Australian Naval College, transferred in 1930 from Jervis Bay, A.C.T., to Flinders Naval Depot, was re-established at Jervis Bay in January, 1958, and was commissioned as H.M.A.S. *Creswell*.

H.M.A.S. *Cerberus* at Crib Point, Westernport, Victoria, is the basic training establishment for adult ratings in the permanent forces, while several advanced training schools are established in Sydney, New South Wales.

H.M.A.S. *Leeuwin* at Fremantle, Western Australia, is the junior recruits training establishment for the permanent forces. A large proportion of instructional hours is devoted to school subjects, and the remaining instructional time is basic naval training and disciplinary training, so that on completion of training, ratings will be ready to undergo technical and specialist courses.

H.M.A.S. *Nerimba*, at Quakers Hill, New South Wales, is the Apprentice Training Establishment which provides secondary education as well as training in trades in which the lads will be employed during their service in the Royal Australian Navy.

### § 3. Military Defence

1. **General.**—(i) *State Systems.* A detailed historical account of the Australian defence forces prior to federation appears in Official Year Book No. 2, pages 1075–80. *See also* Official Year Book No. 12, page 999.

The strength of the military forces of the States at 31st December, 1900 (the eve of federation), exclusive of cadets, reservists, and rifle club members, was—New South Wales, 9,338; Victoria, 6,335; Queensland, 4,028; South Australia, 2,932; Western Australia, 2,696; Tasmania, 2,024; total for Australia, 27,353.

(ii) *Commonwealth Systems.* Under the terms of the *Constitution Act* 1900, the Commonwealth took over control of defence matters in March, 1901. The growth of the Commonwealth Military Forces may be considered to have taken place in a number of phases. For particulars of the phases which cover the period from the welding together of the military forces of the States into one homogeneous Army in 1902 up to the re-establishment of the Military Board and the organization of Commands after the 1939–45 War, *see* Official Year Book No. 46 and earlier issues.

In 1960, a complete re-organization of the Australian Military Forces was undertaken. The re-organization involved the reshaping of the Army by:—the adoption of a pentropic divisional organization; increasing the Regular Field Force; reducing the command, training and administrative structure; and converting the Citizen Military Forces to a wholly volunteer force and eliminating national service training which was introduced in 1951 and suspended in 1959–60.

Members of the Commonwealth Military Forces have taken part in the following campaigns:—the South African War, 1902; the First World War, 1914–1918; the Second World War, 1939–1945; Korea, 1950–1954; Malaya, 1955–1960. At 28th February, 1963, 1,349 members of the Australian Military Forces were serving in Malaya and Singapore as part of the British Commonwealth Far East Strategic Reserve.

#### 2. Composition of the Australian Military Forces.—

*The Australian Regular Army.* Current planning provides for a Regular Army with an annual average strength of 22,500.

*The Citizen Military Forces.* Planned strength of the C.M.F. is 30,850 volunteers. Members are required to volunteer for service overseas in the event of war.

*Strength of the Australian Military Forces.* The effective strength of the Australian Military Forces at 28th February, 1963, was—Australian Regular Army (including 712 Pacific Islanders and 729 Women's Services), 22,206; Citizen Military Forces, 28,405.

3. **Organization.**—Army Headquarters is responsible for the policy and control of the Australian Military Forces. The Military Board consists of the Minister for the Army, President; the Chief of the General Staff; the Adjutant-General; the Quartermaster-General; the Master-General of the Ordnance; the Deputy Chief of the General Staff; the Citizen Military Forces Member; and the Secretary, Department of the Army. After the 1939–45 War, Command Headquarters were established to implement Army Headquarters policy and to command and administer those units placed under their authority. Command Headquarters are established in the mainland capital cities of Australia. The geographic extent of Commands is as follows.

*Northern Command*—the State of Queensland and a small part of northern New South Wales and the Territory of Papua and New Guinea.

*Eastern Command*—the State of New South Wales, less those parts included in Northern, Southern, and Central Commands.

*Southern Command*—the State of Victoria, the State of Tasmania, and part of southern New South Wales.

*Central Command*—the State of South Australia, plus a portion of south-western New South Wales.

*Western Command*—the State of Western Australia.

*Northern Territory Command*—the Northern Territory.

The basic formation in the re-organized Army is the pentropic division, which is designed to have improved tactical capabilities with increased mobility and flexibility under conditions of tropical warfare. The pentropic division consists of five battle groups, each under the direct command of the divisional headquarters. Each battle group has, as its basic component, an infantry battalion of larger size and greatly increased fire-power compared with the infantry battalion which existed prior to the re-organization. In addition to the strengthened infantry battalion, each battle group includes supporting elements such as armour, artillery, engineers, signals, etc.

There are two pentropic divisions, one consisting of two A.R.A. and three C.M.F. battle groups, and the other of five C.M.F. battle groups.

4. *Military Training Systems.*—(i) *The Staff College.* Until 1938, the training of staff officers was carried out in the various Military Districts throughout Australia, except in cases where officers were selected from time to time to attend courses abroad. In 1938, an Australian Command and Staff School, located in the original Officers' Mess at Victoria Barracks, Sydney, was established. Between 1939 and 1945, the training of staff officers was carried out under varying conditions by different schools in accordance with the changing needs of the war.

Early in 1946, the Staff School (Australia) was established at Seymour, Victoria, and redesignated the Staff College in conformity with other Commonwealth training establishments for training officers for command and staff appointments. The College was later moved to Queenscliff, Victoria, where it is at present situated. From 1961, the course has been of eighteen months' duration and held biennially. The normal intake is 50 students, and, on successfully completing the course, an officer is awarded the symbol "psc". The course is designed to train selected officers for appointments in all branches of the staff in peace and war, and to prepare them to assume, after experience, command and higher staff appointments.

Included in the 1963-64 course will be students from the United Kingdom, Canada, New Zealand, India, Pakistan, Ceylon, United States of America, Thailand, Malaya, Fiji and Indonesia. Vacancies on each course are reserved also for officers who may be nominated by the Royal Australian Navy, the Royal Australian Air Force and the Commonwealth Public Service.

In order to ensure common standards in tactical doctrine and staff and command training throughout the Commonwealth of Nations, liaison is maintained with other Staff Colleges, and to this end there is also a reciprocal exchange of instructors between the United Kingdom and Australia. An instructor is also provided by New Zealand.

(ii) *The Royal Military College.* The Royal Military College was established in 1911 at Duntroon in the Australian Capital Territory for the purpose of providing trained officers for the Army. The conditions of entry are laid down in the Royal Military College Regulations. The length of the normal course is four years. While at the College, Staff Cadets are wholly maintained, and, in addition, receive payment increasing with each year of the course. The course of instruction is organized into military and civil departments, and the instructional staff comprises officers of the Army and civilian professors. On graduation, cadets are appointed lieutenants in the Australian Regular Army. The College also trains New Zealand cadets for commissions in the New Zealand Permanent Forces.

(iii) *The Officer Cadet School.* The Officer Cadet School was established in 1951 at Portsea, Victoria, for the purpose of speeding up the production of junior regimental officers for the Australian Regular Army. Serving members of the Australian Regular Army, the Citizen Military Forces, National Servicemen, and civilians between the ages of 18 and 23 years are eligible to apply for entrance. A special entry provides for candidates up to 25 years. The course is of 44 weeks' duration, and, on graduation, cadets are appointed second-lieutenants in the Australian Regular Army. Graduates normally proceed to further training at the Army School of the Arm and Service to which they have been allotted, before being posted to regimental duties.

(iv) *The Women's Royal Australian Army Corps School.* The W.R.A.A.C. School, established in 1952 at Mildura, Victoria, moved to Mosman, New South Wales, in 1958. It has three wings, one whose primary task is the training of officer cadets for the W.R.A.A.C., one for the training of non-commissioned officers at all levels and for other special courses, and one which is a basic training wing. The officer cadets are selected from eligible applicants, who may be serving members between 21 and 32 years of age, or civilians between 21 and 30 years of age. The course is of six months' duration and, on graduation, cadets are appointed lieutenants in the Women's Royal Australian Army Corps.

(v) *The Army Apprentices' School.* The Army Apprentices' School was opened in 1948 at Balcombe, Victoria, with the aim of training youths as skilled tradesmen for the Australian Regular Army, and to form a background for an Army career with prospects of promotion. The course is open to boys between the ages of 15 and 17 years and provides training in a number of highly skilled trades. A three-year course of intensive theoretical and practical work at the Apprentices' School is followed by one year in an appropriate Army workshop or technical unit. At the end of their third year, boys are given their Army trade test and also take the Victorian Apprenticeship Commission's final grade public examinations, which ensures that they will be accepted as qualified tradesmen in civil life when they eventually leave the Army. In addition to trade training, the Apprentices' School provides general educational facilities up to the School Leaving Standard.

(vi) *Other Schools.* Army Schools have been established for the major Arms and Services for the purpose of training officers and other ranks in the up-to-date techniques of their own Arm or Service, to qualify them for promotion requirements and to produce trained instructors. Courses at Army Schools are conducted for members of both the Australian Regular Army and the Citizen Military Forces.

The following Army Schools have been established:—Jungle Training Centre, Armoured Centre, School of Artillery, School of Military Engineering, Transportation Training Centre, School of Military Survey, School of Signals, Infantry Centre, Army Intelligence Centre, Royal Australian Army Service Corps Centre, Royal Australian Army Medical Corps School of Army Health, Royal Australian Army Ordnance Corps School, Royal Australian Electrical and Mechanical Engineers' Training Centre, School of Music, and Air Support Unit (Army Component).

5. *Women's Services.*—In July, 1950, approval was given for the enlistment of women into the Australian Regular Army on a limited scale. Enlistment into the Royal Australian Army Nursing Service commenced in November, 1950, and into the Australian Women's Army Corps early in 1951. In February, 1951, the Royal Australian Army Nursing Service became a Corps and was designated the Royal Australian Army Nursing Corps (R.A.A.N.C.). During June, 1951, the Australian Women's Army Corps was redesignated the Women's Royal Australian Army Corps (W.R.A.A.C.). The Women's Services in the Australian Regular Army now comprise two Corps only, the Royal Australian Army Nursing Corps and the Women's Royal Australian Army Corps.

Women's Services are incorporated in the Citizen Military Forces, and one company of the Women's Royal Australian Army Corps is located in each Command excluding Northern Territory Command. Companies of the Royal Australian Nursing Corps are located in each Command excluding Northern Territory Command.

6. *The Australian Cadet Corps.*—The Australian Cadet Corps is a voluntary organization. It serves as a training ground to provide, to some extent, the future officers and non-commissioned officers of the Australian Military Forces, and, as such, occupies a foremost position in the scheme of national defence. The Australian Cadet Corps, however, does not form part of the Australian Military Forces. School Cadet units are raised at educational establishments throughout the Commonwealth and Papua and New Guinea, except in the Northern Territory. The minimum age for enrolment is the year in which the applicant reaches the age of 14 years, and cadets, who, in the large majority of schools receive a free issue of A.M.F. pattern uniform, may remain in the Cadet Corps until they cease to be pupils of the educational establishments concerned. A few units retain their own pattern school uniform and are not issued with A.M.F. pattern uniforms. Provision is made for the appointment of officers, cadet under-officers, warrant and non-commissioned officers on an authorized establishment scale from within school units. School Cadet units may be, and in many cases are, affiliated with Citizen Military Force units.

The establishment of the Corps is 38,500 all ranks, and at 28th February, 1963, comprised 309 School Cadet units with a posted strength of 37,461, all ranks.

#### § 4. Air Defence

1. **General.**—A statement regarding the preliminary steps taken in connexion with the development of air defence appears in Official Year Book No. 18, page 610, and one on the expansion and development and zones and operations of the Royal Australian Air Force during the 1939–45 War, in Official Year Book No. 36, page 1027.

2. **Administration and Organization.**—(i) *General.* The Department of Air is responsible for policy for the organization and control of the Royal Australian Air Force. The Air Board is responsible, subject to approved policy, for the control and administration of the Royal Australian Air Force, and is constituted as follows:—Chief of the Air Staff, Air Member for Technical Services, Air Member for Personnel, Air Member for Supply and Equipment, and the Secretary, Department of Air.

Headquarters of the Royal Australian Air Force is in Canberra. A R.A.A.F. representative is located in London, and Air Attachés are located in Paris and Washington.

(ii) *Commands.* The units of the Royal Australian Air Force are organized into the following two functional Commands throughout Australia and its Territories.

*Operational Command*—responsible for the command of operational units and the conduct of their operations within Australia and its territories.

*Support Command*—responsible for the command of training units, supply and servicing units; recruitment and individual training in the R.A.A.F.; and supply and servicing, including technical servicing of the R.A.A.F. in Australia.

(iii) *Formations and Units.* The organization of the Royal Australian Air Force includes the following types of formations and units.

*Formations*—comprising a headquarters unit to control the activities of a number of units at one location; each formation has a base squadron which provides common services to all units at the location.

*Flying Squadrons*—bomber, fighter, transport, and maritime reconnaissance squadrons which undertake the operational and, in conjunction with operational conversion units, the operational training flying commitments of the R.A.A.F.

*Operational Conversion Units*—specializing in operational conversion training of aircrew for the bomber and fighter squadrons.

*Aircraft Depots*—specializing in major overhauls, etc., of aircraft and equipment and relieving flying unit ground staff of these commitments.

*Stores Depots*—centrally located depots to which stores and equipment ordered by the R.A.A.F. are delivered for distribution to units.

*Flying Training, Ground Training, Navigation, Radio and Air Armament Training Units*—specializing in the aircrew and ground staff training required by the R.A.A.F.

*Airfield Construction Squadrons*—specializing in the construction of R.A.A.F. aerodromes and associated buildings and works services.

*Royal Australian Air Force Academy*—the training college for officer cadet entrants to the R.A.A.F.

*Telecommunications Units*—responsible for the communications services of the R.A.A.F.

*R.A.A.F. Staff College*—trains specially selected R.A.A.F. officers for higher staff and command posts.

3. **Aircraft.**—Some of the aircraft which are at present being used in the Royal Australian Air Force are: bomber squadrons—Canberra; fighter squadrons—Avon Sabre; transport squadrons—Dakota, Hercules and Metropolitan; maritime reconnaissance squadrons—Neptune; Army liaison squadron—Bell helicopter and Cessna; Search and Rescue squadron—Iroquois helicopter; training—Avon Sabre, Canberra, Dakota, Meteor Vampire and Winjeel.

4. **Personnel.**—The Royal Australian Air Force establishment comprises an operational element and a support element consisting of 16,282 personnel. The support element includes headquarters and administrative staffs and the organization for training, supply and maintenance.

At 1st May, 1963, the strength of the Royal Australian Air Force was as follows:—Permanent Air Force, 15,838; Citizen Air Force, 714; and General Reserve, 16,397.

At 1st June, 1963, the Women's Royal Australian Air Force had an establishment of 865, with an enlisted strength of 773. There are 27 musterings, excluding members of the W.R.A.A.F. in training. The entry age is 18 to 34 years inclusive. All W.R.A.A.F. trainees undergo a month's initial training course at Point Cook, Victoria. On graduating, they are posted for duty to R.A.A.F. units anywhere in Australia. Wherever possible, the Air Force endeavours to post members of the W.R.A.A.F. to R.A.A.F. units according to an indicated preference.

### § 5. Department of Supply

1. **General.**—On 17th March, 1950, the Department of Supply was created to take over the functions of the former Department of Supply and Development, except those relating to the Bureau of Mineral Resources, Geology and Geophysics, which were transferred to the Department of National Development on that date. The Department of Supply and Development had been formed in April, 1948, to take over the munitions and aircraft activities of the Department of Munitions and the supply activities of the Department of Supply and Shipping. To these were added the design and inspection activities of the Department of the Army in February, 1950.

On 11th May, 1951, the munitions and aircraft production and the defence production planning activities of the Department were transferred to a newly created Department of Defence Production. The Department of Supply continued to exercise the remaining functions except shipbuilding, which was transferred to the Department of Shipping and Transport. In April, 1953, the control of materials used in producing atomic energy was vested in a newly created Australian Atomic Energy Commission, which was administered by the Minister for Supply until October, 1956, when it became the responsibility of the Minister for National Development. In March, 1958, responsibility for the production of aluminium was transferred to the Department of National Development. The Australian Aluminium Production Commission, the executive body appointed to carry out this function, became responsible to the Minister for National Development as from that date.

On 24th April, 1958, the Department of Defence Production was abolished, and the functions of that Department were re-transferred to the Department of Supply. References to those functions and to the activities of the various branches and establishments of the former Department of Defence Production are contained in Official Year Book No. 44, pp. 1059–61. On 11th March, 1959, the design and inspection functions were re-transferred to the Department of the Army.

On 18th December, 1959, the Department assumed responsibility for the operation and management of space tracking stations in Australia on behalf of the United States National Aeronautics and Space Administration. On 29th March, 1962, Australia became a foundation member of the European Launcher Development Organisation, and the Department accepted responsibility for the test firing of the launching rocket for that Organisation's communications satellite, using the facilities of the Woomera Rocket Range.

2. **Functions of the Department.**—The functions of the Department of Supply include the following.

Defence research and development, including the operation of the Joint United Kingdom—Australia Long Range Weapons Project, and Australian research and development through the Weapons Research Establishment, the Aeronautical Research Laboratories, the Defence Standards Laboratories and associated establishments.

Manufacture, acquisition, provision and supply of munitions (including aircraft) and miscellaneous goods and services required by the defence forces.

Arrangement of contracts for the supply of goods and the performance of services.

Operation and management of factories, workshops and undertakings concerned in the production of munitions (including aircraft), clothing, canvas-ware and other defence goods.

Operation and management of space tracking stations in Australia on behalf of the United States National Aeronautics and Space Administration.

Test firing of launching rocket for the European Launcher Development Organisation's communications satellite, using the facilities of the Woomera Rocket Range.

Acquisition, maintenance and disposal of strategic materials.

Planning and establishment of manufacturing facilities for the production of munitions and other defence goods.

Investigation and development of Australian sources of supply in connexion with defence.

Sale or disposal of surplus Commonwealth property other than land or buildings. Provision of Commonwealth transport facilities outside the Australian Capital Territory.

Provision and control of stores required for or in connexion with matters administered by the Department of Supply, and general storage for other Departments as required.

Provision of security services within the Department.

Arrangements for ascertaining costs and the control and limitation of profits in connexion with the production of munitions and other defence goods.

3. **Act Administered.**—The Minister for Supply administers the *Supply and Development Act 1939–1948*, except insofar as it concerns the building (*see also* Chapter XIV., p. 574, of this volume), repair and maintenance of merchant ships and the building, extension, alteration, repair and maintenance of shipyards, drydocking and repair facilities for merchant ships.

4. **Research and Development Branch.**—(i) *General.* The Research and Development Branch, which is under the control of the Chief Scientist, is responsible for research and scientific development in relation to war *matériel*, including the operation of the Joint United Kingdom—Australia Long Range Weapons Project. The Chief Scientist is also the Chairman of the Board of Management for Research and Development, which is responsible for the efficient and economical conduct of research and development undertakings. The headquarters of the Branch is situated in Melbourne, and the following establishments are included in the Branch:—Weapons Research Establishment, Salisbury, South Australia; Defence Standards Laboratories, Maribyrnong, Victoria, Finsbury, South Australia, and Alexandria, New South Wales; Aeronautical Research Laboratories, Fishermen's Bend, Victoria.

(ii) *Weapons Research Establishment, Salisbury, South Australia.* This Establishment has three main sections, namely, the Trials and Instrumentation Wing, the Weapons Research and Development Wing and the Engineering Wing.

The Trials and Instrumentation Wing is concerned with the Joint United Kingdom—Australia Long Range Weapons Project and is responsible for the testing of guided missiles developed in the United Kingdom. The Weapons Research and Development Wing is engaged chiefly on Australian-initiated research, but also provides a supporting research service for the Joint Project. The Engineering Wing designs the technical features of new installations on the range and operates the engineering facilities of the Establishment.

The headquarters of Weapons Research Establishment, consisting of the main laboratory, workshop, and administrative services, is located at Salisbury.

Accommodation has been provided in the area for a number of United Kingdom firms which are developing guided weapons under contract to the British Ministry of Supply.

A modern airfield (Edinburgh Field) has been established adjacent to the Headquarters at Salisbury to meet the flying requirements of the establishment, the flying effort being provided by the R.A.A.F.

Testing ranges have been established in South Australia at Woomera, which is approximately 280 miles north-west of Adelaide and 9 miles north of Pimba, a settlement on the Trans-continental railway line.

Agreements have been signed by the Australian and United States Governments for a co-operative programme for the establishment and operation in Australia, for scientific purposes, of facilities for space vehicle tracking and communications. A space Research Station has been established at Island Lagoon, south of Woomera, for optical and telemetry tracking and recording of information from satellite and deep space probe vehicles. The station carries out this work with a Baker Nunn camera, Minitrack radio tracking equipment and an 85 ft. diameter dish radio telescope.

Tracking stations have been set up at Red Lake, north of Woomera, and at Muchea in Western Australia. These are an integral part of "Project Mercury", the "Man in Space" project of the United States National Aeronautics and Space Administration. New tracking stations are being established, including one near Canberra for deep space probes, and one at Carnarvon in Western Australia for manned space flight vehicles. In addition, the Department of Supply is now responsible for the provision of facilities at Woomera to operate a launcher for the communications satellite of the European Launcher Development Organisation, and to meet this requirement the cancelled Blue Streak facilities are being used as a basis.

A modern township of 780 family houses and flats and 1,180 single quarters, together with modern amenities such as hospital, school, kindergartens, community store, swimming pool, and all sporting facilities, has been built at Woomera to accommodate the range and allied services personnel and their families.

(iii) *Defence Standards Laboratories.* The Defence Standards Laboratories at Maribyrnong (Victoria), Finsbury (South Australia), and Alexandria (New South Wales), continue to give comprehensive service to industry, the armed services and other Commonwealth and State Departments. The broad function of these laboratories is the application of scientific knowledge and research to the problems arising in design, development, manufacture, inspection, storage, and use of war *matériel*. Research is also carried out in connexion with the development of new and improved materials, methods and equipment of known or potential interest.

(iv) *Aeronautical Research Laboratories.* The broad function of the Aeronautical Research Laboratories is the application of scientific knowledge in the field of aeronautics to the operational and technical problems of the armed Services and industry, and to the development of new weapons and military equipment. More specifically, the Laboratories conduct investigations in aerodynamics, structures, materials, and power plants, with particular attention to aeronautical defence problems, especially those of missile design and operational effectiveness. These Laboratories also collaborate with the United Kingdom on aeronautical research matters of mutual interest.

5. **Production.**—(i) *Munitions.* The Department is responsible for the production in Australia of munitions (other than specialized Navy requirements) for the Australian Services. Production is carried out substantially in government factories, but large orders are also placed with private industry.

The following government factories are currently in operation:—Ammunition—Footscray, Victoria; Explosives and Filling—Albion and Maribyrnong, Victoria; Mulwala and St. Mary's, New South Wales; Ordnance—Maribyrnong, Bendigo and Port Melbourne, all in Victoria; Small Arms—Lithgow, New South Wales; Clothing—South Melbourne and Brunswick, Victoria.

With the exception of the Clothing Factory, these factories are largely complementary to each other in the manufacture of a range of basic munitions. The Ammunition Factory makes the brass and non-ferrous components of gun ammunition, including melting and rolling the raw materials, and these components are then passed to the filling factories for filling and assembly. However, the Factory makes the complete round for small arms ammunition, the propellant being supplied by the Explosives Factories. Electronic fuses are also being developed and produced with this factory as the co-ordinating establishment. Private industry is producing the electronic components required for these fuses.

The Ordnance Factories have produced armament and propulsion gearing for Battle and Daring class destroyers and frigates. Heavy forgings are produced at Maribyrnong and heavy plate fabrications are produced at both Maribyrnong and Bendigo. At Maribyrnong, production capacity exists for fire control equipment. Steel shell bodies are produced at Maribyrnong and passed to Explosives Filling Factories to be filled with explosives and assembled with other components produced at the Ammunition Factory and in private industry into complete rounds of gun ammunition.

At Port Melbourne, production capacity exists for large marine diesel engines. Major components of these engines are forged and/or fabricated at Maribyrnong and Bendigo.

The Small Arms Factory is equipped to make the rifles and other small arms for which the Ammunition Factory produces the ammunition. The Factory is producing the F.N. 7.62 mm. automatic rifle for the Australian Army to replace the .303 in. Lee Enfield rifle and is currently tooling up for the production of 9 mm. carbines. Orders for the 7.62 mm. rifle have been received from several overseas countries. The butts and other wooden components required for these rifles are produced from Australian-grown timber and fabricated by private industry.

The Clothing Factory makes uniforms and canvas goods for the three services as well as for the Postmaster-General's and Repatriation Departments and the Department of Supply.

(ii) *Aircraft.* (a) *General.* Production of military types of aircraft and aero engines and of other aircraft components required by the Royal Australian Air Force is also administered by the Department of Supply. Planning of capacity and the negotiation of contractual arrangements in connexion with aircraft modification, repair and overhaul, and for the supply of certain aircraft and engine spare parts and airborne equipment for the R.A.A.F., the R.A.N. and the Army are also functions of the Department.

The following government factories are operated:—Aircraft Factory, Fishermen's Bend, and Test Field, Avalon, Victoria; and Airframe Repair Workshops, Parafield and Northfield, South Australia.

(b) *Aircraft, Engine and Other Production.* The current approved production programmes for the major aircraft manufacturing organizations comprise the French Mirage supersonic fighter, the Jindivik radio-controlled jet-propelled target aircraft, and the Malkara guided missile at the Government Aircraft Factory, Melbourne; French Atar turbo-jet engines and some sections of the Mirage airframe at Commonwealth Aircraft Corporation Pty. Ltd., Melbourne.

Production activities included the manufacture of engine spare parts, aircraft pressed metal parts and turbine and compressor blades for jet engines.

(c) *Repair and Overhaul.* During the year, the R.A.A.F. continued the broad policy of returning to the factories in which they were produced all Australian-made aircraft and aero engines requiring major overhaul, repair or the incorporation of modifications. Repair and overhaul of R.A.A.F. aircraft of certain other types and of carrier-based aircraft operated by the R.A.N. were undertaken by civilian personnel in the aircraft factories or in the works of contractors specially equipped for the purpose.

The reconditioning and servicing of aircraft instruments, electrical, electronic and other ancillary equipment and airframe components were carried out by various contractors.

(d) *Telecommunications.* Developmental and production orders were placed with industry for new and improved types of Service telecommunications equipment. Large quantities of this equipment were also repaired and overhauled.

6. *Contract Board.*—(i) *General.* Under the *Supply and Development Act 1939–1948*, the Contract Board is the authority responsible for purchasing supplies and arranging services for the Naval, Military and Air Forces of the Commonwealth, as well as for the Department of Supply. It is also responsible for the sale or disposal of all surplus or unserviceable Commonwealth goods approved for disposal. In addition, the Board purchases on behalf of other Commonwealth departments and authorities which have no public contract organization of their own, e.g., Immigration, National Development and External Affairs (Colombo Plan supplies).

(ii) *The Board and its Administrative Organization.* The Contract Board meets in Melbourne, and comprises representatives of the Departments of Supply, Navy, Army and Air. The Board's administrative organization is the Directorate of Contracts. In each State other than Victoria, there is a District Contract Board with an administrative organization similar to the Directorate of Contracts. The table following shows, in respect of the Contract Board organization, the purchases and realizations from disposals for the years 1960–61 and 1961–62.

**CONTRACT BOARD ORGANIZATION: PURCHASES AND REALIZATIONS  
FROM DISPOSALS  
(£)**

State	Purchases		Realizations from disposals	
	1960-61	1961-62	1960-61	1961-62

7. **Defence Supply Planning.**—The central planning authority of the Department is the Planning Branch, whose principal functions are:—

- to plan for and to assist in the development of additional production capacity to meet the Services' munitions requirements for peace and war;
- to provide and administer stockpiles of relevant materials and reserve pools of plant and equipment considered essential for expansion of production in the event of war;
- to prepare and advance co-ordinated production programmes against Service orders and to analyse and interpret achievement against these programmes for the information of the Department and the Services;
- to provide advisory services in the field of instrumentation, machine tools, materials, and inspection to Government factories and contractors engaged in the production of munitions requirements; and
- to administer the national stockpile.

A series of Industry Advisory Committees has been established to advise the Minister and the Department in the development of industrial mobilization plans to meet the Services' *matériel* requirements for mobilization and war. The Committees are:—Ammunition; Electrical; Explosives and Chemicals; Machine Tools and Gauges and Munitions Factory Equipment; Materials; Military Vehicles; Radar and Telecommunications; Weapons and their Equipment; Hard Fibres; Raw Cotton; and Rubber and Allied Materials.

Members of the Committees include industrialists of wide experience and the highest ability in their chosen fields.

8. **Stores and Transport Branch.**—This Branch, administered by a Board of Management and working under the direction of a General Manager, functions as the Central Storage Authority and the Central Transport Authority for all Commonwealth Departments. It is the authority for the arrangement of furniture removals at departmental expense in all States, but not in the Australian Capital Territory or the Northern Territory. It has agents in Canberra and Darwin. It also operates a Shipping and Customs Section and the England-Australia Bulk Air Freight Scheme for Commonwealth Departments.

On 30th June, 1962, the Branch had under its control land, buildings and works, vehicles, plant and equipment valued at £10,344,716, and 3,274,000 sq. ft. of storage space, as well as storage facilities for large quantities of chemicals, bulk liquids and explosives.

9. **Finance Branch.**—The total expenditure on Department of Supply activities during the year 1961-62 was £53,040,000, comprising £21,644,000 from Parliamentary appropriations, and £31,396,000 from Trust Fund Accounts. The latter consisted of—Stores and Transport, £6,631,000; Government Factories and Establishments, £16,790,000; Munitions Production, £7,875,000; and Defence Production Materials, £100,000.

## CHAPTER XXVII

## REPATRIATION

## § 1. General

The Repatriation Commission, established under the *Repatriation Act* 1920-1962, and consisting of three full-time members, is responsible for the administration of the *Repatriation Act* and associated legislation, all matters of policy, and the general administration and overall supervision of the Repatriation Department. The central office is in Melbourne and there is a branch office under the control of a Deputy Commissioner in each State.

The principal functions of the Department are:—the payment of war and service pensions to ex-service men and women and their dependants; the provision of medical treatment to ex-service men and women for injuries and illnesses caused or aggravated by their war service; the provision of medical treatment in certain circumstances to ex-service men and women who are suffering from injuries and illnesses not caused or aggravated by war service; and the provision of medical treatment to widows and dependants of deceased ex-servicemen whose deaths are due to war service.

Other functions of the Repatriation Department are outlined in a later section of this chapter (see § 5, General Benefits and Miscellaneous, pp.1218-20).

Benefits are provided in respect of service, not only in the 1914-18 and 1939-45 Wars, but also in the Korea and Malaya operations, with the British Commonwealth Far East Strategic Reserve and the Special Overseas Forces.

## § 2. War Pensions

1. **General.**—The first provision for the payment of war pensions to ex-servicemen and their dependants was made by the Commonwealth Parliament in the *War Pensions Act* 1914, which came into operation on 21st December, 1914. This Act was repealed in 1920 by the *Australian Soldiers' Repatriation Act* (amended from 31st December, 1950, to the *Repatriation Act*). The main features relating to war pensions under the *Repatriation Act* 1920-1962 are set out in the following paragraphs.

(i) **Eligibility for Pension.** The 1943 amendments to the *Repatriation Act* considerably widened the provisions in this respect, to the benefit, mainly, of members of the Citizen Military Forces who had not served outside Australia. These provisions are summarized as follows.

A member of the forces who served (1) outside Australia, (2) in the Territories of Australia, such as Papua and New Guinea, or (3) within Australia in circumstances which can be regarded as combat against the enemy, is covered for war pension purposes in respect of incapacity or death which may result from any occurrence that happened during the period from the date of his enlistment to the date of the termination of his service in respect of that enlistment.

In other cases where a member served only in Australia, incapacity or death to be pensionable must have been attributable to service.

There is a third ground applicable to all in (a) and those in (b) who had at least six months' camp service. This provides that, where a condition existed at enlistment, a pension may accrue if it is considered that the condition was aggravated by service.

(ii) **Pensions for Incapacity.** From 28th September, 1961, the 100 per cent. pension rate for an ex-serviceman's incapacity was increased from £5 10s. to £5 15s. a week (higher rates are payable in respect of certain commissioned ranks). The rates for wives and children of incapacitated ex-servicemen are £1 15s. 6d. and 13s. 9d. a week, respectively.

(iii) **Supplementation of Pensions.** Where an ex-serviceman, because of his war disability, is temporarily (for at least three months) precluded from earning other than a negligible percentage of a living wage, an additional pension may be granted to bring the total pension to the ex-serviceman up to £13 5s. a week, an increase of 10s. from 28th September, 1961.

(iv) **Women's Nursing and Auxiliary Services.** Members of Women's Services are eligible for pensions and other benefits as prescribed in the Act on the same basis as male members of the Forces.

(v) *Pulmonary Tuberculosis.* If, at any time after discharge, an ex-serviceman who served in a theatre of war becomes incapacitated or dies from pulmonary tuberculosis, war pension is payable as if the incapacity or death resulted from an occurrence on service. (See also § 3. Service Pensions.) Medical treatment may also be provided.

(vi) *Special Rates.* Those who have been totally blinded as a result of war service and those who are permanently and totally incapacitated receive a special pension which was increased from £12 15s. to £13 5s. a week from 28th September, 1961. This special pension may also be granted to ex-servicemen who are suffering from pulmonary tuberculosis. In addition, there is an intermediate rate for tuberculosis patients fit for light employment. This intermediate rate was similarly increased from £8 17s. 6d. to £9 7s. 6d. a week. In addition to the special pension, an attendant's allowance of £3 5s. a week is granted to the war-blinded and to certain others who are deemed to be in need of an attendant. A war-blinded ex-serviceman who is also affected with total loss of speech or total deafness is entitled to an attendant's allowance of £5 5s. a week. Wives and any children under 16 years of age receive the rates shown in sub-para. (ii).

(vii) *Clothing Allowance.* As from 1st October, 1959, provision was made for ex-servicemen to receive a clothing allowance ranging from 3s. 9d. to 7s. 6d. weekly for damage to clothing caused by the use of an artificial limb or other appliance, where the incapacity is due to war service, or by the use of oils, ointments, etc., used in the treatment of accepted disabilities, e.g., skin diseases, suppurating wounds, etc.

(viii) *Specified Disabilities.* Where the disability is amputation of a limb or limbs or total loss of vision in one eye, amounts ranging from 13s. 6d. to £7 10s. a week in addition to the statutory rate of pension are payable as from 28th September, 1961. In addition, attendant's allowances of either £3 5s. or £5 5s. a week are payable in certain double amputation cases.

(ix) *Time Limit Removed for Wives and Children.* Prior to the 1950 amending Act, wives who were married and children who were born after specified dates were ineligible to receive a war pension. This time limit was removed as from 2nd November, 1950.

(x) *Rates of Pension for Death.* (a) *Widows.* From 28th September, 1961, the rates of pension were increased by 5s. a week, the minimum rate being increased from £5 10s. to £5 15s. a week (higher rates are payable in respect of certain commissioned ranks).

In addition to pension, a widow receives an allowance if she has a dependant child or children under the age of 16 years, or if she is over 50 years of age, or is permanently unemployable, or has a child over 16 years who is undertaking education or training and who is, in the opinion of the Commission, not receiving an adequate living wage.

(b) *Children.* From 28th September, 1961, the rate of pension for the eldest child (under 16 years of age) was increased from £1 11s. 6d. a week to £1 19s. a week, and that for each younger child from £1 2s. 6d. a week to £1 7s. 6d. a week. Additional pension of 6s. a week may be paid in certain circumstances. Where both parents are dead, pension payable to each child was increased from £3 3s. a week to £3 11s. 6d. a week.

(xi) *Widowed Mother on Death of Member.* A pension ranging from £2 5s. to £4 3s. a week, according to the rank of the ex-serviceman, may be granted to the widowed mother of a deceased unmarried son, provided widowhood occurred either prior to or within three years after the death of the member. The pension may be supplemented by payment of an additional amount (not exceeding £5 5s. a week as from 28th September, 1961) according to the extent of other income of the pensioner. The value of property owned does not affect the pension.

2. *Appeals Tribunals.*—The principal Act was amended, as from 1st June, 1929, to create tribunals to hear appeals in respect of war pensions. The War Pensions Entitlement Appeal Tribunal is empowered to hear and decide any appeal by or on behalf of ex-servicemen or their dependants against a decision of a Repatriation Board or the Repatriation Commission that the incapacity or death of an ex-serviceman did not arise out of war service. Assessment Appeal Tribunals were created to hear and decide any appeal against a current assessment or a "Nil" assessment of war pension made by the Repatriation Commission in respect of the incapacity of an ex-serviceman which had been accepted as arising out of war service. Provision was made by subsequent legislation to enable the tribunals to hear appeals by certain members whose application for a service pension had been refused on the grounds that they were not suffering from pulmonary tuberculosis or were permanently unemployable.

3. *Summary of War Pensions, 1961-62.*—The following table provides a summary of war pensions for the 1914-18 War, the 1939-45 War, the Korea and Malaya operations and the Far East Strategic Reserve.

## WAR PENSIONS: SUMMARY, AUSTRALIA, 1961-62

Particulars	1914-18 War	1939-45 War	Korea and Malaya operations	Far East Strategic Reserve	Total
New claims granted .. ..	2,422	30,794	969	152	34,337
Restorations .. ..	359	926	15	..	1,300
Claims rejected(a) .. ..	1,872	7,030	383	70	9,355
Pensions cancelled or discontinued ..	829	17,877	106	4	18,816
Deaths of pensioners .. ..	4,680	3,246	23	1	7,950
Number of pensioners in force at 30th June, 1962 .. ..	118,586	543,904	7,412	276	670,178
Annual pension liability at 30th June, 1962 .. .. £	23,890,878	38,553,597	398,574	15,840	62,858,889
Amount paid in pensions during the year 1961-62 .. .. £	n.a.	n.a.	n.a.	n.a.	61,873,988

(a) Number of claimants who had their claims for all their disabilities rejected.

4. **Classes of War Pensions, Australia, 1961-62.**—(a) *New Claims Granted.* The following is an analysis of the total number of new claims granted during 1961-62.

## WAR PENSIONS: NEW CLAIMS GRANTED, AUSTRALIA, 1961-62

Class	1914-18 War	1939-45 War	Korea and Malaya operations	Far East Strategic Reserve	Total
Ex-servicemen .. ..	1,013	7,204	188	55	8,460
Wives of ex-servicemen .. ..	1,159	6,904	187	32	8,282
Children .. ..	104	15,756	583	61	16,504
Other dependants .. ..	146	930	11	4	1,091
<b>Total .. ..</b>	<b>2,422</b>	<b>30,794</b>	<b>969</b>	<b>152</b>	<b>34,337</b>

(b) *Pensions in Force.* The following table shows the number of pensions in force at 30th June, 1962, for each war and for each class of pensioner.

## WAR PENSIONS IN FORCE: AUSTRALIA, 30th JUNE, 1962

Class	Number of pensioners at 30th June, 1962				
	1914-18 War	1939-45 War	Korea and Malaya operations	Far East Strategic Reserve	Total
Ex-servicemen .. ..	48,670	165,101	2,208	104	216,083
Wives .. ..	45,004	139,277	1,615	58	185,954
Children .. ..	1,374	210,300	3,301	86	215,061
War widows .. ..	22,375	14,722	70	7	37,174
Children of deceased ex-servicemen	191	6,980	120	16	7,307
Orphans .. ..	18	143	..	1	162
Parents .. ..	677	7,056	95	3	7,831
Brothers and sisters .. ..	55	101	3	..	159
Others .. ..	222	224	..	1	447
<b>Total .. ..</b>	<b>118,586</b>	<b>543,904</b>	<b>7,412</b>	<b>276</b>	<b>670,178</b>

(c) *Special Rate Pensions.* At 30th June, 1962, special rate pensions were being paid to the following classes of ex-servicemen.

## WAR PENSIONS: MEMBERS ON SPECIAL RATES, AUSTRALIA, 30th JUNE, 1962

Class	1914-18 War	1939-45 War	Korea and Malaya operations	Far East Strategic Reserve	Total
Totally and permanently incapacitated ex-servicemen .. ..	12,683	7,706	25	..	20,414
Blinded ex-servicemen .. ..	221	235	1	..	457
Tuberculous ex-servicemen .. ..	401	377	14	..	792
Tuberculous ex-servicemen (intermediate rate) .. ..	102	228	1	..	331

5. Number of War Pensions and Annual Liability, States, etc., 30th June, 1962.—The following table shows the number of pensions in force and annual liability for each war at 30th June, 1962, according to place of payment. (The amount paid is shown on p. 1216.)

**WAR PENSIONS: NUMBER OF PENSIONS AND ANNUAL LIABILITY,  
30th JUNE, 1962**

Where paid	Number of war pensions in force at 30th June, 1962				Annual pension liability (£)
	Incapacitated ex-service-men	Dependants of incapacitated ex-service-men	Dependants of deceased ex-service-men	Total	
1914-18 WAR

(a) Excludes payments to Far East Strategic Reserve pensioners.  
(c) Includes the Northern Territory.

(b) Includes the Australian Capital Territory.

### § 3. Service Pensions

1. *General.*—The *Repatriation Act* 1920-1962, administered by the Repatriation Department, provides for a service pension to be paid, subject to a means test of income and property, to the following persons.

A male ex-serviceman aged 60 years or over who served in a theatre of war, or an ex-servicewoman aged 55 years or over who served abroad. No pension is payable to the wife or children under 16 years of age of an ex-serviceman granted a service pension on account of age.

An ex-serviceman who is permanently unemployable and who served in a theatre of war (or in the case of an ex-servicewoman, who served abroad). Service pensions are also payable to a pensioner's wife and up to four children under 16 years of age.

An ex-serviceman suffering incapacity from pulmonary tuberculosis whether or not the person served in a theatre of war. (Only those persons who qualify in this group are entitled to receive both service and invalid pensions at the same time, subject to the maximum permissible income.) Service pensions are also payable to a pensioner's wife and up to four children under 16 years of age.

2. *Rate of Pension.*—The maximum rate of service pension is the same as that for age and invalid pensions paid by the Department of Social Services, namely, £5 5s. a week. A service pensioner with two or more children under 16 years of age in his care, custody and control, is eligible for a further 10s. a week for each child except the first, if he receives a service pension on the ground of being permanently unemployable, or is suffering from pulmonary tuberculosis. In addition, a service pensioner in receipt of service pension at the maximum rate may also receive supplementary assistance of 10s. a week if he pays rent and is entirely dependent upon his service pension.

The maximum rate for a wife is £2 17s. 6d. a week; the rate for the first child under sixteen years of age is 15s. a week and for each other child (not exceeding three) 2s. 6d. a week.

The means test sets limits to the amount of income or property which a pensioner may have for the purpose of service pension. The amount of service pension payable depends upon the claimant's "means as assessed", which consists of his annual rate of income plus a property component equal to 9d. a fortnight for each complete unit of £10 of net value of property above £200. For married couples, except where they are separated or in other special circumstances, the income and property of each for purposes of applying the means test is taken to be half the total income and property of both, even if only one is a pensioner or claimant. A person's "means as assessed" may consist entirely of income, entirely of property, or of both income and property components. If his "means as assessed" do not exceed £3 10s. a week, the claimant receives the full pension of £5 5s. a week. If his "means as assessed" exceed £3 10s. a week and are less than £8 15s. a week, a reduced

pension is payable. The rate payable is the maximum rate of £5 5s. a week less the amount by which "means as assessed" exceed £3 10s. a week. If his "means as assessed" are £8 15s. a week or more, or in the case of a married couple £17 10s. a week or more, no service pension is payable.

Income means earnings and other forms of income derived from any source, with certain exceptions, of which the principal are—certain income derived from property, gifts or allowances from children, parents, brothers or sisters, benefits from friendly societies, child endowment, Commonwealth health benefits. The value of board and lodgings received by a pensioner is assessed as income at 12s. 6d. a week. Property includes all real and personal property, such as houses, land, money in hand, in a bank or on loan, shares, investments or legacies, vehicles used for business purposes, livestock. Property does not include an applicant's home, furniture or personal effects, the surrender value of life insurance policies (up to £750), the value of any reversionary interest, the capital value of any life interest, annuity or contingent interest, or vehicles maintained only for personal use.

Eligibility for service pensions was extended on 1st November, 1941, to veterans of the South African War 1899–1902, and in 1943 to members of the Forces of the 1939–45 War. Members of the Forces who served in Korea, and those who served in Malaya prior to the commencement of the *Repatriation (Far East Strategic Reserve) Act* 1956–1962, are also eligible.

An ex-serviceman or ex-servicewoman in receipt of a service pension is entitled, with certain exceptions, to free medical benefits for disabilities not caused by war. These benefits include general practitioner service, specialist service where necessary, full pharmaceutical benefits, surgical aids and appliances (including spectacles), dental treatment and treatment in Repatriation General Hospitals.

3. **Operations, 1961–62.**—The following table gives a summary of service pensions during 1961–62.

Claims granted during year—

(a) Includes Australian Capital Territory.

(b) Includes Northern Territory.

#### § 4. Medical Treatment for Ex-Servicemen and Dependants of Ex-Servicemen

In-patient treatment for eligible patients is provided at the Repatriation General Hospitals in each State, at the auxiliary hospitals in New South Wales, Victoria and Western Australia, and at the sanatoria in Queensland and South Australia. For long-term patients, Anzac Hostels are maintained in Queensland and Victoria.

The numbers of medical officers and nursing staff, respectively, at departmental institutions at 30th June, 1962, were as follows—Repatriation General Hospitals, 167, 1,490; Auxiliary Hospitals, 6, 68; Sanatoria, 2, 20; Anzac Hostels, nil, 11.

At 30th June, 1962, 5,212 in-patients were in Repatriation medical institutions or treated in State mental hospitals on behalf of the Department, including a number whose care was undertaken by the Department on behalf of other countries or the armed forces. There were 487,978 out-patient attendances for treatment during the year 1961–62, and 2,279,167 treatments by local medical officers in metropolitan and country areas. The expenditure for the year ending 30th June, 1962, on medical treatment was £16,962,767.

#### § 5. General Benefits and Miscellaneous

1. **Other Departmental Activities.**—(i) *General.* During the 1939–45 War, the ordinary activities of the Department in respect of general benefits for the welfare of ex-servicemen and dependants were carried on without interruption. These activities concern mainly:—education and training of children under the Soldiers' Children Education Scheme, medical benefits for widows and children of deceased ex-servicemen and for widowed mothers of deceased unmarried ex-servicemen, funeral expenses for certain classes of ex-servicemen and dependants, and allowances to certain classes of dependants.

By legislation passed in June, 1940, these benefits were extended to servicemen engaged in the 1939–45 War, and in November, 1950, to those engaged in the Korea and Malaya Operations, and new benefits designed for the re-establishment of servicemen after discharge from the Forces were made available. The re-establishment benefits administered by the Repatriation Commission are:—payment of re-employment allowance while awaiting employment; provision of tools of trade and equipment where they are necessary to employment; transportation expenses to meet the cost of fares and removal of household belongings where an ex-serviceman takes up training, employment, or a business, or settles on the land; supplementing wages of apprentices whose apprenticeships were interrupted by war service; re-establishment loans to enable ex-servicemen and widows to establish themselves in business, practices or occupations, including (until the Division of War Service Land Settlement began operations early in 1946) agricultural occupations; payment of re-establishment allowance during the early stages of establishment in business; gifts up to

£75 for furniture to ex-servicemen who are blind or totally and permanently incapacitated, also to widows with children under 16 years of age; and free passages to Australia for wives, widows and children of ex-servicemen who married abroad (and passages outward from Australia in certain cases of ex-servicemen and dependants).

In 1949, the Department took over the functions of the Re-establishment Division of the former Department of Post-War Reconstruction, and became responsible for the co-ordination of all matters relating to training under the Commonwealth Reconstruction Training Scheme. This scheme is now concluded, the prescribed time limits for eligibility having expired. Re-establishment of the more seriously disabled, where ordinary training is not sufficient, continues to be a function of the Department, and special means have to be found to overcome each problem.

(ii) *General Repatriation Benefits.* The following table gives a summary of expenditure during the five years 1957–58 to 1961–62 on the more important general repatriation benefits for all wars.

#### EXPENDITURE ON GENERAL REPATRIATION BENEFITS: SUMMARY

(£)

Year ended 30th June—	Medical treatment	Employment and vocational training	Business loans and furniture	Soldiers' Children Education Scheme	Living allowances	Other benefits	Total
1958..	10,179,683	340,004	56,492	593,097	2,906,870	228,136	14,304,282

2. *Expenditure by the Repatriation Department, 1961–62.*—The net expenditure by the Department for the year ended 30th June, 1962, was £100,976,111 distributed as follows.

	£
Pensions, allowances and other benefits .. .. .	78,665,412
Treatment .. .. .	16,962,767
Administration .. .. .	3,962,568
Works, rent and maintenance .. .. .	1,385,364
	<b>100,976,111</b>

3. *Settlement of Returned Service Personnel on the Land.*—Reference to the settlement of returned service personnel on the land will be found in Chapter IV. Land Tenure and Settlement, pages 103–5 of this Year Book.

4. *The Services Canteens Trust Fund.*—(i) *General.* The Services Canteens Trust Fund was established under the *Services Trust Funds Act 1947*. Its funds are derived from the assets of wartime Services canteens, mess and regimental funds of disbanded units, the sale of amenities to the Forces from 1939 to 1943, and several other sources.

The total amount transferred to the Fund to 31st December, 1962, was £5,526,953. The Act prescribed that, of this, £2,500,000 and such further amounts as the trustees of the Fund might from time to time decide, should be devoted to the provision of education facilities for the children of eligible ex-service men and women, and that the balance of the Fund should be used to provide relief for ex-service men and women and their dependants in necessitous circumstances.

The Fund is administered by ten honorary trustees, appointed by the Governor-General. The trustees have power to determine the persons or groups of persons to benefit from the Fund and the extent of benefits to be granted within the provisions of the Act, and to appoint regional committees to assist with the administration. Members of regional committees are all persons who served in the 1939–45 War or are widows of men who served during the war. They serve in an honorary capacity.

(ii) *Assistance from the Fund.* (a) *General.* Persons eligible for assistance from the Fund are those who, between 30th September, 1939, and 30th June, 1947, served in the Australian Naval, Military or Air Forces, including members of the Canteens Staff of any ship of the Royal Australian Navy, persons duly accredited to any part of the Defence Force who served in an official capacity on full-time paid duty, and their dependants.

The trustees have introduced schemes for providing welfare relief for ex-service men and women who are eligible for benefits, and for their dependants; benefits for children of eligible ex-service men and women who are suffering from serious and incapacitating afflictions; and education benefits for the children of eligible ex-service men and women. From its inauguration in 1947, the Fund is to be available for 40 years for welfare relief and for 30 years for educational benefits.

(b) *Welfare Relief.* The trustees have prescribed a policy for welfare relief which makes assistance available only to those who are in genuine distress from which they cannot extricate themselves by their own efforts.

To 31st December, 1962, £1,302,960 had been granted as welfare relief from the Fund, £904,891 to ex-servicemen and their dependants, and £398,069 to widows and orphans. The amount granted during 1962 was £75,543. A total of 29,136 ex-service men and women and 11,915 widows and orphans were granted welfare assistance from the Fund to 31st December, 1962.

(c) *Assistance under Afflicted Children's Scheme.* The Fund assists dependent children suffering from afflictions which permanently disable or seriously retard their progress, or prevent the enjoyment of normal health and strength, and who face a prospect of dependence on others for all or part of their lives. The extent to which assistance will be granted in a particular case depends largely on the nature of the child's affliction, the facilities available, the family circumstances, and the funds that can be made available. Up to 31st December, 1962, 2,322 afflicted children had been assisted under the Afflicted Children's Scheme, involving an expenditure of £117,309.

(d) *Educational Assistance Scheme.* Educational assistance is restricted to children who are 15 years of age and over, except in exceptional circumstances. In the case of orphans, assistance may commence from the age of 12 years. The object is to assist eligible children to obtain the highest education within their capacity. Assistance is in the form of awards ranging from £5 to £200 a year depending on the cost of the course undertaken and the family circumstances. These awards are granted for practically every type of course of education, whether secondary, tertiary or commercial. They are designed to cover, or contribute towards, the cost of essential books, fees in cases where government school courses are not available, fares between the child's home and school, essential equipment and material, a uniform allowance in certain cases, and a maintenance allowance for the child while at school. Higher training education awards are provided for selected students for post-graduate study. Provision also exists for one post-graduate scholarship each year for study overseas, valued at £1,000 per annum for three years.

The number of children assisted under the educational scheme to 31st December, 1962, was 38,203, and the expenditure on educational awards, post-graduate scholarships and higher training education awards to 31st December, 1962, was £1,984,180.

## § 6. Seamen's War Pensions and Allowances

The *Seamen's War Pensions and Allowances Act* 1940 provided for the grant of pensions to Australian mariners (defined in the Act to cover *inter alia* persons employed in sea-going service on ships registered in Australia and engaged in trading, or on certain other ships owned in Australia and operating from Australian ports) who sustained injury through enemy action, and their dependants, and to the dependants of those who were killed by enemy action. Detention allowances were provided for Australian mariners who were captured, and their dependants, during the period of detention. Compensation to Australian mariners was provided in respect of personal effects lost or damaged through enemy action. Regulations passed in 1942 provided also for the continuance of wages for those captured by the enemy.

Amendments to the original Act and regulations raised pensions to rates corresponding to those payable under the *Repatriation Act* and made mariners eligible for general benefits on the same scale as those available under that Act.

Pensions payable at 30th June, 1962, numbered 246, comprising 60 to incapacitated mariners, 101 to their dependants, and 85 to the dependants of deceased mariners, and total expenditure during the year 1961-62 was £40,369, compared with £43,570 in 1960-61.

## CHAPTER XXVIII

### INTERNATIONAL RELATIONS

#### § 1. International Exchange of Representatives

**1. The Department of External Affairs.**—The Australian Department of External Affairs was first set up in 1901, the year of federation. It dealt with United Kingdom relations, the administration of Papua, matters arising out of Australia's position in the Pacific, and immigration. The original department was abolished in 1916, and re-established in 1921 to deal with League of Nations matters, under the direction of the Secretary of the Prime Minister's Department, who was also Secretary for External Affairs. In 1935, External Affairs was separated from the Prime Minister's Department and became an independent Department, but Australia had no direct diplomatic representation in foreign countries until 1940. The number of diplomatic officers has risen from five in 1935 to 205, including eight women, in 1963.

**2. Australian Missions Overseas.**—In May, 1963, Australia had diplomatic or consular representatives in 39 countries in addition to United Nations Missions in New York and Geneva. There is also an Australian Mission accredited to the European Economic Community in Brussels. An External Affairs Officer is attached to the Australian Government Trade Commission in Hong Kong.

The Department of External Affairs is responsible for all Missions overseas, except the High Commissioner's Office, London which is the responsibility of the Prime Minister's Department, the Trade Commissioner Service which is the responsibility of the Department of Trade, and the Australian Migration Mission in Austria which is the responsibility of the Department of Immigration.

The following list shows the addresses of the various Australian diplomatic and consular representatives overseas. Full details of permanent Australian missions overseas may be obtained from publications issued by the Department of External Affairs, Canberra.

#### AUSTRALIAN MISSIONS OVERSEAS

##### (i) *Embassies* (23)—

##### **Ambassador Extraordinary and Plenipotentiary to—**

*Argentina*—Calle Rivadavia 1829, Piso 5, Plaza San Martin, Buenos Aires.

*Belgium*—Boulevard Brand Whitlock, No. 4 Woluwe—St. Pierre, Brussels.

*Brazil*—Caixa Postal 251, Rio de Janeiro.

*Burma*—88 Strand Road, Rangoon.

*Cambodia*—94 Moha Vithei Preah, Norodom, Phnom Penh.

*France*—13 Rue Las Cases, Paris 7E.

*Germany, Federal Republic of\**—Kölner Strasse 157, Bad Godesburg, Bonn.

*Indonesia*—Pegangsaan Barat 14, Djakarta.

*Ireland*—33 Fitzwilliam Square, Dublin.

*Israel*—145 Hayarkon Street, Tel Aviv.

*Italy*—Via Sallustiana 26, Rome.

*Japan*—No. 9 Mita, Tsuna-Machi, Minato-ku, Tokyo.

*Korea*—32-10 Songwol-dong, Suda Moon-Koo, Seoul.

\* The Australian Ambassador is also head of the Australian Military Mission in Berlin.

*Laos*—Quartier Phone Xay, Vientiane.

*Nepal*—Theatre Communication Building, Connaught Place, New Delhi, India.

*The Netherlands*—18 Lange Voorhout, The Hague.

*The Philippines*—L & S Building, 1414 Dewey Boulevard, Manila.

*South Africa*—714 North Vaal, 227 Vermeulen Street, Pretoria.

*Thailand*—323 Silom Road, Bangkok.

*Union of Soviet Socialist Republics*—13 Kropotkinsky Pereulok, Moscow.

*United Arab Republic*—1097 Corniche el Nil, Garden City, Cairo.

*United States of America*—1700 Massachusetts Avenue, Washington, D.C.

*Vietnam*—Caravelle Building, Place Lam Son, Saigon.

(ii) *High Commissions* (10)—

**High Commissioner in—**

*Britain*\*—Australia House, The Strand, London, W.C.2.

*Canada*—Royal Bank Chambers, 100 Sparks Street, Ottawa.

*Ceylon*—3 Cambridge Place, Colombo.

*Ghana*—Ghana House, Accra.

*India*†—Theatre Communication Building, Connaught Place, New Delhi.

*Malaysia*—44 Ampang Road, Kuala Lumpur.

*Singapore Office*—MacDonald House, Orchard Road, Singapore 9.

*New Zealand*—Government Life Insurance Building, Customs House Quay, Wellington 4.

*Nigeria*—Investment House, 21/25 Broad Street, Lagos.

*Pakistan*—9 Kutchery Road, Karachi 4.

*Tanganyika*—Mercury House, Suliman ben Nassor Street, Dar-es-Salaam.

(iii) *Legations* (1)—

**Envoy Extraordinary and Minister Plenipotentiary to—**

*Sweden*—Sergels Torg 12, Stockholm C.

(iv) *Other* (11)—

**Military Mission in—**

*Germany, Federal Republic of*—Olympia Stadium, Charlottenburg 9, Berlin.

**Mission to—**

*European Economic Community*—Head, Sir Edwin McCarthy, C.B.E. (resident in London).

*United Nations* (New York)—750 Third Avenue, New York 17, N.Y.

*United Nations* (Geneva)—254 route de Lausanne, Pregny, Geneva.

**Consul-General in—**

*Greece*—15 Valaoritou Street, Athens.

*Switzerland*—254 route de Lausanne, Pregny, Geneva.

*United States of America* (New York)—International Building, 636 Fifth Avenue, New York 20, N.Y.

*United States of America* (San Francisco)—Qantas Building, 350 Post Street, Union Square, San Francisco, Cal.

**Consul in—**

*Denmark*—Norrevold 68, Copenhagen.

*New Caledonia*—45 Tce. Rue du Verdun, Noumea.

*Portuguese Timor*—Dili.

\* Administered by Prime Minister's Department.

† The Australian High Commissioner in India is currently Ambassador to Nepal.

3. **Diplomatic Representatives in Australia.**—There are 32 non-Commonwealth and eight Commonwealth countries represented by diplomatic missions in Australia.

The following list shows the addresses of the overseas representatives in Australia. Full details of Commonwealth and foreign representation in Australia may be obtained from publications issued by the Department of External Affairs, Canberra. Consular representatives are not included. Particulars of these are contained in a publication *Consular Representatives and Trade Commissioners in Australia*, issued by the Department of External Affairs, Canberra. There are more than 180 such representatives in Australia, and 53 countries are represented.

#### DIPLOMATIC REPRESENTATIVES IN AUSTRALIA

##### (i) *Embassies* (25)—

###### Ambassador Extraordinary and Plenipotentiary of—

- Argentina*—5a Arkana Street, Yarralumla, Canberra, A.C.T.
- Belgium*—19 Arkana Street, Yarralumla, Canberra, A.C.T.
- Brazil*—31 Jardine Street, Kingston, Canberra, A.C.T.
- Burma*—85 Mugga Way, Red Hill, Canberra, A.C.T.
- Cambodia*—5 Canterbury Crescent, Deakin, Canberra, A.C.T.
- China*—58 Captain Cook Crescent, Griffith, Canberra, A.C.T.
- France*—6 Darwin Avenue, Acton, Canberra, A.C.T.
- Germany, Federal Republic of*—Empire Circuit, Yarralumla, Canberra, A.C.T.
- Greece*—22 Arthur Circle, Forrest, Canberra, A.C.T.
- Indonesia*—4 Hotham Crescent, Deakin, Canberra, A.C.T.
- Ireland*—Ainslie Building, 39 Ainslie Avenue, Civic Centre, Canberra, A.C.T.
- Israel*—Turrana Street, Yarralumla, Canberra, A.C.T.
- Italy*—27 State Circle, Deakin, Canberra, A.C.T.
- Japan*—3 Tennyson Crescent, Forrest, Canberra, A.C.T.
- Korea*—50 Darling Point Road, Darling Point, N.S.W.
- The Netherlands*—120 Empire Circuit, Yarralumla, Canberra, A.C.T.
- The Philippines*—1 Arkana Street, Yarralumla, Canberra, A.C.T.
- Portugal*—22 Bougainville Street, Manuka, Canberra, A.C.T.
- South Africa*—Green Square, Jardine Street, Kingston, Canberra, A.C.T.
- Switzerland*—37 Stonehaven Crescent, Deakin, Canberra, A.C.T.
- Thailand*—1 Fraser Place, Yarralumla, Canberra, A.C.T.
- Union of Soviet Socialist Republics*—78 Canberra Avenue, Griffith, Canberra, A.C.T.
- United Arab Republic*—83 Endeavour Street, Red Hill, Canberra, A.C.T.
- United States of America*—Yarralumla, Canberra, A.C.T.
- Vietnam*—39 National Circuit, Forrest, Canberra, A.C.T.

##### (ii) *High Commissioners* (7)—

###### High Commissioners for—

- Britain*—Commonwealth Avenue, Canberra, A.C.T.
- Canada*—Commonwealth Avenue, Canberra, A.C.T.
- Ceylon*—35 Empire Circuit, Forrest, Canberra, A.C.T.
- India*—63 Mugga Way, Red Hill, Canberra, A.C.T.
- Malaysia*—71 State Circle, Acton, Canberra, A.C.T.
- New Zealand*—M.L.C. Building, London Circuit, Civic Centre, Canberra, A.C.T.
- Pakistan*—Jardine Street, Kingston, Canberra, A.C.T.

(iii) *Legations (7)*—**Envoy Extraordinary and Minister Plenipotentiary of—***Austria*—Ainslie Building, 39 Ainslie Avenue, Civic Centre, Canberra, A.C.T.*Chile*—3 Aston Gardens, Bellevue Hill, Sydney, N.S.W.*Denmark*—115 Pitt Street, Sydney, N.S.W.*Finland*—537 New South Head Road, Double Bay, Sydney, N.S.W.*Peru*—7 Blaxland Crescent, Griffith, A.C.T.*Sweden*—Turrana Street, Yarralumla, Canberra, A.C.T.*Uruguay*—55 Mugga Way, Red Hill, Canberra, A.C.T.(iv) *Other (1)*—**Commissioner for—***Malta*—31 Clowes Street, South Yarra, Melbourne, Vic.

4. **Oversea Publicity.**—An Australian News and Information Bureau was established by Cabinet in March, 1950, to take over the functions previously carried out by the wartime Department of Information. The Bureau's principal functions are to make Australia more widely and favourably known overseas, to help other countries understand Australia's outlook, endeavours and potentialities and to foster good relationships in all Australian dealings with other countries. Its overseas organization consists of Bureaux in London and New York, Information Attaché posts at Australian diplomatic missions in The Hague, Bonn, New Delhi, Karachi, Djakarta, Singapore, Kuala Lumpur and Bangkok, and an Assistant Trade Commissioner (Public Relations) at Singapore. The Bureau provides a service of publicity material to all these officers and also to other Australian diplomatic, trade and migration missions abroad. In addition, it provides, on secondment to the Department of External Affairs, a Press Attaché at the Australian Embassy in Washington.

5. **The Trade Commissioner Service.**—The Department of Trade maintains Trade Commissioners in 27 countries. The first permanent Trade Commissioner Post was set up in Canada in 1929. Before that, Australia's only official trade representatives abroad were in the High Commission Office in London and at the Office of the Commissioner General for Australia in New York. By May, 1963, Trade Commissioners were established at the following posts: United States of America—New York, Chicago, Washington and San Francisco; Canada—Vancouver, Ottawa and Montreal; West Indies—Trinidad; Britain and Europe—London, Athens, Paris, Bonn, Stockholm and Rome; Africa—Accra, Nairobi, Salisbury and Johannesburg; United Arab Republic—Cairo; Lebanon—Beirut; India—New Delhi, Bombay and Calcutta; Ceylon—Colombo; South-East Asia—Singapore, Djakarta, Kuala Lumpur, Bangkok and Hong Kong; Japan—Tokyo; New Zealand—Wellington, Christchurch and Auckland; Philippines—Manila; Pakistan—Karachi; South America—Caracas and Lima. Twenty-eight editions of the Department of Trade's promotion periodical "Austral News" now circulate in 80 countries. (*See also* Australian Trade Missions, § 4 of Chapter XIII. Oversea Trade, p. 544.)

The addresses of Australian Trade Commissioner Posts overseas, and of Trade Commissioners of overseas Governments in Australia, are shown in the following lists.

(i) *Trade Commissioner Service of the Commonwealth of Australia in—**Britain*—Australia House, The Strand, London, W.C.2.*Canada*—Phillips Square Building, 1255 Phillips Square, Montreal, P.Q.; Burrard Building, 1030W Georgia Street, Vancouver 5, B.C.; Royal Bank Chambers, 90 Sparks Street, Ottawa.*Ceylon*—3 Cambridge Place, Colombo.*France*—2nd Floor, 26 Rue de la Pepiniere, Paris. 8E.*Germany, Federal Republic of*—Kolner Strasse 157, Bad Godesberg, Bonn.*Ghana*—Barclay's Bank Building, High Street, Accra.*Greece*—15 Valaoritu Street, Athens.*Hong Kong*—Union House, Connaught Road Central, Hong Kong.

*India*—Mercantile Bank Building, 52 Mahatma Gandhi Road, Bombay 1; 2 Fairlie Place, Calcutta 1; 34 Golf Links Road, New Delhi.

*Indonesia*—Djalon Nusantara 39, Djakarta.

*Italy*—Via Sallustiana, 26, Rome.

*Japan*—Masonic Building, 13 Sakae-che, Shiba, Minato-ku, Tokyo.

*Kenya*—Silo Park House, Queensway, Nairobi.

*Lebanon*—L'Union de Paris Building, Rue Maamari, Beirut.

*Malaysia*—44 Ampang Road, Kuala Lumpur.

*New Zealand*—London and Lancashire Building, 56 Shortland Street, Auckland; Phoenix Building, 91 Worcester Street, Christchurch; Government Life Insurance Building, Customs House Quay, Wellington.

*Pakistan*—9 Kutchery Road, Karachi 4.

*Peru*—Monterosa Buildings, Jiron Arica 837, Lima.

*The Philippines*—L. & S. Building, 1414 Dewey Boulevard, Manila.

*Rhodesia and Nyasaland, Federation of*—Central Africa House, Cnr. First Street and Gordon Avenue, Salisbury.

*Singapore*—MacDonald House, Orchard Road, Singapore 9.

*South Africa*—Cavendish Chambers, Jeppe and Kruis Streets, Johannesburg.

*Sweden*—Sergels Torg 12, Stockholm 40.

*Thailand*—323 Silom Road, Bangkok.

*United Arab Republic*—1097 Corniche el Nil, Garden City, Cairo.

*United States of America*—3148 Cleveland Avenue, N.W., Washington, D.C.; International Building, 636 Fifth Avenue, New York 20, N.Y.; Qantas Building, 350 Post Street, Union Square, San Francisco, Cal.; 6 North Michigan Avenue, Chicago 2, Ill.

*Venezuela*—Apartado 6481, Caracas.

*West Indies, Federation of*—72-74 South Quay, Port of Spain, Trinidad.

(ii) *Trade Correspondents and Marketing Officers*—

Australian Trade Correspondents and Marketing Officers have no official status but supplement the work of the Trade Commissioner Service. Correspondents are located in Suva, Fiji; Taipei, Taiwan; Honolulu, Hawaii; Valletta, Malta; Curepipe, Mauritius; Mexico City, Mexico; Montevideo, Uruguay; Madrid, Spain; and Istanbul, Turkey. Marketing Officers are located in Rangoon, Burma; Port Louis, Mauritius; and Los Angeles, U.S.A.

(iii) *Trade Commissioners of Oversea Governments in Australia*—

*Britain*—Senior British Trade Commissioner—Commonwealth Avenue, Canberra, A.C.T.

British Trade Commissioners—Assurance House, 16-20 Bridge Street, Sydney, N.S.W.; 224 Queen Street, Melbourne, Vic.; M.L.C. Building, Cnr. Adelaide and Edward Streets, Brisbane, Qld.; F.C.A. Building, Franklin Street, Adelaide, S.A.; Prudential Building, 189 St. George's Terrace, Perth, W.A.

*Canada*—Canadian Trade Commissioners—A.M.P. Building, Circular Quay, Sydney, N.S.W.; 2 City Road, South Melbourne, Vic.

*Ceylon*—Ceylon Trade Commissioner—The Wales House, 66 Pitt Street, Sydney, N.S.W.

*India*—Indian Trade Commissioner—Caltex House, 167-187 Kent Street, Sydney, N.S.W.

*Malaya*—Malayan Trade Commissioner—71 State Circle, Acton, A.C.T.

*New Zealand*—Senior New Zealand Trade Commissioner—14 Martin Place, Sydney, N.S.W.

New Zealand Government Trade Commissioner—428 Collins Street, Melbourne, Vic.

6. **Specialist Attachés and Missions.**—The Department of Immigration has Missions or officers in Austria, Britain, Belgium, Denmark, France, Greece, Hong Kong, Italy, The Netherlands, Spain, Sweden, United Arab Republic and West Germany. There are Joint Service Staff Missions in London and Washington, and Armed Service Attachés at a number of other diplomatic posts. There is a Scientific Attaché in Washington and specialist officers from other Commonwealth Government Departments are attached to Australian diplomatic missions when necessary.

7. **Agents-General for States.**—From early times, the Australian colonies maintained agents in London to encourage immigration and to carry out commercial and financial negotiations. Since federation, the States have continued to maintain Agents-General in London, all of whom work in close co-operation with the High Commissioner for Australia at Australia House, The Strand, London. The addresses of these Agents-General are as follows:—*New South Wales.*—56–57 Strand, London, W.C.2. *Victoria.*—Victoria House, Melbourne Place, Strand, London, W.C.2. *Queensland.*—Marble Hall, 409–10 Strand, London, W.C.2. *South Australia.*—South Australia House, 50 Strand, London, W.C.2. *Western Australia.*—Savoy House, 115 Strand, London, W.C.2. *Tasmania.*—457 Strand, Charing Cross, London, W.C.2.

## § 2. Australian Participation in United Nations

Australia played an active part in drafting the Charter of the United Nations at the Conference on International Organization in San Francisco in 1945 and has been a consistent supporter of the principles and objectives of the United Nations since its foundation. Australia's influence in the affairs of the United Nations has been exerted primarily through the annual debates in the General Assembly, through membership of the Security Council (1946–47 and 1956–57), the Economic and Social Council (1948–50, 1953–55 and for a three-year term from 1st January, 1962), and through the Trusteeship Council. By virtue of responsibilities for administration of the Trust Territories of Nauru and New Guinea, Australia has been a member of the Trusteeship Council since it was established. Australia has also been a member of a number of important subsidiary bodies. In 1961, Australia was appointed a member of the Committee of Twenty-four—a committee established by the General Assembly to implement Resolution 1514 (XV), the declaration on the granting of independence to colonial countries and peoples.

An Australian was elected President of the General Assembly in 1948 and Australia has held a Vice-Presidency on three occasions—the Fifth (1950), Thirteenth (1958) and Seventeenth Sessions. An Australian was chairman of the Second (Economic) Committee of the General Assembly in 1954 and President of the Economic and Social Council in 1955. In 1957, Sir Percy Spender was elected to the International Court of Justice.

In 1947, Australian representatives served on two United Nations investigatory bodies set up to inquire into situations involving threats to the peace. One Commission was directed by the Security Council to investigate alleged violations of Greece's frontiers by her northern neighbours and the other was established by the General Assembly to investigate the Palestine problem. In 1948 and 1949, Australia served on the United Nations Good Offices Committee (later renamed the United Nations Commission for Indonesia) and played a prominent role in the negotiation of a settlement between the Netherlands and the Republic of Indonesia.

In 1950, Australia joined 15 other member States in answering the Security Council's call to help the Republic of Korea to repel Communist aggression from the north. Both earlier and subsequently, Australia played a prominent part on successive commissions established by the United Nations in an attempt to unify Korea through nation-wide free elections. Australia remains an active member of the United Nations Commission for the Unification and Rehabilitation of Korea (UNCURK), which has its head-quarters at the Korean capital, Seoul.

In several other trouble spots, Australia is also helping the United Nations in its constructive and stabilizing task. In Kashmir, where fighting broke out between India and Pakistan in 1947, there are a number of Australian Army Officers serving as military observers with a United Nations group charged with the supervision of the cease-fire line. An Australian has for some time been Chief Military Observer, and another served for a period as mediator on behalf of the United Nations. Australian Army officers are attached to the United Nations Truce Supervision Organisation (UNTSO), which was set up to help keep the peace between the Arab States and Israel after the outbreak of hostilities between them in 1948.

In addition to paying its share of the costs of the Congo operation, the Australian Government has contributed \$750,000 towards the United Nations Fund for the Congo and £19,000 towards the costs of sending two Australian Red Cross medical teams to the Congo. Australia has also bought \$4 million of United Nations bonds, the proceeds of which will go towards meeting the costs of the Congo operation. Two Australian officers serving with UNTSO were temporarily seconded to serve with the United Nations force in the Congo.

Australia was a member of the Security Council when it was urgently convened on 28th October, 1956, to consider the Hungarian uprising and the intervention of the Soviet Union to suppress it. In January, 1957, a five-member Special Committee on the Problem of Hungary was established by the General Assembly. The Australian Ambassador to the Philippines was a member of this Committee and was appointed rapporteur. The Australian Government assisted the United Nations cause by accepting large numbers of Hungarian refugees and helped the Special Committee by having inquiries conducted among the refugees in Australia on matters of concern to it.

In July, 1958, following the report of the Committee on the executions of Nagy and some of his associates, the Assembly adopted an Australian proposal that the Hungarian question be inscribed on the agenda of the 13th (1958) regular session of the General Assembly. Australia has since supported consideration of the Hungarian question at each subsequent session of the General Assembly.

The Australian Government has participated actively in United Nations deliberations on disarmament, and has been a member of the United Nations Disarmament Commission since 1958. Australia is also closely concerned with the possibilities of international co-operation in the peaceful uses of outer space to ensure that all mankind shares the potential benefits of its exploitation. Australia's capacity to make a worthwhile contribution has been shown by experience in rocketry and related subjects and by the practical results obtained in Australia in the tracking of satellites launched by the U.S.S.R. and by the United States of America. This was recognized by the Assembly's inclusion of Australia in the United Nations Committee on the Peaceful Uses of Outer Space, established at the General Assembly in 1958. In 1962, an Australian was elected Chairman of the Scientific and Technical Sub-Committee of the Committee on the Peaceful Uses of Outer Space.

In the economic, social and cultural sphere, Australia has contributed to the work of the United Nations through membership of all its specialized agencies and of the Economic and Social Council. Australia is a foundation member of one of the four regional economic commissions, the Economic Commission for Asia and the Far East, and the fourth and 15th sessions of ECAFE were held in Australia.

Australia has had varying periods of service as a member of the executive bodies of the following specialized agencies—the Food and Agriculture Organization (FAO), the United Nations Educational, Scientific and Cultural Organization (UNESCO), the International Labour Organisation (ILO), the World Health Organization (WHO), the World Meteorological Organization (WMO), the International Civil Aviation Organization (ICAO), the International Bank, the International Monetary Fund, the Inter-Governmental Maritime Consultative Organization, the Universal Postal Union (UPU), and the International Telecommunication Union (ITU).

As a leading agricultural country, Australia played a big part in the establishment of FAO and an Australian was independent chairman of the Council of the Organization from 1947 to 1951. From 1947 until 1957 and from 1961 until the end of 1963, Australia was a member of the FAO Council.

Australia is a member of the Board of Governors of the International Atomic Energy Agency, which is concerned with the peaceful uses of atomic energy. Australia is also a member of the United Nations Scientific Committee set up to investigate the effects of atomic radiation. At the 13th (1958) General Assembly, the Australian Minister for External Affairs proposed a unanimously approved resolution calling for the co-ordination, application and dissemination of the results of scientific research. Since then, UNESCO has reported to the Economic and Social Council the results of its world-wide survey of major trends in scientific research for peaceful purposes conducted under the terms of the Australian resolution and, upon the recommendation of his Scientific Advisory Committee, the Secretary-General convened in February, 1963, a Conference on the application of science and technology for the benefit of the less developed areas.

Australia has been represented on the functional commissions of the Economic and Social Council, which have responsibilities in various defined fields of social and economic activity. Australia has been represented on the Statistical Commission (1952-57 and 1960-63), the Commission on Human Rights (1947-56), the Social Commission (1950-52, 1954-56, 1958-61), the Commission on the Status of Women (1947-51, 1955-57, 1961-63), the Population Commission (1947-49 and 1952-53), and the Commission on International Commodity Trade (1955-60, 1962-64).

Australia's contributions towards various forms of international aid through the United Nations and other international organizations for 1962-63 amounted to a little more than \$13,000,000. In 1962-63, Australia made a cash grant of £20 million for the development of Papua and New Guinea.

The Australian Government has contributed £2,925,232 to the United Nations Expanded Programme of Technical Assistance from the inception of the Programme in 1950 up to June, 1962. This was spent on the provision of experts, training, supplies, and equipment to under-developed countries, and supplemented Australian aid under the Technical Co-operation Scheme of the Colombo Plan.

Australian experts sent abroad under the United Nations Technical Assistance programme up to December 31, 1961, totalled 234. Nineteen experts were appointed in 1961. A total of 428 U.N. trainees had come to Australia up to December 31, 1961. Sixty trainees arrived during 1961.

Other contributions by Australia (as at June, 1962) have included £22,522,000 to the United Nations Relief and Rehabilitation Administration (UNRRA), £3,297,056 to the International Refugee Organization, £1,830,000 to Post-UNRRA Relief; £6,067,993 for food and medical supplies to the United Nations Children's Fund (UNICEF), which has been helping the under-privileged children of the world since its establishment in 1946; £1,799,000 of essential supplies to the United Nations Korean Reconstruction Agency; £1,299,999 of supplies to the United Nations Relief and Works Agency for Palestine refugees; £478,950 for the programmes of the United Nations High Commissioner for Refugees; £155,000 for the relief of Hungarian refugees; £47,500 for the WHO Malaria Eradication Special Account and £201,600 to the World Food Programme. Australia's assistance to the United Nations Children's Fund was recognized by the election of an Australian as chairman of the Executive Board for 1959. Australia was a member of the Board from 1947 to 1961.

Australia has also contributed £214,985 to the Intergovernmental Committee for European Migration's programme for providing transportation from Hong Kong to countries of resettlement for refugees of European origin coming out of Mainland China.

In addition, Australia has made significant contributions to the development funds of international financial institutions; to June, 1963, these amounted to £21,255,000 to the International Bank for Reconstruction and Development, £989,000 to the International Finance Corporation, and £3,255,000 to the International Development Association.

In connexion with the United Nations-sponsored World Refugee Year in 1959, the Australian Government made a contribution of £50,000, and various voluntary organizations and private companies, including the United Nations Association of Australia and the Australian Red Cross Society, raised more than £700,000 for this appeal.

The Australian delegation to the United Nations Conference on the Law of the Sea in 1958 was led by the Commonwealth Solicitor-General. The Conference adopted four conventions dealing with—(i) the territorial sea and the contiguous zone; (ii) the high seas; (iii) fishing and conservation of the living resources of the high seas, and (iv) the continental shelf. These conventions were open for acceptance by States. Each will come into force when it has been accepted by 22 States. No decision was reached on the important question

of the breadth of the territorial sea and the exclusive rights of coastal states over fishing in the zone of the high seas adjacent to their territorial sea. The Convention on the Continental Shelf had the effect of endorsing Australia's claims over its continental shelf and the natural resources of the shelf, as made in a Proclamation of September 11, 1953. It recognizes that a coastal state may exercise sovereign rights over the shelf for the purpose of exploring it and exploiting its natural resources.

Australia served as a member of the Governing Body of the International Labour Organisation, either as a Titular Government member, or as a Deputy member, from 1945 to 1960, and has been represented by Government delegates and by the delegates nominated by workers' and employers' organizations on the I.L.O. Industrial Committees dealing with the special problems of the industries of major importance to this country, including the Textiles Committee and the Metal Trades Committee. At the 47th Session of the International Conference in 1963, Australia was elected to the Governing Body as a Titular Government member for a three year term.

Australia has also been a prominent member of I.C.A.O. since its inception and at the last I.C.A.O. Conference (1962) was re-elected to the I.C.A.O. Council as one of the nine States of principal civil aviation importance.

### § 3. Commonwealth Relations

Australia is a fully self-governing member of the Commonwealth of Nations with allegiance to Queen Elizabeth II as Sovereign and Head of the Commonwealth, is represented at meetings of Commonwealth Prime Ministers, is a member of the Commonwealth Economic Consultative Council, belongs to the Sterling Area, retains, with limitations, the system of judicial appeal to the Privy Council, and maintains High Commissioners in the majority of other Commonwealth countries.

So far as Australia is concerned, Queen Elizabeth II is not only Head of the Commonwealth but a constitutional sovereign represented by a Governor-General appointed by her on the advice of the Australian Government.

The Australian Prime Minister regularly attends meetings of Commonwealth Prime Ministers in London.

Between meetings of Commonwealth Prime Ministers, the Australian Prime Minister has full constitutional authority to consult with other Commonwealth Prime Ministers on any subject. In addition, there is a constant flow of messages between the Australian Government and governments of other Commonwealth countries. In this process of inter-Commonwealth consultation, High Commissioners are the normal agents.

Australia is regularly represented at meetings of Commonwealth Finance and Foreign Ministers and at Commonwealth Trade and Education meetings.

In defence matters, Australian armed services send representatives to discussions by Commonwealth Chiefs of Staff, Australian naval ships take part in combined exercises with the navies of other Commonwealth members, and Australian officers maintain liaison with the service of other Commonwealth countries.

Australia or Australians also take an active interest in the many semi-official and unofficial bodies which exist to foster and strengthen Commonwealth bonds, such as the Commonwealth Parliamentary Association, the Association of Universities of the British Commonwealth, the Commonwealth Press Union, the Royal Commonwealth Society and similar organizations.

### § 4. The Colombo Plan

1. *General.*—The Colombo Plan originated at a meeting of Commonwealth Foreign Ministers in Colombo in January, 1950. The meeting set up a Consultative Committee for co-operative Economic Development in South and South-East Asia. The task of this Committee was to devise the most effective means of tackling the problems of economic development in the area and of focusing world attention on them.

The original participants in the Plan were Australia, Canada, Ceylon, India, New Zealand, Pakistan, and the United Kingdom, with the United Kingdom territories in South and South-East Asia—all members of the Commonwealth of Nations. It was not, however, initiated as an exclusively Commonwealth venture; invitations were issued to the non-Commonwealth countries in the area to join, and it was hoped that Governments of countries outside the area, who could make valuable contributions to the Plan's objectives, would also participate. The United States joined in 1951 and it was available to other countries to enter on equal terms with those already participating.

Those which subsequently entered were Burma, Cambodia, Indonesia, Japan, Laos, Nepal, the Philippines, Thailand, Viet Nam, Korea and Bhutan. The Plan thus took in virtually all the countries constituting what is known as South and South-East Asia.

The Plan may be divided into two sections: Technical Co-operation and Economic Development.

2. **Technical Co-operation.**—The table below summarizes the value of aid provided under the Technical Co-operation Scheme to individual countries by Australia up to 31st December, 1962.

**AUSTRALIA: VALUE OF TECHNICAL AID PROVIDED UNDER COLOMBO PLAN TO DECEMBER, 1962**

(£)

Country	Training	Experts	Equipment	Total
Brunei .. ..	24,476	523	..	24,999
Burma .. ..	529,953	47,981	174,374	752,308

Viet Nam .. ..	255,711	138,083	205,773	599,567
<b>Total .. ..</b>	<b>6,626,207</b>	<b>1,909,684</b>	<b>1,954,472</b>	<b>(a) 10,490,363</b>

(a) In addition, £200,000 was spent on the Mekong Regional Project, and miscellaneous expenditure amounted to £241,572.

The amounts under the heading "Equipment" refer to the supply of equipment for education and research: books, tools, instruments, radios, and audio-visual teaching aids. Special items such as medical equipment for many countries, wool-testing equipment for India and equipment for the establishment of an experimental dairy farm at Ben Cat in Vietnam are also included.

3. **Training.**—From the commencement of the Plan until December, 1961, Australia has granted 3,816 training awards. In addition, more than 15,000 private students from Asian countries had received training in Australia.

The fields of training and the numbers involved from each country from the beginning of the Plan until 31st December, 1962, are shown in the following table.

**AUSTRALIA: NUMBER OF TRAINEES UNDER COLOMBO PLAN FROM EACH COUNTRY, BY FIELD OF TRAINING, TO DECEMBER, 1962**

4. Experts.—In the field of health, the main emphasis has been on combating tuberculosis. Australia has provided a Tutor Sister and six Sisters for the T.B. Nurses' Training School at Welisara, Ceylon, a nursing staff of some 40 for the Lady Templer Tuberculosis Hospital at Kuala Lumpur, ten Red Cross nurses and welfare workers for Malaya, and an anti-T.B. team comprising one doctor, two nurses, two laboratory assistants, and one technician for North Borneo. Two occupational therapists and two physiotherapists have gone to Ceylon and Indonesia. In addition, equipment and instruction have been provided for an Artificial Limb Centre at the National Orthopaedic Hospital, Manila.

Australian medical specialists and their assistants have visited Burma, India, Pakistan, Malaya, Indonesia, Ceylon, the Philippines, Thailand and Singapore, conducting surveys and giving demonstrations and lectures. The Royal Australian College of Surgeons has held Primary Fellowship examinations in Singapore in 1957, 1958 and 1961, with the Colombo Plan financing the visits of examiners, and of instructors to give preparatory courses.

In the field of agriculture, Australia's largest contributions have been in the Commonwealth Livestock Development and Research Farm in the Thal region of Pakistan, and an experimental dairy farm at Ben Cat in Vietnam.

In engineering, Australian visiting experts have been concerned largely with instruction in the operation and maintenance of equipment which has been supplied under the economic development programme. Australia has sent six tractor technicians to Pakistan, five to Ceylon, one to Cambodia, Laos and Vietnam, and seven bus technicians and administrators to Indonesia. Ten instructors were provided for a printing school in Indonesia, and instructors in bricklaying, carpentry, building trades and motor mechanics for Malaya.

The following is a summarized list of Australian Colombo Plan experts provided as at 31st December, 1962.

**AUSTRALIA: EXPERTS PROVIDED UNDER COLOMBO PLAN TO  
DECEMBER, 1962**

Country	On assignment	Completed	Total
Brunei .. .. .	..	1	1

Thailand .. .. .	1	24	25
Vietnam .. .. .	2	18	20
Regional (Mekong Project) .. .. .	9	15	24
<b>Total .. .. .</b>	<b>51</b>	<b>458</b>	<b>509</b>

At 30th June, 1963, 71 experts were in the field and 479 assignments had been completed. In addition, by 30th June, 1963, Australia had provided 108 advisers to Colombo Plan countries, and one adviser was still in the field.

**5. Correspondence Scholarships.**—In April, 1955, correspondence courses for rural and clerical occupations, trades and professions were offered to the nominees of the Colombo Plan Governments. At 31st December, 1962, 11 countries were participating and 3,150 trainees were enrolled for correspondence courses under this scheme.

Trades courses offered include a preparatory trade course, fitting and machining, blacksmithing, automotive mechanics, sheet metallurgy, boilermaking, electrical fitting, electrical mechanics, automotive electrical, electrical refrigeration, carpentry, plumbing, house painting and decorating, hand composing, linotype composing, letterpress machining, bookbinding, radio mechanics and retail distributing. There is also a course of teaching methods for technical instructors.

The professional courses available in the technical fields now comprise architecture, building construction, radiography, land surveying, and engineering (civil, aeronautical, automotive, chemical, electrical, mechanical, metallurgical, mining and production).

Clerical and accounting courses available include shorthand, typewriting, bookkeeping, business principles and commercial correspondence, and accounting (syllabus of Australian Society of Accountants). A course in office practice was added in 1956 at the request of Asian countries.

Academic courses offered include Pure Mathematics I, Economics I, Statistics, Education I, English Literature I, History I, and Philosophy I.

Rural courses include agriculture, animal husbandry, farm mechanics, farm management and economics.

6. **Economic Development.**—The following table shows Australia's contribution to individual countries in respect of economic development as at 31st December, 1962.

**AUSTRALIA: CONTRIBUTIONS TO COLOMBO PLAN COUNTRIES FOR  
ECONOMIC DEVELOPMENT, TO DECEMBER, 1962**  
(£)

Country							Capital aid
Burma	..	..	..	..	..	..	628,730
Cambodia	..	..	..	..	..	..	770,741
Ceylon	..	..	..	..	..	..	3,215,592

Viet Nam	..	..	..	..	..	..	1,290,825
Miscellaneous expenditure	..	..	..	..	..	..	241,572
<b>Total</b>	..	..	..	..	..	..	<b>(a) 33,922,784</b>

(a) The contributions up to June, 1963, amounted to £35,790,500.

Projects which have received Australian assistance include irrigation schemes in Pakistan, Ceylon and Indonesia; diesel locomotives and railway rolling stock for Pakistan, Malaya, India, Cambodia and Thailand; tractors, bulldozers, road rollers and earthmoving equipment for the Tungabhadra project in India as well as electrical gear for India's Ramagundam project; irrigation pumps for Burma; buses, tractors and telecommunications equipment for Indonesia; lignite preparation plant for Thailand, communications and agricultural equipment for Pakistan, Vietnam, Cambodia, Laos and Nepal; equipment for essential municipal services in Cambodia, Malaya, Pakistan and Vietnam.

Australia continues to believe that its facilities and experience can be of most value in the fields of technical assistance to help raise the level of skills in Asian member countries.

This involves the training not only of technicians, but also of professional and administrative staff to provide a sound administrative framework in which economic development can be planned and implemented.

## § 5. ANZUS and SEATO

1. **ANZUS Council.**—On 1st September, 1951, in connexion with the re-establishment of peace with Japan, Australia, New Zealand and the United States of America signed a Security Treaty, pursuant to Articles 51 and 52 of the United Nations, which provided that in the event of an armed attack on any one of them in the Pacific, each of the three would act to meet the common danger in accordance with its constitutional processes. The instruments of ratification were deposited in Canberra on 29th April, 1952, on which date the Treaty came into force.

The machinery of the ANZUS Treaty comprises a Council, composed of the three Foreign Ministers or their Deputies. The Council meets periodically for consultation on matters of mutual concern to the parties to the Treaty.

The Council has met twelve times since the Treaty entered into force. The Twelfth Council Meeting was held in Wellington on 5th-6th June, 1963. It was attended by the New Zealand Prime Minister, Mr. Holyoake, the United States Under-Secretary of State for Political Affairs, Mr. Harriman, and the Australian Minister for External Affairs, Sir Garfield Barwick.

2. **SEATO.**—Following the cessation of fighting in Indo-China, under the terms of the armistice that led to the Geneva Agreements, the Australian Prime Minister announced on 5th August, 1954, that plans were in hand to establish a South-East Asia Defence Organization. He said it was hoped that the countries of Asia would participate when it was seen that such an organization was designed to help preserve the national integrity of Asian as well as non-Asian countries. Australia would become a contributory party and would, in association with other nations acting similarly, accept military obligations in support of its membership. He said that it has been a tradition of Australian Governments that commitments were not accepted in advance and that such matters were for the determination of the Government and Parliament if and when war occurred.

In September, 1954, Australia, France, New Zealand, Pakistan, the Philippines, Thailand, the United Kingdom and the United States of America signed a collective defence treaty at Manila after a three-day conference. They also signed a Pacific Charter stating the principles on which they had acted. A protocol to the Treaty extended its operation to Cambodia, Laos and South Vietnam. The security provisions of the Treaty are as follows:— Each Party recognizes that aggression by means of armed attack in the Treaty Area against any of the Parties or against any State or territory which the Parties by unanimous agreement may hereafter designate, would endanger its own peace and safety, and agrees that it will in that event act to meet the common danger in accordance with its constitutional processes. Measures taken under this paragraph shall be immediately reported to the United Nations (Article IV. (1)).

If, in the opinion of any of the Parties, the inviolability or the integrity of the territory or the sovereignty of political independence of any Party in the Treaty Area or of any other State or territory to which the provisions of paragraph 1 of this Article from time to time apply is threatened in any way other than by armed attack or is affected or threatened by any pact or situation which might endanger the peace of the area, the Parties shall consult immediately in order to agree on the measures which should be taken for the common defence (Article IV. (2)).

In 1956, the Australian Government instituted a SEATO Aid Programme under which, by 1962, a total of £3,000,000 worth of aid had been given to member countries in Asia to help them to discharge their defence responsibilities. In May, 1962, the expenditure of a further £3,000,000 was authorized under the programme during the three years to 1965. Under the scheme, Australia has provided a survey vessel for the Philippines Bureau of Coast and Geodetic Survey and is currently undertaking the construction of a second survey vessel; Thailand and the Philippines have received a wide range of useful equipment for the fighting services—ambulances, staff cars, uniform cloth, tents, tarpaulins, medical and dental supplies—and the establishment near Bangkok of a Military Vehicle Base Workshop under joint Thai/Australian auspices has commenced; telecommunications equipment and tractors have gone to Pakistan which has also received electronic welding and refrigeration training equipment for its military training institutions; a Military Technical Training School, established in Bangkok, has been completely equipped by Australia, and Australian instructors have been provided for it; Vietnam has received quantities of barbed wire and corrugated iron for use in housing and protecting villagers. Australia has also provided training for many servicemen from SEATO countries in Asia.

## CHAPTER XXIX

### MISCELLANEOUS

NOTE.—This chapter comprises miscellaneous statistics and other descriptive information not directly related to the subjects of the preceding chapters, arranged in sections as follows:—

1. Valuation of Australian Production; 2. Indexes of Production; 3. Consumption of Foodstuffs and Beverages; 4. Retail Trade; 5. Statistical Organization in Australia; 6. Statistical Publications of Australia.

Matter included in this chapter in the previous issue referring to Patents, Trade Marks and Designs, Copyright, The United Nations, and Australian Representation Abroad and Oversea Representation in Australia has been transferred to Chapter XVI. Public Justice and Chapter XXVIII. International Relations.

In previous issues of the Year Book (*see* No. 48, p. 1166), a list of *Australian Books* has been included. This list, compiled by the Librarian of the Commonwealth National Library is available from the Library, but considerations of space preclude its publication in this issue.

#### § 1. Valuation of Australian Production

1. *General*.—The value of production for Australia is computed in accordance with the decisions reached at the Conferences of Australian Statisticians and principally at the Conference held in 1935. The figures published on pp. 1236–7 have been compiled by the Statisticians in the various States from the latest data available, and relate to 1961–62. The adoption of substantially uniform methods of valuing production and of estimating elements of costs of production and marketing renders the results comparable as between States.

Attention is directed to the fact that the values shown in the tables herein refer only to the production of primary industries and factories, and exclude the building and construction industry, those industrial establishments not classified as factories, and certain agricultural and farmyard produce obtained from areas of less than one acre.

The following is a brief explanation of the terms used.

- (a) *Gross Value of Production* is the value placed on recorded production at the wholesale price realized at the principal markets. In cases where primary products are consumed at the place of production or where they become raw material for a secondary industry, these points of consumption are presumed to be the principal markets.
- (b) *Local Value* (i.e., gross production valued at the place of production) is ascertained by deducting marketing costs from the gross value. Marketing costs include freight, cost of containers, commission, and other charges incidental thereto.
- (c) *Net Value of Production* represents local value less value of materials used in the process of production. Materials used in the process of production include seed, power, power kerosene, petrol and other oils, fodder consumed by farm stock, manures, dips, sprays and other costs. No deductions have been made for depreciation or certain maintenance costs as particulars are not available for all States. The net value of production is the only satisfactory measure to use when comparing or combining the value of primary industries with those of other industries.

For the years shown in the following tables, no allowance for power, power kerosene, petrol and other oils has been made in New South Wales; and in the case of Tasmania, allowance for these items has been made since 1958–59 only. In the case of the mining and quarrying industry, however, this allowance has been made throughout. Costs of materials used in the process of production are not available for all States in respect of Trapping, Forestry and Fisheries, and local values have been used for these industries with consequent overstatement in net values.

2. Value of Production, Australia, 1961-62.—The following table shows particulars of the gross, local and net values of production in Australia by industries.

**GROSS, LOCAL AND NET VALUE OF PRODUCTION OF PRIMARY INDUSTRIES AND FACTORIES: AUSTRALIA, 1961-62**

(b) Local value.

In the chapters dealing with the respective industries, tables will be found showing the value of production and the value per head of population for the industry, by States. In some instances, figures shown therein have been revised, and therefore do not agree with corresponding figures in the preceding tables.

## § 2. Indexes of Production

In the first two tables in this section, indexes of price and quantum (i.e., value at constant prices) of production are given for the following industrial groups:—Agriculture, Pastoral, Farmyard and Dairying, and All Farming combined (including separate indexes for Wool and Products other than wool). In the third table, indexes of quantum (i.e., value at constant prices) of production, exports and consumption of farm products for food use are shown.

1. **Farm Production Price Indexes.**—The Farm Production Price Indexes shown in the following table relate to average “prices” of agricultural, pastoral, farmyard and dairying products realized at the principal markets of Australia. The “price” data used are average unit values for the total quantities of the relevant commodities produced or marketed in each year, and the index numbers therefore measure both the effects of changes in prices (as such) and of variations in the quality, type, usage, etc., of products marketed. The index numbers for any year relate to the average values of products produced or marketed in that year, irrespective of the periods in which payment is received by producers.

The indexes have been calculated by the fixed-base weighted aggregative method. “Prices” for each commodity in any year are obtained by dividing gross value of production by the quantity produced in that year. In the original published series of Production Price Index Numbers, the average quantities of the relevant commodities *produced* in the period 1923–24 to 1927–28 were used as fixed weights. This series, re-computed to the base, average 1936–37 to 1938–39 = 100, was published in earlier issues of the Official Year Book (see No. 43, p. 1050). For 1936–37 and later years, the original series was replaced in December, 1952, by a revised series in which average quantities of each product *marketed* during the period 1946–47 to 1950–51 were used as fixed weights. In the revised series, the regimen was extended and modified to include farm products (as defined by Australian Statisticians) in all cases. Certain other refinements were also incorporated in the revised indexes, the principal of which was the omission from the weights used for the All Farming Index of quantities of crops marketed for livestock feeding in Australia.

### FARM PRODUCTION: INDEXES OF PRICES AT PRINCIPAL MARKETS, AUSTRALIA

(Base: Average 1936–37 to 1938–39 = 100)

Year	Agri- culture	Pastoral	Farmyard and dairying	All farming	Wool (shorn and dead)	Products other than wool
1947–48 .. .. .	267	263	183	247	301	230
1948–49 .. .. .	234	313	197	260	366	225
1949–50 .. .. .	272	396	228	316	483	261
1950–51 .. .. .	291	818	258	505	1,098	308
1951–52 .. .. .	355	501	332	410	552	363
1952–53 .. .. .	364	531	387	440	623	379
1953–54 .. .. .	324	534	395	429	621	365
1954–55 .. .. .	316	489	371	401	540	355
1955–56 .. .. .	330	451	392	397	468	373
1956–57 .. .. .	336	536	386	432	607	374
1957–58 .. .. .	336	435	382	388	473	359
1958–59 .. .. .	322	396	386	369	370	369
1959–60 .. .. .	329	464	402	403	440	391
1960–61 .. .. .	349	443	404	402	397	404
1961–62 .. .. .	348	421	374	385	412	376

2. **Indexes of Quantum (i.e. Value at Constant Prices) of Farm Production.**—The indexes shown in the following table relate to gross output of farm products valued at constant prices. They have been calculated by revaluing quantities of each farm product included in the indexes at the average unit gross value of each product for the base years.

In the original published series, the period 1923–24 to 1927–28 was adopted as the base for revaluing each farm product. This series, re-computed to the base, average 1936–37 to 1938–39 = 100, was published in earlier issues of the Official Year Book (*see* No. 43, p. 1051). For 1936–37 and later years, the original series was replaced in December, 1952, by a revised series in which average unit values for the period 1936–37 to 1938–39 were used. The regimen used for the revised series was extended and modified to include farm products (as defined by Australian Statisticians) in all cases. Certain other refinements were incorporated in the revised indexes, the principal of which was the omission, in calculating the All Farming Index, of quantities of crops fed to livestock in Australia.

### INDEXES OF QUANTUM(a) OF FARM PRODUCTION, AUSTRALIA

(Base: Average 1936–37 to 1938–39 = 100)

Year	Agri- culture	Pastoral	Farmyard and dairying	All farming	Wool (shorn and dead)	Products other than wool
1947–48 .. .. .	122	98	107	109	101	111

1959–60 .. .. .	140	163	123	144	172	136
1960–61 .. .. .	177	152	120	152	165	148
1961–62 .. .. .	163	167	128	158	174	153

(a) Indexes of value at constant prices, i.e., quantities revalued at average unit values for the base years (*see* text preceding table).

3. **Farm Products for Food Use: Indexes of Quantum (i.e. Value at Constant Prices) of Production, Exports and Consumption.**—The indexes shown in the following table have been calculated by revaluing quantities of each farm product included in the indexes at the average unit gross value of each product for the years 1936–37 to 1938–39. The items included comprise products in the form in which they are sold from farms in all cases except live-stock sold for slaughter for meat, which are included in terms of dressed carcass weight of meat. Quantity data relating to exports include exports of processed food in terms of farm product equivalent. The indexes of production relate basically to gross output of farm products for food use, including crops exported for stock-feeding overseas.

# FARM PRODUCTS FOR FOOD USE: INDEXES OF QUANTUM<sup>(a)</sup> OF PRODUCTION, EXPORTS AND CONSUMPTION

(Base: Average 1936-37 to 1938-39 = 100)

Year	Production		Exports		Consumption in Australia	
	Total	Per head of total population	Total	Per head of total population	Total	Per head of total population

1961-62p ..	153	99	160	104	151	98

(a) Indexes of value at constant prices, i.e., quantities revalued at average unit values for the base years, 1936-37 to 1938-39.

## § 3. Consumption of Foodstuffs and Beverages

1. **Quantities Consumed.**—The estimates of total consumption and consumption per head of population in Australia in the two tables which follow have been compiled by deducting net exports from the sum of production and imports and allowing for recorded movements in stocks of the respective commodities. While the estimates may be generally accepted as being reasonably accurate, there are some deficiencies to which attention should be directed. These relate chiefly to the quantities of poultry, game and fish (fresh and shell) and the quantities of visible oils and other fats entering consumption. In addition, little information is available on the quantities of vegetables, fruit, eggs, etc., which householders produce for their own requirements and the extent of wastage occurring in the marketing of foodstuffs. In all these cases, careful estimates have been compiled from the best available data, and the quantities shown as entering consumption in Australia have been adjusted to allow for these circumstances. The absence of particulars for stocks of certain commodities has resulted in some inaccuracies in the estimates of annual consumption. Consumption of foodstuffs is measured in general at "producer" level. As a result, no allowance is made for wastage before the foodstuffs are consumed. In recent years, wastage of foodstuffs has possibly been less than previously because of more efficient distribution and storage methods. Furthermore, it is likely that the quantities of foodstuffs shown in the following pages as available for consumption have been supplemented by production by householders for their own requirements. In most cases, broad estimates of non-commercial (householders') production have been made. Except in a few special cases, no adjustment has been made for changes in stocks held by wholesalers and retailers. Where no allowance is made, it is considered unlikely that these stocks would make any appreciable difference to consumption estimates. Allowance has not been made for the purchase of foodstuffs for dispatch overseas as gifts in bulk and by parcel post. These deficiencies, however, do not seriously impair the accuracy of the estimates compiled.

The estimates of consumption per head of population shown in the second of the following tables have been derived by dividing the total apparent consumption of each commodity or commodity group in a given year by the mean population of Australia in the same period.

More detailed information on the consumption of foodstuffs and beverages is contained in the statistical bulletin: *Report on Food Production and the Apparent Consumption of Foodstuffs and Nutrients in Australia*, issued by this Bureau.

The following tables show the average annual consumption during the three-year periods ended 1938-39, 1948-49, and 1958-59, together with the data for each of the years 1959-60, 1960-61 and 1961-62.

**2. Level of Nutrient Intake.**—The table below shows details of the estimated supplies of nutrients available for consumption in Australia during annual periods since 1959-60 in comparison with the annual average for the three-year periods ended 1938-39, 1948-49 and 1958-59. The table has been compiled by the Nutrition Section of the Commonwealth Department of Health and is based on the estimates of the quantity of foodstuffs available for consumption per head of population shown in the preceding table.

ESTIMATED SUPPLIES OF NUTRIENTS AVAILABLE FOR CONSUMPTION:  
AUSTRALIA

(Per Head per Day)

Nutrient	Unit	Average three years ended—			1959-60	1960-61	1961-62 (a)
		1938-39	1948-49	1958-59

Niacin .. ..	..	18.7	17.6	18.6	18.9	18.0	18.3

(a) Subject to revision. (b) The Vitamin A figures for all periods prior to 1960-61 have been revised on the new basis introduced in 1960-61 of estimating total Vitamin A activity, by summing the Vitamin A content and one-third of the carotene value.

## § 4. Retail Trade

1. **General.**—The statistics in this section relate to the number of retail establishments throughout Australia and the value of retail sales of goods by these establishments.

Information of this nature was first collected in respect of the year ended 30th June, 1948, by a full census of all retail establishments. As this was the first census of its type in Australia, its scope and the data sought were the minima consistent with the objective of securing a record of the number of such establishments, their type, their geographical distribution, their aggregate sales of goods, and a simple commodity dissection, together with a record of the value of certain services provided. This census was followed by a second census of all retail establishments trading during the year ended 30th June, 1949.

Further censuses were taken in respect of the years ended 30th June, 1953 and 1957. In these censuses, retailers were asked to furnish more detailed information concerning the dissection of their turnover into commodity groups, and questions were asked about stocks of goods on hand, the number of persons engaged in retail activities, and credit sales. In addition, the 1956-57 census included questions relating to purchases, customers' indebtedness, and type of organization.

The most recent census was taken in respect of the year ended 30th June, 1962, and preliminary results have been published for all States and Australia in a series of mimeographed statements, copies of which are available from this Bureau. With the exception of some modifications to the scope of the collection (see p. 1246), the 1961-62 census followed the same general principles adopted for the previous census.

In general terms, the censuses covered the retail trading activities of establishments which normally sell goods by retail to the general public from fixed premises (i.e. shops, rooms, kiosks and yards). Certain types of "service" establishments were also included, e.g., boot repairers, hairdressers, motor garages, and service stations and cafés. The censuses included the retail sales of those factories or wholesalers who conducted a regular retail business, but excluded those who only occasionally sold goods by retail. Both new and second-hand goods were included in sales recorded by relevant retail establishments.

Particulars of retail sales obtained from the census are designed principally to cover sales to the final consumer of goods generally used for household and personal purposes. For this reason, sales of building materials, farm and industrial machinery and equipment, earth-moving equipment, etc., have been excluded from the censuses. For the same reason, and also because of difficulties in obtaining reliable and complete reporting, sales of builders' hardware and supplies, business machines and equipment, grain feed, fertilizer and agricultural supplies, and tractors have been excluded from the 1961-62 census. Retail sales of motor vehicles, parts, etc., are included, whether for industrial, commercial, farm or private use.

During the period between censuses, variations in the value of retail sales have been measured by means of quarterly sample surveys. Annual totals derived from these surveys, adjusted to a basis comparable in scope with the 1961-62 census, and some of the results of the 1961-62 census, are included in this section. Previous issues of the Year Book contain considerable detail from the information derived at the 1956-57 census (*see* No. 47, 1961, pp. 1149-52), and the appendix to this issue contains similar detail in respect of the 1961-62 census.

2. **Value of Retail Sales in Each Commodity Group, Australia.**—The following table shows the value of retail sales of goods in each of the commodity groups specified in the years 1956-57 to 1961-62 on a comparable basis throughout. The figures for the years 1956-57 and 1961-62 were obtained from the censuses taken in respect of those years, whereas figures for the other years shown are estimates based on sample surveys.

**VALUE OF RETAIL SALES: COMMODITY GROUPS, AUSTRALIA(a)**  
(£ million)

Commodity group	1956-57	1957-58	1958-59	1959-60	1960-61	1961-62

Motor vehicles, parts, petrol, etc. (g) ..	596.5	645.2	691.6	828.1	826.2	803.1

(a) Excludes Northern Territory and Australian Capital Territory. (b) Includes fresh fruit and vegetables, confectionery, soft drinks, ice cream, cakes, pastry, cooked provisions, fish, etc., but excludes some delivered milk and bread. (c) Excludes sales made by licensed clubs. (d) Excludes basic building materials, builders' hardware, and supplies such as tools of trade, paint, etc. (e) Includes radios, television and accessories, musical instruments, domestic refrigerators, etc. (f) Includes tobacco, cigarettes, jewellery, sporting goods, etc., but excludes grain and produce and business machines. (g) Includes new and used motor vehicles, parts, petrol, etc., but excludes tractors, farm machinery and implements, earth-moving equipment, etc.

## § 5. Statistical Organization in Australia

1. **Early Development of Australian Statistics.**—(i) *Crown Colony "Blue Books."* Statistical organization in Australia was founded in the "Blue Books" which, in the Crown Colony days, were prepared annually for the information of the Colonial Office. Although intended primarily for administrative purposes, these documents have been important.

sources of statistical data, even though some important matters are not covered, and others only partially so. These "Blue Books" formed the basis from which later statistical publications were developed. This led to an element of uniformity in statistical compilation within the British Empire.

(ii) *Statistical Registers.* Following the advent of responsible government, which was granted during the period 1851–1860 to all Australian States except Western Australia—and to that State in 1890—the "Blue Book" was succeeded in all States by "Statistical Registers". These were in many respects the old "Blue Books" in a new form, and were largely confined to summaries of the "by-product" statistics of government administrative departments.

The first example of extensive government organization for purely statistical purposes was the taking of periodic population censuses, which were initiated in all States under the Crown Colony regime. The growing need for quantitative data concerning the progress of the several young communities of Australia led eventually to the appointment of official Statisticians commissioned to prepare and publish such data.

(iii) *Statistical Conferences.* To provide for the interchange of ideas between States and to obtain uniform State statistics which could be aggregated to Australian totals, conferences were held in the several States from as early as 1861. Altogether, six conferences were held prior to the formation of the Commonwealth Bureau of Census and Statistics in 1906. These were held in 1861, 1875, 1890, 1900, 1902 and 1903. The holding of these conferences has been continued since the formation of the Commonwealth Bureau, and a representative from New Zealand attended up to 1928.

2. *Creation of the Commonwealth Bureau of Census and Statistics.*—Under the provisions of section 51 of the Commonwealth Constitution, power is conferred on the Commonwealth Parliament "to make laws for the peace, order and good government of the Commonwealth with respect to—" (*inter alia*) "(XI.) Census and statistics". In compliance with this provision, the *Census and Statistics Act* 1905 was passed, and in 1906 the Commonwealth Bureau of Census and Statistics was created. A conference of Statisticians in 1906 defined the relations between the Commonwealth and State Bureaux, and in each case the State Statistician became the representative in his own State of the Commonwealth Statistician for the purpose of administering the Commonwealth Act. In addition, each State has its own "Statistics Act", and although these are not identical in all States, they embody common principles. The Commonwealth Bureau did not attempt to duplicate the existing statistical organization, but endeavoured to use the services of the State statistical offices whenever possible, and to undertake the initial collection of statistics only in fields not already occupied by the States, or in which efficiency demanded complete centralization.

3. *Integration of Statistical Services.*—The creation and development of the Commonwealth Bureau of Census and Statistics, the frequent conferences of Commonwealth and State Statisticians, and the close and increasing liaison between officers dealing with the same subjects in the State and Commonwealth fields did much to promote uniformity in the official statistical collections and methods employed throughout Australia. The complete realization of this aim could not, however, be achieved, even with the utmost co-operation of those concerned, while seven distinct statistical systems operated.

This became apparent after the 1914–18 War, when the economic problems that then arose drew attention to deficiencies in Australian statistical data. With a view to overcoming these weaknesses, the Prime Minister of the day proposed to the Premiers' Conference that State statistical offices be transferred to the Commonwealth. Tasmania alone agreed to this, and the transfer was effected in 1924. Since then, an amalgamated office has functioned satisfactorily in that State as a Commonwealth office which also serves State statistical needs.

The boom of the 1920's, the depression of the 1930's, the 1939–45 War, and the post-war boom, each with its special economic problems, imposed a severe strain on the Commonwealth and State statistical systems. Moreover, the development during and since the 1939–45 War of a very considerable volume of new statistics added greatly to the complexities of the several administrations in their efforts to secure, and maintain, uniformity in statistical collections. The establishment of Commonwealth statistical offices in some State capitals eased the situation to some extent—indeed, without their establishment, the new and expanded statistical collections could not have been carried out at all. However, this did not solve the problem and constituted only one of a number of improvisations

devised to obtain uniform data essential for national purposes, and to satisfy urgent demands for new series of statistics. Furthermore, the excessive amount of time and effort entailed in such improvisations made it impossible to devote the necessary time to the major question of meeting growing statistical needs promptly.

The emergence of the problem of providing uniform statistical services throughout Australia, adequate to meet present-day demands, was foreseen during the 1939-45 War, and in 1949 discussions with the Premiers were initiated by the Prime Minister, with the object of integrating the statistical services of the Commonwealth and the States by agreement. These negotiations were continued by correspondence, and subsequently all State Governments accepted the terms of draft agreements to integrate their respective statistical offices with that of the Commonwealth.

The *Statistics (Arrangements with States) Act* provided for parliamentary approval of the making of arrangements with individual States for, and the setting up of, integrated statistical services. After passing through all stages of Parliament, it became law on 12th May, 1956. This legislation, permissive in nature, was designed to enable the Commonwealth to enter into an agreement with any State to effect an amalgamation of Commonwealth and State statistical offices and services. The object of such an agreement was that, in each State accepting it, there would be an integrated statistical service operated by Commonwealth statistical officers under the immediate direction of a statistician in the State who would hold office under both the Commonwealth and State Governments. Both Commonwealth and State were to be adequately served with statistics, and no State would be required to surrender its existing powers in the field of statistics. The rights of officers transferred under any agreement entered into were provided for.

Integration of the Commonwealth and State statistical services was finally accomplished when the integration arrangement with Victoria came into effect on 15th September, 1958.

**4. Scope of the Commonwealth Bureau of Census and Statistics.**—The scope of the Commonwealth Bureau of Census and Statistics has constantly been widened, more particularly during the 1939-45 War, when the Bureau responded to the urgent demands of administration for immediate and accurate statistical information in various fields. Since the War, requirements in the administrative, industrial, financial and scientific spheres have led to the development of many new statistical collections. All the activities of the Bureau are covered by the *Census and Statistics Act*, which confers authority to collect information and contains stringent provisions to ensure that the information obtained is treated in strictest secrecy.

For administrative purposes, the Commonwealth Bureau, Canberra, is divided into a number of Divisions and Branches dealing with specific fields of statistics or providing services for the Bureau as a whole. The organizational patterns of the State Offices are broadly similar, although local requirements have naturally given rise to differences in detail.

**5. Relation of the Bureau to other Commonwealth Departments.**—In October, 1950, the Commonwealth Public Service Board issued a circular relative to the compilation of statistics in other Commonwealth Departments, in which it stated that the Commonwealth Statistician should be the co-ordinating authority on all statistics in Commonwealth Departments, and that, as a general principle, where any new statistical field is to be established involving the regular collection of statistics, the Commonwealth Statistician should be consulted to ensure that they are necessary and that they are based on sound statistical methods; furthermore, that the Commonwealth Statistician should make a regular inspection, at least once every twelve months, of all statistical work done by Departments to ensure that their needs are met by the most economical means and without duplication of effort.

This project of co-ordination is being implemented as statistical developments require and as time and circumstances permit.

## § 6. Statistical Publications of Australia

**1. General.**—The official statistical publications of Australia may be divided bibliographically into two main divisions, namely:—(i) Commonwealth publications dealing both individually and collectively with the several States of Australia; and (ii) State publications dealing with individual States only.

Commonwealth publications containing statistics may be grouped under two heads, namely:—(i) publications issued by the Commonwealth Statistician; and (ii) Parliamentary and Departmental Reports and Papers.

2. Publications issued by the Commonwealth Statistician.—The following is a list of the principal statistical publications issued from the Commonwealth Bureau of Census and Statistics since its inauguration.

*Australian Balance of Payments*.—Statements Nos. 1 to 3, 1928–29 to 1951–52.

*Australian Capital Territory Statistical Summary*.—Annually; first issue, 1963.

*Australian Exports*.—Annually, 1958–59 to 1962–63.

*Australian Life Tables*, 1901–1910. *Australian Joint Life Tables*, 1901–1910.

*Australian Life Tables*, 1920–1922.

*Australian Life Tables*, 1932–1934. *Australian Joint Life Tables*, 1932–1934.

*Australian Life Tables*, 1946–1948.

*Australian Life Tables*, 1953–1955.

\* *Australian Mineral Industry, The* (formerly *Minerals and Metals Bulletin*).—Part 2—*Quarterly Statistics* of a quarterly bulletin issued jointly with the Bureau of Mineral Resources.

† *Australian National Accounts, National Income and Expenditure*, 1948–49 to 1961–62.

*Australian Primary Industries*.—Report prepared for the Empire Producers Conference, Sydney, March, 1938.

*Census* (1911) *Results*.—Bulletins. Vols. I. (Statistician's Report), II., and III., with Appendix *Mathematical Theory of Population*.

*Census* (1921) *Results*.—Bulletins, Nos. 1 to 26. Parts I. to XVI., forming Vol. I., and Parts XVII. to XXIX., forming, with the Statistician's Report, Vol. II.

NOTE.—Part XXVII., Life Tables.

*Census* (1933) *Results*.—Bulletins, Nos. 1 to 25. Parts I. to XIV., forming Vol. I., Parts XV. to XXVIII., forming Vol. II., and Parts XXIX. to XXXVII., forming, with the Statistician's Report and Australian Life Tables, 1932–1934, Vol. III.

*Census* (1947) *Results*.—Bulletins, Nos. 1 to 25. Parts I. to XVI., forming Vol. I., Parts XVII. to XIX., forming Vol. II., and Parts XX. to XXVIII., forming with the Statistician's Report and Australian Life Tables, 1946–1948, Vol. III.

*Census* (1954) *Results*.—Bulletins, Nos. 1 to 3. Vols. I. to VI., comprising respectively Parts I. to V. for each State; Vol. VII., comprising Parts I. to V. for the Australian Territories; Vol. VIII., comprising Parts I. to III. for Australia, Australian Life Tables, 1953–1955, and the Statistician's Report.

*Census* (1961) *Results*.—See back pages of this volume for publications already printed; pattern of publication is similar to that for the 1954 Census. A series of mimeographed summaries† has been issued for individual States and Territories, for Australia as a whole, and for particular characteristics of the population.

*Census of Motor Vehicles*, 31st December, 1955.—Bulletins, Nos. 1 to 8.

† *Census of Retail Establishments* (1947–48) *Results*.—Bulletins, Nos. 1 to 7.

† *Census of Retail Establishments* (1948–49) *Results*.—Bulletins, Nos. 1 to 7.

† *Census of Retail Establishments* (1952–53) *Results*.—Bulletins, Nos. 1 to 14.

*Census of Retail Establishments* (1956–57) *Results*.—Bulletins, Nos. 1 to 8 (mimeographed)† and 9 to 15 (printed).

† *Census of Retail Establishments* (1961–62) *Results*.—Bulletins Nos. 1 to 9; Preliminary Statements, Nos. 1 to 8; Supplementary Collections, Nos. 1 and 2 (all mimeographed).

*Classification of Rural Holdings by Size and Type of Activity*, 1959–60.—Bulletins, Nos. 1 to 7.

† *Dairying Industry* (formerly *Summary of Dairying Industry*).—Statistical Bulletin, monthly; first issue, September, 1937.

*Demography*.—Bulletin, annually, 1911 to 1961.

† *Digest of Current Economic Statistics*.—August, 1959 onward.

† *Factories, Principal Statistics, Summary*.—Annually, 1948–49 to 1961–62.

*Finance*.—Bulletin, 1907 to 1916–17 annually; 1917–18 and 1918–19 (one vol.); 1919–20 and 1920–21 (one vol.); 1922–23 to 1960–61 annually. From 1955–56 issued in two parts; Part I., Public and Private Finance; Part II., Commonwealth Taxation.

\* Copies available from the Department of National Development in each capital city (6s. each).

† Distributed by Commonwealth Statistician—for methods of obtaining other publications still in print see back pages of this volume.

- \**Food Production and the Apparent Consumption of Foodstuffs and Nutrients in Australia, Report on.*—Statistical Bulletin, half-yearly, 1946–47 to 1947–48; annually, 1948–49 to 1961–62.
- \**Fruit Growing Industry* (formerly *Summary of Fruit Growing Industry*).—Statistical Bulletin, annually, 1944–45 to 1961–62.  
*Imports Cleared for Home Consumption.*—Annually, 1950–51 to 1962–63.  
*Labour and Industrial Statistics.* Memoranda and Reports, various, to 1913.  
*Labour Report.*—Annually, 1913 to 1961.
- \**Livestock Numbers* (formerly *Summary of Livestock Statistics*).—Statistical Bulletin, annually, 1943 to 1963.  
*Local Government in Australia.*—July, 1919.
- \**Manufacturing Industries.*—Bulletins on Individual Industries, annually, 1936–37 to 1939–40, 1940–41 (issue incomplete) and 1944–45 to 1961–62.†  
*Monthly Review of Business Statistics.*—October, 1937 onward.  
*Northern Territory Statistical Summary.*—Annually since 1960.
- \**Occupation Survey* (1945) *Results.*—Detailed tables.  
*Official Year Book of the Commonwealth of Australia.*—Annually, 1907 to present issue (No. 49). Issues Nos. 40 to 49 also published in parts.  
*Oversea Trade.*—Bulletin, annually, 1906 to 1962–63.
- \**Oversea Trade.*—Preliminary Bulletin. Annually, 1952–53 to 1962–63.  
(See also *Australian Exports and Imports Cleared for Home Consumption.*)  
*Pocket Compendium of Australian Statistics* (formerly *Statistical Digest*).—1913, 1914, 1916, and 1918 to 1963, annually.  
*Population and Vital Statistics.*—Bulletins and Reports, various, 1906–1910.  
*Primary Industries.*—Bulletins, annually, 1950–51 to 1960–61, in two parts—Part I. Rural Industries; Part II. Non-Rural Industries and Value of Production.  
*Production.*—Bulletin, annually, 1906 to 1949–50. From 1936–37 to 1949–50 issued in two parts—Part I. Secondary Industries; Part II. Primary Industries (including Total Recorded Production); thereafter separate Bulletins (see *Primary Industries and Secondary Industries*).  
*Professional Papers.*—Various. A full list appears in Official Year Book No. 13, page 3.  
*Quarterly Summary of Australian Statistics* (replaced *Monthly Summary of Australian Statistics*).—December, 1917 onward.
- \**Report of Proceedings of the Conference of British Commonwealth Statisticians*, 1951.
- \**Rural Land Use and Crop Production* (formerly *Summary of Crop Statistics*).—Statistical Bulletin, annually, 1943–44 to 1961–62.  
*Secondary Industries.*—Bulletin, annually, 1950–51 to 1960–61 (1960–61 in two parts—Part I. Factory and Building Operations; Part II. Materials Used and Articles Produced in Factories).
- \**Size Classification of Rural Holdings*, 1955–56.—Bulletins Nos. 1 to 7.  
*Social Insurance.*—Report to the Hon. the Minister for Trade and Customs, 1910.  
*Social Statistics.*—Bulletin, 1907 to 1915 annually, and 1918.  
*Superannuation for the Commonwealth Public Service.*—Report to the Hon. the Minister for Home Affairs, 1910.
- \**Survey of Motor Vehicles* (1947–48) *Results.*—Bulletins Nos. 1 to 7.  
*Transport and Communication.*—Bulletin, 1906, 1908 to 1916 annually, 1919 to 1930 annually, and 1932 to 1961–62 annually.  
*Wealth.*—The Private Wealth of Australia and its Growth as ascertained by various methods, together with a Report on the War Census in 1915.

\* Distributed by the Commonwealth Statistician—for methods of obtaining other publications still in print see back pages of this volume. † The series for 1961–62 comprises:—Nos. 1. Cement and Cement Goods, 2. Bricks, Tiles, Pottery and Earthenware, 3. Chemicals, Drugs and Medicines, 4. White Lead, Paints and Varnish, 5. Chemical Fertilizers, 6. Soap and Candles, 7. Basic Metal Industries, 8. Metal Fabricating Industries, 9. Motor Vehicles and Cycles, 10. Cotton Mills, 11. Woollen Mills, 12. Rope and Cordage, 13. Tanneries, 14. Boots and Shoes, 15. Clothing (including Hosiery and Knitted Goods), 16. Flour and Other Grain Mills, 17. Biscuits, 18. Confectionery, 19. Jam, Fruit, Vegetables Pickles, Sauces, Condiments, etc., 20. Bacon Curing, 21. Butter, Cheese and Condensed, Concentrated, etc., Milk, 22. Aerated Waters and Cordials, 23. Meat and Fish Preserving, 24. Breweries, 25. Wineries and Distilleries, 26. Tobacco, Cigars and Cigarettes, 27. Sawmilling, 28. Pulp and Paper Making, 29. Rubber Works, 30. Brooms and Brushes, 31. Electric Light and Power Works, 32. Gas Works, 33. Plastic Moulding and Products, 34. Leather Goods (including Saddlery and Belting).

\* *Wheat Industry* (formerly *Summary of the Wheat Situation*).—Statistical Bulletin, periodically; first issue, July, 1936.

\* *Wool Production and Utilization*.—Bulletin, annually, 1952–53 to 1961–62.

The foregoing list includes all the printed publications issued from the Bureau, and certain more important mimeographed publications issued for the most part annually. Minor changes in the titles of several publications have not been referred to above. Copies of a number of these publications, particularly earlier issues, are not available.

Other mimeographed statements are distributed by the Commonwealth Statistician and deal with a wide variety of subjects, as follows.

*Annually*.—Bee Farming; Consumption of Tea and Coffee; Factory Products (Principal); Factory Statistics (Preliminary); Fire, Marine and General Insurance; Fishing and Whaling; Livestock Statistics (Preliminary); Milking Machines on Rural Holdings; Mining and Quarrying; Oversea Investment; Registrations of New Motor Vehicles; Taxation Collections; Trade of Australia with Eastern Countries; Rural Statistics of the Australian Capital Territory; Tractors on Rural Holdings; University Statistics; Value of Primary Production (Preliminary); Value of Production and Indexes of Prices and Quantum of Farm Production; Wheat Industry; Wine and Brandy Statistics; Wool Production; Agricultural Statistics (Preliminary).

*Half-yearly*.—Australian Balance of Payments; Capital and Maintenance Expenditure; Labour Turnover; Trade of Australia with the United Kingdom; Road Traffic Accidents.

*Quarterly*.—Aerial Agriculture; Australian Oversea Trade with Major Groups of Countries; Balance of Payments; Building; Building—Australian Capital Territory; Building—Northern Territory; Consumer Price Index; Instalment Credit for Retail Sales; National Income and Expenditure; New Agricultural Machinery; New Capital Raisings; New Tractors; Retail Sales of Goods; Unit Trusts, Land Trusts and Mutual Funds.

*Monthly*.—Banking (General); Building Approvals; Employment; Exports of Wool; Export Price Index; Gold Mining Industry; Instalment Credit for Retail Sales; Life Insurance; Meat Industry; Oversea Trade; Production Statistics; Production Summaries†; Registrations of New Motor Vehicles; Retail Sales of Goods (Total); Savings Banks; Wage and Salary Earners in Civilian Employment; Wage Rates and Earnings; Wholesale Price (Basic Materials and Foodstuffs) Index.

*Periodically*.—Census (1961) Results (summarized mimeographed bulletins); *Demographic Review*; *Social Statistics*.

In addition to the above-mentioned publications, most of which are issued regularly, there have been a number of statements issued by this Bureau which contain the results of special surveys or new statistical series and descriptions thereof. The more important of these are listed below.

*Occasional Publications*.—Special Business Surveys—No. 1. Average Wage and Salary Earnings (1947); No. 2. Incidence of Industrial Awards (1948); No. 3. Part-time Employment (1948); No. 4. Methods of Payments to Employees (1949); No. 5. Receipts and Payments of Rent, Interest and Royalties, 1949–50; No. 6. Average Wage and Salary Earnings (1952); No. 7. Private Superannuation Schemes, 1951–52 (reprinted in *Finance Bulletin* No. 44); No. 8. Incidence of Industrial Awards (1956); No. 9. Private Pension

\* Distributed by the Commonwealth Statistician—for methods of obtaining other publications still in print see back pages of this volume.

† The current series comprises:—Nos. 2. Chemicals, etc., 3. Plastic and Synthetic Resins and Plasticisers, 4. Paints and Other Surface Coatings, 6. Soap, Detergents and Glycerine, 7. Internal Combustion Engines, 8. Lawn Mowers, 8A. Storage Batteries, 9. Electric Motors, Electric Appliances, Wireless, Television, etc., 10. Motor Bodies and Trailers, 10A. Assembly of Motor Vehicle Chassis, 11. Pedal Cycles, 12. Meters, 13. Building Fittings, 14. Cotton Goods, 15. Woolscouring, Carbonizing and Fellingmongering, 16. Woollen and Worsted Carding, Combing and Spinning, 17. Wool Weaving, 18. Hosiery, 19. Men's and Boys', Women's and Maids', Girls', Infants' and Babywear, Shirts, Cardigans, Pyjamas, Underclothing, etc., 20. Rayon and Synthetic Fibre Woven Fabrics and Spun Synthetic Yarns, 21. Paper and Paper Board, 22. Floor coverings, 24. Men's, Youths' and Boys' Outer Clothing, 25. Foundation Garments, 27. Gloves (other than Rubber), 28. Footwear (excluding Sandshoes, Goloshes, Boots of Rubber), 29. Biscuits, Ice Cream, Confectionery, 32. Perambulators (including Pushers and Strollers), 34. Radios, Television and Cabinets, 35. Mattresses, 36. Preserved Milk Products, 38. Canned Fish, 39. Jams and Preserved Fruit and Vegetables, 40. Cereal Breakfast Foods, Cereal Products and Flour Milling, 41. Margarine and other Edible Processed Fats, 42. Malt and Beer, 43. Stock and Poultry Meals (Other than Cereal), 45. Gramophone Records, 47. Aerated and Carbonated Waters, Cordials and Syrups and Concentrated Cordial Extract, 48. Sports Goods, 49. Building Materials, 51. Hides and Skins used in Tanneries, 54. Flour Mills, 55. Butter and Cheese, 56. Canned Meat, 57. Steel Wire and Wire Products.

and Retiring Allowance Schemes, 1955-56 (reprinted in *Finance, Part I*. Bulletin No. 47); No. 10. Receipts and Payments of Interest, Rent and Royalties, 1956-57; No. 11. Private Pension and Retiring Allowance Schemes, 1955-56 to 1957-58; No. 12. Private Pension and Retiring Allowance Schemes, 1955-56 to 1958-59; No. 13. Selected Large Private Pension Schemes, 1955-56 to 1960-61; No. 14. Private Pension and Retiring Allowance Schemes, 1960-61; No. 15. Selected Large Private Pension Funds, 1955-56 to 1961-62.

Survey of Wage Rates and Earnings, September, 1960; A Description of the Consumer Price Index (1961); Survey of Weekly Earnings, October, 1961; Wage and Salary Earners in Employment, June, 1947, to June, 1960; Minimum Weekly Wage Rates, 1939 to 1959; Minimum Weekly Wage Rates, January, 1960 to June, 1962; Survey of Retail Establishments, Australian Capital Territory, 1960-61; Survey of Weekly Earnings and Hours, October, 1962; Survey of Retail Establishments, Australian Capital Territory, 1962-63.

Further information on current publications of the Commonwealth Bureau of Census and Statistics is contained in *Publications of the Commonwealth Bureau of Census and Statistics*, February, 1963, available free, on request, from the Commonwealth Statistician, Canberra. This contains a list of all Bureau publications and also a subject index to show the publications in which information on the various subjects dealt with by the Bureau is to be found. Publications issued by the State Offices of the Commonwealth Bureau of Census and Statistics are also listed therein.

3. **Publications issued by the Deputy Commonwealth Statisticians.**—A list of the publications issued by the Deputy Commonwealth Statistician of each State appears in Year Book No. 48 (see p. 1163) and in *Publications of the Commonwealth Bureau of Census and Statistics*, February, 1963.

4. **Commonwealth and State Parliamentary and Departmental Reports and Papers.**—No comprehensive list of current publications of this nature is available, but the Commonwealth National Library issues an annual publication *Australian Government Publications*, a list of official publications of the Commonwealth, States and Territories, compiled from records of material received by the Library during the year.

# DIARY OF PRINCIPAL ECONOMIC EVENTS, 1962-63

The principal economic events in earlier years were shown in the following issues:—

YEARS	OFFICIAL YEAR	BOOK No.	PAGES
1931 to 1938 .. .. .	33	.. .. .	968-77
1939 to 1944 .. .. .	36	.. .. .	1129-41
1945 to 1948 .. .. .	37	.. .. .	1235-45
1949 to 1951 .. .. .	39	.. .. .	1331-40
1952 to 1955 .. .. .	42	.. .. .	1149-60
1956 to 1958 .. .. .	46	.. .. .	1185-92
1958-59 to 1961-62 .. .. .	48	.. .. .	1188-1200

To conserve space, information for years prior to 1962-63 has been omitted from this issue.

At the beginning of the year, there were 46,324 persons in receipt of unemployment benefit, the average number of dwelling approvals each month was still about 1,600 below the level reached in 1959-60, and the average wholesale price (basic materials and foodstuffs) index for 1961-62 was the lowest since 1955-56. During the year, however, unemployment dropped, registrations of new motor vehicles rose, and economic indicators generally showed an improvement.

By June, 1963, the number of persons in receipt of unemployment benefit had fallen to 38,188 and the value of retail sales during the June quarter, 1963, was nearly three per cent. higher than that in the same quarter of 1962. The value of new buildings commenced rose from £430 million in June, 1962, to £443 million in June, 1963, and registrations of new motor vehicles averaged over 6,000 a month more in 1962-63 than in the previous year.

There was marked industrial development during the year, and plans for the construction of large scale plants were announced by a number of companies. In particular, the discovery of payable oil supplies and extensive bauxite deposits, combined with increased demand for oil and alumina, were followed by planning for large scale refining plants for these industries.

Imports rose again during the year and exceeded exports by £8.8 million, although shipments of coal to Japan and wheat to Mainland China helped to maintain exports at a high level. Apparent capital inflow (including balancing item) rose from £87 million in 1961-62 to £288 million in 1962-63, and international reserves rose by £65 million to £626 million.

In the rural industries, the production of wheat, 307 million bushels, and milk, 1,480 million gallons, were at record levels, while wool production was only slightly below the record figure for the previous season.

In the first half of 1963, deposits with trading banks were at record levels, being consistently above the £2,000 million mark, while depositors' balances in savings banks were also rising and exceeded £2,000 million for the first time in July, 1963. Balances owing on hire-purchase transactions were still below peak levels but other forms of instalment credit had increased and the total instalment credit for retail sales outstanding in June, 1963, was £625 million.

*1st July.*—Commonwealth negotiated loan in United States of \$30 million, issued at \$97½ for \$100 with interest at 5½ per cent. per annum, fully subscribed.

*9th July.*—Australia-New Zealand section of Commonwealth Pacific Cable opened.

*12th July.*—Meeting of Federal and State Ministers discussed proposal to establish a Water Resources Council (*see* p. 277).

*16th July.*—Short-term Treasury notes maturing 13 weeks after date of issue introduced in lieu of Seasonal Treasury notes previously on issue. The price of issue was £99 2s. giving a yield of approximately £3 12s. 10d. per £100 per annum.

*18th July.*—European Launching Development Organization announced plans to spend £75 million on a five-year satellite plan for Woomera.

*24th July.*—Australian Dairy Produce Board announced agreement with New Zealand on prices for dairy produce exported.

*27th July.*—South Australian Minister of Works and Marine announced plans to construct bulk handling plant at Port Adelaide to handle wheat, barley, salt, etc.

*6th August.*—Whale industry at Moreton Island (Queensland) and Norfolk Island suspended operations.

*7th August.*—Commonwealth Budget for 1962–63 introduced into House of Representatives. In 1961–62, receipts of the Consolidated Revenue Fund were £1,641.5 million and expenditure (excluding the payment of £22.2 million to the Loan Consolidation and Investment Reserve) amounted to £1,619.3 million. The main items of revenue (1960–61 figures shown in parentheses) were:—income taxes, £828.2 million (£807.3 million); excise duties £265.6 million (£257.4 million); customs duties £85.2 million (£101.8 million); sales tax £148.8 million (£173 million); and pay-roll tax £61 million (£61.3 million). The main items of expenditure were:—payments to or for the States £396.6 million (£352.9 million); social and health services £365.2 million (£330.6 million); defence services (excluding £23.6 million provided from loan fund in 1961–62) £203.1 million (£198.2 million); war and repatriation services £104.3 million (£98 million); and capital works and services £161.6 million (£140.9 million).

The Budget for 1962–63 provided for an estimated expenditure of £2,087.7 million, of which £1,614.4 million would be provided from the Consolidated Revenue Fund and £473.3 million from the Loan Fund. In addition, it was expected that £51 million would be available for payment to the Loan Consolidation and Investment Reserve.

*9th August.*—Commonwealth Treasurer announced that rate of oil search subsidy was to be reduced by 40 per cent., but that an additional £3 million in all would be spent.

*10th August.*—Minister for Territories announced details of £4.5 million beef cattle and other road development in Northern Territory.

*17th August.*—State Savings Bank of Victoria raised maximum crédit foncier advance from £3,000 to £3,500, and maximum housing loan by Victorian Government through co-operative building societies was raised from £3,000 to £3,300.

*20th August.*—Commonwealth Government allocated £20 million to meet first year's programme of a five-year plan to accelerate development of Papua and New Guinea.

*21st August.*—Announced that first 40,000 tons of bauxite had been mined at Weipa for export and home consumption.

*29th August.*—Restrictions on exports of scrap iron from Australia lifted.

*30th August.*—1962–63 Budget introduced into Tasmanian House of Assembly. The transactions of the Consolidated Revenue Fund in 1961–62 resulted in a deficit of £400,000. Receipts of the Consolidated Revenue Fund totalled £30.3 million and expenditure £30.7 million. For 1962–63, it was estimated that expenditure would be £32.3 million and revenue £31.5 million, leaving a deficit of £800,000.

*4th September.*—1962–63 Budget introduced into South Australian House of Assembly. In 1961–62, revenue amounted to £93.2 million and expenditure to £92.7 million, leaving a surplus of £500,000. For 1962–63, it was estimated that revenue would be £96.3 million and expenditure £96.9 million, leaving a deficit of £600,000.

*5th September.*—Oil company announced decision to construct 200-mile pipe-line from Moonie oilfield to Brisbane at cost of £5 million. Commonwealth Cash Loan of £50 million issued at £99 12s. 6d. to par, with interest at 4½ per cent. to 5 per cent. per annum, closed 20th September oversubscribed by £30.2 million.

*11th September.*—Prime Minister attended meeting of Commonwealth Prime Ministers in London for discussions on Britain's possible entry to European Economic Community. 1962–63 Budget introduced into Victorian Legislative Assembly. In 1961–62, revenue and expenditure amounted to £153.3 million, with a surplus of £11,000. The Budget for 1962–63 provided for a total expenditure of £205.6 million and revenue of £205 million. Railway operating expenses and income were estimated at £42.9 million and £42.7 million respectively and it was anticipated that the Railway Equalization Account would have to provide the balance of £200,000.

*20th September.*—Northern Territory Administrator announced that an inland port was to be set up on the Adelaide River, near Humpty Doo, 50 miles up river, for shipment of rice.

*26th September.*—1962–63 Budget introduced into New South Wales Legislative Assembly. During 1961–62, the transactions of the Consolidated Revenue Fund, Railways, Metropolitan and Newcastle Transport Services and Maritime Services Board resulted in a

deficit of £3.1 million. After providing for debt charges, there were deficits of £2.4 million on the Railways and £2.8 million on the Metropolitan and Newcastle Transport Services. The 1962-63 Budget provided for an overall surplus of £22,000. After meeting debt charges, it was estimated that there would be a surplus of £4,000 on the Railways and a deficit of £2.5 million on the Metropolitan and Newcastle Transport Services.

*27th September.*—1962-63 Budget introduced into Queensland Legislative Assembly. In 1961-62, receipts of the Consolidated Revenue Fund were £117.3 million. Expenditure was £117.2 million, leaving a surplus of £100,000. For 1962-63, it was estimated that both revenue and expenditure would amount to £121.2 million.

1962-63 Budget introduced into Western Australian Legislative Assembly. Financial transactions for the year 1961-62 resulted in a deficit of £964,000. For 1962-63, it was estimated that expenditure would be £79 million and revenue £78.2 million, resulting in a deficit of £800,000.

*1st October.*—Commonwealth negotiated loan in the United States of \$25 million issued at \$99 for \$100, interest at 5½ per cent. per annum, fully subscribed.

New system of bank charges introduced by trading banks (*see p. 863*).

*15th October.*—Premier of New South Wales announced subsidies, loans, and tax concessions to encourage the decentralization of industry in the State.

*16th October.*—Announced that New Zealand Tariff revisions had resulted in a significant decline in Australian steel exports.

*17th October.*—Minister for Trade announced lifting of all import licensing provisions left in force since February, 1960.

*18th October.*—United States Secretary of Commerce paid official visit to Australia.

*23rd October.*—Minister for Immigration announced a new migrant sponsorship scheme for skilled workers.

*24th October.*—Reserve Bank announced raising of Statutory Reserve Deposit ratio by 1 per cent. to 11.5 per cent.

*31st October.*—Minister for Territories announced discovery of new bauxite field in north-east Arnhem Land with estimated reserves of over 100 million tons.

*13th November.*—Australian Dairy Produce Board contracted to supply £2.3 million worth of dairy products to the Philippines annually for 15 years.

*15th November.*—Contract let for construction of export abattoir at Katherine in Northern Territory, first such abattoir to be built since 1920's.

*23rd November.*—New Sugar Agreement made with Britain providing for an increase of 7s. a ton.

*26th November.*—Contract let for building of 760,000 kW. Murray 1 Power Station at Khancoban in Snowy Mountains.

*6th December.*—Proposals for legislation on restrictive trade practices and monopolies outlined in Commonwealth Parliament.

*2nd January.*—Minister for Trade announced agreement for supply of 100,000 tons of flour annually to Ceylon in 1963 and 1964.

*7th January.*—Survey of iron deposits at Mount Goldsworthy (Western Australia) estimated reserves to be between 150 and 300 million tons.

*11th January.*—Tests of iron ore deposits at Savage River (Tasmania) indicated reserves of 80 million tons.

*16th January.*—Commonwealth negotiated loan in London of £Stg.12 million, issued at £98 to par with interest rate at 5½ per cent. per annum; closed 16th January 18 per cent. subscribed; balance taken up by underwriters.

*31st January.*—Statement by Minister for Trade on discontinuance of negotiations between Britain and members of the E.E.C. concerning Britain's entry into the European Economic Community.

*6th February.*—Commonwealth Cash Loan of £60 million issued at £99 to par, with interest at 4½ per cent. to 5 per cent. per annum oversubscribed by £66.7 million.

*13th February.*—Prime Minister announced composition of, and terms of reference for, Committee of Economic Enquiry appointed to investigate broad aspects of the Australian economy.

**14th February.**—Loan Council met and agreed to an increase of £6 million in total borrowings of local government and semi-governmental authorities with loan programmes of more than £100,000, and an additional £5 million for State works and housing. Commonwealth offered additional interest free grant of £5 million to States for expenditure on employment-giving activities.

**15th February.**—Announced that £21 million oil refinery was to be built in Brisbane, financed by Australian investors only.

**17th February.**—Prime Minister announced approval of special leases for mining of aluminium in Arnhem Land. Alumina plant to be built at cost of £45 million, to handle 500,000 tons of bauxite annually.

**21st February.**—Commonwealth Savings Bank increased limit for housing loans from £3,000 to £3,500.

**26th February.**—Quota of butter exports to United Kingdom increased to 65,100 tons.

**3rd March.**—United States government announced increase of Australian sugar quota by 49,000 tons.

**12th March.**—Tasmanian Parliament approved £50.6 million hydro-electric development plan for Mersey-Forth Rivers area during next eleven years.

**15th March.**—Petroleum Information Bureau reported that Australian refineries now supplied over 87 per cent. of domestic needs for petroleum products besides exporting £22.5 million.

**20th March.**—First meeting of recently formed Australian Water Resources Council (see 12th July).

**22nd March.**—Large underground water supplies discovered in Alice Springs area, capable of irrigating large areas of farm land.

**29th March.**—Reserve Bank announced general reduction in bank interest rates.

**1st April.**—First regular shipments of bauxite made from Weipa to Bell Bay. Commonwealth negotiated loan in United States of \$30 million issued at \$97½ for \$100, interest rate 5 per cent., fully subscribed.

**7th April.**—Minister for Trade left to attend Commonwealth Trade Ministers' Conference in London and ministerial meetings of General Agreement on Tariffs and Trade at Geneva, and to have preliminary discussions *en route* with New Zealand, Canadian, and United States representatives.

**8th April.**—Commonwealth Treasurer announced details of proposed decimal currency (see p. 838).

**11th April.**—Joint Standing Committee of Parliament set up to study reciprocal trade between Australia and New Zealand.

**16th April.**—Commonwealth Treasurer announced increase of Australia's gold subscription to International Monetary Fund to 25 per cent. of its total subscription.

**18th April.**—Decision of Commonwealth Conciliation and Arbitration Commission to vary Metal Trades Award to provide three weeks annual leave to employees and to grant an increase of 10 per cent. in margins effective from 22nd April.

**19th April.**—Prime Minister announced decision to provide finance for standardization of rail link between Broken Hill and Port Pirie.

**22nd April.**—Plans announced for £35 million alumina refinery at Gladstone with annual capacity of 360,000 tons.

**10th May.**—£15 million oil refinery to be built at Western Port Bay (Victoria).

**18th June.**—Loan Council met in Canberra and approved of borrowing programme for 1963–64 of £272,000,000 (£222,150,000 for States, £49,850,000 for Commonwealth-State Housing). Local and semi-government borrowing ceiling fixed at £120,832,000 for authorities with programmes in excess of £100,000 in 1963–64, but no overall limit placed on such authorities borrowing under State approval not more than £100,000 during the year. A programme of £1,950,000 for Commonwealth authorities in the Territories was also approved by the Loan Council. In making these decisions, the Loan Council took into consideration the Commonwealth offer of a special non-repayable interest-free grant of £20 million to be expended by the States on employment-giving activities.

**26th June.**—Contract let for construction of Australian Mint in Canberra.

## CHRONOLOGICAL TABLE

### CHRONOLOGICAL TABLE OF CHIEF EVENTS IN AUSTRALIA SINCE 1945

NOTES.—In previous issues of the Year Book (see No. 48, p. 1201), this table covered events back to the establishment of settlement in Australia in 1788. To conserve space, these details have been omitted from the present volume.

For each earlier year, this Table rarely contains more than two or three items; for recent years, however, in order to provide a wide cover of events, etc., it includes a much greater number. Both the nature of the Table and considerations of space render necessary a continual reduction in these items and for more information the reader should therefore consult earlier issues.

#### Year

- 1945 Captain Cook Dock opened, Sydney. *Re-establishment and Employment Act* passed. Australia ratified United Nations Charter. Cessation of hostilities in Europe, 8th May. Cessation of hostilities against Japan, 15th August.
- 1946 Australian National University founded at Canberra. Constitution Alteration Referendum granted powers in respect of social services to Commonwealth.
- 1947 Census of Australia—first since 1933. Australian National Antarctic Research Expedition established scientific research station at Heard Island. First "displaced persons" reached Australia.
- 1948 Forty-hour week effective throughout Australia. Membership of Commonwealth Parliament increased.
- 1949 *Nationality and Citizenship Act* operative. Broadcasting Control Board came into operation. Commencement of Snowy Mountains Hydro-electric Power Scheme. Australia's population reached 8,000,000.
- 1950 Australian forces in vicinity of Korea were placed at disposal of United Nations to assist South Korea. Adult franchise adopted for Victorian Legislative Council.
- 1951 Transfer of Heard Island and Macdonald Islands to Australia. Double dissolution of Commonwealth Parliament, second in history of the Commonwealth (first in 1914). Security Treaty between United States of America, Australia and New Zealand for action in the event of an armed attack in the Pacific. Opening of new Legislative Council of Papua and New Guinea, including representatives of the indigenes.
- 1952 High grade uranium deposits discovered at Rum Jungle, Northern Territory, and Radium Hill, South Australia. Severe restrictions imposed on imports from all sources and on amounts available for Australians travelling overseas.
- 1953 Atomic Energy Commission established. Britain and Australia signed agreement for reciprocity in social services benefits. Commonwealth Court of Conciliation and Arbitration abandoned the system of automatic adjustment of the basic wage in accordance with retail price index numbers.
- 1954 Her Majesty Queen Elizabeth the Second, with H.R.H. the Duke of Edinburgh, made first tour of Australia by reigning sovereign. Australian National Antarctic Research Expedition established research station at Mawson. Australian population census taken. Australia signed Manila treaty pledging collective defence against aggression in South-East Asia and South-West Pacific.
- 1955 First power generated by Snowy Mountains Hydro-electric Authority. Australian population reached 9,000,000. Cocos (Keeling) Islands became Territory under authority of Commonwealth.
- 1956 Amendment to *Conciliation and Arbitration Act* altered structure of arbitration machinery by separating the judicial functions from the conciliation and arbitration functions. Regular television transmissions commenced in Australia. Olympic games held in Melbourne.

## Year

- 1957 Commonwealth Government representatives and chiefs of private trading banks met in Canberra to discuss changes in the banking system. High Court ruled that interstate vehicles could not be compelled to register in New South Wales, but upheld validity of a Victorian tax on commercial vehicles, including those engaged in interstate trade, imposed solely for the maintenance of roads. National Capital Development Commission set up to co-ordinate development of Canberra as the centre of government.
- 1958 Prime Minister officially opened Australia's first nuclear reactor at Lucas Heights, near Sydney. Eucumbene Dam, in Snowy Mountains Hydro-electric Scheme, completed. Christmas Island (Indian Ocean) transferred to Australian Administration. New South Wales Act passed providing for equal pay for male and female workers performing similar tasks.
- 1959 *Annual Holidays Act* 1944-1958, of New South Wales, provided for three weeks annual holidays for all New South Wales workers. Commonwealth plan for expenditure of £720,000,000 on roads and bridges accepted by Premiers' Conference. Population reached 10,000,000. T1, underground power station, first major station of Snowy Mountains Scheme, commenced operation. Australian Universities Commission constituted. Australia signed Antarctic Treaty at Washington relating to activities in, and the use of, Antarctica.
- 1960 Provision made for Social Service benefits to be paid to Australian aboriginals. *Commonwealth Banks Act* and *Reserve Bank Act* proclaimed (see p. 842). Goods comprising 90 per cent. of Australia's present imports exempted from licensing provisions. Commonwealth Prime Minister's Conference in London. Australia joined International Development Association as foundation member. National Service training ended. National Export Drive. Report of Committee on Decimal Coinage tabled in House of Representatives (see p. 835). Changes made in Constitution of Papua and New Guinea providing for an increase in number of native members of Legislative Council to eleven, including six elected by indigenes. Warragamba and Keepit Dams, New South Wales, opened. Approval given for thirteen country areas to have television stations, one commercial, one national in each. Commonwealth Government announced special economic measures designed to counter inflationary trend and to safeguard overseas funds.
- 1961 Australia's first guided missile base established at Williamstown (New South Wales). Western Australia announced plans for £10,000,000 iron industry to produce iron for export. *Commonwealth Matrimonial Causes Act*, unifying State Acts, became operative (see p. 670). Bank interest rates rose by about 1 per cent. Monash University (Melbourne) opened. Commonwealth Government announced tax concessions to exporters for promotional expenses in developing overseas export markets. New radio telescope, second largest in world, brought into operation at Parkes (New South Wales) for tracking of space probes and radio-astronomy research. Cessation of "C" Series Retail Price Index. Referendum in New South Wales on proposal to abolish Legislative Council defeated. Oil discovered in south-west Queensland. Professional engineers given salary rises, ranging from £2 to £12 a week, by Arbitration Commission. Contract let for construction of dam at Sirinumu Falls in New Guinea, first of a scheme to develop the hydro-electric potential of the Laloki River. Australian population census taken. British Secretary for Commonwealth Relations visited Australia for talks on trade and Britain's possible entry to the European Economic Community (the "Common Market"). Reserve Bank reduced statutory reserve deposits by 1 per cent. to 12½ per cent. New South Wales Government approved plans for implementing Wyndham Report by extending secondary school course to six years from 1962 with additional bursary assistance. Australia sold interest in Tasman Empire Airways Ltd. to New Zealand. Japanese collier loaded 20,400 tons of coal, first shipment of new series of orders. Television licences granted for major provincial and rural areas. Iron ore deposits estimated at 1,800,000,000 tons discovered at Pilbara (Western Australia). Victorian Premier opened first units of £27,000,000 petro-chemical complex at Altona (Victoria).
- 1962 Regular services commenced on new standard gauge railway between Melbourne and Sydney. Five-day week for banks introduced in all States except Victoria. Minister for External Affairs announced that Australia would take up \$4,000,000 of United Nations Bonds. Contract signed for construction of New National Gallery and Cultural Centre in Melbourne. Western Australian Premier signed

## Year

1962—  
contd.

agreement with American companies for 21-year lease to extract and export up to 15 million tons of iron ore from Pilbara deposits. *Commonwealth Electoral Act* amended to provide for votes for aboriginals. New South Wales Government announced details of £6,000,000 plan for flood mitigation on coastal rivers. United States National Science Foundation provided grants of £333,000 over 5 years to assist building of Sydney University's radio telescope near Canberra. Work began on standardization of rail gauge from Kwinana to Kalgoorlie (Western Australia). Co-axial telephone link opened between Melbourne, Canberra and Sydney. Commonwealth Government abolished need for tax clearances for persons leaving Australia for travel overseas. Queensland Government approved raising of school leaving age and extension of secondary school course to five years. C.S.I.R.O. received grant of £245,000 from Ford Foundation for investigation of solar phenomena. Commonwealth provided £1,765,000 grants to States for assistance to Universities in development of training facilities for medical students in teaching hospitals. Prime Minister opened Australia-New Zealand section of Commonwealth Pacific Cable. Cyclones and tornadoes on New South Wales coast caused widespread floods, severe damage to property and some deaths. Australian Army training team went to Viet Nam. Australian troops transferred from Malaya for service in North Borneo. Details announced of £4.5 million beef cattle and other road development in Northern Territory. Commonwealth Government allocated £20 million to meet first year's programme of five-year plan to accelerate development of Papua and New Guinea. First production of bauxite ore from Weipa deposits. Remonstrance, first in Australian history, tabled in Northern Territory Legislative Council. King and Queen of Thailand made State Visit to Australia. Australian Legation in Laos raised to embassy status. A.N.A.R.E. research party left Wilkes base for 1,800 miles trans-Antarctic survey. Act passed by Western Australian parliament giving voting rights to aboriginals. United States Secretary of Commerce arrived in Sydney on official visit. New South Wales Government announced plans to spend £100 million on roads over six years. Minister for Immigration announced new migrant sponsorship scheme for skilled workers. Foote report on political development of Papua and New Guinea published. Australia appointed Mission to European Atomic Energy Commission. Minister for Defence outlined proposals for new defence plan to cost £650 million, providing for increases in the strength of all services. Australian High Commission to Tanganyika established. Prime Minister announced five-year airport development programme to cost £30 million, including international standard jet airport in Victoria. His Royal Highness the Duke of Edinburgh opened Seventh British Empire and Commonwealth Games at Perth. First major International Labour Office Conference held in Australia opened in Melbourne. Proposals for legislation on restrictive trade practices and monopolies outlined in Commonwealth Parliament. Aboriginals exercised voting rights in Northern Territory for first time.

1963 (to 30th June). Australia to purchase four Oberon class submarines from United Kingdom and a third guided missile destroyer from United States. Discontinuance of negotiations between Britain and members of E.E.C. concerning Britain's entry into European Economic Community. Her Majesty, Queen Elizabeth II and His Royal Highness the Duke of Edinburgh made second Royal Tour of Australia and attended the jubilee celebrations of the founding of Canberra. Decision of United States Aeronautics and Space Administration to establish a deep space station in Tiddinbilla Valley near Canberra. Commonwealth Committee of Economic Enquiry appointed to investigate broad aspects of the Australian economy. Announcement of composition and objectives of commission to inquire into higher education in Papua and New Guinea. First meeting of recently formed Australian Water Resources Council. Large underground water supplies discovered near Alice Springs capable of irrigating large areas of farm land. Minister for External Affairs attended S.E.A.T.O. Council in Paris. Approval to agreement for United States to establish, maintain and operate a naval communications station at North West Cape, Western Australia. Commonwealth Treasurer announced details of new decimal currency (see p. 838). Prime Minister announced that Commonwealth would provide finance for standardization of rail link between Broken Hill and Port Pirie. Construction begun of Australian Mint in Canberra.

# STATISTICAL SUMMARY: AUSTRALIA

NOTE.—(1) In most cases where figures are available back to 1861, these were shown in Official Year Book No. 39, pp. xxviii-xxix.

(2) The statistics in this summary relate in general to the periods shown in the table headings; where the statistics relate to other periods, this is indicated in the footnotes.

(a) Not available.

(b) Loan expenditure on works, services, etc.

(c) At 30th June.

(d) Revised, expressed in Australian currency equivalents at ruling rates of exchange, see p. 955.

(e) At end of June.

(f) Figures are for the June quarter.

(g) Year ended previous December.

(h) At 30th June.

(i) Existing business in Australia.

(j) Excludes war and service pensions.

(k) Includes Northern Territory and Australian Capital Territory.

(l) Teaching and research staff.

Includes part-time until 1952, thereafter full-time only.

(m) South Australia includes Adelaide Hospital only.

(n) Base: 1911 = 100.

## APPENDIX

**NOTE.**—Some recent information which has come to hand since the various chapters were sent to press is given hereunder in summarized form. For further or more detailed information, and for the latest available statistics, reference should be made to other publications issued by this Bureau, e.g., the *Monthly Review of Business Statistics*, the *Quarterly Summary of Australian Statistics*, the *Digest of Current Economic Statistics* and the various mimeographed statements issued on particular subjects.

### CHAPTER II. PHYSIOGRAPHY

#### § 2. Climate and Meteorology of Australia

**Rainfall: Australian Capital Cities, p. 48.**—Rainfall recorded in Australian capital cities during 1962 was as follows:—Perth, 28.75 ins.; Darwin, 63.82 ins.; Adelaide, 17.96 ins.; Brisbane, 41.39 ins.; Sydney, 44.90 ins.; Canberra, 28.91 ins.; Melbourne, 23.06 ins.; Hobart, 25.40 ins.

### CHAPTER VI. MANUFACTURING INDUSTRY

#### § 1. General

**Factory Development, p. 184.**—The following table gives a summary of operations in manufacturing industries during 1961–62.

**FACTORIES: SUMMARY, 1961-62**

Particulars	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Aust.
Factories . . . . . No.	23,629	17,300	5,824	5,519	4,418	1,760	58,450
Persons employed(a) . . .	461,087	377,745	101,637	99,094	51,033	30,070	1,120,666
Salaries and wages paid(b) £'000	487,553	384,433	93,345	99,531	46,420	30,720	1,142,002
Value of power, fuel, light, etc., used . . . . .	93,910	49,529	16,066	15,322	10,368	6,570	191,765
„ materials used . . . . .	1,223,666	907,804	305,003	212,561	135,085	71,267	2,855,386
„ production(c) . . . . .	968,694	717,327	175,298	173,914	98,041	63,937	2,197,211
„ output . . . . .	2,286,270	1,674,660	496,367	401,797	243,494	141,774	5,244,362
„ land and buildings . . .	643,483	443,683	89,632	98,297	49,168	79,574	1,403,837
„ plant and machinery . .	670,635	467,887	137,251	126,503	61,716	60,795	1,524,787

(a) Average over whole year; includes working proprietors. (b) Excludes amounts drawn by working proprietors. (c) Value added in process of manufacture (i.e., value of output less value of materials and fuel used).

#### § 8. Value of Production, etc.

**Value of Production, p. 211.**—The values of production (£'000) in Australia for the various classes of industry in 1961–62 were as follows:—

I., 61,237; II., 46,609; III., 182,172; IV., 887,023; V., 7,900; VI., 105,608; VII., 18,597; VIII., 126,175; IX., 297,730; X., 94,084; XI., 34,075; XII., 163,473; XIII., 34,287; XIV., 2,064; XV., 45,544; XVI., 90,633; Total, all classes, 2,197,211.

#### § 10. Principal Factory Products, pp. 217-20

The following table provides an abbreviated list of commodities and the quantities produced in factories in Australia during 1961–62 and 1962–63 (preliminary figures). Figures for 1961–62 may include revisions of figures shown earlier in this Year Book.

**QUANTITY OF PRINCIPAL ARTICLES PRODUCED IN FACTORIES:  
AUSTRALIA**

## CHAPTER XI. HOUSING AND BUILDING

## § 2. Building

**New Houses, p. 417.**—The number of new houses approved, commenced, completed and under construction in each State and Territory during 1962–63 was as follows.

## NEW HOUSES: NUMBER, 1962-63

(INCLUDING OWNER-BUILT HOUSES)

Particulars	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Approved ..	27,392	21,819	9,544	9,975	6,393	2,471	396	1,684	79,674
Commenced ..	25,145	20,811	9,027	9,610	6,222	2,442	368	1,592	75,217
Completed ..	25,591	20,328	9,019	9,646	6,593	2,504	432	1,683	75,796
Under construction at 30th June, 1963 ..	10,988	12,063	2,747	4,563	2,879	1,594	239	1,062	36,135

Of the 75,796 new houses completed during 1962–63, 40,194 had outer walls of brick, brick veneer, concrete or stone, 19,212 of wood (weatherboard, etc.), 16,083 of fibro-cement and 307 of other materials.

**New Flats, p. 420.**—The following table shows the number of new flats approved, commenced, completed and under construction in each State and Territory during 1962–63.

## NEW FLATS: NUMBER, 1962-63

(INDIVIDUAL LIVING UNITS)

Particulars	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Approved ..	7,308	4,203	811	801	1,073	173	27	246	14,642
Commenced ..	6,730	3,662	699	683	876	125	14	263	13,052
Completed ..	5,753	3,772	780	686	642	97	59	162	11,951
Under construction at 30th June, 1963 ..	4,815	2,132	330	328	613	134	19	124	8,495

**Value of New Buildings, p. 423.**—The values of all new buildings approved, commenced, completed and under construction in each State and Territory are shown in the following table for the year 1962–63.

## NEW BUILDINGS: VALUE, 1962-63

(INCLUDING ESTIMATED VALUE OF OWNER-BUILT HOUSES)

(£'000)

Particulars	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Approved ..	201,617	164,171	64,083	57,562	39,058	17,876	4,627	22,792	571,786
Commenced ..	216,409	158,241	62,326	55,858	40,959	17,306	4,123	20,310	575,532
Completed ..	206,393	166,784	56,347	60,560	43,214	17,064	4,436	19,062	573,860
Under construction at 30th June, 1963 ..	183,413	121,955	34,997	37,866	22,686	14,206	3,677	24,381	443,181

The value of new buildings completed in Australia during 1962–63, according to type of building, was as follows:—*Houses*—Brick, brick veneer, concrete and stone, £165,024,000; wood (weatherboard, etc.), £62,091,000; fibro-cement, £42,126,000; other, £1,034,000; total, £270,275,000; *Flats*—£34,833,000; *Other Buildings*—Hotels, hostels, etc., £18,534,000; shops, £24,556,000; factories, £57,911,000; offices, £35,898,000; other business premises, £22,526,000; educational, £42,777,000; religious, £8,452,000; health, £22,486,000; entertainment and recreation, £16,891,000; miscellaneous, £18,721,000; total other buildings, £268,752,000; grand total, new buildings, £573,860,000.

**Persons Working on Jobs Carried out by Builders of New Buildings, p. 425.**—The number of persons working on jobs *carried out by builders of new buildings* in Australia at 28th June, 1963, was as follows:—Carpenters, 49,376; bricklayers, 14,382; painters, 11,412; electricians, 6,897; plumbers, 11,536; builders' labourers, 19,958; other, 19,307; total, 132,868. Of this total, contractors actually working on jobs numbered 10,330, sub-contractors actually working on jobs, 22,394, and wage earners, 100,144.

## CHAPTER XII. LABOUR, WAGES AND PRICES

### RETAIL PRICES AND PRICE INDEXES

#### § 4. Tabular Statements of Retail Price Index Numbers

**Consumer Price Index, p. 450-2.**—The following table shows Consumer Price Index numbers for June and September quarters, 1963, for each capital city and the six capital cities combined for each Group and all Groups combined.

#### CONSUMER PRICE INDEX NUMBERS(a)

(Base of each Index: Year 1952-53 = 100.0)

Period	Sydney	Melbourne	Brisbane	Adelaide	Perth	Hobart	Six Capital Cities (b)
FOOD							
June Quarter, 1963 ..	121.3	125.8	130.2	126.8	124.4	127.0	124.5
September Quarter, 1963	121.2	126.7	131.5	128.0	124.6	128.7	125.0
CLOTHING AND DRAPERY							
June Quarter, 1963 ..	112.0	114.6	117.0	112.1	112.4	114.8	113.4
September Quarter, 1963	112.3	114.9	117.4	112.4	112.6	115.0	113.7
HOUSING							
June Quarter, 1963 ..	155.9	162.7	144.5	156.0	152.6	170.3	156.8
September Quarter, 1963	157.4	163.7	145.1	156.5	153.3	170.7	157.9
HOUSEHOLD SUPPLIES AND EQUIPMENT							
June Quarter, 1963 ..	112.7	114.0	112.9	106.0	107.0	123.8	112.4
September Quarter, 1963	111.0	112.1	111.2	104.0	105.0	123.4	110.6
MISCELLANEOUS							
June Quarter, 1963 ..	129.8	130.1	134.4	121.7	126.1	127.2	129.2
September Quarter, 1963	130.0	130.7	135.2	122.2	126.2	127.3	129.7
ALL GROUPS							
June Quarter, 1963 ..	123.7	126.4	127.9	122.5	122.8	128.2	124.9
September Quarter, 1963	123.7	126.7	128.4	122.8	122.7	128.8	125.1

(a) The index numbers measure price movements in each city individually and for the weighted average of the six capitals. They do not measure differences in price levels as between cities.  
(b) Weighted average.

## WHOLESALE PRICES AND PRICE INDEXES

## § 2. Wholesale Price (Basic Materials and Foodstuffs) Index

Index Numbers, p. 456.—Index numbers for each group of commodities and for All Groups for the index of wholesale prices of basic materials and foodstuffs are shown below for the year 1962-63 and for the months April to September, 1963.

## WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX NUMBERS

(Base of each Index: Average of 3 years ended June, 1939 = 100)

Period	Basic Materials							Foodstuffs and Tobacco (a)	Basic Materials and Foodstuffs		
	Metals and Coal	Oils, Fats and Waxes	Textiles	Chemicals	Rubber and Hides	Building Materials	Total		Goods principally imported (b)	Goods principally home produced (a)	Total All Groups (a)
1962-63	388	209	432	317	262	439	336	342	272	368	340
1963—											
April	389	209	464	316	250	439	338	338	273	365	338
May..	387	209	464	316	246	439	337	343	272	369	340
June..	385	209	474	316	231	444	337	354	271	378	346
July..	385	209	468	316	227	449	338	359	271	382	349
Aug..	383	209	458	283	223	462	336	359	274	380	348
Sept.	383	207	461	283	213	462	335	359	274	379	348

(a) Excludes potatoes and onions. See para. 3 on p. 455. (b) Represents only such imported commodities as are included in the Wholesale Price Index and does not measure changes in the prices of all imports.

## EXPORT PRICES AND PRICE INDEXES

## § 2. The Current Export Price Index

Index Numbers, p. 460.—Index numbers for each of the groups and "All Groups" for the year 1962-63 and for the months April to September, 1963, are shown in the table below.

## EXPORT PRICE INDEX NUMBERS

(Base of each Index: Year 1959-60 = 100)

Period	Wool	Meats	Dairy Produce	Cereals	Dried and Canned Fruits	Sugar	Hides and Tallow	Metals and Coal	Gold	All Groups
1962-63..	104	p 101	88	107	p 90	p 107	72	89	100	p 101
1963—										
April	112	p 98	90	104	88	p 121	69	91	100	p 105
May ..	112	p 100	90	104	88	p 128	68	90	100	p 105
June ..	115	p 102	93	103	p 89	p 165	68	95	100	p 109
July ..	114	p 103	94	103	p 92	p 164	67	94	100	p 109
August	110	p 103	94	102	p 93	p 165	66	96	100	p 107
September	112	p 105	94	102	p 97	p 159	64	94	100	p 108

## WAGES

## § 2. Rates of Wage and Hours of Work

Weekly Wage Rates, pp. 466 and 471.—The following table shows for each State and Australia the weighted average minimum weekly rates of wage payable, and the index numbers based thereon, for adult males and for adult females, at 31st March and 30th June, 1963.

## WEEKLY WAGE RATES: ADULT MALES AND FEMALES

WEIGHTED AVERAGE MINIMUM WEEKLY RATES PAYABLE FOR A FULL WEEK'S WORK  
(EXCLUDING OVERTIME) AND INDEX NUMBERS OF WAGE RATES

Date	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Aust.
------	--------	------	--------	----------	----------	------	-------

## ADULT MALES—RATES OF WAGE

	<i>s.</i>	<i>d.</i>	<i>s.</i>	<i>d.</i>	<i>s.</i>	<i>d.</i>	<i>s.</i>	<i>d.</i>	<i>s.</i>	<i>d.</i>	<i>s.</i>	<i>d.</i>
31st March, 1963 ..	374	3	363	8	359	8	356	6	365	4	364	5
30th June, 1963 ..	378	8	368	5	364	10	360	10	368	5	368	11
											371	4

## ADULT MALES—INDEX NUMBERS

(Base: Weighted Average Weekly Wage Rate for Australia, 1954 = 100)

31st March, 1963 ..	132.5	128.8	127.4	126.2	129.4	129.0	129.9
30th June, 1963 ..	134.1	130.5	129.2	127.8	130.5	130.6	131.5

## ADULT FEMALES—RATES OF WAGE

	<i>s.</i>	<i>d.</i>	<i>s.</i>	<i>d.</i>	<i>s.</i>	<i>d.</i>	<i>s.</i>	<i>d.</i>	<i>s.</i>	<i>d.</i>	<i>s.</i>	<i>d.</i>
31st March, 1963 ..	269	11	256	8	255	8	252	4	261	2	248	4

											261	10
											264	0

## ADULT FEMALES—INDEX NUMBERS

(Base: Weighted Average Weekly Wage Rate for Australia, 1954 = 100)

31st March, 1963 ..	135.6	128.9	128.4	126.7	131.2	124.7	131.5
30th June, 1963 ..	136.6	130.3	129.7	127.3	132.0	125.2	132.6

### § 4. Surveys of Wage Rates, Earnings and Hours

Survey of Weekly Earnings and Hours, October, 1962, p. 482.—Reference was made in Chapter XII to the publication in this Appendix of further particulars of this survey. These had not been prepared when the Appendix went to press.

### § 5. Basic Wages in Australia

State Basic Wages, p. 506.—The following table shows State basic wages operative in August, 1963.

STATE BASIC WAGES: WEEKLY RATES

State and area	August, 1963		
	Date of operation(a)	Males	Females
New South Wales .. .. .	Aug., 1963	<i>s.</i> <i>d.</i> 303 0	<i>s.</i> <i>d.</i> 227 6
Victoria(b) .. .. .	(c)	287 0	215 0
Queensland—			
Southern Division—			
Eastern District, including Brisbane ..	6.5.63	286 0	214 6
Western District .. .. .	6.5.63	296 6	222 6
Mackay Division .. .. .	6.5.63	295 0	221 3
Northern Division—			
Eastern District .. .. .	6.5.63	296 6	222 6
Western District .. .. .	6.5.63	318 6	239 0
South Australia(d) .. .. .	10.7.61	283 0	212 0
Western Australia—			
Metropolitan Area .. .. .	29.7.63	301 6	226 1
South-West Land Division .. .. .	29.7.63	299 11	224 11
Goldfields and other areas .. .. .	29.7.63	294 1	220 7
Tasmania(b) .. .. .	July, 1961(e)	294 0	220 6

(a) Where dates are not quoted, wage rates operate from the beginning of the first pay-period commencing in the month shown. (b) No basic wage declared. Rates shown are those adopted by most Wages Boards. (c) During July and August, 1961, Wages Boards adopted the Commonwealth rate. (d) The "living wage" declared for the metropolitan area is also adopted for country areas, except at Whyalla and nearby areas, where a loading of 5s. for adult males is generally payable. (e) Most Wages Boards adopted the Commonwealth rates from July, 1961.

The Commonwealth basic wage is still the same as that operative from 7th July, 1961 (p. 500).

### § 6. Wage Margins<sup>(1)25</sup>

Margins Case, 1963, p. 510.—On 5th February, 1963, the Commonwealth Conciliation and Arbitration Commission, constituted by Kirby C.J. (President), Moore and Ashburner JJ. (Deputy Presidents) and D. G. Apsey, C.C. commenced hearing an application for an increase in margins payable under the Metal Trades Award.

Judgment was delivered on 18th April, 1963, the order of the Commission being that margins for all classifications (other than 252u) in clause 4 of the Metal Trades Award be increased by ten per cent., calculated to the nearest shilling, the increases to operate from the beginning of the first pay-period commencing on or after 22nd April, 1963, and to remain in operation until 21st April, 1964.

### § 7. Leave

**Three Weeks' Annual Leave Inquiry, 1963, p. 514.**—On 5th February, 1963, the Commonwealth Conciliation and Arbitration Commission, constituted by Kirby C.J. (President), Moore J. (Deputy President) and D. G. Apsey, C.C., commenced hearing an application, which had been adjourned from 30th May, 1962, to vary the Metal Trades Award to provide three weeks' paid annual leave instead of two.

The Commission's judgment, delivered on 18th April, 1963, provided for a period of 21 consecutive days' leave for employees who had completed twelve months' continuous service by or after 30th November, 1963, and for proportionate leave for periods of one month and over in respect of employment after 1st June, 1963.

The application of the new standard of annual leave for secondary industry in other federal awards was a matter for individual Commissioners, upon proper application being made for variation.

## EMPLOYMENT AND UNEMPLOYMENT

### § 1. Employment

**Wage and Salary Earners in Civilian Employment, p. 517.**—On page 517 it is stated that revised particulars of wage and salary earners in civilian employment will appear in this Appendix. However, the figures were not available at the time of going to press, and it has not been possible to include them in this issue.

## CHAPTER XIII. OVERSEA TRADE

### § 1. Legislation Affecting Oversea Trade

**Trade Agreements.**—*Japan, pp. 539–40.* Following a review of the Agreement on Commerce between Australia and Japan, a Protocol of Amendment was signed on 5th August, 1963. Under the Protocol, Australia agreed to disinvoke action against Japan under Article XXXV of the G.A.T.T., and thus a full G.A.T.T. relationship is to be established between the two countries. This arrangement will become effective when the Protocol has been ratified by both Governments. Pending this action, both countries agreed to apply the new Agreement provisionally.

The specific undertakings agreed in 1957 have now lapsed and the following commitments entered into.

Japan has:

- (a) undertaken not to accord less favourable import treatment (apart from tariff) for raw wool than for raw cotton;
- (b) stated that it has no present intention of imposing a duty on wool;
- (c) undertaken to continue imports of Australian soft wheat at a stabilized level, and to purchase Australian hard wheat when requirements met;
- (d) stated that it will endeavour to expand opportunities for imports into Japan of Australian sugar, canned meat, leather, motor vehicles, butter and cheese.

Australia has:

- (a) undertaken to consult Japan on temporary protection cases affecting Japanese products—in such consultations, Japan will consider whether the need for temporary protection can be obviated by measures taken in Japan;
- (b) stated that equal opportunities of fair and equal competition are accorded to Japanese products in Australian Government purchases overseas.

The new Agreement will be effective for three years from the date of ratification and thereafter subject to three months notice of termination by either Government. There is provision for consultations to take place at least annually.

### § 9. Direction of Oversea Trade

**According to Countries, p. 550.**—The following table shows particulars of the values of total imports and total exports of Australia, including *bullion and specie*, according to countries of origin or consignment, for the year 1962–63.

**VALUES OF AUSTRALIAN IMPORTS AND EXPORTS: COUNTRIES OF  
ORIGIN OR CONSIGNMENT, 1962-63p  
(£A. '000 f.o.b.)**

Travel .. .. .	42	41	44
Property income .. .. .	164	148	171
Government .. .. .	26	27	27
Other .. .. .	72	78	84
Balance on Current Account .. .. .	-371	2	-214
<b>CAPITAL ITEMS(a)—</b>			
Inflow of investment—			
Government securities—			
Domiciled overseas .. .. .	12	6	48
Domiciled in Australia .. .. .	-2	-1	(c)
Total, Government Securities .. .. .	10	5	(c)
Companies—			
Undistributed income .. .. .	58	30	(c)
Other direct .. .. .	130	73	(c)
Portfolio .. .. .	48	37	(c)
Total, Companies .. .. .	236	140	(c)
Total Inflow of Investment .. .. .	246	145	(c)
Outflow of investment .. .. .	-5	-7	(c)
Net inflow of investment .. .. .	241	138	(c)
Other official capital movements .. .. .	-20	..	-11
Marketing authorities .. .. .	-3	-33	5
Net identified capital inflow .. .. .	218	105	} (c) 288
Balancing item .. .. .	113	-18	
Net Apparent Capital Inflow .. .. .	331	87	(c) 288
Monetary movements—			
Change in net I.M.F. position .. .. .	-78	79	12
Change in international reserves .. .. .	39	10	65
Other .. .. .	-1	..	-3
Net Monetary Movements .. .. .	-40	89	74

(a) For current account balances minus sign (-) denotes deficit; for capital items other than monetary movements minus sign (-) denotes outflow; for monetary movements minus sign (-) denotes decrease in international reserves or net I.M.F. position or an increase in foreign holdings of Australian currency.

(b) The amounts shown represent the recorded trade figures adjusted for balance of payments purposes. Adjustments affect both coverage and valuation.

(c) Particulars of the Survey of Oversea Investment are not yet available for 1962-63. Relevant items for this period are therefore combined with the balancing item.

(d) Total freight and insurance on imports, whether payable overseas or in Australia, is estimated at £139,000,000 in 1960-61, £113,000,000 in 1961-62 and £129,000,000 in 1962-63.

## CHAPTER XIV. TRANSPORT AND COMMUNICATION

## SHIPPING

## § 3. Oversea Shipping

Total Oversea Shipping, States, p. 576.—The following table shows particulars of the entrances and clearances of vessels direct from, and to, overseas countries during 1962-63.

OVERSEA SHIPPING: ENTRANCES AND CLEARANCES  
OF VESSELS DIRECT, 1962-63p

Particulars		N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	Aust.
Entrances	No.	1,098	548	626	200	823	83	34	3,412
	'000 net tons	6,219	4,018	2,360	974	5,006	289	99	18,965

(a) Excludes South Brisbane-Border section of the uniform gauge line (69 route miles). (b) Financial details include road motors. (c) Excludes government grants. (d) Included with Coaching. Minus sign (—) denotes loss.

NOTE.—The foregoing table is prepared from quarterly statements supplied by each government railway, and figures therein are not completely comparable with those shown in Chapter XIV. Transport and Communication, which are derived, in the main, from the annual reports of the government railways.

## MOTOR VEHICLES

Motor Vehicle Registrations, pp. 609-10.—Motor vehicles registered at 30th June, 1963, and new motor vehicles registered during 1962-63 were as follows.

## MOTOR VEHICLES: REGISTRATIONS, 1962-63(a)

State or Territory	Number of motor vehicles registered at 30th June, 1963				Number of new motor vehicles registered, 1962-63(b)			
	Motor cars(c)	Commercial vehicles (d)	Motor cycles	Total	Motor cars(c)	Other vehicles	Motor cycles	Total
New South Wales ..	744,800	380,375	19,516	1,144,691	107,085	21,059	1,834	129,978
Victoria ..	e775,894	e185,980	15,197	977,071	77,838	14,260	656	92,754
Queensland ..	301,225	147,543	14,063	462,831	36,472	9,762	1,178	47,412
South Australia ..	248,082	75,736	14,465	338,283	27,513	5,647	859	34,019
Western Australia ..	167,446	76,605	11,190	255,241	23,142	6,367	773	30,282
Tasmania ..	79,670	27,139	1,988	108,797	9,004	2,005	52	11,061
Northern Territory ..	6,315	5,445	420	12,180	631	445	67	1,143
Aust. Capital Territory ..	20,053	4,796	368	25,217	3,241	512	27	3,780
<b>Total</b> ..	<b>e2,343,485</b>	<b>e903,619</b>	<b>77,207</b>	<b>3,324,311</b>	<b>284,926</b>	<b>60,057</b>	<b>5,446</b>	<b>350,429</b>

(a) Excludes Defence Service vehicles, trailers, road tractors, etc., and dealers' plates. (b) This series is not strictly comparable with the Number of Motor Vehicles Registered series. (c) Includes taxis, hire cars and station wagons. (d) Includes utilities, panel vans, lorries and omnibuses. (e) Registration in Victoria is according to purpose and not type of vehicle; consequently, motor car registrations in this series are overstated by the inclusion of commercial vehicles registered for private use.

## CIVIL AVIATION

Statistical Summaries, p. 619.—The following table shows particulars of the operations of regular internal services and overseas services for 1962–63.

**CIVIL AVIATION: OPERATIONS OF REGULAR INTERNAL SERVICES  
AND OVERSEA SERVICES, 1962-63**

Particulars	Regular internal services(a)	Oversea services(b)
Route miles (unduplicated)(c) .. .. .	65,837	71,676
Hours flown .. .. .	217,915	48,651
Miles flown .. .. . '000	43,703	20,340
Paying passengers .. .. .	2,832,934	294,908
Paying passenger-miles .. .. . '000	1,221,179	1,014,866
Freight—

Mail—		
Tons(d) .. .. .	6,458	2,468
Ton-miles(d) .. .. . '000	3,319	15,190

(a) Includes only services operating within the Australian mainland and Tasmania. (b) Airlines wholly or partly owned by Australian interests. (c) At 30th June, 1963. (d) In terms of short tons (2,000 lb.).

## BROADCASTING AND TELEVISION

## § 4. Licences, etc.

Broadcast Listeners' and Television Viewers' Licences, p. 637.—Broadcast listeners' licences in force at 30th June, 1963, were as follows:—New South Wales, 802,046; Victoria, 607,036; Queensland, 334,566; South Australia, 256,741; Western Australia, 165,637; Tasmania, 73,760; Australia, 2,239,786. Figures for the Northern Territory and the Australian Capital Territory have been included with those for South Australia and New South Wales respectively.

Television viewers' licences in force at 30th June, 1963, were as follows:—New South Wales, 637,766; Victoria, 530,256; Queensland, 178,391; South Australia, 167,502; Western Australia, 95,907; Tasmania, 45,503; Australia, 1,655,325.

## CHAPTER XV. WELFARE SERVICES

## COMMONWEALTH EXPENDITURE ON SOCIAL AND HEALTH SERVICES

## National Welfare Fund, p. 640

The following table shows particulars of payments of social and health services in each State during 1962–63.

**COMMONWEALTH EXPENDITURE FROM NATIONAL WELFARE FUND  
ON SOCIAL AND HEALTH SERVICES, 1962-63**

Total expenditure .. .. .	9,285	8,297	2,771	1,296	1,009	663	23,321

(a) Year 1961. (b) Includes the Epileptic Home. (c) Excludes hospitals not operating under the terms of the *Lunacy Act*. (d) In addition, there are in New South Wales 57 visiting specialists who are paid for their services.

## CHAPTER XVIII. EDUCATION, ETC.

## EDUCATION

## § 9. Universities

Teaching and Research Staff and Students Enrolled, pp. 743-4.—The following table shows the numbers of full-time teaching and research staff and of students enrolled at Australian universities for the year 1962.

## UNIVERSITIES: FULL-TIME TEACHING AND RESEARCH STAFF AND STUDENTS ENROLLED, 1962

University	Full-time teaching and research staff	Students enrolled(a)
Australian National University .. .. .	139	1,564
Sydney .. .. .	698	14,030
New South Wales .. .. .	672	9,164
New England .. .. .	227	2,951
Melbourne .. .. .	691	12,054
Monash .. .. .	121	798
Queensland .. .. .	580	10,507
Adelaide .. .. .	406	6,824
Western Australia .. .. .	247	3,853
Tasmania .. .. .	120	1,572
<b>Total .. .. .</b>	<b>3,901</b>	<b>63,317</b>

(a) Adjusted total.

## CHAPTER XX. PRIVATE FINANCE

## CURRENCY

## § 2. Coinage

**Issues of Australian Coins, p. 839.**—The net issues of Australian coins to 30th June, 1963, were:—silver, £47,315,000; bronze, £3,657,000; total, £50,972,000.

## § 3. Notes

**The Australian Note Issue, p. 841.**—The average value of notes in circulation for the year 1962–63 was £441,597,000. This amount was distributed in denominations as follows:—10s., £13,088,000; £1, £70,259,000; £5, £197,196,000; £10, £157,878,000; £20, £2,000; £50, £30,000; £100, £34,000; and £1,000, £3,110,000. The amount held by the banks was £62,480,000 and by the public £379,117,000.

## BANKING

## § 1. Cheque-Paying Banks

**The Reserve Bank of Australia, pp. 847-8.**—The average liabilities of the Central Banking Business (including Note Issue Department) of the Reserve Bank for the year ended June, 1963, amounted to £1,045,334,000. Capital and reserve funds amounted to £28,513,000; notes on issue to £438,262,000; statutory reserve deposit accounts of trading banks to £212,254,000; other deposits of trading banks to £59,512,000; deposits of savings banks to £178,211,000; other liabilities to £128,582,000.

Particulars of the average assets were as follows:—gold and balances held abroad, £514,105,000; Australian notes and coin, £9,118,000; cheques and bills of other banks, £1,930,000; government and other securities (including treasury bills), £449,534,000; bills receivable and remittances in transit, £7,658,000; and other assets, £62,989,000.

**The Commonwealth Trading Bank of Australia, p. 851.**—The average liabilities in Australia of the Commonwealth Trading Bank for the year ended June, 1963, were £316,408,000. Of this amount, deposits not bearing interest amounted to £191,318,000 and deposits bearing interest to £121,031,000; balances due to other banks to £800,000; other liabilities to £3,259,000.

The average assets in Australia, £325,664,000, included cash and cash balances £10,990,000; treasury bills and seasonal securities, £2,978,000; other Commonwealth and State government securities, £77,981,000; loans to authorized dealers in the short-term money market, £4,078,000; statutory reserve deposits with Reserve Bank, £34,725,000; cheques, bills and balances with other banks, £14,468,000; loans (other than loans to authorized dealers in the short-term money market), advances and bills discounted, £165,698,000; other assets, £14,746,000.

**Private Trading Banks, p. 852.**—Average liabilities in Australia of the Private Trading Banks for the year ended June, 1963, were £1,632,375,000. Deposits not bearing interest amounted to £1,002,405,000 and deposits bearing interest to £589,453,000; balances due to other banks to £8,613,000; other liabilities to £31,904,000.

The average assets in Australia, £1,645,176,000, included cash and cash balances, £58,413,000; treasury bills and seasonal securities, £31,315,000; other Commonwealth and State government securities, £296,390,000; loans to authorized dealers in the short-term

money market, £27,899,000; statutory reserve deposits with Reserve Bank, £177,079,000; cheques, bills and balances with other banks, £62,555,000; loans (other than loans to authorized dealers in the short-term money market), advances and bills discounted, £894,871,000; other assets, £96,654,000.

**Clearing House Returns—Average Weekly Clearings, p. 860.**—The average weekly bank clearings in each capital city for the year ended June, 1963, were as follows:—Sydney, £223,991,000; Melbourne, £217,516,000; Brisbane, £49,051,000; Adelaide, £45,749,000; Perth, £27,703,000; Hobart, £8,078,000; total, £572,088,000.

**Debits to Customers' Accounts—Cheque-paying Banks, p. 860.**—The average weekly debits to customers' accounts in each State for the year 1962–63 for all cheque-paying banks (excluding debits to accounts of Australian Governments in capital cities) were as follows:—New South Wales, £356,556,000; Victoria, £325,271,000; Queensland, £92,569,000; South Australia, £65,803,000; Western Australia, £44,118,000; Tasmania, £17,534,000; Northern Territory, £1,250,000; Australian Capital Territory, £5,086,000; total, £908,187,000.

## § 2. Savings Banks

**Number of Operative Accounts and Business Transacted, pp. 864–5.**—The numbers of operative accounts in the several States at end of June, 1963, were:—New South Wales, 3,562,000; Victoria, 3,203,000; Queensland, 1,345,000; South Australia, 1,104,000; Western Australia, 683,000; Tasmania, 350,000; Northern Territory, 22,000; and Australian Capital Territory, 54,000; total, 10,323,000. The amounts on deposit in the several States at 30th June, 1963, were:—New South Wales, £703,998,000; Victoria, £649,031,000; Queensland, £235,176,000; South Australia, £208,078,000; Western Australia, £104,406,000; Tasmania, £56,428,000; Northern Territory, £3,496,000; and Australian Capital Territory, £9,233,000; total, £1,969,846,000. Total excess of deposits over withdrawals during 1962–63 was £176,610,000, and interest added was £58,350,000.

## INSURANCE

### § 2. Life Insurance

**New Policies Issued, Policies Discontinued, etc., Premiums and Claims, Australia, pp. 877–83.**—The following is a summary of the life insurance business transacted in Australia during 1962 (figures for 1961 in parentheses) compiled from monthly returns collected from the 40 (39) companies registered under the *Life Insurance Act 1945–1961*, and excluding the Government Insurance Office of New South Wales and the Queensland State Government Insurance Office which operate only within their respective States. Particulars shown are therefore not entirely comparable with those in Chapter XX., which are derived from annual returns and include business of the State Government Offices.

**Ordinary, Industrial, and Superannuation Businesses, respectively:**—*New policies issued in Australia*—numbers, 315,576 (314,971), 155,593 (176,117), 75,281 (76,986); sums insured, £632,004,000 (£579,341,000), £52,171,000 (£44,192,000), £242,229,000 (£219,062,000); *policies discontinued or reduced in Australia*—numbers, 215,719 (342,112, including Superannuation Business), 276,413 (316,278), 96,308 (for year 1961, included with Ordinary Business); sums insured, £247,097,000 (£301,813,000, including Superannuation Business), £33,991,000 (£33,692,000), £85,548,000 (for year 1961, included with Ordinary Business). Particulars of annuities are excluded.

*Premium receipts in Australia* of Ordinary, Industrial, and Superannuation Businesses, respectively, amounted to £98,596,000 (£125,970,000, including Superannuation Business); £15,906,000 (£15,962,000); £37,025,000 (for year 1961, included with Ordinary Business). *Claims, etc., paid* amounted to—£41,470,000 (£53,724,000, including Superannuation Business); £12,827,000 (£14,277,000); £15,086,000 (for year 1961, included with Ordinary Business). Particulars of annuities are included.

### OVERSEA INVESTMENT BY PRIVATE INVESTORS

**Net Annual Flow of Investment, p. 899.**—The net annual flow of investment to Australia for the year ended 30th June, 1962, was £A. 138.2 m. Total annual *inflow* was £A. 145.3m. Of this amount, £A. 140.4m. was invested in companies in Australia, £A.—1.5m. in public authority securities domiciled in Australia, and £A. 6.4m. in Australian public authority debt domiciled overseas. Total annual *outflow* was £A. 7.1m.; £A. 7.5m. was invested in companies overseas, and net remittances from Australia by life insurance companies were £A.—0.4m.

## CHAPTER XXI. PUBLIC FINANCE

### COMMONWEALTH FINANCE

**Consolidated Revenue Fund, pp. 914 and 923.**—The table below shows details of revenue and expenditure for the year 1962–63.

#### COMMONWEALTH CONSOLIDATED REVENUE FUND: REVENUE AND EXPENDITURE, 1962-63 (£'000)

<b>Adjusted(b)</b> .. .. .	<b>2,186,556</b>	<b>2,187,326</b>	<b>— 770</b>	<b>274,789</b>

(a) Represents the combined transactions of the Consolidated Revenue Fund and the Business Undertakings—Railways, Tramways and Omnibuses and Sydney Harbour Section of the Maritime Services Board—included in the annual Budget Papers. Adjustments have been made to exclude duplications.  
(b) To avoid duplication in aggregating particulars for the Commonwealth and States, the grand totals have been adjusted to exclude State payments to the Commonwealth in respect of pay-roll tax and Commonwealth payments to the States included in State Consolidated Revenue Funds in respect of interest on State debts, special grants, financial assistance grants, special financial assistance, grants to universities, tuberculosis, capital expenditure and National Welfare payments. There are other relatively minor payments for which adjustments have not been made and the adjusted figures are therefore still slightly overstated.

## GOVERNMENT SECURITIES ON ISSUE: COMMONWEALTH AND STATES

## § 3. Government Securities on Issue: Commonwealth and States

Securities on Issue and Annual Interest Payable, p. 957.—The following table shows details of the government securities on issue on account of the Commonwealth and States and the annual interest payable thereon at 30th June, 1963.

GOVERNMENT SECURITIES ON ISSUE AND ANNUAL INTEREST PAYABLE AT  
30th JUNE, 1963: COMMONWEALTH AND STATES

Sheep ..	70,021	27,472	22,811	15,738	18,727	3,570	14	279	158,632
Pigs ..	392	298	402	145	131	70	2	(a)	1,440

(a) Less than 500.

### § 5. Pastoral Products: Wool

**Wool Production, p. 1068.**—The estimated production of wool (greasy basis) in Australia during 1962–63 was 1,663,300,000 lb.

### § 6. Pastoral Products: Meat

**Production of Meat, pp. 1077 and 1079.**—The following table shows, for each State and Territory, the production of meat during 1962–63.

**PRODUCTION OF MEAT, 1962-63 p**  
(Tons Carcass Weight)

Particulars	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
Beef and veal ..	259,626	209,495	312,956	36,079	55,896	23,470	5,127	1,731	904,380
Mutton and lamb ..	198,335	236,533	38,532	58,575	41,255	19,052	85	1,635	594,002
Total meat (incl. pigmeats) ..	488,303	472,812	380,672	106,488	108,821	47,889	5,327	3,694	1,614,006

### OTHER RURAL INDUSTRIES: DAIRYING, POULTRY AND BEE-FARMING

#### § 1. The Dairying Industry

**Principal Dairy Products, pp. 1088-1096.**—Particulars of the total production of these commodities in each State and the Australian Capital Territory during 1962–63 are shown below.

**PRINCIPAL DAIRY PRODUCTS, 1962-63 p**

Particulars	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.(a)
Total whole milk ('000 gals.)	325,869	676,205	247,720	94,330	56,286	78,627	1,116	1,480,153
Butter(b) .. (tons)	36,466	101,851	36,619	7,408	7,003	13,273	1	202,621
Cheese(b) .. (tons)	5,304	25,288	10,200	15,028	1,471	662	..	57,953
Pigmeats .. (tons)	30,342	26,784	29,184	11,834	11,670	5,367	328	115,624

(a) Includes Northern Territory.

(b) Factory and farm production.

## CHAPTER XXV. MINERAL INDUSTRY

### § 2. The Mineral Industry

**Quantity and Value of Production, pp. 1154 and 1192.**—In the following table, particulars are given of the quantity and value of production in Australia of the principal minerals during the year 1962.

**MINERAL PRODUCTION: QUANTITIES AND VALUES, AUSTRALIA, 1962 p**  
**METALLIC MINERALS**

Principal contents of metallic minerals produced								Local Value of production—metal mining
Copper	Gold	Iron	Lead	Silver	Tin	Tungsten (a)	Zinc	
'000 tons	'000 fine oz.	'000 tons	'000 tons	'000 fine oz.	tons	tons	'000 tons	£'000
111	1,073	3,120	370	17,541	2,714	1,042	338	80,144

(a) In terms of WO<sub>3</sub> (tungstic oxide).

MINERAL PRODUCTION: QUANTITIES AND VALUES, AUSTRALIA, 1962 p  
—continued

NON-METALLIC AND FUEL MINERALS

Quantities produced						Local value of production —non-metal and fuel mining
Coal		Asbestos	Gypsum	Limestone(a)	Salt	
Black	Brown					
'000 tons 24,481	'000 tons 17,137	Short tons 18,416	tons 630,908	'000 tons 6,377	tons 534,966	£'000 79,588

(a) Excludes limestone used as a construction material.

§ 3. Gold, § 4. Lead, Silver and Zinc, § 5. Copper, § 6. Tin,  
pp. 1156–69

Smelter and refinery production of the principal metals treated in Australia during the year 1962 is shown below.

SMELTER AND REFINERY PRODUCTION OF PRINCIPAL METALS: AUSTRALIA,  
1962

Refined Gold	Refined silver (a)	Refined lead (a)	Lead content of lead bullion produced for export (a)	Refined zinc (a)	Refined copper (a)	Refined tin (a)
'000 fine oz. 1,163	'000 fine oz. 7,378	Tons 190,125	Tons 73,110	Tons 167,927	Tons 79,450	Tons 2,704

(a) Source: Bureau of Mineral Resources.

CHAPTER XXVII. REPATRIATION

§ 2. War Pensions, § 3. Service Pensions, pp. 1211-8

The following table gives a summary of war and service pensions current at 30th June, 1963, and of the amounts paid in pensions during the year 1962–63.

WAR AND SERVICE PENSIONS: SUMMARY, 1962–63

Particulars	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Abroad	Total
War Pensions—(a)								
Pensioners at end of year	225,500	190,949	97,098	66,565	57,543	28,214	4,532	670,401
Amount paid during year	24,125	20,941	10,394	6,190	5,263	2,834	771	70,518
Service Pensions—(a)								
Pensioners at end of year	19,385	15,394	10,597	6,674	7,526	2,585	..	62,161
Amount paid during year	3,547	2,475	1,681	1,243	1,464	419	..	10,829

(a) Includes dependants of eligible pensioners.

## CHAPTER XXIX. MISCELLANEOUS

## § 4. Retail Trade, p. 1245

Census of Retail Establishments and Other Services, 1961-62.—The following tables contain preliminary results of the Census of Retail Establishments and Other Services taken in respect of the year ended 30th June, 1962. Detailed explanatory notes concerning the scope of the Census, the procedure and the method of classification adopted, and other matters may be found in the prefaces to a series of mimeographed preliminary statements for Australia and the individual States and Territories issued by this Bureau.

NUMBER OF ESTABLISHMENTS WHICH SOLD GOODS IN EACH COMMODITY GROUP SPECIFIED(a), 1961-62

Commodity group	N.S.W.	Vic.	Q'land	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
<b>Food—</b>									
Groceries .. ..	12,532	8,819	4,699	3,480	2,342	1,347	82	78	33,379
Meat .. ..	5,111	3,674	1,890	1,439	1,272	599	48	41	14,074

(a) Figures refer to establishments with total retail sales of £500 or more. (b) Excludes basic building materials and builders' hardware and supplies (such as tools of trade, paint, etc.). (c) Excludes tractors, farm machinery and implements, earth-moving equipment, etc. (d) Total number of individual establishments. Many establishments showed sales in more than one commodity group. Thus the number of establishments selling goods in each commodity group does not add down to the total number of individual establishments.

(a) Figures refer to establishments with total retail sales of £500 or more. They relate to the total value of all goods held for retail sale (including stocks of materials for use in repairs to customers' goods, and foodstuffs for the provision of meals and refreshments) at 30th June, 1962.

(b) Not available for publication.

The figures below indicate, respectively, the number and page of the Official Year Book to which reference is made. In cases where matter was published in more than one previous issue, the volume and page for the last issue containing such matter are given. For possible revisions, however, issues immediately following the one referred to should also be consulted.

## GENERAL INDEX\*

NOTE.—This index is preceded by a list of the special articles, etc., which have appeared in previous issues of the Official Year Book. A list of the maps and graphs contained in this issue will be found on page ix. Area, population, etc., of particular localities are indexed under the locality concerned. Subject matter extending continuously over more than one page is indexed according to the first page only. *Where more than one reference to a subject is given, the chief reference, wherever it has been possible to determine it, is indicated by italic type. Two references to a subject so indicated signify major, and approximately equal, importance.*

# Printed Publications issued by the Central Office of the Commonwealth Bureau of Census and Statistics

NOTE.—The publications listed below may be bought from the Government Printer, Canberra, and in each capital city from the Deputy Commonwealth Statistician and the Commonwealth Sub-Treasury. They may also be ordered through the leading booksellers in the principal cities of Australia. In addition to printed publications, a number of mimeographed publications are available in limited numbers free of charge. Publications dealing with individual States only are produced by the Deputy Commonwealth Statistician in each State. A complete list of publications issued by the Bureau is given in *Publications of the Commonwealth Bureau of Census and Statistics* (with subject index) available from the Commonwealth Statistician, Canberra. (See also pp. 1249–52 of this volume.)
