## PREFACE

---

By the Constitution of the Commonwealth of Australia, the Parliament of the Commonwealth is empowered, subject to the Constitution, "to make laws for the peace, order, and good government of the Commonwealth, with respect to . . . . . Census and statistics." In the exercise of the power so conferred, a *Census and Statistics Act* was passed in 1905, and in the year following the Commonwealth Bureau of Census and Statistics was created. The first Official Year Book was published early in 1908. The publication here presented is the forty-ninth Official Year Book issued under the authority of the Commonwealth Government.

The Synopsis on pp. xi to xxix following shows the general arrangement of the work. The special index (preceding the General Index) provided at the end of the volume, together with certain references given in the various chapters, will assist in tracing in previous issues special articles and other more or less important miscellaneous matter which, in order to conserve space, have been omitted or abbreviated in the present volume. Where, in the General Index, more than one reference to a subject is given, the chief reference (or references) has been specially indicated wherever possible.

Among the new matter included and existing matter revised or rearranged in this volume the following items may be especially mentioned.

Chapter III. General Government. Special article on the Commonwealth Parliament (pp. 65-71); revised and enlarged section relating to Commonwealth Government Departments (pp. 87-98).

Chapter V. The Territories of Australia. Special article on growth and development of Canberra (pp. 122-32); new tables showing results of the 1961 Population Census of External Territories (pp. 164-78).

Chapter IX. Population. New tables showing results of the 1961 Population Census (pp. 317-35); revised section on overseas arrivals and departures (pp. 336-42).

Chapter XI. Housing and Building. New tables on Census dwellings showing results of the 1961 Population Census (pp. 403-15); revised and enlarged sections relating to government housing activities and advances to home purchasers (pp. 426-44).

Chapter XII. Labour, Wages and Prices. New sections showing results of the 1962 Survey of Weekly Earnings and Hours (pp. 482-5), and the Three Weeks' Annual Leave Inquiry, 1962 (pp. 513-4).

Chapter XIII. Oversea Trade. New sections dealing with Australian Trade Missions (p. 544), and European Economic Integration (pp. 545-6).

Chapter XVIII. Education, Cultural Activities and Research. Extensively revised sections dealing with education (pp. 725-60); new matter dealing with botanical and zoological gardens (pp. 774-5), book publishing (775-7); film production, drama, etc. (pp. 777-81); special article on Science and Technology in Australia (pp. 781-4).

Chapter XX. Private Finance. New sections dealing with decimal currency (pp. 835-8), and overseas investment (pp. 894-900); enlarged section dealing with pension and superannuation schemes (pp. 906-12).

Chapter XXII. Rural Industry. Revised material incorporating the former separate chapters relating to Agricultural Production, Pastoral Production, and Farm-yard Dairy and Bee Products; new matter relating to the technical aspects of rural industry, e.g. pasture improvement, soil conservation (pp. 1001-4).

Chapters XXIII. Forestry and XXIV. Fisheries. Revised and expanded material.

Chapter XXVIII. International Relations. New chapter incorporating material previously included in the Miscellaneous chapter, together with additional sections covering Australia's participation in international affairs (pp. 1221-34).

Appendix. Preliminary results of 30th June, 1962, Census of Retail Establishments and other Services (pp. 1291-5).

The material in the Year Book has been carefully checked throughout, but I shall be grateful to those who will be kind enough to point out defects or make suggestions.

The statistics contained in the majority of the chapters of this volume relate to the years ended June or December, 1962, and the Appendix contains a selection of the more significant data which have become available since the chapters were prepared. As with previous Year Books, the contents of this issue have already been published in separate Parts as the successive chapters or groups of chapters were printed.

More detailed statistics on subjects dealt with in the Year Book are available in the various annual printed reports published by this Bureau. The more recent statistics published by the Bureau are contained in the *Digest of Current Economic Statistics* (monthly), the *Monthly Review of Business Statistics*, the *Quarterly Summary of Australian Statistics*, and in other publications issued monthly, quarterly, half-yearly, or yearly. These publications are listed in § 6, Statistical Publications of Australia, Chapter XXIX. Miscellaneous, and the last pages of this volume contain a list of current and recent printed publications, showing issue numbers, dates and prices.

The Deputy Commonwealth Statisticians in New South Wales, Victoria, Queensland and Western Australia publish Official Year Books concerning their respective States, and the Deputy Commonwealth Statisticians of all States issue a number of printed and mimeographed publications. These are listed on pages 1163–5 of the previous issue of this Year Book, and, together with publications of the Central Bureau, in *Publications of the Commonwealth Bureau of Census and Statistics*.

My thanks are tendered to the Deputy Commonwealth Statistician in each State, who has collected and compiled the data on which a great part of the information given in the Official Year Book is based. Thanks are also tendered to the responsible officers of the various Commonwealth and State Departments, and to others who have kindly, and often at considerable trouble, supplied information.

I also desire to express my keen appreciation of the valuable work performed by Mr. J. M. Jones, B.A., Editor of Publications, Mr. E. H. Harry, B.A., B.Com., and Mr. J. L. Melhuish, B.A., Assistant Editors, and the other officers of the Publications Division, and of the services rendered by the officers in charge of the several Branches of the Commonwealth Bureau of Census and Statistics upon whom has devolved the duty of revising the chapters relative to their respective Branches, and by the Government Printer and his staff in printing this Year Book and in assisting and advising throughout its preparation.

K. M. ARCHER,  
Commonwealth Statistician

# SYNOPSIS

## CHAPTER I. DISCOVERY, COLONIZATION AND FEDERATION OF AUSTRALIA

	PAGE		PAGE
§ 1. Early Knowledge and Discovery of Australia—		§ 4. The Establishment of the Commonwealth of Australia—	
1. Terra Australis .. ..	1	1. General .. ..	5
2. Discovery of Australia .. ..	1	2. Transfer of the Northern Territory to the Commonwealth .. ..	5
3. Discoveries by the English .. ..	2	3. Transfer of the Australian Capital Territory to the Commonwealth .. ..	5
§ 2. The Annexation of Australia—		4. Present Composition of the Commonwealth .. ..	5
1. Annexation of the Eastern Part of Australia, 1770 .. ..	2	§ 5. The Constitutions of the Commonwealth—	
2. Original Extent of New South Wales .. ..	2	1. Commonwealth Constitution Act .. ..	6
3. Extension of New South Wales Westward, 1825 .. ..	3	§ 6. The External Territories of Australia—	
4. Annexation of Western Australia, 1827.. ..	3	1. Transfer of Norfolk Island .. ..	23
§ 3. The Creation of the Several Colonies—		2. Transfer of British New Guinea or Papua .. ..	23
1. New South Wales .. ..	3	3. Territory of New Guinea .. ..	23
2. Tasmania .. ..	4	4. Nauru .. ..	24
3. Western Australia .. ..	4	5. Australian Antarctic Territory .. ..	24
4. South Australia .. ..	4	6. Territory of Heard and McDonald Islands .. ..	24
5. New Zealand .. ..	4	7. Territory of Cocos (Keeling) Islands .. ..	24
6. Victoria .. ..	4	8. Territory of Christmas Island .. ..	24
7. Queensland .. ..	4		

## CHAPTER II. PHYSIOGRAPHY

§ 1. General Description of Australia—		§ 2. Climate and Meteorology of Australia—	
1. Geographical Position .. ..	25	<i>continued</i>	
2. Area of Australia compared with Areas of other Countries .. ..	25	5. Rainfall .. ..	45
3. Areas of States and Territories, Coastal Configuration and Standard Times .. ..	27	6. Remarkable Falls of Rain .. ..	49
4. Geographical Features of Australia .. ..	27	7. Snowfall .. ..	50
§ 2. Climate and Meteorology of Australia—		8. Hail .. ..	50
1. Introductory .. ..	29	9. Droughts .. ..	51
2. Temperature .. ..	30	10. Barometric Pressures .. ..	51
3. Humidity .. ..	32	11. Wind .. ..	51
4. Evaporation .. ..	45	12. Influences affecting Australian Climate .. ..	52
		13. Rainfall and Temperatures, Various Cities .. ..	52
		14. Climatological Tables .. ..	52

## CHAPTER III. GENERAL GOVERNMENT

§ 1. Scheme of Parliamentary Government—		§ 4. Administration and Legislation— <i>continued</i>	
1. General .. ..	61	4. Leaders of the Opposition, Commonwealth and State Parliaments .. ..	82
2. The Sovereign .. ..	61	5. The Course of Legislation .. ..	82
3. Powers and Functions of the Governor-General and of the State Governors .. ..	62	6. Legislation during 1962 .. ..	82
4. The Cabinet and Executive Government .. ..	62	§ 5. Commonwealth Government Departments—	
5. Number and Salary of Members of the Legislatures, Australian Parliaments .. ..	64	1. General .. ..	87
6. Enactments of the Parliaments .. ..	64	2. The Prime Minister's Department .. ..	87
§ 2. The Parliament of the Commonwealth of Australia—		3. The Department of the Treasury .. ..	87
1. The Senate .. ..	65	4. The Attorney-General's Department .. ..	88

1. Closer Settlement ..	103	§ 4. Advances to Settlers—	
2. Settlement of Returned Personnel ..	103	1. General ..	109
		2-8. States and Northern Territory ..	109-12

## CHAPTER V. THE TERRITORIES OF AUSTRALIA

## THE NORTHERN TERRITORY

§ 1. Area and Population—	
1. Area ..	113
2. Population ..	113
§ 2. Legislation and Administration ..	114
§ 3. Physiography ..	114
§ 4. Climate, Fauna and Flora—	
1. The Seasons ..	114
2. Fauna ..	114
3. Flora ..	115
§ 5. Production—	
1. Agriculture ..	115
2. Pastoral Industry ..	115
3. Hides and Skins ..	116
4. Mining ..	116
5. Forestry ..	117
6. Pearl Fisheries ..	117
7. Secondary Industries ..	117
§ 6. Land Tenure ..	117
§ 7. Trade, Transport and Communication—	
1. Trade ..	117
2. Shipping ..	118
3. Air Services ..	118
4. Railways ..	118
5. Roads ..	118
6. Posts, Telegraphs, Telephones and Wireless ..	119
§ 8. Education—	
1. European ..	119
2. Special Aboriginal Schools ..	119
3. Theoretical Training of Apprentices ..	120
§ 9. Aboriginal Welfare ..	120
§ 10. Finance ..	120

## THE AUSTRALIAN CAPITAL TERRITORY

§ 1. Canberra: Fifty Years of Development—	
1. Canberra, the National Capital ..	122
2. Early History ..	122
3. Control of Land ..	123
4. Canberra from 1911 to 1945 ..	123
5. Canberra, 1946 to 1962 ..	127
6. Canberra To-day ..	130
7. Conclusion ..	132
§ 2. Population, Works and Services—	
1. Population ..	132
2. Progress of Works ..	132
3. Transport and Communication ..	133
4. Education, Health and Justice ..	133
§ 3. Production—	
1. Lands ..	134
2. Forestry ..	134
3. Production ..	134
§ 4. Finance ..	135

## NORFOLK ISLAND

1. General ..	137
2. Administration ..	137
3. Economic Activity ..	137
4. Trade, Transport and Communication ..	138
5. Education ..	138
6. Judiciary ..	138
7. Finance ..	138

## PAPUA AND NEW GUINEA

§ 1. Administration ..	139
§ 2. Judiciary ..	140
§ 3. Agriculture and Animal Industry—	
1. Soils ..	140
2. Climate ..	140
3. Land Tenure ..	141
4. Suitable Crops ..	142
5. Plantation Agriculture ..	142
6. Native Agriculture ..	142
7. Animal Industry ..	142
8. Co-operative Societies ..	143
§ 4. Native Labour ..	143
§ 5. Secondary Industries ..	144
§ 6. Finance—	
1. General ..	145
2. Taxation ..	145

## PAPUA

§ 1. General Description—	
1. Area, etc. ..	146
2. Administration ..	146
§ 2. Population—	
1. Non-indigenous Population ..	146
2. Indigenous Population ..	146
§ 3. Land Tenure ..	147
§ 4. Production—	
1. General ..	147
2. Forestry ..	147
3. Mining ..	148
4. Fisheries ..	148
5. Water Power ..	148
§ 5. Trade, Transport and Communication—	
1. Imports and Exports ..	148
2. Shipping ..	150
3. Other Forms of Transport and Communication ..	150
§ 6. Education and Health—	
1. Education ..	150
2. Health ..	150
§ 7. Finance ..	151

CHAPTER V. THE TERRITORIES OF AUSTRALIA—*continued*

		§ 7. Commonwealth Territories—	
		1. Internal Territories ..	268
		2. External Territories—Papua and New Guinea ..	269
		<b>STATISTICAL SUMMARY</b> ..	270

## CHAPTER VIII. WATER CONSERVATION AND IRRIGATION

<b>RESOURCES, UTILIZATION AND NATIONAL AND INTERSTATE ASPECTS</b>		<b>STATES AND TERRITORIES—continued</b>	
§ 1. Introduction ..	271	§ 3. Victoria—	
§ 2. Water Resources and their Utilization—		1. General ..	285
1. Surface Supplies ..	271	2. Works Summarized ..	286
2. Major Dams and Reservoirs ..	271	3. Storages ..	286
3. Irrigation ..	273	4. Extent of Systems and Nature of Irrigated Culture ..	286
4. Preservation of Catchments ..	275	5. Irrigation Systems ..	287
5. Sub-surface Supplies ..	275	6. Wimmera-Mallee Domestic and Stock Supply System ..	287
§ 3. National and Interstate Aspects—		7. Town Water Supplies and Sewerage ..	287
1. General ..	277	8. Drainage, Flood Protection and River Improvement ..	288
2. Australian Water Resources Council ..	277	9. Finance ..	288
3. Murray River Scheme ..	277	10. Underground Resources ..	288
4. New South Wales—Queensland Border Rivers Agreement ..	279	11. Future Programme ..	288
5. Snowy Mountains Hydro-electric Scheme ..	279	§ 4. Queensland—	
§ 4. International Aspects ..	280	1. General ..	288
<b>STATES AND TERRITORIES</b>		2. Irrigation ..	288
§ 1. Australian Local Pattern of Water Conservation and Use ..	280	3. Great Artesian Basin ..	291
§ 2. New South Wales—		4. Other Basins ..	292
1. General ..	281	5. Non-artesian Sources ..	292
2. Schemes Summarized ..	281	6. Stock Watering ..	292
3. Irrigation Areas ..	283	7. Technical and Financial Assistance to Farmers ..	293
4. Irrigation Districts ..	283	8. Hydro-electricity ..	293
5. Water Trust Districts, Irrigation Trusts and Flood Control and Irrigation Districts ..	284	§ 5. South Australia—	
6. River and Lake, and Farm Water Supplies ..	284	1. General ..	293
7. Underground Water ..	284	2. Irrigation ..	293
8. Future Programme ..	285	3. Water Supply Schemes ..	295
9. Hydro-electricity ..	285	4. Underground Water ..	295
		5. Farm Water Schemes ..	296
		6. South-Eastern Drainage ..	296

CHAPTER VIII. WATER CONSERVATION AND IRRIGATION—*continued*

	PAGE		PAGE
<b>STATES AND TERRITORIES—<i>continued</i></b>		<b>STATES AND TERRITORIES—<i>continued</i></b>	
§ 6. Western Australia—		§ 8. Northern Territory—	
1. General .. .. .	296	1. Climate and Topography ..	300
2. Irrigation .. .. .	296	2. Administration .. .. .	300
3. Water Supply Schemes ..	297	3. Underground Water .. ..	300
4. Underground Water .. ..	298	4. Irrigation .. .. .	301
7. Tasmania—		§ 9. Papua and New Guinea—	
1. General .. .. .	299	1. Rainfall .. .. .	302
2. Hydro-electricity .. ..	299	2. General .. .. .	302
3. Regional Water Schemes ..	299		
4. Industrial .. .. .	299		
5. Irrigation .. .. .	300		

## CHAPTER IX. POPULATION

1. Population Statistics .. ..	303	§ 9. Assisted Migration into Australia—	
§ 2. The Census—		1. General .. .. .	342
1. Census-taking .. .. .	304	2. Joint Commonwealth and States Scheme .. .. .	342
2. Population recorded at Censuses ..	304	3. Migration from Britain .. ..	343
3. Increase since 1891 Census ..	305	4. Child Migration from Britain ..	344
§ 3. Growth and Distribution of Population—		5. Maltese Migration .. .. .	344
1. Growth of Population .. ..	306	6. Netherlands Migration .. ..	345
2. Proportion of Area and Population, Density and Masculinity ..	307	7. Italian Migration .. .. .	345
3. Urban and Rural Distribution ..	307	8. German Migration .. .. .	345
4. Principal Urban Areas .. ..	310	9. Austrian Migration .. .. .	345
5. Urban Population Outside Metropolitan Areas .. ..	311	10. Greek Migration .. .. .	346
6. Principal Cities in the World ..	311	11. Refugee Migration .. .. .	346
4. Mean Population—		12. General Assisted Passage Scheme ..	346
1. General .. .. .	312	13. Spanish Migration .. .. .	346
2. Results .. .. .	313	14. Belgian Migration .. .. .	346
§ 5. Elements of Increase—		15. Other Assisted Migration Schemes ..	346
1. General .. .. .	313	16. Summary of Arrivals of Assisted Migrants .. .. .	347
2. Elements of Increase, 1936-1962, Australia .. .. .	314	§ 10. The Regulation of Immigration into Australia—	
3. Analysis of Intercensal Increase, 30th June, 1954, to 30th June, 1962 ..	314	1. Powers and Legislation of the Commonwealth .. .. .	347
4. Rate of Population Growth .. ..	315	2. Conditions of Immigration into Australia .. .. .	348
§ 6. Density .. .. .	317	§ 11. Passports .. .. .	349
§ 7. General Characteristics—		§ 12. Citizenship and Naturalization—	
1. Sex Distribution .. .. .	317	1. Commonwealth Legislation .. ..	349
2. Age Distribution .. .. .	318	2. Certificates Granted .. .. .	349
3. Conjugal Condition .. .. .	320	§ 13. Population of External Territories ..	350
4. Birthplace .. .. .	321	§ 14. The Aboriginal Population of Australia ..	351
5. Period of Residence in Australia ..	322	§ 15. International Statistics of Population—	
6. Nationality .. .. .	323	1. Introduction .. .. .	351
7. Religion .. .. .	325	2. Population, Rate of Growth and Density: World, Continents and Regions .. .. .	352
8. Industry .. .. .	326	3. Population, Density, Rate of Growth, Natural Increase and Masculinity of Principal Countries ..	352
9. Occupational Status .. .. .	334		
10. Other General Characteristics ..	335		
§ 8. Oversea Arrivals and Departures—			
1. Oversea Arrivals and Departures since 1936 .. .. .	336		
2. Excess of Arrivals over Departures ..	336		
3. Stated Purpose of Travel .. ..	338		
4. Permanent Movement .. .. .	339		
5. Other Oversea Movement Statistics ..	342		

## CHAPTER X. VITAL STATISTICS

§ 1. Provisions for Registration and Compilation of Statistics .. ..	355	§ 4. Fertility and Reproduction—	
§ 2. Marriages—		1. Introduction .. .. .	361
1. Number of Marriages .. ..	356	2. Number of Live Births and Confinements .. .. .	361
2. Crude Marriage Rates .. ..	356	3. Crude Birth Rates .. .. .	362
3. Marriage Rates based on Marriageable Population .. .. .	357	4. Fertility Rates .. .. .	363
4. Age and Conjugal Condition at Marriage .. .. .	357	5. Age-specific Fertility Rates for Females .. .. .	363
5. Previous Conjugal Condition .. ..	359	6. Gross and Net Reproduction Rates for Females .. .. .	364
6. Birthplaces of Persons Marrying ..	359	7. Gross and Net Reproduction Rates, Various Countries .. .. .	364
7. Occupation of Bridegrooms .. ..	359	8. Fertility of Marriages .. .. .	369
8. Celebration of Marriages .. ..	359	9. Masculinity of Live Births .. ..	369
§ 3. Divorce .. .. .	360	10. Ex-nuptial Live Births .. ..	370

CHAPTER X. VITAL STATISTICS—*continued*

	PAGE		PAGE
§ 4. Fertility and Reproduction— <i>continued</i>		§ 5. Mortality— <i>continued</i>	
11. Legitimations .. .. .	371	5. Australian Life Tables .. .. .	379
12. Multiple Births .. .. .	371	6. Infant Deaths and Death Rates .. .. .	380
13. Ages of Parents .. .. .	371	7. Age Distribution .. .. .	384
14. Birthplaces of Parents .. .. .	371	8. Causes of Death .. .. .	386
15. Occupation of Fathers .. .. .	372	9. Deaths from Principal Causes .. .. .	391
16. Age, Duration of Marriage and Issue of Mothers .. .. .	372	10. Age at Death and Average Issue of Deceased Married Males and Females .. .. .	395
17. Nuptial First Births .. .. .	373	11. Age at Marriage of Deceased Males and Females, and Issue .. .. .	395
18. Stillbirths .. .. .	375		
§ 5. Mortality—		§ 6. Vital Statistics of External Territories .. .. .	396
1. Number of Deaths .. .. .	376	§ 7. International Vital Statistics .. .. .	396
2. Crude Death Rates .. .. .	377		
3. Standardized Death Rates .. .. .	377		
4. True Death Rates .. .. .	378		

## CHAPTER XI. HOUSING AND BUILDING

§ 1. Census Dwellings—		§ 3. Government Activities in the Housing Field—	
1. General .. .. .	399	1. Housing Agreements between Commonwealth and State Governments .. .. .	426
2. Number of Dwellings .. .. .	399	2. War Service Homes .. .. .	429
3. Class of Dwelling .. .. .	403	3. State Housing Authorities .. .. .	431
4. Population According to Class of Dwelling, etc. .. .. .	404	4. Housing Schemes in Commonwealth Territories .. .. .	435
5. Occupied Private Dwellings .. .. .	404	5. Summary of Rental Activities of Government Authorities .. .. .	436
§ 2. Building—		§ 4. Advances to Home Purchasers—	
1. General .. .. .	415	1. State Authorities and Agencies .. .. .	437
2. New Houses .. .. .	417	2. Commonwealth Authorities and Agencies .. .. .	440
3. New Flats .. .. .	420	3. Savings Banks .. .. .	442
4. Value of New Buildings .. .. .	422	4. Trading Banks .. .. .	442
5. Value of Building Approved .. .. .	425	5. Life Insurance Companies .. .. .	443
6. Persons Working on Jobs Carried out by Builders of New Buildings .. .. .	425	6. Registered Building Societies .. .. .	443
		7. Other Lenders .. .. .	444

## CHAPTER XII. LABOUR, WAGES AND PRICES

## RETAIL PRICES AND PRICE INDEXES

§ 1. General .. .. .	445
§ 2. Previous Retail Price Indexes—	
1. General .. .. .	445
2. The "Court" Index .. .. .	446
§ 3. The Consumer Price Index—	
1. General .. .. .	446
2. Origin .. .. .	446
3. Purpose, Scope and Composition .. .. .	447
4. Structure .. .. .	449
§ 4. Tabular Statements of Retail Price Index Numbers—	
The Consumer Price Index .. .. .	450
§ 5. Retail Price Index Numbers, 1901 to 1962 .. .. .	453
§ 6. International Comparisons .. .. .	453

## WHOLESALE PRICES AND PRICE INDEXES

§ 1. General .. .. .	454
§ 2. Wholesale Price (Basic Materials and Foodstuffs) Index—	
1. Price Quotations .. .. .	455
2. Commodities and Grouping .. .. .	455
3. Method of Construction .. .. .	455
4. Index Numbers .. .. .	455
§ 3. Melbourne Wholesale Price Index .. .. .	456

## EXPORT PRICES AND PRICE INDEXES

§ 1. Previous Export Price Indexes—	
1. 1901 to 1917 .. .. .	457
2. 1918 to 1930 .. .. .	457
3. 1928 to 1962 .. .. .	457
§ 2. The Current Export Price Index—	
1. General .. .. .	457
2. Composition and Weighting .. .. .	457
3. Index Numbers .. .. .	460
4. Link between Current and Previous Indexes .. .. .	460

## CONTROL OF PRICES DURING AND SINCE THE 1939-45 WAR

1. General .. .. .	461
2. Transfer of Price Control to the States .. .. .	461
3. Price Stabilization .. .. .	462

## WAGES

§ 1. Arbitration and Wages Boards Acts and Associated Legislation—	
1. General .. .. .	462
2. Commonwealth .. .. .	462
3. States .. .. .	464
§ 2. Rates of Wage and Hours of Work—	
1. General .. .. .	465
2. Weekly Wage Rates .. .. .	466
3. Standard Hours of Work .. .. .	472
4. Hourly Wage Rates .. .. .	474
5. Weighted Average Standard Weekly Hours of Work .. .. .	475

CHAPTER XII. LABOUR, WAGES AND PRICES—*continued*

	PAGE		PAGE
<b>WAGES—<i>continued</i></b>		<b>WAGES—<i>continued</i></b>	
§ 3. Average Weekly Earnings—		§ 7. Leave— <i>continued</i>	
1. Average Weekly Total Wages and Salaries Paid and Average Earnings, All Industries ..	476	4. Three Weeks' Annual Leave Inquiry, 1963 ..	514
2. Average Weekly Earnings Index Numbers ..	476	5. Long Service Leave ..	514
4. Surveys of Wage Rates, Earnings and Hours—		<b>EMPLOYMENT AND UNEMPLOYMENT</b>	
1. General ..	477	§ 1. Employment—	
2. Survey of Wage Rates and Earnings, September, 1960 ..	477	1. General ..	516
3. Survey of Weekly Earnings, October, 1961 ..	480	2. Wage and Salary Earners in Civilian Employment ..	516
4. Survey of Weekly Earnings and Hours, October, 1962 ..	482	§ 2. Unemployment ..	517
§ 5. Basic Wages in Australia—		§ 3. Commonwealth Employment Service ..	518
1. General ..	485	§ 4. Industrial Disputes—	
2. The Commonwealth Basic Wage ..	486	1. General ..	519
3. Australian Territories ..	500	2. Industrial Groups ..	519
4. Basic Wage Rates for Females ..	500	3. States and Territories ..	520
5. State Basic Wages ..	501	4. Duration ..	520
6. Wage Margins—		5. Causes ..	521
1. General ..	507	6. Methods of Settlement ..	523
2. Metal Trades Case, 1954 ..	507	<b>WORKERS' COMPENSATION LEGISLATION</b>	
3. Margins Cases, 1959 ..	508		523
4. Margins Cases, 1963 ..	510	<b>LABOUR ORGANIZATIONS</b>	
7. Leave—		§ 1. Labour Organizations in Australia—	
1. Annual Leave ..	510	1. General ..	524
2. Three Weeks' Annual Leave Inquiry, 1960 ..	511	2. Organizations Registered under the (Commonwealth) Conciliation and Arbitration Act ..	524
3. Three Weeks' Annual Leave Inquiry, 1962 ..	513	3. Particulars regarding Trade Unions ..	524
		4. Central Labour Organizations ..	526
		§ 2. International Labour Organization ..	527

## CHAPTER XIII. OVERSEA TRADE

1. Legislation affecting Oversea Trade—		§ 7. Methods of Recording Imports and Exports— <i>continued</i>	
1. Constitutional Powers ..	529	6. Valuation ..	547
2. Commonwealth Legislation ..	529	7. Inclusions and Exclusions ..	548
3. The Customs Tariff ..	529	8. Countries ..	548
4. Primage Duties ..	530	9. Quantities ..	549
5. Tariff Board ..	531	10. Pre-Federation Records ..	549
6. Anti-dumping Legislation ..	531	§ 8. Total Oversea Trade—	
7. Trade Descriptions ..	532	1. Including Gold ..	549
8. Import Controls ..	532	2. Excluding Gold ..	550
9. Export Controls ..	532	§ 9. Direction of Oversea Trade—	
10. Trade Agreements ..	539	1. According to Countries ..	550
§ 12. Imperial Preference in the United Kingdom—		2. According to Major Groups of Countries ..	551
1. Preferential Tariff of the United Kingdom ..	541	§ 10. Trade with the United Kingdom—	
2. The Australia-United Kingdom Trade Agreement ..	542	1. Statistical Classes ..	552
3. Trade Commissioner Service ..	542	2. Imports of Principal Articles ..	553
4. Australian Trade Missions ..	544	3. Exports of Principal Articles of Australian Produce ..	554
§ 15. Export Payments Insurance Corporation ..	544	4. Imports from the United Kingdom and Competing Countries ..	554
§ 6. European Economic Integration—		§ 11. Trade with Eastern Countries—	
1. European Economic Community ..	545	1. Merchandise Trade According to Countries ..	556
2. European Coal and Steel Community ..	546	2. Merchandise Trade—Principal Articles ..	557
3. Euratom ..	546	§ 12. Oversea Trade at Principal Ports ..	558
4. European Free Trade Association ..	546	§ 13. Classified Summary of Australian Oversea Trade—	
§ 7. Method of Recording Imports and Exports—		1. Statistical Classes ..	558
1. Source of Statistics ..	546	2. Imports of Principal Articles ..	559
2. Customs Area ..	546	3. Exports of Principal Articles of Australian Produce ..	560
3. The Trade System ..	546		
4. Statistical Classification of Imports and Exports ..	547		
5. The Trade Year ..	547		

CHAPTER XIII. OVERSEA TRADE—*continued*

	PAGE		PAGE
§ 13. Classified Summary of Australian Oversea Trade— <i>continued</i>		§ 17. External Trade of Australia and other Countries—	
4. Imports of Merchandise and Bullion and Specie .. .. .	561	1. Essentials of Comparison .. .. .	565
5. Exports of Merchandise and Bullion and Specie .. .. .	561	2. "Special Trade" of Various Countries .. .. .	565
6. Imports and Net Customs Revenue	561	§ 18. Oversea Trade in Calendar Years .. .. .	566
§ 14. Ships' and Aircraft Stores .. .. .	562	§ 19. Excise .. .. .	566
§ 15. Movement of Bullion and Specie—		§ 20. The Australian Balance of Payments—	
1. Imports and Exports .. .. .	562	1. Introduction .. .. .	567
2. Imports and Exports by Country .. .. .	563	2. Current Account .. .. .	568
§ 16. Exports According to Industries—		3. Capital Account .. .. .	570
1. Classification .. .. .	563	4. Balance of Payments on Current Account—by Major Groups of Countries .. .. .	571
2. Relative Importance of Industrial Groups .. .. .	565	5. International Reserves .. .. .	572

## CHAPTER XIV. TRANSPORT AND COMMUNICATION

## SHIPPING

§ 1. Control of Shipping—	
1. Commonwealth Navigation and Shipping Legislation .. .. .	573
2. Australian Coastal Shipping Commission .. .. .	573
3. Australian Shipbuilding Board .. .. .	574
4. Australian Stevedoring Industry Authority .. .. .	574
§ 2. System of Record .. .. .	575
§ 3. Oversea Shipping—	
1. Total Movement .. .. .	575
2. Total Oversea Shipping, States .. .. .	576
3. Shipping Communication with Various Countries .. .. .	576
4. Country of Registration of Oversea Shipping .. .. .	576
§ 4. Interstate Shipping—	
1. System of Record .. .. .	577
2. Interstate Movement .. .. .	578
3. Shipping Engaged Solely in Interstate Trade .. .. .	579
4. Australian Trading Vessels .. .. .	580
§ 5. Shipping at Principal Ports—	
1. Total Shipping, Australia .. .. .	580
2. Total Shipping—Australia, New Zealand and the United Kingdom	581
§ 6. Shipping Cargo—	
1. Oversea and Interstate Cargo .. .. .	581
2. Oversea Cargo according to Country of Registration of Vessels .. .. .	583
§ 7. Vessels Registered in Australia—	
1. Australian-registered Trading Vessels	583
2. Vessels Registered .. .. .	584
3. World Shipping Tonnage .. .. .	584
§ 8. Miscellaneous—	
1. Lighthouses .. .. .	585
2. Distances by Sea .. .. .	585
3. Shipping Freight Rates .. .. .	585
4. Depth of Water at Main Ports .. .. .	588
5. Shipping Casualties .. .. .	588
6. Ferry (Passenger) Services .. .. .	588

## GOVERNMENT RAILWAYS

1. General .. .. .	589
2. Railway Communication in Australia .. .. .	589
3. Standardization of Railway Gauges	589
4. Mileage Open for Traffic, all Lines	590
5. Classification of Lines according to Gauge, at 30th June, 1962 .. .. .	591
6. Summary of Operations .. .. .	591

GOVERNMENT RAILWAYS—*continued*

7. Gross Earnings .. .. .	591
8. Working Expenses .. .. .	593
9. Net Earnings .. .. .	594
10. Net Earnings, Grants to Railways, Interest, Sinking Fund, Surplus or Deficit, 1961-62 .. .. .	595
11. Traffic .. .. .	595
12. Rolling Stock .. .. .	601
13. Accidents .. .. .	601
14. Consumption of Coal, Oil and Petrol .. .. .	601
15. Staff Employed and Salaries and Wages Paid .. .. .	602

## TRAMWAY, TROLLEY-BUS AND OMNIBUS SERVICES

1. Systems in Operation .. .. .	602
2. Government and Municipal Services	605
3. Private Services .. .. .	607

## FERRY (PASSENGER) SERVICES

1. General .. .. .	608
2. Summary of Operations .. .. .	608

## MOTOR VEHICLES

1. General .. .. .	608
2. Motor Vehicles on the Register, etc.	609
3. New Vehicles Registered .. .. .	610
4. World Motor Vehicle Statistics, 1962	610

## ROADS AND BRIDGES .. 610

## ROAD TRAFFIC ACCIDENTS

§ 1. Accidents Reported—	
1. General .. .. .	610
2. Accidents Involving Casualties .. .. .	611
3. Road Traffic Accidents Involving Casualties and Persons Killed or Injured .. .. .	612
§ 2. Road Safety Organizations—	
1. Australian Road Safety Council .. .. .	613
2. The National Safety Council of Australia .. .. .	614

## CIVIL AVIATION

1. Historical .. .. .	615
2. International Activity .. .. .	615
3. Australian National Airlines Commission .. .. .	616
4. Regular Air Services within Australia .. .. .	616
5. Air Ambulance Services .. .. .	616

CHAPTER XIV. TRANSPORT AND COMMUNICATION—*continued*

	PAGE		PAGE
<b>CIVIL AVIATION—<i>continued</i></b>		<b>POSTS; TELEGRAPHS; TELEPHONES; OVERSEA TELECOMMUNICATION SER- VICES—<i>continued</i></b>	
6. Training of Air Pilots .. ..	616	§ 4. <b>Telephones—</b>	
7. Airways Engineering .. ..	617	1. General .. ..	626
8. Airports .. ..	617	2. Summary .. ..	626
9. Meteorological Services .. ..	618	3. Trunk Line and Local Calls .. ..	627
10. Search and Rescue .. ..	618	4. Oversea Telephone Services .. ..	627
11. Statistical Summaries .. ..	618	5. World Telephone Statistics, 1962 .. ..	627
12. Territory of Papua and New Guinea	620	§ 5. <b>Oversea Telecommunication Services; Radiocommunication Stations Author- ized—</b>	
<b>POSTS; TELEGRAPHS; TELEPHONES; OVERSEA TELECOMMUNICATION SER- VICES</b>		1. General .. ..	627
§ 1 <b>General—</b>		2. International Telegrams .. ..	628
1. The Postmaster-General's Depart- ment .. ..	620	3. Oversea Telephone Services .. ..	629
2. Postal Facilities .. ..	620	4. Coast Stations .. ..	629
3. Gross Revenue, Branches—Post- master-General's Department .. ..	621	5. Radio - communication Stations Authorized .. ..	629
4. Expenditure, Postmaster-General's Department .. ..	621	<b>BROADCASTING AND TELEVISION</b>	
5. Profit or Loss, Postmaster-General's Department .. ..	623	§ 1. <b>General</b> .. ..	630
6. Fixed Assets .. ..	623	§ 2. <b>Broadcasting—</b>	
§ 2. <b>Posts—</b>		1. The National Broadcasting Service	631
1. Postal Matter Dealt With .. ..	624	2. The Commercial Broadcasting Service .. ..	633
2. Money Orders and Postal Notes .. ..	625	3. Oversea Broadcasting Service .. ..	633
§ 3. <b>Telegraphs—</b>		4. Broadcasting Stations .. ..	633
1. General .. ..	625	§ 3. <b>Television—</b>	
2. Telegraph and Telephone Mileage .. ..	625	1. General .. ..	634
3. Telegraph Offices .. ..	626	2. The National Television Service .. ..	634
4. Telegrams .. ..	626	3. The Commercial Television Service .. ..	635
		4. Extension of Television Services .. ..	635
		4. <b>Licences, Revenue from Fees, etc.—</b>	
		1. Broadcast Listeners' and Television Viewers' Licences .. ..	636

## CHAPTER XV. WELFARE SERVICES

<b>COMMONWEALTH EXPENDITURE ON SOCIAL AND HEALTH SERVICES</b>		<b>OTHER SERVICES</b>	
National Welfare Fund .. ..	639	§ 1. <b>Benevolent Homes—</b>	
<b>COMMONWEALTH SOCIAL SERVICES</b>		1. General .. ..	654
§ 1. <b>Introduction</b> .. ..	641	2. Revenue and Expenditure .. ..	654
§ 2. <b>Age and Invalid Pensions</b> .. ..	641	3. The Aged Persons Homes Act .. ..	654
§ 3. <b>Child Endowment</b> .. ..	644	§ 2. <b>Orphanages, Industrial Schools, etc.—</b>	
§ 4. <b>Commonwealth Rehabilitation Service</b> .. ..	646	1. General .. ..	655
§ 5. <b>Funeral Benefits</b> .. ..	647	2. Children under Government Auth- ority .. ..	655
§ 6. <b>Maternity Allowances</b> .. ..	648	§ 3. <b>Protection of Aborigines</b> .. ..	655
§ 7. <b>Unemployment, Sickness and Special Benefits</b> .. ..	649	§ 4. <b>Lifesaving</b> .. ..	656
§ 8. <b>Widows' Pensions</b> .. ..	652	§ 5. <b>Royal Humane Society</b> .. ..	656
§ 9. <b>Reciprocal Agreements with Other Coun- tries—</b>		§ 6. <b>The Order of St. John</b> .. ..	656
1. New Zealand .. ..	653	§ 7. <b>Other Charitable Institutions</b> .. ..	656
2. Britain .. ..	653		

## CHAPTER XVI. PUBLIC JUSTICE

§ 1. <b>The Australian Legal System—</b>		§ 4. <b>Higher (Judges') Courts—</b>	
1. Development of the System .. ..	657	1. Criminal Proceedings .. ..	667
2. State and Territory Courts .. ..	658	2. Divorce and Other Matrimonial Relief .. ..	670
3. Federal Courts .. ..	658	3. Bankruptcy .. ..	679
4. Appeal to the Privy Council .. ..	659	4. Other Civil Proceedings .. ..	682
§ 2. <b>Lower (Magistrates') Courts—</b>		§ 5. <b>High Court of Australia</b> .. ..	682

# OFFICIAL YEAR BOOK

OF THE

## COMMONWEALTH OF AUSTRALIA

### CHAPTER I

#### DISCOVERY, COLONIZATION AND FEDERATION OF AUSTRALIA

##### § 1. Early Knowledge and Discovery of Australia

NOTE.—The following paragraphs contain only a bare outline of the more important facts relating to the early history of Australian discovery. A more detailed summary of these facts may be found in Official Year Book No. 39 (*see p. 1*) and earlier issues.

1. *Terra Australis*.—There was, apparently, an early Chaldean tradition as to the existence of an Austral land to the south of India, and rumours to that effect found their way in the course of time to Europe. References to this *Terra Australis* are found in the works of Ælianus (A.D. 205–234), Manilius (probably a contemporary of Augustus or Tiberius Caesar), and Ptolemy (A.D. 107–161). Evidence pointing to knowledge of such a land appeared in maps and manuscripts of the Middle Ages and the fourteenth and fifteenth centuries, but there is no definite evidence connecting this so-called *Terra Australis* with Australia.

Reference by Marco Polo (1254–1324) to a land called Locac and several indications on maps and globes in the fifteenth and sixteenth centuries have been assumed to relate to Australia, but little weight can now be attached to these suppositions. Cornelius Wytfliet's map of 1597, however, indicates roughly the eastern and western coasts of Australia, as well as the Gulf of Carpentaria, although the oft-quoted passage in his *Descriptionis Ptolemaicæ Augmentum* describing the *Australis Terra* has been considered to have had its origin in the voyages through the Straits of Magellan and the discovery of Tierra del Fuego rather than that of Australia.

2. *Discovery of Australia*.—(i) *The Spaniards*. Disregarding the suggestion, for which there is no evidence, that the Arabs had come to Australia long before the Portuguese, the Spaniards, or the Dutch, and apart from the possibility that the Portuguese may have discovered part of the Australian coast before 1542, the coastal exploration of Australia may be taken as having begun with the Spaniards and the Dutch.

In 1606, the Spaniard Quiros, on reaching the island that has retained the name of Espiritu Santo (the largest island of the New Hebrides group), thought he had discovered the great land of the south, and therefore named the group *La Australia del Espiritu Santo*. After leaving the New Hebrides, Quiros sailed eastward, but Torres, his second-in-command, took a westerly course and passed through the strait that now bears his name. In all probability, he sighted the Australian continent, but no mention of it is made in his records. This voyage marks the close of Spanish activity in the work of discovery in the South Seas.

(ii) *The Dutch*. The Dutch discovered Australia when the Dutch East India Company sent the *Duyfken* from Bantam, Java, to explore the island of New Guinea. During March, 1606, the *Duyfken* coasted along the southern shores of New Guinea and followed the west coast of Cape York peninsula as far as Cape Keer-Weer (Turn Again).

During the following thirty years, there were nine visits of Dutch navigators to Australian waters; by 1636, through their efforts, the coast of Australia from Cape York westward around to the Great Australian Bight had been discovered.

In 1642, Abel Janszoon Tasman set out from Batavia to ascertain the extent of the great southern continent. He named Van Diemen's Land, imagining it to be part of Australia proper, and sailing north-easterly discovered New Zealand and returned to Batavia. In his second voyage, in 1644, Tasman visited the northern coast of Australia, sailing round the Gulf of Carpentaria and along the north-west coast as far south as the tropic of Capricorn. This voyage of Tasman's may be said to have ended the period of Dutch discoveries, although there were subsequent visits by the Dutch to Australia (de Vlamingh in 1696 and Van Delft in 1705).

3. **Discoveries by the English.**—In the meantime, the English had made their first appearance on the Australian coast in 1688, when the north-westerly shores were visited by William Dampier, as supercargo of the *Cygnat*, a trading vessel whose crew had turned buccaneers. In 1699, he again visited Australia, in command of H.M.S. *Roebuck*, and on his return to England published an account in which a description is given of trees, flowers, birds and reptiles observed, and of encounters with natives.

At the end of the seventeenth century, it was uncertain whether Tasmania and New Zealand were parts of Australia, or whether they were separated from it but themselves formed part of a great Antarctic Continent. Lieutenant (later Captain) James Cook's first voyage, though primarily undertaken for the purpose of observing the transit of Venus from Tahiti, had also the objective of ascertaining whether the unexplored part of the southern hemisphere was only an immense mass of water or contained another continent. In command of H.M.S. *Endeavour*, a barque of 370 tons burden carrying about 85 persons, and accompanied by Sir Joseph Banks the botanist, Dr. Solander the naturalist, Green the astronomer, draughtsmen and servants, Cook, after observing the transit of Venus at Tahiti, turned toward New Zealand, sighting that land on 7th October, 1769, in the neighbourhood of Poverty Bay. Circumnavigating the North and South Islands, he proved that New Zealand was connected neither with the supposed Antarctic Continent nor with Australia, and took formal possession thereof in the name of the British Crown. On 20th April, 1770, at 6 a.m., Cook sighted the Australian mainland at a place he called Point Hicks, naming it after his first-lieutenant, who first saw it. Coasting northwards, Botany Bay was discovered on 29th April, 1770. The *Endeavour* dropped anchor and Cook landed on the same day. Cook sailed along the coast in a northerly direction for nearly 1,300 miles until 11th June, 1770, when the *Endeavour* was seriously damaged by striking a coral reef in the vicinity of Trinity Bay. Repairs occupied nearly two months, and the *Endeavour* then again set her course to the north, sailing through Torres Strait and anchoring in the Downs on 13th July, 1771. In 1772, Cook was put in command of the ships *Resolution* and *Adventure*, with a view to ascertain whether a great southern continent existed. Having satisfied himself that, even if it did, it lay so far to the south as to be useless for trade and settlement, he returned to England in 1774. Cook's last voyage was undertaken in 1776, and he met his death on 14th February, 1779, by which date practically the whole coast of Australia had been explored. The only remaining discovery of importance was the existence of a channel between Tasmania and Australia. This was made by Bass and Flinders in 1798.

## § 2. The Annexation of Australia

1. **Annexation of the Eastern Part of Australia, 1770.**—Although representatives of the nations mentioned in the previous section landed or claimed to have landed on the shores of Australia on various occasions during the sixteenth and seventeenth centuries, it was not until 23rd August, 1770, that the history of Australia was brought into definite political connexion with Western civilization. It was on that date that Captain Cook took possession "of the whole eastern coast, from latitude 38° S. to this place, latitude 10½° S., in right of His Majesty King George the Third". Cook, however, proclaimed British sovereignty over only what are now the eastern parts of New South Wales and Queensland, and formal possession, on behalf of the British Crown, of the whole of the eastern part of the Australian continent and Tasmania was not taken until 26th January, 1788. It was on this last date that Captain Phillip's commission, first issued to him on 12th October, 1786, and amplified on 2nd April, 1787, was read to the people whom he had brought with him in the "First Fleet".

A full historical account of the period referred to may be found in the *Historical Records of New South Wales*, Vol. I., parts 1 and 2.

2. **Original Extent of New South Wales.**—The commission appointed Phillip "Captain-General and Governor-in-Chief in and over our territory called New South Wales, extending from the Northern Cape or extremity of the coast called Cape York, in the latitude of ten degrees thirty-seven minutes south, to the southern extremity of the said territory of New South Wales of South Cape, in the latitude of forty-three degrees thirty-nine minutes south and of all the country inland westward as far as the one hundred and thirty-fifth degree of east longitude reckoning from the meridian of Greenwich, including all the islands adjacent in the Pacific Ocean within the latitudes aforesaid of ten degrees thirty-seven minutes south and forty-three degrees thirty-nine minutes south".

Although Captain Cook had taken possession of the North Island of New Zealand in November, 1769, and of the South Island in January, 1770, it is doubtful whether, at the time when Captain Phillip's commission was drawn up, New Zealand was considered

as one of the "islands adjacent in the Pacific Ocean". The fact that under the *Supreme Court Act (Imperial)* of 1823, British residents in New Zealand were brought under the jurisdiction of the Court at Sydney, and that in 1839 there was a proposal on the part of the British Government to appoint a consul in New Zealand, would leave this an open question, as nothing more than extra-territorial jurisdiction may have been intended. Various hoistings of flags notwithstanding, New Zealand does not appear to have become British territory unequivocally until 1840. In that year, on 29th January, Captain Hobson arrived at the Bay of Islands. On the following day, he read the commission, which extended the boundaries of the Colony of New South Wales so as to embrace and comprehend the islands of New Zealand. On 5th February, the Treaty of Waitangi, made with the native chiefs, was signed. Finally, on 21st May, British sovereignty over the islands of New Zealand was explicitly proclaimed.

3. **Extension of New South Wales Westward, 1825.**—On 17th February, 1824, Earl Bathurst notified Sir Thomas Brisbane that he had recommended to His Majesty the dispatch of a ship of war to the north-west coast of New Holland for the purpose of taking possession of the coast between the western coast of Bathurst Island and the eastern side of Coburg Peninsula. Captain James J. Gordon Bremer of H.M.S. *Tamar*, who was selected for the purpose, took possession on 20th September, 1824, of the coast from the 135th to the 129th degree of east longitude. On 16th July, 1825, the whole territory between those boundaries was described in Darling's commission as being within the boundaries of New South Wales, thus increasing its area by 518,134 square miles, and making it, including New Zealand and excluding Tasmania, 2,076,308 square miles, or also excluding New Zealand, 1,972,446 square miles.

4. **Annexation of Western Australia, 1827.**—An expedition under Major Lockyer, sent by Lieutenant-General Sir Ralph Darling, then Governor of New South Wales, to found a settlement at King George Sound, sailed from Sydney on 9th November, 1826, landed at the Sound on 26th December following, and on 21st January, 1827, hoisted the British flag. Captain Stirling, in command of H.M.S. *Success*, arrived at Sydney a few weeks after the departure of the expedition to King George Sound. He obtained the Governor's permission to visit Swan River with a view to seizing a position on the western coast and reporting upon its suitability as a place of settlement. Captain Stirling left Sydney on 17th January, 1827, and on his return in the following April submitted a glowing report on what he described as a "rich and romantic country", urging its occupation for the purpose of settlement. He left for England in July, 1827, continuing his advocacy—notwithstanding much discouragement—with unabated enthusiasm. He was at last successful, the result being due mainly to the formation of an association of prospective settlers having capital at their disposal. He was appointed Lieutenant-Governor and with a party of settlers arrived at Garden Island, near the Swan River, in the ship *Parmelia* in June, 1829. On the 2nd of the preceding month, Captain Fremantle, in command of H.M.S. *Challenge*, arrived and hoisted the British flag on the south head of Swan River, again asserting possession of "all that part of New Holland which is not included within the territory of New South Wales". Thus, before the middle of 1829, the whole territory now known as the Commonwealth of Australia had been constituted a dependency of the United Kingdom.

### § 3. The Creation of the Several Colonies

1. **New South Wales.**—In Governor Phillip's commission of 1786, the mainland of Australia was divided by the 135th meridian of east longitude into two parts. The earliest colonists believed that the present State of Tasmania was actually joined to the mainland, and it was not until 1798 that the contrary was known. In that year, Bass and Flinders proved that it was an island by sailing through Bass Strait. The territory of New South Wales, as originally constituted, and of New Zealand, which may be included although Cook's annexation was not properly given effect to until 1840, consisted of 1,584,389 square miles. A further area of 518,134 square miles was added in 1825, when the western boundary was extended to the 129th east meridian. The territory was subsequently reduced by the separation of various areas to form the other colonies, and at the time of the establishment of the Commonwealth the area of New South Wales was 310,372 square miles.

Lord Howe Island, which is a dependency of New South Wales and for political purposes is included in one of the electorates of Sydney, is situated in latitude 31° 30' south, longitude 159° 5' east, about 436 miles north-east of Sydney, and has an area of 3,220 acres. The climate is mild and the rainfall abundant, but on account of the rocky

formation of its surface only about 300 acres are suitable for cultivation, most of which are devoted to the production of *Kentia* palm seed. The land belongs to the Crown and is occupied rent-free on sufferance. Discovered in 1788, the Island was first settled by a small party of Maoris in 1853; afterwards a colony was settled from Sydney. A Board of Control at Sydney manages the affairs of the Island and supervises the palm seed industry. The population was 249 at the Census of 30th June, 1961.

2. **Tasmania.**—In 1825, Van Diemen's Land, as Tasmania was then called, was politically separated from New South Wales, being constituted a separate colony on 14th June of that year. The area of the colony was 26,215 square miles.

Macquarie Island, about 1,000 miles south-east of Hobart, together with a few rocky islets nearby, has been a dependency of Tasmania since the nineteenth century. In December, 1911, five members of the Australian National Antarctic Expedition landed on the island and remained there until 1915. On 3rd March, 1948, another party was landed to man a new station and this has since been maintained as a scientific base. The island is about 21 miles long and two miles wide.

3. **Western Australia.**—The territory westward of the 129th meridian, comprising 975,920 square miles, was constituted a colony under the name of Western Australia in June, 1829. It was always distinct and independent of New South Wales, except for the settlement on King George Sound (*see* p. 3), which remained under the jurisdiction of New South Wales until 1831.

4. **South Australia.**—On 15th August, 1834, the Act 4 and 5 William IV., cap. 95, was passed, creating South Australia a "province", and settlement took place towards the end of the year 1836. The first Governor, Captain Hindmarsh, R.N., arrived at Holdfast Bay on 28th December, 1836, and on the same day the new colony was officially proclaimed. The new colony embraced 309,850 square miles of territory, lying south of the 26th parallel of south latitude and between the 141st and 132nd meridians of east longitude. On 10th December, 1861, by authority of the *Imperial Act* 24 and 25 Vict., cap. 44, the western boundary of South Australia was extended to coincide with the eastern boundary of Western Australia, namely, the 129th east meridian. The area of the extension was approximately 70,220 square miles. Nearly two years later, on 6th July, 1863, the Northern Territory, comprising 523,620 square miles, was brought under the jurisdiction of South Australia, which thereupon controlled an area of 903,690 square miles.

5. **New Zealand.**—New Zealand, nominally annexed by Captain Cook and formally declared by proclamation in 1840 as a dependency of New South Wales by letters patent of 16th November of that year was constituted a separate colony under the powers of the Act 3 and 4 Vict., cap. 62, of 7th August, 1840. Proclamation of the separation was made on 3rd May, 1841. The area of the colony was 103,862 square miles.

6. **Victoria.**—In 1851, what was known as the "Port Phillip District" of New South Wales was constituted the colony of Victoria, "bounded on the north and north-west by a straight line drawn from Cape Howe to the nearest source of the River Murray and thence by the course of that river to the eastern boundary of the colony of South Australia". The area of the new colony was 87,884 square miles, and its separate existence took effect from 1st July, 1851, upon the issuing of the writs for the first election of elective members of the Legislative Council.

7. **Queensland.**—The northern squatting districts of Moreton, Darling Downs, Burnett, Wide Bay, Maranoa, Leichhardt and Port Curtis, together with the reputed county of Stanley, were granted an independent administration and formed into a distinct colony under the name of Queensland by letters patent dated 6th June, 1859, although separation from New South Wales was not completed until 10th December of the same year, upon the assumption of office of the first Governor. The territory comprised in the new colony was "so much of the colony of New South Wales as lies northwards of a line commencing on the sea-coast at Point Danger in latitude about 28° 8' south, running westward along the Macpherson and Dividing Ranges and the Dumaresq River to the MacIntyre River, thence downward to the 29th parallel of south latitude, and following that parallel westerly to the 141st meridian of east longitude, which is the eastern boundary of South Australia, together with all the adjacent islands, their members, and appurtenances in the Pacific Ocean". The area of the colony thus constituted was 554,300 square miles. By letters patent dated 13th March, 1861, forwarded by the Colonial Secretary to the Governor of Queensland on 12th April, 1862, the area of Queensland was increased by the annexation of "so much of the colony of New South Wales as lies to the northward of the 26th parallel of south latitude, and between the 141st and 138th meridians of east longitude, together

with all and every the adjacent islands, their members, and appurtenances, in the Gulf of Carpentaria." With this addition, the area of Queensland became 670,500 square miles. Following a thorough revision of the area of each Local Government Area of Queensland, based on the most recent maps available, the Surveyor-General, in 1958, determined the area of Queensland as 667,000 square miles—a reduction of 3,500 square miles from the area previously determined.

#### § 4. The Establishment of the Commonwealth of Australia

1. **General.**—On 1st January, 1901, the colonies mentioned, with the exception of New Zealand, were federated under the name of the "Commonwealth of Australia," the designation of "Colonies"—except in the case of the Northern Territory, to which the designation "Territory" is applied—being at the same time changed to that of "States".

2. **Transfer of the Northern Territory to the Commonwealth.**—On 7th December, 1907, the Commonwealth and the State of South Australia entered into an agreement for the transfer of the Northern Territory to the Commonwealth, subject to approval by the Parliaments of the Commonwealth and the State. This approval was given by the South Australian Parliament under *The Northern Territory Surrender Act* 1907 (assented to on 14th May, 1908) and by the Commonwealth Parliament under the *Northern Territory Acceptance Act* 1910 (assented to on 16th November, 1910). The Territory was formally transferred to the Commonwealth on 1st January, 1911, and became the Northern Territory of Australia.

By Imperial Order in Council, dated 23rd July, 1931, Ashmore Islands, known as Middle, East and West Islands, and Cartier Island, situated in the Indian Ocean off the north-west coast of Australia, were placed under the authority of the Commonwealth. The islands were accepted by the Commonwealth in the *Ashmore and Cartier Islands Acceptance Act* 1933, under the name of the Territory of Ashmore and Cartier Islands, on 10th May, 1934. The Act authorized the Governor of Western Australia to make ordinances having the force of law in and in relation to the Territory. An amendment to the Act in July, 1938, annexed the islands to the Northern Territory, whose laws, ordinances and regulations, wherever applicable, thereupon applied.

3. **Transfer of the Australian Capital Territory to the Commonwealth.**—On 18th October, 1909, the Commonwealth and the State of New South Wales entered into an agreement for the surrender to and acceptance by the Commonwealth of an area of 911 square miles as the Seat of Government of the Commonwealth. In December, 1909, Acts were passed by the Commonwealth and New South Wales Parliaments approving the agreement, and on 5th December, 1910, a proclamation was issued vesting the Territory in the Commonwealth on and from 1st January, 1911. By the *Jervis Bay Territory Acceptance Act* 1915, an area of 28 square miles at Jervis Bay, surrendered by New South Wales according to an agreement made in 1913, was accepted by the Commonwealth, and was transferred as from 4th September, 1915.

4. **Present Composition of the Commonwealth.**—Following the revision of the area of Queensland, as mentioned in §3 above, the total area of the Commonwealth of Australia has been determined as 2,971,081 square miles. The dates of creation and the areas of its component States and Territories are shown below.

#### THE COMMONWEALTH OF AUSTRALIA: AREA, ETC., OF COMPONENT STATES AND TERRITORIES

State or Territory	Year of formation into separate Colony or Territory	Present area in square miles	State or Territory	Year of formation into separate Colony or Territory	Present area in square miles
New South Wales	1786	309,433	Northern Territory	1863	523,620
Victoria. . .	1851	87,884	Australian Capital Territory. . .	1911	939
Queensland. . .	1859	667,000			
South Australia. . .	1834	380,070			
Western Australia	1829	975,920	Commonwealth of Australia. . .	..	2,971,081
Tasmania. . .	1825	26,215			

## § 5. The Constitution of the Commonwealth

NOTE.—Information regarding the development of the Constitutions of the various Colonies (now States), together with a brief history of the Federal movement in Australia, was embodied in this Chapter in issues of the Official Year Book up to and including No. 22.

1. **Commonwealth Constitution Act.**—*The Commonwealth of Australia Constitution Act*, 63 and 64 Vict., Chapter 12, namely: "An Act to constitute the Commonwealth of Australia", as amended by the *Constitution Alteration (Senate Elections)* 1906, the *Constitution Alteration (State Debts)* 1909, the *Constitution Alteration (State Debts)* 1928, and the *Constitution Alteration (Social Services)* 1946, is given in *extenso* hereunder, and the text contains all the alterations of the Constitution which have been made up to and including 31st December, 1962.

THE COMMONWEALTH OF AUSTRALIA CONSTITUTION ACT,  
63 & 64 VICT., CHAPTER 12.

*An Act to constitute the Commonwealth of Australia. (9th July, 1900.)*

WHEREAS the people of New South Wales, Victoria, South Australia, Queensland, and Tasmania, humbly relying on the blessing of Almighty God, have agreed to unite in one indissoluble Federal Commonwealth under the Crown of the United Kingdom of Great Britain and Ireland, and under the Constitution hereby established:

And whereas it is expedient to provide for the admission into the Commonwealth of other Australian Colonies and possessions of the Queen:

Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:—

1. This Act may be cited as the Commonwealth of Australia Constitution Act.
2. The provisions of this Act referring to the Queen shall extend to Her Majesty's heirs and successors in the sovereignty of the United Kingdom.
3. It shall be lawful for the Queen, with the advice of the Privy Council, to declare by proclamation that, on and after a day therein appointed, not being later than one year after the passing of this Act, the people of New South Wales, Victoria, South Australia, Queensland, and Tasmania, and also, if Her Majesty is satisfied that the people of Western Australia have agreed thereto, of Western Australia, shall be united in a Federal Commonwealth under the name of the Commonwealth of Australia. But the Queen may, at any time after the proclamation, appoint a Governor-General for the Commonwealth.
4. The Commonwealth shall be established, and the Constitution of the Commonwealth shall take effect, on and after the day so appointed. But the Parliaments of the several colonies may at any time after the passing of this Act make any such laws, to come into operation on the day so appointed, as they might have made if the Constitution had taken effect at the passing of this Act.
5. This Act, and all laws made by the Parliament of the Commonwealth under the Constitution, shall be binding on the courts, judges, and people of every State and of every part of the Commonwealth, notwithstanding anything in the laws of any State; and the laws of the Commonwealth shall be in force on all British ships, the Queen's ships of war excepted, whose first port of clearance and whose port of destination are in the Commonwealth.
6. "The Commonwealth" shall mean the Commonwealth of Australia as established under this Act.
- "The States" shall mean such of the colonies of New South Wales, New Zealand, Queensland, Tasmania, Victoria, Western Australia, and South Australia, including the northern territory of South Australia, as for the time being are parts of the Commonwealth, and such colonies or territories as may be admitted into or established by the Commonwealth as States; and each of such parts of the Commonwealth shall be called "a State."
- "Original States" shall mean such States as are parts of the Commonwealth at its establishment.

7. The Federal Council of Australasia Act, 1885, is hereby repealed, but so as not to affect any laws passed by the Federal Council of Australasia and in force at the establishment of the Commonwealth.

Any such law may be repealed as to any State by the Parliament of the Commonwealth, or as to any colony not being a State by the Parliament thereof.

8. After the passing of this Act the Colonial Boundaries Act, 1895, shall not apply to any colony which becomes a State of the Commonwealth; but the Commonwealth shall be taken to be a self-governing colony for the purposes of that Act.

9. The Constitution of the Commonwealth shall be as follows:—

#### THE CONSTITUTION.

This Constitution is divided as follows:—

- Chapter I.—The Parliament:
  - Part I.—General:
  - Part II.—The Senate:
  - Part III.—The House of Representatives:
  - Part IV.—Both Houses of the Parliament:
  - Part V.—Powers of the Parliament:
- Chapter II.—The Executive Government:
- Chapter III.—The Judicature:
- Chapter IV.—Finance and Trade:
- Chapter V.—The States:
- Chapter VI.—New States:
- Chapter VII.—Miscellaneous:
- Chapter VIII.—Alteration of the Constitution.
- The Schedule.

#### CHAPTER I.—THE PARLIAMENT.

##### PART I.—GENERAL.

1. The legislative power of the Commonwealth shall be vested in a Federal Parliament, which shall consist of the Queen, a Senate, and a House of Representatives, and which is hereinafter called “The Parliament”, or “The Parliament of the Commonwealth”.

2. A Governor-General appointed by the Queen shall be Her Majesty's representative in the Commonwealth, and shall have and may exercise in the Commonwealth during the Queen's pleasure, but subject to this Constitution, such powers and functions of the Queen as Her Majesty may be pleased to assign to him.

3. There shall be payable to the Queen out of the Consolidated Revenue Fund of the Commonwealth, for the salary of the Governor-General, an annual sum which, until the Parliament otherwise provides, shall be ten thousand pounds.

The salary of a Governor-General shall not be altered during his continuance in office.

4. The provisions of this Constitution relating to the Governor-General extend and apply to the Governor-General for the time being, or such person as the Queen may appoint to administer the Government of the Commonwealth; but no such person shall be entitled to receive any salary from the Commonwealth in respect of any other office during his administration of the Government of the Commonwealth.

5. The Governor-General may appoint such times for holding the sessions of the Parliament as he thinks fit, and may also from time to time, by Proclamation or otherwise prorogue the Parliament, and may in like manner dissolve the House of Representatives.

After any general election the Parliament shall be summoned to meet not later than thirty days after the day appointed for the return of the writs.

The Parliament shall be summoned to meet not later than six months after the establishment of the Commonwealth.

6. There shall be a session of the Parliament once at least in every year, so that twelve months shall not intervene between the last sitting of the Parliament in one session and its first sitting in the next session.

## PART II.—THE SENATE.

7. The Senate shall be composed of senators for each State, directly chosen by the people of the State, voting, until the Parliament otherwise provides, as one electorate.

But until the Parliament of the Commonwealth otherwise provides, the Parliament of the State of Queensland, if that State be an Original State, may make laws dividing the State into divisions and determining the number of senators to be chosen for each division, and in the absence of such provision the State shall be one electorate.

Until the Parliament otherwise provides there shall be six senators for each Original State.\* The Parliament may make laws increasing or diminishing the number of senators for each State, but so that equal representation of the several Original States shall be maintained and that no Original State shall have less than six senators.

The senators shall be chosen for a term of six years, and the names of the senators chosen for each State shall be certified by the Governor to the Governor-General.

8. The qualification of electors of senators shall be in each State that which is prescribed by this Constitution, or by the Parliament, as the qualification for electors of members of the House of Representatives; but in the choosing of senators each elector shall vote only once.

9. The Parliament of the Commonwealth may make laws prescribing the method of choosing senators, but so that the method shall be uniform for all the States. Subject to any such law, the Parliament of each State may make laws prescribing the method of choosing the senators for that State.

The Parliament of a State may make laws for determining the times and places of elections of senators for the State.

10. Until the Parliament otherwise provides, but subject to this Constitution, the laws in force in each State, for the time being, relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections of senators for the State.

11. The Senate may proceed to the despatch of business, notwithstanding the failure of any State to provide for its representation in the Senate.

12. The Governor of any State may cause writs to be issued for elections of senators for the State. In case of the dissolution of the Senate the writs shall be issued within ten days from the proclamation of such dissolution.

13. As soon as may be after the Senate first meets, and after each first meeting of the Senate following a dissolution thereof, the Senate shall divide the senators chosen for each State into two classes, as nearly equal in number as practicable; and the places of the senators of the first class shall become vacant at the expiration of [the third year] *three years*,† and the places of those of the second class at the expiration of [the sixth year] *six years*,† from the beginning of their term of service; and afterwards the places of senators shall become vacant at the expiration of six years from the beginning of their term of service.

The election to fill vacant places shall be made [in the year at the expiration of which] *within one year before*† the places are to become vacant.

For the purposes of this section the term of service of a senator shall be taken to begin on the first day of [January] *July*† following the day of his election, except in the cases of the first election and of the election next after any dissolution of the Senate, when it shall be taken to begin on the first day of [January] *July*† preceding the day of his election.

14. Whenever the number of senators for a State is increased or diminished, the Parliament of the Commonwealth may make such provision for the vacating of the places of senators for the State as it deems necessary to maintain regularity in the rotation.

15. If the place of a senator becomes vacant before the expiration of his term of service, the Houses of Parliament of the State for which he was chosen shall, sitting and voting together, choose a person to hold the place until the expiration of the term, or until the election of a successor as hereinafter provided, whichever first happens. But if the Houses of Parliament of the State are not in session at the time when the vacancy is notified,

\* The Parliament has otherwise provided, by means of the *Representation Act* 1948, that the number of senators shall be ten for each State from the first meeting of Parliament after the first dissolution of the House of Representatives occurring after the commencement of the Act (18th May, 1948).

† As amended by Section 2 of the *Constitution Alteration (Senate Elections)* 1906. The words in square brackets have been repealed; amendments are shown in italics.

the Governor of the State, with the advice of the Executive Council thereof, may appoint a person to hold the place until the expiration of fourteen days after the beginning of the next session of the Parliament of the State, or until the election of a successor, whichever first happens.

At the next general election of members of the House of Representatives, or at the next election of senators for the State, whichever first happens, a successor shall, if the term has not then expired, be chosen to hold the place from the date of his election until the expiration of the term.

The name of any senator so chosen or appointed shall be certified by the Governor of the State to the Governor-General.

16. The qualifications of a senator shall be the same as those of a member of the House of Representatives.

17. The Senate shall, before proceeding to the despatch of any other business, choose a senator to be the President of the Senate; and as often as the office of President becomes vacant the Senate shall again choose a senator to be the President.

The President shall cease to hold his office if he ceases to be a senator. He may be removed from office by a vote of the Senate, or he may resign his office or his seat by writing addressed to the Governor-General.

18. Before or during any absence of the President, the Senate may choose a senator to perform his duties in his absence.

19. A senator may, by writing addressed to the President, or to the Governor-General if there is no President or if the President is absent from the Commonwealth, resign his place, which thereupon shall become vacant.

20. The place of a senator shall become vacant if for two consecutive months of any session of the Parliament he, without the permission of the Senate, fails to attend the Senate.

21. Whenever a vacancy happens in the Senate, the President, or if there is no President or if the President is absent from the Commonwealth the Governor-General, shall notify the same to the Governor of the State in the representation of which the vacancy has happened.

22. Until the Parliament otherwise provides, the presence of at least one-third of the whole number of the senators shall be necessary to constitute a meeting of the Senate for the exercise of its powers.

23. Questions arising in the Senate shall be determined by a majority of votes, and each senator shall have one vote. The President shall in all cases be entitled to a vote; and when the votes are equal the question shall pass in the negative.

### PART III.—THE HOUSE OF REPRESENTATIVES.

24. The House of Representatives shall be composed of members directly chosen by the people of the Commonwealth, and the number of such members shall be, as nearly as practicable, twice the number of the senators.

The number of members chosen in the several States shall be in proportion to the respective numbers of their people, and shall, until the Parliament otherwise provides, be determined, whenever necessary, in the following manner:—

- (i) A quota shall be ascertained by dividing the number of the people of the Commonwealth, as shown by the latest statistics of the Commonwealth, by twice the number of the senators;
- (ii) The number of members to be chosen in each State shall be determined by dividing the number of the people of the State, as shown by the latest statistics of the Commonwealth, by the quota; and if on such division there is a remainder greater than one-half of the quota, one more member shall be chosen in the State.

But notwithstanding anything in this section five members at least shall be chosen in each Original State.

25. For the purposes of the last section, if by the law of any State all persons of any race are disqualified from voting at elections for the more numerous House of the Parliament of the State, then, in reckoning the number of the people of the State or of the Commonwealth, persons of that race resident in that State shall not be counted.

26. Notwithstanding anything in section twenty-four, the number of members to be chosen in each State at the first election shall be as follows:—

New South Wales ..	23	South Australia ..	6
Victoria ..	20	Tasmania ..	5
Queensland ..	8		

Provided that if Western Australia is an Original State, the numbers shall be as follows:—

New South Wales ..	26	South Australia ..	7
Victoria ..	23	Western Australia ..	5
Queensland ..	9	Tasmania ..	5

27. Subject to this Constitution, the Parliament may make laws for increasing or diminishing the number of the members of the House of Representatives.

28. Every House of Representatives shall continue for three years from the first meeting of the House, and no longer, but may be sooner dissolved by the Governor-General.

29. Until the Parliament of the Commonwealth otherwise provides, the Parliament of any State may make laws for determining the divisions in each State for which members of the House of Representatives may be chosen, and the number of members to be chosen for each division. A division shall not be formed out of parts of different States.

In the absence of other provision, each State shall be one electorate.

30. Until the Parliament otherwise provides, the qualification of electors of members of the House of Representatives shall be in each State that which is prescribed by the law of the State as the qualification of electors of the more numerous House of Parliament of the State; but in choosing of members each elector shall vote only once.\*

31. Until the Parliament otherwise provides, but subject to this Constitution, the laws in force in each State for the time being relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections in the State of members of the House of Representatives.

32. The Governor-General in Council may cause writs to be issued for general elections of members of the House of Representatives.

After the first general election, the writs shall be issued within ten days from the expiry of a House of Representatives or from the proclamation of a dissolution thereof.

33. Whenever a vacancy happens in the House of Representatives, the Speaker shall issue his writ for the election of a new member, or if there is no Speaker or if he is absent, from the Commonwealth the Governor-General in Council may issue the writ.

34. Until the Parliament otherwise provides, the qualifications of a member of the House of Representatives shall be as follows:—

(i) He must be of the full age of twenty-one years, and must be an elector entitled to vote at the election of members of the House of Representatives, or a person qualified to become such elector, and must have been for three years at the least a resident within the limits of the Commonwealth as existing at the time when he is chosen:

(ii) He must be a subject of the Queen, either natural-born or for at least five years naturalized under a law of the United Kingdom, or of a Colony which has become or becomes a State, or of the Commonwealth, or of a State.†

35. The House of Representatives shall, before proceeding to the despatch of any other business, choose a member to be the Speaker of the House, and as often as the office of Speaker becomes vacant the House shall again choose a member to be the Speaker.

The Speaker shall cease to hold his office if he ceases to be a member. He may be removed from office by a vote of the House, or he may resign his office or his seat by writing addressed to the Governor-General.

36. Before or during any absence of the Speaker, the House of Representatives may choose a member to perform his duties in his absence.

\* The Parliament has otherwise provided, by means of the *Commonwealth Electoral Act 1918-1953*. Sections 39 and 39A (repealing an earlier provision made by the *Commonwealth Franchise Act 1902*). For present qualifications see Chapter III. General Government.

† The Parliament has otherwise provided, by means of the *Commonwealth Electoral Act 1918-1953*, Section 69. For present qualifications see Chapter III. General Government.

37. A member may by writing addressed to the Speaker, or to the Governor-General if there is no Speaker or if the Speaker is absent from the Commonwealth, resign his place, which thereupon shall become vacant.

38. The place of a member shall become vacant if for two consecutive months of any session of the Parliament he, without the permission of the House, fails to attend the House.

39. Until the Parliament otherwise provides, the presence of at least one-third of the whole number of the members of the House of Representatives shall be necessary to constitute a meeting of the House for the exercise of its powers.

40. Questions arising in the House of Representatives shall be determined by a majority of votes other than that of the Speaker. The Speaker shall not vote unless the numbers are equal, and then he shall have a casting vote.

#### PART IV.—BOTH HOUSES OF THE PARLIAMENT.

41. No adult person who has or acquires a right to vote at elections for the more numerous House of the Parliament of a State shall, while the right continues, be prevented by any law of the Commonwealth from voting at elections for either House of the Parliament of the Commonwealth.

42. Every senator and every member of the House of Representatives shall before taking his seat make and subscribe before the Governor-General, or some person authorized by him, an oath or affirmation of allegiance in the form set forth in the schedule to this Constitution.

43. A member of either House of the Parliament shall be incapable of being chosen or of sitting as a member of the other House.

44. Any person who—

- (i) Is under any acknowledgment of allegiance, obedience, or adherence to a foreign power, or is a subject or a citizen or entitled to the rights or privileges of a subject or a citizen of a foreign power: or
- (ii) Is attainted of treason, or has been convicted and is under sentence, or subject to be sentenced, for any offence punishable under the law of the Commonwealth or of a State by imprisonment for one year or longer: or
- (iii) Is an undischarged bankrupt or insolvent: or
- (iv) Holds any office of profit under the Crown, or any pension payable during the pleasure of the Crown out of any of the revenues of the Commonwealth: or
- (v) Has any direct or indirect pecuniary interest in any agreement with the Public Service of the Commonwealth otherwise than as a member and in common with the other members of an incorporated company consisting of more than twenty-five persons:

shall be incapable of being chosen or of sitting as a senator or a member of the House of Representatives.

But sub-section iv. does not apply to the office of any of the Queen's Ministers of State for the Commonwealth, or of any of the Queen's Ministers for a State, or to the receipt of pay, half-pay, or a pension by any person as an officer or member of the Queen's navy or army, or to the receipt of pay as an officer or member of the naval or military forces of the Commonwealth by any person whose services are not wholly employed by the Commonwealth.

45. If a senator or member of the House of Representatives—

- (i) Becomes subject to any of the disabilities mentioned in the last preceding section: or
- (ii) Takes the benefit, whether by assignment, composition, or otherwise, of any law relating to bankrupt or insolvent debtors: or
- (iii) Directly or indirectly takes or agrees to take any fee or honorarium for services rendered to the Commonwealth, or for services rendered in the Parliament to any person or State:

his place shall thereupon become vacant.

46. Until the Parliament otherwise provides, any person declared by this Constitution to be incapable of sitting as a senator or as a member of the House of Representatives shall, for every day on which he so sits, be liable to pay the sum of one hundred pounds to any person who sues for it in any court of competent jurisdiction.

47. Until the Parliament otherwise provides, any question respecting the qualification of a senator or of a member of the House of Representatives, or respecting a vacancy in either House of the Parliament, and any question of a disputed election to either House shall be determined by the House in which the question arises.

48. Until the Parliament otherwise provides, each senator and each member of the House of Representatives shall receive an allowance of four hundred pounds a year, to be reckoned from the day on which he takes his seat.\*

49. The powers, privileges, and immunities of the Senate and of the House of Representatives, and of the members and the committees of each House, shall be such as are declared by the Parliament, and until declared shall be those of the Commons House of Parliament of the United Kingdom, and of its members and committees, at the establishment of the Commonwealth.

50. Each House of the Parliament may make rules and orders with respect to—

- (i) The mode in which its powers, privileges, and immunities may be exercised and upheld;
- (ii) The order and conduct of its business and proceedings either separately or jointly with the other House.

#### PART V.—POWERS OF THE PARLIAMENT.†

51. The Parliament shall, subject to this Constitution, have power to make laws for the peace, order, and good government of the Commonwealth with respect to—

- (i) Trade and commerce with other countries, and among the States;
- (ii) Taxation; but so as not to discriminate between States or parts of States;
- (iii) Bounties on the production or export of goods, but so that such bounties shall be uniform throughout the Commonwealth;
- (iv) Borrowing money on the public credit of the Commonwealth;
- (v) Postal, telegraphic, telephonic, and other like services;
- (vi) The naval and military defence of the Commonwealth and of the several States, and the control of the forces to execute and maintain the laws of the Commonwealth;
- (vii) Lighthouses, lightships, beacons and buoys;
- (viii) Astronomical and meteorological observations;
- (ix) Quarantine;
- (x) Fisheries in Australian waters beyond territorial limits;
- (xi) Census and statistics;
- (xii) Currency, coinage, and legal tender;
- (xiii) Banking, other than State banking; also State banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money;
- (xiv) Insurance, other than State insurance; also State insurance extending beyond the limits of the State concerned;
- (xv) Weights and measures;
- (xvi) Bills of exchange and promissory notes;
- (xvii) Bankruptcy and insolvency;
- (xviii) Copyrights, patents of inventions and designs, and trade marks;
- (xix) Naturalization and aliens;
- (xx) Foreign corporations, and trading or financial corporations formed within the limits of the Commonwealth;
- (xxi) Marriage:

\* The Parliamentary allowance has been varied from time to time (see pp. 69 and 70 of Official Year Book No. 42). In 1959, it was increased to £2,750, while additional allowances of £1,500 and £3,250, respectively, were granted to the Leaders of the Opposition in the Senate and the House of Representatives, and an additional allowance of £750 to the Leader in the House of Representatives (other than the Leader of the Opposition) of a recognized political party which has not less than ten members in the House of Representatives and of which no member is a Minister.

† Particulars of proposed laws which were submitted to referendums are referred to in Chapter III. General Government.

- (xxii) Divorce and matrimonial causes; and in relation thereto, parental rights, and the custody and guardianship of infants:
- (xxiii) Invalid and old-age pensions:
- (xxiiiA) *\*The provision of maternity allowances, widows' pensions, child endowment, unemployment, pharmaceutical, sickness and hospital benefits, medical and dental services (but not so as to authorize any form of civil conscription), benefits to students and family allowances:*
- (xxiv) The service and execution throughout the Commonwealth of the civil and criminal process and the judgments of the courts of the States:
- (xxv) The recognition throughout the Commonwealth of the laws, the public Acts and records, and the judicial proceedings of the States:
- (xxvi) The people of any race, other than the aboriginal race in any State, for whom it is deemed necessary to make special laws:
- (xxvii) Immigration and emigration:
- (xxviii) The influx of criminals:
- (xxix) External affairs:
- (xxx) The relations of the Commonwealth with the islands of the Pacific:
- (xxxi) The acquisition of property on just terms from any State or person for any purpose in respect of which the Parliament has power to make laws:
- (xxxii) The control of railways with respect to transport for the naval and military purposes of the Commonwealth:
- (xxxiii) The acquisition, with the consent of a State, of any railways of the State on terms arranged between the Commonwealth and the State:
- (xxxiv) Railway construction and extension in any State with the consent of that State:
- (xxxv) Conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State:
- (xxxvi) Matters in respect of which this Constitution makes provision until the Parliament otherwise provides:
- (xxxvii) Matters referred to the Parliament of the Commonwealth by the Parliament or Parliaments of any State or States, but so that the law shall extend only to States by whose Parliaments the matter is referred, or which afterwards adopt the law:
- (xxxviii) The exercise within the Commonwealth, at the request or with the concurrence of the Parliaments of all the States directly concerned, of any power which can at the establishment of this Constitution be exercised only by the Parliament of the United Kingdom or by the Federal Council of Australasia:
- (xxxix) Matters incidental to the execution of any power vested by this Constitution in the Parliament or in either House thereof, or in the Government of the Commonwealth, or in the Federal Judiciary, or in any department or officer of the Commonwealth.

52. The Parliament shall, subject to this Constitution, have exclusive power to make laws for the peace, order, and good government of the Commonwealth with respect to—

- (i) The seat of Government of the Commonwealth, and all places acquired by the Commonwealth for public purposes:
- (ii) Matters relating to any department of the public service the control of which is by this Constitution transferred to the Executive Government of the Commonwealth:
- (iii) Other matters declared by this Constitution to be within the exclusive power of the Parliament.

53. Proposed laws appropriating revenue or moneys, or imposing taxation, shall not originate in the Senate. But a proposed law shall not be taken to appropriate revenue or moneys, or to impose taxation, by reason only of its containing provisions for the imposition or appropriation of fines or other pecuniary penalties, or for the demand or payment or appropriation of fees for licences, or fees for services under the proposed law.

---

\* Under Section 2 of the *Constitution Alteration (Social Services) 1946*, the Constitution was amended by the insertion of this paragraph.

The Senate may not amend proposed laws imposing taxation, or proposed laws appropriating revenue or moneys for the ordinary annual services of the Government.

The Senate may not amend any proposed law so as to increase any proposed charge or burden on the people.

The Senate may at any stage return to the House of Representatives any proposed law which the Senate may not amend, requesting, by message, the omission or amendment of any items or provisions therein. And the House of Representatives may, if it thinks fit, make any of such omissions or amendments, with or without modifications.

Except as provided in this section, the Senate shall have equal power with the House of Representatives in respect of all proposed laws.

54. The proposed law which appropriates revenue or moneys for the ordinary annual services of the Government shall deal only with such appropriation.

55. Laws imposing taxation shall deal only with the imposition of taxation, and any provision therein dealing with any other matter shall be of no effect.

Laws imposing taxation, except laws imposing duties of customs or of excise, shall deal with one subject of taxation only; but laws imposing duties of customs shall deal with duties of customs only, and laws imposing duties of excise shall deal with duties of excise only.

56. A vote, resolution, or proposed law for the appropriation of revenue or moneys shall not be passed unless the purpose of the appropriation has in the same session been recommended by message of the Governor-General to the House in which the proposal originated.

57. If the House of Representatives passes any proposed law, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, and if after an interval of three months the House of Representatives, in the same or the next session, again passes the proposed law with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may dissolve the Senate and the House of Representatives simultaneously. But such dissolution shall not take place within six months before the date of the expiry of the House of Representatives by effluxion of time.

If after such dissolution the House of Representatives again passes the proposed law, with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may convene a joint sitting of the members of the Senate and of the House of Representatives.

The members present at the joint sitting may deliberate and shall vote together upon the proposed law as last proposed by the House of Representatives, and upon amendments, if any, which have been made therein by one House and not agreed to by the other, and any such amendments which are affirmed by an absolute majority of the total number of the members of the Senate and House of Representatives shall be taken to have been carried, and if the proposed law, with the amendments, if any, so carried is affirmed by an absolute majority of the total number of members of the Senate and House of Representatives, it shall be taken to have been duly passed by both Houses of the Parliament, and shall be presented to the Governor-General for the Queen's assent.

58. When a proposed law passed by both Houses of the Parliament is presented to the Governor-General for the Queen's assent, he shall declare, according to his discretion, but subject to this Constitution, that he assents in the Queen's name, or that he withholds assent, or that he reserves the law for the Queen's pleasure.

The Governor-General may return to the House in which it originated any proposed law so presented to him, and may transmit therewith any amendments which he may recommend, and the Houses may deal with the recommendation.

59. The Queen may disallow any law within one year from the Governor-General's assent, and such disallowance on being made known by the Governor-General by speech or message to each of the Houses of the Parliament, or by Proclamation, shall annul the law from the day when the disallowance is so made known.

60. A proposed law reserved for the Queen's pleasure shall not have any force unless and until within two years from the day on which it was presented to the Governor-General for the Queen's assent the Governor-General makes known, by speech or message to each of the Houses of the Parliament, or by Proclamation, that it has received the Queen's assent.

## CHAPTER II.—THE EXECUTIVE GOVERNMENT.

61. The executive power of the Commonwealth is vested in the Queen and is exercisable by the Governor-General as the Queen's representative, and extends to the execution and maintenance of this Constitution, and of the laws of the Commonwealth.

62. There shall be a Federal Executive Council to advise the Governor-General in the government of the Commonwealth, and the members of the Council shall be chosen and summoned by the Governor-General and sworn as Executive Councillors, and shall hold office during his pleasure.

63. The provisions of this Constitution referring to the Governor-General in Council shall be construed as referring to the Governor-General acting with the advice of the Federal Executive Council.

64. The Governor-General may appoint officers to administer such departments of State of the Commonwealth as the Governor-General in Council may establish.

Such officers shall hold office during the pleasure of the Governor-General. They shall be members of the Federal Executive Council, and shall be the Queen's Ministers of State for the Commonwealth.

After the first general election no Minister of State shall hold office for a longer period than three months unless he is or becomes a senator or a member of the House of Representatives.

65. Until the Parliament otherwise provides, the Ministers of State shall not exceed seven in number, and shall hold such offices as the Parliament prescribes, or, in the absence of provision, as the Governor-General directs.\*

66. There shall be payable to the Queen, out of the Consolidated Revenue Fund of the Commonwealth, for the salaries of the Ministers of State, an annual sum which until the Parliament otherwise provides, shall not exceed twelve thousand pounds a year.\*

67. Until the Parliament otherwise provides, the appointment and removal of all other officers of the Executive Government of the Commonwealth shall be vested in the Governor-General in Council, unless the appointment is delegated by the Governor-General in Council or by a law of the Commonwealth to some other authority.

68. The command in chief of the naval and military forces of the Commonwealth is vested in the Governor-General as the Queen's representative.

69. On a date or dates to be proclaimed by the Governor-General after the establishment of the Commonwealth the following departments of the public service in each State shall become transferred to the Commonwealth:—

Posts, telegraphs, and telephones:		Lighthouses, lightships, beacons, and buoys:
Naval and military defence:		Quarantine.

But the Departments of customs and of excise in each State shall become transferred to the Commonwealth on its establishment.

70. In respect of matters which, under this Constitution, pass to the Executive Government of the Commonwealth, all powers and functions which at the establishment of the Commonwealth are vested in the Governor of a Colony, or in the Governor of a Colony with the advice of his Executive Council, or in any authority of a Colony, shall vest in the Governor-General, or in the Governor-General in Council, or in the authority exercising similar powers under the Commonwealth, as the case requires.

\* The number of Ministers of State has been increased from time to time (see Chapter III. para. 4 (vi.)), for details) and has been 22 since 1956. The annual appropriation for Ministers' salaries has been correspondingly increased and has been £66,600 since 1959.

## CHAPTER III.—THE JUDICATURE.

71. The judicial power of the Commonwealth shall be vested in a Federal Supreme Court, to be called the High Court of Australia, and in such other federal courts as the Parliament creates, and in such other courts as it invests with federal jurisdiction. The High Court shall consist of a Chief Justice, and so many other Justices, not less than two, as the Parliament prescribes.\*

72. The Justices of the High Court and of the other Courts created by the Parliament—

- (i) Shall be appointed by the Governor-General in Council:
- (ii) Shall not be removed except by the Governor-General in Council, on an address from both Houses of the Parliament in the same session, praying for such removal on the ground of proved misbehaviour or incapacity:
- (iii) Shall receive such remuneration as the Parliament may fix; but the remuneration shall not be diminished during their continuance in office.\*

73. The High Court shall have jurisdiction, with such exceptions and subject to such regulations as the Parliament prescribes, to hear and determine appeals from all judgments, decrees, orders, and sentences—

- (i) Of any Justice or Justices exercising the original jurisdiction of the High Court:
  - (ii) Of any other federal court, or court exercising federal jurisdiction; or of the Supreme Court of any State, or of any other court of any State from which at the establishment of the Commonwealth an appeal lies to the Queen in Council:
  - (iii) Of the Inter-State Commission, but as to questions of law only:
- and the judgment of the High Court in all such cases shall be final and conclusive.

But no exception or regulation prescribed by the Parliament shall prevent the High Court from hearing and determining any appeal from the Supreme Court of a State in any matter in which at the establishment of the Commonwealth an appeal lies from such Supreme Court to the Queen in Council.

Until the Parliament otherwise provides, the conditions of and restrictions on appeals to the Queen in Council from the Supreme Courts of the several States shall be applicable to appeals from them to the High Court.

74. No appeal shall be permitted to the Queen in Council from a decision of the High Court upon any question, howsoever arising, as to the limits *inter se* of the Constitutional powers of the Commonwealth and those of any State or States, or as to the limits *inter se* of the Constitutional powers of any two or more States, unless the High Court shall certify that the question is one which ought to be determined by Her Majesty in Council.

The High Court may so certify if satisfied that for any special reason the certificate should be granted, and thereupon an appeal shall lie to Her Majesty in Council on the question without further leave.

Except as provided in this section, this Constitution shall not impair any right which the Queen may be pleased to exercise by virtue of Her Royal prerogative to grant special leave of appeal from the High Court to Her Majesty in Council. The Parliament may make laws limiting the matters in which such leave may be asked, but proposed laws containing any such limitation shall be reserved by the Governor-General for Her Majesty's pleasure.

75. In all matters—

- (i) Arising under any treaty:
- (ii) Affecting consuls or other representatives of other countries:
- (iii) In which the Commonwealth, or a person suing or being sued on behalf of the Commonwealth, is a party:
- (iv) Between States, or between residents of different States, or between a State and a resident of another State:
- (v) In which a writ of Mandamus or prohibition or an injunction is sought against an officer of the Commonwealth:

the High Court shall have original jurisdiction.

\* The *Judiciary Act* 1903 provided for a Chief Justice and two other Justices, increased by subsequent amendments to six. The *Judiciary Act* 1903 also provided for the payment of a salary of £3,500 a year to the Chief Justice and of £3,000 a year to each other Justice, later increased to £8,000 and £6,500 a year, respectively.

76. The Parliament may make laws conferring original jurisdiction on the High Court in any matter—

- (i) Arising under this Constitution, or involving its interpretation:
- (ii) Arising under any laws made by the Parliament:
- (iii) Of Admiralty and maritime jurisdiction:
- (iv) Relating to the same subject-matter claimed under the laws of different States.

77. With respect to any of the matters mentioned in the last two sections the Parliament may make laws—

- (i) *Defining the jurisdiction of any federal court other than the High Court:*
- (ii) *Defining the extent to which the jurisdiction of any federal court shall be exclusive of that which belongs to or is invested in the courts of the States:*
- (iii) *Investing any court of a State with federal jurisdiction.*

78. The Parliament may make laws conferring rights to proceed against the Commonwealth or a State in respect of matters within the limits of the judicial power.

79. The federal jurisdiction of any court may be exercised by such number of judges as the Parliament prescribes.

80. The trial on indictment of any offence against any law of the Commonwealth shall be by jury, and every such trial shall be held in the State where the offence was committed, and if the offence was not committed within any State the trial shall be held at such place or places as the Parliament prescribes.

---

#### CHAPTER IV.—FINANCE AND TRADE.

81. All revenues or moneys raised or received by the Executive Government of the Commonwealth shall form one Consolidated Revenue Fund, to be appropriated for the purposes of the Commonwealth in the manner and subject to the charges and liabilities imposed by this Constitution.

82. The costs, charges, and expenses incident to the collection, management, and receipt of the Consolidated Revenue Fund shall form the first charge thereon; and the revenue of the Commonwealth shall in the first instance be applied to the payment of the expenditure of the Commonwealth.

83. No money shall be drawn from the Treasury of the Commonwealth except under appropriation made by law.

But until the expiration of one month after the first meeting of the Parliament the Governor-General in Council may draw from the Treasury and expend such moneys as may be necessary for the maintenance of any department transferred to the Commonwealth and for the holding of the first elections for the Parliament.

84. When any department of the public service of a State becomes transferred to the Commonwealth, all officers of the department shall become subject to the control of the Executive Government of the Commonwealth.

Any such officer who is not retained in the service of the Commonwealth shall, unless he is appointed to some other office of equal emolument in the public service of the State, be entitled to receive from the State any pension, gratuity, or other compensation, payable under the law of the State on the abolition of his office.

Any such officer who is retained in the service of the Commonwealth shall preserve all his existing and accruing rights, and shall be entitled to retire from office at the time, and on the pension or retiring allowance, which would be permitted by the law of the State if his service with the Commonwealth were a continuation of his service with the State. Such pension or retiring allowance shall be paid to him by the Commonwealth; but the State shall pay to the Commonwealth a part thereof, to be calculated on the proportion which his term of service with the State bears to his whole term of service, and for the purpose of the calculation his salary shall be taken to be that paid to him by the State at the time of the transfer.

Any officer who is, at the establishment of the Commonwealth, in the public service of a State, and who is, by consent of the Governor of the State with the advice of the Executive Council thereof, transferred to the public service of the Commonwealth, shall have the same rights as if he had been an officer of a department transferred to the Commonwealth and were retained in the service of the Commonwealth.

85. When any department of the public service of a State is transferred to the Commonwealth—

- (i) All property of the State of any kind, used exclusively in connexion with the department, shall become vested in the Commonwealth; but, in the case of the departments controlling customs and excise and bounties, for such time only as the Governor-General in Council may declare to be necessary:
- (ii) The Commonwealth may acquire any property of the State, of any kind used, but not exclusively used in connexion with the department; the value thereof shall, if no agreement can be made, be ascertained in, as nearly as may be, the manner in which the value of land, or of an interest in land, taken by the State for public purposes is ascertained under the law of the State in force at the establishment of the Commonwealth:
- (iii) The Commonwealth shall compensate the State for the value of any property passing to the Commonwealth under this section; if no agreement can be made as to the mode of compensation, it shall be determined under laws to be made by the Parliament:
- (iv) The Commonwealth shall, at the date of the transfer, assume the current obligations of the State in respect of the department transferred.

86. On the establishment of the Commonwealth, the collection and control of duties of customs and of excise, and the control of the payment of bounties, shall pass to the Executive Government of the Commonwealth.

87. During a period of ten years after the establishment of the Commonwealth and thereafter until the Parliament otherwise provides, of the net revenue of the Commonwealth from duties of customs and of excise not more than one-fourth shall be applied annually by the Commonwealth towards its expenditure.

The balance shall, in accordance with this Constitution, be paid to the several States, or applied towards the payment of interest on debts of the several States taken over by the Commonwealth.

88. Uniform duties of customs shall be imposed within two years after the establishment of the Commonwealth.

89. Until the imposition of uniform duties of customs—

- (i) The Commonwealth shall credit to each State the revenues collected therein by the Commonwealth.
- (ii) The Commonwealth shall debit to each State—
  - (a) The expenditure therein of the Commonwealth incurred solely for the maintenance or continuance, as at the time of transfer, of any department transferred from the State to the Commonwealth;
  - (b) The proportion of the State, according to the number of its people, in the other expenditure of the Commonwealth.
- (iii) The Commonwealth shall pay to each State month by month the balance (if any) in favour of the State.

90. On the imposition of uniform duties of customs the power of the Parliament to impose duties of customs and of excise, and to grant bounties on the production or export of goods, shall become exclusive.

On the imposition of uniform duties of customs all laws of the several States imposing duties of customs or of excise, or offering bounties on the production or export of goods, shall cease to have effect, but any grant of or agreement for any such bounty lawfully made by or under the authority of the Government of any State shall be taken to be good if made before the thirtieth day of June, one thousand eight hundred and ninety-eight, and not otherwise.

91. Nothing in this Constitution prohibits a State from granting any aid to or bounty on mining for gold, silver, or other metals, nor from granting, with the consent of both Houses of the Parliament of the Commonwealth expressed by resolution, any aid to or bounty on the production or export of goods.

92. On the imposition of uniform duties of customs, trade, commerce, and intercourse among the States, whether by means of internal carriage or ocean navigation, shall be absolutely free.

But notwithstanding anything in this Constitution, goods imported before the imposition of uniform duties of customs into any State, or into any Colony which, whilst the goods remain therein, becomes a State, shall, on thence passing into another State within two

years after the imposition of such duties, be liable to any duty chargeable on the importation of such goods into the Commonwealth, less any duty paid in respect of the goods on their importation.

93. During the first five years after the imposition of uniform duties of customs, and thereafter until the Parliament otherwise provides—

- (i) The duties of customs chargeable on goods imported into a State and afterwards passing into another State for consumption, and the duties of excise paid on goods produced or manufactured in a State and afterwards passing into another State for consumption, shall be taken to have been collected not in the former but in the latter State:
- (ii) Subject to the last sub-section, the Commonwealth shall credit revenue, debit expenditure, and pay balances to the several States as prescribed for the period preceding the imposition of uniform duties of customs.

94. After five years from the imposition of uniform duties of customs, the Parliament may provide, on such basis as it deems fair, for the monthly payment to the several States of all surplus revenue of the Commonwealth.

95. Notwithstanding anything in this Constitution, the Parliament of the State of Western Australia, if that State be an Original State, may, during the first five years after the imposition of uniform duties of customs, impose duties of customs on goods passing into that State and not originally imported from beyond the limits of the Commonwealth; and such duties shall be collected by the Commonwealth.

But any duty so imposed on any goods shall not exceed during the first of such years the duty chargeable on the goods under the law of Western Australia in force at the imposition of uniform duties, and shall not exceed during the second, third, fourth, and fifth of such years respectively, four-fifths, three-fifths, two-fifths, and one-fifth of such latter duty, and all duties imposed under this section shall cease at the expiration of the fifth year after the imposition of uniform duties.

If at any time during the five years the duty on any goods under this section is higher than the duty imposed by the Commonwealth on the importation of the like goods, then such higher duty shall be collected on the goods when imported into Western Australia from beyond the limits of the Commonwealth.

96. During a period of ten years after the establishment of the Commonwealth and thereafter until the Parliament otherwise provides, the Parliament may grant financial assistance to any State on such terms and conditions as the Parliament thinks fit.

97. Until the Parliament otherwise provides, the laws in force in any Colony which has become or becomes a State with respect to the receipt of revenue and the expenditure of money on account of the Government of the Colony, and the review and audit of such receipt and expenditure, shall apply to the receipt of revenue and the expenditure of money on account of the Commonwealth in the State in the same manner as if the Commonwealth, or the Government or an officer of the Commonwealth, were mentioned whenever the Colony, or the Government or an officer of the Colony, is mentioned.

98. The power of the Parliament to make laws with respect to trade and commerce extends to navigation and shipping, and to railways the property of any State.

99. The Commonwealth shall not, by any law or regulation of trade, commerce, or revenue, give preference to one State or any part thereof over another State or any part thereof.

100. The Commonwealth shall not, by any law or regulation of trade or commerce, abridge the right of a State or of the residents therein to the reasonable use of the waters of rivers for conservation or irrigation.

101. There shall be an Inter-State Commission, with such powers of adjudication and administration as the Parliament deems necessary for the execution and maintenance, within the Commonwealth, of the provisions of this Constitution relating to trade and commerce, and of all laws made thereunder.

102. The Parliament may by any law with respect to trade or commerce forbid, as to railways, any preference or discrimination by any State, or by any authority constituted under a State, if such preference or discrimination is undue and unreasonable, or unjust to any State; due regard being had to the financial responsibilities incurred by any State in connexion with the construction and maintenance of its railways. But no preference or discrimination shall, within the meaning of this section, be taken to be undue and unreasonable, or unjust to any State, unless so adjudged by the Inter-State Commission.

## 103. The members of the Inter-State Commission—

- (i) Shall be appointed by the Governor-General in Council;
- (ii) Shall hold office for seven years, but may be removed within that time by the Governor-General in Council, on an address from both Houses of the Parliament in the same session praying for such removal on the ground of proved misbehaviour or incapacity;
- (iii) Shall receive such remuneration as the Parliament may fix; but such remuneration shall not be diminished during their continuance in office.

104. Nothing in this Constitution shall render unlawful any rate for the carriage of goods upon a railway, the property of a State, if the rate is deemed by the Inter-State Commission to be necessary for the development of the territory of the State, and if the rate applies equally to goods within the State and to goods passing into the State from other States.

105. The Parliament may take over from the States their public debts [as existing at the establishment of the Commonwealth],\* or a proportion thereof according to the respective numbers of their people as shown by the latest statistics of the Commonwealth, and may convert, renew, or consolidate such debts, or any part thereof; and the States shall indemnify the Commonwealth in respect of the debts taken over, and thereafter the interest payable in respect of the debts shall be deducted and retained from the portions of the surplus revenue of the Commonwealth payable to the several States, or if such surplus is insufficient, or if there is no surplus, then the deficiency or the whole amount shall be paid by the several States.

105A.† (1.) *The Commonwealth may make agreements with the States with respect to the public debts of the States, including—*

- (a) *the taking over of such debts by the Commonwealth;*
- (b) *the management of such debts;*
- (c) *the payment of interest and the provision and management of sinking funds in respect of such debts;*
- (d) *the consolidation, renewal, conversion, and redemption of such debts;*
- (e) *the indemnification of the Commonwealth by the States in respect of debts taken over by the Commonwealth; and*
- (f) *the borrowing of money by the States or by the Commonwealth, or by the Commonwealth for the States.*

(2.) *The Parliament may make laws for validating any such agreement made before the commencement of this section.*

(3.) *The Parliament may make laws for the carrying out by the parties thereto of any such agreement.*

(4.) *Any such agreement may be varied or rescinded by the parties thereto.*

(5.) *Every such agreement and any such variation thereof shall be binding upon the Commonwealth and the States parties thereto notwithstanding anything contained in this Constitution or the Constitution of the several States or in any law of the Parliament of the Commonwealth or of any State.*

(6.) *The powers conferred by this section shall not be construed as being limited in any way to the provisions of section one hundred and five of this Constitution.*

## CHAPTER V.—THE STATES.

106. The Constitution of each State of the Commonwealth shall, subject to this Constitution, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be, until altered in accordance with the Constitution of the State.

107. Every power of the Parliament of a Colony which has become or becomes a State, shall, unless it is by this Constitution exclusively vested in the Parliament of the Commonwealth or withdrawn from the Parliament of the State, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State as the case may be.

\* Under Section 2 of the *Constitution Alteration (State Debts) 1909*, the words in square brackets were omitted.

† Under Section 2 of the *Constitution Alteration (State Debts) 1928*, the Constitution was amended by the insertion of this section.

108. Every law in force in a Colony which has become or becomes a State, and relating to any matter within the powers of the Parliament of the Commonwealth, shall, subject to this Constitution, continue in force in the State: and, until provision is made in that behalf by the Parliament of the Commonwealth, the Parliament of the State shall have such powers of alteration and of repeal in respect of any such law as the Parliament of the Colony had until the Colony became a State.

109. When a law of a State is inconsistent with a law of the Commonwealth, the latter shall prevail, and the former shall, to the extent of the inconsistency, be invalid.

110. The provisions of this Constitution relating to the Governor of a State extend and apply to the Governor for the time being of the State, or other chief executive officer or administrator of the government of the State.

111. The Parliament of a State may surrender any part of the State to the Commonwealth; and upon such surrender, and the acceptance thereof by the Commonwealth, such part of the State shall become subject to the exclusive jurisdiction of the Commonwealth.

112. After uniform duties of customs have been imposed, a State may levy on imports or exports, or on goods passing into or out of the State, such charges as may be necessary for executing the inspection laws of the State; but the net produce of all charges so levied shall be for the use of the Commonwealth; and any such inspection laws may be annulled by the Parliament of the Commonwealth.

113. All fermented, distilled, or other intoxicating liquids passing into any State or remaining therein for use, consumption, sale, or storage, shall be subject to the laws of the State as if such liquids had been produced in the State.

114. A State shall not, without the consent of the Parliament of the Commonwealth, raise or maintain any naval or military force, or impose any tax on property of any kind belonging to the Commonwealth, nor shall the Commonwealth impose any tax on property of any kind belonging to a State.

115. A State shall not coin money, nor make anything but gold and silver coin a legal tender in payment of debts.

116. The Commonwealth shall not make any law for establishing any religion, or for imposing any religious observance, or for prohibiting the free exercise of any religion, and no religious test shall be required as a qualification for any office or public trust under the Commonwealth.

117. A subject of the Queen, resident in any State, shall not be subject in any other State to any disability or discrimination which would not be equally applicable to him if he were a subject of the Queen resident in such other State.

118. Full faith and credit shall be given, throughout the Commonwealth, to the laws, the public Acts and records, and the judicial proceedings of every State.

119. The Commonwealth shall protect every State against invasion and, on the application of the Executive Government of the State, against domestic violence.

120. Every State shall make provision for the detention in its prisons of persons accused or convicted of offences against the laws of the Commonwealth, and for the punishment of persons convicted of such offences, and the Parliament of the Commonwealth may make laws to give effect to this provision.

---

#### CHAPTER VI.—NEW STATES.

121. The Parliament may admit to the Commonwealth or establish new States, and may upon such admission or establishment make or impose such terms and conditions, including the extent of representation in either House of the Parliament, as it thinks fit.

122. The Parliament may make laws for the government of any territory surrendered by any State to and accepted by the Commonwealth, or of any territory placed by the Queen under the authority of and accepted by the Commonwealth, or otherwise acquired by the Commonwealth, and may allow the representation of such territory in either House of the Parliament to the extent and on the terms which it thinks fit.

123. The Parliament of the Commonwealth may, with the consent of the Parliament of a State, and the approval of the majority of the electors of the State voting upon the question, increase, diminish, or otherwise alter the limits of the State, upon such terms and conditions as may be agreed on, and may, with the like consent, make provision respecting the effect and operation of any increase or diminution or alteration of territory in relation to any State affected.

124. A new State may be formed by separation of territory from a State, but only with the consent of the Parliament thereof, and a new State may be formed by the union of two or more States or parts of States, but only with the consent of the Parliaments of the States affected.

---

#### CHAPTER VII.—MISCELLANEOUS.

125. The seat of Government of the Commonwealth shall be determined by the Parliament, and shall be within territory which shall have been granted to or acquired by the Commonwealth, and shall be vested in and belong to the Commonwealth, and shall be in the State of New South Wales, and be distant not less than one hundred miles from Sydney.

Such territory shall contain an area of not less than one hundred square miles, and such portion thereof as shall consist of Crown lands shall be granted to the Commonwealth without any payment therefor.

The Parliament shall sit at Melbourne until it meet at the Seat of Government.

126. The Queen may authorize the Governor-General to appoint any person, or any persons jointly or severally, to be his deputy or deputies within any part of the Commonwealth, and in that capacity to exercise during the pleasure of the Governor-General such powers and functions of the Governor-General as he thinks fit to assign to such deputy or deputies, subject to any limitations expressed or directions given by the Queen; but the appointment of such deputy or deputies shall not affect the exercise by the Governor-General himself of any power or function.

127. In reckoning the numbers of the people of the Commonwealth, or of a State or other part of the Commonwealth, aboriginal natives shall not be counted.

---

#### CHAPTER VIII.—ALTERATION OF THE CONSTITUTION.

128. This Constitution shall not be altered except in the following manner:—

The proposed law for the alteration thereof must be passed by an absolute majority of each House of the Parliament, and not less than two nor more than six months after its passage through both Houses the proposed law shall be submitted in each State to the electors qualified to vote for the election of members of the House of Representatives.

But if either House passes any such proposed law by an absolute majority, and the other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, and if after an interval of three months the first-mentioned House in the same or the next session again passes the proposed law by an absolute majority with or without any amendment which has been made or agreed to by the other House, and such other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, the Governor-General may submit the proposed law as last proposed by the first-mentioned House, and either with or without any amendments subsequently agreed to by both Houses, to the electors in each State qualified to vote for the election of the House of Representatives.

When a proposed law is submitted to the electors the vote shall be taken in such manner as the Parliament prescribes. But until the qualification of electors of members of the House of Representatives becomes uniform throughout the Commonwealth, only one-half the electors voting for and against the proposed law shall be counted in any State in which adult suffrage prevails.

And if in a majority of the States a majority of the electors voting approve the proposed law, and if a majority of all the electors voting also approve the proposed law, it shall be presented to the Governor-General for the Queen's assent.

No alteration diminishing the proportionate representation of any State in either House of the Parliament, or the minimum number of representatives of a State in the House of Representatives, or increasing, diminishing, or otherwise altering the limits of the State, or in any manner affecting the provisions of the Constitution in relation thereto, shall become law unless the majority of the electors voting in that State approve the proposed law.

## SCHEDULE.

## OATH.

I, *A.B.*, do swear that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors according to law. SO HELP ME GOD!

## AFFIRMATION.

I, *A.B.*, do solemnly and sincerely affirm and declare that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors according to law.

(NOTE.—*The name of the King or Queen of the United Kingdom of Great Britain and Ireland for the time being is to be substituted from time to time.*)

2. **The Royal Proclamation.**—The preceding Act received the Royal assent on 9th July, 1900. This made it lawful to declare that the people of Australia should be united in a Federal Commonwealth. This proclamation, made on 17th September, 1900, constituted the Commonwealth as from 1st January, 1901; it read as follows.

## BY THE QUEEN.

## A PROCLAMATION.

(Signed) VICTORIA R.

WHEREAS by an Act of Parliament passed in the Sixty-third and Sixty-fourth Years of Our Reign, intituled "An Act to constitute the Commonwealth of *Australia*," it is enacted that it shall be lawful for the Queen, with the advice of the Privy Council, to declare by Proclamation, that, on and after a day therein appointed, not being later than One year after the passing of this Act, the people of *New South Wales, Victoria, South Australia, Queensland, and Tasmania*, and also, if Her Majesty is satisfied that the people of *Western Australia* have agreed thereto, of *Western Australia*, shall be united in a Federal Commonwealth under the name of the Commonwealth of *Australia*.

And whereas We are satisfied that the people of *Western Australia* have agreed thereto accordingly.

We therefore, by and with the advice of Our Privy Council, have thought fit to issue this Our Royal Proclamation, and We do hereby declare that on and after the First day of *January* One thousand nine hundred and one, the people of *New South Wales, Victoria, South Australia, Queensland, Tasmania, and Western Australia* shall be united in a Federal Commonwealth under the name of the Commonwealth of *Australia*.

Given at Our Court at *Balmoral* this Seventeenth day of *September*, in the Year of Our Lord One thousand nine hundred, and in the Sixty-fourth Year of Our Reign.

GOD SAVE THE QUEEN.

## § 6. The External Territories of Australia

1. **Transfer of Norfolk Island.**—In 1856, Norfolk Island was created a distinct and separate settlement under the jurisdiction of New South Wales. Later, in 1896, it was made a dependency under the Governor of that colony, and finally by the passage of the *Norfolk Island Act* 1913 it was accepted as a Territory of the Commonwealth of Australia. The island is situated in latitude 29° 3' 3" S., longitude 167° 57' 5" E., and comprises an area of 8,528 acres.

2. **Transfer of British New Guinea or Papua.**—Under the administration of the Commonwealth, but not included in it, is British New Guinea or Papua, finally annexed by the British Government in 1884. This Territory was for a number of years administered by the Queensland Government, but was transferred to the Commonwealth by proclamation on 1st September, 1906, under the authority of the *Papua Act (Commonwealth)* of 16th November, 1905. The area of Papua is about 90,540 square miles.

3. **Territory of New Guinea.**—In 1919, it was agreed by the Principal Allied and Associated Powers that a mandate should be conferred on Australia for the government of the former German territories and islands situated in latitude between the Equator

and 8° S., and in longitude between 141° E. and 159° 25' E. The mandate was issued by the League of Nations on 17th December, 1920. The Governor-General of the Commonwealth was authorized to accept the mandate by the *New Guinea Act* 1920, which also declared the area to be a Territory under the authority of the Commonwealth by the name of the Territory of New Guinea. The Territory comprises about 93,000 square miles, and the administration under the mandate dated from 9th May, 1921. New Guinea is now administered under a Trusteeship Agreement with the United Nations, approved on 13th December, 1946.

4. **Nauru.**—In 1919, the Governments of the United Kingdom, Australia and New Zealand entered into an agreement to make provision for the exercise of the mandate conferred on the British Empire for the administration of the island of Nauru, and for the mining of the phosphate deposits thereon. The island is situated in latitude 0° 32' S., and longitude 166° 55' E. and comprises about 5,263 acres. The agreement provided that the administration of the island should be vested in an administrator, the first appointment to be made by the Commonwealth Government, and thereafter in such manner as the three Governments decided. The agreement was approved by the Commonwealth Parliament in the *Nauru Island Agreement Act* 1919, and a supplementary agreement of 30th May, 1923, which gave the Government immediately responsible for the administration greater powers of control over the Administrator, was approved in 1932. So far, the administrators have been appointed by the Commonwealth Government. The administration under the mandate operated from 17th December, 1920, to 1st November, 1947, since when Nauru has been administered under a Trusteeship Agreement with the United Nations.

5. **Australian Antarctic Territory.**—An Imperial Order in Council of 7th February, 1933, placed under Australian authority "all the islands and territories other than Adelie Land which are situated south of the 60th degree of South Latitude and lying between the 160th degree of East Longitude and the 45th degree of East Longitude."

The Order came into force with a proclamation issued by the Governor-General on 24th August, 1936, after the Commonwealth Parliament had passed the *Australian Antarctic Territory Acceptance Act* on 13th June, 1933. The boundaries of Adelie Land were definitely fixed by a decree of 1st April, 1938, as latitude 60° S., longitude 136° E. and longitude 142° E.

6. **Territory of Heard and McDonald Islands.**—Heard and McDonald Islands, about 2,500 miles south-west of Fremantle, were transferred from United Kingdom to Australian control as from 26th December, 1947.

7. **Territory of Cocos (Keeling) Islands.**—*The Cocos (Keeling) Islands Act* 1955 provided for the acceptance of the Cocos Islands, in the Indian Ocean, as a Territory under the authority of the Commonwealth of Australia and was parallel to an Act of the United Kingdom Parliament transferring authority over the islands to the Commonwealth. Consequent on the passing of these Acts, Her Majesty, by Order in Council, specified 23rd November, 1955, as the date of transfer. From that date, the islands came under Australian administration and an Official Representative of Australia was appointed to take charge of the local administration of the islands.

8. **Territory of Christmas Island.**—*The Christmas Island Act* 1958 provided for the acceptance of Christmas Island, in the Indian Ocean, as a Territory under the authority of the Commonwealth of Australia. Complementary legislation having been passed by the Parliament of the United Kingdom, the island was transferred to the Australian administration on 1st October, 1958, and an Official Representative was appointed to administer the Territory.

## CHAPTER II

### PHYSIOGRAPHY

#### § 1. General Description of Australia

1. *Geographical Position.*—(i) *General.* The Australian Commonwealth, which includes the island continent of Australia proper and the island of Tasmania, is situated in the Southern Hemisphere, and comprises an area of 2,971,081 square miles, the mainland alone containing 2,944,866 square miles. Bounded on the west and east by the Indian and Pacific Oceans respectively, it lies between longitudes 113° 9' E. and 153° 39' E., while its northern and southern limits are the parallels of latitude 10° 41' S. and 43° 39' S., or, excluding Tasmania, 39° 8' S. On its north are the Timor and Arafura Seas and Torres Strait, on its south the Southern Ocean. The extreme points are Steep Point on the west, Cape Byron on the east, Cape York on the north, and South-East Cape or, if Tasmania be excluded, Wilson's Promontory, on the south.

(ii) *Tropical and Temperate Regions.* Of the total area of Australia, nearly 39 per cent. lies within the tropics. Taking the latitude of the Tropic of Capricorn as 23° 30' S., the areas within the tropical and temperate zones are approximately as follows.

#### AUSTRALIA: AREAS OF TROPICAL AND TEMPERATE REGIONS

(Square miles)

Area	N.S.W. (a)	Vic.	Qld.	S. Aust.	W. Aust.	Tas.	N. Terr.	Total
Within tropical zone . .	310,372	87,884	360,642	380,070	364,000	26,215	426,320	1,150,962
„ temperate zone			306,358		611,920		97,300	1,820,119
Total area . .	310,372	87,884	667,000	380,070	975,920	26,215	523,620	2,971,081

(a) Includes Australian Capital Territory (939 square miles).

Fifty-four per cent. of Queensland lies within the tropical zone and 46 per cent. in the temperate zone; 37 per cent. of Western Australia is tropical and 63 per cent. temperate; while 81 per cent. of the Northern Territory is tropical and 19 per cent. temperate. All of the remaining States lie within the temperate zone. The tropical part of Australia thus comprises about 39 per cent. of the whole of the continent.

2. *Area of Australia compared with Areas of other Countries.*—The area of Australia is almost as great as that of the United States of America excluding Alaska, four-fifths of that of Canada, more than half as large again as Europe excluding the U.S.S.R., and about 25 times that of Great Britain and Ireland. The areas of Australia and of certain other countries are shown in the table on the following page.

## AREA OF AUSTRALIA AND OF OTHER COUNTRIES, circa 1960

('000 square miles)

(a) Excludes U.S.S.R., shown below. (b) Excludes Syria, included in Other Asia.  
(c) Excludes State of Hawaii, which is included in Other Oceania. (d) Australian Trust Territory.  
Western New Guinea is included in Other Asia.

The areas shown in the table are obtained from the *Demographic Yearbook*, 1961, published by the Statistical Office of the United Nations, and the countries have been arranged in accordance with the continental groups used therein.

3. Areas of States and Territories, Coastal Configuration and Standard Times.—As already stated, Australia consists of six States and the Northern Territory and Australian Capital Territory. Particulars of areas, coastline and standard times are shown in the following table.

**AUSTRALIA: AREAS OF STATES AND TERRITORIES, COASTLINE AND STANDARD TIMES**

State or Territory	Area	Percentage of total area	Coastline	Area per mile of coastline	Standard times	
					Meridian selected	Ahead of G.M.T.
	Sq. miles		Miles	Sq. miles		Hours
New South Wales ..	309,433	10.42	(a) 700	(a) 443	150° E.	10
Victoria ..	87,884	2.96	680	129	150° E.	10

<b>Australia</b> ..	<b>2,971,081</b>	<b>100.00</b>	<b>12,210</b>	<b>243</b>	..	..

(a) Includes Australian Capital Territory.

There are few striking features in the configuration of the coast; the most remarkable indentations are the Gulf of Carpentaria on the north and the Great Australian Bight on the south. The Cape York Peninsula on the extreme north is the only other remarkable feature in the outline. In Official Year Book No. 1, an enumeration was given of the features of the coastline of Australia.

Prior to 1895, the official time adopted in the several colonies was for most purposes the mean solar time of the capital city of each. In 1894 and 1895, after several conferences had been held, legislation was enacted by each of the colonies whereby the mean solar times of the meridians of east longitude 120° (Western Australia), 135° (South Australia and Northern Territory) and 150° (Queensland, New South Wales, Victoria and Tasmania) were adopted. In 1898, however, the South Australian legislature amended its earlier provision and adopted the mean solar time of the meridian 142° 30' E. longitude as the standard time for that colony (and the Northern Territory). For further information on this subject, see Official Year Book No. 39, page 65.

4. Geographical Features of Australia.—(i) *General*. The following description is only a broad summary of the main physical characteristics of the Australian continent. For greater detail concerning particular geographical elements, earlier issues of the Official Year Book should be consulted. The list of special articles, etc., at the end of this volume indicates the nature of the information available and its position in the various issues.

(ii) *Orography of Australia*. (a) *General Description of the Surface*. Owing to the absence of any very high mountain chains and to the great depression in the centre of Australia, the average elevation of the Australian continent above the level of the surrounding oceans is less than that of any of the other continents. Three-quarters of the land-mass lies between the 600 and 1,500 feet contours in the form of a huge plateau.

A section through the continent from east to west, at the point of its greatest breadth, shows first a narrow belt of coastal plain. This plain, extending north and south along the whole eastern coast, is well watered by rivers. It is of variable width, seldom more than sixty or seventy miles, and occasionally only a few miles, the average being roughly about forty to fifty miles. Bordering this plain is the Great Dividing Range, which extends from the north of Queensland to the south of New South Wales and thence sweeps westward through Victoria. This range, which rises, often abruptly, from the plain, frequently presents bold escarpments on its eastern face, but the descent on its western slopes is gradual, until, in the country to the north of Spencer's Gulf, the plain is not above sea-level and occasionally even below it. Thence there is another almost imperceptible rise until the mountain ranges of Western Australia are reached, and beyond these lies another coastal plain.

The great central plain or plateau is the most distinctive feature of the Australian continent and the peculiarities of Australia's climate can probably be largely ascribed thereto.

(b) *Mountain Systems.* The main mountain feature of Australia is the Great Dividing Range, which runs along the whole eastern coast of the continent and can be traced over the islands of Torres Strait to New Guinea, while in the south one branch sweeps westwards towards the boundary of Victoria and South Australia, and the other, the main branch, terminates in Tasmania.

This mountain system is at no place more than 250 miles from the eastern coastline, and it approaches to less than 30 miles. On the whole, it is much closer to the coast in both New South Wales and Victoria than it is in Queensland, the corresponding average distances being about 70, 65 and 130 miles respectively. There is no connexion between the mountains of the eastern and other States of Australia.

The mountains of Australia are relatively low. Thus, in Queensland, the Great Dividing Range reaches a height above sea-level of less than 5,500 feet, the highest peak being Mount Bartle Frere. Mount Kosciusko, in New South Wales, is only about 7,300 feet, and Mount Bogong, in Victoria, about 6,500 feet high. In South Australia and Western Australia, heights of three to five thousand feet are attained. In Tasmania, the greatest height is only a little more than 5,000 feet. The fact that there are no high mountains in Australia is also of considerable importance in considering the climate of Australia.

It is probable that at one time Tasmania was connected with the mainland. As the Great Dividing Range can, in the north, be traced from Cape York across Torres Strait to New Guinea, so its main axis can be followed across the shallow waters of Bass Strait and its islands from Wilson's Promontory to Tasmania, which may be said to be completely occupied by ramifications of the chain. The central part of the island is occupied by an elevated plateau, roughly triangular in shape, and presenting bold fronts to the east, west and north. This does not extend in any direction more than about 60 miles. The plateau rests upon a more extensive tableland, the contour of which closely follows the coastline, and occasionally broadens out into low-lying tracts not much above sea-level. The extreme south of the island is rugged in character.

(iii) *Hydrology of Australia.* (a) *Rainfall.* On the whole, Australia is a country with a limited rainfall. This is immediately evident on studying its river systems, its lakes, and its artesian areas. Its one large river system is that of the Murray and Darling Rivers, of which the former stream is the larger and more important. Many of the rivers of the interior run only after heavy rains. Depending almost entirely on rainfall, a consequence of the absence of high mountains, they drain large areas with widely varying relation between rainfall and flow. Thus it has been estimated that not more than 10 per cent. of the rainfall on the catchment area of the Darling River above Bourke (New South Wales) discharges itself past that town. The rate of fall is often very slight.

(b) *Rivers.* The rivers of Australia may be divided into two major classes, those of the coastal plains with moderate rates of fall and those of the central plains with very slight fall. Of the former, not many are navigable for any distance from their mouths, and bars make many of them difficult of access or inaccessible from the sea.

The two longest rivers of the northern part of the eastern coast are the Burdekin, discharging into Upstart Bay, with a catchment area of 53,500 square miles, and the Fitzroy, which reaches the sea at Keppel Bay and drains about 55,600 square miles.

The Hunter is the largest coastal river of New South Wales, draining about 11,000 square miles before it reaches the sea at Newcastle. The Murray River, with its great tributary the Darling, drains a considerable part of Queensland, the major part of New South Wales and a large part of Victoria. It debouches into the arm of the sea known as Lake Alexandrina, on the eastern side of the South Australian coast. The total length of the Murray is about 1,600 miles, 400 being in South Australia and 1,200 constituting

the boundary between New South Wales and Victoria. The total length of the Murray-Darling from the source of the Darling to the mouth of the Murray is about 2,300 miles. In good seasons, the river is navigable for a considerable proportion of its length.

The rivers of the north-west coast of Australia (Western Australia) are of considerable size, e.g. the Murchison, Gascoyne, Ashburton, Fortesque, De Grey, Fitzroy, Drysdale and Ord. So also are those in the Northern Territory, e.g., the Victoria and Daly. The former of these, estimated to drain 90,000 square miles, is said to be navigable for 50 miles.

The rivers on the Queensland side of the Gulf of Carpentaria, such as the Gregory, Leichhardt, Cloncurry, Gilbert and Mitchell, are also of considerable size.

Owing to the small amount of fall of many of the interior rivers, they may flood hundreds of miles of country in wet seasons, while in dry seasons they form a mere succession of waterholes or are entirely dry. It is this fact that explains the apparently conflicting reports of the early explorers, one regarding the interior as an inland sea, and another as a desert.

The rivers of Tasmania have short and rapid courses, as might be expected from the configuration of the country.

(c) *Lakes.* The "lakes" of Australia may be divided into three classes—true permanent lakes; lakes which, being very shallow, become mere morasses in dry seasons or even dry up and finally present a cracked surface of salt and dry mud; and lakes which are really inlets of the ocean, opening out into a lake-like expanse.

The second class is the only one which seems to demand special mention. These are a characteristic of the great central plain of Australia. Some of them, such as Lakes Torrens, Gairdner, Eyre and Frome, are of considerable extent.

(d) *Artesian Areas.* A considerable tract of the plain country of New South Wales and Queensland carries a water-bearing stratum, usually at a great depth. A large number of artesian bores have been put down, from which there is a considerable flow. These are of great value and render usable large areas which otherwise would be difficult to occupy even for pastoral purposes.

For further information on this subject, see Chapter VIII. Water Conservation and Irrigation.

## § 2. Climate and Meteorology of Australia

NOTE.—This Section has been prepared by the Director of the Commonwealth Bureau of Meteorology, and the various States and Territories have been arranged in the standard order adopted by that Bureau.

1. *Introductory.*—Previous issues of the Official Year Book, notably No. 3, pages 79–83, and No. 4, pages 84 and 87, contained outlines of the history of Australian meteorology and the creation and organization of the Commonwealth Bureau of Meteorology. Official Year Book No. 38, pages 30–32, contained paragraphs devoted to (a) Organization of the Meteorological Service; (b) Meteorological Publications; (c) Equipment; and (d) Meteorological Divisions.

By reason of its insular geographical position and the absence of striking physical features, whether in marine gulfs or in important mountains, Australia is, on the whole, less subject to extremes of weather than are regions of similar area in other parts of the globe, and latitude for latitude Australia is generally more temperate.

The average elevation of the surface of the land is low, probably close to 900 feet above the sea. The altitudes range up to a little more than 7,300 feet; hence the Australian climate displays a great many features, from the characteristically tropical to what is essentially alpine, a fact indicated in some measure by the name Australian Alps given to the southern portion of the Great Dividing Range.

On the coast, more particularly the tropical sections, the rainfall is often abundant and the atmosphere moist, but in some portions of the interior it is very limited and the atmosphere dry. The distribution of forest, therefore, with its climatic influence, is very uneven. In the interior, in places, there are fine belts of trees, but there are also large areas which are treeless, and here the air is hot and parching in summer. Again, on the coast, even so far south as latitude 35°, the vegetation is tropical in its luxuriance, and to some extent also in character.

2. *Temperature*.—(i) *Effective Temperature*. When a meteorologist speaks of temperature, he means the temperature of the air indicated by a thermometer sheltered from precipitation, from direct rays of the sun and from radiation of heat from the ground and neighbouring objects, yet freely exposed to the circulation of the air. In other words, he means temperature measured under conditions standardized as nearly as possible in a Stevenson Screen, which is the standard housing for meteorological thermometers.

This shade temperature as measured by a "dry bulb" thermometer shows only the actual temperature experienced by dry inorganic substances, not the *sensible* temperatures felt by organic bodies. In the case of human beings, *sensible* temperature is affected by the rate of conduction of heat to or from the body by moving air and also by the rate of cooling due to evaporation from the skin and respiratory passages. The wind and humidity therefore determine the *sensible* temperature.

The humidity (relative humidity) is determined from the readings of the dry and wet bulb thermometers. However, with increasing interest in human comfort in tropical climates, another term, *effective* temperature, has come into use. It may be defined as "the temperature of a still, saturated atmosphere which would on the average produce the same feeling of warmth or cold as the atmosphere in question".\*

The 80° F. isotherm is confined to a very narrow tract of country extending from the north-west coast of Western Australia through the Northern Rivers section of the Northern Territory to the seaboard area around the Gulf of Carpentaria. The 75° F. isotherm extends, broadly, from Onslow on the north-west coast of Western Australia to Tennant Creek, to Boulia, to the southern part of Cape York Peninsula, thence southward along the Queensland coast to Townsville, following in a general way the coastline of northern Australia but from 100 to 300 miles inland.

From investigations which have established "comfort zones"† bounded by limits of effective temperature within which people will feel comfortable, American research workers have determined the following figures.‡

#### COMFORT ZONES: EFFECTIVE TEMPERATURES

Season			No subjects feel comfortable below—	Fifty per cent. of subjects feel comfortable between—	No subjects feel comfortable above—
Winter..	..	..	60° F.	63° and 71° F.	74° F.
Summer	..	..	64° F.	66° and 75° F.	79° F.

Investigations made in Australia§ in which the atmospheric vapour pressure was used as a measure of comfort, have shown that the limits of comfort range from 0.2 to 0.5 inch of vapour pressure. After drawing isopleths for effective temperature (not corrected for altitude), mean vapour pressure reduced to a logarithmic scale, and mean wet bulb temperature, it is found that there is close agreement in defining zones of relative discomfort.

(ii) *Seasons*. The Australian seasons are:—Summer, December to February; autumn, March to May; winter, June to August; spring, September to November. In most parts of Australia, January is the hottest month, but in Tasmania and southern Victoria, February is the hottest; in the tropical north, probably because the cooling "monsoon" rains occur in late summer, December is the hottest month, and at Darwin, November.

On a rainfall basis, in the tropical north, the year is divisible into "wet" and "dry" seasons, but on the basis of temperatures and physical comfort the "dry" season can be further sub-divided into two parts—"cool dry" and "warm dusty".||

(a) "*Cool dry*" Season. From May to August. The average maximum temperature ranges from 80° to 85° F., the relative humidity is low and in inland areas cold nights are experienced when the temperature drops to 40° F. The skies generally are cloudless, but in about one year in three during June or July one to two inches of rain fall.

\* Houghton, F. C., Teague, W. W. and Miller, W. E. (1926) Amer. Soc. Heat. Vent. Engrs. † Yaglou, C. P. (1926) J. Industr. Hyg. ‡ Yaglou, C. P. (1927) Ibid. § Barkley, H. Zones of Relative Physical Comfort in Australia, Met. Bull. 20, 1934. || Maze, W. H. Austn. Geog. June, 1945. Settlement in E. Kimberleys.

(b) "*Warm dusty*" Season. From the end of August, temperatures rise and reach a maximum in October or the beginning of November. Temperatures of over 120° F. have been recorded.

(c) "*Wet*" Season. After the first of the heavy storms, the maximum temperatures fall but still remain high with high relative humidity. At Wyndham during January, 1944, the minimum temperature did not drop below 75° F. for fourteen consecutive days. A maximum of over 100° F. was recorded on each rainless day.

In central and northern Australia, during the hottest months, the average temperatures range from 80° to 85° F., whereas in southern Australia they vary from 65° to 70° F. (see maps pp. 33, 34).

Throughout Australia, the coldest month is July, when only a very narrow strip of the northern sea-board has an average temperature as high as 75° F. Over the southern half of the continent, July temperatures range from 55° to 45° F. at elevations below 1,500 feet and fall as low as 35° on the Australian Alps (see maps pp. 35, 36). Here the temperature seldom, if ever, reaches 100° F. even in the hottest of seasons. Hotham Heights (6,100 feet above mean sea level) recorded the highest maximum of 82.0° F. on 20th January, 1935. In winter, readings slightly below zero are occasionally recorded on the extreme heights.

Tasmania, as a whole, enjoys a moderate and equable range of temperature throughout the year, although occasionally hot winds may cause the temperature to rise to 100° F. in the eastern part of the State.

(iii) *Comparisons with other Countries.* In respect of Australian temperatures generally, it may be pointed out that the mean annual isotherm for 70° F. extends in South America and South Africa as far south as latitude 33° S., while in Australia it reaches only as far south as latitude 28° S., thus showing that, on the whole, Australia has, latitude for latitude, a more temperate climate than other places in the Southern Hemisphere.

The comparison is even more favourable when the Northern Hemisphere is included, for in the United States of America the 70° F. isotherm extends in several of the western States as far north as latitude 41° N. In Europe, the same isotherm reaches almost to the southern shores of Spain, passing afterwards, however, along the northern shores of Africa till it reaches the Red Sea, when it bends northward along the eastern shore of the Mediterranean till it reaches Syria. In Asia, nearly the whole of the land area south of latitude 40° N. has a mean annual temperature higher than 70° F.

The extreme range of temperature is less than 100° F. over practically the whole of Australia, that figure being only slightly exceeded at a very few places; it is mostly 70° to 90° F. over inland areas, and somewhat less on the coast. In parts of Asia and North America, the extreme range exceeds 130° and 150° F. in some localities.

Along the northern shores of Australia, the temperatures are very equable. At Darwin, for example, the difference in the means for the hottest and coldest month is only 8.5° F., and the extreme readings, or the highest maximum on record and the lowest minimum, show a difference of about 50° F.

The highest temperature recorded in Australia was 127.5° F. at Cloncurry on 16th January, 1889. The world's highest (136° F.) was recorded at Azizia (Tripoli) on 13th August, 1922. The lowest temperature ever recorded in Australia was -8° F. at Charlotte Pass on 14th July, 1945, and again on 22nd August, 1947, as contrasted with the lowest recorded temperature in other temperate zones, where readings of -50° F. and lower have been registered at places in northern Europe, with an extreme of -67° F. at Ust' Shchugor (Russia); while in Siberian Asia, readings have been lower than -60° F. at a number of stations, the lowest being -90° F. at Oimyakon and Verkhoyansk, and in North America -76° F. has been recorded at Tanana (Alaska) and -74° F. at Watson Lake (Canada). In the polar regions, minimum readings of lower than -100° F. have been registered in Antarctica, the lowest being -125.3° F. on 25th August, 1958, and -126.9° F. on 24th August, 1960, both at Vostok.

The mean temperatures and the range from the extreme maximum to the extreme minimum temperatures (in whole degrees) of the capital cities of Australia, and a comparison with those of the main cities of some other countries are presented in tabular form in Official Year Book No. 38, page 42.

(iv) *Hottest and Coldest Parts.* A comparison of the temperatures recorded at coast and inland stations shows that in Australia, as in other continents, the range increases, within certain limits, with increasing distance from the coast.

In the interior of Australia, and during exceptionally dry summers, the temperature occasionally reaches or exceeds 120° F. in the shade. The hottest area of the continent is situated in the northern part of Western Australia about the Marble Bar and Nullagine goldfields, where the maximum shade temperature during the summer sometimes exceeds 100° F. continuously for days and weeks. The longest recorded period was 160 days from 31st October, 1923, to 7th April, 1924.

The area affected and the period of duration of the longest heat waves in Australia are shown in the map and diagram on page 37.

(v) *Tabulated Data for Selected Climatological Stations in Australia.* Tables showing normal mean temperature, extreme temperatures and normal rainfall for each month for selected climatological stations in each State and the Northern Territory appear in Official Year Book No. 40, pages 16–23, and similar data for other selected stations in the Commonwealth in Official Year Book No. 39, pages 41–48. Pages 53–60 of this issue contain this information in respect of Canberra, Darwin and the six State capitals.

(vi) *Frosts.\** The Observer's Handbook of the Meteorological Office, London, gives the following definition:—"Injury to the tissues of growing plants is not caused until the temperature has fallen considerably below the freezing point of water (32° F.) and a 'ground frost' is regarded as having occurred when the thermometer on the grass has fallen to 30.4° F. or below".

In Australia, this definition is adopted for stations equipped with terrestrial minimum thermometers. However, these are few in number, so although many rainfall observers record "hoar frost" when seen, for statistical purposes a screen temperature of 36° F. is taken as indicating light frosts at ground level. For heavy frosts, a screen temperature of 32° F. is taken.

In America, a "killing" frost is defined as a frost "that is generally destructive of vegetation". A "black frost" is the phenomenon arising out of a combination of low temperature and low humidity causing rupturing of plant cells by expansion when freezing of the water which they contain takes place, though frost crystals are not formed on the ground.

The parts of Australia most subject to low temperature are the eastern highlands from about Omeo in Victoria northward to Cambooya and Bybera in Queensland. Most stations in this region experience more than ten nights a month with readings of 32° F. or under for three to five months of the year. In Tasmania, districts on the Central Plateau are subject to such conditions for three to six months of the year. Minimum temperatures of 32° F. are comparatively infrequent in Western Australia except in parts of the south and south-west. In South Australia, the Yongala district is much more subject to such temperatures than other parts of the State. Much of the south-east of Queensland has a higher frequency of such readings than South Australia. Generally speaking, the frequency is controlled by altitude, latitude and, to a lesser degree, by proximity to the sea.

Frosts may occur within a few miles of the coastline over the whole continent, except in the Northern Territory and a considerable part of northern Queensland. Regions subject to frost in all months of the year comprise portions of the tablelands of New South Wales, the Eastern Highlands and parts of the Central Divide and Western district in Victoria, practically the whole of Tasmania, and a small area in the south-west of Western Australia.

A map showing the average annual number of frost-free days (i.e. days on which the temperature does not fall below 36° F.) appears on page 39.

Over most of the interior of the continent, and on the highlands in Queensland as far north as the Atherton Plateau, frosts appear in April and end in September, but they are infrequent in these months. Minimum temperatures of 32° F. are experienced in most of the sub-tropical interior in June and July.

**3. Humidity.**—After temperature, humidity is the most important element of climate as regards its effects on human comfort, rainfall supply and conservation and related problems.

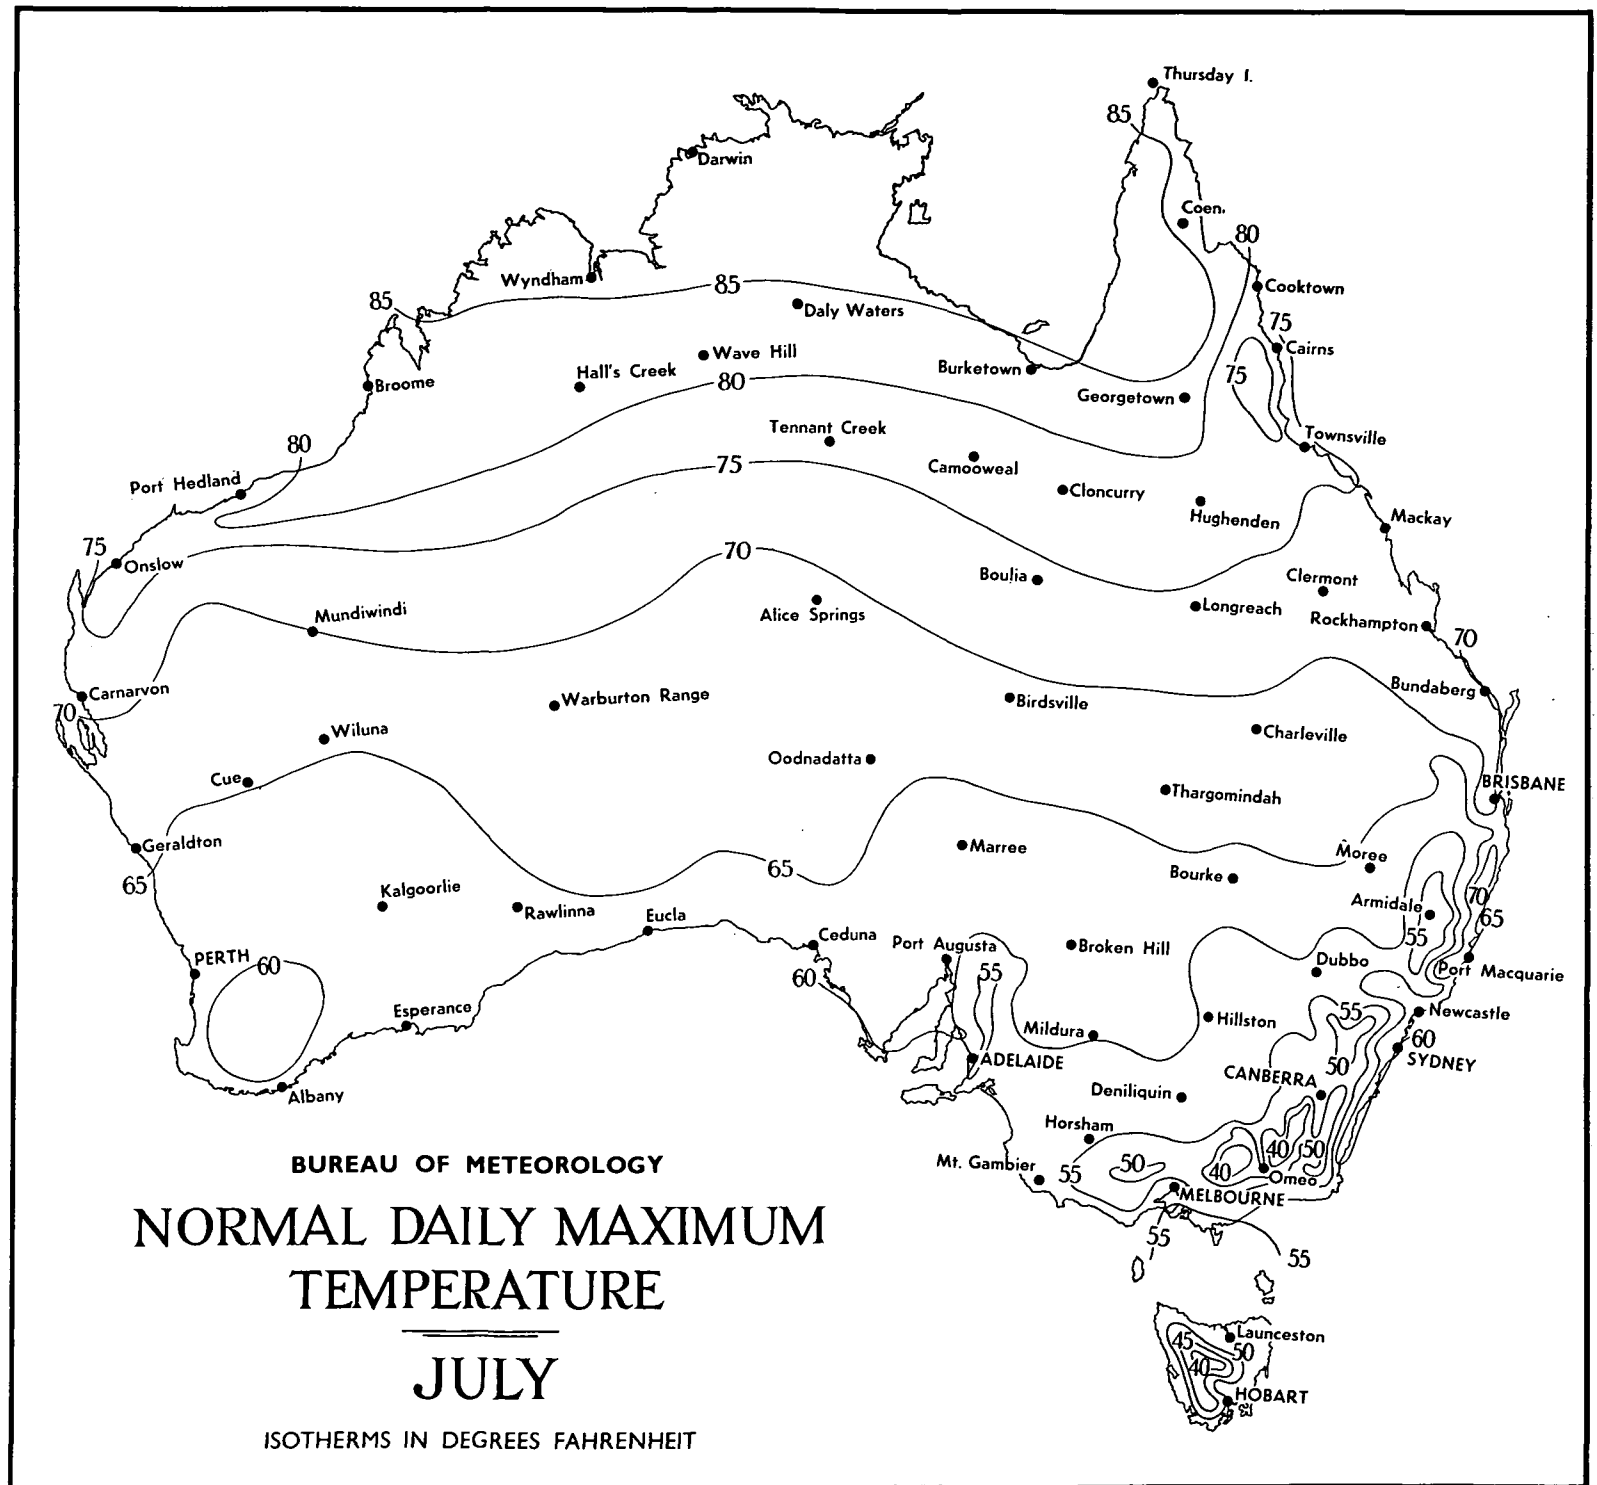

"Vapour pressure" is the pressure exerted by the water vapour in the atmosphere. At any given temperature there is a definite upper limit to the amount of water that can exist as vapour in the atmosphere. When this limit is reached, the air is said to be saturated and the pressure of the water vapour is equal to the "saturation vapour pressure".

In this publication, the humidity of the air has been expressed by the relative humidity, which is the quotient of the vapour pressure divided by the saturation vapour pressure and multiplied by one hundred. The mean 9 a.m. relative humidity, as well as its highest and lowest recorded mean values at 9 a.m., are shown in the tables of climatological data for the capital cities (*see para. 14*). The mean monthly vapour pressure has also been added to these tables.

The annual curve of vapour pressure derived from the normal monthly values for this element is comparable with the maximum and minimum temperature curves, but the relative humidities, consisting as they do of the extremes for each month, do not show the normal annual fluctuation which would be approximately midway between the extremes.

The order of stations in descending values of 9 a.m. vapour pressure is Darwin, Brisbane, Sydney, Perth, Melbourne, Adelaide, Canberra, Hobart and Alice Springs, while the relative humidity at 9 a.m. diminishes in the order, Melbourne, Hobart, Sydney, Darwin, Brisbane, Canberra, Perth, Adelaide and Alice Springs.

Further references to humidity will be found in the section on effective temperature (see p. 29).

4. *Evaporation.*—(i) *General.* The rate and quantity of evaporation in any territory are influenced by the prevailing temperature, and by atmospheric humidity, pressure and wind movement. In Australia, the question is of great importance, since in its drier regions water has often to be conserved in tanks and dams. The magnitude of the economic loss by evaporation will be appreciated from the map reproduced herein (see p. 40), which shows that the yearly amount varies from about 20 inches over western Tasmania to more than 100 inches over the central and north-western parts of Australia. Over an area of 70 per cent. of the continent, comprising most inland districts and extending to the coast in the North-West and the Eucla divisions of Western Australia, the rainfall does not exceed the evaporation during any month of the year. The central and north-western portions of the continent, comprising 46 per cent. of the total land mass, experience evaporation far in excess of their rainfall; it is noteworthy that the vegetation over most of this region is characterized by acacia, semi-desert, shrub steppe and porcupine grass. Since the loss by evaporation depends largely on the exposed area, tanks and dams so designed that the surface shall be a minimum are advantageous. Further, the more they are protected from the direct rays of the sun and from winds by means of suitable tree planting, the less will be the loss by evaporation. The Mansfield process for treatment of tanks, dams and ponds by hexadecanol film, materially reducing effective evaporation, is a comparatively recent development which is having beneficial results. These matters are naturally of more than ordinary concern in the drier districts of Australia.

(ii) *Comments on Map of Average Annual Evaporation.* The map of average annual evaporation in Australia (see p. 40) has been compiled on the basis of records obtained from a number of evaporimeters supplemented by estimates derived from records of saturation deficit by applying the Waite Institute factor of 263.\* Some modification of the latter values was found to be necessary in comparison with recordings of evaporimeters.

The standard evaporation tank used in Australia is cylindrical in form and is 36 inches in diameter and 36 inches deep. It is surrounded by a 6-inch water jacket and the whole is sunk into the ground so that the water surface is approximately at ground level.

Saturation deficit is obtained from readings of dry and wet bulb thermometers exposed in a standard Stevenson thermometer shelter. Saturation deficit is the difference between the vapour pressure indicated by the dry and wet bulb readings and the saturation vapour pressure corresponding to the dry bulb temperature.

The Waite formula,  $e=263$  s.d., is not an exact relationship, but it takes account of one of the major factors in evaporation, namely, the difference between saturation vapour pressures at the mean dew point and at the mean air temperature. Errors in the formula are found to be fairly consistent in considerable areas of Australia and corrections have been applied accordingly. Only short-term evaporation records are available north of latitude 20°, and corrections have been extrapolated for these areas. The evaporation stations on which estimates for the tropics have been based are Alice Springs (Northern Territory) and Winton (Queensland), and to a lesser degree Blackall (Queensland) and Marble Bar (Western Australia).

The map thus presents an estimate of evaporation for which allowance should be made for a certain margin of error (perhaps 10 per cent. or so) on the conservative side. In the absence of definite information, such a map should serve a useful purpose as a basis for many climatic studies.

For graphs and tables of mean monthly evaporation and rainfall at certain selected stations, see Official Year Book No. 37, pages 34–35.

5. *Rainfall.*—(i) *General.* The rainfall of any region is determined mainly by the direction and route of the prevailing winds, by the varying temperatures of the earth's surface over which they blow, and by its physiographical features.

\* Prescott J. A. "Atmospheric Saturation Deficit in Australia" (Trans. Royal Society, S. A. Vol. LV., 1931).

Australia lies within the zones of the south-east trades and "prevailing" westerly winds. The southern limit of the south-east trades strikes the eastern shores at about 30° south latitude, and the heaviest rains of the Australian continent, with very few exceptions, are precipitated along the Pacific slopes to the north of that latitude, the varying quantities being more or less regulated by the differences in elevation of the shores and of the chain of mountains from the New South Wales northern border to Thursday Island, upon which the rain-laden winds blow. The converse effect is exemplified on the north-west coast of Western Australia, where the prevailing winds, blowing from the interior of the continent instead of from the ocean, result in the lightest coastal rain in Australia.

The westerly winds, which skirt the southern shores, are responsible for the reliable generally light to moderate rains enjoyed by the south-western portion of Western Australia, the agricultural areas of South Australia, a great part of Victoria, and the whole of Tasmania.

(ii) *Distribution of Rainfall.* The average annual rainfall map of Australia (see p. 41) shows that the heaviest yearly falls occur on the north coast of Queensland (up to more than 160 inches) and in western Tasmania (up to 140 inches), while from 50 to over 60 inches are received on parts of the eastern seaboard from Jervis Bay to the northern part of Cape York Peninsula, also around Darwin, on the West Kimberley coast, near Cape Leeuwin, about the Australian Alps in eastern Victoria and south-eastern New South Wales, and on the north-eastern highlands in Tasmania. A great part of the interior of the continent, stretching from the far west of New South Wales and the south-west of Queensland to the vicinity of Shark Bay in Western Australia, has a very low average rainfall of less than 10 inches a year. Between these two regions of heavy and very low rainfall are the extensive areas which experience useful to good rains, and in the southern and eastern parts of which are found the best country and most of the population and primary production.

(iii) *Factors Determining Occurrence, Intensity and Seasonal Distribution of Rainfall.* Reference has already been made to the frequent rains occurring in the north-eastern coastal districts of Queensland with the prevailing south-east trade winds, and to similar rains in the west of Tasmania with the prevailing westerly winds. Other rains in Australia are associated mainly with tropical and southern depressions.

The former chiefly affect the northern, eastern, and to some extent the central parts of the continent, and operate in an irregular manner during the warmer half of the year, but principally from December to March. They vary considerably in activity and scope from year to year, occasionally developing into severe storms off the east and north-west coasts. Tropical rainstorms sometimes cover an extensive area, half of the continent on occasions receiving moderate to very heavy falls during a period of a few days. Rain is also experienced, with some regularity, with thunderstorms in tropical areas, especially near the coast. All these tropical rains, however, favour mostly the northern and eastern parts of the area referred to; the other parts further inland receive lighter, less frequent and less reliable rainfall. With the exception of districts near the east coast, where some rain falls in all seasons, the tropical parts of the continent receive useful rains only on rare occasions from May to September.

The southern depressions are most active in the winter—June to August—and early spring months. The rains associated with them are fairly reliable and frequent over southern Australia and Tasmania, and provide during that period the principal factor in the successful growing of wheat. These depressions also operate with varying activity during the remainder of the year, but the accompanying rains are usually lighter. The southern rains favour chiefly the south-west of Western Australia, the agricultural districts of South Australia, Victoria, Tasmania and the southern parts of New South Wales. They sometimes extend into the drier regions of the interior.

The map showing mean monthly distribution of rainfall over Australia (see p. 42) gives, in graphic form, information on the amount and occurrence of rain.

(iv) *Wettest and Driest Regions.* The wettest known part of Australia is on the north-east coast of Queensland, between Port Douglas and Cardwell, where Tully on the Tully River has an average annual rainfall of about 175 inches, and Harvey Creek on the northern coast-line about 167 inches. In addition, three stations situated on, or adjacent to, the Johnstone and Russell Rivers have an average annual rainfall of between 139 and 163 inches. The maximum and minimum annual amounts there, in inches, are:—Tully, 310.92 in 1950 and 104.98 in 1943, a range of 205.94 inches; Deeral, 287.18 in 1945 and 94.65 in 1951, a range of 192.53 inches; Harvey Creek, 254.77 in 1921 and 80.47 in 1902, a range of 174.30 inches; Goondi, 241.53 in 1894 and 67.88 in 1915, a range of 173.65 inches; Innisfail, 232.06 in 1950 and 69.87 in 1902, a range of 162.19 inches.

On five occasions, more than 200 inches have been recorded in a year at Goondi, the last of these being in 1950, when 204.97 inches were registered.

In 34 years of record to 1960, Tully has exceeded 200 inches on eleven occasions, and in 29 complete years of record, Harvey Creek has exceeded this figure four times.

In Tasmania, the wettest part is in the West Coast mountain region, the average annual rainfall at Lake Margaret being about 145 inches, with a maximum of 177.30 inches in 1948.

The driest known part of the continent is an area of approximately 180,000 square miles surrounding Lake Eyre in South Australia, where the annual average rainfall is between 4 and 6 inches and where the aggregates rarely exceed 10 inches in twelve months. Records at stations have at times been interrupted, but of the places in this region, the area with the lowest means is immediately to the east of the lake, where a number of stations with long records have averages of less than 5 inches, the lowest being 4.13 inches at Troudaninna over 42 years, followed by 4.28 inches at Mulka (39 years).

Troudaninna in the period 1893 to 1936 had only one year in which the total exceeded 9 inches (11.07 inches in 1894). There have been protracted periods when the average has been even less than 3 inches. From 1895 to 1903, Troudaninna received the following annual totals:—2.78, 0.99, 5.71, 3.04, 3.18, 2.83, 1.80, 1.11, 4.87, an average of 2.92 inches. From 1918 to 1929, the average was only 2.65 inches, and in this period, from December, 1924, to November, 1929, the average was only 1.70 inches.

Mulka since 1918 has only twice exceeded 10 inches for the annual total (11.72 inches in 1920 and 13.56 in 1955), and on 17 occasions in 39 years the annual total has been less than 3 inches. In one particular period from October, 1926, to September, 1930, the average was only 1.26 inches (505 points in 48 months). However, at Kanowana, an even lower four-year average of 1.12 inches was recorded between 1896 and 1899, with yearly totals of 43, 225, 87 and 94 points, while the smallest yearly total was recorded at Mungernie in 1888 when only 39 points were recorded on five days.

The average number of days of rain a month in this region is only 1 or 2. Cordillo Downs has an average of 6.36 inches on 13 days a year, while Murnpeowie (4.71 inches) and Edwards Creek (5.56 inches) average 14 days.

No part of the earth, so far as is known, is absolutely rainless, and although at Arica, in northern Chile, the rainfall over a period of 15 years was nil, a further two years in which there were three measurable showers made the "average" for 17 years 0.02 inches.

(v) *Quantities and Distribution of Rainfall.* The general distribution is best seen from the rainfall map on page 41, which shows the areas subject to average annual rainfalls lying between certain limits. The proportions of the total area of each State and of Australia as a whole enjoying varying quantities of rainfall determined from the latest available information are shown in the following table.

AVERAGE ANNUAL RAINFALL: AREA DISTRIBUTION  
(Per Cent.)

Average annual rainfall	W. Aust.	N. Terr.	S. Aust.	Q'land	N.S.W. (a)	Vic.	Tas. (b)	Total
Under 10 inches	58.0	24.7	82.8	13.0	19.7	Nil	Nil	37.6
10 and under 15 inches	22.4	32.4	9.4	14.4	23.5	22.4	Nil	19.9
15 and under 20	6.8	9.7	4.5	19.7	17.5	15.2	0.7	10.9
20 and under 25	3.7	6.6	2.2	18.8	14.2	17.9	11.0	9.1
25 and under 30	3.7	9.3	0.8	11.6	9.1	18.0	11.4	7.3
30 and under 40	3.3	4.7	0.3	11.1	9.9	16.1	20.4	6.6
40 inches and over	2.1	12.6	Nil	11.4	6.1	10.4	56.5	8.6
Total	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0

(a) Includes Australian Capital Territory.  
are available.

(b) Over an area of 2,777 square miles no records

Referring first to the capital cities, the records of which are given in the next table, it will be seen that Sydney, with a normal rainfall of 44.80 inches, is the wettest, Brisbane, Perth, Melbourne, Hobart and Canberra follow in that order, Adelaide with 21.09 inches being the driest. The extreme range from the wettest to the driest year is greatest at Brisbane (72.09 inches) and least at Adelaide (19.63 inches).

In order to show how the rainfall is distributed throughout the year in various parts of the continent, average figures for the various climatological districts have been selected (see map on p. 42). The figures for Northern Rivers (District 14), show that nearly

all the rainfall occurs there in the summer months, while little or none falls in the middle of the year. The figures for the Central Coast, south-west of Western Australia (District 9), are the reverse, for while the summer months are dry, the winter months are very wet. In the districts containing Melbourne and Hobart, the rain is fairly well distributed throughout the twelve months, with a maximum in October for both districts. In Queensland, the heaviest rains fall in the summer months, but good averages are also maintained during the other seasons in eastern parts.

On the coast of New South Wales, the first half of the year is the wettest, with heaviest falls in the autumn; the averages during the last six months are fair, and moderately uniform. Generally, it may be said that approximately one-third of the area of the continent, principally in the eastern and northern parts, enjoys an annual average rainfall of from 20 to 50 inches or more, the remaining two-thirds averaging from 5 to 20 inches.

(vi) *Tables of Rainfall.* The following table of rainfall for a fairly long period of years for each of the Australian capitals affords information as to the variability of the fall in successive years, and the list which follows in the next paragraph of the more remarkable falls furnishes information as to what may be expected on particular occasions.

(a) Commonwealth Forestry Bureau; records in issues of the Official Year Book prior to No. 36 were for the station at Acton which closed down in 1939. (b) Records taken from present site commenced 1883, (c) 1911-1940. (d) Twenty-nine years to 1936 inclusive.

6. Remarkable Falls of Rain.—The following are the most notable falls of rain which have occurred within a period of twenty-four hours ending at 9 a.m. in the various States and Territories. For other very heavy falls at various localities, reference may be made to Official Year Book No. 14, pages 60–64, No. 22, pages 46–48 and No. 29, pages 43, 44 and 51.

7. **Snowfall.**—Light snow has been known to fall occasionally as far north as latitude 31° S., and from the western to the eastern shores of the continent. During exceptional seasons, it has fallen simultaneously over two-thirds of New South Wales, and has extended at times along the whole of the Great Dividing Range, from its southern extremity in Victoria as far north as Toowoomba in Queensland. During the winter, for several months, snow covers the ground to a great extent on the Australian Alps, where the temperature falls below zero Fahrenheit during the night. In the ravines around Mt. Kosciusko and similar localities, the snow does not entirely disappear after a severe winter.

8. **Hail.**—Hail falls most frequently along the southern shores of the continent in the winter, and over eastern Australia during the summer months. The size of the hailstones generally increases with distance from the coast. A summer rarely passes without some station experiencing a fall of stones exceeding in size an ordinary hen egg, and many riddled sheets of light-gauge galvanized iron bear evidence of the weight and penetrating power of the stones.

The hailstones occur most frequently when the barometric readings indicate a flat and unstable condition of pressure. Tornadoes or tornadic tendencies are almost invariably accompanied by hail, and on the east coast the clouds from which the stones fall are frequently of a remarkable sepia-coloured tint.

9. **Droughts.**—A special article dealing with droughts was included in Year Book No. 45, pages 51–56. Fuller information is available in a Bureau of Meteorology publication *Droughts in Australia* by J. C. Foley (Bulletin 43, 1957).

10. **Barometric Pressures.**—The mean annual barometric pressure (corrected to sea level and standard gravity) in Australia varies from 29.80 inches on the north coast to 29.92 inches over the central and 30.03 inches in the southern parts of the continent. In January, the mean pressure ranges from 29.70 inches in the northern and central areas to 29.95 inches in the southern. The July mean pressure ranges from 29.90 inches at Darwin to 30.12 inches at Alice Springs. Barometer readings corrected to mean sea level and standard gravity have ranged as high, under anticyclonic conditions, as 30.935 inches (at Hobart on 13th July, 1846), and have fallen as low as 27.55 inches. This record low was registered at Mackay during a tropical hurricane on 21st January, 1918. An almost equally abnormal reading of 27.88 inches was recorded at Innisfail during a similar storm on 10th March, 1918. For graphs of Mean Barometric Pressure at Capital Cities, see Official Year Book No. 37, page 35.

11. **Wind.**—(i) *Trade Winds.* The two distinctive wind currents in Australia are, as previously stated, the south-east trade and the “prevailing” westerly winds. As the belt of the earth’s atmosphere in which they blow apparently follows the sun’s ecliptic path north and south of the equator, so the area of the continent affected by these winds varies at different seasons of the year. During the summer months, the anticyclonic belt travels in high latitudes, thereby bringing the south-east trade winds as far south as 30° south latitude. The “prevailing” westerly winds retreat a considerable distance to the south of Australia, and are less in evidence in the hot months. When the sun passes to the north of the equator, the south-east trade winds follow it, and for the greater part of the winter operate only to the north of the tropics. The westerly winds come into lower latitudes during the same period of the year. They sweep across the southern areas of the continent from Cape Leeuwin to Cape Howe, and during some seasons are remarkably persistent and strong, occasionally penetrating to almost tropical latitudes.

(ii) *North-west Monsoon.* As the belt of south-east trade winds retreats southward during the summer, it is replaced in the north and north-west of Australia first by a sequence of light variable winds and then by the north-west monsoon. In Australia, the north-west monsoon has not the persistence or regularity of the Indian south-west monsoon, but is sufficiently characteristic for the summer in the north of Australia to be called the “North-west Season”. In central and eastern Queensland, the north-west monsoon in the summer has comparatively little effect, and the trade winds, though weakened, are still dominant winds. With the movement of the sun northward in the autumn, the north-west monsoon is replaced first by light variable winds and then by the trade winds.

Further particulars of Australian wind conditions and meteorology will be found in Official Year Book No. 38, pages 58–61. Reference should also be made to the wind rose diagrams on pages 43 and 44.

(iii) *Cyclones and Storms.* The “elements” in Australia are ordinarily peaceful, and while destructive cyclones have visited various parts, more especially coastal areas, such visitations are rare, and may be properly described as erratic.

During the winter months, the southern shores of the continent are subject to deep depressions of the southern low-pressure belt. They are felt most severely over the south-western parts of Western Australia, to the south-east of South Australia, in Bass Strait, along the coastline of Victoria, and on the west coast of Tasmania. Apparently the more violent wind pressures from these disturbances are experienced in their northern half, or in that part of them which has a north-westerly to a south-westerly circulation.

The north-east coast of Queensland is occasionally visited by hurricanes from the north-east tropics. During the first four months of the year, these hurricanes appear to have their origin in the neighbourhood of the South Pacific Islands, their path being a parabolic curve first to the south-west and finally towards the south-east.

Very severe cyclones, locally known as “willy willies”, are peculiar to the north-west coast of Western Australia from the months of November to April, inclusive. They usually originate over the ocean to the north or north-west of Australia, and travel in a south-westerly direction with continually increasing force, displaying their greatest energy near Cossack and Onslow, between latitudes 20° and 22° South. The winds in these storms, like those from the north-east tropics, are very violent and destructive. The greatest velocities are usually to be found in the south-eastern quadrant of the cyclones, with north-east to east winds. After leaving the north-west coast, these storms either travel southwards, following the coast-line, or cross the continent to the Great Australian Bight. When they take the latter course, their track is marked by torrential rains, as much as 29.41 inches, for example, being recorded in 24 hours at Whim Creek from one such occurrence. Falls of 10 inches and over have frequently been recorded in the northern interior of Western Australia from similar storms.

Some further notes on severe cyclones and on "southerly bursters", a characteristic feature of the eastern part of Australia, appeared in early issues of the *Official Year Book* (see No. 6, pp. 84-86), and a special article dealing with "Australian Hurricanes and Related Storms" appeared in *Official Year Book* No. 16, pages 80-84.

Depressions vary considerably in their isobaric forms, intensity and other characteristics. Some bring rain in variable quantities, some heat and others mainly wind. A common type in southern Australia is the "v" shaped trough with an abrupt "backing" of the wind or "line squall" as it passes. The cold front is most frequently found through the centre of the "trough", because it is along this line, and extending into the upper levels of the atmosphere, that the demarcation of different air masses is so well defined. The best rains in inland Australia occur when extensive masses of warm moist tropical air move into the interior, and are forced to rise by convergence of flow or by impact with a cold air stream.

The speed of low pressure systems is very variable, but in general in southern latitudes the movement is of the order of 500 to 700 miles a day.

**12. Influences affecting Australian Climate.**—(i) *General.* Australian history does not cover a sufficient period, nor is the country sufficiently occupied, to ascertain whether or not the advance of settlement has materially affected the climate as a whole. Local changes have, however, taken place, a fact which suggests that settlement and the treatment of the land have a distinct effect on local conditions. For example, low-lying lands on the north coast of New South Wales, which originally were seldom subject to frosts, have, with the deforestation of the surrounding hills, experienced annual visitations, the probable explanation being that through the absence of trees the cold air of the highlands now flows unchecked and untempered down the sides of the hills to the valleys and lower lands.

(ii) *Influence of Forests on Climate.* Since forests doubtless exercise a great influence on local climate, it follows that, to the extent that forestal undertakings will allow, the weather can be controlled by human agency. The direct action of forests is an equalizing one; thus, especially in equatorial regions, and during the warmest portion of the year, they reduce considerably the mean temperature of the air. They also reduce the diurnal extremes of shade temperatures by altering the extent of radiating surface by evaporation, and by checking the movement of air, and while decreasing evaporation from the ground, they increase the relative humidity. Vegetation greatly diminishes the rate of flow-off of rain and the washing away of surface soil, and when a region is protected by trees a steadier water supply is ensured, and the rainfall is better conserved. In regions of snowfall, the supply of water to rivers is similarly regulated, and, without this and the sheltering influence of ravines and gullies, watercourses supplied mainly by melting snow would be subject to alternate periods of flooding and dryness. This is borne out in the case of the inland rivers, the River Murray, for example, which has never been known to become dry, deriving its steadiness of flow mainly through the causes indicated.

(iii) *Direct Influence of Forests on Rainfall.* Whether forests have a direct influence on rainfall is a debatable question, some authorities alleging that precipitation is undoubtedly induced by forests, while others take the opposite view.

Sufficient evidence exists, however, to prove that, even if the rainfall is not increased, the beneficial climatic effect of forest lands more than warrants their protection and extension. Rapid rate of evaporation, induced by both hot and cold winds, injures crops and makes life uncomfortable on the plains, and, while it may be doubted that the forest aids in increasing precipitation, it must be admitted that it does check winds and the rapid evaporation due to them. Trees as wind-breaks have been successfully planted in central parts of the United States of America, and there is no reason why similar experiments should not be successful in many parts of the treeless interior of Australia. The belts should be planted at right angles to the direction of the prevailing parching winds, and if not more than half a mile apart will afford shelter to the enclosed areas.

**13. Rainfall and Temperatures, Various Cities.**—*Official Year Book* No. 34, page 28, shows rainfall and temperature, and No. 38, page 42, temperature, for various important cities throughout the world and for the Australian capitals.

**14. Climatological Tables.**—The averages and extremes for a number of climatological elements, which have been determined from long series of observations at the Australian capitals up to and including the year 1961, are given on the following eight pages.

NOTE.—The following points apply throughout.

- (a) Where records are available, mean or average values have been calculated on a standard period of 30 years from 1911 to 1940.
- (b) Extreme values have been extracted from all available years of actual record, but the number of years quoted does not include intervening periods when observations were temporarily discontinued.

## CHAPTER III

### GENERAL GOVERNMENT

#### § 1. Scheme of Parliamentary Government

1. **General.**—Under Section 1 of the Commonwealth of Australia Constitution, the legislative power of the Commonwealth is vested in the Parliament of the Commonwealth, which consists of the Sovereign, the Senate, and the House of Representatives. The Sovereign is represented throughout the Commonwealth by the Governor-General who, subject to the Constitution of the Commonwealth, has such powers and functions as the Sovereign is pleased to assign to him. In each State, there is a State Governor who is the representative of the Sovereign for the State and who exercises such powers within the State as are conferred upon him by the Letters Patent which constitute his office and by the instructions which inform in detail of the manner in which his duties are to be fulfilled. The Legislature in each State was bi-cameral until 1922, when the Queensland Upper House was abolished and the Parliament became uni-cameral. In the bi-cameral Parliaments, the Upper House is known in the Commonwealth Parliament as the Senate, and in the State Parliaments as the Legislative Council, while the Lower House is known in the Commonwealth Parliament as the House of Representatives, in the State Parliaments of New South Wales, Victoria and Western Australia as the Legislative Assembly, and in the State Parliaments of South Australia and Tasmania as the House of Assembly. In Queensland, the Legislative Assembly constitutes the legislature. The legislative powers of the Parliaments are delimited by the Commonwealth and State Constitutions. The Assembly, which is the larger House, is, in all cases, elective, the franchise extending to adult British subjects with certain residential qualifications. The Council in each of the States other than New South Wales is elected by the people of the State concerned, the constituencies being differently arranged and, in general, some property or special qualification for the electorate being required. In Victoria, however, under the Legislative Council Reform Act passed in October, 1950, adult suffrage was adopted for Legislative Council elections. In the case of New South Wales, the Council is elected by the members of both Houses of Parliament at a simultaneous sitting. In the Federal Parliament, the qualifications for the franchise are identical for both Houses, extending to adult British subjects who have lived in Australia for six months continuously.

2. **The Sovereign.**—(i) *Accession of Queen Elizabeth II.* On 7th February, 1952, the Governor-General and members of the Federal Executive Council proclaimed Princess Elizabeth Queen Elizabeth the Second, Queen of this Realm and of all Her other Realms and Territories, Head of the Commonwealth, Defender of the Faith, Supreme Liege Lady in and over the Commonwealth of Australia. The coronation of Her Majesty in Westminster Abbey took place on 2nd June, 1953.

(ii) *Royal Style and Titles Act 1953.* Following a conference of Prime Ministers and other representatives of the British Commonwealth in London in December, 1952, the Royal Style and Titles Act was passed on 3rd April, 1953, giving Parliament's assent to the adoption by the Queen, for use in relation to the Commonwealth of Australia and its Territories, of the following Royal Style and Titles:—"Elizabeth the Second, by the Grace of God of the United Kingdom, Australia and Her other Realms and Territories Queen, Head of the Commonwealth, Defender of the Faith."

(iii) *Authorization of a Royal Great Seal.* By warrant published in the Commonwealth Gazette of 17th November, 1955, Her Majesty authorized the Great Seal of the Commonwealth to be used as a Royal Great Seal in sealing all things whatsoever (other than things that pass the said Great Seal) that bear Her Majesty's Sign Manual and the counter-signature of one of Her Ministers of State for the Commonwealth.

### 3. Powers and Functions of the Governor-General and of the State Governors.—

(i) *Governor-General of the Commonwealth.* As the Queen's representative in Australia, the Governor-General exercises certain prerogative powers and functions assigned to him by the Queen, either by Letters Patent, by Instructions under the Royal Sign Manual and Signet, by Commission issued to him under the Royal Sign Manual and Signet, or by the Constitution. Powers which have been so assigned include, among others, the power to appoint a Deputy or Deputies of the Governor-General; to administer or authorize any other person to administer the Oath of Allegiance; to grant pardons and to remit fines for offences against the laws of the Commonwealth; to appoint certain officers in the Diplomatic or Consular Service of the Commonwealth; to appoint times for holding the sessions of the Parliament, prorogue Parliament and dissolve the House of Representatives; to cause writs to be issued for general elections of members of the House of Representatives; to assent in the Queen's name to a proposed law passed by both Houses of the Parliament or withhold assent, or to reserve the law for the Queen's pleasure, or to return the proposed law to the House in which it originated and transmit therewith any amendments which he may recommend; to exercise the executive power of the Commonwealth; to choose and summon Executive Councillors, who hold office during his pleasure; to appoint Ministers of State for the Commonwealth. In addition, the command in chief of the naval and military forces of the Commonwealth is vested in the Governor-General, as the Queen's representative. Under the conventions of responsible government obtaining in Commonwealth countries, the Governor-General's executive functions generally are exercised on the advice of Ministers of State.

Most Acts of the Commonwealth Parliament provide that the Governor-General may make regulations to give effect to the act or to cover certain matters specified in the power. The Governor-General may also be authorized by statute to issue proclamations—for example, to declare an act in force or a state of things to exist, e.g. the existence of an epidemic, and he has been given power by statute to legislate for certain Territories of the Commonwealth.

(ii) *Governors of the States.* The Queen is represented in each of the States by a Governor, the office having been constituted by Letters Patent under the Great Seal of the United Kingdom of various dates.

The Governors of the States exercise powers, in respect of each State, largely similar to those exercised by the Governor-General in respect of the Commonwealth.

(iii) *Holders of Office.* For the names of the Governors-General since the inception of the Commonwealth and the present State Governors, see § 4, page 76.

4. *The Cabinet and Executive Government.*—(i) *General.* Both in the Commonwealth and in the States, executive government is based on the system which was evolved in Britain in the 18th century, and which is generally known as "Cabinet" or "responsible" government. Its essence is that the head of the State (Her Majesty the Queen, and her representative, the Governor-General or Governor) should perform governmental acts on the advice of her Ministers; that she should choose her principal Ministers of State from members of Parliament belonging to the party, or coalition of parties, commanding a majority in the popular House; that the Ministry so chosen should be collectively responsible to that House for the government of the country; and that the Ministry should resign if it ceases to command a majority there.

The Cabinet system operates chiefly by means of constitutional conventions, customs, or understandings, and through institutions that do not form part of the legal structure of the government at all. The constitutions of the Commonwealth and the States make fuller legal provision for the Cabinet system than the British Constitution does—for example, by requiring that Ministers shall either be, or within a prescribed period become, members of the Legislature. In general, however, the legal structure of the executive government remains the same as it was before the establishment of the Cabinet system.

The executive power of the Commonwealth is exercisable by the Governor-General, and that of the States by the Governor. In each case, he is advised by an Executive Council, which, however, meets only for certain formal purposes, as explained below. The whole policy of a Ministry is, in practice, determined by some or all of the Ministers of State, meeting without the Governor-General or Governor under the chairmanship of the Prime Minister or Premier. This group of Ministers is known as the Cabinet.

(ii) *The Cabinet.* This body does not form part of the legal mechanism of government. Its meetings are private and deliberative. The actual Ministers of the day alone are present, no records of the meetings are made public, and the decisions taken have, in themselves, no legal effect. In Australia, until January, 1956, all Ministers were members of the Cabinet. Since then, however, although in the States all Ministers are members of the Cabinet, the Commonwealth ministry is made up of twelve senior Ministers, who constitute the Cabinet, and ten Ministers of non-Cabinet rank who attend meetings of the Cabinet only when required, as, for example, when the business of the Cabinet concerns their departments. As Ministers are the leaders of the party or parties commanding a majority in the popular House, the Cabinet substantially controls, in ordinary circumstances, not only the general legislative programme of Parliament, but the whole course of Parliamentary proceedings. In effect, though not in form, the Cabinet, by reason of the fact that all Ministers are members of the Executive Council, is also the dominant element in the executive government of the country. Even in summoning, proroguing or dissolving Parliament, the Governor-General or Governor is usually guided by the advice tendered him by the Cabinet, through the Prime Minister or Premier, though legally the discretion is vested in the Governor-General or Governor himself.

(iii) *The Executive Council.* This body is usually presided over by the Governor-General or Governor, the members thereof holding office during his pleasure. All Ministers of State must be members of the Executive Council. In the Commonwealth, and also in the States of Victoria and Tasmania, Ministers remain members of the Executive Council on leaving office, but are not summoned to attend its meetings, for it is an essential feature of the Cabinet system that attendance should be limited to the Ministers of the day. The meetings of the Executive Council are formal and official in character, and a record of proceedings is kept by the Secretary or Clerk. At Executive Council meetings, the decisions of the Cabinet are (where necessary) given legal form, appointments made, resignations accepted, proclamations issued, and regulations and the like approved.

(iv) *The Appointment of Ministers.* Legally, Ministers hold office during the pleasure of the Governor-General or Governor. In practice, however, the discretion of the Queen's representative in the choice of Ministers is limited by the conventions on which the Cabinet system rests. When a Ministry resigns, the Crown's custom is to send for the leader of the party which commands, or is likely to be able to command, a majority in the popular House, and to commission him, as Prime Minister or Premier, to "form a Ministry"—that is, to nominate other persons to be appointed as Ministers of State and to serve as his colleagues in the Cabinet.

(v) *Ministers in Upper and Lower Houses.* The following table shows the number of Ministers with seats in the Upper or Lower Houses of each Parliament in December, 1962.

AUSTRALIAN PARLIAMENTS: MINISTERS IN UPPER OR LOWER HOUSES, DECEMBER, 1962

Ministers with seats in—	C'wealth	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Total
The Upper House ..	5	2	4	(a)	3	2	1	17
The Lower House ..	17	14	10	11	5	8	8	73
Total ..	22	16	14	11	8	10	9	90

(a) Abolished in 1922.

For the names of the occupants of ministerial office in each of the Parliaments of Australia in December, 1962, see § 4 of this chapter, page 76. Subsequent changes will be found in the Appendix to this volume.

(vi) *Numbers and Salaries of Commonwealth Ministers.* Under sections 65 and 66, respectively, of the Constitution of the Commonwealth, the number of Ministers of State was not to exceed seven, and the annual sum payable for their salaries was not to exceed £12,000, each provision to operate, however, "until the Parliament otherwise provides".

Subsequently, the number and salaries have been increased from time to time, and from 1959 the annual sum payable for salaries has been fixed at £66,000 and the number of Ministers at 22. An additional ministerial allowance of £3,500 a year has been payable to the Prime Minister since 1952, and at the same time an additional ministerial allowance of £1,000 a year was granted to each other Minister. This latter figure was increased, in 1959, to £1,500 a year for senior Ministers and £1,250 a year for junior Ministers.

All amounts payable in the foregoing paragraphs are in addition to amounts payable as Parliamentary allowances (see para. 5 following).

5. **Number and Salary of Members of the Legislatures, Australian Parliaments, December, 1962.**—The following table shows the number and annual salary of members in each of the legislative chambers in December, 1962.

**AUSTRALIAN PARLIAMENTS: MEMBERS AND ANNUAL SALARIES,  
31st DECEMBER, 1962**

Members in—	C'wealth	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Total

(a) Abolished in 1922. (b) Plus expense allowances—Senators, £800; Members of the House of Representatives, city electorates, £850, country electorates, £1,050. Certain additional allowances are also provided for holders of parliamentary offices, etc. (c) Plus allowance of £550 for metropolitan, £750 for urban, £850 for inner country and £950 for outer country electorates. (d) Plus allowance of £550 where electorate is less than 50 miles from Adelaide; £700 if more than 50 miles, £800 if more than 200 miles. (e) Plus £50 where any part of electorate is more than 50 miles from Perth and expense reimbursement ranging from £450 for a Metropolitan member to £700 for a North Province member. (f) Plus allowance according to area of electorate and distance from the capital varying from £250 to £575 in the case of the Legislative Council, and from £725 to £875 in the case of the House of Assembly. (g) Plus allowance varying from £650 to £950 according to location of electorate. (h) Plus individual electoral allowances varying between £325 and £1,175.

6. **Enactments of the Parliaments.**—In the Commonwealth, all laws are enacted in the name of the Sovereign, the Senate, and the House of Representatives. The subjects with respect to which the Commonwealth Parliament is empowered to make laws are enumerated in the Constitution. In the States other than South Australia and Tasmania, laws are enacted in the name of the Sovereign by and with the consent of the Legislative Council (except in Queensland) and Legislative Assembly. In South Australia and Tasmania, laws are expressed to be enacted in the name of the Governor of the State, with the advice and consent of the Parliament in the case of South Australia, and of the Legislative Council and House of Assembly in the case of Tasmania. The Governor-General or the State Governor acts on behalf of, and in the name of, the Sovereign in assenting to Bills passed by the Legislatures, but he may reserve them for the special consideration of the Sovereign. The Parliaments of the States are empowered generally, subject to the Commonwealth Constitution, to make laws in and for their respective States, in all cases whatsoever. Subject to certain limitations, they may alter, repeal, or vary their Constitutions. Where a law of a State is inconsistent with a law of the Commonwealth, the latter prevails, and the former is, to the extent of the inconsistency, invalid.

## § 2. The Parliament of the Commonwealth of Australia\*

Section 1 of the Commonwealth of Australia Constitution provides that the legislative power of the Commonwealth shall be vested in a Federal Parliament, which shall consist of the Queen, a Senate and a House of Representatives, and be known as "The Parliament of the Commonwealth".

1. **The Senate.**—Both Houses of the Federal Parliament are elected by the same body of electors. In choosing a bi-cameral legislative system, the founders of the Constitution had in mind, however, that the Senate should give expression to the interests of the States as partners in the federation; that is to say, that the Senate should be a States House. Accordingly, the founders decided that the number of senators to be chosen for each original State should be the same for each State, irrespective of population, and that the number of senators for each original State should not be less than six.

The Senate was also designed to function as a House of Review—a function universally accepted as the role of a second chamber. With this in mind, the founders provided that senators should be elected for six-year terms and that one-half of their number should retire every three years instead of all senators retiring at the same time. This rotation principle ensures an element of continuity in the constitution of the Senate, and the six-year terms were designed to give senators greater independence and better opportunities for deliberation in dealing with proposed legislation.

It is noteworthy that bills, other than bills appropriating revenue or money or imposing taxation, may originate in the Senate, and in practice some bills passed each year in the Federal Parliament are first introduced in the Senate. There are certain money bills which the Senate may not amend, but in respect of these the Senate may make requests for amendments. However, there is no bill coming from the House of Representatives that the Senate cannot reject if it wishes. In view of the Senate's power of veto, the founders considered that some provision was necessary to deal with deadlocks that could arise between the House of Representatives and the Senate. The Constitution provides for a dissolution of the two Houses simultaneously where a deadlock occurs, thus breaking the continuity of the existence of the Senate. To meet this situation, the Constitution makes further provision for the rotation of senators following a double dissolution. The whole number of senators returned at the general elections following the double dissolution is divided equally by resolution of the Senate into two classes—senators of the first class holding their places for three-year terms and senators of the second class (in practice, the half first selected in each State) holding their places for six-year terms. All terms are deemed to begin on the first day of July preceding the day of election, in contrast to the usual position, in which a senator's term begins on the first day of July following his date of election.

In the first Federal Parliament, the Senate comprised thirty-six members, six being returned by the electors for each State. The number remained at thirty-six until Parliament provided, in the *Representation Act* 1948, that the number to be chosen for each State should be increased to ten, making a total of sixty senators for the six States.

2. **The House of Representatives.**—The House of Representatives was designed by the founders of the Constitution to be the legislative body representing the national interest. Its members are directly chosen by the people of the Commonwealth. The numbers of members chosen in the several States must be in proportion to population, save that no original State may have less than five members. The maximum duration of the House of Representatives is three years from its first meeting, but the House may be dissolved sooner by the Governor-General.

Under the Constitution, Parliament is empowered to make laws for increasing or diminishing the number of the members of the House of Representatives. But the Constitution further declares that the number of such members shall be as nearly as practicable twice the number of senators, a requirement commonly known as the two to one ratio.

There were seventy-five members of the first House of Representatives in 1901 compared with thirty-six senators in the same Parliament. The number of members was increased by the *Representation Act* 1948, when the number of senators was increased to ten for each State, and a total of 121 members was chosen in the several States at the general elections in December, 1949. Following an electoral redistribution in 1955, the House was increased to 122 members.

\* The following description of the Commonwealth Parliament, its functions and procedure, was specially prepared for this issue of the Year Book by the Clerk of the Senate and the Clerk of the House of Representatives.

Parliament may also make laws allowing representation of a Territory of the Commonwealth in either House. Since 1922, the Northern Territory has been represented by one member in the House of Representatives. The *Australian Capital Territory Representation Act 1948* gave that Territory one member in the House as from the elections in 1949. These members, who are additional to those chosen for the several States, are restricted in their right to vote, and may not hold certain offices in the House.

**3. Parliamentary Procedure.**—The Standing Orders are a body of rules, numbering over four hundred for each House,\* drawn up for the proper conduct of parliamentary business. Power to make such rules is given by section 50 of the Constitution, which provides that each House may make rules and orders with respect to (i) the mode in which its powers, privileges, and immunities may be exercised and upheld; (ii) the order and conduct of its business and proceedings either separately or jointly with the other House. Among other things, the Standing Orders lay down procedure for election of Presiding Officers and Chairmen; provide for keeping suitable records of proceedings; lay down days and hours of meeting for the House of Representatives; state rules of debate, time limits for speeches, rules for preserving order; lay down the order or routine of business; and state rules in connexion with the presentation of petitions, the asking of questions, giving notices of motion, taking of divisions, appointment and procedure of various committees, moving of motions and amendments, and the passing of bills, etc.

The Standing Orders of the Commonwealth Parliament were drawn up broadly along the lines of those existing in the United Kingdom Parliament, modified to suit Australian conditions. In the House of Commons, Standing Orders were evolved over a period of centuries, their trend of development being always towards a true form of dignified democratic procedure allowing free speech and fair dealing for majority and minority parties alike.

The Standing Orders of the Senate were largely adopted from those of the House of Assembly of South Australia, with necessary alterations and certain exceptions. The reasons for the adoption were that the South Australian Standing Orders were familiar to the then President and could be administered by him without difficulty or delay, that they had been adopted by the Commonwealth Convention which drafted the Constitution and were considered to have been satisfactory by that body, and more members of the Senate were acquainted with them than with any other Standing Orders. The Standing Orders of the House of Representatives were temporarily adopted by the House on 6th June, 1901, and finally adopted on 21st March, 1950. In most cases, uniformity was achieved between the House of Representatives Standing Orders and those of the Senate. However, Standing Order No. 1 of the House of Representatives was rejected by the Senate. This Order stated:

In all cases not provided for hereinafter, or by Sessional or other Orders, resort shall be had to the rules, forms and practice of the Commons House of the Imperial Parliament of Great Britain and Ireland in force at the time of adoption of these Orders, which shall be followed as far as they can be applied to the proceedings of the House of Representatives.

The intention of the Senate in rejecting this Standing Order was that, in cases not positively and specifically provided for, the Senate should gradually build up rules, forms, and practices of its own, suited to its own conditions. In pursuance of this decision, the rulings of all the Presidents since 1903, when permanent Standing Orders came into force, have been consolidated and bound in separate volumes, and unless and until disagreed to by the Senate are binding on the Senate as a part of its procedure.

In pursuance of the House of Representatives Standing Order No. 1, now slightly amended from that stated above, the House has frequently to resort to the practice of the House of Commons. This practice is embodied in various authoritative works, the main one of which is Sir Thomas Erskine May's *Parliamentary Practice*.

**4. The Principal Officers in the Chamber (other than the Ministry).**—(i) *General.* Apart from the Ministry, the principal officers in the Chambers of the Parliament are:—The President of the Senate, the Speaker of the House of Representatives, the Chairman of Committees of the Senate, the Chairman of Committees of the House of Representatives, the Leaders of the Opposition in each House, and the Whips. In addition, in each Chamber there is the Clerk and the Clerk-Assistant, while in the Senate there is the Usher of the Black Rod and in the House of Representatives the Serjeant-at-Arms.

---

\* Unless otherwise indicated, the term "House" is used to refer to both the Senate and the House of Representatives and the term "member" includes "senator".

(ii) *The President of the Senate.* The President, who must be a member of the Senate, is chosen every three years by a secret ballot of members of that House (where more than one candidate is proposed). He may be removed from office by a vote of the Senate, or he may resign his office or his seat by writing addressed to the Governor-General.

The Standing Orders provide that the office of President shall become vacant on the thirtieth day of June following a periodical election, but, if the place of the holder of the office has not become vacant on that day, the office of President continues until the day next before the first sitting day of the Senate after such thirtieth day of June. A former President is eligible for re-election.

On any question before the Chair, the President is entitled to a deliberative but not a casting vote. This ensures that the States have equal voting strength. When the votes are equal, a question passes in the negative.

The President controls the Senate and its precincts. In the Commonwealth Table of Precedence the President ranks immediately below the Prime Minister and before the Speaker.

(iii) *The Speaker of the House of Representatives.* Like the President of the Senate, the Speaker of the House of Representatives must be a member of the House over which he presides, and is chosen at the commencement of each new Parliament by members of the House. If there are two or more candidates the Speaker is chosen by a secret ballot. He may be removed from office by a vote of the House, or he may resign his office or his seat by writing addressed to the Governor-General. The Speaker controls the Chamber and its precincts.

The position of Speaker is one of great antiquity and dignity, and, traditionally, one of impartiality. Speakers (and Presidents of the Senate) nominated by Labour Governments (the support of the Government party as a rule ensures election) have usually disregarded the traditional robes of office—the full-bottomed wig and gown—but nominees of other parties have adhered to the traditional dress.

The Speaker is not entitled to a vote upon any question before the Chair unless the numbers are equal, when he may exercise a casting vote.

The President and the Speaker preside over their respective Houses, enforce the rules of debate and preserve order, call members who wish to speak, propose and put the necessary questions, announce decisions, and, generally act to ensure that the business of the House is conducted within the spirit and meaning of the Standing Orders.

Outside the Chamber, the Presiding Officers act as spokesmen for the Houses in their external relations, present addresses to the Crown, receive communications addressed to their respective Houses, and execute orders of the House.

(iv) *The Chairman of Committees of the Senate.* The Chairman of Committees in the Senate is appointed in a manner similar to the President. His term of office, normally three years, and expiring on the thirtieth day of June following a periodical election for the Senate, may be terminated or varied by vote of the Senate, or he may resign his office or seat by writing addressed to the President. During the unavoidable absence of the President, the Chairman of Committees, as Deputy President, performs the duties and exercises the authority of President in relation to all proceedings of the Senate.

(v) *The Chairman of Committees of the House of Representatives.* An appointment is made to the office of Chairman of Committees in the House of Representatives at the commencement of every Parliament in a manner similar to the Speaker. The member appointed takes the Chair of all Committees of the Whole, which include the committee stages of every bill, the Committee of Supply (where money is voted for Government services), and the Committee of Ways and Means (where money is raised by taxes or customs duties). During the unavoidable absence of the Speaker, the Chairman, as Deputy Speaker, performs the duties and exercises the authority of the Speaker in relation to all proceedings of the House.

(vi) *The Leader of the Opposition in the House of Representatives.* The Opposition Leader leads the largest party opposing the Government and so may be regarded as the country's alternative Prime Minister. His office is an old and historic one in parliamentary history. Apart from leading his party, the Leader of the Opposition is responsible for intelligent, well-informed, and constructive criticism of Government proposals. This process of critical analysis of proposed legislation is essential for the democratic functioning of Parliament.

(vii) *The Deputy Leader of the Opposition.* The Deputy Leader undertakes such duties as might be assigned to him by the Leader of the Opposition, and, in like manner, he carries much responsibility for criticism of Government policy and proposals.

In the Senate, the Leader of the Opposition and his Deputy perform duties of a nature similar to the corresponding officers in the Lower House.

(viii) *The Whip.* The office of Whip is an essential one in the party system. The Whip is appointed to marshal the full strength of his party for voting and other political action in the Chamber and to act as a liaison officer between the party leaders and the rank-and-file members. His duties include arranging speakers for various debates, ensuring the presence of members for divisions and quorums, telling (counting) of divisions, arranging pairs and leave of absence for members, and keeping abreast, if he can possibly do so, of the political moves and stratagems which the opposing parties are planning.

(ix) *The Clerk and Clerk-Assistant.* In each Chamber, two non-member officials, the Clerk and the Clerk-Assistant, wearing the traditional parliamentary dress of wig and gown, are seated at the head of the Chamber Table. The Clerk's long experience and knowledge of proceedings of the House and his advice upon the Standing Orders and points of procedure are available to the Presiding Officer, Ministers and other members. The Clerk's duties include the recording of the proceedings of the House (Senate—the Journals; House of Representatives—the Votes and Proceedings). He also endorses bills sent to the other Chamber, reads the titles of bills, and reads petitions and any other matter requiring to be read. The Clerks (who, together with their assistants and other officers, are members of the Commonwealth Public Service) are the permanent heads and are responsible for the functioning of their respective departments. The officers of each House are appointed by the Governor-General on the recommendation of its Presiding Officer, i.e. the President or Speaker. The Clerks-Assistant assist the Clerk in the Chamber, prepare the Notice Papers for the day's proceedings, and keep minutes of the business of the Chamber.

(x) *The Usher of the Black Rod and the Serjeant-at-Arms.* The Usher of the Black Rod (Senate) and the Serjeant-at-Arms (House of Representatives) attend upon their presiding officers upon entering and leaving the House or attending the Governor-General with an Address, are responsible for the preservation of order in the visitors' galleries and the lobbies of the Houses, and otherwise carry out the orders of the President and Speaker respectively. These officers are seated close to the Bar of their Chambers. They also have duties of an administrative character, act as secretary to various parliamentary committees, and supervise the staff of attendants.

5. *Legislation.*—(i) *General.* Pursuant to section 1 of the Constitution, the legislative power of the Commonwealth is vested in the Federal Parliament, consisting of the Sovereign (represented by the Governor-General), the Senate, and the House of Representatives.

Under Australia's federal system of government, there is a division of powers between the Federal and State Governments. Sections 51 and 52 of the Constitution list the matters with respect to which the Federal Parliament has power to make laws. Those powers may be increased by an alteration of the Constitution by referendum under section 128.

Law-making is the most important function of Parliament. What is known as a bill\* is a legislative proposal which, after finally passing both Houses and receiving the royal assent, becomes an Act of Parliament.

Bills originate in different ways. Broadly, routine machinery legislation stems from recommendations made by Government departments, while policy bills flow from the undertakings made by a Government in the election campaign and subsequently. Other legislative proposals follow suggestions made by Government members at party meetings and by members in the Parliament. In whatever way a proposal originates, the matter is considered by Cabinet, and, if it is agreed to, the responsible Minister is authorized to have a bill prepared. The Minister or his departmental officers then give the necessary instructions to the Parliamentary Draftsman. Bills may also be originated by private members. Bills may be originated in either House, with the provision that money bills (that is, appropriation and taxing bills) may originate only in the House of Representatives.

\* The word "bill" comes from the Latin *bullā*, a seal. In the courts of early Britain—and before the British Parliament was established—bills were documents with seals often founded on petitions. Later, when Parliament was formed, petitions were more frequently addressed to the King and Parliament than to the courts, and usually these petitions asked for a bill to be passed to remedy the grievance.

Except for certain special procedures on financial measures, the fundamental stages in the passage of a bill are:—Introductory proceedings; presentation and first reading; second reading; Committee proceedings; adoption of Committee's report; third reading; transmission to the other House and consideration of amendments (if any) made by that House; consideration of amendments (if any) proposed by the Governor-General; and royal assent.\*

(ii) *Introductory Proceedings.* On the Presiding Officer calling for Notices of Motion (soon after the meeting of the House), the member rises and gives notice that, at the next sitting, he will move that he have leave to bring in a bill for an Act to (then follows the long title of the bill). At the next sitting, when the notice of motion is called on, the member moves the motion. Although the motion may be debated, discussion at this stage is rare and the motion is usually agreed to immediately.

(iii) *Presentation and First Reading.* Following acceptance of the motion for leave, the member then presents the bill by handing a signed copy to the Clerk. Motion is then made that the bill be read a first time. The acceptance of the motion for the first reading (upon which, except in the Senate on certain money bills, no debate is allowed) permits a bill to be circulated and its contents to become known.

(iv) *Second Reading.* The Standing Orders provide that the second reading of a bill shall be made an Order of the Day for the next sitting, but it is the usual practice for the member to ask leave of the House (or to move the suspension of the Standing Orders) to permit the moving of the second reading forthwith. The member then makes his second reading speech explaining the general principles of the bill. Usually a member of the Opposition (in the case of a Government bill) obtains the adjournment of the debate until the next sitting. When the debate is resumed, a member may move an amendment to the question "That this bill be now read a second time". Such an amendment may take one of two forms: (i) it may omit "now" and add "this day six months" (if carried, this finally disposes of the bill), or (ii) it may omit all words after "That" and insert other words (this type of amendment, which must be relevant to the subject matter of the bill and cannot anticipate an amendment which may be more suitably moved in Committee, is known as a "reasoned amendment", and it is usually phrased to place on record any special reasons which the mover may have for not agreeing to the second reading).

The second reading and any proposed amendment are debated together. At the conclusion of the debate, the Presiding Officer first puts the question to dispose of the amendment (if any), and if that is negatived he then puts the question for the second reading. The Clerk then reads out the title of the bill.

(v) *Committee.* After the second reading, the President or the Speaker, as the case may be, leaves the Chair, the Chairman of Committees takes the Chairman's seat at the Table between the Clerk and the Clerk-Assistant, and the House forms itself into a Committee of the Whole for consideration of the Bill in the following order:—Clauses in their numerical order; schedules in their numerical order; postponed clauses; new clauses; new schedules; preamble (if any); and title. In the Senate, new clauses may be considered in their proposed order in the bill, followed by the consideration of postponed clauses. By leave of the Committee, a bill may be taken as a whole or by parts. An amendment may be moved to any part of a bill provided it is relevant to the subject-matter or, in the case of the House of Representatives, within the title.

After a bill has been agreed to in Committee, the Presiding Officer resumes the Chair, and the Chairman reports to him that the Committee has considered the bill and agreed to it with (or without) amendment. The member in charge of the bill then moves that the report be adopted. If it is not possible to complete the Committee consideration that day, the member in charge of the bill moves that progress be reported, and further consideration is made an Order of the Day for the next sitting, and it appears on the Notice Paper as such.

(vi) *Third Reading.* The Standing Orders provide that the third reading of a bill shall be made an Order of the Day for the next sitting, but it is usual for the member to ask leave of the House (or to move the suspension of the Standing Orders if this has not already been agreed to at an earlier stage of the bill) to permit the moving of the third reading forthwith.

\* The exception is a bill proposing an amendment of the Constitution which, in certain circumstances, need pass one House only. Moreover, all Constitution Alteration Bills must be approved by the people at referendum before they can be submitted for the Royal Assent. See section 128 of the Constitution, p. 22.

The motion for third reading may be, but is not frequently, debated. The only amendment allowed is to omit "now" from the question "That this bill be now read a third time" and add "this day six months", which, if carried, finally disposes of the bill. This is rarely moved. When the question for the third reading is agreed to, the Clerk reads the title of the bill.

(vii) *Transmission to other House and Amendments there.* When a bill has passed the House, it is sent to the other House with a message signed by the President or Speaker, as the case may be, requesting the concurrence of the other House. The procedure is similar to that of the originating House, the bill going through first reading, second reading, committee and third reading stages. The other House may make amendments to the bill, in which case it is returned by message to the originating House asking concurrence in such amendments.

(viii) *Assent.* When a bill has finally passed both Houses, it is presented to the Governor-General for assent in the name and on behalf of Her Majesty. Amendments to the bill may be proposed by the Governor-General, but as a general rule any amendments recommended by His Excellency to Parliament (in practice, upon the advice of his Ministers) are of a formal or verbal nature, or such as to correct a mistake or omission or to clarify some provision. Upon assent being given, the bill becomes an Act of Parliament. Notification of the assent is inserted in the Commonwealth Gazette, and the Act is published by the Government Printer.\*

(ix) *Urgency.* If the consideration of a bill proceeded strictly in accordance with the Standing Orders, the introductory proceedings would take place at one sitting and the three readings would take place on separate subsequent days. The Standing Orders, however, may be suspended to permit the rapid passage of a bill, even through all stages on the same day, or it may be dealt with even more expeditiously by providing a time limit (commonly called "the Guillotine") within which the bill must be passed.

**6. The Committees of Supply and Ways and Means.**—The use of Committees of Supply, of Ways and Means, and of the Whole is usually uniform in the lower Houses of all British Parliaments and is based on the practice of the United Kingdom House of Commons, where the committee system was firmly established during the seventeenth century. It meant that the Commons could appoint its own chairman, and that deliberations could be more freely conducted than when the Speaker, who in early times was often the King's nominee, was in the Chair. Furthermore, debates in the House were recorded in the Journals, which the Sovereign often scrutinized. The setting up of committees was a successful attempt by the Parliament to secure freedom in its work without undue interference from the Crown. Previously, members of the House who opposed the wishes of the Sovereign were sometimes severely dealt with.

The Committee of Supply originated in 1620. The gradual transfer of the revenues and the civil list from the Crown to Parliament, and the requests from the Crown for funds, made the Committee of Supply a force in determining what sums the Parliament would grant the Crown. From these origins, we have the present-day Committee of Supply which grants to the Crown sums for services for a particular year.

The Committee of Ways and Means was established in 1641. Its purpose is to authorize payments from funds to meet the Supply granted, generally a grant from the Consolidated Revenue Fund. It is also the source for authorizing taxes or charges. (The Standing Orders Committee of the House of Representatives has recommended the abolition of these Committees and their associated complex financial procedures and the adoption of new simplified procedures appropriate to the modern needs of the House.)

**7. The Party System.**—Political parties are a part of the Australian Parliamentary system, and since federation many shades of political opinion have been represented in both Houses. Four parties are at present represented in the Parliament, plus one Independent.

Following British Parliamentary practice, the party commanding a majority in the popular (lower) house forms the government, or, as is the case at the moment, two parties (Liberal and Country Party) may combine to form a government.

The Government in the 24th Parliament consists of a Liberal-Country Party Coalition, which in the House of Representatives gives it a majority of one on the floor of the House after providing a Speaker.

---

\* See footnote on p. 69 relating to the Constitution Alteration bills.

The state of the parties in each House at the end of 1962 was:—

*Senate*—Liberal Party, 24; Country Party, 6; Australian Labor Party, 28; Australian Democratic Labour Party, 1; Independent, 1.

*House of Representatives*—Liberal Party, 45; Country Party, 17; Australian Labor Party, 62 (including Northern Territory and Australian Capital Territory members with restricted voting rights).

### § 3. Parliaments and Elections

1. *Commonwealth*.—(i) *Qualifications for Membership and for Franchise—Commonwealth Parliament*. Qualifications necessary for membership of either House of the Commonwealth Parliament are possessed by any British subject, twenty-one years of age or over, who has resided in the Commonwealth for at least three years and who is, or is qualified to become, an elector of the Commonwealth. Qualifications for Commonwealth franchise are possessed by any British subject, not under twenty-one years of age and not disqualified on other grounds, who has lived in Australia for six months continuously. Residence in a subdivision for a period of one month prior to enrolment is necessary to enable a qualified person to enrol. Enrolment and voting are compulsory except that the compulsory enrolment provisions do not relate to an aboriginal native of Australia. A member of the Defence Forces on service outside Australia who is a British subject not less than 21 years of age and has lived in Australia for six months continuously is entitled to vote at Commonwealth elections, whether enrolled or not.

The principal reasons for disqualification of persons otherwise eligible as members of either Commonwealth House are:—Membership of the other House, allegiance to a foreign power, being attainted of treason, being convicted and under sentence for any offence punishable by imprisonment for one year or longer, being an undischarged bankrupt or insolvent, holding office of profit under the Crown (with certain exceptions), or having pecuniary interest in any agreement with the public service of the Commonwealth except as a member of an incorporated company of more than 25 persons. Persons of unsound mind, attainted of treason, convicted and under sentence for any offence punishable by imprisonment for one year or longer, or persons who are holders of temporary entry permits under the Migration Act, or are prohibited immigrants under that Act, are excluded from the franchise. In the main, these or similar grounds for disqualification apply also to State Parliament membership and franchise.

(ii) *Commonwealth Parliaments and Elections* (see also § 2. The Parliament of the Commonwealth of Australia, on p. 65). From the establishment of the Commonwealth until 1949, the Senate consisted of 36 members, six being returned by each of the original federating States. The Constitution empowers Parliament to increase or decrease the size of the Parliament, and, as the population of the Commonwealth had more than doubled since its inception, the Parliament enacted legislation in 1948 enlarging both Houses of Parliament and providing a representation ratio nearer to the proportion which existed at Federation. Thus, the *Representation Act* 1948 provided that there shall be ten Senators from each State instead of six, increasing the total to 60 Senators.

In accordance with the Constitution, the total number of members of the House of Representatives must be as nearly as practicable double that of the Senate. Consequently, in terms of the Constitution and the *Representation Act* 1905–1938, from the date of the 1949 elections the number of members in the House of Representatives was increased from 74 to 121 (excluding the members for the internal Territories). As the States are represented in the House of Representatives on a population basis, the numbers were increased as follows:—New South Wales—from 28 to 47; Victoria—from 20 to 33; Queensland—from 10 to 18; South Australia—from 6 to 10; and Western Australia—from 5 to 8. Tasmania's representation remained at 5 and the total was increased from 74 to 121. The increase in the number of members of Parliament necessitated a redistribution of seats and a redetermination of electoral boundaries. This was carried out by Distribution Commissioners in each State on a quota basis, but taking into account community or diversity of interest, means of communication, physical features, existing boundaries of divisions and subdivisions, and State electoral boundaries.

The population as disclosed by the Census taken on 30th June, 1954, necessitated a further alteration in representation in the House of Representatives in respect of New South Wales, South Australia, and Western Australia. Representation as from the general election for the House of Representatives on 10th December, 1955, is New South Wales 46, Victoria 33, Queensland 18, South Australia 11, Western Australia 9, Tasmania 5, the total

number of members (excluding the members for the internal Territories) being increased from 121 to 122. A redistribution of the States into electoral divisions was effected by Distribution Commissioners appointed for each State.

The population as disclosed by the Census taken on 30th June, 1961, necessitated further representational changes. New South Wales representation will be 45, Victoria 34, Queensland 17, and Western Australia 8. These changes will become effective for the next general election if the necessary redistribution of the States into electoral divisions has been proclaimed.

Since the general election of 1922, the Northern Territory has been represented by one member in the House of Representatives. The *Australian Capital Territory Representation Act* 1948 gave similar representation to the Australian Capital Territory as from the elections of 1949. The members for the Territories may join in the debates but are not entitled to vote, except on any proposed law which relates solely to the respective Territories, on a motion for the disallowance of any ordinance of the Territory or on any amendment to such motion, or on a motion for the disallowance of a regulation under an ordinance. The Commonwealth Parliament, however, when providing for a Legislative Council for the Northern Territory in 1947, relinquished the power to disallow ordinances for that Territory. As from the date of establishment of the Legislative Council, power to disallow ordinances was vested in the Governor-General in Council. In certain cases, ordinances passed must be reserved for the pleasure of the Governor-General.

The Constitution provides for a minimum of five members for each original State. Members of the House of Representatives are elected for the duration of the Parliament, which is limited to three years. At elections for Senators, the whole State constitutes the electorate. For the purpose of elections for the House of Representatives, the State is divided into single electorates corresponding in number with the number of members to which the State is entitled. Further information regarding the Senate and the House of Representatives is given in earlier issues of the Official Year Book. See also § 2. The Parliament of the Commonwealth of Australia, p. 65.

There have been twenty-three complete Parliaments since Federation. Until 1927, the Parliament met in Melbourne; it now meets in Canberra, the first meeting at Parliament House, Canberra, being opened by the late King George VI., then Duke of York, on 9th May, 1927.

The twenty-third Parliament opened on 17th February, 1959, and was dissolved on 2nd November, 1961. Elections for both Houses were held on 9th December, 1961, and particulars of electors and voting are given in the following table.

The system of voting for the House of Representatives is preferential. Until 1948, voting for the Senate was also preferential, but the *Commonwealth Electoral Act* 1948, introduced with the *Representation Act* 1948 to enlarge the Commonwealth Parliament (see p. 71), changed the system of scrutiny and counting of votes in Senate elections from preferential to that of proportional representation. For a description of the system, see Official Year Book No. 38, pages 82-3.

#### COMMONWEALTH ELECTIONS, 9th DECEMBER, 1961

Particulars	Electors enrolled			Electors who voted			Percentage of electors who voted		
	Males	Females	Total	Males	Females	Total	Males	Females	Total
Senate ..	2,774,934	2,876,627	5,651,561	2,651,645	2,732,705	5,384,350	95.56	95.00	95.27
House of Representatives ..	2,796,742	2,895,622	5,692,364	2,670,801	2,749,747	5,420,548	95.50	94.96	95.22

The twenty-fourth Parliament opened on 20th February, 1962. For particulars of electors enrolled and of electors who voted in the several States and Territories at the various Commonwealth elections, see issue No. 48 and earlier Year Books.

(iii) *Commonwealth Referendums.* According to Section 128 of the Constitution, any proposed law for the alteration of the Constitution, in addition to being passed by an absolute majority of each House of Parliament, must be submitted to a referendum of the electors in each State, and must be approved also by a majority of the States and of the electors who voted, before it can be presented for Royal Assent. So far, 24 proposals have been

submitted to referendums and the consent of the electors has been received in four cases only, the first in relation to the election of Senators in 1906, the second and third in respect of State Debts—one in 1910 and the other in 1928—and the fourth in respect of Social Services in 1946. Details of the various referendums and the voting thereon were given in previous issues of the Official Year Book (*see* List of Special Articles preceding General Index to this volume), and a brief summary was given in Official Year Book No. 41 (p. 67).

2. *State Elections.*—(i) *Upper Houses.* The following table shows particulars of the voting at the most recent elections for the Upper Houses or Legislative Councils in the States of Victoria, South Australia, Western Australia and Tasmania. In New South Wales, members of the Legislative Council are elected at simultaneous sittings of the members of both Houses, in Queensland there has been no Legislative Council since 1922, and in Tasmania three members of the Council are elected annually (but four in each sixth year) and the Council cannot be dissolved as a whole.

STATE UPPER HOUSE ELECTIONS

State	Year of latest election	Electors enrolled—whole State			Contested electorates					
					Electors who voted			Percentage of electors who voted		
		Males	Fe-males	Total	Males	Fe-males	Total	Males	Fe-males	Total

(a) Not available.

(b) Total electors in contested districts.

Official Year Book No. 48 and earlier issues contain particulars of the voting at elections for both Upper and Lower State Houses in years prior to those shown above.

3. *The Parliament of New South Wales.*—The two Houses of Parliament are the Legislative Council (or Upper House) and the Legislative Assembly (or Lower House).

The Legislative Council consists of 60 members. At elections held every third year a group of 15 members is elected for 12 years. The electoral body comprises the members, for the time being, of the two Houses of Parliament, who record their votes by secret ballot at simultaneous sittings of both Houses. Casual vacancies are filled by a like election. Any man or woman who is entitled to vote at the election of members of the Legislative Assembly, and has been resident for at least three years in the Commonwealth of Australia, is eligible for election as a member of the Legislative Council. A proposal to abolish the Legislative Council was defeated at a referendum held on 29th April, 1961.

The Legislative Assembly, which is the more important House, consists of 94 members elected on a system of universal adult suffrage, by secret ballot, for a maximum period of three years. Adult British subjects, men and women, are qualified for enrolment as electors when they have resided in the Commonwealth for a period of six months, in the State for three months, and in any subdivision of an electoral district for one month preceding the date of claim for enrolment. Any person qualified to vote at any State election is eligible to be elected to the Legislative Assembly. Casual vacancies may be filled at by-elections.

Persons are disqualified either as parliamentary members or voters for reasons generally the same as those outlined on page 71.

Since the introduction of responsible government in New South Wales, there have been 39 complete Parliaments, the first of which opened on 22nd May, 1856, and was dissolved on 19th December, 1857, while the thirty-ninth was dissolved on 5th February, 1962. The fortieth Parliament opened on 10th April, 1962.

The Legislative Assembly elections of 1920, 1922, and 1925 were contested on the principle of proportional representation, but a reversion to the system of single seats and preferential voting was made at all later appeals to the people. The principle of one elector one vote was adopted in 1894, and that of compulsory enrolment in 1921. Compulsory voting was introduced at the 1930 election. The franchise was extended to women (*Women's Franchise Act*) in 1902, and was exercised by them for the first time in 1904.

**4. The Parliament of Victoria.**—Both of the Victorian legislative Chambers are elective bodies, but there is a considerable difference in the number of members of each House, and there was also, until the *Legislative Council Reform Act* 1950, a difference in the qualifications necessary for members and electors. The number of members in the Upper House is 34, two members being returned for each of the 17 provinces, and in the Lower House, 66, one member being returned for each electorate. In the Legislative Council, the tenure of the seat is for six years, except that one-half of the members who are elected for provinces at any general election for the Council are entitled to hold their seats for a period of only three years, one member for each of the 17 provinces retiring every third year. Members of the Legislative Assembly are elected for the duration of Parliament, which is limited to three years.

Qualifications for membership of the Legislative Council are possessed by any adult natural-born subject of the Queen, or by any adult naturalized for five years and resident in Victoria for two years. Entitlement for enrolment as an elector is extended to every adult natural-born or naturalized subject who has resided in Australia for at least six months continuously and in Victoria for at least three months and in any subdivision for at least one month immediately preceding the date of claim for enrolment. These qualifications for membership and electors apply also in respect of the Legislative Assembly. Reasons for disqualification follow the general pattern for Australia (see p. 71). Prior to 1951, property or certain professional or academic qualifications were required for membership of, and franchise for, the Legislative Council.

Since the introduction of responsible government in Victoria, there have been forty-one complete Parliaments, the first of which opened on 21st November, 1856, and closed on 9th August, 1859, while the forty-first was dissolved on 1st June, 1961. The forty-second Parliament was opened on 1st August, 1961.

Single voting is observed in elections held for either House, plural voting having been abolished for the Legislative Assembly in 1899 and for the Legislative Council in 1937. A preferential system of voting (see *Official Year Book* No. 6, p. 1182) was adopted for the first time in Victoria at the Assembly election held in November, 1911. The franchise was extended to women by the *Adult Suffrage Act* 1908, while voting at elections was made compulsory for the Legislative Assembly in 1926 and for the Legislative Council in 1935.

**5. The Parliament of Queensland.**—The Legislative Council in Queensland was abolished in 1922. The Legislative Assembly is composed of 78 members, each elected for a period of three years and each representing an electoral district. The State is divided into three zones—metropolitan, provincial cities and country, having 28, 12 and 38 electoral districts respectively. Prior to 1960 there were 75 members and electorates.

With certain exceptions, any person qualified to be enrolled for any electoral district is qualified for election to the Legislative Assembly. Any person not under the age of twenty-one years, who is a natural-born or naturalized British subject with continuous residence within Australia for six months, and in an electoral district for three months prior to making a claim for enrolment, is qualified to enrol as an elector unless disentitled on racial or other grounds. The classes of persons not qualified to be elected are similar to those for other Australian Parliaments (see p. 71), but in Queensland, Ministers of Religion are not qualified for election.

Since the establishment of responsible government in Queensland, there have been 35 complete Parliaments, the last of which was dissolved on 13th April, 1960. Opinions differ regarding the opening date of the first Queensland Parliament. According to the Votes and Proceedings of the Legislative Assembly, the House met for the first time on 22nd May, 1860, when the members were sworn and the Speaker elected. The Governor, however, was unable to be present on that date, but he duly attended on 29th May, 1860, and delivered the Opening Address. The thirty-sixth Parliament was opened on 23rd August, 1960.

The election of 1907 was the first State election in Queensland at which women voted, the right being conferred under the *Elections Acts Amendment Act 1905*. At the elections held in May, 1915, the principle of compulsory voting was introduced for the first time in Australia. A system of optional preferential voting operated for many years, but, in 1942, this was abolished and that of election of the candidate obtaining the highest number of votes in the electorate now operates.

6. **The Parliament of South Australia.**—In this State, there is a Legislative Council composed of 20 members and a House of Assembly with 39 members, both Chambers being elective. For the Legislative Council, the State is divided into five districts each returning four members. The term of office is six years, two members for each district retiring at the end of every three years. Thirty-nine districts return one member each to the House of Assembly; prior to 1938 there were 46 members representing nineteen districts. The term of office for the House of Assembly is three years.

Any person who is at least 30 years of age, is a British subject or legally made a denizen of the State and who has resided in the State for at least three years is qualified for membership of the Legislative Council. Qualifications for the Council franchise are that a person is at least 21 years of age, a British subject, an inhabitant of the State with residence for at least six months prior to the registration of the electoral claim, and that he or she has had certain war service, or possesses property qualifications relating to ownership, leaseholding, or inhabitant occupancy. Any person qualified and entitled to be registered as an elector for the House of Assembly is qualified and entitled for election as a member of that House. Qualifications for enrolment as an elector for the House of Assembly are that a person is at least 21 years of age, is a British subject, and has lived continuously in Australia for at least six months, in the State for three months and in an Assembly subdivision for one month immediately preceding the date of claim for enrolment. Provisions in the Constitution for disqualification from membership or from the franchise in respect of either House follow the usual pattern for Australia (see p. 71).

Since the inauguration of responsible government in South Australia, there have been 36 complete Parliaments, the first of which was opened on 22nd April, 1857. The thirty-sixth Parliament closed on 28th February, 1962, and the thirty-seventh was opened on 12th April, 1962. The duration of the twenty-eighth Parliament was extended from three to five years by the provisions of the *Constitution (Quinquennial Parliament) Act 1933*, but this Act was repealed by the *Constitution Act Amendment Act (No. 2) 1939*, and the three-year term was reverted to.

South Australia was the first of the States to grant women's suffrage (under the *Constitution Amendment Act 1894*), the franchise being exercised by women for the first time at the Legislative Assembly election on 25th April, 1896. Compulsory voting for the House of Assembly was first adopted at the 1944 election. A system of preferential voting is in operation.

7. **The Parliament of Western Australia.**—In this State, both Chambers are elective. For the Legislative Council, there are 30 members, each of the ten provinces returning three members. One member for each province retires at the end of every two years. At each biennial election, the member elected holds office for a term of six years, and automatically retires at the end of that period. The Legislative Assembly is composed of 50 members, one member being returned by each electoral district. Members of the Legislative Assembly are elected for three years.

Qualifications required for membership of the Legislative Council are the age of at least 30 years, residence in Western Australia for two years and being a natural-born British subject or naturalized for five years prior to election and resident in the State for that period. Qualifications required for Council franchise are the age of at least 21 years, residence in Western Australia for six months, being a natural-born British subject or naturalized for twelve months, and certain property qualifications relating to freehold, leasehold, or householder occupancy. Qualifications required for membership of the legislative

Assembly are the age of at least 21 years, residence in Western Australia for twelve months and being a natural-born British subject or naturalized for five years and resident in the State for two years prior to election. Qualifications required for the franchise are the age of at least 21 years, residence in Western Australia for six months and in an electoral district continuously for three months, and being a natural-born or naturalized British subject. Persons may be disqualified as members or voters for reasons similar to those for other Australian Parliaments (*see* p. 71).

Since the establishment of responsible government in Western Australia, there have been 23 complete Parliaments, the first of which was opened on 30th December, 1890. The twenty-third Parliament dissolved on 31st January, 1962, and the twenty-fourth was opened on 26th July, 1962. A preferential system of voting is in use in Western Australia.

Women's suffrage was granted by the Electoral Act of 1899. The first woman member to be elected to an Australian Parliament was returned at the 1921 election in this State. Voting for the Legislative Assembly was made compulsory in December, 1936, the first elections for which the provision was in force being those held on 18th March, 1939.

**8. The Parliament of Tasmania.**—In Tasmania, there are two legislative Chambers, the Legislative Council and the House of Assembly, both bodies being elective. In accordance with the *Constitution Act* 1946, the Council now consists of nineteen members, elected for six years and returned from nineteen divisions. Three members retire annually (except in the 1953 elections and in each sixth successive year thereafter, when four retire) and the Council cannot be dissolved as a whole. There are five House of Assembly divisions, corresponding to the Commonwealth electoral divisions, each returning seven members elected under a system of proportional representation which first came into force at the 1909 elections. By the *Constitution Act* 1936, the life of the Assembly was extended from three to five years.

Persons qualified for election to the Legislative Council must be at least 25 years of age and qualified to vote as Council electors, have been resident in Tasmania for a period of five years at any one time or at least two years immediately preceding the election, and be natural-born subjects of the Queen or naturalized for at least five years. An elector for the Council must be at least 21 years of age, a natural-born or naturalized subject and resident in Tasmania for a period of twelve months, with certain freehold or occupancy property qualifications, or the spouse of a person qualified to vote as the owner or occupier of property, or with certain academic, professional, defence force, or war service qualifications. For the House of Assembly, members must be at least 21 years of age, have been resident in Tasmania for a period of five years at any one time or for a period of two years immediately preceding the election, and be natural-born subjects of the Queen or naturalized for a period of five years. Electors must be at least 21 years of age, natural-born or naturalized subjects and resident in Tasmania for a period of six months continuously. Reasons for disqualification of members or voters are similar to those for other Australian Parliaments (*see* p. 71).

The first Tasmanian Parliament opened on 2nd December, 1856, and closed on 8th May, 1861. There have been 32 complete Parliaments since the inauguration of responsible government, the thirty-second having been dissolved on 9th April, 1959. The thirty-third Parliament was opened on 2nd June, 1959.

The suffrage was granted to women under the *Constitution Amendment Act* 1903 and compulsory voting for both Houses came into force on the passing of the *Electoral Act* in 1928. The system of voting is, for the Council, by single transferable vote, and for the Assembly, proportional representation by single transferable vote.

#### § 4. Administration and Legislation

**1. The Commonwealth Parliaments.**—The first Parliament of the Commonwealth was convened by proclamation dated 29th April, 1901, by His Excellency the Marquis of Linlithgow, then Earl of Hopetoun, Governor-General. It was opened on 9th May, 1901, by H.R.H. the Duke of Cornwall and York, who had been sent to Australia for that purpose by His Majesty the King. The Rt. Hon. Sir Edmund Barton, G.C.M.G., K.C., was Prime Minister.

The following table shows the number and duration of Parliaments since Federation.

## COMMONWEALTH PARLIAMENTS

Number of Parliament	Date of opening	Date of dissolution
First .. .. .	9th May, 1901 .. ..	23rd November, 1903
Second .. .. .	2nd March, 1904 .. ..	5th November, 1906
Third .. .. .	20th February, 1907 .. ..	19th February, 1910
Fourth .. .. .	1st July, 1910 .. ..	23rd April, 1913
Fifth .. .. .	9th July, 1913 .. ..	30th July, 1914(a)
Sixth .. .. .	8th October, 1914 .. ..	26th March, 1917
Seventh .. .. .	14th June, 1917 .. ..	3rd November, 1919
Eighth .. .. .	26th February, 1920 .. ..	6th November, 1922
Ninth .. .. .	28th February, 1923 .. ..	3rd October, 1925
Tenth .. .. .	13th January, 1926 .. ..	9th October, 1928
Eleventh .. .. .	9th February, 1929 .. ..	16th September, 1929
Twelfth .. .. .	20th November, 1929 .. ..	27th November, 1931
Thirteenth .. .. .	17th February, 1932 .. ..	7th August, 1934
Fourteenth .. .. .	23rd October, 1934 .. ..	21st September, 1937
Fifteenth .. .. .	30th November, 1937 .. ..	27th August, 1940
Sixteenth .. .. .	20th November, 1940 .. ..	7th July, 1943
Seventeenth .. .. .	23rd September, 1943 .. ..	16th August, 1946
Eighteenth .. .. .	6th November, 1946 .. ..	31st October, 1949
Nineteenth .. .. .	22nd February, 1950 .. ..	19th March, 1951(a)
Twentieth .. .. .	12th June, 1951 .. ..	21st April, 1954
Twenty-first .. .. .	4th August, 1954 .. ..	4th November, 1955
Twenty-second .. .. .	15th February, 1956 .. ..	14th October, 1958
Twenty-third .. .. .	17th February, 1959 .. ..	2nd November, 1961
Twenty-fourth .. .. .	20th February, 1962 .. ..	

(a) A dissolution of both the Senate and the House of Representatives was granted by the Governor-General, acting on the advice of the Cabinet and under section 57 of the Constitution.

2. **Governors-General and Commonwealth Ministries.**—(i) *Governors-General.* The following statement shows the names of the Governors-General since the inception of the Commonwealth.

## GOVERNORS-GENERAL

- Rt. Hon. JOHN ADRIAN LOUIS, EARL OF HOPETOUN (afterwards MARQUIS OF LINLITHGOW), P.C., K.T., G.C.M.G., G.C.V.O. From 1st January, 1901, to 9th January, 1903.
- Rt. Hon. HALLAM, BARON TENNYSON, P.C., G.C.M.G. From 17th July, 1902, to 9th January, 1903, (Acting).
- Rt. Hon. HALLAM, BARON TENNYSON, P.C., G.C.M.G. From 9th January, 1903, to 21st January, 1904.
- Rt. Hon. HENRY STAFFORD, BARON NORTHCOTE, P.C., G.C.M.G., G.C.I.E., C.B. From 21st January, 1904, to 9th September, 1908.
- Rt. Hon. WILLIAM HUMBLE, EARL OF DUDLEY, P.C., G.C.B., G.C.M.G., G.C.V.O. From 9th September, 1908, to 31st July, 1911.
- Rt. Hon. THOMAS, BARON DENMAN, P.C., G.C.M.G., K.C.V.O. From 31st July, 1911, to 18th May, 1914.
- Rt. Hon. SIR RONALD CRAUFURD MUNRO FERGUSON (afterwards VISCOUNT NOVAR OF RAITH), G.C.M.G. From 18th May, 1914, to 6th October, 1920.
- Rt. Hon. HENRY WILLIAM, BARON FORSTER OF LEFE, P.C., G.C.M.G. From 6th October, 1920, to 8th October, 1925.
- Rt. Hon. JOHN LAWRENCE, BARON STONEHAVEN, P.C., G.C.M.G., D.S.O. From 8th October, 1925, to 22nd January, 1931.
- Rt. Hon. SIR ISAAC ALFRED ISAACS, P.C., G.C.B., G.C.M.G., K.C. From 22nd January, 1931, to 23rd January, 1936.
- General the Rt. Hon. ALEXANDER GORE ARKWRIGHT, BARON GOWRIE, V.C., P.C., G.C.M.G., C.B., D.S.O., K.G.St.J. From 23rd January, 1936, to 30th January, 1945.
- His Royal Highness PRINCE HENRY WILLIAM FREDERICK ALBERT, DUKE OF GLOUCESTER, EARL OF ULSTER AND BARON CULLODEN, K.G., K.T., K.P., P.C., G.C.B., G.C.M.G., G.C.V.O., General in the Army, Air Chief Marshal in the Royal Air Force, One of His Majesty's Personal Aides-de-Camp. From 30th January, 1945 to 11th March, 1947.
- Rt. Hon. SIR WILLIAM JOHN MCKELL, G.C.M.G., Q.C. From 11th March, 1947, to 8th May, 1953.
- Field-Marshal SIR WILLIAM JOSEPH SLIM (afterwards VISCOUNT SLIM OF YARRALUMLA), K.G., G.C.B., G.C.M.G., G.C.V.O., G.B.E., D.S.O., M.C., K.St.J. From 8th May, 1953, to 2nd February 1960.
- Rt. Hon. WILLIAM SHEPHERD, VISCOUNT DUNROSSIL, P.C., G.C.M.G., M.C., K.St.J., Q.C. From 2nd February, 1960, to 3rd February, 1961.
- Rt. Hon. WILLIAM PHILIP, VISCOUNT DE L'ISLE, V.C., P.C., G.C.M.G., G.C.V.O., K.St.J. From 3rd August, 1961.

(ii) *Administrators.* In addition to the holders of the office of Governor-General listed above, certain persons have, from time to time, been appointed as Administrator of the Government of the Commonwealth during the absence from Australia or illness of the Governor-General. The following is a list of such appointments.

	Term of office
Rt. Hon. Frederic John Napier, Baron Chelmsford, K.C.M.G.	21st December, 1909, to 27th January, 1910
Lieut.-Colonel the Rt. Hon. Arthur Herbert Tennyson, Baron Somers, K.C.M.G., D.S.O., M.C.	3rd October, 1930, to 22nd January, 1931
Captain the Rt. Hon. William Charles Arcedeckne Vanneck, Baron Huntingfield, K.C.M.G., K.St.J.	29th March, 1938, to 24th September, 1938
Major-General Sir Winston Joseph Dugan, G.C.M.G., C.B., D.S.O.	5th September, 1944, to 30th January, 1945; 18th January, 1947, to 11th March, 1947
General* Sir John Northcott, K.C.M.G., C.B., M.V.O.†	19th July, 1951, to 14th December, 1951; 30th July, 1956, to 22nd October, 1956
General Sir Reginald Alexander Dallas Brooks, K.C.B., G.C.M.G., K.C.V.O., D.S.O. K.St.J.	8th January, 1959, to 16th January, 1959; 3rd February, 1961, to 3rd August, 1961; 5th June, 1962, to 4th October, 1962; 21st November, 1962, to 19th December, 1962

(iii) *Commonwealth Ministries.* (a) *Names and Tenure of Office, 1901 to 1963.* The following list shows the name of each Commonwealth Ministry to hold office since 1st January, 1901, and the limits of its term of office.

#### COMMONWEALTH MINISTRIES

- (i) BARTON MINISTRY, 1st January, 1901, to 24th September, 1903.
- (ii) DEAKIN MINISTRY, 24th September, 1903, to 27th April, 1904.
- (iii) WATSON MINISTRY, 27th April, 1904, to 17th August, 1904.
- (iv) REID-MCLEAN MINISTRY, 18th August, 1904, to 5th July, 1905.
- (v) DEAKIN MINISTRY, 5th July, 1905, to 13th November, 1908.
- (vi) FISHER MINISTRY, 13th November, 1908, to 1st June, 1909.
- (vii) DEAKIN MINISTRY, 2nd June, 1909, to 29th April, 1910.
- (viii) FISHER MINISTRY, 29th April, 1910, to 24th June, 1913.
- (ix) COOK MINISTRY, 24th June, 1913, to 17th September, 1914.
- (x) FISHER MINISTRY, 17th September, 1914, to 27th October, 1915.
- (xi) HUGHES MINISTRY, 27th October, 1915, to 14th November, 1916.
- (xii) HUGHES MINISTRY, 14th November, 1916, to 17th February, 1917.
- (xiii) HUGHES MINISTRY, 17th February, 1917, to 10th January, 1918.
- (xiv) HUGHES MINISTRY, 10th January, 1918, to 9th February, 1923.
- (xv) BRUCE-PAGE MINISTRY, 9th February, 1923, to 22nd October, 1929.
- (xvi) SCULLIN MINISTRY, 22nd October, 1929, to 6th January, 1932.
- (xvii) LYONS MINISTRY, 6th January, 1932, to 7th November, 1938.
- (xviii) LYONS MINISTRY, 7th November, 1938, to 7th April, 1939.
- (xix) PAGE MINISTRY, 7th April, 1939, to 26th April, 1939.
- (xx) MENZIES MINISTRY, 26th April, 1939, to 14th March, 1940.
- (xxi) MENZIES MINISTRY, 14th March, 1940, to 28th October, 1940.
- (xxii) MENZIES MINISTRY, 28th October, 1940, to 29th August, 1941.
- (xxiii) FADDEN MINISTRY, 29th August, 1941, to 7th October, 1941.
- (xxiv) CURTIN MINISTRY, 7th October, 1941, to 21st September, 1943.
- (xxv) CURTIN MINISTRY, 21st September, 1943, to 6th July, 1945.
- (xxvi) FORDE MINISTRY, 6th July, 1945, to 13th July, 1945.
- (xxvii) CHIFLEY MINISTRY, 13th July, 1945, to 1st November, 1946.

\* Lieutenant-General Sir John Northcott was granted honorary rank of General while administering the Government of the Commonwealth. † K.C.V.O., 1954.

COMMONWEALTH MINISTRIES—*continued*

- (xxviii) CHIFLEY MINISTRY, 1st November, 1946, to 19th December, 1949.  
 (xxix) MENZIES MINISTRY, 19th December, 1949, to 11th May, 1951.  
 (xxx) MENZIES MINISTRY, 11th May, 1951, to 11th January, 1956.  
 (xxxi) MENZIES MINISTRY, 11th January, 1956, to 10th December, 1958.  
 (xxxii) MENZIES MINISTRY, 10th December, 1958.

(b) *Names of Holders of Ministerial Office, to 31st December, 1962.* In Official Year Book No. 17, 1924, the names are given of each Ministry up to the Bruce-Page Ministry (9th February, 1923, to 22nd October, 1929), together with the names of the successive holders of portfolios therein, and issue No. 39 contains a list, commencing with the Bruce-Page Ministry, which covers the period between the date on which it assumed power, 9th February, 1923, and 31st July, 1951, showing the names of all persons who held office in each Ministry during that period.

This issue shows only particulars of the latest Menzies Ministry, as constituted on 31st March, 1962.

## MENZIES MINISTRY—from 10th December, 1958

(Portfolios from 4th August, 1962)

(The State in which each Minister's electorate is situated is shown in parenthesis.)

## \*Prime Minister—

THE RT. HON. SIR ROBERT MENZIES,  
K.T., C.H., Q.C., M.P. (Vic.).

## \*Minister for Trade—

THE RT. HON. J. McEWEN, M.P. (Vic.).

## \*Treasurer—

THE RT. HON. H. E. HOLT, M.P. (Vic.).

\*Vice-President of the Executive Council; and  
Minister for National Development—

SENATOR THE HON. SIR WILLIAM  
SPOONER, K.C.M.G., M.M. (N.S.W.).

## \*Minister for Defence—

THE HON. A. G. TOWNLEY, M.P. (Tas.).

## \*Minister for Territories—

THE HON. P. M. C. HASLUCK, M.P.  
(W.A.).

## \*Minister for Labour and National Service—

THE HON. W. McMAHON, M.P.  
(N.S.W.).

## \*Minister for Civil Aviation—

SENATOR THE HON. S. D. PALTRIDGE  
(W.A.).

## \*Postmaster-General—

THE HON. C. W. DAVIDSON, O.B.E.,

4. **Leaders of the Opposition, Commonwealth and State Parliaments.**—The Leader of the Opposition plays an important part in the Party system of government which operates in the Australian Parliaments. The following list gives the names of the holders of this position in each of the Parliaments in December, 1962.

**Leader of the Opposition, Commonwealth and State Parliaments—**

*Commonwealth*—The Hon. A. A. Calwell, M.P.

*New South Wales*—R. W. Askin, M.L.A.

*Victoria*—The Hon. C. P. Stoneham, M.P.

*Queensland*—The Hon. J. E. Duggan, M.L.A.

*South Australia*—F. H. Walsh, M.P.

*Western Australia*—The Hon. A. R. G. Hawke, M.L.A.

*Tasmania*—The Hon. W. A. Bethune, M.H.A.

5. **The Course of Legislation.**—The actual legislation by the Commonwealth Parliament during 1962 is indicated in alphabetical order in "The Acts of the Parliament of the Commonwealth of Australia passed during the year 1962 in the First Session of the Twenty-fourth Parliament of the Commonwealth, with Appendix, Tables and Index".

A chronological table of Acts passed from 1901 to 1962 showing how they are affected by subsequent legislation or lapse of time is also given, and, further, a table of Commonwealth legislation passed from 1901 to 1962 in relation to the several provisions of the Constitution is furnished in the same volume. Reference should be made to these for complete information.

6. **Legislation during 1962.**—The Acts passed by the Commonwealth Parliament during the year 1962 are listed hereunder. In most cases the title of the Act indicates the general scope of the Act, but in some instances brief explanatory notes have been added. Appropriate chapters of this Year Book should be referred to for further information which may be available there.

The total enactments of the Commonwealth Parliament for a number of years at fairly even intervals since 1901 show a general increase. Seventeen Acts were passed in 1901, 36 in 1914, 38 in 1927, 87 in 1939 and 108 in 1962.

*Commonwealth Legislation passed during 1962.*

*Air Navigation (Charges) Act* 1962 (No. 78) increased the charges payable by airlines by 10 per cent.

*Appropriation Act* (No. 2) 1961–1962 (No. 54) *Appropriation Act* 1962–1963 (No. 64).

*Appropriation (Works and Services) Act* (No. 2) 1961–1962 (No. 55); *Appropriation (Works and Services) Act* 1962–1963 (No. 65).

*Audit Act* 1962 (No. 74) amended the *Audit Act* 1901–1961 to sanction the charging of refunds of revenue under discretionary authority to the relevant appropriation.

*Australian Capital Territory Electricity Supply Act* 1962 (No. 76) established an authority to take over the generation, supply, and reticulation of electric power in the Australian Capital Territory.

*Australian Coastal Shipping Commission Act* 1962 (No. 87) amended the *Australian Coastal Shipping Commission Act* 1956 to increase the Commission's borrowing limits from £1 million to £5 million.

*Australian Universities Commission Act* 1962 (No. 28) amended the *Australian Universities Commission Act* 1959, increasing the number of members of the Commission from five to seven.

*Australian War Memorial Act* 1962 (No. 85) amended the *Australian War Memorial Act* 1952 by providing for management of the Memorial by a board of trustees in lieu of the board of management as previously constituted.

*Brigalow Lands Agreement Act* 1962 (No. 103) approved an agreement between the Commonwealth and the State of Queensland to provide assistance to the State for the development of 4.3 million acres of land for grazing beef cattle and developing the beef cattle industry.

*Broadcasting and Television Act* 1962 (No. 96).\*

*Civil Aviation (Carriers' Liability) Act* 1962 (No. 38) amended the *Civil Aviation (Carriers' Liability) Act* 1959 to give effect to the Guadalajara Convention for the unification of certain rules relating to international carriage by air performed by a person other than the contracting carrier.

*Coal Loading Works Agreement (Queensland) Act* 1962 (No. 45) provided for assistance by the Commonwealth to the State of Queensland of half the cost of constructing coal loading works at Gladstone, with a maximum of £200,000.

*Commonwealth Banks Act* 1962 (No. 3) amended the *Commonwealth Banks Act* 1959–1961 by increasing the capital of the Commonwealth Development Bank of Australia by £5 million.

*Commonwealth Electoral Act* 1962 (No. 31) amended the *Commonwealth Electoral Act* 1918–1961 by giving aboriginal natives the right to enrol and vote at Commonwealth elections.

*Commonwealth Employees Compensation Act* 1962 (No. 94)\*.

*Copper and Brass Strip Bounty Act* 1962 (No. 81) provided for a bounty of £45 per ton on the production of copper or brass strip for use in Australia.

*Customs Tariff* 1962 (No. 22); *Customs Tariff* (Nos. 2 to 5) 1962 (Nos. 32, 33, 60 and 71).

*Customs Tariff (Canada Preference)* 1962 (No. 34); *Customs Tariff (Canada Preference)* (No. 2) 1962 (No. 61).

*Customs Tariff (Federation of Rhodesia and Nyasaland Preference)* 1962 (No. 36).

---

\* These Acts amended existing legislation to extend the appropriate repatriation benefits to members of the Australian forces serving in the Republic of Viet Nam where they have been exposed to additional risk beyond that of normal peace-time service.

*Customs Tariff (New Zealand Preference) (Nos. 1-4) 1962 (Nos. 23, 35, 62 and 72).*

*Dairy Produce Export Charge Act 1962 (No. 48)* provided for the imposition of a charge to be levied and paid on all dairy produce exported from the Commonwealth.

*Dairy Produce Export Control Act 1962 (No. 49).*

*Dairying Industry Act 1962 (No. 46)* made provision for the payment of bounties on the production of butter, cheese, and certain other butter fat products.

*Defence Forces Retirement Benefits Act 1962 (No. 67)* adjusted the pension entitlements of the majority of the contributors to the Defence Forces Retirement Benefits Fund in respect of salary increases which have taken place since 1959.

*Derby Jetty Agreement Act 1962 (No. 88)* approved an agreement between the Commonwealth and Western Australia for financial assistance to the State towards the cost of construction of a new jetty at Derby.

*Estate Duty Assessment Act 1962 (No. 97).\**

*Excise Act 1962 (No. 37); Excise Tariff 1962 (No. 73).*

*Gold Mines Development Assistance Act 1962 (No. 102)* provided for additional assistance to the gold mining industry by payment to approved mines of allowances for expenditure on development. *Gold Mining Industry Assistance Act 1962 (No. 52)* extended the period of operation of the *Gold Mining Industry Assistance Act 1954-1961* for a further three years.

*Honey Industry Act 1962 (No. 105)* provided for the establishment of an Australian Honey Board with powers to engage in promotional and research activities and to regulate Australian exports of honey.

*Honey Levy Act (Nos. 1 and 2) 1962 (Nos. 106 and 107)* imposed a levy on honey produced in Australia and sold (No. 1) or used in the manufacture of other goods (No. 2).

*Honey Levy Collection Act 1962 (No. 108).*

*Income Tax and Social Services Contribution Act 1962 (No. 63); Income Tax and Social Services Contribution Assessment Act 1962 (No. 39); Income Tax and Social Services Contribution Assessment Act (No. 2) 1962 (No. 98).\**

*Income Tax and Social Services Contribution (Provisional Tax) Act 1962 (No. 15); Income Tax and Social Services Contribution (Rebate) Act 1962 (No. 14)* provided for a rebate of five per cent. of the tax otherwise payable by persons other than companies.

*International Wheat Agreement Act 1962 (No. 53)* gave approval to the signature and acceptance by Australia of the International Wheat Agreement adopted at Geneva in March, 1962.

*Loan Act 1962 (No. 19)* authorized the raising and expending of a sum not exceeding £60 million for defence purposes; *Loan Act (No. 2) 1962 (No. 79)* authorized the raising and expending of a sum not exceeding £118,328,000 for defence purposes.

*Loan (Housing) Act 1962 (No. 17)* authorized the raising and expending of a sum not exceeding £7.5 million for the purposes of housing; *Loan (Housing) Act (No. 2) 1962 (No. 70)* authorized the raising and expending of a sum not exceeding £45.9 million for the purposes of housing.

*Loan (International Bank for Reconstruction and Development) Act 1962 (No. 24)* authorized the raising of a loan from the International Bank for Reconstruction and Development in relation to certain works to be carried out by the Snowy Mountains Hydro-electric Authority and for purposes connected therewith.

---

\* These Acts amended existing legislation to extend the appropriate repatriation benefits to members of the Australian forces serving in the Republic of Viet Nam where they have been exposed to additional risk beyond that of normal peace-time service.

*Loan (Qantas Empire Airways Limited) Act 1962* (No. 59) approved the agreement between the Commonwealth and the Chase Manhattan Bank for a loan of \$4.6 million for the purchase by Qantas Empire Airways Limited of a Boeing aircraft, spare parts and equipment.

*National Health Act 1962* (No. 82) amended the hospital benefits provisions of the *National Health Act 1953–1961* in a number of ways, including the payment of a single benefit to insured patients in lieu of the former two-stage payment, the increase of pensioner benefits from 12s. a day to 36s. a day, and the provision of benefits of £1 a day for patients in convalescent and rest homes and infirmary sections of benevolent homes and aged persons homes regardless of whether they are insured with a hospital insurance fund. The Act also substituted the Australian Medical Association for the British Medical Association in various sections of the Act.

*Northern Territory (Administration) Act 1962* (No. 77) gave the Legislative Council for the Northern Territory power to define its privileges, immunities and powers other than its legislative powers.

*Patents Act 1962* (No. 84) amended the *Patents Act 1952–1960* by providing that an inventor may require publication of his specifications at any time after three months from the date of lodgment, and that whether asked by the inventor or not the Commissioner of Patents will in any case make the documents open for public inspection not later than eighteen months after lodgment.

*Pay-roll Tax Assessment Act 1962* (No. 41).

*Processed Milk Products Bounty Act 1962* (No. 47) provided for the payment of bounty on the export of goods (other than those covered by the *Dairying Industry Act 1962*) produced wholly or partly from cow's milk.

*Queensland Beef Cattle Roads Agreement Act 1962* (No. 104) approved an agreement between the Commonwealth and the State of Queensland relating to the construction of roads in that State to be used for the transport of beef cattle.

*Rayon Yarn Bounty Act 1962* (No. 50) extended the period of operation of the *Rayon Yarn Bounty Act 1954–1959* and provided for an increased rate of bounty in respect of rayon sold after 2nd May, 1962.

*Re-establishment and Employment Act 1962* (No. 92).\*

*Removal of Prisoners (Territories) Act 1962* (No. 69) amended the *Removal of Prisoners (Territories) Act 1923–1957* to validate the conditional release of prisoners on licence or criminal lunatics in certain circumstances.

*Repatriation Act 1962* (No. 75) amended the *Repatriation Act 1920–1961* to give uniformity to the date of operation of decisions allowing claims for war pension irrespective of whether the decision is allowed in the first instance or on appeal.

*Repatriation Act (No. 2) 1962* (No. 91).\*

*Repatriation (Far East Strategic Reserve) Act 1962* (No. 90).\*

*Repatriation (Special Overseas Service) Act 1962* (No. 89) provided benefits for certain members of the defence forces who have served on special service outside Australia (see also Acts marked\*).

*Sales Tax Act (Nos. 1 to 9) 1962* (Nos. 5 to 13).

*Sales Tax Assessment Act (No. 1) 1962* (No. 40).

*Sales Tax (Exemptions and Classifications) Act 1962* (No. 4).

---

\* These Acts amended existing legislation to extend the appropriate repatriation benefits to members of the Australian forces serving in the Republic of Viet Nam where they have been exposed to additional risk beyond that of normal peace-time service.

*Social Services Act* 1962 (No. 1) amended the *Social Services Act* 1947–1961 in respect of conditions of grant of invalid pensions to blind persons and provided for increased rates of unemployment and sickness benefit and for a higher level of permissible income for persons receiving such benefits.

*Social Services Act* (No. 2) 1962 (No. 95).\*

*States Grants Act* 1962 (No. 16); *States Grants (Additional Assistance) Act* 1962 (No. 20); *States Grants (Additional Assistance) Act* (No. 2) 1962 (No. 58); *States Grants (Special Assistance) Act* 1962 (No. 68); *States Grants (Universities) Act* 1962 (No. 51).

*Stevedoring Industry Act* 1962 (No. 66) amended the *Stevedoring Industry Act* 1956–1961 in matters affecting the registration of waterside workers, the varying or setting aside of the suspension of registration, medical boards to determine appeals against the cancellation or suspension of registration on medical grounds, entitlement to long service leave and payments by the Stevedoring Industry Authority on the death of a waterside worker.

*Stevedoring Industry Charge Act* 1962 (No. 18) amended the rate of the stevedoring industry charge to 3s. 4d. per man hour of employment.

*Stevedoring Industry Charge Assessment Act* 1962 (No. 44).

*Sugar Agreement Act* 1962 (No. 29) approved an agreement made between the Commonwealth and Queensland governments to regulate the production and marketing of sugar within the Commonwealth for a period of six years from 1st September, 1961.

*Sulphate of Ammonia Bounty Act* 1962 (No. 30) provided for the payment of a bounty of £2 a ton on domestic sales of sulphate of ammonia fertilizer to operate for three years from 1st April, 1962, with a limit of £225,000 per annum.

*Supply Act* 1962–1963 (No. 56); *Supply (Works and Services) Act* 1962–1963 (No. 57).

*Tariff Board Act* 1962 (No. 21) amended the *Tariff Board Act* 1921–1960 to provide, *inter alia*, for the appointment of special advisory authorities and, on the recommendation of such authorities, the imposition of temporary duties, or the temporary restriction of imports for a period of up to three months.

*Tariff Board Act* (No. 2) 1962 (No. 86) extended to the Tariff Board the authority to recommend quantitative restrictions in cases where the tariff alone would not be an appropriate means of protection.

*Tobacco Charge Assessment Act* 1962 (No. 43).

*War Service Homes Act* 1962 (No. 2) amended the *War Service Homes Act* 1918–1961 by increasing the maximum advance available to borrowers to £3,500.

*War Service Homes Act* (No. 2) 1962 (No. 93).\*

*Western Australia Grant (Beef Cattle Roads) Act* 1962 (No. 83) approved the grant of financial assistance to the State of Western Australia for the construction and improvement of roads to be used for the transport of beef cattle.

*Wheat Industry Stabilization Fund (Disposal) Act* 1962 (No. 80) provided for the disposal, by way of grants to the States, of the moneys standing to the credit of the Wheat Industry Stabilization Fund established by the *Wheat Industry Assistance Act* 1938.

*Wool Industry Act* 1962 (No. 99) created a statutory body, the Australian Wool Board, to bring under a single direction the functions previously performed by the Australian Wool Bureau, the Wool Research Committee, and the Australian Wool Testing Authority.

*Wool Tax Act* (Nos. 1, 1A, 2 and 2A) 1962 (Nos. 26, 100, 27 and 101).

*Wool Tax Assessment Act* 1962 (No. 25); *Wool Tax Assessment Act* (No. 2) 1962 (No. 42).

---

\* These Acts amended existing legislation to extend the appropriate repatriation benefits to members of the Australian forces serving in the Republic of Viet Nam where they have been exposed to additional risk beyond that of normal peace-time service.

## § 5. Commonwealth Government Departments

1. **General.**—In Year Book No. 37, a list appears of the Commonwealth Government Departments as they existed at 31st March, 1947. Since that date, there have been significant changes in the organization and functions of the Departments, and this information has, therefore, been revised and brought up to date in the following paragraphs. For each Department, particulars are given of the principal matters dealt with and the Acts administered by the Minister concerned as at the end of 1962.

2. **The Prime Minister's Department.**—(i) *Matters dealt with.* Inter-departmental co-ordination in governmental, administrative and economic affairs; Cabinet; Cabinet and Cabinet Committee Secretariat; ceremonial; functions of State and government hospitality; communications with State governments; Premiers' Conferences and other conferences as called by the Prime Minister; Federal Executive Council; Royal Commissions; Constitutional Instruments; administrative arrangements; Table of Precedence Honours; Australian High Commission in Britain; Commonwealth Office of Education; Commonwealth Grants Commission; Australian Universities Commission; Commonwealth Archives Office; Commonwealth Literary Fund; Historic Memorials Committee; Art Advisory Board; preparation and publication of "Commonwealth of Australia Gazette" and the "Commonwealth of Australia Directory."

(ii) *Acts Administered.* *Broadcasting and Television Act 1942–1962; Broadcasting and Television Stations Licence Fees Act 1956; Oversea Telecommunications Act 1946–1958; Parliamentary Proceedings Broadcasting Act 1946–1960; Post and Telegraph Act 1901–1961; Post and Telegraph Rates Act 1902–1959; Wireless Telegraphy Act 1905–1950.*

14. **The Department of the Interior.**—(i) *Matters dealt with.* Accommodation of Commonwealth Departments; developmental planning and administration of the Australian Capital Territory, with the exception of health and justice; Australian Official War History 1939–1945; Australian War Memorial; civil defence; conveyance of Members of Parliament and others; elections and franchise; Australian Capital Territory electricity supply; forestry and timber; ionospheric prediction service; acquisition and leasing of land for Commonwealth purposes; meteorology; national memorials; Australian Capital Territory police; management of Commonwealth property; publicity; news and information; Australian Capital Territory soil erosion; land, engineering and topographical surveys; war graves.

(ii) *Acts Administered.* *Australian Capital Territory Representation Act 1948–1959; Australian War Memorial Act 1925–1952; Commonwealth Electoral Act 1918–1961; Defence (Transitional Provisions) Act 1946–1951; and Defence Transition (Residual) Provisions Act 1952, insofar as it relates to National Security (General) Regulations 54, 55AA, 55A, 60B, 60G and 60I–60M; Darwin Lands Acquisition Act 1945; Forestry and Timber Bureau Act 1930–1953; Jervis Bay Territory Acceptance Act 1915–1955; Lands Acquisition Act 1955–1957, except in relation to the Northern Territory; Meteorology Act 1955; Mount Stromlo Observatory Act 1956; National Capital Development Commission Act 1957–1960; Referendum (Constitution Alteration) Act 1906–1936; Representation Act 1905–1938; Representation Act 1948–1949; Seat of Government Acceptance Act 1909–1955; Seat of Government Acceptance Act 1922; Seat of Government Act 1908–1955; Seat of Government (Administration) Act 1910–1959; Seat of Government (Administration) Act 1930–1955; Senate Elections Act 1903–1948.*

15. **The Department of Labour and National Service.**—(i) *Matters dealt with.* Operation of the Commonwealth Employment Service, including—the provision of facilities for people seeking employment or to engage labour, the placement of migrants, the re-establishment in employment of ex-service personnel, employment aspects of Commonwealth schemes for the rehabilitation of the physically handicapped; as agent for the Department of Social Services, the receipt of claims for unemployment and sickness benefit; preference to ex-service personnel; analysis, interpretation, and provision of information on the labour market and changes in employment; registers of scientific personnel; formulation of industrial relations policy; conciliation and arbitration in relation to industrial disputes with special responsibilities for the coal, stevedoring and maritime industries; provision of a channel of communication between the government and industrial organizations of employers and workers; co-ordination of industrial matters affecting Commonwealth departments and agencies; advice and information on awards and industrial matters, industrial intelligence service, and production of Industrial Information Bulletin; Commonwealth Arbitration Inspectorate; international labour relations with special responsibilities in relation to the International Labour Organization; vocational and pre-vocational training for ex-service personnel, members of the Forces, the physically handicapped and for other Commonwealth purposes; assisting in the development and introduction of industry training; promotion of productivity groups in industry and commerce; investigation into, and the provision of advice and information on physical working conditions in industry, personnel practice, and industrial food services; inspection of departmental food services and the operation of food services for the Australian Stevedoring Industry Authority and other Commonwealth agencies; Commonwealth Hostels policy issues; liaison with State Labour Departments generally and through the Departments of Labour Advisory Committee; apprenticeship including liaison with State Apprenticeship and Technical Education Authorities through the Australian Apprenticeship Advisory Committee; Secretariat for the Ministry of Labour Advisory Council.

(ii) *Acts Administered.* *Coal Industry Act 1946–1958, Part V.; Coal Industry Act 1951–1956; Coal Industry Act 1955; Coal Industry (Tasmania) Act 1949, Part V.; Conciliation and Arbitration Act 1904–1961, except to the extent to which that Act is administered by the Attorney-General; National Service Act 1951–1957; National Service (Discharge of Trainees) Act 1960; Public Service Arbitration Act 1920–1960; Re-establishment and Employment Act 1945–1959, Divisions 1, 2, 3 (excluding section 43 and section 44 in relation to section 43) and 5 of Part II., Part III. in relation to industrial and professional training (other than university, university-type and rural training), Division 1 of Part XI., insofar as it extends the foregoing, Division 2 of Part XI., and Part XII. to the extent to which it applies or may be applied in relation to the foregoing; States Grants (Coal Mining Industry Long Service Leave) Act 1949–1961; Stevedoring Industry Act 1954–1956; Stevedoring Industry Act 1956–1961; Tradesmen's Rights Regulation Act 1946–1958.*

16. **The Department of Shipping and Transport.**—(i) *Matters dealt with.* Control and maintenance of coastal lights and other aids to navigation on the ocean highways of the Australian coastline; control of navigation services such as seamen's compensation, prevention of obstructions on shipping routes and fishing grounds, manning of ships, accommodation for ships' crews, welfare of seamen, maintenance of ships' gear, examination of masters, officers and engineers; Courts of Marine Inquiry; prevention of pollution of the sea by oil; shipping, including the licensing of vessels engaging in the Australian coasting trade; chartering of ships for defence purposes; shipbuilding, covering the provision of expert advice, design and purchasing facilities, supervision over construction, and other administrative and technical services; stowage and movement of explosives and dangerous cargoes at Australian ports; operation of the Point Wilson Explosives Jetty, Victoria; administration of Standardization of Railways Agreements and the Railways Equipment Agreement (South Australia); administration of Commonwealth assistance to States for road construction, roads of access to Commonwealth properties; Australian Transport Advisory Council and its ancillary committees—the Australian Road Traffic Code Committee, the Australian Motor Vehicle Standards Committee, the Australian Road Safety Council.

(ii) *Acts Administered.* *Australian Coastal Shipping Agreement Act 1956; Australian Coastal Shipping Commission Act 1956; Beaches, Fishing Grounds, and Sea Routes Protection Act 1932–1961 (except section 3); Brachina to Leigh Creek North Coalfield Railway Act 1950–1952; Colonial Light Dues Legislation Repeal Act 1960; Commonwealth Aid Roads Act 1954–1956; Commonwealth Aid Roads Act 1959; Commonwealth Railways Act 1917–1960; Explosives Act 1952–1961; Grafton to South Brisbane Railway Act 1924–1930; Kalgoorlie to Port Augusta Railway Act 1911–1950; Leigh Creek North Coalfield to Marree (Conversion to Standard Gauge) Railway Act 1954; Lighthouses Act 1911–1961; Navigation Act 1912–1961; Northern Territory Railway Extension Act 1923–1950; Oodnadatta to Alice Springs Railway Act 1926–1950; Pollution of the Sea by Oil Act 1960; Pine Creek to Katherine River Railway Act 1913–1950; Port Augusta to Alice Springs Railway (Alteration of Route) Act 1950; Port Augusta to Port Pirie Railway Act 1935–1950; Railway Agreement (Western Australia) Act 1961; Railway Equipment Agreement (South Australia) Act 1961; Railway Standardization (New South Wales and Victoria) Agreement Act 1958; Railway Standardization (South Australia) Agreement Act 1949; Railways (South Australia) Agreement Act 1926; Sea-carriage of Goods Act 1924; Seamen's Compensation Act 1911–1960; Seamen's War Pensions and Allowances Act 1940–1961 (except Part III. and Parts I., II., and VI. to the extent to which they apply to Part III.); Seat of Government Railway Act 1928; Stirling North to Brachina Railway Act 1952–1954; Supply and Development Act 1939–1948, insofar as it concerns the building, repair and maintenance of merchant ships and the building, extension, alteration, repair and maintenance of shipyard drydocking, and repair facilities for merchant ships.*

17. **The Department of Works.**—(i) *Matters dealt with.* Design, estimate of cost, supervision and execution of all architectural and engineering works (both capital and maintenance) for the Commonwealth Government and such other works as may be requested by a State, or an authority of the Commonwealth or of a State; inspection of all works and advice to the Department concerned as to necessary maintenance and the estimated cost of such maintenance; the formulation of proposals for the co-ordination of works projects independently initiated by two or more Departments; formulation of town planning proposals in areas controlled by the Commonwealth in collaboration with other responsible

Departments; technical advice in relation to Commonwealth Works programmes; investigation, planning, and development of such works of national importance as are referred to the Department by the Commonwealth Government; technical advice to the Commonwealth in relation to works of a State, or of an authority of a State in which the Commonwealth has a direct financial interest, and, if so directed by the Commonwealth Government, the design or execution of those works; collaboration with Commonwealth and State Departments and authorities and local authorities on regional and town planning insofar as it affects Commonwealth works; the submission to the Defence Services of works proposals or works plans (other than Defence Works) for which the Commonwealth is wholly or partially responsible, and which the Department considers may have strategic significance; collaboration in research carried out by the Commonwealth and State Departments or authorities in relation to works and the circulation of relevant data to interested Departments or authorities; planning and conduct of such further research as the Department considers necessary in relation to matters affecting the planning, design and execution of works.

(ii) *Acts Administered.* Nil.

18. **The Department of Civil Aviation.**—(i) *Matters dealt with.* Ensuring the safety and promoting the development of civil aviation, implementation of standards and recommended practices adopted in pursuance of the Chicago convention; exercise of the powers and functions vested in "Commonwealth Authorities" by virtue of the uniform State Air Navigation Acts; negotiation and administration of agreements with airline operators concerning the operation of air services, carriage of mail and other matters; negotiation and administration of international air transport agreements and the regulation of international flights and air services; assisting in the formulation of policy relating to airlines which are authorities of the Commonwealth or in which the Commonwealth is a shareholder, administration of financial arrangements in relation to airlines and rationalization of aircraft fleets; registration and marking of aircraft, determining airworthiness requirements for aircraft and the issue of Certificates of Airworthiness, Certificates of Type Approval and supervision of aircraft design; licensing of pilots, navigators, radio operators, flight engineers, and aircraft maintenance engineers and technicians and supervision of the work of licensed personnel; issue of approvals for export of aircraft and of permits for import of aircraft, licensing of flying schools and training organizations and supervision of their activities; provision, operation and maintenance of aeronautical communications system for communication between aircraft and the ground and between ground stations; determining requirements as to maintenance and contents of Logs and Log Books; provision, operation and maintenance of air navigation facilities, functional design, operation, and maintenance of aerodromes and related facilities and arranging for their provision in collaboration with other responsible Departments; control of buildings and marking of obstructions likely to endanger air navigation in the vicinity of aerodromes; development of business concessions at airports; licensing and authorization of places for use as aerodromes; establishment and operation of an air traffic control service for the purpose of preventing collisions, and controlling the movement of aircraft so as to ensure an orderly flow of air traffic and the safety of aircraft operations; specifying the meteorological services necessary for promoting the safe, economic and regular operations of aircraft, and making arrangements for their provision with other Departments; arranging for the establishment and operation of a search and rescue service; establishment and conduct of an aeronautical information service; approval of fares and freight rates and time-tables for airline operations; determining the Rules of the Air and general conditions of flight over Australian territory; licensing of air service operations and liaison with State transport licensing authorities as appropriate; suspension and cancellation of licences and certificates and constitution of boards of review; investigation of aircraft accidents, incidents and defects; enforcement of safety regulations and institution of summary prosecutions; imposition, variation and collection of charges in respect of the use by aircraft of aerodromes, air route and air way facilities, meteorological services and search and rescue services; control of surface traffic in airports; examination and analysis of costs, revenue and other financial aspects of air transport and other forms of civil aviation and preparation of statistics relating thereto; liaison with international civil aviation organizations and representation thereon; participation in the development of international conventions regulating the economic and legal aspects of air navigation.

(ii) *Acts administered.* *Airlines Agreements Act 1952–1961; Airlines Equipment Act 1958; Air Navigation Act 1920–1961; Air Navigation (Charges) Act 1952–1960; Airports (Business Concessions) Act 1959; Airports (Surface Traffic) Act 1960; Australian National Airlines Act 1945–1961; British Commonwealth Pacific Airlines Agreement Act 1947; Civil Aviation Agreement Act 1952–1957; Civil Aviation Agreement Act 1957; Civil Aviation (Carriers' Liability) Act 1959–1962; Civil Aviation (Damage by Aircraft) Act 1958.*

19. **The Department of Social Services.**—(i) *Matters dealt with.* Age, invalid and widows' pensions; wives' and children's allowances; supplementary assistance for age, invalid and widow pensioners; funeral benefits for age pensioners; maternity allowances and child endowment; unemployment, sickness and special benefits; the Commonwealth Rehabilitation Service; Reciprocal Agreements on Social Security with Great Britain and with New Zealand; compassionate allowances on a discretionary basis for persons in necessitous circumstances who are unable to qualify for pensions and benefits under the Social Services Act. On behalf of other Departments—the assessment and payment of tuberculosis allowances; the payment of war and service pensions, Commonwealth superannuation, Commonwealth Literary Fund Allowances and Act of Grace payments; pensions and allowances on behalf of oversea Governments; the issue of entitlement cards for the Pensioner Medical Service and certification of medical eligibility for sales tax exemption on the purchase of vehicles and parts by certain classes of disabled civilians; grants to eligible charitable organizations towards the capital cost of homes for the aged, and grants to State government and voluntary agencies to encourage emergency house-keeper services.

(ii) *Acts Administered.* *Social Services Act 1947–1962*; *Aged Persons Homes Act 1954–1957*; *Defence (Transitional Provisions) Act 1946* (Section 13); certain parts of *Re-establishment of Employment Act*.

20. **The Repatriation Department.**—(i) *Matters dealt with.* General administration of *Repatriation Act* and associated legislation which provide pensions, allowances, medical care and other benefits for entitled ex-servicemen, and dependants, of the 1914–18 War, the 1939–45 War, the Korea and Malaya Operations, service with the Australian component of the British Commonwealth Strategic Reserve, for merchant seamen of the 1939–45 War and for native members of the Forces in the Torres Strait Islands; investigation and determination of claims for acceptance of disabilities as due to war service; administration of war pensions, allowances, service pensions and miscellaneous forms of assistance; administration of education and training schemes and associated benefits, namely the Soldiers' Children Education Scheme, the Korea-Malaya Training Scheme and the Disabled Members' and Widows' Training Scheme; provision of medical and dental care for entitled ex-servicemen and eligible dependants of deceased ex-servicemen, including the Local Medical Officer scheme, in-patient and out-patient treatment, the supply of artificial limbs, surgical aids and appliances; administration of Repatriation general hospitals, sanatoria, auxiliary hospitals, out-patient clinics and artificial limb and appliance centres; provision of medical treatment for serving members of the Forces by agreement with the Service Departments; payment of pensions and provision of medical treatment for ex-servicemen of other British Commonwealth countries living in Australia, by agreement with the governments of the countries concerned; administrative arrangements for War Pensions Entitlement Appeal Tribunals and Assessment Tribunals which are independent bodies responsible to the Minister.

(ii) *Acts Administered.* *Repatriation Act 1920–1961*; *Repatriation (Far East Strategic Reserve) Act 1956*; *Repatriation Fund (Baillieu Gift) Act 1937*; *Interim Forces Benefits Act 1947–1950*; *Re-establishment and Employment Act 1945–1959* (in part); *Seamen's War Pensions Allowances Act 1940–1961* (in part); *Native Members of the Forces Benefits Act 1957* (in part).

21. **The Department of Immigration.**—(i) *Matters dealt with.* The administration of all aspects of immigration policy; the planning and development of immigration programmes; the negotiation and administration of bilateral assisted passage agreements and also unilateral assisted migration schemes; formulation of immigration policy in its relation to international organizations (Intergovernmental Committee for European Migration, United Nations High Commissioner for Refugees); all applications to enter Australia for permanent residence and for temporary stay (e.g. business and tourist visitors, students and other visitors); the conduct of surveys on the economic and sociological effects of immigration; Australian citizenship and British nationality; passports and travel documentation generally; emigration policy and legislation; aliens control (registration and policy); the social integration of migrants, including the provision of facilities for non-British migrants to learn English; the encouragement of community participation in integration activities through the Good Neighbour movement; the Australian Citizenship Convention; the operation of migrant reception and accommodation centres; prosecutions in respect of infringements of the *Migration Act 1958* and the *Aliens Act 1959*; implementation of the deportation provisions of the *Migration Act 1958*; control of immigration agents; administration of the Templar Trust Fund.

(ii) *Acts Administered.* *Aliens Act 1947–1959; Immigration (Guardianship of Children) Act 1946–1952; Migration Act 1958; Nationality and Citizenship Act 1948–1960; Nationality and Citizenship (Burmese) Act 1950; Passports Act 1938–1948; Temple Society Trust Fund Act 1949; War-time Refugees Removal Act 1949.*

22. **The Department of Health.**—(i) *Matters dealt with.* Maintenance of quarantine stations and quarantine surveillance of persons, animals, plants, and goods; the provision of hospital, medical and pharmaceutical benefits; the pensioner medical services; tuberculosis allowances and the payment of grants for free milk for school children, mental institutions, home nursing, and other subsidies; the control and maintenance of health laboratories, the National Biological Standards Laboratory, the Commonwealth Acoustic Laboratories, the Commonwealth X-ray and Radium Laboratory, the Commonwealth Bureau of Dental Standards, and the Australian Institute of Anatomy; administration of the *Therapeutic Substances Act*; maintenance of the School of Public Health and Tropical Medicine, including a Division of Industrial Hygiene, and the Australian Institute of Child Health, Sydney University; maintenance of a migration health service at migrant holding centres in Australia and strategic migration centres overseas; the conduct of health administration and health services in the Northern Territory and the Australian Capital Territory; co-operation with State administrations in planning and taking measures to improve public health, including the anti-tuberculosis campaign, anti-poliomyelitis campaign, national fitness, etc.; National Health and Medical Research Council; World Health Organization and international hygiene matters affecting the Commonwealth; the conduct of medical examinations under the Navigation, Social Services, Public Service and Superannuation Acts; the supervision of radio and television advertising and talks on medical matters; defence—the Central Medical Planning Committee.

(ii) *Acts Administered.* *Acoustic Laboratories Act 1948; Australian Institute of Anatomy Agreement Act 1924–1933; Australian Institute of Anatomy Agreement Act 1931; Beaches, Fishing Grounds and Sea Routes Protection Act 1932, section 3; Foot and Mouth Disease Act 1961; Home Nursing Subsidy Act 1956; Medical Research Endowment Act 1937; National Fitness Act 1941; National Health Act 1953–1961; Quarantine Act 1908–1961; States Grants (Mental Institutions) Act 1955; States Grants (Milk for School Children) Act 1950; Therapeutic Substances Act 1953–1959; Tuberculosis Act 1948; World Health Organization Act 1947.*

23. **The Department of Territories.**—(i) *Matters dealt with.* Administration of all aspects of government in the Territories of Norfolk Island, Papua and New Guinea, Nauru, Cocos (Keeling) Islands and Christmas Island, except defence and civil aviation; administration of all aspects of territorial government in the Northern Territory and of the Territory of Ashmore and Cartier Islands; development of the Territories; recruitment of staff for territorial public services and other territorial organizations; administration of territorial superannuation schemes and the New Guinea Civilian War Pension Scheme; procurement and shipment of stores and supplies for territorial administrations; matters connected with the Australian School of Pacific Administration, the Papua and New Guinea Copra Marketing Board, the British Phosphate Commissioners, the Christmas Island Phosphate Commission, and expropriated properties in Papua and New Guinea; matters relating to United Nations Trusteeship Agreements for New Guinea and Nauru; United Nations and South Pacific Commission and other international matters relating to the Territories of Norfolk Island, Papua and New Guinea and Nauru.

(ii) *Acts Administered.* *Ashmore and Cartier Islands Acceptance Act 1933–1938; Christmas Island Act 1958–1959; Christmas Island Agreement Act 1958; Christmas Island (Request and Consent) Act 1957; Cocos (Keeling) Islands (Request and Consent) Act 1954; Cocos (Keeling) Islands Act 1955–1958; Lands Acquisition Act 1955–1957, in relation to the Northern Territory; Native Members of the Forces Benefits Act 1957, in relation to native members of the forces who are or were aboriginal natives of the Territory of Papua or the Territory of New Guinea or of an island in the Pacific Ocean and their dependants; Nauru Island Agreement Act 1919; Nauru Island Agreement Act 1932; New Guinea Timber Agreement Act 1952–1953; Norfolk Island Act 1957; Norfolk Island Ordinances Act 1957; Northern Territory Acceptance Act 1910–1952; Northern Territory Administration Act 1910–1961; Northern Territory Representation Act 1922–1959; Papua and New Guinea Act 1949–1960; Papua and New Guinea (Validation of Appointments) Act 1953; Removal of Prisoners (Territories) Act 1923–1957; Treaty of Peace (Germany) Act 1919–1920, in relation to regulations concerning Papua and New Guinea (Treaty of Peace) Regulations, Part II.*

**24. The Department of Supply.**—(i) *Matters dealt with.* Defence research and development, including the operation of the Joint United Kingdom–Australia Long Range Weapons Project, and Australian research and development through the Weapons Research Establishment, the Aeronautical Research Laboratories, the Defence Standards Laboratories and associated establishments; manufacture, acquisition, provision and supply of munitions (including aircraft) and miscellaneous goods and services required by the defence forces; arrangement of contracts for the supply of goods and the performance of services; operation and management of factories, workshops and undertakings concerned in the production of munitions (including aircraft), clothing, canvas ware and other defence goods; operation and management of space tracking stations in Australia on behalf of the United States National Aeronautics and Space Administration; test firing of the launching rocket for the European Launcher Development Organization's communications satellite, using the facilities of the Woomera Rocket Range; acquisition, maintenance and disposal of strategic materials; planning and establishment of manufacturing facilities for the production of munitions and other defence goods; investigation and development of Australian sources of supply in connexion with defence; sale or disposal of surplus Commonwealth property other than land or buildings; provision of Commonwealth transport facilities outside the Australian Capital Territory; provision and control of stores required for or in connexion with matters administered by the Department of Supply, and general storage for other Departments as required; provision of security services within the Department; arrangements for ascertaining costs and control and limitation of profits in connexion with the production of munitions and other defence goods.

(ii) *Acts Administered.* *Supply and Development Act* 1939–1948, except to the extent to which that Act is administered by the Minister for Shipping and Transport.

**25. The Department of National Development.**—(i) *Matters dealt with.* Development of natural resources and public utilities; development of mining and non-ferrous metallurgical industries; geological and geophysical surveys and investigations; geographical and resources mapping; liquid and solid fuel industries; building industry; housing, including housing agreements between Commonwealth and States and War Service Homes.

(ii) *Acts Administered.* *Aluminium Industry Act* 1944–1956; *Aluminium Industry Act* 1960; *Atomic Energy Act* 1953–1958; *Coal Industry Act* 1946–1958 (except Part V); *Coal Industry (Tasmania) Act* 1949 (except Part V); *Coal Production (War Time) Act Repeal Act* 1948; *Commonwealth and State Housing Agreement Act* 1945–1955; *Commonwealth and State Housing Agreement Act* 1955; *Housing Agreement Act* 1956; *Housing Agreement Act* 1961; *Liquid Fuel (Defence Stocks) Act* 1949; *National Oil Proprietary Limited Agreement Act* 1937; *National Oil Proprietary Limited Agreement Act* 1939; *Oil Agreement Act* 1952; *Petroleum Search Subsidy Act* 1957–1958; *Petroleum Search Subsidy Act* 1959–1961; *Re-establishment and Employment Act* 1945–1959, Part VIII., Division 1 of Part XI., insofar as it extends to Part VIII., Part XII. to the extent to which it applies or may be applied in relation to the foregoing; *River Murray Waters Act* 1915–1958; *Snowy Mountains Hydro-electric Authority Act* 1960; *Snowy Mountains Hydro-electric Power Act* 1949–1958; *States Grants (Imported Houses) Act* 1950; *War Service Homes Act* 1918–1961; *War Service Homes Agreement Act* 1932; *War Service Homes (South Australia) Agreement Act* 1934; *War Service Homes Act* 1962.

## § 6. Cost of Parliamentary Government

The tables in this section are intended to show, in broad groups, the expenditure incurred in the operation of the Parliamentary system in Australia, comprising the Governor-General and Governors, the Ministries, the Upper and Lower Houses of Parliament, and electoral activities; they do not attempt to cover the expenditure on Commonwealth and State administration generally. Only broad groups are shown, but even these are not entirely comparable because of differences in accounting procedures and in the presentation of accounts. A very large part of the expenditure under the head of Governor-General or Governor represents official services entirely outside the Governor's personal interest, carried out at the request of the Government.

The following statements show this expenditure for the Commonwealth and for each State for the years ended 30th June, 1961 and 1962.

## COST OF PARLIAMENTARY GOVERNMENT

(a) Salaries and other expenses, including maintenance of house and ground. (b) Includes official establishments. 1960-61—£34,657, 1961-62—£39,664. (c) Salaries as ministers, and travelling and other expenses. (d) Allowances to members (including ministers' salary as member), travelling and other expenses. (e) Government contribution to Members' Superannuation Funds, printing, reporting staff, library, etc. (f) Services, furniture, stores, etc. (g) Salaries, cost of elections, etc.

Figures for total cost and cost per head during each of the years 1957-58 to 1961-62 are shown in the next table.

## COST OF PARLIAMENTARY GOVERNMENT

Year	C'wealth	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Total

## § 7. Government Employees

Information concerning the number of employees of Australian Government Authorities may be found in Chapter XII. Labour, Wages and Prices.

## CHAPTER IV

### LAND TENURE AND SETTLEMENT

#### § 1. Disposal of Crown Lands

**1. Land Legislation and Tenures.**—Descriptions of the land tenure systems of the several States and the internal Territories, and conspectuses of land legislation in force and of the systems of land tenure, have appeared in earlier issues of the Year Book (*see* List of Special Articles, etc., preceding General Index to this volume).

The land legislation in force in the several States may be classified broadly under five major types of land enactments, namely, Crown Lands Acts, Closer Settlement Acts, Mining Acts, Returned Service Personnel Settlement Acts, and Advances to Settlers Acts, but within the groupings there is, of course, a wide variety of individual Acts. In the two internal Territories, the legislation relating to lands is embodied in various Ordinances.

In each of the States, there is a Lands Department under the direction of a Minister who is charged generally with the administration of the Acts relating to the alienation, occupation and management of Crown Lands. In the Northern Territory, the Administrator, under the control of the Minister for Territories, is charged with the general administration of the Lands Ordinance and of Crown lands in the Northern Territory. In the Australian Capital Territory, the administration of the Leases Ordinances is in the hands of the Minister for the Interior.

In each of the States, there is also a Mines Department which is empowered under the several Acts relating to mining to grant leases and licences of Crown lands for mining and allied purposes. In the Northern Territory, there are several ordinances relative to mining.

As with land legislation, land tenures may be classified under broad headings; these indicate the nature of the tenure and comprise:—Free Grants and Reservations, Unconditional Purchases of Freehold, Conditional Purchases of Freehold, Leases and Licences under Land Acts, Closer Settlement, Leases and Licences under Mining Acts, and Settlement of Returned Service Personnel.

The following sections contain figures showing the extent of the different tenures in the several States and Territories, together with some general descriptive matter. Information in greater detail was provided in issue No. 48 and previous issues.

**2. Forms of Land Tenure.**—(i) *Free Grants and Reservations.* Provision exists in all States except Tasmania for the disposal of Crown lands for public purposes by free grants, and in all States for the temporary and or permanent reservation of Crown lands for public purposes. In the Northern Territory, any Crown lands not subject to any right of, or contract for, purchase, may be resumed for public purposes, and the whole or any portion of the lands resumed may be reserved for that purpose. In the Australian Capital Territory, under the *Seat of Government (Administration) Act 1910*, Crown lands may not be sold or disposed of for any estate in freehold except in pursuance of some contract entered into before the commencement of that Act.

The following table shows the total areas reserved in each State (except Tasmania) and in the Northern Territory, and the grand totals, at the end of the years 1957 to 1961.

#### AREAS RESERVED

('000 Acres)

Year	N.S.W. (a)	Victoria (b)	Qld. (b)	S. Aust. (a)	W. Aust. (a)	Nor. Terr. (a)	Total (c)

1961.. ..	15,877	8,646	25,006	22,750	59,885	59,590	191,754

(a) At 30th June.  
not available.

(b) At 31st December.

(c) Excludes Tasmania, for which details are

Details of the purposes for which areas at the end of 1961, as shown above, were reserved are given hereunder.

*New South Wales.* For travelling stock, 5,049,592 acres; forest reserves, 1,557,468 acres; water and camping reserves, 784,053 acres; mining reserves, 1,018,785 acres; for recreation and parks, 685,820 acres; other reserves, 6,781,595 acres; total, 15,877,313 acres.

*Victoria.* For roads, 1,650,105 acres; water reserves, 316,268 acres; agricultural colleges, 8,434 acres; forest and timber reserves, 5,721,446 acres; mallee reserves, 410,000 acres; other reserves, 540,136 acres; total, 8,646,389 acres.

*Queensland.* Timber reserves, 3,023,741 acres; for State forests and national parks, 6,012,794 acres; aboriginal reserves, 6,543,381 acres; for streets, surveyed roads and stock routes, 3,832,223 acres; general reserves, 5,593,687 acres; total, 25,005,826 acres.

*South Australia.* Total area of surveyed roads, railways and other reserves, 22,749,925 acres, including 18,210,654 acres set apart as aboriginal reserves.

*Western Australia.* For State forests, 4,343,153 acres; timber reserves, 1,779,581 acres; other reserves, 53,762,628 acres; total, 59,885,362 acres.

*Northern Territory.* For aboriginal, defence and public requirements, 59,589,840 acres.

(ii) *Conditional and Unconditional Purchases of Freehold.* Crown lands in the States may be disposed of by unconditional purchase at public auction or by certain other forms of purchase (for details see Official Year Book No. 48, pp. 91-2), and conditional purchases of various types may also be made. In the Northern Territory, only 0.1 per cent. of the total area is alienated, the remainder being held under lease or licence, or reserved for various purposes or unoccupied. In the Australian Capital Territory, about 18 per cent. of the area is alienated or in process of alienation in consequence of contracts existing prior to the establishment of the Territory.

(iii) *Leases and Licences.* (a) *General.* Well over half the area of the States of New South Wales and South Australia and of the two Territories and more than four-fifths of that of Queensland are occupied under some form of lease or licence. In Victoria, only about one-ninth of the area is leased or licensed, more than half being alienated; in Western Australia, more than one-third is leased or licensed, most of the remainder being unoccupied; and in Tasmania only one-tenth is leased or licensed, while more than half the area of the State is occupied by the Crown or unoccupied, and the remainder alienated. Areas leased or licensed in the States are held under Crown lands Acts, closer settlement Acts, mining Acts, etc., and in the Territories under various Ordinances.

(b) *Land Acts and Ordinances.* The types of lease and licence which obtain under land legislation cover a wide range, and vary with each State or Territory. The following are examples:—grazing or pastoral, settlement and closer settlement, settlement purchase, conditional and conditional purchase, perpetual and Crown; however, the variations of these forms and the special forms of lease and licence which exist would extend this list considerably. Details of the various types in existence are given in Official Year Book No. 48, pp. 93-4, and some detail is included in the tables on pp. 106-108.

The following table shows the areas held under lease or licence other than mining and forestry in the States, the total under lease or licence for the Territories, and the grand totals, at the end of the years 1957 to 1961.

AREAS OCCUPIED UNDER LEASE OR LICENCE OTHER THAN MINING  
AND FORESTRY  
(’000 Acres)

Year	N.S.W. (a)	Vic. (b)	Q’land (b)	S. Aust. (a)	W. Aust. (a)	Tas. (a)	N.T. (a) (c)	A.C.T. (a) (c)	Total

(a) At 30th June.

(b) At 31st December.

(c) Leases and licences for all purposes.

(c) *Mining Acts and Ordinances.* In addition to the lands held under lease or licence under land legislation, there are also areas occupied under mining Acts for the purpose of prospecting or mining for gold and other minerals. Details of the various types of mining lease and licence are given in Official Year Book No. 48, pp. 94-5.

Areas occupied in the States at the end of the years 1957 to 1961 are shown in the following table.

AREAS OCCUPIED UNDER MINING ACTS AND ORDINANCES  
(<sup>0</sup>00 Acres)

Year	N.S.W. (a)	Victoria	Q'land (b)	S. Aust. (a) (b)	W. Aust. (c)	Tasmania (b)	N. Terr.	Total (d)
1957 ..	327	36	587	780	162	38	29	1,959

1961 ..	321	66	731	1,176	155	45	36	2,530

(a) Year ended 30th June.

(b) Excludes lands held under miners' rights and dredging claims.

(c) Excludes holdings under miners' rights.

(d) Excludes Australian Capital Territory, included in previous table.

(d) *Oil Prospecting or Exploring.* The following table shows for each year from 1957 to 1961 the areas occupied in each State under authorities to prospect or explore for petroleum. The legislation relating to the search for petroleum differs from State to State, and the terminology of, and the conditions applying to, the forms of authorization differ accordingly. The figures below relate to the exploratory stage of operations.

AREAS OCCUPIED UNDER AUTHORITIES TO PROSPECT OR EXPLORE  
FOR PETROLEUM  
(<sup>0</sup>00 Acres)

(a) Year ended 30th June.

(b) Not available.

(c) Excludes Northern Territory.

## § 2. Closer Settlement and War Service Settlement

1. *Closer Settlement.*—Particulars of the methods of acquisition and disposal of land for the closer settlement of civilians and returned service personnel (1914-18 War) in the several States are given in issues of the Official Year Book up to No. 22 (*see* No. 22, pp. 163-9), and the results of the operations of the several schemes have appeared in subsequent issues in considerable detail. However, the amalgamation in some States of closer settlement records with those of other authorities has since made it impossible to obtain up-to-date figures for those States and for Australia as a whole. Official Year Book No. 48 contains particulars as at 30th June, 1960 of the areas and costs for those States for which separate information is available (*see* p. 96).

2. *Settlement of Returned Service Personnel, 1939-45 War and Korea-Malaya Operations.*—(i) *General.* The War Service Land Settlement Scheme provides for the settlement on the land of eligible ex-servicemen from the 1939-45 War and the Korea-Malaya operations. Finance for capital expenditure under the scheme in South Australia, Western Australia and Tasmania and for special loans to New South Wales and Victoria is provided through *Loan (War Service Land Settlement) Acts*. Finance for other aspects

of the Scheme in all States is provided by annual parliamentary appropriation. The *States Grants (War Service Land Settlement) Act 1952* provides that the responsible Commonwealth Minister may make grants of financial assistance to the States under such terms as he may from time to time determine.

New South Wales, Victoria and Queensland agreed, at the inception of the Scheme, to find their own finance for the acquisition and development of properties. In 1954, Queensland abandoned the Scheme and made available for general settlement all unallotted lands held under it.

Detailed information about the agreements and the methods of operation and administration of the Scheme are contained in earlier Year Books (*see List of Special Articles, etc., preceding General Index to this volume*).

(ii) *Summary of Operations to 30th June, 1962.* The following table shows the operations of the War Service Land Settlement Scheme in each State up to 30th June, 1962.

### WAR SERVICE LAND SETTLEMENT

SUMMARY TO 30TH JUNE, 1962

State	Land acquired	Farms allotted		Farms in course of development		Other
		No.	Acres	No.	Acres	
New South Wales(a) ..	Acres 9,094,021	3,047	9,094,021	..	..	..
Victoria ..	b1,181,599	3,048	1,181,599	..	..	..
Queensland ..	398,524	470	218,640	..	..	(c) 179,884
South Australia ..	755,873	1,015	671,207	7	10,000	(d) 74,666
Western Australia ..	b2,059,472	1,001	1,934,281	26	(e) 125,191	..
Tasmania ..	(b) 446,761	515	414,661	81	32,100	..
<b>Total ..</b>	<b>13,936,250</b>	<b>9,096</b>	<b>13,514,409</b>	<b>114</b>	<b>167,291</b>	<b>254,550</b>

(a) In New South Wales, properties are regarded by the State as being allotted at the date of acquisition. Figures adjusted following review. (b) Figures adjusted following survey. Other land originally approved, but no longer required, has been disposed of outside the Scheme. (c) War Service Land Settlement was discontinued in 1954, and unallotted lands were made available for general settlement. (d) Will be surveyed on completion of projects under development. (e) This figure is subject to correction following the finalization of survey of large tracts of virgin crown land developed under the scheme.

(iii) *Expenditure.* The following table shows a dissection of the Commonwealth expenditure on War Service Land Settlement to 30th June, 1962.

### WAR SERVICE LAND SETTLEMENT (1939-45 WAR AND KOREA-MALAYA OPERATIONS): COMMONWEALTH EXPENDITURE TO 30th JUNE, 1962

(£'000)

Advances to States	N.S.W.	Vic.	Qld	S. Aust.	W. Aust.	Tas.	Total
For acquisition of land ..	..	..	..	3,457	3,483	2,515	9,455
For development and improvement of land ..	..	..	..	14,107	19,584	14,444	48,135
Special loans ..	6,771	7,199	..	..	..	..	13,970
Commonwealth contributions to excess cost over valuation ..	624	5,343	116	1,456	708	588	8,835
To provide credit facilities to settlers ..	..	..	..	9,426	18,103	4,622	32,151

<b>Total ..</b>	<b>8,853</b>	<b>13,933</b>	<b>650</b>	<b>30,226</b>	<b>43,708</b>	<b>22,616</b>	<b>119,986</b>

(iv) *Loans and Allowances (Agricultural Occupations) Scheme.* Full details of the measures taken for the re-establishment of ex-servicemen in rural occupations were given in an earlier Year Book (see List of Special Articles, etc., preceding General Index to this volume). These measures provide for a scheme of loans and allowances to assist ex-servicemen in establishing themselves in agricultural occupations.

The loans are made to eligible ex-servicemen for the purchase of land, effecting improvements on land, the acquisition of tools of trade, livestock, plant or equipment, the establishment of a co-operative business with other persons, reduction or discharge of a mortgage, bill of sale, etc. At 30th June, 1962, 14,307 loans had been approved and advances amounting to £10,175,645 had been made.

The allowances are payable only in respect of the period during which the income derived from the occupation by the ex-serviceman concerned is considered inadequate. At 30th June, 1962, 16,114 applications for allowances had been made, and the total amount paid in allowances was £2,276,597.

Official Year Book No. 48 contains details of the applications received and approved and the amounts involved for the individual States and Territories to 30th June, 1961 (see p. 98). There has been little subsequent change.

(v) *War Service Land Settlement Division—Total Expenditure.* The following table shows details of the total expenditure on various projects by the War Service Land Settlement Division from the commencement of operations to 30th June, 1962.

COMMONWEALTH WAR SERVICE LAND SETTLEMENT DIVISION:  
EXPENDITURE TO 30th JUNE, 1962  
(£'000)

Project	N.S.W.	Vic.	Qld	S. Aust.	W. Aust.	Tas.	Total Expenditure	Receipts and Re-payments	Net Expenditure
War Service Land Settlement expenditure from revenue or loan funds	8,853	13,933	650	30,227	43,708	22,615	119,986	35,698	84,288

(a) Includes expenditure on new loans of moneys repaid by borrowers. £10,000, and New Guinea, £7,000.

(c) Includes New Guinea, £1,000.

(b) Includes Northern Territory, £10,000, and New Guinea, £8,000.

(d) Includes Northern Territory,

### § 3. Alienation and Occupation of Crown Lands

1. *General.*—The figures in the previous parts of this chapter show separate particulars of various forms of land settlement. The following tables set out the position with regard to the tenure of land in each State, in the Northern Territory, and in the Australian Capital Territory during 1961. A summary for each State and Territory and for Australia as a whole is also included. Particulars for each year from 1951 to 1961 appear in *Primary Industries Bulletin* No. 55, Part I.—*Rural Industries*, page 1. The area occupied includes roads, permanent reserves, forests, etc. In some cases, lands which are permanently reserved from alienation are occupied under leases or licences, and have been included therein. Lands occupied under leases or licences for pastoral purposes are frequently held on short tenures only, and could thus be made available for settlement practically whenever required.

2. *New South Wales.*—The total area of New South Wales is 198,037,120 acres, of which 28.2 per cent. had been alienated at 30th June, 1961; 5.4 per cent. was in process of alienation; 57.1 per cent. was held under leases and licences; and the remaining 9.3 per cent. was unoccupied, or held by the Crown.

**ALIENATION AND OCCUPATION OF CROWN LANDS: NEW SOUTH WALES**  
**30th JUNE, 1961**  
**(Acres)**

Particulars	Area	Particulars	Area
1. Alienated .. .. .	55,767,025	3. Held under leases and licences— Homestead selections and grants Alienable leases, long-term and perpetual .. .. . Long-term leases with limited right of alienation .. .. . Other long-term leases .. .. . Short-term leases and temporary tenures .. .. . Forest leases .. .. . Mining and auriferous leases .. .. .	1,692,481 23,467,241 1,522,692 81,928,559 2,453,601 1,791,200 201,609
		<i>Total</i> .. .. .	113,057,383
2. In process of alienation— Conditional purchases .. .. . Closer settlement purchases .. .. . Soldiers' group purchases .. .. . Other forms of sale .. .. .	9,006,666 1,269,654 131,180 376,223	4. <i>Total</i> .. .. .	10,783,723	5. Total Area of State .. .. .	198,037,120

3. Victoria.—The total area of Victoria is 56,245,760 acres, of which 56.1 per cent. had been alienated up to the end of 1961; 2.6 per cent. was in process of alienation under deferred payments and closer settlement schemes; 11.5 per cent. was occupied under leases and licences; and 29.8 per cent. was unoccupied or held by the Crown.

**ALIENATION AND OCCUPATION OF CROWN LANDS: VICTORIA**  
**31st DECEMBER, 1961**  
**(Acres)**

Particulars	Area	Particulars	Area
1. Alienated .. .. .	31,531,121	3. Leases and licences held— Under Lands Department— Perpetual leases .. .. . Agricultural college leases .. .. . Other leases and licences .. .. . Temporary (yearly) grazing licences .. .. .	1,093,497 28,655 1,872 5,335,049
2. In process of alienation— Exclusive of mallee and closer settlement lands .. .. . Mallee lands (exclusive of closer settlement lands) .. .. . Closer settlement lands .. .. .	176,723 1,063,148 231,117	<i>Total</i> .. .. .	6,459,073
<i>Total</i> .. .. .	1,470,988	4. Occupied by the Crown or un- occupied .. .. .	16,784,578
		5. Total Area of State .. .. .	56,245,760

4. Queensland.—The total area of this State is 426,880,000 acres, of which, on 31st December, 1961, 6.1 per cent. was alienated; 0.5 per cent. was in process of alienation; and 86.3 per cent. was occupied under leases and licences. The remainder, 7.1 per cent., was either unoccupied or held as reserves or for roads.

**ALIENATION AND OCCUPATION OF CROWN LANDS: QUEENSLAND**  
**31st DECEMBER, 1961**  
**(Acres)**

Particulars	Area	Particulars	Area
1. Alienated .. .. .	26,031,736	3. Occupied under leases and licences—

		<i>Total</i> .. .. .	<i>145,751,699</i>
		4. Area unoccupied(b) .. .. .	81,323,438
2. In process of alienation .. .. .	488,428	5. Total Area of State .. .. .	243,244,800

(a) Mining leases and licences have also been issued over an area comprising 202,696,415 acres.

(b) Includes surveyed roads, railways and other reserves, salt water lakes, lagoons, and fresh water lakes.

6. Western Australia.—The total area of Western Australia is 624,588,800 acres, of which, at 30th June, 1961, 4.4 per cent. was alienated; 2.1 per cent. was in process of alienation; and 37.0 per cent. was occupied under leases and licences issued either by the Lands, Mines or Forests Departments. The balance of 56.5 per cent. was unoccupied.

**ALIENATION AND OCCUPATION OF CROWN LANDS: WESTERN AUSTRALIA**  
**30th JUNE, 1961**  
**(Acres)**

Particulars	Area	Particulars	Area
1. Alienated .. .. .	27,786,699	3. Leases and licences in Force—	
		(i) Issued by Lands Department—	
		Pastoral leases ..	220,128,193
		Special leases ..	4,608,621
		Leases of reserves ..	869,901
		Residential lots ..	4,564
		Perpetual leases ..	1,495,824
		(ii) Issued by Mines Department—	
		Gold-mining leases ..	18,098
		Mineral leases ..	40,401
		Miners' homestead leases ..	33,375
		(iii) Issued by Forests Department—

		<i>Total</i> .. .. .	<i>231,210,943</i>
		4. Area unoccupied .. ..	352,761,330
<i>Total</i> .. .. .	<i>12,829,828</i>	5. Total Area of State .. ..	<i>624,588,800</i>

7. **Tasmania.**—The total area of Tasmania is 16,778,000 acres, of which, at 30th June, 1961, 38.2 per cent. had been alienated; 1.3 per cent. was in process of alienation; 8.4 per cent. was occupied under leases and licences for either pastoral, agricultural, timber or mining purposes, or for closer settlement; while the remainder (52.1 per cent.) was unoccupied or reserved by the Crown.

**ALIENATION AND OCCUPATION OF CROWN LANDS: TASMANIA**  
**30th JUNE, 1961**  
**(Acres)**

Particulars	Area	Particulars	Area
1. Alienated .. .. .	6,403,018	3. Leases and licences— <i>continued</i>	
		(i) Issued by Lands Department— <i>continued</i>	
		Soldier settlement ..	44,659
		Short-term leases ..	585
		(ii) Issued by Mines Department ..	52,467
		<i>Total</i> .. .. .	<i>1,411,433</i>
		4. Area occupied by the Crown or unoccupied .. ..	8,752,024
		5. Total Area of State .. ..	<i>16,778,000</i>

8. **Northern Territory.**—The area of the Northern Territory is 335,116,800 acres, of which, at 30th June, 1961, only 0.1 per cent. was alienated; 53.4 per cent. was held under leases and licences; 17.8 per cent. was reserved for aboriginal, defence and public requirements; and the remaining 28.7 per cent. was unoccupied and unreserved.

The following shows the mode of occupancy of areas at 30th June, 1961:—alienated, 375,922 acres; leased—pastoral leases, 147,331,152 acres; other leases, licences and mission stations, 31,718,196 acres; total leased, 179,049,348 acres; reserved for aboriginal, defence and public requirements, 59,589,840 acres; unoccupied and unreserved, 96,101,690 acres; total, 335,116,800 acres.

9. **Australian Capital Territory.**—Alienated land of the Territory at the end of 1961 comprised 11.0 per cent. of the total area; land in process of alienation 6.9 per cent.; land held under lease and licence 48.7 per cent.; land otherwise occupied, including city tenures, 8.1 per cent.; and unoccupied 25.3 per cent.

The following are the particulars of land areas in the Australian Capital Territory at the end of 1961:—alienated 65,857 acres; in process of alienation 41,224 acres; leased—grazing, agricultural, etc., leases, 275,458 acres; grazing licences, 11,100 acres; otherwise occupied, including city area leases, 48,604 acres; total leased, 335,162 acres; unoccupied, 140,686 acres; total, 582,929 acres. Including the Jervis Bay area of 18,000 acres—6,266 acres leased and 11,734 acres otherwise occupied—the grand total for the whole Territory is 600,929 acres.

10. **Summary.**—The following table provides a summary for each State and Territory, and for Australia as a whole, of the alienation and occupation of Crown lands in 1961.

#### ALIENATION AND OCCUPATION OF CROWN LANDS, 1961

(a) Occupied by Crown; reserved; unoccupied; unreserved.  
31st December.

(d) Includes Jervis Bay area.

(b) At 30th June.

(c) At

### § 4. Advances to Settlers

1. **General.**—A detailed statement regarding the terms and conditions governing advances to settlers in the several States and the Northern Territory may be found in earlier issues of the Official Year Book (*see* List of Special Articles, etc., preceding General Index to this volume).

The summaries of loans and advances under State authorities in the following paragraphs are compiled from returns supplied by the various State government lending agencies in the several States. They include transactions in lands acquired under closer and soldier settlement schemes, but exclude balances owing on former Crown lands sold on the conditional purchase, etc., system. Advances made by general banking institutions in the course of their ordinary business are not included. For information on such advances *see* Chapter XX. *Private Finance*.

The amounts outstanding do not represent the actual differences between the total advances and settlers' repayments, for considerable remissions of indebtedness have been made in all States as a result of re-appraisements of land values and the writing down of debts. In general, they include both principal and interest outstanding.

A summary for Western Australia is not included, as practically the only governmental funds being made available are Commonwealth (*see* § 2 above).

In New South Wales and Victoria, expenditure on the acquisition, development and improvement of land for war service land settlement is provided for by the States, and particulars thereof are included in the respective summaries. In Queensland, no money is paid for the value of the land acquired, most land being occupied on lease from the Government, but advances in respect of improvements are included. In the other States, this expenditure is provided for by the Commonwealth, and particulars are included in § 2 above.

Loans (Agricultural Occupations) under the *Commonwealth Re-establishment and Employment Act* 1945 and certain advances for the purchase of wire-netting and for other purposes made from finance provided by the Commonwealth are included in the summaries following.

2. **New South Wales.**—The following table shows particulars respecting advances, etc., under State authorities to 30th June, 1961.

## ADVANCES TO SETTLERS, ETC.: NEW SOUTH WALES

6. **Western Australia.**—The operations prior to 1945 covered in this section related to moneys made available through, or by, the old Agricultural Bank and other Government Departments for the purpose of agricultural development. On 1st October, 1945, however, the Agricultural Bank was reconstituted as the Rural and Industries Bank of Western Australia, and was given authority to operate in similar manner to the associated banks. Certain securities in the books of the old bank were taken over by the general banking division of the new bank, and the clients concerned then operated with privileges and obligations similar to those provided by other banking institutions. The majority of the remaining securities, also, were eventually transferred.

At present, very limited funds are being made available by the State Government for advances for agricultural development, the bulk of the moneys for this purpose being provided by the Commonwealth Government under the War Service Land Settlement and Commonwealth Re-establishment and Employment Acts. Particulars of this expenditure are shown in § 2 above.

7. *Tasmania*.—The following table shows particulars of advances under State authorities to 30th June, 1961. Although advances made for the purchase of land for closer and soldier land settlement are not regarded as outstanding advances by the Department of Agriculture, the figures have been included in the table for comparative purposes; the areas so purchased have been leased on 99-year terms with an option of purchase which the leaseholder may exercise at any time.

#### ADVANCES TO SETTLERS, ETC.: TASMANIA

(a) Not regarded by the Department as outstanding advances.

8. *Northern Territory*.—During the year 1960-61, seven advances totalling £21,034 were approved and advances made totalled £24,346. At 30th June, 1961, the balance outstanding from 101 settlers, including interest, was £186,537.

## CHAPTER V

### THE TERRITORIES OF AUSTRALIA

NOTE.—The internal Territories of Australia are the Northern Territory and the Australian Capital Territory. External Territories under the control of Australia are:—Norfolk Island; Papua (formerly British New Guinea); the Territory of New Guinea (under Trusteeship Agreement with the United Nations); Nauru (under Trusteeship Agreement with the United Nations); the Territory of Heard and McDonald Islands; the Australian Antarctic Territory; the Territory of Cocos (Keeling) Islands; and the Territory of Christmas Island. There is also the Territory of Ashmore and Cartier Islands, to which the laws, ordinances and regulations of the Northern Territory, of which it is deemed to form part, apply wherever applicable. Information on all except Ashmore and Cartier Islands is contained in the following pages, and details of the acquisition of all the Territories will be found on pages 5, 23 and 24 of Chapter I.

At the end of this chapter (pp. 164–78) there is a summary of the results of the Population Census of 30th June, 1961, for each of the external Territories of Norfolk Island, Papua, New Guinea, Nauru, Cocos (Keeling) Islands and Christmas Island. Corresponding information for the internal Territories is contained in Chapter IX. Population.

#### THE NORTHERN TERRITORY

##### § 1. Area and Population

1. *Area*.—Upon the extension of New South Wales westward to the 129th east meridian in 1825, the Northern Territory was incorporated in that colony, but in 1863 it was annexed by Royal Letters Patent to the province of South Australia. With the adjacent islands, it was transferred to the Commonwealth on 1st January, 1911. The total area is 523,620 square miles.

2. *Population*.—(i) *Population, excluding Full-blood Aborigines*. At the Census of 30th June, 1961, the population of the Territory, excluding full-blood aborigines, was 16,206 males, 10,889 females, 27,095 persons. Corresponding figures at the Census of 30th June, 1954, were 10,288, 6,181 and 16,469 respectively.

The European population of the Territory increased slowly from 670 at the Census of 1881 to 3,767 in 1918. By 1921, it had decreased to 2,458, and in 1933 was still only 3,306. It had risen to 9,116 at the Census of 1947, to 14,031 at the Census of 1954 and to 23,599 at the Census of 1961.

(ii) *The Aborigines*. For particulars relating to the aboriginal population, see Chapter IX. Population. All aborigines, by virtue of the *Nationality and Citizenship Act 1948–1960*, are Australian citizens. The *Welfare Ordinance 1953–1960* recognizes this, and provides that only those deemed to be in need of special care and assistance may be declared wards under the control of the Director of Welfare. Declaration as a ward is subject to the right of individual appeal. This is the same basic idea that is expressed in social legislation applying to those members of the white community who are not able to look after themselves or who have to be protected (e.g., neglected children). Reserves for wards comprise an area of 94,680 square miles.

## § 2. Legislation and Administration

On 1st January, 1911, the Territory was transferred from South Australia to the Commonwealth. The terms were outlined in Official Year Book No. 15, page 940. For particulars of the administration up to the *Northern Territory (Administration) Act 1931*, by which it was, for the second time, placed in the hands of an Administrator, see Official Year Book No. 38 and earlier issues.

The *Northern Territory (Administration) Act 1910-1959* provides for the constitution of a Legislative Council consisting of the Administrator as President, six official members, three nominated non-official members and eight elected members. The Council makes ordinances for the Territory, which must be submitted to the Administrator for assent. The Administrator may, or may not, assent to them, or he may reserve them for the Governor-General. The Governor-General may disallow any ordinance assented to by the Administrator within six months from the date of assent, and the operation of ordinances relating to certain matters, including Crown lands and aboriginal affairs, is dependent on his approval. Money votes may be proposed in the Council only by the Administrator himself, or by his permission or direction.

The Territory elects a member to the House of Representatives, who has the right to take part in debates, but may vote only on matters that relate solely to the Northern Territory.

## § 3. Physiography

The Territory is within the torrid zone, with the exception of a strip about 180 miles wide which lies south of the Tropic of Capricorn.

The low flat coast-line seldom reaches a height of 100 feet. Sandy beaches and mud flats, thickly fringed with mangroves, prevail. Sandstone, marl and laterite form the occasional cliffy headlands. The sea frontage of more than 1,000 miles is indented by bays and inlets and intersected by numerous rivers, many of which are navigable for considerable distances from their estuaries. The only practicable deep-water port, however, is Darwin.

Inland, the country generally is destitute of conspicuous landmarks. From the coast, there is a general rise southwards to the vicinity of the 17th or 18th parallel of south latitude, where the higher lands form the watershed between the rivers that flow northwards to the sea and those that form the scanty supply for the interior systems. Towards the centre of the continent, the land over a wide area is of considerable elevation, and there are several mountain ranges, generally with an east and west trend.

## § 4. Climate, Fauna and Flora

1. *The Seasons*.—There are two main climatic divisions, the wet season, November to April, and the dry season, May to October, with uniform and regular changes of weather. Nearly the whole of the rainfall occurs in the summer months. Further particulars appear in Official Year Book No. 6, page 1116.

2. *Fauna*.—The ordinary types of native Australian fauna inhabit the Territory. As elsewhere on the continent, the higher *Theria* are rare, but marsupials, birds, crocodiles, fresh-water tortoises, snakes (mostly non-venomous) and frogs abound. There are many varieties of fresh-water fish and littoral *Mollusca*. Butterflies and beetles are strongly represented. The termite is a pest which is capable of serious damage to wooden buildings unless special preventive measures are taken. A species of the ant builds anthills which sometimes attain great dimensions. Mosquitoes and sandflies are very troublesome, particularly in the wet season. Some types of native fauna are protected. Buffalo formerly existed in large herds, but their number has been reduced by indiscriminate shooting. Buffalo shooting is, however, now controlled by Ordinance.

3. **Flora.**—The vegetation is north Australian in type, but a number of the forms belong to the Malayan and Oceanic regions. In the coastal regions, tropical vegetation grows luxuriantly to the water's edge. In the north, cypress pine, bloodwood and paper-bark timbers are now cut and milled for local building purposes. Cypress pine is resistant to termites. On the wide expanses of plain country in the interior, there is little vegetation, the principal orders represented being:—*Euphorbiaceae*, *Compositae*, *Convolvulaceae*, *Rubiaceae*, *Goodeniaceae*, *Leguminosae*, *Utricaceae*.

## § 5. Production

1. **Agriculture.**—Up to the present, agriculture has made little progress in the Territory, although rice, peanuts, tobacco, grain sorghum, bananas, pineapples, citrus fruits, cashew nuts, mangoes, papaws, vegetables, fodder plants and improved pastures can be grown in certain areas. At the present time, commercial agricultural production is practically confined to vegetables and small-scale fruit production (mainly pineapple and citrus) for local consumption. A small industry is being developed in Townsville lucerne seed production.

In 1946, the Commonwealth Scientific and Industrial Research Organization commenced scientific surveys to determine more accurately the potentialities of the Territory. Surveys have been completed of the Katherine-Darwin, Barkly Tableland, Victoria River, and Alice Springs Regions. The survey of the Katherine-Darwin Region indicated that further investigations into agricultural possibilities were warranted. As a result, the C.S.I.R.O. established an agricultural research station at Katherine to investigate the possibilities of dry farming in a land system covering an area of about 7,000 square miles in the Katherine-Daly River basin. The research work at this station was sufficiently encouraging in respect of the production of peanuts, grain sorghum, and pastures to warrant investigations into the application of the findings on a commercial scale. To further the investigations, the Commonwealth Government approved of the establishment by the Northern Territory Administration, in 1952, of an experimental farm at Katherine for the purpose of carrying out trials with these crops to determine the requirements for farming them on a commercial scale. In 1956, the Administration established an experimental farm at Berrimah, near Darwin. Investigations into fruit and vegetable growing and pasture production are being carried out under both dry land and irrigated conditions.

The survey of the Katherine-Darwin Region also indicated various soil types in other parts of the Region on which agricultural production tests would be worthwhile. Trials on soil types are carried out by agricultural field officers of the Administration in various areas of the Territory considered potentially suitable for agriculture.

Prospects for rice growing were indicated by the survey, and in 1952, the Administration established rice research stations at Humpty Doo and at a location known as Sixty Mile, on the Stuart Highway, 60 miles from Darwin. Since the 1959–60 season, rice research work on the sub-coastal plains has been carried out in the Territory by the C.S.I.R.O. at its Coastal Plains Research Station at Middle Point, near Humpty Doo. The Administration carries out rice investigational work outside the coastal plains at the Upper Adelaide River Agricultural Experiment Station. At the rice research stations, it has been demonstrated that rice can be grown in the Territory, but that the main problems are adequate water control and drainage, determination of cultivation techniques in the soil conditions, and the production of suitable rice varieties. Territory Rice Limited, a firm with Australian and American capital, carried out commercial scale operations near Humpty Doo from the 1954–55 season until the 1959–60 season. Under arrangements with the company, four former employees grew rice crops in the 1960–61 and 1961–62 seasons.

On 25th July, 1959, the Minister for Territories appointed an expert committee to investigate the prospects of promoting agricultural settlement in the Northern Territory on an economic basis and the major factors to be considered in shaping an agricultural policy for the Territory, including the areas best suited to agricultural settlement; the crops most likely to prove economic; the relationship of agriculture to the expansion of the pastoral industry; the availability of land and the distribution and tenure of land; credit and other forms of assistance to primary producers; marketing opportunities; research and agricultural extension work; and water use and conservation. The committee has presented its report, and some of its recommendations have been accepted and implemented, while others are under consideration.

2. **Pastoral Industry.**—The pastoral possibilities of certain parts of the Territory were recognized at an early date, and both cattle and sheep raising have been attempted. For various reasons, sheep-raising has not been very successful, but the cattle industry has progressed steadily and is continuing to expand.

Cattle exported during 1961-62 numbered 134,901—83,866 to Queensland, 34,486 to South Australia, 9,955 to Western Australia and 6,594 to Hong Kong. Other livestock exports included 1,209 horses and 92 buffaloes. Imports of livestock were—bulls, 1,740, other cattle, 9,559; horses, 234; sheep, 4,716; pigs, 716; and poultry, 19,906.

The estimated numbers of livestock in the Territory at 30th June, 1958 to 1962, are given in the following table.

#### NORTHERN TERRITORY: LIVESTOCK

At 30th June—			Horses	Cattle	Sheep	Pigs	Goats	Mules
1958	..	..	38,668	1,243,588	26,795	3,071	9,938	324
1959	..	..	38,882	1,099,014	18,731	3,802	9,126	200
1960	..	..	38,340	1,110,520	14,960	4,400	9,440	318
1961	..	..	40,054	1,154,656	16,089	2,845	5,958	367
1962	..	..	40,809	1,063,866	13,900	3,400	4,949	195

3. **Hides and Skins.**—The numbers of hides and skins exported from the Territory during 1961-62 were as follows: sheep, 3,952; crocodile, 11,891; cattle, 5,896; and buffalo, 653.

4. **Mining.**—During 1961, the value of output of the mining industry in the Territory, excluding uranium mining, was £2,987,000.

The mining of copper ores and concentrates is the most important in terms of value of output, and accounts for more than two-thirds of the Territory's total recorded production. Prior to 1956, gold minerals, first mined in 1869, accounted for most of the value of output, but from 1956 onwards, gold production has remained relatively constant while copper production has increased considerably. The bulk of the copper and gold is won at Tennant Creek where, in 1958, the government battery was re-opened to encourage gold mining by smaller operators.

Although some overseas contracts held by uranium producers have recently terminated, the Northern Territory continues to produce about one-third of all uranium concentrate produced in Australia. In recent years, this output has come primarily from plants at Rum Jungle and in the South Alligator River area. Prospecting and survey programmes are being continued both by producing companies and by the Commonwealth Bureau of Mineral Resources. An important incidental outcome of this work was the discovery during 1962 of a large deposit of rock phosphate near Castlemaine Hill.

The Harts Range field in Central Australia continues to produce the bulk of Australian high grade mica, but production is declining because of the ready availability of lower priced mica from overseas. Production of wolfram concentrates, important in the past, is now negligible. Increasing interest is being shown in tin mining, and production is expanding.

The following table shows the value of output of the mining industry in the Territory for the years 1957 to 1961. Particulars of the value of output from quarries are not included.

#### NORTHERN TERRITORY: VALUE OF OUTPUT<sup>(a)</sup> OF THE MINING INDUSTRY (EXCLUDING URANIUM) (£'000)

Year			Copper ore and concentrate	Gold (b)	Manganese ore	Mica	Other	Total, all minerals
1957	..	..	1,024	973	20	50	59	2,126
1958	..	..	1,286	895	70	47	16	2,314
1959	..	..	1,455	901	37	45	33	2,471
1960	..	..	2,080	881	41	17	54	3,073
1961	..	..	2,063	895	1	1	27	2,987

(a) Selling value at point of sale of mine products less transport costs from mine to point of sale.

(b) Ore, concentrate, bullion, alluvial gold, etc.

5. **Forestry.**—In August, 1958, the Commonwealth Government approved a six-year programme of forestry improvement and development to preserve existing forest areas and increase possible timber resources. The programme is being carried out by the Forestry and Timber Bureau, and it is intended that it will be handed over to the Administration at the end of the six-year period. Fundamental forestry research work, however, will still be carried on by the Bureau. Experimental work in reforestation is being carried out in small plantation areas. Cypress pine appears the most promising species for large-scale commercial plantings. Local production of log timber, mainly cypress pine, amounted to 902,641 super. feet in 1960–61, but this was insufficient to meet local requirements, and about 2,500,000 super. feet of timber was imported from the States and overseas.

6. **Pearl Fisheries.**—In 1884, mother-of-pearl-shell was discovered in the harbour of Port Darwin. Since that time, the areas fished have extended to the various banks to seaward and coastwise along the Northern Territory coast. Figures for production and value of shell for the seasons ended January, 1958 to 1962, are shown in the following table.

NORTHERN TERRITORY: PEARL FISHING(a)

Season ended January—	Boats engaged	Pearl-shell taken	
		Quantity ('000 lb.)	Value (£'000)
1958.. .. .	11	753	135
1959.. .. .	5	314	57
1960.. .. .	5	188	36
1961.. .. .	5	222	45
1962.. .. .	3	147	29

(a) Excludes operations of Queensland and Japanese pearlers operating in Northern Territory waters.

7. **Secondary Industries.**—The secondary industries that have so far been established in the Territory have been largely the service industries normally associated with a developing area, for example, home building, electrical repairs, printing, motor and marine engineering, plumbing, welding, joinery, sheet metal work, and blue metal crushing. Major industrial investments by private interests in recent years include two breweries and a factory for the manufacture of milk, ice cream, and aerated waters. The total number of factories (i.e., establishments in which four or more persons are employed or where power—other than manual—is used in any manufacturing process) in 1960–61 was 122; the average number of employees, 953; the value of production (value added), £1,753,000; and the value of output, £3,149,000.

## § 6. Land Tenure

Almost half the land in the Territory is reserved or unoccupied and unreserved, the remainder, apart from a very small proportion alienated, being held under various forms of lease or licence, which are described in Official Year Book No. 48, pages 111–12, and in more detail in Official Year Book No. 39, pages 329–30. Chapter IV. Land Tenure and Settlement of this issue contains up-to-date statistical information concerning areas occupied under various forms of tenure.

## § 7. Trade, Transport and Communication

1. **Trade.**—No record is kept of the trade between the States and the Territory. The following table shows the values of the total direct oversea trade into and from the Northern Territory during the years 1957–58 to 1961–62.

## NORTHERN TERRITORY: OVERSEA TRADE

(£ )

Year						Imports	Exports
1957-58	..	..	..	..	..	1,088,697	655,617
1958-59	..	..	..	..	..	1,058,998	360,682
1959-60	..	..	..	..	..	1,484,791	551,199
1960-61	..	..	..	..	..	1,206,246	435,069
1961-62	..	..	..	..	..	2,084,216	611,722

2. **Shipping.**—Shipping services to Darwin are provided from the eastern States at intervals of about four weeks by ships of the Australian National Line, and from Western Australia by three to four ships a month of the Western Australian State Shipping Service. Oversea tankers visit Darwin approximately ten times annually with supplies of aircraft fuel and other petroleum products. Other oversea vessels call at irregular intervals. During 1961-62, approximately 180,000 tons of merchandise were landed at Darwin. A vessel operated from Thursday Island serves settlements on the Gulf of Carpentaria, and some mission-owned boats carry cargo from Darwin to mission stations and government settlements along the coast.

3. **Air Services.**—At 30th June, 1962, there were 15 government aerodromes and 104 licensed aerodromes in the Territory. The oversea passenger services using the Darwin international airport are Qantas (Sydney to Tokyo through Hong Kong); Qantas/B.O.A.C. (Sydney to London); Transports Aériens Intercontinentaux (Paris to Noumea and Au k-land); Air-India International (Sydney to London); and Cathay Pacific Airways Ltd. (Sydney to Tokyo). Qantas also conducts a freight service from Sydney to London. Regular inland services to Darwin, with, in some cases, intermediate stops at Territory centres, are operated by Trans-Australia Airlines (from Adelaide, Melbourne, Sydney and Brisbane), and MacRobertson-Miller Airways Ltd. (from Perth and Wyndham). A service from Melbourne to Alice Springs through Broken Hill is operated by Ansett-A.N.A. MacRobertson-Miller Airways Ltd., and Connellan Airways Ltd. operate a network of air services throughout the Territory, the latter company's base being at Alice Springs. The Royal Flying Doctor Service also operates aircraft, while charter services can be secured at Darwin and Alice Springs.

4. **Railways.**—The Commonwealth Railways Commissioner operates the Central Australia Railway from Port Augusta in South Australia to Alice Springs over a distance of more than 750 miles, of which about 200 are in the Northern Territory. The line from Port Augusta to Maree, a distance of 217 miles, has been converted to standard gauge. Proposals are now being examined to convert the remaining 3 ft. 6 in. line to standard gauge, firstly to Oodnadatta and later through to Alice Springs. The Commissioner also operates the North Australia Railway between Darwin and Birdum on a 3 ft. 6 in. gauge over a distance of 317 miles. The two inland terminals, Alice Springs and Birdum, are about 630 miles apart and are connected by road transport along the Stuart Highway. Larrimah, on the highway and 6 miles north of Birdum, is the point of trans-shipment for passengers and goods and is, at present, the effective terminal. A road-rail freight service operates between Adelaide and Darwin via Alice Springs.

5. **Roads.**—The Stuart Highway, 954 miles long, connects Alice Springs with Darwin and runs via Larrimah and Tennant Creek. The Barkly Highway, 403 miles long, connects Mount Isa (Queensland) with Tennant Creek and joins the Stuart Highway some 16 miles north of Tennant Creek. These highways are used for carrying various freights including cattle, particularly to and from the railheads at Alice Springs, Larrimah and Mount Isa. The routes are used also for overland tourists and travellers from the southern States to Darwin. With the further development of the pastoral and mining industries in the Territory, road trains are now being used on both highways for the export of cattle and ore. Both roads have good water bores and communications. There are now approximately 13,000 miles of road in the Territory of which 1,380 miles are sealed.

A comprehensive plan of beef cattle roads, estimated to cost £4,570,000, has been approved for construction over the next four years. Approximately 900 miles of new roads are involved, and the transport of cattle by road is expected to increase and result in an increased output of beef.

**6. Posts, Telegraphs, Telephones and Wireless.**—Postal communication is maintained by road, rail and air transport between Darwin and the capital cities of Australia. In addition, vessels belonging to the Western Australian State Shipping Service provide a regular service between Fremantle and Darwin. Inland, the northern part of the Territory receives its mail via Darwin or by means of the aerial services, and the southern districts are served via Adelaide.

The overland telegraph line, covering a length of 2,230 miles, runs from Adelaide to Darwin, and links Darwin in telegraphic communication with other parts of the world.

Long-distance telephone communication is established between Darwin and the capital cities of Australia, and oversea telephone communication through Sydney or Perth is also available.

Regional national broadcasting stations are situated at Darwin, Alice Springs, Tennant Creek and Katherine, and there is a commercial station at Darwin. The majority of homesteads on pastoral leases are equipped with pedal wireless sets operated under licence from the Postmaster-General's Department. These stations are in daily communication with Flying Doctor Bases situated at Alice Springs (Northern Territory), Wyndham (Western Australia), Broken Hill (New South Wales) and Cloncurry (Queensland), and are used for transmission of radio-telegrams and other communications.

## § 8. Education

**1. European.**—Schools for European and part-European children in the Territory are conducted for the Commonwealth, on an agreed basis of reimbursement, by the South Australian Department of Education, which is represented in Darwin by an Assistant Supervisor of Education, Northern Territory Schools.

At 30th June, 1961, there were 19 government schools in the Territory with 3,592 pupils, and three private schools with 838 pupils, providing instruction according to the South Australian curriculum. High schools with classes up to the Leaving Certificate level have been established at both Alice Springs and Darwin.

All children who live more than 10 miles from an established school receive an allowance of up to £140 (£80 plus £60 on a graduated scale according to family income) per annum plus fare concessions if they board away from home in order to attend school. Twelve exhibitions on the results of the Intermediate Certificate and twelve Leaving Honours scholarships on the results of the Leaving Certificate are available annually. Benefits are £50 and £100 respectively (plus up to £100 on a graduated scale according to family income) and return fares once a year.

Approximately 148 children receive correspondence education under the South Australian Correspondence School system. The radio session "School of the Air" supplements normal correspondence instruction for certain children in isolated areas.

Sixteen pre-school centres have been established in the Territory, three of which are on Government settlements, the staff of all except one being officers of the Northern Territory Administration. A number of scholarships are offered each year for Territory girls to qualify as pre-school teachers.

**2. Special Aboriginal Schools.**—The social, cultural, and educational background of the aboriginals has made necessary the establishment of special schools for them. It is envisaged that this necessity will ultimately pass. As from the beginning of the 1956 school year, control of these schools passed from the Commonwealth Office of Education to the Welfare Branch of the Administration. Sixteen schools have so far been established. A special syllabus and series of readers have been prepared for use in these schools. Free mid-day meals, milk, and school clothes are supplied to the pupils. In addition to the fourteen Administration schools, sixteen schools for aboriginal children are conducted by missions

with the aid of Government subsidies. Also, five schools aided by Government subsidies have been established on pastoral properties, and the establishment of others along similar lines is planned. Three pre-school centres are operated by the Administration for aboriginal children.

3. **Theoretical Training of Apprentices.**—The recognition that technical school training is an extension of workshop training has led to the introduction of day-time classes which apprentices attend without loss of pay. Apprentices are directed by the Apprentices Board to undertake correspondence courses conducted by the Technical Correspondence School of the South Australian Education Department and the Sydney Technical College, these courses covering the work prescribed for the various trades in South Australia and New South Wales.

### § 9. Aboriginal Welfare

The *Welfare Ordinance*, which came into operation on 13th May, 1957, established the principle that a person would be committed to the care of the State only on the grounds of his need for special care and assistance and not on the grounds of race or colour, and it laid on the Director of Welfare a positive responsibility for the advancement of wards in his care. *The Wards' Employment Ordinance* provides for the training of wards and assistance in establishing them in occupations, either on their own account or as employees. The Ordinance envisages, among other forms of training, apprenticeships for the better-educated wards and training on the job for those wards not yet capable of entering into apprenticeships. It also envisages financial aid to wards or groups of wards who, under the guidance of the Director, may be able to engage in activities (for example in agriculture, cattle raising, hunting or fishing) on their own behalf. The Director of Welfare is responsible for supervising employment for the wards in his care, and protective legislation for those in employment is retained. The legislation does not, of course, apply to any persons who are not wards, and aboriginals who have ceased to be wards will come within the normal industrial customs of the country.

### § 10. Finance

Details of revenue and expenditure of the Territory for the years 1957–58 to 1961–62 are shown below. The information given covers the transactions of the Commonwealth Consolidated Revenue Fund relating to the Northern Territory and the transactions of the North Australia Railway.

#### NORTHERN TERRITORY: REVENUE AND EXPENDITURE (£)

## THE AUSTRALIAN CAPITAL TERRITORY

## § 1. Canberra: Fifty Years of Development\*

1. *Canberra, the National Capital.*—Canberra, the National Capital, has made great progress in the fifty years since its foundation stone was laid on Capital Hill.

When the foundation stone was laid on 12th March, 1913, the site of the ceremony looked out over an empty plain.

Today, from the same point, broad avenues radiate to form two sides of a Parliamentary Triangle within which the buildings necessary to Canberra's identity and function as a National Capital have arisen. Multi-storey blocks of commercial buildings thrust into the skyline; institutional buildings are set in park-like surroundings, and residential suburbs spread across the plain and climb the slopes of the surrounding hills.

Canberra, at the beginning of 1963, had a population of nearly 70,000 people. It had become, in fifty years, the largest of Australia's inland cities. It had also, apart from physical growth, developed in character.

Today, Canberra as the National Capital has characteristics unique in Australia. The characteristics surprise visitors whose ideas about cities are based on the great commercial metropolis of Sydney or Melbourne. Canberra is the seat of Federal Government and an administrative centre rather than a commercial or industrial centre. Thus the most important part, which may be equated to the core of business houses in a conventional city, is the Parliament House and its supporting administrative buildings, established in landscaped surroundings. This park-like atmosphere emphasizes the difference in atmosphere between Canberra and other cities.

The concept of a national capital has been developed in many countries, and Canberra has been an example used by many emerging nations in the post-war period. National capitals are the visible symbols of national spirit and, in more practical terms, are the seats of government and centres of administrative and diplomatic activity. The newer national capitals are coming to be examples in urban development—vehicles for experiment from which other municipalities in each nation can learn.

2. *Early History.*—The building of the national capital is a duty imposed on Parliament by the Constitution. Commonwealth Parliament, after considering a number of possible sites, determined in 1908 that the seat of government of the Commonwealth should be in the district of Yass-Canberra and that it should contain an area of not less than 900 square miles and have access to the sea.

The Canberra district was first seen by white men less than 100 years before it was chosen as site for the Australian National Capital.

In 1820, Governor Macquarie instructed Charles Throsby, a former naval surgeon interested in exploration, to search for the Murrumbidgee River, which had been reported by aborigines. Throsby sent Wild, an experienced bushman, with a party of explorers which included his nephew, Charles Throsby Smith and James Vaughan, to search for the Murrumbidgee. On this journey, the party camped on the plain on which Canberra now stands, and reported favourably on the district on their return. In subsequent years, the country was opened up as grazing and farming land.

Following the choice of the Yass-Canberra district in 1908 as the future site of the national capital, the district Surveyor, Mr. Charles R. Scrivener, was directed to examine the area and recommend a suitable territory for the purposes of the Seat of Government. Scrivener nominated 1,015 square miles in the water sheds of the Cotter, Queanbeyan and Molonglo Rivers and a further 2,300 acres at Jervis Bay. A request for the surrender of the land was made to the New South Wales Government, and, after negotiation, an area of approximately 900 square miles between the Queanbeyan-Cooma Railway, and the mountain ranges forming the western boundary of the water shed of the Cotter River plus Jervis Bay was selected. The final step in the adoption of the actual site was taken by the passing of the *Seat of Government Acceptance Act* in 1909. The schedule of this Act contained an agreement between the Commonwealth and the State of New South Wales regarding the transfer to the Commonwealth of this area.

Control of the Territory was assumed by the Commonwealth on 1st January, 1911, when the *Seat of Government (Administration) Act* came into force.

\* The following article was specially prepared for this issue of the Year Book by the National Capital Development Commission, Canberra.

For many years subsequently, the site of Canberra, remote from the main Australian centres of commerce, removed from the sea, relatively isolated by mediocre transport facilities, remote from supplies of many basic materials and commodities, was subject to strong criticism. However, the tremendous post-1945 improvements in transportation facilities and the developing economic viability of Canberra have reduced these factors. Today Canberra is regarded as well placed between the major centres of Australian population and industry.

**3. Control of Land.**—With the transfer of the Territory from New South Wales on 1st January, 1911, all Crown land passed to the Commonwealth without cost, but privately owned land which the Commonwealth required had to be purchased from the owners. Much of the freehold land has been so acquired by the Commonwealth for the city site and for catchment areas. The remaining freehold land is principally in the southern portion of the Territory.

It was also provided that Commonwealth Crown land in the Territory, which includes that resumed from previous owners, should forever remain the property of the nation.

The decision to vest ownership of all land in the Crown was a very significant social experiment. The intention, since maintained, was that the Crown would continue to own the land, but would lease it for specified periods and under given conditions for residential, commercial, industrial and other purposes. The method of leasing is defined in the *Leases Ordinance 1918–1958*, the *Leases (Special Purposes) Ordinance 1925–1943* and the *City Area Leases Ordinance 1936–1959*. These lay down the method of disposal of the leases and indicate the conditions which will apply, the principal of which is the payment annually of a land rent based on a percentage of the unimproved capital value. The administration of the leasehold system represents a public investment, return from which in more recent years has been augmented by premiums paid at auctions for the right to the leases.

A principle rigidly followed since first establishment of the city has been that no land within the city area is offered for lease until all services—water, sewerage, power and roads—are provided.

**4. Canberra from 1911 to 1945.**—(i) *The City Plan.* In 1911, the site was a treeless and sparsely settled plain; improvements were few and had no bearing on the shape of the future city. The district population was 1,714 persons living on an area of grazing land, ringed by hills. The Molonglo River traversed the substantial plain, which was subject to recurring floods.

In April, 1911, an international competition for the design of the new city was launched. From 137 designs received, the first prize was awarded to Walter Burley Griffin, a Chicago architect.

Fundamental principles of the Griffin plan were:—

- (a) The geometric pattern of the design;
- (b) The treatment of the flood plain, useless for building purposes, to form a lake to be the unifying feature of the northern and southern parts of Canberra;
- (c) The formation of a grand visual axis from the top of Mount Ainslie to Capital Hill; and
- (d) The separation of national and municipal functions; this was proposed by the locating of all buildings associated with national affairs in an integrated group on the southern side of the lake and locating buildings associated with civic matters in a commanding position on the north side.

Residential suburbs were to be grouped on both sides of the river. Shopping facilities were to be provided in them only for local retail requirements, as the main commercial development was designed around the Civic Centre. The base point of the plan was Capital Hill from which main avenues were to radiate.

In time, Griffin made some changes in the original plan, but although this process of modification continues as the town planner grapples with problems that could not be foreseen in Griffin's day, the basic Griffin plan has been closely followed in the development of Canberra.

(ii) *The Naming of the National Capital.* On 12th March, 1913, an official ceremony marked the formality of establishing the Seat of Government. The Foundation Stone was laid on Capital Hill jointly by the Governor-General, Lord Denman, the Prime Minister, Rt. Hon. Andrew Fisher, and the Minister for Home Affairs, the Hon. King O'Malley.

At this ceremony, *Canberra* was announced as the name for the Capital City by Lady Denman.

(iii) *Early Progress.* In 1913, Griffin came to Australia to collaborate in the implementation of his design and was subsequently appointed by the Commonwealth Government to the position of Federal Capital Director of Design and Construction. In 1920, he resigned to set up in private architectural practice in Sydney.

Before the 1914 War, conditions brought activities almost to a halt, a power house was erected and a railway branch line from Queanbeyan was completed. The engine which pulled the first train into Canberra in 1914 is now on permanent display in the City. Brick works were established, the Cotter Dam to store water for the City was started, and the Royal Military College was established at Duntroon.

Between 1921 and 1923, work on engineering services proceeded and main and subsidiary roads were formed. Residential buildings were started and sites were allocated for hotels and guest houses. The Canberra to Queanbeyan railway was opened for passenger traffic in 1923.

The Commonwealth Parliament had met in the Exhibition Buildings in Melbourne since Federation, and it was during this post-war period that the temporary Parliament House and offices for government departments were begun in Canberra. The first assembly of the Commonwealth Parliament in its new buildings in Canberra was opened by His Royal Highness The Duke of York (afterwards His Majesty King George VI) in 1927.

(iv) *The Federal Capital Commission.* In July, 1924, the *Seat of Government (Administration) Act* was passed providing for a Commission of three to assume responsibility for Canberra's development. Although the Commission was invested with very wide powers in regard to actual constructional and developmental work, the Government made it clearly understood that the development must be along the lines of the Griffin Plan.

One of the advantages of the Federal Capital Commission was its relative freedom in regard to finance, and considerable progress was made with the transfer of Departments to Canberra for whose staff office accommodation and houses had to be provided. The following departments were involved in these transfers:—Prime Minister's, Treasury, Attorney-General's, Department of Home Affairs and Territories, Department of Trade and Customs, Department of Markets and Migration, and Secretariats for the Departments of Defence, Health and Postmaster-General's.

The pace of construction quickened between 1926 and 1928, and nearly 5,000 people were moved to Canberra. The Federal Capital Commission was directly responsible for local administration, but moves to give the citizens of the Territory a voice in local government resulted, in 1928, in the provision for the election of one of the members of the Federal Capital Commission by the residents of the Territory.

(v) *The Depression and the 1939–45 War.* With the onset of the economic depression there was mounting criticism, and in 1930 the Federal Capital Commission was abolished, and Canberra reverted to the departmental system of administration.

As the depression worsened, developmental work in the city was brought almost to a standstill, the only major construction during the period being the Federal Highway from Canberra to Goulburn.

As the economic situation improved again, approval was given for the building of the Australian War Memorial and a building for the National Library, the recommencement of the Administration Building (on which work had started in 1927), the construction of the Patents Office, and the commencement of a new hospital. The growth in the city's population, though less than expected, necessitated the building of more roads, schools and public utilities. Several defence service areas were established around Canberra, such as the Naval Wireless Stations at Harman and Belconnen, destined to play a dramatic part in the later war in the Pacific, and the Royal Australian Air Force Station in the Majura Valley.

By an amendment of the *Seat of Government (Acceptance) Act* in 1938, the Territory was named the Australian Capital Territory. In 1939, resources were diverted again to military purposes. House construction was restricted and transfers of Government Departments postponed.

Thus, the establishment of the National Capital was not spectacular in its first 34 years between 1911 and 1945. Indeed, it is surprising that a firm base for future progress was established during that time in the face of opposition or indifference in some quarters, two World Wars and a substantial economic depression of long duration.

Artist's impression of Lake Burley Griffin, Canberra, looking from Mt. Ainslie to the apex of the Parliamentary Triangle. The original painting was by Lawrence Daws.

**Civic Centre, Canberra, seen from Black Mountain. The Australian War Memorial is in the background, to the right.**

*Photograph by courtesy of Australian News and Information Bureau.*

An enduring achievement of these years was the establishment, on a vast scale, of landscaped and planted areas which furnished a mature background for the post-1945 developments.

(vi) *Diplomatic Representation.* Diplomatic activity was strengthened during the 1939-45 War. The United Kingdom (in 1936) and Canada (in 1939) were the only two overseas countries represented in Australia in the pre-war period. The first foreign diplomatic representative, the United States Minister, came to Australia in 1940. Japan sent a Minister in 1941, but his mission was terminated on the outbreak of war with Japan. (Diplomatic relations were resumed in 1953, with the appointment of an Ambassador.) During the War, missions were established by China in 1941, the Netherlands in 1942, New Zealand and the U.S.S.R. in 1943, and India and France in 1945. At the beginning of 1963, 32 overseas countries were represented in Canberra.

5. Canberra, 1946 to 1962.—(i) *General.* After the 1939-45 War, Canberra's development quickened, with the emphasis on suburban growth. Canberra's rapid increase in population aggravated the problem, and the lack of balance in development was expressed in the shortage of community halls, schools, suburban shops and other facilities.

It was now recognized that permanent buildings should be constructed when and where possible. Accordingly, the construction of the permanent Administration Block, started and stopped in 1927, was considered, in 1947, by the Public Works Committee, and subsequently work was resumed on a modified and improved plan.

In 1948, a scheme of transfer to Canberra of Commonwealth Departments, spread over a number of years, was formulated and approved by the Government. Shortages of labour and materials and the urgent need for house and hostel accommodation could operate against rapid expansion in the next few years, but the major probable cause of delay in implementing the scheme of transfers would be the absence of a single authority. A balanced authoritative policy to provide office accommodation, housing and amenities on an increasing scale was essential.

(ii) *Senate Select Committee.* In 1954, a Select Committee of the Senate was appointed to inquire into and report upon the development of Canberra. A principal recommendation in its September, 1955, report was that the divided departmental control should be replaced by a single authority, constituted by a Commissioner who would have wide powers in the planning and development of the National Capital. Subsequently, by Act of September, 1957, the National Capital Development Commission was established. The work of administering the city remained with the Department of the Interior, and routine maintenance remained with the Department of Works as agent of the Department of the Interior.

In the period between the legal and the effective establishment of the Development Commission, a very significant report offering observations on the future development of Canberra was made by Sir William Holford, the eminent English architect and town planner, at the request of the Commonwealth Government. Holford's interest in, and association with, the development of Canberra were to continue strongly in the future operations of the Commission.

(iii) *The National Capital Development Commission.* The National Capital Development Commission was appointed on 1st March, 1958, and is responsible for the planning, development and construction of the City. The Commission has under its control funds appropriated annually by Parliament. In detailed planning and construction, it uses both private and government agents, principally the Commonwealth Department of Works. It maintains liaison with, and seeks technical advice of the highest order from, Commonwealth and State governmental agencies; it also engages specialist consultants within Australia and overseas. When a construction project is completed, it is handed over by the Commission to the Department which required it, generally the Department of the Interior as the administrative authority.

The Act which established a Development Commission also provided for a National Capital Planning Committee to advise the Commission as to the planning, development and construction of the City of Canberra. The Committee includes the Development Commissioner as Chairman, two architects, two engineers, two town planners and two other persons with special knowledge and experience in artistic or cultural matters. In practice, the Committee has met about eight times each year to review all the major issues in planning and development under reference from the Commission.

Through its land use authority, the Commission co-ordinates the building programmes of private enterprise and government.

In terms of planning and development, one of the most significant and active responsibilities of the Commission is the close control over the design and siting of all buildings and associated structures. The harmony of design, colour, and materials within the context of the surrounding buildings is carefully studied and assessed, and all approvals to the erection of buildings for particular purposes take into account their acceptability in terms of traffic generation, noise, smoke or other nuisance, and the effect on the general amenity of the particular area.

Between 1923 and 1958, when the National Capital Development Commission was appointed, the plan of Canberra remained virtually unchanged, except for variations affecting the Lakes Scheme and some minor alterations in the design of residential streets. Meanwhile, however, the local scene had changed considerably, and many technical developments had occurred which greatly influenced the theory and practice of town planning. Thus, a first task of the Commission was to review the adequacy of the Statutory Plan, to decide whether it could provide the satisfactory basis for future development, and what changes, if any, were necessary to bring it into line with present-day needs.

By 1959, some 46 years after the commemoration stone was laid, the population had reached 44,000, and about one-third of the gazetted areas on the Statutory Plan had been developed and the outlines of the Central Area were firmly established on the ground. As noted above, the specific achievement in the development of the city area in the earlier years of Canberra was the transformation of a treeless valley into an effective urban landscape; the vigour and enthusiasm shown in the early planting programmes are responsible in a very large degree for the city's present attraction. By 1959, over two million trees had been planted in Canberra.

The new Commission early endorsed the view that Canberra must have features to distinguish it from other cities, and that these features could emerge from the existence in the heart of Canberra of a large park-like landscape, bounded on the three sides by King's Avenue, Commonwealth Avenue and Constitution Avenue, identified as the Central Area, in which should be situated the major buildings housing the several arms of Government. It was considered that on the design of this landscape, the vistas it afforded, and the relationship of groups of buildings, the success of Canberra as a city of world standing would depend. Also recognized was the need to extend and develop important buildings and employment opportunities. The further consideration, fundamental in planning the city, was the recognition that Canberra was essentially a garden city helping to establish an expansive tradition in urban living.

The Commission in 1959 formulated comprehensive proposals for the development of the city over the next five years. The proposals covered the identification of new residential areas, the commercial and industrial locations, and ideas in connexion with the planning of the Central Area. Since then, planning has expanded to cope with a probable ultimate growth to 500,000 persons, and takes account of a possibility far in excess of that number.

It was also recommended to the Government that the Canberra lake, an essential feature of the original concept, should proceed. These proposals were approved by the Government. As well as being a simple and decorative feature in itself, the lake was also a fundamental requirement for the integrated growth of the approved city, as the recurring flooding of the Molonglo flood plain made it unsuitable for building sites.

The Lake Scheme is estimated to cost some £2.5 million spread over a period of five years, and it is expected that the major lake construction works will be completed by the end of 1963. Full development of the landscape around the lake margins is, however, expected to take much longer. When completed, the lake will be some 22 miles in circumference, almost 7 miles long, and have 1,748 acres of surface area. The depth will range from 7 feet to about 54 feet at the dam wall. One thousand acres of parkland will surround the lake and will be retained for public use. Sites will be provided for such activities as yachting, sculling and rowing. Traffic will cross the lake by the King's Avenue and Commonwealth Avenue Bridges. Each is in the form of twin bridges having dual one-way carriageways; the King's Avenue Bridge has four traffic lanes and the Commonwealth Avenue Bridge will have six.

Fittingly, the lake has been called after the man whose plan was responsible for its creation—Walter Burley Griffin.

(iv) *The Joint Parliamentary Committee on the Australian Capital Territory.* In February, 1959, the Commonwealth Parliament, recognizing the merit of maintaining some close association with all the issues of development, established a Joint Committee consisting of nine Senators and members representing both Houses to study such matters concerning the

Australian Capital Territory as the Minister from time to time might refer to it. Since inception, the Committee has been active, particularly in the continuing study of the Statutory Plan of Canberra and of the tourist industry.

(v) *Major Works.* (a) *Building Operations.* Among the major building operations put in hand in the period 1958 to 1962, the following are worthy of special mention.

*The Russell Office Group*, intended to accommodate the Defence and Armed Service Departments. The first four office buildings and an Electronic Data Processing building have been completed and three more buildings are under construction.

*Australian Capital Territory Court House.*

*Canberra Technical College*, particularly the Schools of Commerce, Engineering and Building.

*Civic Offices and City Square.* Associated with this project was the pool, fountain and the statue of Ethos, executed by an Australian sculptor Mr. Tom Bass.

*Tariff Board Headquarters.*

*Australian National Mint.* Following the decision of the Government to establish the Australian National Mint in the National Capital, site works commenced in 1962 in the Yarralumla Creek Valley and building construction will be undertaken during 1963. This will be the first major Government building to be constructed in this new district.

*Civic Auditorium.*

*Secretariat Building* in the Parliamentary Triangle.

*Bureau of Mineral Resources Building* on the lake shore opposite Parliament House.

*Housing.* Between 1958-59 and 1961-62, 3,219 houses and 1,223 flats were constructed, using government funds (during the same period 1,559 houses and 52 flats were constructed by private enterprise).

*Education.* High schools have been constructed at Lyneham, Narrabundah and Dickson, and primary and infants' schools completed at Downer, Red Hill and Campbell.

*National Library of Australia.* Planning is well advanced for the construction, on the lake shore adjacent to Parliament House, of a major building to house the National Library of Australia.

There has been a notable growth in the Australian National University as a centre of learning and research. This is dealt with separately in Chapter XV of this Year Book under the section on Universities.

(b) *Engineering Works.* The growth of population by 50,000 persons in the City area between 1945 and 1963 and an expected growth to 100,000 persons by 1969 has meant heavy expenditure on roads, water supply and sewerage systems to meet the demand for new residential areas. New suburbs of Dickson, Hackett and Watson are being developed, and a new district in the Yarralumla Creek Valley planned to cater for an ultimate district population of 60,000 persons. The first residences in this district will be occupied during 1963.

Augmentation of the original water storage constructed on the Cotter River in 1915 has been necessary. In 1951, extensions to the Cotter Dam wall were completed to increase the storage capacity from 375 million gallons to 950 million gallons, and a second storage, Bendora Dam, of almost 2,500 million gallons capacity, on the higher reaches of the Cotter River, was completed in 1961. A third storage dam site is currently being investigated.

(vi) *Transportation.* Canberra is a highly motorized community and advantage has been taken of the unique situation existing in the young and rapidly growing city to plan for future traffic movement to avoid the problems which beset older cities.

The assembly of traffic data such as volume counts, parking surveys, and accident studies has been a continuing process, and during 1961-62 an extensive origin-destination traffic survey was undertaken. This has provided basic material for a major transportation study, undertaken by overseas consultants, to assess the requirements of the city developed in stages to a population of 250,000 people. As a result, a system of arterial, distributor and subsidiary roads is designed to meet growing traffic requirements.

As in other aspects of Canberra development, landscaping is integrated with major traffic ways. One of the more recent examples of this is the Parkes Way, a dual carriage roadway which defines the third side of the triangular Central Area, and which will skirt the northern side of Lake Burley Griffin.

Public transport within the city area is provided by a fleet of modern omnibuses operated by the Department of the Interior. Regular rail, road and air services connect the city with the cities of Melbourne and Sydney.

(vii) *Neighbourhood Planning.* The Commission seeks, in its land use planning, to make Canberra a good city in which to live. It attempts to set a model for effective, efficient neighbourhood planning based on three principles—convenience, safety and pleasantness.

Neighbourhoods, each planned to be bounded and traversed by parklands, are normally designed to accommodate 4,000 to 5,000 persons in an area of about 400 acres. Community facilities are to be located at the centre of the neighbourhood, offering convenience of access to everybody living in the area. Provision is made for denominational schools, churches, special purpose halls, clubs, sports ovals and neighbourhood recreation reserves.

The designs seek to achieve pleasant aspects for residential sites. Roads will run with the contours in undulating sites. The preservation of views, provision for water drainage, and protection from prevailing winds, are sought, and the topography is studied to meet the convenience of pedestrians. The intention is to give a sense of compactness and unity to the neighbourhood.

Each neighbourhood will be serviced by one or two distributor roads which will lead traffic to the arterial roads connecting to the main business areas. Road patterns in the neighbourhoods will discourage indiscriminate through traffic but offer convenience to the driver, while inhibiting speed, in moving to the major traffic ways.

Pleasantness is sought through attention to open areas. The feeling of spaciousness is influenced by road widths varying from 20 feet to 34 feet, by verges varying between 15 feet and 18 feet, and a building line set back about 25 feet from the property line. Residential block sizes vary in size between eight and ten thousand square feet.

The Commission has recently endorsed an experiment in design, based on the Radburn system, for one of the new neighbourhoods in the Yarralumla Creek Valley. This will further emphasize convenience, safety and pleasantness. The feature of the Radburn system is that all the houses face pedestrian parkways with road access to the backs of houses instead of to the front.

(viii) *Private Enterprise Development.* Since 1959, there has been increasing participation by the private enterprise sector in the development of the City. The increasing investment of private funds in retail, housing and other commercial development was exemplified by the completion of seven commercial office blocks, one £2 million retail shopping block and another large retail group in the business centre of the city, and one luxury hotel and four substantial motels in other parts of the city. Private house completions rose steadily from 176 in 1957–58 to 703 in 1961–62.

6. *Canberra Today.*—(i) *Canberra as a Centre of Research.* The philosophy behind Canberra today is that it should develop as something wider than merely the Seat of Government and the centre of administrative activity. The establishment of the Australian National University and its very substantial growth since 1953 have fostered the growth of Canberra as a centre of learning and post-graduate study, and are providing an atmosphere in which important political, social and philosophical concepts can be examined. The University has engaged in research work of international importance in such fields as physics, chemistry, medicine, astronomy, international relations, etc.

The Commonwealth Scientific and Industrial Research Organization has also established very substantial research facilities in Canberra through the years, and this has given an opportunity to flavour and characterize the City, strengthening its growing claims as a centre of Australian research. Other groups, including the Bureau of Mineral Resources and the National Health Standard Laboratories, are contributing to this development.

(ii) *Education System.* Following the transfer of the territory to the Commonwealth, the New South Wales Education Department agreed to a request to continue the task of educating children in the Australian Capital Territory under an arrangement by which the Commonwealth reimbursed the New South Wales Education Department for the costs incurred. This covers staffing, inspection, curricula and examinations. The Department of the Interior has the responsibility for school buildings and equipment.

School enrolments today total 16,000 or 24 per cent. of the population. Approximately one-third of the pupils attend non-government schools. With the rapid migration of families to Canberra, secondary school enrolments are increasing faster than the population growth.

(iii) *Cultural Growth.* In its formative years, when the minimum facilities for commercial entertainment were available, Canberra was thrown heavily on its own resources. The tradition of neighbourhood entertainment then developed has been carried on, and today finds expression in several active repertory groups and artists groups, an amateur orchestra, a philharmonic society and a choral society, and in the wide range of associations pursuing intellectual activities such as chess and the study of languages.

For many years, the Albert Hall seating approximately 750 persons has been the only concert hall available to Canberra. Its drawbacks of a flat auditorium floor and inadequate stage facilities have inhibited its usefulness at a time when there has been generally in Australia a tremendous resurgence in the theatre and music. Since 1958, provision of well equipped assembly halls at several of the major high schools has materially helped the arts accommodation problem, and it is expected that the difficulty will be solved for some years to come by provision of the Civic Centre Auditorium which will accommodate about 1,200 in a fully professional atmosphere.

Canberra people have developed a special tradition in community activity, and there are very strong groups representing such organizations as the Y.M.C.A., Y.W.C.A., Scouts and Guides.

The existence of the Australian National University and such groups as the C.S.I.R.O. has led to the encouragement of public lectures, addresses, and presentation of illustrated materials not experienced on a relative scale elsewhere in Australia. In general, these meetings are open to the public, and they increase the depth and range of entertainment available.

On the lighter side, Canberra's population of 70,000 enjoys three motion picture theatres, two swimming pools, two bowling alleys, two squash courts, three golf courses, and widely distributed cricket and football fields, tennis courts, and basketball courts. There are facilities for horse riding and excellent opportunities for day-long trips into the surrounding rugged country.

Increasingly, Canberra is becoming known as a convention centre. It has a wide range of motels and hotels with standards ranging up to the luxurious, and with its variety of possible meeting halls and study areas together with its many points of interest affords excellent opportunities for conferences.

As the National Capital, and because of its unique characteristics, Canberra has developed as a substantial tourist attraction. It has been estimated that up to 500,000 people visit Canberra annually, and there is reason to suppose that as the national features become more defined the tourist trade will grow into a very substantial basic industry. The seasons offer brilliant colour contrasts, aided by the extensive use of exotic deciduous trees, the adjacent mountains offer picturesque scenery, and the river systems give excellent swimming and good fishing. With the completion of Lake Burley Griffin and development of its facilities for aquatic entertainment, Canberra could well become one of the most important tourist centres in Australia.

(iv) *Government Office Establishments.* By the beginning of 1963, 25 Commonwealth Departments were either fully established or represented in Canberra and employing 10,600 people.

In addition, Statutory Authorities such as the Tariff Board, the Australian National University, the National Capital Development Commission and sections of the C.S.I.R.O. were operating in the National Capital.

(v) *Australian Capital Territory Advisory Council.* The Advisory Council, established under the *Advisory Council Ordinance* 1936-1957, originally consisted of nominated members (one from Health Department, two from Department of the Interior and one from Works Department) and five members elected by citizens of the Australian Capital Territory. The members elected their own Chairman and were expected to meet at least once a month. The Council could advise the Minister for the Interior in relation to any matter affecting the Territory, including the making of new Ordinances, and the repeal or amendment of existing Ordinances; the Minister could refer to the Council any matter on which he desired the advice of the Council. The Council had power to request the attendance of any Commonwealth public servant to assist it. The functions of the Council are purely advisory.

In February, 1959, the Council recommended an increase in the number of elected members to eight and of nominated members to five, the additional nominated member to be from the National Capital Development Commission. However, it was decided that while the Commission would be represented by an Associate Commissioner at meetings when attendance was appropriate, it was not necessary to appoint a representative of the Commission to the Council.

7. **Conclusion.**—Vast changes have taken place in the face of Canberra in the last fifty years, indicative of the planning that has gone into the development of this city and caused such changes in the skyline.

These convey some idea of what progress has been made towards implementing the directive issued by the then Minister to the district surveyor in his search for a site for a capital in 1908, namely that he must bear in mind "the Federal Capital should be a beautiful city occupying a commanding position, with extensive views and embracing distinctive features which will lend themselves to the evolution of a design worthy of the object, not only for the present but for all time".

It was primarily to participate in the celebrations to mark the 50th Anniversary of the naming of Canberra that Her Majesty Queen Elizabeth II and His Royal Highness the Duke of Edinburgh made their visit to Australia in February and March, 1963.

## § 2. Population, Works and Services

1. **Population.**—From 1911 until 1921, the population of the Australian Capital Territory remained at about 2,000 persons. In 1922, it commenced to rise, and by 1927 was nearing 6,000. The following year, with the transfer of departments from Melbourne, it passed 8,000.

Little growth was made thereafter until the later 'thirties, and at the outbreak of the 1939–45 War the population had reached just under 13,000 persons. During the war, growth was again slow, and at the Census of 30th June, 1947, the population was 16,905 persons. Subsequently, the population showed steady increases and at the Census of 30th June, 1954, it was 30,315 persons. With further transfers of departments from Melbourne, the population reached 58,828 persons (including 527 in Jervis Bay) at the Census of 30th June, 1961. At 30th September, 1962, the population of the Territory was 67,308, made up of 64,929 in Canberra City and 2,379 in the rural districts (including 526 at Jervis Bay).

2. **Progress of Works.**—(i) *National Capital Development Commission* (see also § 1. Canberra, Fifty Years of Development, p. 127). *The National Capital Development Commission Act 1957–1960* provides for a Commission to undertake and carry out the planning, development and construction of the City of Canberra as the National Capital of the Commonwealth. The year 1961–62 was the fourth year of the Commission's operations. Construction work was carried out by means of agency arrangements with the Department of Works and private consultants.

Details of the expenditure by the Commission during each of the four years of its operations are as follows.

### NATIONAL CAPITAL DEVELOPMENT COMMISSION: EXPENDITURE (£'000)

Item	1958–59	1959–60	1960–61	1961–62
Housing and flats .. .. .	5,836	4,617	3,527	3,248
Education .. .. .	635	1,036	1,501	1,103
Commonwealth Administration .. .. .	528	738	1,391	1,119
Other Architectural Projects .. .. .	216	677	466	458
Engineering Services .. .. .	1,952	3,050	3,312	4,088
Minor Works .. .. .	170	197	255	265
Fees and Charges .. .. .	645	731	635	730
<b>Total .. .. .</b>	<b>9,982</b>	<b>11,046</b>	<b>10,987</b>	<b>11,011</b>

(ii) *Department of Works.* Apart from the work it carries out for the National Capital Development Commission, the Department of Works acts as design and supervision agent for other Commonwealth departments and instrumentalities. Total expenditure during 1961–62 on all operations amounted to £4,122,927, compared with £3,077,699 in 1960–61. Major items in 1961–62 were:—Building Works—Housing, £11,451, Other Building, £2,325,767; Engineering Works, £111,297; Repairs and Maintenance—Building, £722,122, Engineering, £817,705; Purchase of Plant, £134,585.

3. **Transport and Communication.**—Canberra is connected with the railway system of New South Wales at Queanbeyan by a line  $4\frac{1}{2}$  miles long. This line was opened for goods traffic on 25th May, 1914, and for passenger traffic on 15th October, 1923. Direct or linking services operate between Canberra and Sydney and Canberra and Melbourne.

Two airlines provide several services daily each way on the Sydney—Canberra—Melbourne route.

Regular motor-coach services link Canberra with towns in New South Wales, Victoria and South Australia.

There are three radio broadcasting stations in the Territory, 2CY and 2CN of the national broadcasting system, and 2CA, a commercial station, and two television stations, ABC Channel 3 of the national broadcasting system, and CTC Channel 7, a commercial station.

4. **Education, Health and Justice.**—The *Australian Capital Territory Education Ordinance* provides for the compulsory attendance at school of children between the ages of six and fifteen years. The Commonwealth Department of the Interior is primarily responsible for the education of children in the Australian Capital Territory. By agreement, however, the New South Wales Department of Education arranges the teaching programme in accordance with its own curriculum and provides the teaching staff. It is reimbursed for expenses incurred.

At 31st December, 1962, there were three public secondary schools in Canberra providing courses to the Leaving Certificate standard—Canberra High School, Telopea Park High School, and Lyneham High School, and two which will annually extend their courses, reaching the Leaving Certificate standard by 1964 and 1965 respectively—Narrabundah High School and Dickson High School. Seventeen schools provided courses for children in infants and primary classes, including two in the Jervis Bay area and three in rural districts. There were also a school for mentally handicapped children; a therapy clinic for children suffering from speech defects; a clinic for educational guidance; and a class for deaf children.

At the same date, there were fourteen private schools in Canberra. Of these, St. Edmund's Christian Brothers' College, the Catholic Girls' High School, the Canberra Grammar School (Boys), and the Canberra Church of England Girls' Grammar School provide courses leading to the Leaving Certificate Examination. A fifth private secondary school, Daramalan College, will annually extend its courses to reach Leaving Certificate standard in 1966.

Twenty-two pre-school centres, including an occasional care centre and a mobile unit which visits outlying areas, provide pre-school facilities for approximately 1,800 children between the ages of three and five years.

The Canberra Technical College, which follows the curriculum set by the New South Wales Technical Education Department, provides trades courses for apprentices; vocational (non-trades) courses including accountancy, women's handicrafts, and sheep and wool courses; hobbies courses including ceramics, dressmaking, art, woodwork and motor maintenance; and courses for Commonwealth authorities. In addition, the Technical College undertakes the trade testing of migrants seeking to enter skilled trades.

An area of about 250 acres has been set aside at Acton for the Australian National University. Provision has been made for the University to establish such research schools as may be thought desirable, including a School of Medical Research, and Research Schools of Physical Sciences, Social Sciences and Pacific Studies. Provision for undergraduate studies and some post-graduate study is made by the School of General Studies.

Further reference to education in the Australian Capital Territory appears in Chapter XVIII—Education, Cultural Activities and Research.

The Canberra Community Hospital serves the population of Canberra and surrounding districts. At 30th June, 1961, it had 258 beds, an honorary medical staff of 78, 5 salaried medical staff, and a nursing staff of 258. Extensions are being made to the hospital to enable it to cope better with the needs of Canberra's growing population. For further information see Chapter XVII. Public Health.

The Australian Capital Territory has a Supreme Court and a Court of Petty Sessions. There is an Australian Capital Territory Police Force, which at the end of 1960–61 numbered 89, including two policewomen.

### § 3. Production

1. **Lands.**—Reference has been made in previous issues of the Official Year Book to the general conditions of land tenure in the Territory and to the area of alienated and leased land, and Chapter IV. Land Tenure and Settlement of this issue contains statistical information on the subject. (See also § 1. Canberra, Fifty Years of Development, p. 123.)

Under the *Seat of Government (Administration) Act* 1910, Crown lands in the Territory may not be sold or disposed of for any estate in freehold except in pursuance of some contract entered into before the commencement of the Act. Leases of land in the city area are granted under the *City Area Leases Ordinance* 1936–1961, and leases of other lands under the *Leases Ordinance* 1918–1958. Land is also leased for various purposes in the city area under the *Church Lands Leases Ordinance* 1924–1932 and the *Leases (Special Purposes) Ordinance* 1925–1943, while one lease under the *Church of England Lands Ordinance* 1926 has been granted for church purposes. As considerable portions of the Territory lands are not immediately required in connexion with the establishment of the city, large areas have been leased for agricultural or grazing purposes.

The Commonwealth acquired from the State of New South Wales sovereign rights over the area comprising about 28 square miles of land and water at Jervis Bay for possible use as a port in connexion with the Australian Capital Territory. The Royal Australian Naval College is situated in this area. Some 5,000 acres of land in the area, mostly of little value agriculturally, are used for grazing purposes. The natural forest is being utilized for the production of hardwood building material and the area treated is being reforested with softwoods on an experimental basis.

2. **Forestry.**—A considerable amount of reafforestation work has been undertaken, and plantations (mainly *Pinus radiata*) have been established at Uriarra, Mount Stromlo, Pierce's Creek, Green Hills and Kowen. Experimental plots have been established in the Brindabella mountains and soil conservation areas at various locations throughout the Territory.

The total area of softwood plantations at 30th June, 1962, was 25,594 acres, of which 23,404 acres were *Pinus radiata*, the balance consisting of other softwood species, chiefly *Pinus ponderosa* and *Pinus nigra*, and 273 acres of experimental planting at Jervis Bay, mainly *Pinus radiata* and *Pinus eliottii*.

Forestry operations in the Territory were begun on Mount Stromlo in 1915. Plantings up to 1925 were chiefly on decorative lines, but since then a much wider programme has been undertaken. Sawmill timber is now being obtained, mainly from thinning operations. The yearly output of pine logs has increased from 2,500 cubic feet in 1930–31 to about one million cubic feet at the present time, the total amount cut to date being about 15.4 million cubic feet. The present output consists of approximately 50 per cent. logs yielding building material, and 50 per cent. case-making material.

In 1926, a comprehensive review was undertaken of the Territory's potentialities for forest development. The existing forest area has been placed under management and a considerable amount of survey and assessment work has been completed, resulting in the extension of operations, including fire protection, to 100,000 acres of hardwood forests in the Cotter catchment area. Hardwood log production during 1962 was 154,000 cubic feet, all of which was used in building operations in Canberra. The total amount of hardwood cut from Australian Capital Territory forests to date is about 3,854,000 cubic feet and completes exploitation in the area.

3. **Production.**—During 1961–62, the production of the more important items of the agricultural and pastoral industry was—Wheat, 32,000 bushels; wool, 2,645,000 lb.; whole milk, 1,136,000 gallons; meat (carcass weight, fresh), 3,390 tons. The numbers of livestock depastured at 31st March, 1962, were—Horses, 699; cattle, 14,169; sheep, 286,214; and pigs, 184.

As in the Northern Territory, the secondary industries established in the Australian Capital Territory are largely the service industries associated with the growth of the Territory. For the year 1960–61, factories (i.e. establishments in which four or more persons are employed or where power—other than manual—is used in any manufacturing process) numbered 123; the average number of employees was 2,093; the value of production (value added) was £3,550,000; and the value of output, £6,116,000.

## § 4. Finance

Details of revenue and expenditure for the years 1957-58 to 1961-62 as recorded in the Commonwealth Consolidated Revenue Fund are given in the following table. Public debt charges allocated to Australian Capital Territory operations, formerly included in the table on expenditure, have now been excluded, as this allocation is no longer made. Consequent on the merging of the Canberra University College with the Australian National University, expenditure figures relative to the former institution included for years prior to 1961-62 have been excluded, since expenditure on the latter institution is not regarded as territorial expenditure.

(a) Excludes electricity transactions in Australian Capital Territory Electricity Supply Trust Account. Revenue excludes particulars of water supply and sewerage, which are not available separately and are included in Rates and Other. (b) Includes premiums on sale of leases, 1960-61, £1,037,160, 1961-62, £511,970. (c) Other than Capital Works and Services. (d) Payment to Australian Capital Territory Transport Trust Account (loss on omnibus service). (e) Includes loss on operations, 1957-58, £30,000. Since 1958-59, Commonwealth-owned hostels in the A.C.T. have been operated by Commonwealth Hostels Ltd. (f) Excludes repairs and maintenance. (g) For details see para. 2 (i), p. 132. (h) Not available.

## NORFOLK ISLAND

1. **General.**—Norfolk Island, discovered by Captain Cook in 1774, is situated in latitude 29° 3' 30" S., longitude 167° 57' 5" E. Its total area is 8,528 acres, the island being about 5 miles long and 3 miles wide. From Sydney, it is distant 930 miles, and from Auckland, 660 miles. The length of the coast line is 20 miles, and its form that of an irregular ellipse. Except for a portion on the south side and the landing place at Cascade on the northern side, almost inaccessible cliffs rise from the water's edge. The climate is equable, the temperature ranging between 49° and 85° F. with a mean of 68° F. The average annual rainfall is 53 inches.

Having served as a penal station from 1788 to 1813 and from 1826 to 1855, Norfolk Island in 1856 became the home of the remaining descendants of the *Bounty* mutineers. At the Census of 30th June, 1961, the population was 844, consisting of 421 males and 423 females.

2. **Administration.**—In 1856, the island was created a distinct and separate settlement under the jurisdiction of New South Wales. In 1896, it was made a dependency under the Governor of that Colony, and finally, by the passage of the *Norfolk Island Act* 1913, it was accepted by the Commonwealth Parliament as a territory of Australia. It is controlled by the Minister for Territories through an Administrator. There is a local government body, the Norfolk Island Council, which replaced the former advisory council, retaining its advisory functions, but in addition having a certain autonomy in local government matters on the island.

3. **Economic Activity.**—The major economic activities of the island are primary production, whaling, the tourist trade and Government instrumentalities.

(i) *Primary Industries.* The soil on the island is particularly fertile, the climate equable, and the rainfall fairly evenly distributed except for a pronounced dry period in November. This enables a wide range of temperate and semi-tropical products to be cultivated. However, the island's comparative isolation and trading difficulties with New Zealand hamper production, although a relaxation of some restrictions enabled a limited quantity of out-of-season fruit and vegetables to be sent by air freight to Auckland.

Apart from whaling, bean seed is the main export industry. The island's isolation from many plant diseases, plus the fairly reliable dry period, has ensured satisfactory production. Export figures for the five years to 1960–61 were 2,680, 1,713, 3,922, 2,568, and 1,342 bushels. However, wide fluctuations in prices, as in recent years, react unfavourably against the industry. The conditions on Norfolk Island also favour the production of other types of seed. Island conditions are also conducive to good pasture growth, and as a joint product of pastoral pursuits some hides and wool are exported.

Fish and, in certain months, whales abound off the island. In the past, a number of ventures have been formed to exploit these resources. They have been short-lived owing, for the most part, to the lack of a sheltered harbour. A modern whaling station was started on the island in 1955, and production commenced during the second half of 1956. The quota of 150 humpback whales in 1956, 120 in 1957 and in 1958, 150 in 1959, and 170 in 1960 and 1961, was caught and processed at the station. However, owing to a marked scarcity of whales, only four were caught in 1962, and the station has been closed down.

An active forestry programme is being carried out to increase the resources of Norfolk Island pine and to introduce suitable types of eucalypts. Logs suitable for the manufacture of plywood are exported in limited quantities to Australia.

(ii) *Tourists.* The unique history and unusual beauty of the island have always attracted a number of tourists. Before the 1939–45 War, the only means of transport to the island was by ship, but the building of the aerodrome in 1943 made the island far more accessible and a tourist industry has developed which is at present limited only by the accommodation available, there being at present one licensed residential hotel and five guest houses.

(iii) *Government Instrumentalities.* A large proportion of the population is employed by Commonwealth Government instrumentalities, namely:—Department of Civil Aviation, Norfolk Island Administration, Overseas Telecommunications Commission, and Department of the Interior (Meteorological Branch). The bulk of the finance for the operation of these instrumentalities is supplied by the Commonwealth Government and this greatly increases the income of the island.

4. *Trade, Transport and Communication.*—Imports to Norfolk Island since the 1939–45 War have risen from £32,402 in 1945–46 to £281,563 in 1960–61. In 1960–61, the major proportion (£234,634 or 83 per cent.) came from Australia, while New Zealand supplied £7,044 or 2 per cent. Exports have risen from £9,024 in 1945–46 to £210,182 in 1960–61. The big increase is due mainly to the commencement of operations by the whaling station in the 1956–57 season. Australia was the principal market, exports thereto amounting to £200,791 in 1960–61, while exports to New Zealand and to Pacific Islands amounted to £7,916.

No duties are chargeable on goods imported into Australia from Norfolk Island if the goods are the produce or manufacture of Norfolk Island, shipped direct to Australia, and not goods which if manufactured or produced in Australia would be subject to excise duty.

A shipping service to the island is maintained at approximately seven-week intervals, from Sydney via Norfolk Island to the New Hebrides, Solomon Islands and other island groups and thence back to Sydney. Shipping between the island and New Zealand is infrequent.

A fortnightly passenger and air freight service between Sydney and Norfolk Island, maintained by Qantas Empire Airways Ltd., extends to New Zealand under charter to Tasman Empire Airways Ltd.

There are approximately 50 miles of usable road on the island. As a substantial section of the population possesses private motor cars, and taxi-cab services are available, transport is almost exclusively by motor vehicle.

The cable from Great Britain via Vancouver, Fanning Island, and Fiji bifurcates at Norfolk Island, one line connecting with New Zealand, the other with Brisbane.

5. *Education.*—Education is free and compulsory up to the age of fifteen years. The school conforms to the Australian standard of public education, ranging from kindergarten to the intermediate certificate, with a two years' super-primary course of instruction in cultural subjects and in woodwork, needlework, leatherwork, basketry and hat-making. The teachers are provided by the New South Wales Education Department, but they are paid by the Norfolk Island Administration. The number of scholars enrolled at 30th June, 1961, was 152.

6. *Judiciary.*—The judicial system of the Territory was reconstituted by the *Norfolk Island Act 1957* which was proclaimed in the Territory on 7th April, 1960. There is now a Supreme Court of Norfolk Island and a Court of Petty Sessions, which replaced the Court of Norfolk Island in its full and limited jurisdictions. The Supreme Court is the highest judicial authority in the Territory with original criminal and civil jurisdiction. The jurisdiction of this Court is exercised by a judge sitting in Court to the extent provided by the *Supreme Court Ordinance 1960* or any other Ordinance or by rules of Court, and in all matters of practice and procedure by a judge sitting in Chambers. The jurisdiction of the Court of Petty Sessions is exercised by a Chief Magistrate or any three Magistrates other than the Chief Magistrate. This Court has jurisdiction to hear and determine in a summary manner under the provisions of the *Court of Petty Sessions Ordinance 1960*. There is right of appeal to the Supreme Court from the Court of Petty Sessions, and, in certain circumstances, a right of appeal to the High Court of Australia from judgments of the Supreme Court.

7. *Finance.*—The revenue of the Territory, together with an annual grant from the Commonwealth Government for administrative expenses, is paid to the credit of the Norfolk Island Trust Fund, and advances for administrative and developmental expenses are drawn from the account. The principal items of revenue and expenditure for the five years 1957–58 to 1961–62 were as follows.

**NORFOLK ISLAND: REVENUE AND EXPENDITURE**

**PAPUA AND NEW GUINEA**

NOTE.—The information under this heading is applicable to both the Territory of Papua and the Trust Territory of New Guinea. For details of the respective Territories *see* pages 146 (Papua) and 151 (New Guinea) and following pages.

**§ 1. Administration**

The *Papua-New Guinea Provisional Administration Act 1945-1946*, which provided for the transfer back of control from the military authorities to civil authorities after the 1939-45 War, was repealed by the *Papua and New Guinea Act 1949* which came into force on 1st July, 1949. The latter Act approved the placing of the Territory of New Guinea under the International Trusteeship system and provided for an Administrative Union of the Territory of Papua and the Territory of New Guinea with one Administrator, one Supreme Court and one Public Service.

Provision was made for an Executive Council of not less than nine officers of the Territory, who shall be appointed by the Governor-General, and a Legislative Council consisting of twenty-nine members, namely:—the Administrator; sixteen officers of the Territory (who shall be known as official members); three non-official members possessing such qualifications as are provided by Ordinance and elected, as provided by Ordinance, by electors of the Territory; three non-official members representing the interests of the Christian missions in the Territory; three non-official native members; and three other non-official members.

The Legislative Council was inaugurated on 26th November, 1951, by His Excellency Sir John Northcott, while Administrator of Australia.

In October, 1960, the Commonwealth Parliament passed amendments to the *Papua and New Guinea Act* to change the composition of the Legislative Council, the new Council consisting of 37 members, namely:—the Administrator; 14 official members (who may be either indigenous or non-indigenous); 12 elected members (six elected by the native people); and 10 nominated members, of whom at least five will be indigenes. Eventually, elected members will be chosen by voters of all races registered on a common roll. The *Papua and New Guinea Act 1960* also replaced the Executive Council with the Administrator's Council, consisting of the Administrator and six other persons, appointed by the Minister for Territories, who shall be members of the Legislative Council.

## § 2. Judiciary

The courts which exercise jurisdiction within the Territory are:—

- (i) The Supreme Court of the Territory of Papua and New Guinea;
- (ii) Courts of Petty Sessions (Papua), District Courts (New Guinea);
- (iii) Courts for Native Matters (Papua), Courts for Native Affairs (New Guinea); and
- (iv) Warden's Courts.

The Supreme Court is the highest judicial authority in the Territory and has unlimited criminal and civil jurisdiction. Courts of Petty Sessions and District Courts have criminal jurisdiction over the less serious offences which are punishable on summary conviction, but have no jurisdiction to try treason crimes, misdemeanours and other indictable offences. They also exercise a limited civil jurisdiction. The jurisdiction of the Courts for Native Matters and Native Affairs covers offences by indigenous inhabitants against the Native Administration Regulations, and civil actions of any kind other than matters relating to the ownership of land or water if all parties are indigenes. The Administrator has power to establish, in respect of each gold field or mineral field, warden's courts with jurisdiction over civil cases respecting mining or mining lands held under the *Mining Ordinance* and offences against the mining laws of the Territory.

In addition, there are the Native Land Commission set up under the *Native Land Registration Ordinance* 1952 and the Commissioner of Titles appointed under the *New Guinea Land Titles Restoration Ordinance* 1951–1955, whose function is to inquire into and determine what land in the Territory is the rightful and hereditary property of persons or communities by customary right; and the persons or communities by whom, and the shares in which, that land is owned.

## § 3. Agriculture and Animal Industry

1. **Soils.**—Although a large part of Papua and New Guinea is covered by skeletal soils unsuitable for agriculture, there are extensive areas in all districts where fertile soils occur, suitable for growing a wide range of crops. Most of the agriculture of the Territory up to the present has been on soils on the coastal plains, which, apart from the swamp soils, consist mainly of alluvium and podsolized alluvium. So far, these have been mostly under coconut plantations, although other crops such as rubber and cocoa have also been grown. The swamp soils, of which there are extensive areas in the delta plains and other parts of the Gulf of Papua and in smaller areas, are found intermittently around the coasts and along the lower reaches of the rivers, and are in general quite unsuited to any form of agricultural development.

Volcanic soils probably offer the greatest prospects for development. They are found mostly on the central plateau and southern foothills of the main island, but there are also areas in New Britain (particularly in the Gazelle and Willaumez Peninsulas), Bougainville and New Ireland, as well as in numbers of smaller islands. Other rich soils are the alluvials of the river valleys. The largest single area of this type is in the trough occupied by the Ramu and Markham Rivers.

2. **Climate.**—The climate, particularly the rainfall, over so wide an area as Papua and New Guinea, with its numerous islands and varying elevations, naturally presents many variations. Generally speaking, the climate is moist and tropical, except at high altitudes. There are only small differences in both daily and seasonal extremes. The Territory has no winter and summer, and no great variation in day-length over the year. The two seasons which are experienced are generally described as the “south-east” and the “north-west”, corresponding with the periods of the year when the south-east trade winds and the north-west monsoons direct the main Territory air-flow. The south-east season prevails approximately from May to October, the trade winds attaining maximum velocities during July and August. The north-west monsoon operates over a considerably shorter period, from the end of December to about March. During the periods between these seasons, November and early December, and about March to April, there are two short spells of calm weather.

Rainfall varies considerably, from an average annual rainfall of 245 in. at Gasmata in New Britain and 231 in. at Kikori in Papua, to about 88 in. at Wewak in New Guinea and 40 in. at Port Moresby.

Although the Territory has no summer and winter, it has a wide temperature range, due to differences in altitude, varying from an absolute highest temperature of about 100° F. along the coast to freezing point on its highest peak, Mt. Wilhelm (15,400 ft.).

Humidity in the Territory is very high throughout the year. Some coastal stations register an average relative humidity of more than 90 per cent. Humidities below 60 per cent. are rare at coastal stations, average figures varying from 80 per cent. at 9 a.m. to 65 per cent. at noon and 75 per cent. at 3 p.m. Humidity in mid-mountain forests appears to be higher than in the lowlands, while in the mossy forests there are periods when the whole belt is saturated.

3. *Land Tenure.*—There is considerable variation throughout the Territory in the nature of customary ownership of land. In most areas, some rights remain in the landholding group, and individuals within the group have limited rights of use, either for life or for a shorter period. Thus the normal system by which the rights of ownership in land use are acquired is by birth to a landholding group. Transfer of rights between individuals by sale and purchase appears to have been unusual in the past, but this practice is now an established custom in some localities and appears to be increasing. Inheritance may be based on either patrilineal or matrilineal descent, or both. In parts of the Territory, however, there is a tendency for the whole inheritance system to change, particularly in communities where it is based on matrilineal descent. Following a close study of the problems in relation to land holdings by indigenes, the Government has laid down the following broad principles of policy.

The ultimate and long-term objective in Papua and New Guinea is to introduce throughout the Territory a single system of land holding regulated by the central Government by statute, administered by the Department of Lands of the central Government, and providing for secure individual registered titles after the pattern of the Australian system.

Only the central Government (i.e., the Administration working through the Department of Lands and the Registrar of Titles) may issue and register land titles.

Land subject to native custom remains subject to native custom only until it is taken out of custom either by acquisition by the Administration or by a process, to be provided for by Ordinance of the Territory, of conversion of title to an individual registered title.

Upon either acquisition or conversion of title, compensation is to be provided in respect of extinction of rights under native custom.

Land held under native custom may not be acquired outside of native custom by other than the Administration.

For the time being, land may not be acquired by the Administration unless the native owners are willing to sell and in the opinion of the Administration the land is not required by them; and conversion of title from native custom to individual registered title may take place only if the majority of those interested in the land under native custom consent to conversion and the method of conversion.

The services of Native Land Commissioners are to be used, as a first priority, on investigations into claims by the Administration that land is ownerless and may therefore be declared administration land, on investigation into the ownership under native custom of land proposed to be acquired by the Administration, on settlement of disputes about the ownership of land held under native custom, and, when legislative provision has been made, on investigations into the rights held under native custom in land proposed to be converted to individual registered title. The aim is that all the time of the Commissioners should be taken up with this work. To the extent that at any time it is not, the Commissioners should continue investigations into the holding of land under native custom; the results of such investigations are to be recorded for use in connexion with future acquisitions or conversions of title, but are no longer to be registered.

Consideration is being given to the legislation and administrative steps necessary to put this policy into effect.

**4. Suitable Crops.**—The crops which can be grown in Papua and New Guinea include coconuts, rubber, tea, coffee, cocoa, fibres, rice, pepper, tobacco, peanuts, kapok, cassava, ginger, cinchona, nutmeg, vanilla, tropical fruits and vegetables, sago and tung oil, but of these, the only crops of any commercial importance are coconuts, cocoa, rubber, coffee, peanuts and passion fruit.

**5. Plantation Agriculture.**—*Coconuts.* Territory coconut plantations suffered severely from damage and neglect during the 1939–45 War. Rehabilitation was rapid, however, and in 1960–61 about 667 plantations, together with native coconut stands, produced 110,412 tons of copra and exported 74,839 tons valued at £4,610,423. In addition, 19,625 tons of coconut oil, valued at £1,969,389, and about 11,506 tons of copra oilcake and meal, valued at £260,474, were exported in 1960–61. A copra crushing mill was established at Rabaul in 1952. Native stands produce about 25 per cent. of the copra exported.

*Rubber.* Exports of rubber have increased from 1,952 tons, valued at £802,177, in 1950–51 to 4,682 tons, valued at £1,210,722, in 1960–61.

*Cocoa.* Exports of cocoa beans increased from 317 tons, valued at £92,181, in 1950–51 to 10,015 tons, valued at £1,982,563, in 1960–61. Nearly 50 per cent. of the exports go to Australia. At present, native growers produce about 25 per cent. of the cocoa production in the Territory.

*Coffee.* Exports of coffee rose from 33 tons, valued at £8,359, in 1950–51, to 3,444 tons, valued at £1,557,306, in 1960–61. Of the 20,300 acres planted to coffee in the Territory, about 60 per cent. is in native-owned groves and the rest grown by Europeans in plantations. The bulk of the Territory coffee production is marketed in Australia.

**6. Native Agriculture.**—Most of the indigenous inhabitants of Papua and New Guinea are agriculturalists producing fruit and vegetables for their own consumption. The crops grown vary according to environment and altitude, and include yams, taro and sweet potatoes, coconuts, bananas, papaws, maize, sugar-cane, cassava, beans, peanuts, rice, cucurbits and tobacco. Sago is the staple food in the extensive semi-inundated areas which occur along the lower valleys of the major rivers. In these areas, it is cut largely from naturally occurring stands. In other parts of the country, small areas of sago are grown along stream banks and in swampy patches and are regarded as a reserve in times of poor harvest. In recent years, the indigenes have taken up the production of introduced crops such as peanuts, rice, cucurbits, and maize for their own consumption and cocoa and coffee for export. Some small-scale rubber growing is now being undertaken. In coconut areas, large quantities of copra are produced. In 1960–61, native production of copra was 26,900 tons, and that of cocoa and coffee about 2,000 tons and 750 tons respectively. In many localities, the indigenes follow a farming system known as bush fallowing rotation, which has been described in Official Year Book No. 48 and previous issues.

The growing of food is done by both the men and women. The division of work is usually clearly defined within the village itself, but this division is not necessarily the same in all areas. Generally it is found that felling the forests is always done by the men, and carrying the harvested food home to the village is nearly always done by the women. Other work, however, such as cultivating, planting and weeding may be done by either men or women according to the customs of the particular village or area.

The advancement of native agriculture for local food supply and improved land use in village gardens, as well as for economic production of crops for sale, have a high priority in Government policy for the Territory. A five-year (1962–63 to 1966–67) programme for intensification of agricultural work among the indigenous inhabitants of the Territory is being implemented.

**7. Animal Industry.**—Livestock in the Territory as at 31st March, 1962, included cattle, sheep, goats and pigs, approximate figures for each species being:—cattle, 23,508; sheep, 361; goats, 2,932; and pigs, 5,490. Other livestock includes horses, mules and poultry. These figures represent European-owned livestock only; native-owned livestock consists almost entirely of pigs and poultry.

A number of British breeds of cattle are represented in Territory herds. For dairying, Jersey and Australian Illawarra Shorthorns are most popular; Black Polled, Polled and Horned Shorthorns, and Red Polled cattle are raised for meat production. Under good management these breeds have done well in the Territory. There are a small number of Romney Marsh sheep at Nondugl in the highlands of New Guinea.

8. *Co-operative Societies.*—Co-operatives are under the supervision and guidance of a Registry of Co-operatives within the Department of Native Affairs, and trained staff are stationed in districts throughout the Territory. Societies fall into two main categories: primary and secondary. The primary consist of marketing and consumer retailing bodies dealing directly with individual members. A society which combines both these activities is termed a dual purpose primary. Secondary organization is represented by associations of societies, formed to achieve an amalgamation of purchasing power in retail consumer store operation and marketing volume in relation to agricultural production, and to concentrate capital to facilitate the purchase of large assets such as shipping, land transport, agricultural machinery, etc.

For the year ended 31st March, 1962, primary societies numbered 242, with a membership of 77,965, a total capital of £576,551, and a turnover of £1,113,877. Secondary organizations (year ended 31st March, 1961) numbered 13, with 196 member societies, a total capital of £262,747, and a turnover of £530,744.

#### § 4. Native Labour

Most of the indigenous inhabitants are farmers who are living mainly a subsistence existence and are comparatively free of economic or other pressures forcing them into wage employment.

Labour policy is designed to serve the general aim of the advancement of the people of the Territory and the development of its resources, particularly by controlling the nature and rate of social change.

As from 6th October, 1960, previous native labour legislation was superseded by the *Native Employment Ordinance 1958–1961*, which covers the great majority of native workers. The Ordinance divides the native labour force into three categories: agreement workers, casual workers and advanced workers.

*Agreement workers* are those who enter into an agreement with an employer to work for a specified period. The maximum agreement period for workers unaccompanied by their dependants is two years, but other workers may work for periods up to four years.

*Casual workers* are those workers who are employed without an agreement, and their employment may be terminated at their own or the employer's desire at any time. Casual workers can only be employed within their own home sub-district except where the place of employment is within 25 miles of their home, or unless they are holders of an Advanced Workers' Certificate, or are employed on a casual basis by their former employer under an agreement while awaiting transport to their homes after or within one month after the termination of their agreement, or unless the Administration may otherwise direct.

Workers who have a skill which should enable them to secure remunerative employment and whose education and social advancement enables them to look after themselves and their families properly in a cash economy may be classed as *Advanced Workers* and be issued with an Advanced Workers' Certificate. Advanced workers may be employed anywhere in the Territory and be paid a cash wage which includes cash in lieu of rations, clothing and other articles as prescribed under the Ordinance.

The Ordinance prescribes a minimum cash wage of 390s. a year, equivalent to 30s. a lunar month. In the case of an employee who has more than one year's service with an employer, the prescribed minimum wage is 455s. a year. For workers engaged in heavy labour the wage is increased by 130s. a year. In addition to the cash wage, an employer is required to provide the worker, free of charge, with rations, clothing and other articles such as blankets, eating utensils and toilet gear. Rations take into account the dietary needs of

the worker, and clothing and blanket issues vary according to location. In addition, the employer is required to provide accommodation and to arrange for the movement of the agreement worker from and to his home village at the beginning and at the end of the contract, without cost to the worker.

The Ordinance requires the employer to provide, free of charge, first aid equipment for the use of his employees and to provide medical supervision of the employees on a full time basis. Medical and hospital treatment is provided at the employer's expense. Rations, clothing, etc., accommodation, medical and hospital care have also to be provided to the workers' dependants when accompanying him with the employer's consent.

The maximum working week without penalty rates is 44 hours, and provision is made for overtime, call-out duty and a stand-by rate. Provision is made under the *Workers' Compensation Ordinance 1958-1960* for compensation in the case of injury or death.

Indigenes employed in the native constabulary come under the provisions of the *Royal Papua and New Guinea Constabulary Ordinance 1955-1959*, while those employed in the Auxiliary Division and the Third Division of the Territory Public Service come under the provisions of the *Public Service Ordinance 1949-1960*.

### § 5. Secondary Industries

Secondary industries which have been established in the Territory are most frequently of the type associated with the elementary processing for export of local products such as copra, rubber, cocoa, coffee, passion-fruit and timber on or near the plantations. There has been a gradual growth in the manufacture of more highly processed products, and industries already established include a paint factory, twist tobacco factories, a copra crushing mill, a plywood factory, biscuit factories, soft drink factories and breweries. Large service industries already well established include air, sea and land transport services, and the building industry, which is serviced by sawmilling, joinery, furniture and metal industries, concrete products manufactures, brickworks, etc.

A wide variety of maintenance facilities is also available to service the various Territory industries, including engineering workshops, slipways, etc.

The following table shows details of factory operations for the year ended 30th June, 1961.

**TERRITORY OF PAPUA AND NEW GUINEA: FACTORY OPERATIONS, 1960-61**

Particulars	Class of industry				
	Industrial metals, machines and conveyances	Food, drink and tobacco	Sawmills, plywood and joinery	Other industries (a)	Total

(a) Includes coconut oil processing, tyre retreading, paint manufacture, printing, powerhouses, etc.

(b) Value added.

## § 6. Finance

1. General.—The following table shows particulars of the financial operations of the Papua and New Guinea Administration for the years 1957–58 to 1961–62. Further information on each Territory will be found on pages 151 and 157.

## TERRITORY OF PAPUA AND NEW GUINEA: REVENUE AND EXPENDITURE (£)

2. Taxation.—The main forms of taxation are income tax, personal tax and import duties.

*Income Tax* was imposed on 1st August, 1959, to operate from 1st July, 1959. The scale of taxation is about 50 per cent. of the tax payable on the same taxable income in Australia. Deductions for dependants the taxpayer is maintaining, and maximum deductions for medical, dental and educational expenses are considerably higher than those allowed in Australia. The tax on public companies is at a flat rate of 4s. in the £1, which is a little over half the predominant rate of company tax in Australia, while on private companies the rate is 2s. 6d. in the £1 for the first £5,000 and 3s. 6d. for the remainder,

and generally comparable deductions are allowed. On 1st January, 1958, a *Personal Tax* was introduced for all males (including non-indigenous) of 18 years of age and over in Papua and New Guinea. The maximum tax is £2 per annum; the tax assessed is subject to the taxpayers' ability to pay, and consequently large areas have been exempted. Native Local Government Councils (which are formed voluntarily by the indigenes) are, however, empowered to levy taxes on villagers for the purpose of providing for local services carried out by the Councils. These taxes are set off against the indigene's Personal Taxation.

The present *Customs Tariff* provides high revenue rates on imports of ale, spirits, tobacco and cigarettes, timepieces, cigarette papers, fancy goods and jewellery, but allows entry of most necessities affecting living and building costs duty free, or at a low rate of duty. There is a by-law provision under the Customs Tariff to enable duty-free admission to be granted for plant, machinery and chemicals to be used mainly for industrial and development purposes and for goods imported by passengers. No preferential rates are specified in the schedule. Export duties imposed on copra, cocoa, rubber, mother-of-pearl, trochus and burgos shell, and gold were repealed in July, 1959.

Provision is made in the *Australian Customs Tariff (Papua and New Guinea Preference)* 1936 for the free entry into Australia of certain goods produced in and imported direct from the Territory (see Chapter XIII. Oversea Trade), and a proclamation of 25th September, 1935, exempted from primage duty goods produced or manufactured in the Territory.

## PAPUA

### § 1. General Description

1. *Area, etc.*—Papua lies wholly within the tropics. The northernmost point touches 5° S. latitude; its southernmost portion, comprising Tagula and Rossel Islands, lies between 11° S. and 12° S. latitude. It is separated from Australia by Torres Strait. The length of Papua from east to west is upwards of 920 miles; towards either end the breadth from north to south is about 200 miles, but about the centre it is considerably narrower. The Territory comprises also the islands of the Trobriand, Woodlark, D'Entrecasteaux and Louisiade groups. The length of coast-line is estimated at 3,664 miles—1,728 on the mainland, and 1,936 on the islands. The total area is 90,540 square miles, of which 87,540 are on the mainland, and 3,000 on the islands. A reference to the physical characteristics of the Territory appears in previous issues of the Official Year Book (see No. 18, p. 633).

2. *Administration.*—Particulars of the early administration of Papua are given in Official Year Book No. 19, page 576. The Territory was placed under the authority of the Commonwealth on 1st September, 1906, by proclamation issued in pursuance of Letters Patent of 18th March, 1902, and was accepted by the Commonwealth by the *Papua Act*, 1905, which came into force by virtue of the aforesaid proclamation. The transfer was made under the authority of Section 122 of the Constitution. The Territory is under the control of the Commonwealth, but not included within it, and is divided into six magisterial districts, Southern Highlands, Western, Gulf, Central, Milne Bay and Northern.

### § 2. Population

1. *Non-indigenous Population.*—At the Census of 30th June, 1961, the non-indigenous population of Papua was 5,490 males, 4,304 females, 9,794 persons. The total non-indigenous population at the Censuses of 1921, 1933, 1947 and 1954 was, respectively, 2,078, 2,173, 3,239 and 6,313 persons.

The European population of Papua increased slowly, and with some reversals in trend, from less than 700 in 1906, the year in which the Territory came under Commonwealth control, to 1,343 at the Census of 1921. At the 1961 Census, it amounted to 8,260 persons.

2. *Indigenous Population.*—It is not possible to give exact data regarding the number of indigenes because part of the interior is not as yet under complete Government control. However, the enumerated and estimated population of the Territory of Papua at 30th June, 1961, numbered 513,648 persons. This comprised 446,308 enumerated persons (236,676 males and 209,632 females) and 67,340 estimated. The total number was distributed through districts as follows:—Southern Highlands, 167,055; Western, 53,277; Gulf (including the former Delta district), 56,281; Central, 100,807; Milne Bay, 87,179; and Northern, 49,049.

### § 3. Land Tenure

The basic principle of the land laws of Papua is that all land not specifically alienated by due process from the native people, or established to be vacant and ownerless, is native land. At 30th June, 1961, of the total area of Papua, approximately 58,000,000 acres, only 1,869,381 acres had been alienated. The distribution of alienated land at 30th June, 1961, according to tenure, was as follows:—held by private non-indigenous inhabitants freehold, 24,280 acres, leasehold, 345,131 acres; native reserves, 68,197 acres; other, including public reserves and land available for leasing, 1,431,773 acres.

Although a small amount of freehold land exists in Papua, no further estates in freehold can be granted under the provisions of the *Land Ordinance* 1911–1961 of Papua. Leases of various kinds may be granted by the Administration. The principal types of leases available are agricultural leases, pastoral leases, leases of town allotments, business leases and residence leases of other than town allotments, and various forms of special leases and licences over land. Leasehold terms are liberal, and, in general, leases may be granted for periods of up to 99 years. Rent is based on the unimproved value of the land.

Leases of Crown land are granted by the Administrator following a land use examination, advertisement of leases available and consideration of applications by the Land Board. Dealings in privately-owned land are a matter for private treaty. Native-owned land, however, cannot be acquired or leased from the native owners by private individuals. The Administration alone may purchase native-owned land, and then only if the owners are willing to sell and the Administration is satisfied that the owners do not require, and are not likely to require, the land.

The registration of titles, interests and dealings in alienated land is provided for under the *Real Property Ordinance* 1913–1955 modelled on the Torrens system of land registration. A start has been made on the recording of native land ownership under the *Native Land Registration Ordinance* 1952.

### § 4. Production

1. **General.**—The products of the Territory are obtained principally from its agricultural, forestry, mining and fishing industries. Native subsistence agriculture, fishing, and hunting produce most of the food requirements of the indigenous population. The main native agricultural products are taro, yams, sweet potatoes, bananas and papaws. Peanuts are becoming of increasing importance in native diet. Non-indigenous enterprise produces most of the commodities exported. Indigenes, however, do produce copra for export, while native enterprise in other fields of agricultural production for export purposes, e.g., cocoa and coffee, is being encouraged. The principal agricultural products of Papua for the export trade are copra and rubber. Native production of copra is increasing. Practically all the timber milled during 1960–61 was absorbed by local building requirements. The main products of fisheries exported from Papua are trochus and green snail shell. Gold, manganese, zinc-lead and copper ores have been mined in commercial quantities in the past, but current production is limited.

For the sake of convenience, agricultural and pastoral conditions in Papua and New Guinea have been dealt with as a whole, and reference should be made to pages 140–3 for information on the soils, climate, crops, methods of cultivation, etc., throughout both Territories. The following paragraphs relate to forestry, mining, fisheries and water-power resources in Papua.

2. **Forestry.**—A general description of the forest policy which applies in Papua as well as in the Trust Territory of New Guinea is given under the heading, Timber, on page 153.

Mixed species tropical rain forest covers most of Papua, although north-east of Port Moresby there is an area of monsoonal savannah country. Because of the mixed nature of the timbers in any one area, their utilization on an economical basis is somewhat difficult. Mangroves occur in large areas fringing the Gulf of Papua. Forestry field work is carried out in Papua with a view to assessing the forest resources available and also to survey areas subsequently made available for cutting.

At 30th June, 1961, 33 permits and seven licences were current. The total areas of forest involved were 223,060 acres and 41,211 acres respectively. The total number of mills was 18, and the total sawn-timber produced for the year was 3.3 million super. feet, most of which was used locally.

3. **Mining.**—Although a large number of minerals have been found in Papua, including platinum, gold, silver, copper, tin, lead, zinc, cinnabar, iron, osmiridium, manganese, sulphur, chromite, gypsum, and lignite, current mineral production is not of economic importance.

Gold was discovered in 1888 and has been found since in many parts of Papua. Before the 1939–45 War, gold was an important item in the Territory's production, but it has since dwindled to insignificance.

Large quantities of copper ore were mined and exported up to 1940. Good samples of galena (sulphide of lead) have been obtained, but other minerals are not found in commercial quantities.

Since the search for oil began in Papua in 1911, over £36 million has been spent. The existence of petroleum has been traced at scattered intervals over a large area, but commercial quantities have not been discovered. At 30th June, 1962, four companies held petroleum prospecting permits and licences under the provisions of the *Petroleum (Prospecting and Mining) Ordinance* 1951–1961. Oil prospecting is, at present, confined mainly to the Gulf and Western Districts.

4. **Fisheries.**—Surveys have been carried out of the fisheries resources of Papua. These have been demonstrated to be considerable, and efforts are being made to increase the present small degree of utilization. Assistance is also being given by the Administration in improving the indigenous methods of fishing, and the use of improved gear is being encouraged by extension workers. Shell fishing, particularly trochus, provides the main cash return, exports being valued at £20,000 in 1960–61.

5. **Water Power.**—Most of the rivers in Papua carry a large volume of water from a great height over a relatively short distance, thereby offering opportunities for the installation of hydro-electric power plants. It is estimated that there is at least 10 million horse-power available for this purpose.

## § 5. Trade, Transport and Communication

1. **Imports and Exports.**—(i) *Total Values.* The table below summarizes the values of imports and exports for the years 1956–57 to 1960–61.

### TERRITORY OF PAPUA: IMPORTS AND EXPORTS

(£)

Particulars	1956–57	1957–58	1958–59	1959–60	1960–61

Other .. .. .	29,445	20,706	38,055	43,083	40,718
<b>Total .. .. .</b>	<b>2,261,734</b>	<b>2,082,667</b>	<b>2,564,551</b>	<b>2,986,448</b>	<b>2,468,161</b>

2. **Shipping.**—In 1960–61, 205 British vessels and 47 of other nationalities called at Territory ports and discharged 99,746 tons of cargo and loaded 28,249 tons.

Regular passenger and freight services operate between Australia, New Guinea and Papua. Vessels trading between Australia and the East also call at Territory ports, and there are occasional ships to the United Kingdom, vessels of one shipping line trading between the United Kingdom and Australia calling at Port Moresby approximately at quarterly intervals. Coastal and inter-island shipping services are maintained by vessels operating from the two principal ports of Port Moresby and Samarai.

3. **Other Forms of Transport and Communication.**—Air services link Papua with Australia, New Guinea, the British Solomon Islands and Hong Kong. There were 62 aerodromes and seaplane alighting areas in Papua at 30th June, 1961, and of these 13 were the responsibility of the Department of Civil Aviation, 29 were operated and maintained by the Administration, and 20 owned and maintained by Missions, plantation and mining interests. Much of the internal traffic and freight is carried on a charter basis. Regular air services operate from Port Moresby to Daru in the west, Samarai and Popondetta in the east, and to various centres in New Guinea.

At 30th June, 1961, there were 1,763 miles of road in Papua, of which 727 miles were suitable for medium and heavy traffic, the greater proportion being located in the Central and Northern Districts.

Telephone services operate in the main centres. The radio station at Port Moresby for both transmission and reception is jointly shared by the Overseas Telecommunications Commission and the Administration. The former provides a service between Papua, Australia and the Territory of New Guinea, while the latter operates radio telephone and radio telegraph services from Port Moresby, Samarai and Daru to 113 outstations. A direct telegraph service operated by the Overseas Telecommunications Commission, on a schedule basis, is in operation between Port Moresby and West New Guinea.

Medium and short-wave programmes are broadcast from the Australian Broadcasting Commission stations 9PA and VLT6 located at Port Moresby.

## § 6. Education and Health

1. **Education.**—Education in the Territory is provided by the Administration and various Mission Organizations. Schools for indigenes have also been established by Native Village Councils. The *Education Ordinance* 1952–1957 enables the Administration to establish an education advisory board, district education committees and European and native schools, and to grant financial aid for educational purposes. European teachers are recruited from Australia, and native teachers are trained in the Territory by the Administration and Missions. During the year ended 30th June, 1961, 131 schools were maintained by the Administration for 11,457 children, of whom 786 were Europeans, 87 Asian or of mixed race, and 10,584 indigenes. The total number of pupils in the various grades of mission schools was 48,700, of whom there were 247 Europeans, and 480 Asian or of mixed race. To assist the educational work of the Missions, the Administration provides expert advice, educational equipment, and text-books. In addition, the sum of £122,164 was distributed among the Missions as grants-in-aid during the year ended 30th June, 1961.

2. **Health.**—The Department of Public Health of the Territory of Papua and New Guinea has the general oversight of all dental and medical services. The Department has the following seven functional divisions: medical services; preventive medicine; medical training; infant, child and maternal health; medical research; administration; and mental health. The services for the Territory of Papua are under the administrative control of a regional medical officer, with headquarters staff at Port Moresby.

At 30th June, 1961, the Administration had established 27 general hospitals, six special hospitals for the treatment of tuberculosis, two hospitals (including special wards) for the treatment of Hansen's disease, one Hansenide-tuberculosis hospital and one mental hospital; the Missions had established 24 general hospitals, with special wards at Balimo and Tari for the treatment of Hansen's disease. There were 399 village aid posts or medical centres (112 Mission) and 123 maternal and child welfare clinics (43 Mission). School medical examinations, immunization, ante-natal and post-natal care and pre-school services are also provided. The Missions employ their own doctors and nurses in their medical establishments.

For some years, suitably qualified indigenes have attended the Central Medical School at Suva, Fiji, to be trained as Assistant Medical Officers. In 1959, the Administration began training to a similar standard at the Papuan Medical College which is associated with the Port Moresby General Hospital. The College, planned to accommodate 600 students eventually, is being built in stages. The course consists of a preliminary year and five years further study. Training for nurses and medical auxiliaries in many categories is also being provided.

The cases treated in hospital are mainly malaria, tropical ulcers, pneumonia, tubercular infections and tuberculosis, bronchitis and confinements.

## § 7. Finance

The following table shows the principal items of revenue and expenditure for the Territory for each year from 1957-58 to 1961-62.

### TERRITORY OF PAPUA: REVENUE AND EXPENDITURE (f)

Item	1957-58	1958-59	1959-60	1960-61	1961-62

<b>Total Expenditure ..</b>	<b>6,401,155</b>	<b>6,815,691</b>	<b>7,647,615</b>	<b>8,920,022</b>	<b>10,692,908</b>

(a) Includes Harbour Dues and Wharfage.

For particulars of the finances of the combined Territory administration, *see* page 145.

## TRUST TERRITORY OF NEW GUINEA

### § 1. General Description

1. Area, etc.—The land area of the Territory of New Guinea is about 93,000 square miles, and the area, including the sea, within the lines drawn through its extreme outer points is more than one million square miles. As the coast lines have not been completely surveyed, the areas of the various islands are known only approximately.

The approximate areas of the principal islands, together with the small islands adjacent thereto, are as follows:—North-East New Guinea, also called the mainland, 70,200 sq. miles; Bismarck Archipelago—New Britain, 14,100 sq. miles, New Ireland, 3,340 sq. miles, Lavongai, 460 sq. miles, Admiralty Islands, 800 sq. miles, total Bismarck Archipelago, 18,700 sq. miles; Solomon Islands—Bougainville, 3,880 sq. miles, Buka, 220 sq. miles, total Solomon Islands, 4,100 sq. miles; grand total, 93,000 sq. miles.

Information regarding physiography and climate will be found in Official Year Book No. 22, page 613, and in the *Official Handbook of the Territory of New Guinea*.

2. **Early Administration.**—On 17th September, 1914, the Acting Governor of German New Guinea signed terms of capitulation with the officer commanding a Naval and Military Expedition sent from Australia, and thereafter the Territory was under military administration until the establishment of Civil Government on 9th May, 1921.

In 1919, it was decided by the Principal Allied and Associated Powers that the Territory of New Guinea, which Germany gave up as one of the terms of peace, should be entrusted to the Government of the Commonwealth under Mandate from the League of Nations. However, the issuing of the Mandate was delayed, and it was not until 17th December, 1920, that its terms were settled, and the Mandate itself did not reach Australia until April, 1921.

The terms of the Mandate are given in Official Year Book No. 33 (*see* p. 264).

For particulars of the administration of the Territory of New Guinea prior to the setting-up of the Papua and New Guinea Administration, *see* Official Year Book No. 36 and earlier issues, and for events following the outbreak of the Pacific War *see* Official Year Book No. 37 and subsequent issues.

3. **Trusteeship (1946).**—The Commonwealth Government undertook to place the Territory of New Guinea under the Trusteeship System established under the Charter of the United Nations. The Trusteeship Agreement for the Territory, under which the Government of Australia is the sole administering authority, was approved by the General Assembly of the United Nations Organization on 13th December, 1946. The terms of the Agreement are shown in Official Year Book No. 39, pages 355–7.

For administrative purposes, the Territory is divided into the following nine districts:—New Britain, comprising New Britain and adjacent islands; Morobe, Madang, Eastern Highlands, Western Highlands, and Sepik on the mainland; New Ireland, comprising New Ireland, Lavongai and adjacent islands; Manus, comprising the Admiralty Group; and Bougainville in the Solomon Islands. Each district is administered by a District Commissioner.

## § 2. Population

1. **Non-indigenous Population.**—At the Census of 30th June, 1961, the non-indigenous population of the Territory was 9,158 males, 6,378 females, 15,536 persons. The total non-indigenous population at the Censuses of 1921, 1933, 1947 and 1954 was, respectively, 3,173, 5,216, 6,200 and 11,442 persons. At the 1961 Census, the European population numbered 11,702 persons.

2. **Indigenous Population.**—The indigenes are divided into two main groups—Melanesian and Papuan—the former, with a few exceptions, constituting the population of the Bismarck Archipelago, the Solomon Islands, and the coastal districts of the New Guinea mainland, the latter inhabiting the interior of the mainland. Some tribes of Negritos exist in the mountains of New Guinea. There is a strain of Papuan, and possibly, of Polynesian blood in the Admiralty Islanders, while the Western Islanders and the inhabitants of the small islands east and south-east of New Ireland are Micronesians. (*See* Official Year Book No. 16, p. 670, and *Official Handbook of the Territory of New Guinea*, Pt. V.)

The enumerated and estimated indigenous population of the Territory as at 30th June, 1961, numbered 1,433,383 persons, comprising enumerated, 1,369,083 (721,806 males and 647,277 females), and estimated, 64,300. The total population was distributed throughout the several districts as follows:—Eastern Highlands, 345,206 persons; Western Highlands, 269,329; Sepik, 259,070; Madang, 139,158; Morobe, 196,941; New Britain, 109,961; New Ireland, 39,345; Bougainville, 56,330; Manus, 18,043.

## § 3. Land Tenure

The principles governing the acquisition and ownership of land and types of tenure available in New Guinea are in general similar to those which obtain in Papua, and although, under the *Land Ordinance* 1922–1961, grants of freehold estates may be made, as a matter of policy all grants are now restricted to leaseholds. In New Guinea, however, the amount of freehold land of earlier origin held by private non-indigenous owners amounts to more than half a million acres. Freehold titles to this land, which includes a good deal of plantation land, may be transferred by purchase, subject only to the general provision that dealings in land require the approval of the Administrator.

The area of the Territory of New Guinea is estimated at 59,520,000 acres, of which at 30th June, 1961, only 1,442,229 acres were alienated. The following was the distribution of alienated land according to tenure at 30th June, 1961:—held by private non-indigenous inhabitants—freehold, 541,250 acres, leasehold, 356,301 acres; held by Administration, 517,012 acres; native reserves, 27,666 acres.

Under German law there was a system of registration of titles in a "Ground Book", but registration did not confer an indefeasible title. The German system has been replaced by one modelled on the Torrens plan, embodied in the *Lands Registration Ordinance* 1924–1955. The land registers were lost during the 1939–1945 War, but provision for restoration of the lost titles is made in the *New Guinea Land Titles Restoration Ordinance* 1951–55. A start has been made on the recording of native land interests under the *Native Land Registration Ordinance* 1952.

## § 4. Production

1. **General.**—The products of the Territory are obtained principally from its agricultural, mining, fishing and forestry industries. A copra crushing mill near Rabaul, established in 1952, commenced crushing at about 18,000 tons of copra per annum, and its capacity is now about 60,000 tons of copra per annum. Crushing of about 40,000 tons of copra was in view for 1962. At Bulolo, a company is producing high quality moisture-proof plywood and veneers in a factory whose capacity is over 40 million square feet, on a  $\frac{3}{8}$ -in. basis, per annum. Native subsistence agriculture, fishing, and hunting produce most of the food requirements of the indigenous population. The main native agricultural products are aro, yams, sweet potatoes, coconuts, bananas and papaw. Non-indigenous enterprise produces most of the commodities exported. Indigenes, however, produce copra for export, and in recent years have taken up the production of introduced crops such as peanuts, rice, cucurbits and maize for their own consumption and cocoa and coffee for export. The principal agricultural products of New Guinea for the export trade are copra and cocoa. While most of the timber milled during 1960–61 was absorbed by the local market, exports continued to increase (*see para. 2 below*). The main products of fisheries exported from New Guinea are trochus and green snail shell, including that collected by indigenes. Gold is the principal mineral mined. Indigenes are taking an increasing interest in mining for alluvial gold on their own account, and production from this source is continually rising, in contrast to falling European production.

For information on the agricultural and pastoral industries, which for the sake of convenience covers the Territory of Papua and New Guinea as a whole, *see* pages 140–3. The following paragraphs relate to the timber, fishing and mining industries in the Territory of New Guinea alone.

2. **Timber.**—Various species of timber are found in the Territory, but the only accessible pure stand is the valuable pine forests of the Bulolo Valley. This timber is used mainly for the production of plywood and veneer by Commonwealth-New Guinea Timbers Ltd., which has an annual cut of about 10 million super. feet of logs. About 32.0 million square feet of plywood, on a  $\frac{3}{8}$ -in. basis, was produced by the company in 1960–61 from these logs and from the bulk of 47.5 million square feet of  $\frac{1}{8}$ -in. veneer produced by South Pacific Timbers Limited at Lae. Exports of plywood in 1960–61 were 21.9 million square feet, valued at £866,000, and 4.6 million square feet of veneer, on a  $\frac{1}{8}$ -in. basis, valued at £38,000. During the year, 1.2 million super. feet of logs, valued at £40,000, and 3 million super. feet of sawn timber, valued at £220,000, were also exported from the Territory. The Territory forests also provided fitches, battery veneer and egg-case parts for export.

The Administration operates a training centre for forestry workers, nurseries and a herbarium, and is establishing a research institute in Port Moresby.

The *Forestry Ordinance* 1936–1951 provides for the issue of permits and licences to cut timber. Present policy calls for the orderly development of the timber industry on sound forestry principles to ensure no waste of the resources and no over-exploitation; the grant of emergency timber permits for limited quantities to assist in providing timber for Territory requirements; the disposal by public tender of timber areas designated by forest officials of the Territory; and the development of the pine stand in the Bulolo Valley by Commonwealth-New Guinea Timbers Ltd. Timber growing on native lands cannot be acquired

by private purchasers direct from the native people, but must be obtained through the Administration. Royalty is payable on all forest produce taken under permit or licence. Re-afforestation of areas dedicated for forestry in perpetuity is carried out by the Administration.

At 30th June, 1961, 35 permits and four licences were current, the total area of forest involved being 244,599 acres and 8,203 acres respectively. The Administration was also exploiting 35,000 acres.

3. **Fisheries.**—The wealth of the waters of the Territory has been little exploited, but as the result of surveys and the development of the Administration fisheries service, action is being taken to promote increased use of the resources. Fish are caught at many places along the coast to supply the small local demand of the natives and of Europeans. Trochus shell to the value of £27,873 and green snail shell to the value of £6,554 were exported during 1960–61.

4. **Mining.**—The production of gold and associated silver is the most important mining activity in New Guinea. Gold has been discovered on the Waria, the Ramu, the Francisco, and the Markham Rivers, and in tributaries of the Sepik River. Rich gold deposits were first discovered in the Morobe District in 1926. The field is situated about 80 miles (40 by air) inland from Lae, the nearest coastal port. Communication is established with the coast by regular air service and by road transport. Silver is found usually associated with the gold in these deposits. Osmiridium is reported to have been found on the upper tributaries of the Ramu, and platinum on the Kabenau River. Copper has been discovered in the form of chalcopyrite and malachite in the Baining District. Iron ore occurs as magnetite and haematite in the Baining District. Sulphur occurs in several localities in the volcanic regions of the Territory. Brown coal has been found on the mainland in the vicinity of Astrolabe Bay, and in the southern portion of New Ireland. The commercial production of minerals other than gold and silver has not been undertaken.

The granting of rights, leases and claims for mining purposes is provided for in the *Mining Ordinance 1928–1959* and regulations thereunder.

The production of gold in New Guinea since the 1939–45 War has been on a much smaller scale than before the war, averaging less than £800,000 in value per annum for the last five years. The 1961–62 production was valued at only £658,571.

The *Petroleum (Prospecting and Mining) Ordinance 1951–1961* has facilitated the carrying out of geological surveys and prospecting activities generally. There are, however, no prospecting permits for oil current at the present time.

## § 5. Trade, Transport and Communication

1. **Imports and Exports.**—(i) *Total Values.* The table below summarizes the values of imports and exports for the years 1956–57 to 1960–61.

### TERRITORY OF NEW GUINEA: IMPORTS AND EXPORTS

(£)

Particulars	1956–57	1957–58	1958–59	1959–60	1960–61
<i>Imports(a)</i> .. ..	11,020,742	11,545,880	11,938,628	12,622,354	16,803,152
<i>Exports—</i>					
Domestic exports .. ..	9,548,624	8,815,592	11,903,187	14,117,463	11,788,503
Re-exports .. ..	763,868	812,456	788,690	844,893	928,386
<i>Total Exports</i> .. ..	10,312,492	9,628,048	12,691,877	14,962,356	12,716,889

(a) Includes outside packages.

(ii) *Imports.* The following table summarizes the countries of origin of imports.

**TERRITORY OF NEW GUINEA: COUNTRY OF ORIGIN OF IMPORTS**  
(£)

Country of origin	1956-57	1957-58	1958-59	1959-60	1960-61

Veneer .. .. .	1,036	6,649	3,299	41,136	38,051
Other .. .. .	96,013	131,602	162,937	197,247	175,437
<b>Total .. .. .</b>	<b>9,548,624</b>	<b>8,815,592</b>	<b>11,903,187</b>	<b>14,117,463</b>	<b>11,788,503</b>

2. **Shipping.**—Regular passenger and freight services operate between Australia, Papua and the Territory of New Guinea. Vessels trading between Australia and the East and also some on voyages to the United Kingdom and to North America call at Territory ports. Coastal and inter-island shipping services are maintained by vessels operating from the principal ports of the Territory. Shipping within the Territory is regulated by the *Shipping Ordinance* 1951–1960, and the Coastal Shipping, Ports and Harbours Regulations.

Main ports of call for oversea vessels are Lae, Madang and Wewak (mainland), Rabaul (New Britain), Kavieng (New Ireland), Lorengau (Manus), and Kieta (Bougainville). Ports proclaimed under the Coastal Shipping, Ports and Harbours Regulations for the service of local vessels are, in addition to the main ports above-mentioned, Salamaua, Aitape and Vanimo (mainland), Gasmata and Talasea (New Britain), Namatanai (New Ireland), and Buka Passage (Bougainville).

There are no inland waterways and the natural river system is not generally suitable for vessels except those of small tonnage.

In 1960–61, 247 British vessels and 111 vessels of other nationalities called at Territory ports and discharged 189,414 tons of cargo and loaded 147,250 tons. Corresponding figures for 1959–60 were 186, 83, 154,933 and 159,163 respectively.

3. **Other Forms of Transport and Communication.**—There are no railways in New Guinea, but a road construction programme is being undertaken progressively to assist the economic development of the Territory. Road transport services operate in the main towns and on the trunk roads linking Rabaul and Kokopo; Lae, Bulolo and Wau; Kavieng and Namatanai; and on the network in the Eastern and Western Highland Districts centred on Goroka and Mt. Hagen. The total mileage of roads in the Territory of New Guinea at 30th June, 1961, was 4,923, of which 1,948 were suitable for heavy and medium traffic.

Air services link the Territory with Papua, Australia, Western New Guinea and the British Solomon Islands. There were 151 aerodromes and seaplane alighting areas in New Guinea at 30th June, 1961, and of these 15 were controlled by the Department of Civil Aviation, 56 by the Administration, and 79 by private interests, and one by the Royal Australian Navy.

Telephone services operate in the main centres. Radio telephone trunk circuits link Port Moresby with Lae, Rabaul and Madang, and service is available from subscribers' telephones in Port Moresby, Lae and Rabaul, and from the Post Office at Madang. Nine zone or group centres for radio telegraph communication with out-stations have been established at Lae, Rabaul, Kavieng, Lorengau, Madang, Mt. Hagen, Wewak, Sohano and Goroka. From these centres, radio telegraph services are also available to 111 out-stations.

## § 6. Education and Health

1. **Education.**—Education in the Territory is provided by the Administration and various Mission organizations. Schools for indigenes have also been established by Native Village Councils. The *Education Ordinance* 1952–1957 enables the Administrator to establish an education advisory board, district education committees and European and native schools, and to grant financial aid for educational purposes. European teachers are recruited from Australia, and native teachers are trained in the Territory by the Administration and the Missions. During the year ended 30th June, 1961, 247 schools were maintained by the Administration for 19,932 children, of whom 1,119 were Europeans, 340 Asians, 127 of mixed race and 18,346 indigenes. The total number of pupils in the various grades of mission schools was 113,247, of whom there were 357 Europeans, 16 Asians and 329 of mixed race. To assist the educational work of the Missions, the Administration provides expert advice, educational equipment, and text-books. In addition, the sum of £283,095 was distributed among the Missions as grants-in-aid during the year ended 30th June, 1961.

For details of the missions operating in the Territory, *see* Official Year Book No. 48 and earlier issues.

2. **Health.**—The cases treated in hospital are mainly malaria, pneumonia, tropical ulcers, bronchitis, tubercular infections and tuberculosis, skin infections and confinements. The Department of Public Health is engaged in combating diseases with a staff of fully-trained medical officers, medical assistants and orderlies in native hospitals. Its staff also supervises hospitals on plantations. It has facilities for research in tropical medicine, and schemes for training indigenes as medical orderlies and nurses. At 30th June, 1961, there were 73 Administration hospitals, including three Hansende colonies, two tuberculosis hospitals and one Hansende and tuberculosis hospital. The Missions have established an additional 80 hospitals, including three Hansende colonies and one tuberculosis hospital. There are 1,290 village aid posts or medical centres (274 conducted by Missions) and 475 maternity and child welfare centres (82 provided by Missions). The Missions staff their own medical establishments but receive financial assistance from the Administration, which also provides much of their medical stores and supplies.

### § 7. Finance

The principal items of revenue and expenditure for the Territory of New Guinea during the years 1957–58 to 1961–62 are shown in the following table.

#### TRUST TERRITORY OF NEW GUINEA: REVENUE AND EXPENDITURE (£)

Item	1957–58	1958–59	1959–60	1960–61	1961–62
REVENUE					
Commonwealth grant ..	6,188,821	6,706,373	7,859,921	9,281,595	10,114,366

<b>Total Expenditure ..</b>	<b>9,114,847</b>	<b>10,261,746</b>	<b>11,685,032</b>	<b>b13,771,368</b>	<b>b14,598,328</b>

(a) Includes Harbour Dues and Wharfrage.  
£360,332 in 1960–61 and £290,436 in 1961–62.

(b) Includes expenditure chargeable to Loan Fund,

For information on the finances of the combined Territory administration *see* Papua and New Guinea, § 2, page 145.

## TRUST TERRITORY OF NAURU

1. **General.**—Nauru is an oval-shaped atoll about 12 miles in circumference, having an area of about 5,263 acres, of which approximately two-thirds is phosphate-bearing. It is situated in latitude 0° 32' S. and longitude 166° 55' E. Portion of the island between the sandy beach and the coral cliffs is fertile, and it is there that most of the Nauruans reside. With the exception of a small fringe around an inland lagoon, the plateau which contains the phosphate deposits possesses few food plants and is uninhabited, but portion of the area has been planted with fruit trees. The system of land tenure is governed by an old custom, and, with the exception of small allotments held by the Government, the British Phosphate Commissioners, and the Missions, the whole of the island is owned by individual natives. The temperature range is from 76° F. at night to 94° F. during the day and the average humidity about 80 per cent. Normally the rainfall is comparatively low for islands of the Pacific, the annual average for twenty years from 1920 to 1940 being 80.5 inches. However, falls as high as 181.76 inches during 1940 and as low as 12.29 inches during 1950 have been recorded.

2. **History.**—The island, discovered by Captain Fearn in 1798, was annexed by Germany in 1888, and prior to 1914 was part of the protectorate of German New Guinea.

In November, 1914, Nauru was occupied by a detachment from the Australian Naval and Military Expedition at Rabaul, and it was included in the cession of colonies made by Germany in 1919 to the Allied and Associated Powers, whose representatives agreed that a mandate for its administration should be conferred upon His Britannic Majesty. The mandate was confirmed by the Council of the League of Nations on 17th December, 1920. On 2nd July, 1919, the British, Australian and New Zealand Governments agreed that the administration (which, since 1915, had been in the charge of an official appointed by the British Colonial Office) should be vested in an Administrator, who took up duty in June, 1921. The agreement between the three Governments was approved by the Commonwealth Parliament in the *Nauru Island Agreement Act* 1919 and is shown in the Schedule to that Act. A supplementary agreement concerning Nauru was drafted in May, 1923, and ratified by the Commonwealth Parliament by the *Nauru Island Agreement Act* 1932.

On 25th August, 1942, nine months after the outbreak of the war in the Pacific, the island was occupied by Japanese forces and communications with Nauru ceased. It was re-occupied by a joint Australian Naval and Military Force on 14th September, 1945, and civil administration was re-established on 1st November, 1945.

3. **Trusteeship Agreement.**—On 1st November, 1947, the General Assembly of the United Nations approved a Trusteeship Agreement for the Territory of Nauru submitted by the Governments of Australia, New Zealand, and the United Kingdom in substitution for the terms of the mandate under which the Territory had been administered. This Agreement designates the Governments of Australia, New Zealand, and the United Kingdom as the Joint Administering Authority, with the Government of Australia continuing, on behalf of the Administering Authority, to exercise full powers of legislation, administration and jurisdiction in and over the Territory. The terms of the Agreement were given in Official Year Book No. 39, pages 370-1.

4. **Administration.**—The administration of the island is vested in an Administrator, who is obliged to conform to instructions issued by the Government which appointed him. The Administrator is advised on matters affecting the Nauruan community by the Nauru Local Council, consisting of nine Nauruan Councillors elected by adult suffrage. This Council also carries out works and supplies certain services for the Nauruan community, and acts as the Board of Directors of the Nauru Co-operative Society. Until the Government of Australia ceases to exercise full powers of legislation, administration, and jurisdiction in and over the Territory on behalf of the Administering Authority in pursuance of Article 4 of the Trusteeship Agreement, all ordinances made by the Administrator are subject to confirmation or disallowance by the Governor-General of Australia acting on the advice of the Federal Executive Council. All administration expenses are met from local revenue and phosphate royalties.

5. *Population.*—The Nauruan component of the population numbered about 1,100 in 1921, but had grown to more than 1,800 before the Japanese invasion in August, 1942. In 1946, it numbered less than 1,400, but by 30th June, 1961, had risen to 2,405. Chinese have, for many years, formed a considerable part of the population of Nauru, but their numbers are not as great as formerly, and at 30th June, 1961, they amounted to 715. The number of other Pacific Islanders in the early 1920's was almost 300, but they subsequently decreased, then rose again, and at 30th June, 1961, there were 1,063. The European population after 1921 fluctuated, but with a generally upward trend, between one and two hundred, and in recent years has gradually increased, reaching 409 in 1961. The total population of Nauru at the Census of 30th June, 1961, was 3,019 males, 1,594 females, 4,613 persons.

6. *Phosphate Deposits.*—(i) *General.* From 1906 to 1919, the deposits were worked by the Pacific Phosphate Company, which also worked the deposits on Ocean Island (about 165 miles east of Nauru and part of the Gilbert and Ellice Islands Colony administered by the Colonial Office). The quantity remaining on Nauru has been estimated at about 64 million tons, and the exports average 85 per cent. to 88 per cent. of tricalcium phosphate.

The interests of the Pacific Phosphate Company in the two islands (though not in other islands in the Pacific in which it had workings) were bought by the British, Australian and New Zealand Governments on 25th June, 1920, for £3,500,000, the purchase money being contributed in the proportions of 42, 42 and 16 per cent. respectively. The Agreement of 2nd July, 1919, provides for the working of the deposits by three British Phosphate Commissioners, one appointed by each Government, and the three countries are entitled to receive the output in the same proportions of 42, 42 and 16 per cent.

(ii) *Royalty on Phosphate.* Under an agreement between the British Phosphate Commissioners and the Nauruan landowners, a royalty of 1s. 6d. for each ton of phosphate exported has been payable since 1st July, 1953. As from 1st July, 1960, this rate was increased to 3s. 7d. a ton made up as follows:—

- 10d. to the Nauru Royalty Trust Fund to be used for the benefit of Nauruans;
- 1s. 9d. to the landowner, being an immediate payment of 1s. 1d. a ton, and 8d. a ton to be invested on his account;
- 1s. to the Nauruan Community Long Term Investment Fund.

From 1st July, 1957, the lump sums payable to landowners from whom phosphate-bearing lands are leased were also increased to £60 an acre.

(iii) *Nauru and Ocean Island Phosphate Industry.* Exports of phosphate from Nauru and Ocean Island in 1960–61 amounted to 1,338,681 tons (including Ocean Island 211,221 tons), 59 per cent. to Australia, 29 per cent. to New Zealand and 12 per cent. to the United Kingdom. During the five years ended 30th June, 1961, an amount of 6,218,262 tons of phosphate was exported.

Receipts from the sale of phosphate in 1960–61 amounted to £3,901,710, and the f.o.b. cost, including interest on capital, sinking fund, etc., costs, etc., to £3,897,917.

At 30th June, 1961, the capital indebtedness of the British Phosphate Commissioners to the partner Governments amounted to £3,170,937.

Apart from a limited number of Europeans, the employees of the Commissioners are Chinese and Pacific Islanders engaged under one year contracts. Increasing numbers of Nauruans are being employed, mainly in trade capacities.

7. *Trade.*—The *Customs Tariff* of Nauru provides for the free admission of all goods other than cigars, cigarettes, tobacco, spirits, wines, beer, cider and perry. Articles imported by the Administration for its own use and spirits for scientific purposes are exempt. The tariff rates apply to all countries alike. In 1960–61, imports were valued at £1,463,236 and exports, 1,338,681 tons of phosphate, at £2,945,098. Of the total imports in 1960–61, Australia supplied 81 per cent. valued at £1,184,468; the balance came mainly from Hong Kong, New Zealand and the United Kingdom.

In 1960-61, 783,961 tons of phosphate were exported to Australia, 363,520 tons to New Zealand and 191,200 tons to the United Kingdom.

8. **Transport.**—There is no regular air service to Nauru, but when the need arises charter flights are made to the island.

There is relatively frequent communication by sea with the island. Most of the vessels are run or chartered by the British Phosphate Commissioners for the carriage of phosphate. Many of them also provide for the carriage of passengers and other cargo as required. The total calls by vessels were 148 in 1960-61.

9. **Health.**—Cases of the usual diseases known in the Pacific occur, but the health of all sections of the population is generally satisfactory. An area has been set apart for the segregation of sufferers from Hansen's disease, and the latest methods of treatment are applied. The total number of persons receiving treatment at 30th June, 1961, was 49, of whom, however, only five were in segregation at the Hansenide colony. Three hospitals are maintained on the island, one by the Administration for Nauruans, and two by the British Phosphate Commissioners, one for European and one for non-European employees. The Administration also conducts eleven maternity and child health centres. A regular anti-mosquito campaign is conducted. Steps have been taken by the authorities to improve the water supply and to provide efficient sanitation generally. Every Nauruan is required to undergo medical examination at intervals of three months.

10. **Education.**—The Administration assumed full responsibility for education on 1st October, 1923. Prior to that date, the education of native children was undertaken by the Missions, which were subsidized by the Administration. There are three primary schools, one each for European, Nauruan and Gilbertese students, one Nauruan secondary school and one mission school providing primary and secondary classes. Primary education only is provided for European children, allowances being provided to those who proceed to secondary schools in Australia. At 30th June, 1961, 666 Nauruans, 98 other Pacific Islanders, 8 Chinese and 50 Europeans were enrolled in the primary schools, and 207 at the two secondary schools.

The curriculum is based generally on that used in Australian schools, and the teaching is generally in English. Education is compulsory for Nauruan children from six to sixteen years of age. At 30th June, 1961, 38 Nauruans were studying in Australia. Of these, 26 were at secondary schools, and the remainder were receiving vocational training. Twenty-three held Administration scholarships, six were Administration cadets, and the remaining nine were privately sponsored. In addition to these, there was one student at the Central Medical School, Suva, one private student in New Zealand, two Police Force trainees in Fiji and three apprentices in Victoria.

11. **Judiciary.**—The District Court is a court of record and consists of such magistrates as the Administrator appoints. Additionally, there is the Central Court which, as a superior court of record, consists of such judges or magistrates as are appointed and which, *inter alia*, may hear and determine appeals from judgments of the District Court. A Court of Appeal comprising a judge appointed by the Administrator has also been constituted with jurisdiction to hear and determine appeals from judgments of the Central Court.

12. **Revenue and Expenditure.**—The revenue of the Administration for the year 1960-61 amounted to £490,233 and expenditure to £486,214.

Of the revenue, payments by the British Phosphate Commissioners amounted to £470,667, post office and radio receipts, £9,572, and import duties, £4,362. Main items of expenditure were administration, £138,578, miscellaneous services (health, education, etc.), £167,520 and capital works and services, £86,919.

## TERRITORY OF HEARD ISLAND AND McDONALD ISLANDS

These islands, about 2,500 miles south-west of Fremantle, were transferred from the United Kingdom to Australia as from 26th December, 1947. The laws of the Australian Capital Territory were declared to be in force in the Territory of Heard Island and McDonald Islands by the *Heard and McDonald Islands Act* 1953.

In December, 1947, an Australian scientific station was established on Heard Island, and meteorological investigations were conducted until the station was closed in March, 1955, following the establishment of Mawson station on the Antarctic mainland. Heard Island is about 27 miles long and 13 miles wide. The McDonald Islands are 26 miles to the west of Heard Island. They are small, rocky and precipitous.

## AUSTRALIAN ANTARCTIC TERRITORY

An Imperial Order in Council of 7th February, 1933, placed under Australian authority all the islands and territories other than Adelie Land situated south of 60° S. lat. and lying between 160° E. long. and 45° E. long. The Order came into force with a Proclamation issued by the Governor-General on 24th August, 1936, after the passage of the *Australian Antarctic Territory Acceptance Act* 1933. The boundaries of Adelie Land were definitively fixed by a French Decree of 1st April, 1938, as the islands and territories south of 60° S. lat. lying between 136° E. long. and 142° E. long. The *Australian Antarctic Territory Act* 1954 declared that the laws in force in the Australian Capital Territory are, so far as they are applicable and are not inconsistent with any ordinance made under the Act, in force in the Australian Antarctic Territory.

On 13th February, 1954, the Australian National Antarctic Research Expeditions (A.N.A.R.E.) established a base on MacRobertson Land at latitude 67° 36' S. and longitude 62° 53' E. The base was named Mawson in honour of the late Sir Douglas Mawson and was the first permanent Australian station to be set up on the Antarctic continent. Meteorological and other scientific research is conducted at Mawson, which is the centre for coastal and inland survey expeditions.

A second Australian scientific research station was established on the coast of Princess Elizabeth Land on 13th January, 1957, at latitude 68° 34' 36" S. and longitude 77° 58' 36" E. The station was named Davis in honour of Captain John King Davis of Melbourne, who commanded a number of famous Antarctic ships. In February, 1959, the Australian Government accepted from the United States Government custody of Wilkes Station, which was established by the United States on 16th January, 1957, on Vincennes Bay, at latitude 66° 15' S. and longitude 110° 33' E. The station was named in honour of Lieut. Charles Wilkes, who commanded the 1838-40 United States expedition to the area. Scientists from both countries participate in the programme of research at Wilkes. A.N.A.R.E. have also operated a station, since the 1947-48 Antarctic season, at Macquarie Island, approximately 850 miles south-east of Hobart. Macquarie Island is a dependency of the State of Tasmania.

On 1st December, 1959, Australia signed the Antarctic Treaty with Argentina, Belgium, Chile, France, Japan, New Zealand, Norway, South Africa, U.S.S.R., United Kingdom and the United States of America. The Treaty reserves the Antarctic area south of 60° S. latitude for peaceful purposes, provides for international co-operation in scientific investigation and research, and preserves, for the duration of the Treaty, the *status quo* with regard to territorial sovereignty, rights and claims. The Treaty entered into force on 23rd June, 1961. Since then, the 12 Antarctic Treaty powers have held two consultative meetings under the Treaty, the first at Canberra in July, 1961, and the second at Buenos Aires in July, 1962. The third will be held in Brussels on a date to be fixed.

## TERRITORY OF COCOS (KEELING) ISLANDS

1. **General.**—The Cocos (Keeling) Islands, two separate atolls comprising some 27 small coral islands with a total area of about five square miles, are situated in the Indian Ocean in latitude 12° 5' S. and longitude 96° 53' E. They lie some 1,720 miles north-west of Perth and 2,290 miles almost due west of Darwin, while Johannesburg is some 3,800 miles further distant to the south-west, and Colombo is 1,400 miles to the north-west of the group.

The main islands of the Territory are West Island, the largest, about 6 miles from north to south, on which is the aerodrome and most of the European community; Home Island, the head-quarters of the Clunies-Ross Estate; Direction Island, on which is situated the Cable and Wireless Station and the Department of Civil Aviation's Marine Base; and Horsburgh Island. North Keeling Island, which forms part of the Territory, lies about 15 miles to the north of the group and has no inhabitants.

Main settlements are on West Island, Home Island and Direction Island. The group of atolls is low-lying, flat and thickly covered by coconut palms, and surrounds a lagoon which has a harbour in the northern part but which is extremely difficult for navigation.

The climate is equable and pleasant, usually being under the influence of the south-east trade winds for about three-quarters of the year. However, the winds vary at times, and meteorological reports from the Territory are particularly valuable to those engaged in forecasting for the eastern Indian Ocean. The temperature varies between 70° and 89° F., and the average rainfall is 80 inches. There are occasional violent storms. The worst cyclone in the recorded history of the islands was in 1909, when about 400,000 coconut palms were uprooted or decapitated and the accompanying tidal wave left only five buildings standing.

The population at 30th June, 1961, was 606 (333 males and 273 females).

2. **History.**—The islands were discovered in 1609 by Captain William Keeling of the East India Company. They were uninhabited and remained so until 1826 when the first settlement was established on the main atoll by an Englishman, Alexander Hare, who quitted the islands in about 1831. In the meantime, a second settlement was formed on the main atoll by John Clunies-Ross, a Scottish seaman and adventurer, who landed with several boat-loads of Malay seamen. In 1857, the islands were annexed to the Crown and formally declared part of the British Dominions, and in 1878 responsibility for their supervision was transferred from the Colonial Office to the Government of Ceylon, and subsequently, in 1882, to the Government of the Straits Settlements. By indenture in 1886, Queen Victoria granted the land comprised by the islands to John Clunies-Ross in perpetuity, and until 1946 the patriarchal rule of the head of the Clunies-Ross family was recognized. The head of the family had semi-official status as resident magistrate and representative of the Government. However, in 1946, when the islands became a dependency of the Colony of Singapore, a Resident Administrator responsible to the Governor of Singapore was appointed.

On 23rd November, 1955, the Cocos Islands ceased to form part of the Colony of Singapore and were placed under the authority of the Commonwealth of Australia. The transfer was effected by an Order in Council made by Her Majesty Queen Elizabeth the Second under the Imperial Act entitled the *Cocos Islands Act 1955* and by the *Cocos (Keeling) Islands Act 1955* of the Commonwealth whereby the islands were declared to be accepted by the Commonwealth as a Territory under the authority of the Commonwealth to be known as the Territory of Cocos (Keeling) Islands.

3. **Administration.**—Responsibility for the administration of the Territory rests with the Minister for Territories. The first Official Representative was appointed on 23rd November, 1955, to take charge of the local administration of the Territory. Under the *Official Representative Ordinance* 1955 of the Territory, the Official Representative is given such powers and functions in relation to the Territory as are delegated to him by the Minister under the *Cocos (Keeling) Islands Act* 1955–1958 or are otherwise conferred on him under that Act or by or under any other law of the Territory. The laws of the Colony of Singapore which were in force in the islands immediately before the date of the transfer were, with certain exceptions, continued in force by the *Cocos (Keeling) Islands Act* 1955–1958. They may be amended or repealed by Ordinances made under the provisions of that Act which empower the Governor-General to make Ordinances for the peace, order and good government of the Territory.

4. **Transport.**—There is an international airport at West Island under the control of the Department of Civil Aviation. This is a re-fuelling point for aircraft of Qantas Empire Airways Ltd., which operates a weekly service between Australia and South Africa, and South African Airways which operates a fortnightly service on the same route. Although there is no regular shipping service, vessels from Australia and Singapore call at intervals.

#### TERRITORY OF CHRISTMAS ISLAND

1. **General.**—Christmas Island is an isolated bank, situated in the Indian Ocean in latitude 10° 25' 19" S., longitude 105° 42' 57" E. It is approximately 220 miles south from Java Head, at the south entrance to Sunda Strait, 810 miles from Singapore and 1,625 miles from Fremantle. Christmas Island covers an area of about 55 square miles. It consists of a central plateau at about 600 to 800 feet with several prominent rises up to 1,170 feet. The plateau descends to the sea in a series of steep slopes alternating with terraces, the last dropping in a cliff of 200 to 300 feet to a shore terrace, terminating in a sea cliff of 10 to 150 feet, which is continuous round the island except in a few places, the chief of which is Flying Fish Cove where the shore is formed of coral shingles.

The principal settlement is at Flying Fish Cove which is also the only known anchorage. Vessels are moored close inshore opposite two piers with extension conveyors, by which means direct loading to ships is carried out. The main installations of the phosphate industry are located here, together with the European married quarters and the Chinese and Malay settlements. There is a secondary settlement with maintenance shops, etc., at South Point, and several other small settlements or camps across the central plateau and at the small pumping plants at springs and wells.

The climate is healthy and pleasant, the prevailing winds being from the south-east to east-south-east from May to December, but from then to April (the wet season) they occasionally shift round from north to north-east. The average yearly rainfall is about 80 inches with a marked summer incidence. The porous nature of the ground prevents the formation of pools of water, but there are several good springs which maintain an adequate supply of fresh water for the small population and the installations. The mean average temperature is about 80° and does not vary greatly throughout the year.

The population of Christmas Island at 30th June, 1961, was 3,099 (1,963 males and 1,136 females).

**2. History and Administration.**—The first mention of Christmas Island appears in a map published in Holland in 1666, in which it is called *Moni Island*, although it is believed that Captain William Mynors of the East India Company had sighted the island on Christmas Day in 1643 and had named it accordingly.

In June, 1888, it was annexed by Captain H. W. May of H.M.S. *Imperieuse* as part of the British Dominions and placed under the supervision of the Straits Settlements Government for administrative purposes. Following upon this, a small settlement was established at Flying Fish Cove by Mr. G. Clunies-Ross of Cocos (Keeling) Islands. In February, 1891, Sir John Murray and Mr. Clunies-Ross were granted a 99-year lease of the Island. This lease was transferred to the Christmas Island Phosphate Co. Ltd. in 1897, following the discovery of large deposits of phosphate of lime on the Island. In 1900, Christmas Island was incorporated for administrative purposes with the Settlement of Singapore and the laws of Singapore were generally applied to the Island.

The *Straits Settlements (Repeal) Act* 1946, passed by the United Kingdom, repealed the Act establishing the whole of the Straits Settlements as a single colony. Subsequently the Singapore Colony Order in Council, in 1946, decreed that the Island of Singapore and its dependencies, the Cocos or Keeling Islands and Christmas Island should be governed and administered as a separate Colony and called the Colony of Singapore. From 1st January, 1958, pending transfer to Australia, Christmas Island was administered by the United Kingdom as a separate Crown Colony. The Island was transferred to the Commonwealth of Australia on 1st October, 1958, by the *Christmas Island Act* 1958, and is now administered as a Territory under the authority of the Commonwealth. Responsibility for the administration and government of the Territory rests with the Minister for Territories, and day to day affairs on the Island are administered by an Official Representative under delegation from the Minister. The laws which were in force in the Island at 30th September, 1958, were continued as the laws of the Territory after its transfer to Australia on 1st October.

**3. Phosphate Deposits.**—The only commercial activity carried out is the mining of phosphate. The British Phosphate Commissioners act as managing agents for the Christmas Island Phosphate Commission.

There are three principal phosphate deposits on the Islands, the largest that now being worked at South Point. This field is situated on the 600 feet to 800 feet level and is approximately 11 miles from the drying and shipping plant at Flying Fish Cove. The present output is about 400,000 tons annually. In addition, about 30,000 tons of phosphate dust are supplied annually to Malaya.

There is little prospect of any economic development outside the phosphate industry.

**4. Transport.**—Transport to and from the island is maintained by vessels operated under charter by the Christmas Island Phosphate Commission. One vessel makes regular trips between Christmas Island and Singapore, and other vessels carry phosphate to Fremantle and other Australian ports.

## EXTERNAL TERRITORIES: RESULTS OF 1961 CENSUS OF POPULATION

The following tables contain information obtained from the results of the Population Census of 30th June, 1961, for each of the external Territories of Norfolk Island, Papua, New Guinea, Nauru, Cocos (Keeling) Islands, and Christmas Island. It relates to the age distribution, conjugal condition, birthplaces, religions, and industrial pursuits of the population. Comparative figures are shown from the 1954 Census. Particulars for Papua and New Guinea relate to the non-indigenous population only. Information was also collected on period of residence, nationality, race, occupational status, and dwellings, and is available in the results of the Census issued in separate Census publications.

Information obtained at the 1961 Census in respect of the internal Territories is shown in summarized form in Chapter IX. Population, of this Year Book.

## § 1. Norfolk Island

## CHAPTER VI

### MANUFACTURING INDUSTRY

**NOTE.**—Further detail on the subjects dealt with in this chapter is contained in the annual printed bulletin *Secondary Industries*. Information is also published, as soon as the data can be prepared, in a series of 34 annual mimeographed bulletins, *Manufacturing Industries*, each relating to a particular industry or group of industries. Details of the industries covered are contained in § 2. Statistical Publications of Australia, of the chapter Statistical Organization and Sources of Information. Advance annual information is published in mimeographed form in *A Summary of Principal Statistics of Factories* and in *Principal Factory Products*. Current information on factory products is available in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics*, and the *Monthly Bulletin of Production Statistics*. A preliminary annual statement (*Factory Statistics*) and monthly statement (*Production Statistics*) are also issued.

In addition to the above-mentioned publications, there is also a series of 45 monthly *Production Summaries*, each relating to the production of a particular commodity or group of commodities (see reference above to Statistical Publications).

#### § 1. General

1. **Introduction.**—A complete statistical account of the growth of the manufacturing industry in Australia cannot be given, as the necessary statistics were not collected by the several States on a definite and uniform basis prior to 1906. A standard classification of manufacturing industries was formulated at a conference of Australian statisticians in 1902 and adopted by all States in 1906, and figures on this basis were prepared for 1907 and subsequent years.

Prior to the federation of the Australian States in 1901, the manufacturing industry in Australia was engaged primarily in the production of goods for local use, mainly food commodities, furniture, bricks, clothing made from imported materials, printing, the repair rather than the manufacture of machinery, and the preliminary treatment of primary products, such as wool-scouring and sawmilling.

After federation, steady expansion of the manufacturing industry resulted from the removal of interstate trade barriers and the operation of a uniform protective tariff. This expansion was quickened as a result of the demands created by the 1914–18 War, the curtailment of imports, and the rapid growth of spending power within the community. New and more advanced development took place, iron and steel works and many related and subsidiary industries were established, extensive manufacture of machinery was begun, and a wide range of high-grade products—textiles, metal manufactures, electrical goods, etc.—was added to the list of commodities made in Australia. A factor in the post-war growth of manufacturing industry in Australia was the creation in 1921 of the Tariff Board (see Chapter XIII. Oversea Trade). As well as encouraging primary industries, the Board by means of protective tariffs assisted new manufacturing industries until they were soundly established, and local manufacturers who had been adversely affected by overseas competition.

This expansion was checked by the world-wide economic depression of 1929–33, but in 1933, returning general prosperity and the opportunities opened to local manufacturers by import restrictions, together with depreciation of Australian currency, gave renewed stimulus to manufacturing enterprise. As economic conditions improved, the tariff, revenue duties and primage were reduced, but without materially prejudicing the progress of local manufactures.

When war broke out in September, 1939, Australia became a major source of supply for British countries east of Suez, and in meeting their demands, as well as those arising locally because of interruption of overseas imports, existing manufacturing industries expanded, and new enterprises were developed rapidly for the production of all classes of munitions, aircraft, ships, many new kinds of machinery and metal manufactures, scientific equipment, textiles, chemicals, etc. The outbreak of war with Japan, the basing of Allied armed forces in Australia, and Australian responsibility for supplies in the South-west Pacific Area, gave added impetus to these developments, and manufacturing in Australia outstripped all previous levels.

The cessation of war production and the transition of industry to a peace-time basis temporarily retarded progress, but from 1945–46 onward there has been renewed expansion of the manufacturing industries to which an inflow of capital from overseas contributed.

**2. Decentralization of Manufacturing Industries.**—Following upon a report by the Secondary Industries Commission, the Commonwealth Government called a conference of Commonwealth and State Ministers in August, 1945, to formulate a national policy for the decentralization of secondary industries. It was agreed that the State Governments should seek to promote decentralization along the lines appropriate to each, providing necessary services, assistance and concessions to the full extent of State resources. The Commonwealth undertook to collaborate in all matters of Commonwealth industrial policy affecting the development and location of industry, to investigate, in association with the States, the prospects of developing secondary industries in selected areas, to advise the States of developments desirable for defence purposes, and to provide financial assistance for projects of national importance where the cost would be great relative to the State's resources.

The Commonwealth assisted decentralization by allocating to private industry munitions and other defence buildings in decentralized areas and accommodating migrants in provincial centres with prospects of development. Oversea firms contemplating establishment in Australia are encouraged to select locations in rural areas or the less industrialized States.

**3. Customs and Excise Tariffs and Bounties on Manufactures.**—Particulars of Australian customs and excise tariffs, and the constitution and functions of the Australian Tariff Board in relation to matters affecting the industrial development of Australia, are given in Chapter XIII. Oversea Trade.

Bounties are paid by the Commonwealth Government to encourage local manufacture of certain products. The statutory provisions usually fix a term of operation of the bounty, provide for payment at a rate varying according to changes in the corresponding customs duty, specify the annual maximum amount of bounty payable and require the bounty to be withheld or reduced if a manufacturer's net profit in production of the commodity exceeds a certain rate, or if rates of wages and conditions of employment in production of the commodity do not conform to prescribed standards.

**4. Scientific Research and Standardization.**—(i) *The Commonwealth Scientific and Industrial Research Organization.* The function of this Organization is to initiate and conduct research in connexion with industries in Australia, to train research workers, to establish industrial research studentships and fellowships, to make grants in aid of pure scientific research, to establish industrial research associations in various industries, to provide for testing and standardization of scientific equipment, to conduct an information service relating to scientific and industrial matters, and to act for Australia in liaison with other countries in matters of scientific research. For further information concerning the work of the Organization, see Chapter XVIII. Education, Cultural Activities, and Research, of this Year Book.

(ii) *The Standards Association of Australia.* The Standards Association of Australia is the national standardizing organization of Australia, and issues Australian standard specifications for materials and codes of practice.

The Association was established in July, 1929, by the amalgamation of the Australian Commonwealth Engineering Standards Association and the Australian Commonwealth Association of Simplified Practice. It is an independent body in close touch with modern industrial requirements and has the full recognition and support of the Commonwealth and State governments and industry. It was incorporated by Royal Charter in 1950.

The sole executive authority of the Association is vested in the Council, on which industry is fully represented, together with official representatives of the Commonwealth and State governments and their technical departments, and of scientific, professional and commercial organizations. Voluntary assistance is rendered in the drafting of specifications and codes by several thousand individuals who are experts in their particular fields, and are organized into some hundreds of committees. These committees are grouped under broad industry headings including civil engineering and building construction, mechanical engineering, electrical engineering, chemicals, timber, transportation, aircraft materials, ferrous and non-ferrous metallurgy, plastics, textiles, mining, ceramics, medical and dental materials, domestic economy, agriculture and dairying, safety, packaging, and water supply and sewerage.

These committees are composed of nominated representatives of manufacturing, distributing and purchasing organizations, and of scientific and other expert authorities in the particular field of the project being dealt with. The operations of these committees are co-ordinated and supervised by committees broadly representative of the whole industry within which the respective projects are included.

The specifications of the Association provide a suitable standard of performance, quality, and dimension, and an equitable basis for tendering. They help to eliminate redundant qualities and sizes. They enable purchasers to obtain their requirements with greater assurance of satisfaction, with more rapid delivery and without the necessity of drafting individual specifications.

The underlying principles covering the preparation of the specifications and codes are that they shall be in accordance with the needs of industry; that the common interests of producer and consumer be maintained; that periodical revision should keep the work abreast with progress; and that standardization be arrived at by general consent without coercion.

Organizations, companies, firms and individuals interested in the work of the Association are eligible for subscription membership. Members are entitled to free copies of the publications of the Association and to the use of the library and its Special Information Service. Bibliographical research is undertaken for committees, members of the Association, and industry in general. Many hundreds of inquiries are answered each year.

The Association has international affiliations, and the standards of all British and foreign countries are filed in the library and are accessible to members. It is a member, representing Australia, of the International Organization for Standardization (ISO). The Association also administers the Australian National Committee of the International Electrotechnical Commission.

The Association is also the Australian agent of the British Standards Institution, and all British standards may be purchased from headquarters and branch offices in the various States.

The head-quarters of the Association are at Science House, Gloucester Street, Sydney, and branches of the Association are situated at Temple Court, 422 Collins Street, Melbourne; School of Arts Building, 166 Ann Street, Brisbane; 11 Bagot Street, North Adelaide; 10 Hooper Street, West Perth; c/o Engineering School, University of Tasmania, Sandy Bay; and Howard Smith Chambers, Watt Street, Newcastle.\*

(iii) *The National Association of Testing Authorities.* The National Association of Testing Authorities organizes testing facilities throughout Australia to serve private and governmental needs. Laboratories may register voluntarily in respect of tests within their competence, and the Association ensures the maintenance of their standards of testing. Certificates of tests issued in the name of the Association by the registered laboratories are generally accepted by governmental, industrial and commercial interests.\*

(iv) *Industrial Design Council of Australia.* The Industrial Design Council of Australia was established in June, 1958, for the purpose of encouraging better design in Australian-made goods and fostering an appreciation of good design throughout the community. The decision to set up the Council arose from a realization on the part of representatives of industry and government, designers and educationists, that there was a pressing need in Australia for an independent and authoritative body to promote better design in the interests of trade development.

The Council has a membership fully representative of industry, commerce and government, together with designers and educationists. It is financed by donations from industry and by Commonwealth grants. In 1962, the Commonwealth Government announced a grant to the Council of up to £20,000 per year for the next three years. State Committees for Industrial Design are being set up in order to extend the Council's activities throughout Australia and to co-ordinate efforts for the promotion of better design.

As part of its programme of assisting industry, the Council conducts lecture series dealing with various aspects of product design. Design counselling is available to manufacturing companies on request, and manufacturers seeking the services of designers are put in touch with qualified people.

Other projects include the setting-up of a Design Index, providing a photographic catalogue of well designed Australian goods, for reference by manufacturers, retailers, architects, designers and the public; a Register of Designers, providing a comprehensive reference to Australian designers to assist those seeking their services; displays and exhibitions of well designed goods, both local and overseas; design training—the council is aware of the urgent need to raise the standard of training in industrial design and is co-operating with education authorities to this end; information services—it is intended to establish information offices in all capital cities, to provide information on all matters concerned with design.

The offices of the Council are in ICI House, 1 Nicholson Street, Melbourne, C.2.

5. *Definitions in Factory Statistics.*—The statistics relating to factories have been compiled from tabulations made by the Deputy Commonwealth Statisticians in the several States, from returns supplied to them annually by manufacturers in accordance with the statistical acts of the States and the Commonwealth. A return must be supplied in respect of every *factory*, which is defined for this purpose as an establishment where four or more persons are employed or where power (other than manual) is used in any manufacturing process. This definition includes factories in educational and charitable institutions,

\* For further information see also Chapter XVIII, Education, Cultural Activities, and Research.

reformatories, and other public institutions (except penitentiaries), but does not cover small-goods makers, laundries, photography studios, florists and seedsmen, or most abattoirs. It should be noted that details relating to small establishments not classified for statistical purposes as factories are not included in the figures contained in this chapter.

If a manufacturing business is conducted in conjunction with any other activity, particulars relating to the manufacturing section only are included in the statistics. Where two or more industries are conducted in the same establishment, a separate return is obtained for each industry if practicable.

Manufacturers are requested to state in their returns particulars as to the number, age, wages, etc., of their employees, the value of premises and equipment, the horse-power of machinery, the value, and in most cases the quantities, of raw materials (including containers, tools replaced, etc.) and fuel used, and quantities and values of principal materials and articles produced. The returns obtained from manufacturers are not intended to show a complete record of the income and expenditure of factories nor to show the profits or losses of factories collectively or individually.

All *persons employed* in the manufacturing activities of a factory are counted as factory employees including working proprietors and "out-workers".

The *average number of persons employed* is quoted on two different bases, the average during the period of operation and the average over the whole year. Of these, the former is simply the aggregate of the average number of persons employed in each factory during its period of operation (whether the whole or only part of the year). This average is used only in respect of details relating to classification according to the number of persons employed. The latter, which is used in all other instances, is calculated by reducing the average number working in the factories (irrespective of period of operation) to the equivalent number working for a full year.

*Working proprietors* are included in all employment figures other than those relating to monthly employment and age dissections, but salaries and wages paid in all cases exclude drawings by working proprietors.

*Value of material used* includes the value, in the usual sense, of the material used, stores used, containers, tools replaced and materials used in repairs to plant.

*Value of fuel, etc., used* includes also the cost of power and light used, of lubricants and of water.

The *value of factory output* is the value of the goods manufactured or their value after passing through the particular process of manufacture concerned, and includes the amount received for repair work, work done on commission and receipts for other factory work. The basis of valuation of the output is the selling value of the goods at the factory, exclusive of all delivery costs and charges and excise duties, but inclusive of bounty and subsidy payments to the manufacturer of the finished article.

The *value of production* is the value added to raw materials by the process of manufacture. It is calculated by deducting from the value of factory output the value (at the factory) of the materials used, containers and packing, power, fuel and light used, tools replaced, and materials used in repairs to plant (but not depreciation charges).

In the process of manufacture, many goods are treated in several industries, the output of one becoming the raw material of another, so that such commodities are counted more than once in the aggregate value of output and of raw materials. Examples are raw sugar passing from the mills to the refinery, metals from the smelters which become raw materials in establishments concerned in the production of metal goods, and timber from the sawmills used in furniture factories and in joinery. On the other hand, the aggregate value of production is assessed without duplication, the value added by each industry being taken into account once only. For this reason, the value of production, and not the value of the output, is used as a measure of activity in the manufacturing industries as a whole.

In the special case of government factories and workshops, the value of output is, in most cases, estimated by adding 10 per cent. to the value of materials and fuel used and other factory costs, including salaries and wages paid.

The *rated horse-power of engines used* for factories other than central electric stations relates to the rated horse-power of engines ordinarily in use.

Statistics relating to factory activity in the Australian Capital Territory and Northern Territory are not included in the figures contained in this chapter.

**6. Classification of Factories.**—In the compilation of statistical data relating to factories in Australia, a standard classification of manufacturing industries, formulated at a conference of Australian statisticians in 1902 and revised from time to time, was used until the year

1929-30. A new classification was introduced in 1930-31, and this in turn was revised and extended (principally in respect of the placement and composition of sub-classes) in accordance with decisions of the 1945 Conference of Statisticians.

Owing to limitations of space, details published in general tables in this chapter are confined either to the sixteen classes of industry or to total factory activity. Some particulars of certain of the sub-classes shown below are published in the latter portion of this chapter, and full details for all sub-classes may be found in the bulletin *Secondary Industries*, published annually.

The classes and sub-classes in the current classification of factories are as follows.

### CLASSIFICATION OF FACTORIES

#### CLASS I.—TREATMENT OF NON-METALLIFEROUS MINE AND QUARRY PRODUCTS

Coke works.  
Briquetting and pulverized coal.  
Carbide.  
Lime, plaster of paris, asphalt.  
Fibrous plaster and products.  
Marble, slate, etc.  
Cement, portland.  
Asbestos cement sheets and mouldings.  
Other cement goods.  
Other.

#### CLASS II.—BRICKS, POTTERY, GLASS, ETC.

Bricks and tiles.  
Earthenware, china, porcelain and terracotta.  
Glass (other than bottles).  
Glass bottles.  
Other.

#### CLASS III.—CHEMICALS, DYES, EXPLOSIVES PAINTS, OILS, GREASE

Industrial and heavy chemicals and acids.  
Pharmaceutical and toilet preparations.  
Explosives (including fireworks).  
White lead, paints and varnish.  
Oils, vegetable.  
Oils, mineral.  
Oils, animal.  
Boiling-down, tallow-refining.  
Soap and candles.  
Chemical fertilizers.  
Inks, polishes, etc.  
Matches.  
Other.

#### CLASS IV.—INDUSTRIAL METALS, MACHINES, CONVEYANCES

Smelting, converting, refining, rolling of iron and steel.  
Foundries (ferrous).  
Plant, equipment and machinery, etc.  
Other engineering.  
Extracting and refining of other metals; alloys.  
Electrical machinery, cables and apparatus.  
Construction and repair of vehicles (10 groups).  
Ship and boat building and repairing, marine engineering (government and other).  
Cutlery and small hand tools.  
Agricultural machines and implements.  
Non-ferrous metals—  
Rolling and extrusion.  
Founding, casting, etc.  
Iron and steel sheets.  
Sheet metal working, pressing, and stamping.  
Pipes, tubes and fittings—ferrous.  
Wire and wire working (including nails).  
Stoves, ovens and ranges.  
Gas fittings and meters.  
Lead mills.  
Sewing machines.

#### CLASS IV.—INDUSTRIAL METALS, MACHINES, CONVEYANCES—continued

Arms, ammunition (excluding explosives).  
Wireless and amplifying apparatus.  
Other metal works.

#### CLASS V.—PRECIOUS METALS, JEWELLERY, PLATE

Jewellery.  
Watches and clocks (including repairs).  
Electroplating (gold, silver, chromium, etc.).

#### CLASS VI.—TEXTILES AND TEXTILE GOODS (NOT DRESS)

Cotton ginning.  
Cotton spinning and weaving.  
Wool—carding, spinning, weaving.  
Hosiery and other knitted goods.  
Silk, natural.  
Rayon, nylon and other synthetic fibres.  
Flax mills.  
Rope and cordage.  
Canvas goods, tents, tarpaulins, etc.  
Bags and sacks.  
Textile dyeing, printing and finishing.  
Other.

#### CLASS VII.—SKINS AND LEATHER (NOT CLOTHING OR FOOTWEAR)

Furriers and fur-dressing.  
Woolscouring and fellmongery.  
Tanning, currying and leather-dressing.  
Saddlery, harness and whips.  
Machine belting (leather or other).  
Bags, trunks, etc.

#### CLASS VIII.—CLOTHING (EXCEPT KNITTED)

Tailoring and ready-made clothing.  
Waterproof and oilskin clothing.  
Dressmaking, hemstitching.  
Millinery.  
Shirts, collars, underclothing.  
Foundation garments.  
Handkerchiefs, ties and scarves.  
Hats and caps.  
Gloves.  
Boots and shoes (not rubber).  
Boot and shoe repairing.  
Boot and shoe accessories.  
Umbrellas and walking sticks.  
Dyeworks and cleaning, etc.  
Other.

#### CLASS IX.—FOOD, DRINK AND TOBACCO

Flour-milling.  
Cereal foods and starch.  
Animal and bird foods.  
Chaffcutting and corncrushing.  
Bakeries (including cakes and pastry).  
Biscuits.  
Sugar-mills.  
Sugar-refining.

CLASS IX.—FOOD, DRINK AND TOBACCO—  
*continued*

Confectionery (including chocolate and icing sugar).  
Jam, fruit and vegetable canning.  
Pickles, sauces, vinegar.  
Bacon curing.  
Butter factories.  
Cheese factories.  
Condensed and processed milk factories.  
Margarine.  
Meat and fish preserving.  
Condiments, coffee, spices.  
Ice and refrigerating.  
Salt.  
Aerated waters, cordials, etc.  
Breweries.  
Distilleries.  
Wine-making.  
Cider and perry.  
Malting.  
Bottling.  
Tobacco, cigars, cigarettes, snuff.  
Dehydrated fruit and vegetables.  
Ice cream.  
Sausage casings.  
Arrowroot.  
Other.

CLASS X.—SAWMILLS, JOINERY, BOXES, ETC.,  
WOOD TURNING AND CARVING

Sawmills.  
Plywood mills (including veneers).  
Bark mills.  
Joinery.  
Cooperage.  
Boxes and cases.  
Woodturning, woodcarving, etc.  
Basketware and wickerware (including sea-grass and bamboo furniture).  
Perambulators (including pushers and strollers).  
Wall and ceiling boards (not plaster or cement).  
Other.

CLASS XI.—FURNITURE OF WOOD, BEDDING, ETC.  
Cabinet and furniture making (including billiard tables and upholstery).  
Bedding and mattresses (not wire).  
Furnishing drapery.

CLASS XI.—FURNITURE OF WOOD, BEDDING, ETC.—  
*continued*

Picture frames.  
Blinds.

CLASS XII.—PAPER, STATIONERY, PRINTING,  
BOOKBINDING, ETC.

Newspapers and periodicals.  
Printing—  
Government.  
General, including bookbinding.  
Manufactured stationery.  
Stereotyping, electrotyping.  
Process and photo engraving.  
Cardboard boxes, cartons and containers.  
Paper bags.  
Paper-making.  
Pencils, penholders, chalks, crayons.  
Other.

## CLASS XIII.—RUBBER

Rubber goods (including tyres made).  
Tyre retreading and repairing.

## CLASS XIV.—MUSICAL INSTRUMENTS.

Gramophones and gramophone records.  
Pianos, piano-players, organs.  
Other.

## CLASS XV.—MISCELLANEOUS PRODUCTS

Linoleum, leather-cloth, oil-cloth, etc.  
Bone, horn, ivory and shell.  
Plastic moulding and products.  
Brooms and brushes.  
Optical instruments and appliances.  
Surgical and other scientific instruments and appliances.  
Photographic material (including developing and printing).  
Toys, games and sports requisites.  
Artificial flowers.  
Other.

## CLASS XVI.—HEAT, LIGHT, AND POWER

Electric light and power.  
Gas works.

7. Factory Development since 1901, Australia.—The development of the manufacturing industries in Australia at intervals since 1901 is summarized in the following table.

FACTORIES: AUSTRALIA

Year	Factories	Employment(a)	Salaries and wages paid(b)	Value of—				
				Materials and fuel used	Output	Production (c)	Land and buildings	Plant and machinery
	No.	'000.	£'000.	£'000.	£'000.	£'000.	£'000.	£'000.
	(d)	(d)	(d)	(d)	(d)	(d)	(d)	(d)
1901 ..	11,143	198	27,528	81,763	133,022	51,259	32,701	31,516
1911 ..	14,455	312	62,932	213,559	323,993	110,434	60,831	68,655
1920-21 ..	17,113	367	62,455	172,489	290,799	118,310	112,211	124,498
1930-31 ..	21,751	339	137,919	386,881	644,795	257,914	144,094	161,356
1940-41 ..	27,300	650	491,718	1,306,963	2,150,835	843,872	302,785	336,615
1950-51 ..	43,147	969						
1956-57 ..	53,200	1,063	891,090	2,400,293	4,022,413	1,622,120	759,687	917,037
1957-58 ..	53,988	1,074	929,290	2,545,159	4,273,882	1,728,723	849,036	1,012,735
1958-59 ..	54,888	1,088	970,553	2,649,331	4,491,932	1,842,601	947,899	1,108,385
1959-60 ..	56,657	1,132	1,086,359	2,948,813	5,023,696	2,074,883	1,063,852	1,220,064
1960-61 ..	57,782	1,145	1,143,836	3,047,344	5,217,148	2,169,804	1,193,590	1,391,490

(a) 1901 and 1911—average employment during period of operation. Later years relate to average employment over whole year. Working proprietors are included in all years. (b) Excludes drawings by working proprietors. (c) Value added in process of manufacture (i.e., value of output less value of materials and fuel, etc., used). (d) Not available.

## § 2. Number of Factories

1. Number of Factories in each State.—The following table shows the number of factories operating in each State in the years 1956–57 to 1960–61.

## FACTORIES: NUMBER

Year	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Aust.
1956–57 .. ..	21,838	16,232	5,537	4,063	3,935	1,595	53,200
1957–58 .. ..	22,270	16,426	5,528	4,168	3,941	1,655	53,988
1958–59 .. ..	22,684	16,527	5,651	4,235	4,125	1,666	54,888
1959–60 .. ..	23,274	16,979	5,758	4,684	4,279	1,683	56,657
1960–61 .. ..	23,585	17,173	5,882	5,042	4,334	1,766	57,782

2. Number of Factories in Industrial Classes.—(i) *Australia*. The next table shows the number of factories in Australia during 1956–57 to 1960–61 classified to the industrial classes agreed upon by the Conference of Statisticians in 1930. Details of some of the principal industries included in the table will be found in § 11.

## FACTORIES: NUMBER IN INDUSTRIAL CLASSES, AUSTRALIA

Class of industry	1956–57	1957–58	1958–59	1959–60	1960–61
I. Treatment of non-metalliferous mine and quarry products .. ..	1,331	1,328	1,344	1,374	1,434
II. Bricks, pottery, glass, etc. .. ..	672	660	663	682	694
III. Chemicals, dyes, explosives, paints, oils, grease ..	1,162	1,184	1,218	1,248	1,258
IV. Industrial metals, machines, conveyances ..	19,766	20,518	21,254	22,622	23,532
V. Precious metals, jewellery, plate .. ..	824	808	818	823	859
VI. Textiles and textile goods (not dress) .. ..	1,364	1,364	1,373	1,435	1,421
VII. Skins and leather (not clothing or footwear) ..	785	761	729	727	703
VIII. Clothing (except knitted) .. ..	7,312	7,266	7,195	7,267	7,493

### § 4. Power Equipment in Factories

1. **General.**—Since 1936-37, statistics of power equipment in factories relate to the "rated horse-power" of engines ordinarily in use and engines in reserve or idle, omitting obsolete engines. In addition, particulars of the power equipment of central electric stations are collected in greater detail. To avoid duplication, it is essential that some distinction should be made between central electric stations and other classes of industries. In the following tables, central electric stations have been treated separately from other factories.

2. **Rated Horse-power of Engines in Factories other than Central Electric Stations.**—The following table shows the total number of factories and the total rated horse-power of engines and electric motors ordinarily in use and in reserve or idle during 1960-61.

**FACTORIES(a): TOTAL RATED HORSE-POWER OF ENGINES AND ELECTRIC MOTORS, 1960-61**

State	Factories(a)	Rated horse-power of engines and motors	
		Ordinarily in use(b)	In reserve or idle (omitting obsolete)
New South Wales .. .. .	23,527	2,486,501	393,153
Victoria .. .. .	17,132	1,508,473	203,208
Queensland .. .. .	5,825	572,543	83,469
South Australia .. .. .	5,009	451,140	55,051
Western Australia .. .. .	4,245	268,957	41,002
Tasmania .. .. .	1,754	280,207	37,417
<b>Australia .. .. .</b>	<b>57,492</b>	<b>5,567,821</b>	<b>813,300</b>

(a) Includes gas works but excludes central electric stations, details of which are shown on p. 190.  
 (b) Excludes motors driven by electricity generated in factories not classified as central electric stations.

3. **Rated Horse-power of Engines and Electric Motors Ordinarily in Use.**—(i) *According to Type, States.* Particulars of the types and the total rated horse-power of engines, etc., ordinarily in use in each State are given below.

**FACTORIES(a): TOTAL RATED HORSE-POWER OF ENGINES AND ELECTRIC MOTORS ORDINARILY IN USE, 1960-61**

State	Steam		Internal combustion			Water	Motors driven by electricity(b)		Total (c)
	Recipro-cating	Tur-bine	Gas	Petrol or other light oils	Heavy oils		Pur-chased	Own generation (d)

(a) Not available for publication; figures are included in total for Australia.

**§ 5. Employment in Factories**

1. **Number Employed.**—(i) *General.* All persons employed in the manufacturing activities of a factory, including proprietors who work in their own business and "out-workers" (see para. 4, p. 198), are counted as factory employees, while those employed in selling and distributing, such as salesmen, travellers, collectors, carters employed solely on outward delivery of manufactured goods and retailing storemen, are excluded. From 1945-46 the occupational groupings collected were—(i) working proprietors; (ii) managerial and clerical staff including salaried managers and working directors; (iii) chemists, draftsmen and other laboratory and research staff; (iv) foremen and overseers; (v) skilled and unskilled workers; (vi) carters (excluding delivery only), messengers and persons working regularly at home; but from 1960-61 the last three categories were amalgamated into one group—(iv) foremen and overseers, workers in factory and others.

# VALUE OF PRODUCTION AND AVERAGE EMPLOYMENT IN AUSTRALIAN FACTORIES, 1920-21 TO 1960-61

VALUE OF PRODUCTION\*  
OF AUSTRALIAN FACTORIES  
BY INDUSTRIAL CLASS, 1960-61

\* "VALUE OF PRODUCTION" IS THE VALUE ADDED IN THE PROCESS OF MANUFACTURE

ALL CLASSES - £2,169,804,000

AVERAGE NUMBER OF PERSONS EMPLOYED\*  
IN AUSTRALIAN FACTORIES  
BY INDUSTRIAL CLASS, 1960-61

\* AVERAGE OVER WHOLE YEAR INCLUDING WORKING PROPRIETORS

ALL CLASSES - 1,144,732

Statistics of factory employment represent the equivalent average number employed over a full year of fifty-two weeks except for the classification of factories according to the number of persons employed (*see* § 3, p. 186), which is based on the average number employed over the period worked.

(ii) *Australia.* Particulars of the numbers employed, the increase in employment and the rate per cent. of such increase are given for the years 1956-57 to 1960-61 in the following table.

## FACTORIES: EMPLOYMENT, AUSTRALIA

Year	Males			Females			Persons		
	Number employed	Increase on preceding year		Number employed	Increase on preceding year		Number employed	Increase on preceding year

4. **Persons Employed According to Occupational Grouping.**—In the following table, the average number of persons employed in each State during 1960-61 is classified according to occupational grouping. As mentioned previously, persons employed in factories are now classified on a basis different from that adopted prior to 1960-61. The nature of this change is indicated in para. 1 of this section (*see p. 190*).

**FACTORIES: PERSONS EMPLOYED—OCCUPATIONAL GROUPING, 1960-61**

(a) Includes salaried managers and working directors at home.

(b) Includes persons working regularly

The term "outworker" or "homeworker" has acquired a special meaning in connexion with manufacturing industries, and includes only persons to whom work is given out by factories to be done at home. Persons working regularly at home for factories are included in the group foremen, overseers, workers in factory and others, and separate details are not available.

5. Monthly Employment, 1956-57 to 1960-61.—(i) *Australia.* The following table shows the number of persons (excluding working proprietors) employed in factories on the last pay-day of the month during the years 1956-57 to 1960-61.

6. **Distribution of Employees According to Age.**—The extension of statistics of employment in factories, decided upon at the Conference of Australian Statisticians held in 1945, provided for a distribution of employees (excluding working proprietors) into seven age-groups from 1945-46 onwards, instead of three as in previous years. From 1960-61, however, the distribution into three groups has been re-introduced. The particulars are collected as at June. The numbers employed in each age-group on the last pay-day in June, 1960 and 1961, are given below.

**FACTORIES: DISTRIBUTION OF EMPLOYEES BY AGE**  
(EXCLUDING WORKING PROPRIETORS)

Age group	June, 1960			June, 1961		
	Males	Females	Persons	Males	Females	Persons
Under 16 years ..	8,627	7,457	16,084	8,849	7,162	16,011

Tasmania .. ..	5.15	-3.57	-1.66	6.79	1.77
Australia .. ..	0.48	0.58	0.81	6.39	1.17

NOTE.—Minus sign (—) indicates decrease.

3. **Masculinity of Persons Employed in Factories.**—The following table shows, for the years 1956–57 to 1960–61, the proportion of males to females employed in factories in each State.

**FACTORIES: MASCULINITY(a) OF PERSONS EMPLOYED**

Year	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Aust.
1956–57 .. ..	308	266	490	460	636	433	326
1957–58 .. ..	311	265	500	458	655	461	327
1958–59 .. ..	313	266	506	463	649	478	330
1959–60 .. ..	303	259	491	459	642	465	320
1960–61 .. ..	305	260	481	454	642	464	320

(a) Number of males per 100 females.

4. **Employment of Females in Particular Industries.**—(i) *General.* The majority of females in manufacturing industries are employed in four classes, namely:—IV., Industrial Metals, Machines, etc.; VI., Textiles; VIII., Clothing; and IX., Food, Drink and Tobacco. In 1960–61, these industries accounted for 78.30 per cent. of all females in factories. In two classes only did the number of females exceed the number of males, namely, in Class VI., Textiles, where there were 141 females to every 100 males, and in Class VIII., Clothing, with 245 females to every 100 males. The following table shows the average number of males and females employed in each of the four classes in 1960–61.

**MALES AND FEMALES EMPLOYED IN PARTICULAR INDUSTRIES, 1960-61**

Class	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Aust.
<b>MALES</b>

(a) Number of females per 100 males.

## § 7. Children Employed in Factories

1. Number of Children Employed, 1959 to 1961.—In the returns for the various States, the term "child" denotes any person under sixteen years of age. The following table shows the number of children of each sex employed in manufacturing industries in June of the years 1959 to 1961.

## FACTORIES: CHILDREN(a) EMPLOYED

State	June—1959			June—1960			June—1961		
	Males	Females	Persons	Males	Females	Persons	Males	Females	Persons
New South Wales	2,453	2,175	4,628	2,625	2,219	4,844	2,710	2,009	4,719
Victoria ..	2,595	2,535	5,130	2,573	2,664	5,237	2,707	2,586	5,293
Queensland ..	1,571	1,226	2,797	1,592	1,271	2,863	1,478	1,318	2,796

Furniture of wood, bedding, etc. .. .. .	362	83	14,828	3,941	2.44	2.11
Paper, stationery, printing, bookbinding, etc. .. .. .	699	725	53,037	19,053	1.32	3.81
All other industries .. .. .	811	483	134,050	28,695	0.60	1.68
<b>Total .. .. .</b>	<b>8,849</b>	<b>7,162</b>	<b>810,295</b>	<b>245,088</b>	<b>1.09</b>	<b>2.92</b>

(a) Under sixteen years of age.

(b) Excludes working proprietors.

3. **Apprenticeship.**—Acts are in force in all States for the regulation of the age at which children may be employed in gainful occupations. Legislative provision is also made for the regulation of apprenticeship under the various State Factories Acts or Arbitration Acts. These Acts, while laying down general principles, leave to the wages tribunals the actual determination of the conditions under which apprentices may be employed.

## § 8. Value of Production, Materials Used, Salaries and Wages

**Note.**—In all tables relating to salaries and wages paid in factories, the amounts drawn by working proprietors are excluded.

1. **General.**—The gross value of factory output for 1960–61 was £5,217 million, of which £2,858 million was the value of the materials used, including containers, etc., tools replaced and repairs to plant and buildings, and £189 million the value of the power, fuel, light, water and lubricating oil used. The difference between the sum of the last two amounts and the gross value of output, namely, £2,170 million, represents the net value of factory production, defined as “the value of consumable commodities produced during the year, deducting so far as possible the value of goods consumed in process of production”. Depreciation, however, is not deducted (see para. 6 of this section, p. 211). The gross value of factory output and the value of materials used each contain inherent elements of duplication, as the output of some factories becomes the materials used in other factories. They therefore have little statistical significance. The net value of factory production indicates the relative importance of manufacturing in the Australian economy in current money terms. The total amount of salaries and wages paid in factories in 1960–61 was £1,144 million, excluding amounts drawn by working proprietors.

2. **Salaries and Wages Paid.**—(i) *In Classes of Industry, 1960–61.* The amounts of salaries and wages paid in the various classes of industry in each State are shown in the following table.

FACTORIES: SALARIES AND WAGES PAID, 1960-61

(£'000)

Class of industry	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Aust.

(ii) *Totals and Averages, 1956-57 to 1960-61.* The following table shows the total amount of salaries and wages paid, and the average amount paid per employee in each State, for each year. The figures exclude working proprietors and the amounts drawn by them.

In comparing the figures in the following table, regard should be paid to the nature of certain industries which are carried on to a greater extent in some States than in others. In Victoria, for instance, a large number of hands are employed in Class VIII., Clothing, comprising a relatively high percentage of women and children.

(a) See para. 1 of this section, p. 204.

5. Value of Output.—(i) In Classes of Industry, 1960-61. The value of the output of factories in the various classes in each State in 1960-61 is shown in the following table. It represents the selling value at the factory (excluding delivery costs and charges) of goods made or processed during the year, including by-products. In addition, it includes the amount received for other work done such as repair work, assembling and making up for customers. The difference between the sum of the values of the materials and of the power, fuel and light used, and the value of output is the net value of factory production (*see* paras. 1 and 6 of this section).

(a) See para. 1 of this section p. 204.

**6. Value of Production.**—(i) *In Classes of Industry, 1960-61.* The value of production for any industry was defined at the Conference of Statisticians at Sydney in 1925 as “the value of consumable commodities produced during the year, deducting, so far as possible, the value of goods consumed in process of production”.

In accordance with this definition, it was agreed that a deduction consisting of the costs of raw material, containers, power, fuel, light, lubricants, water, tools replaced, repairs to plant and depreciation should be made from the "value of output". Because of the difficulty experienced in securing accurate figures for depreciation, however, it was subsequently decided that no deduction should be made on this account. All the deductions mentioned above, with the exception of depreciation, are included in the items "value of materials used" and "value of fuel used" as defined above. The net value of production as given in the following tables is obtained, therefore, by deducting only "value of materials used" and "value of fuel used" from the "value of output". The value of factory production, therefore, approximates "net value added" in the manufacturing process.

Only certain selected items of costs are recorded in the annual census of production. It must not, therefore, be inferred that, when wages and salaries are deducted from the value of production, the whole of the "surplus" is available for interest and profit, as many miscellaneous expenses such as taxation, insurance, advertising and other overhead charges, as well as depreciation, also have to be taken into account.

The following table shows the value of production in 1960-61 in each State for the various classes of industry.

FACTORIES: VALUE OF PRODUCTION, 1960-61(a)

**§ 9. Value of Land, Buildings, Plant and Machinery**

1. **General.**—The following statement shows the value of land and buildings and of plant and machinery used in connexion with manufacturing industries during the year 1960-61.

**FACTORIES: VALUE OF LAND, BUILDINGS, PLANT AND MACHINERY(a), 1960-61**  
(£'000)

Value of—	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Aust.
Land and buildings	501,793	400,751	84,158	87,729	45,610	73,549	1,193,590
Plant and machinery	607,281	417,918	132,569	113,100	64,306	56,316	1,391,490
<b>Total ..</b>	<b>1,109,074</b>	<b>818,669</b>	<b>216,727</b>	<b>200,829</b>	<b>109,916</b>	<b>129,865</b>	<b>2,585,080</b>

(a) Includes estimated value of rented premises and plant.

The values recorded in this section are generally the values apportioned in the books of the individual firms after allowance has been made for depreciation, but they include estimates of the capital value of premises and plant rented. Consequently, the totals shown in the table do not represent the actual amount of capital invested in the items specified.

2. Value of Land and Buildings.—(i) *Total for Australia.* The following table shows, for Australia as a whole, the approximate value of land and buildings occupied in connexion with manufacturing industries for 1956-57 to 1960-61.

**FACTORIES: VALUE OF LAND AND BUILDINGS(a), AUSTRALIA**

(a) Includes estimated value of rented premises, plant and machinery.

### § 10. Principal Factory Products

The factory production of certain commodities is shown in the monthly and quarterly publications of this Bureau, in the series *Manufacturing Industries*, and in the bulletin *Secondary Industries* (see NOTE at beginning of this chapter).

The following table shows the total recorded production of some of the principal articles manufactured in Australia during the years ended 30th June, 1960 to 1962. A more complete list, together with values, where available, is published in the *Secondary Industries* bulletin.

Preliminary figures for a restricted number of major commodities for the year 1962-63 are shown in the Appendix to this volume.

QUANTITY OF PRINCIPAL ARTICLES PRODUCED IN FACTORIES: AUSTRALIA

Article	Unit of Quantity	1959-60	1960-61	1961-62 (a)

Zinc oxide (see pigments)				

(a) Subject to revision. (b) Not yet available. (c) Includes stovettes, cookers, etc.  
(d) Supplied by Superphosphate Industry Committee. (e) Excludes wheatmeal for baking included with flour. (f) Includes mixtures predominantly of the fibre mentioned.

## § 11. Individual Industries

1. **General.**—Particulars on pages 185–216, §§ 2–9 afford a general view of the magnitude of industries in the sixteen groups adopted by the Conference of Statisticians in 1930. While it is not possible, within the limits of this publication, to give a detailed account of each industry, particular industries dealt with hereunder are of special importance because of the employment which they provide for labour or capital, or for other features of special interest. Where there are only one or two establishments in a particular industry in the State or the Commonwealth, details of activities are not published, but are combined with some other factory group so that operations of individual concerns will not be disclosed.

Details of some of the principal articles produced in factories in Australia during the years 1959–60 to 1961–62 are shown in the table on the preceding pages (§ 10).

2. **Portland Cement and Cement Goods.**—The manufacture of portland cement and cement goods is an important industry included in Class I. Particulars for the three industries under this general heading are shown for 1960–61 and for a series of years in the following table.

**PORTLAND CEMENT, ASBESTOS CEMENT SHEETS, ETC., AND OTHER CEMENT GOODS**

AUSTRALIA, 1960–61

10. Iron and Steel Works and Engineering.—(i) *General.* The first group included under this heading (Smelting, Converting, Refining and Rolling of Iron and Steel) covers blast furnaces, steel works and rolling mills. The second group, Foundries (Ferrous), covers those engaged in the founding of iron and steel. The third group (Plant, Equipment and Machinery including Machine Tools) covers those industries engaged in the production of

boilers, engines, machines and machinery, machine tools, structural steel fabrications, steel furniture, etc. The fourth group (Other Engineering) includes jobbing and general engineers not elsewhere included. Detailed statistics for the four groups mentioned are shown in the following tables.

(ii) *Smelting, Converting, Refining and Rolling of Iron and Steel.* In the following table, particulars are shown for each State for 1960-61 and for Australia for a series of years for the group Smelting, Converting, Refining and Rolling of Iron and Steel.

Horse-power of engines ordinarily in use h.p.	122,852	114,805	115,162	116,443	116,063

(a) Government and local authority only.

14. **Motor Vehicles.**—The industries catering for the motor trade are included in Class IV., Industrial Metals, Machines and Conveyances. In the following table, a summary is given of the principal statistics for 1960-61 for each branch of industry associated with the motor trade of Australia.

MOTOR VEHICLES: CONSTRUCTION, ASSEMBLY, REPAIRS, ETC., AUSTRALIA  
1960-61

Particulars	Construction and assembly	Repairs	Motor bodies (a)	Motor accessories	Total
Number of factories .. ..	51	10,355	2,068	283	12,757
Number of persons employed .. ..	21,535	62,055	29,210	13,854	126,654
Salaries and wages paid .. .. £'000	25,656	51,990	31,034	14,927	123,607
Value of power, fuel, etc., used .. £'000	2,001	1,658	1,246	974	5,879
Value of materials used .. .. £'000	47,505	56,326	65,699	21,640	191,170
Value of production .. .. £'000	42,967	80,291	45,708	26,051	195,017
Total value of output .. .. £'000	92,473	138,275	112,653	48,665	392,066
Value of land and buildings .. .. £'000	20,597	74,084	21,940	11,384	128,005
Value of plant and machinery .. .. £'000	13,195	17,132	14,394	20,014	64,733
Horse-power of engines ordinarily in use h.p.	76,977	74,076	70,257	44,956	266,266

(a) Includes motor body repairing, panel beating, duco spraying, etc.

In the next table, similar details are shown on a State basis for 1960-61 and for Australia for a series of years for these industries combined.

### MOTOR VEHICLES: CONSTRUCTION, ASSEMBLY, REPAIRS, ETC.

17. **Cotton.**—(i) *General.* Cotton has been grown in Australia since 1860, but never on a very large scale, and production has shown marked fluctuations over the long term. The growing of cotton, which is confined mainly to Queensland, is referred to in some detail in the chapter Rural Industry. The ginning and marketing of cotton is controlled by the Queensland Cotton Board which operates ginneries and processes by-products. The production of raw cotton is insufficient for local factory requirements and is supplemented by imports from overseas, chiefly (in 1961-62) from the United States of America, Mexico, Columbia and Peru.

(ii) *Spinning and Weaving.* The number of establishments engaged in cotton spinning and weaving in Australia and other particulars of the industry are shown in the following table for the years 1956-57 to 1960-61.

#### COTTON SPINNING AND WEAVING: AUSTRALIA

26. **Boots and Shoes.**—The following tables refer to boot and shoe factories as distinct from those devoted to repairing, except in Tasmania, where it has been necessary to include details of boot and shoe repairing, in order to avoid disclosure of confidential information, for that State. Factories engaged in the manufacture of sand shoes, goloshes and gum, etc. boots of rubber are not included here, being classified under Rubber Goods, *see* para. 43, page 245.

(a) Includes confectionery in Tasmania.

29. Sugar-mills and Sugar Refineries.—Sugar-cane is grown in New South Wales and Queensland, and particulars of area, yield, etc., are given in detail in the chapter Rural Industry. The products of the sugar-mill are raw sugar and molasses, the former being sent to the refineries in different parts of Australia for further treatment.

The following table shows the number of sugar-mills and the number of persons employed therein in New South Wales and Queensland for the years 1956-57 to 1960-61.

## SUGAR-MILLS

Particulars	1956-57	1957-58	1958-59	1959-60	1960-61
-------------	---------	---------	---------	---------	---------

## NEW SOUTH WALES

Number of factories ..	3	3	3	3	3
Number of persons employed ..	153	170	254	243	200

## QUEENSLAND

Number of factories ..	31	31	31	31	31
Number of persons employed ..	7,099	6,547	6,621	6,197	6,014

In 1960-61, there were two sugar refineries in Queensland and one each in New South Wales, Victoria, South Australia and Western Australia.

30. Confectionery.—Particulars for 1960-61 for each State and for Australia for a series of years are shown hereunder.

**CONFECTIONERY**

The butter, cheese and condensed milk industries are dealt with more fully in the chapter Rural Industry.

34. **Meat and Fish Preserving.**—The industries included in this group are engaged chiefly in the freezing and preserving of meat. Works have been established at the seaports for the purpose of handling beef, lamb and mutton for export, and insulated space for the carriage of chilled and frozen produce is provided by shipping companies trading between Australia and other parts of the world. In recent years, there has been considerable expansion in the canning of meat and fish.

Particulars of the quantities and values of beef, mutton and lamb preserved by cold process exported from Australia over a series of years will be found in the chapter Rural Industry.

35. **Breweries.**—The following table gives particulars of breweries for Australia for each of the years 1956-57 to 1960-61. Since a separate return for each branch of their activities is not available from all breweries, the figures may include details of employment, wages, output, etc., not directly concerned with the brewing of beer, although associated with it. These extraneous activities include cooperage, malt works, aerated waters, etc.

42. **Paper Making.**—Although the paper manufacturing industry has been established in Australia for many years, it was not until the manufacture of paper pulp from indigenous timber commenced in 1938-39 that any marked development occurred. The number of factories operating in 1960-61 comprised four in New South Wales, ten in Victoria, two in Queensland, two in South Australia, one in Western Australia, and three in Tasmania. In Tasmania, newsprint, writing and printing papers are produced, and in the other States wrappings, other papers and boards. Particulars for this industry are shown in the following table.

Mills producing pulp from eucalypt timber are operating in Victoria and Tasmania, while in South Australia pulp is being produced from locally-grown softwoods.

## CHAPTER VII

### ELECTRIC POWER GENERATION AND DISTRIBUTION

This chapter is divided into three major parts:—the Introduction, which deals briefly with the resources, generation and distribution, and future development of electric power in Australia; the Snowy Mountains Hydro-electric Scheme; and the origins, development, present situation and new projects of electrical systems in each Australian State and Territory. A Statistical Summary is appended.

The information contained in the chapter relates to situations existing and projects contemplated in 1962, and may be considerably affected by changes in policy or plans, or by developments in the projects themselves.

#### INTRODUCTION

1. **Distribution of Population and Location of Power Resources.**—The two principal centres of population and industry in Australia, the metropolitan areas of Sydney and Melbourne, make the greatest demands for electric power, and their growth has been associated with the development of large deposits of coal located relatively close to the source of demand. This, together with the fact that the major water resources are also located in the south-eastern portion of Australia, materially influences the distribution of industrial population and the location of major electric power stations.

By far the most important source of energy used in the production of electric power in Australia is coal. At 30th June, 1961, thermal power equipment represented 74 per cent., hydro plant 23 per cent., and internal combustion equipment 3 per cent. of the total installed generating capacity.

Most of Australia is poorly supplied with water, only about 15 per cent. receiving an annual rainfall of 30 inches or over, and these areas are confined largely to Tasmania and to the narrow coastal strip along the east coast of the mainland.

The only region on the mainland of Australia high enough to receive reliable winter snowfall, and from which, therefore, reasonably constant water supplies throughout the year can be expected, is the mountain chain which stretches from the high plateaux of south-eastern New South Wales to the north-eastern highlands of Victoria. The hydro-electric potential of this area is considerable, and plans have been formulated to develop more than 3,000,000 kW within the next 25 years. The two major construction projects in this area are the Snowy Mountains and Kiewa schemes. Other hydro-electric potential does exist on the mainland on the rivers of the coastal areas of New South Wales and Queensland, but the amount there available is smaller than the potential of the Alpine region. In Tasmania, hydro-electric resources have been estimated at about 50 per cent. of the total Australian hydro-electric potential. On the mainland the chief source of energy is coal; in Tasmania it is water.

2. **Electric Power Generation and Distribution.**—(i) *Ownership of Undertakings.* At the beginning of this century, Australia's electrical undertakings were carried on mainly by private enterprise, but with some measure of governmental control designed to provide standards of safety, and to define the scope and obligations of the private organizations. A trend towards public ownership commenced during the 1914–18 War and became more pronounced after the 1939–45 War. By 1961, all major generating stations supplying the public were, in varying degrees, under the control of statutory organizations constituted with the object of unifying and co-ordinating the generation and distribution of electricity supplies. There are still a large number of small private and municipal enterprises generating

power for supply to country towns, although central authorities are extending supply to these places wherever practicable. In many areas it has been, and remains, the practice for central authorities to sell power in bulk to local distributing organizations which undertake reticulation.

In addition to the private, local government and statutory organizations which generate and/or distribute electricity for sale, numerous firms generate power for use in their own establishments, particularly those engaged in mining pursuits remote from the main centres of population. This chapter, however, is concerned mainly with the activities of central electric stations, and the power regularly produced for such internal consumption is, in any case, a relatively small proportion of the total power produced.

(ii) *Power Production and Generating Capacity.* Since the 1939–45 War, the demand for power has increased considerably, industry and commerce have expanded rapidly, many new houses have been built, the population has increased by approximately 45 per cent., electricity supply has been extended to rural areas, and the use of domestic electric appliances has increased. The measures taken by the various authorities to satisfy the demand created by these developments are described in the following pages.

At 30th June, 1961, installed generating capacity in Australia was 6.66 million kW compared with 5.95 million kW in 1960, an increase of nearly 12 per cent. In 1960–61, each kW of installed capacity produced an average of nearly 4,000 kWh. These figures are based on Commonwealth totals; figures for the States vary, depending on such factors as the distribution of demand, number of consumers, and type of equipment employed. In 1961–62, the production of electric power in Australia was 26,450 million kWh.

### SNOWY MOUNTAINS HYDRO-ELECTRIC SCHEME\*

1. *Snowy Mountains Hydro-electric Power Act 1949.*—In July, 1949, the Commonwealth Government established the Snowy Mountains Authority, and empowered it to generate electricity by means of hydro-electric works in the Snowy Mountains Area; supply electricity to the Commonwealth:—(i) for defence purposes, (ii) for consumption in the Australian Capital Territory; and supply to a State, or to a State Authority, electricity not required for defence purposes or for consumption in the Australian Capital Territory.

The Authority is constituted by a Commissioner and two Associate Commissioners, the three appointments being made by the Governor-General. It is empowered to construct, maintain, operate, protect, manage and control works:—

- (a) for the collection, diversion and storage of water in the Snowy Mountains Area;
- (b) for the generation of electricity in that area;
- (c) for the transmission of the electricity generated;
- (d) incidental or related to the construction, maintenance, operation, protection, management or control of any works otherwise specified in the Act.

The Snowy Mountains Act is supported by a detailed agreement between the States of New South Wales and Victoria and the Commonwealth with regard to the construction and operation of the Scheme, the distribution of power and water, charges to be made for electricity, and other such matters. The Snowy Mountains Council, established under the terms of the Agreement and consisting of representatives of the Commonwealth, the Authority and the two States, directs and controls the operation and maintenance of the permanent works of the Authority and the allocation of loads to generating stations.

2. *Geography of the Area.*—The Snowy Mountains area in south-eastern New South Wales is the only part of the continent in which altitudes exceed 7,000 feet and in which there is a substantial area over the altitude of 6,000 feet. The precipitation which results from the presence of this barrier on the line of the prevailing winter depressions of Antarctic origin amounts to as much as 120 inches a year in the vicinity of Mt. Kosciusko, the highest point in Australia. The drainage from the snowfields is practically all to three systems—those of the Murray and Murrumbidgee Rivers, which flow inland, and that of the Snowy River, which flows southward to Bass Strait.

3. *Description of the Scheme.*—(i) *General.* The broad basis of the scheme is to transfer waters, which would otherwise flow to the sea unharnessed, from the Snowy River and its tributaries to the inland system, so that the water may be used for irrigation and

\* See also Chapter VIII. Water Conservation and Irrigation of this issue and special detailed article in Official Year Book No. 42, pp. 1103–1130.

to provide power. It involves two main diversions, the diversion of the Eucumbene, a tributary of the Snowy, to the Upper Tumut River, and the diversion of the main stream of the Snowy River at Island Bend and Jindabyne to the Swampy Plain River. These two diversions divide the scheme geographically into two sections, the Snowy-Tumut Development and the Snowy-Murray Development. (See the map on page 260.) For purposes of both power production and irrigation, it is necessary to regulate run-off, and this will be achieved by the use of Lake Eucumbene formed by the construction of Eucumbene Dam and other smaller storages to control the waters of the Eucumbene, Murrumbidgee, Tooma, and Tumut Rivers for the Snowy-Tumut development and of the Snowy River for the Snowy-Murray development. A sectional diagram of the Scheme appears on page 261.

(ii) *Snowy-Tumut Development.* This development comprises works for the diversion and regulation of the waters of the Eucumbene, Upper Tooma, Upper Murrumbidgee and Upper Tumut Rivers and their combined development through a series of power stations down the Tumut River. A major dam has been constructed on the Eucumbene River to create Lake Eucumbene, which has an ultimate usable storage of 3.5 million acre feet. The waters of the Upper Murrumbidgee River are diverted into Lake Eucumbene by a dam at Tantangara and a 10½-mile tunnel from Tantangara Reservoir. From Lake Eucumbene, the water flows through a 14-mile tunnel to Tumut Pond Reservoir on the upper reaches of the Tumut River, where it joins the waters of the Tumut River itself and the waters of the Tooma River diverted to Tumut Pond Reservoir by a diversion dam and a 9-mile tunnel. The 14-mile Eucumbene-Tumut Tunnel is used during periods of high flow to divert waters of the Tumut River from Happy Jacks Shaft or the combined waters of the Tumut and Tooma Rivers from Tumut Pond reservoir back to Lake Eucumbene for storage.

From Tumut Pond reservoir, water is conveyed by pressure tunnel to Tumut 1 underground Power Station (capacity 320,000 kW), returned to the Tumut River and then by another pressure tunnel to Tumut 2 underground Power Station (capacity 280,000 kW), thence discharging into Tumut 3 Reservoir at Lobs Hole, also on the Tumut River.

Tumut 3 and Tumut 4 Power Stations will be constructed between Tumut 3 and Blowering Reservoirs. Blowering Dam is to be constructed by the State of New South Wales and will provide for the regulation of power station discharges for use for irrigation in the Murrumbidgee Valley. The Authority will construct another power station at the foot of this dam to make use of irrigation releases for power purposes.

(iii) *Snowy-Murray Development.* The principal features of the Snowy-Murray development are the diversion of the main stream of the Snowy River by tunnels, shafts, and pipelines westwards through the Great Dividing Range into the Swampy Plain River in the catchment of the Upper Murray, and the development of power on the western slopes of the Alps. The main works of the development will be as follows.

- (a) Construction of a tunnel from the Snowy River near Island Bend through the Great Dividing Range to Geehi Reservoir on the Geehi River, and two power projects between Geehi Reservoir and the Swampy Plain River near Khancoban. The power stations associated with these two power projects, Murray 1 and Murray 2, will be the Scheme's largest stations and will have a combined capacity of 1,200,000 kW.
- (b) Construction of a tunnel from a small dam on the Snowy River near Island Bend to Eucumbene Dam to carry Snowy water to Lake Eucumbene for storage at times of high river flows. When river flows are lower than average, this stored water will be returned towards Island Bend and thence through the Snowy-Geehi Tunnel to Geehi Reservoir and Murray 1 and Murray 2 Power Stations.
- (c) Construction of a dam on the Snowy River near Jindabyne to store the residual flow of the Snowy and Eucumbene Rivers downstream from Island Bend and Eucumbene Dams, including the flows of major tributaries, the Crackenback and Mowamba Rivers, and the construction of a pumping plant, pipeline and tunnel to lift this water from Jindabyne Reservoir to the Snowy-Geehi Tunnel near Island Bend, where it will join the flow to the Geehi Reservoir for use through Murray 1 and Murray 2 Power Stations.

The power output of this section of the Scheme will be increased by the construction of subsidiary hydro-electric projects on the Upper Snowy River above Island Bend and on Windy Creek, a tributary of the Upper Geehi.

4. **Utilization of Power.**—The future electric power plants on the mainland of Australia will be predominantly thermal or thermo-nuclear installations, and in an electrical system in which the greater part of the energy is generated in thermal plants it is usually found that the hydro installations operate to the best advantage on peak load. However, the existing New South Wales and Victorian systems include a proportion of relatively old and less efficient installations which, for reasons of fuel economy, are also best used for the production of peak load power. Therefore, in order to utilize the potential of the Snowy Mountains Scheme most effectively, it is proposed to arrange the order of development so that the early stations will operate, initially, somewhat below the peak of the system load, with a progressive change to predominantly peak load operation as construction proceeds and as the load increases in magnitude.

The Snowy Mountains Scheme is situated about midway between the principal load centres of Sydney and Melbourne and is connected to those cities by 330,000 volt transmission lines. It is, consequently, in a position to take advantage of the diversity in the power requirements of these two load systems, a most important factor in so far as it affects the economy of operation of the supply systems of the two States.

Although most of the output from the scheme will go to the States of New South Wales and Victoria, the Commonwealth Government has the right to draw from the scheme its requirements of power and energy for the Australian Capital Territory and for defence purposes. For convenience, the Commonwealth's requirements are drawn from the New South Wales transmission network by an exchange arrangement between the Commonwealth and the Electricity Commission of New South Wales. Electricity over and above that required by the Commonwealth Government is divided between the States of New South Wales and Victoria in the ratio 2 : 1.

5. **Progress and Future Programme.**—The scheme's first power station, Guthega, of 60,000 kW initial capacity, came into operation in February, 1955. It was followed by Tumut 1, an underground power station with a capacity of 320,000 kW, in 1959, and by the 280,000 kW Tumut 2 underground power station in 1962. The total installed capacity of the scheme at present is 660,000 kW. Eucumbene Dam, which provides the major regulating storage for the scheme, was completed in May, 1958. Tumut Pond Dam, completed in September, 1958, provides the balancing storage for the power stations of the Upper Tumut Works. The first trans-mountain diversion of water from Lake Eucumbene to the Tumut River at Tumut Pond was made possible when the 14-mile Eucumbene-Tumut Tunnel was completed in June, 1959. The 10½-mile Murrumbidgee-Eucumbene Tunnel and the 9-mile Tooma-Tumut Tunnel came into operation early in 1961. Following the completion of the Upper Tumut Works, construction activity has been concentrated on the Snowy-Murray development. Construction has commenced on the 15-mile Eucumbene-Snowy Tunnel, the 9-mile trans-mountain Snowy-Geehi Tunnel, the 7½-mile Murray 1 Pressure Tunnel, the 1-mile Pressure Pipeline and the 760,000 kW Murray 1 Power Station. These works, together with the Khancoban Dam, which will regulate power station releases before discharge into the Murray River, are to be substantially completed in 1966. At this time, the first trans-mountain diversion of water from the Snowy River to the Murray River and the first generation of electricity from the Murray 1 Power Station will occur.

## STATES AND TERRITORIES

### § 1. New South Wales

1. **General.**—In Official Year Book No. 39, an account was given in some detail of the origin and development of electricity generation and distribution in New South Wales. At present, the following three main Acts govern electricity supply in New South Wales.

The *Local Government Act*, 1919, which lays down the various rights and responsibilities of local government bodies in the establishment and operation of electricity trading undertakings.

The *Electricity Development Act*, 1945–1957, which established the Electricity Authority of New South Wales as the body responsible for the co-ordination of electricity supply throughout the State.

The *Electricity Commission Act*, 1950–1961, which constituted the Electricity Commission of New South Wales as the major generating authority and not subject to the provisions of the *Electricity Development Act*.

2. **Organization.**—(i) *The Electricity Commission of New South Wales.* The Commission consists of five members, of whom one is full-time Chairman and one is full-time Vice-Chairman, and is directly responsible to the Minister for Local Government.

The main function of the Commission is the generation and transmission of electricity, which it sells in bulk to distributing authorities (mainly local government bodies) throughout a large part of the State, to the government railways, and to certain large industrial consumers. As the major generating authority, it is also responsible for the development of new power sources except the Snowy Mountains region.

(ii) *Other Electricity Supply Authorities.* The retail sale of electricity to the public is, in general, carried out by separate electricity supply authorities—municipal and shire councils, electricity county councils (consisting of groups of shire and/or municipal councils), or private franchise holders. At 30th June, 1962, there were 57 supply authorities throughout the State, of which 16 also generated part or all of their power requirements. Most of the small power stations which had operated in many country centres have closed down as the main transmission network has been extended.

Over the past few years, there has been a distinct trend towards the consolidation of supply areas, many of which have been individually too weak to form satisfactory areas for distribution. Generally, these consolidations have taken the form of a county district consisting of a number of neighbouring shire and municipal areas grouped only for electricity supply purposes, and administered by a county council of representatives elected by the constituent councils. Of the 225 cities, municipalities and shires in New South Wales, 215 are included in one or other of the 36 electricity county districts. The majority of these county districts have been constituted since 1945. The largest of the county councils is the Sydney County Council, which at 30th June, 1962, was supplying 494,698 consumers in the Sydney Metropolitan Area.

(iii) *The Electricity Authority of New South Wales.* The Electricity Authority was constituted for the purpose of promoting and regulating the co-ordination, development, expansion, extension and improvement of electricity supply throughout the State. A regulatory body, it consists of seven members of whom one is a full-time Chairman. Like the Electricity Commission, it is responsible to the Minister for Local Government.

The following are the main functions of the Authority.

*Distribution.* The approval of the Authority is required for the establishment or acquisition of an electricity trading undertaking by a local government council, for the granting or renewing by such a council of electricity franchise agreements or corresponding agreements with other councils, and for the giving or taking of bulk supplies of electricity. It also has power to formulate proposals for the establishment of county councils.

In exercising these powers, the Authority is mainly concerned with seeing that distributing authorities are sufficiently strong to provide an economical, efficient and satisfactory service. Its most important activities in this regard are in investigating supply areas and in making recommendations to the Minister for the consolidation of such areas into county districts.

*Rural Electrification.* The Authority administers the rural electricity subsidy scheme under which rural electrification throughout the State is progressing very rapidly (see para. 4, p. 253).

*Safety.* The *Electricity Development Act, 1945–1957*, contains provisions for the making of regulations relating to most aspects of safety, and these powers are being used more and more extensively. Safety regulations now in force cover such matters as inspection of consumer's installations, licensing of electricians and electrical contractors, approval of electrical appliances, safety of linesmen and overhead line construction.

*Generation and Transmission.* The approval of the Authority is required for the establishment or extension of power stations and main transmission lines (with the exception of those of the Electricity Commission).

3. **Generation and Transmission.**—(i) *General.* Except in the Snowy Mountains district and in one or two other areas, New South Wales is lacking in major water power potential, and for the generation of electricity the State is dependent mainly on steam power

stations. During the year ended 30th June, 1962, coal-fired stations generated 91.8 per cent. of the State's energy requirements, hydro-electric stations 7.6 per cent. and internal combustion plants 0.6 per cent. In addition, 349,295 million kWh were purchased from the Snowy Mountains Hydro-Electric Authority during the year ended.

The proportion of power generated in the hydro-electric stations will increase considerably with the future plant development of the Snowy Mountains scheme, but at no stage of its development will the scheme supply more than 15 per cent. of the State's energy requirements. Coal-fired steam power stations, therefore, will continue to supply the greater part of requirements for the foreseeable future.

(ii) *Major Generating Stations.* In New South Wales, the generation of electricity has followed the general world trend towards large centralized power stations supplying large areas through inter-connected transmission networks. Whereas until a few years ago the greater part of the coal-fired generating plant was located in the industrial areas of Sydney, Newcastle and Wollongong, where most of the population is also located, major power stations are now being located on the coalfields to the north, south and west of Sydney, and power is transmitted to the load centres through high voltage transmission lines.

At 30th June, 1962, the major power stations of the State system of the Electricity Commission of New South Wales and their installed capacities were as follows:—*Steam*—Bunnerong "A" and "B" (Sydney), 375,000 kW; Wangi (Lake Macquarie), 330,000 kW; Tallawarra (Lake Illawarra), 320,000 kW; Pyrmont (Sydney), 200,000 kW; Wallerawang (near Lithgow), 240,000 kW; White Bay (Sydney), 172,000 kW; Balmain (Sydney), 107,000 kW; Ultimo (Sydney), 80,000 kW; Port Kembla, 60,500 kW; Zarra Street (Newcastle), 45,000 kW; Muswellbrook, 30,000 kW; Lithgow, 27,000 kW; Tamworth, 27,000 kW; Maitland, 20,000 kW; Penrith, 20,000 kW; Liverpool, 20,000 kW; *Hydro*—Hume (near Albury), 50,000 kW; Warragamba (near Penrith), 50,000 kW; Burrinjuck (near Yass), 20,000 kW. There were also various other steam, hydro and internal combustion stations aggregating 34,470 kW. The total installed capacity of the Electricity Commission's system was 2,227,970 kW.

The greater part of the Commission's generating plant is concentrated within a hundred mile radius of Sydney—the largest stations outside this area being located at Hume, Muswellbrook and Tamworth.

(iii) *Major Transmission Network.* The retailing of electricity to 97 per cent. of the population of New South Wales is in the hands of local distributing authorities, which obtain electricity in bulk from the Commission's major State network. This network of 330 kV, 132 kV, 66 kV and some 33 kV and 22 kV transmission lines links the Commission's power stations with the load centres throughout the eastern portions of the State, extending geographically up to 400 miles inland.

At 30th June, 1962, there were in service 518 route miles of 330 kV (including 269 miles operating for the time being at 132 kV) and 1,477 miles of 132 kV transmission lines (including 258 miles operating for the time being at 66 kV or lower). There were also in service 2,372 miles of transmission line of 66 kV and lower voltages.

Superimposed upon the 132 and 66 kV network will be a powerful 330 kV trunk system extending from the Snowy Mountains Hydro-electric Scheme in the south through Wollongong, Sydney and Newcastle to Armidale in the north. At 30th June, 1962, the transmission at 330 kV was in operation between the Snowy Mountains Upper Tumut Switching Station and the Commission's Sydney South 330 kV Transmission Centre, conveying power from the Snowy Mountains Scheme to the Commission's State network, and interconnecting the systems of the Electricity Commission of New South Wales and the State Electricity Commission of Victoria at the Upper Tumut Switching Station.

The installed transformer capacity at the Commission's 97 sub-stations was 5,134,050 kVA.

(iv) *Separate Systems and Total State Installed Capacity.* A number of small plants which supply isolated towns and villages have not yet been interconnected with the main network.

Some local government bodies have undertaken the development of independent power stations. Of these, the more important are:—the Northern Rivers County Council, which has constructed a steam power station at Koolkhan (near Grafton) with an installed capacity of 28,750 kW, and the North-West County Council, which has established a 12,500 kW steam power station on the Ashford coalfield.

The aggregate installed capacity for the whole of the New South Wales systems and isolated plants was 2,328,887 kW at 30th June, 1962.

(v) *Future Development.* The major new thermal stations already built and those now being developed on the coalfields will become the main base load centres for the northern, southern and western regions. Wangi, on Lake Macquarie, Wallerawang, near Lithgow and Tallawarra, on Lake Illawarra, have been completed, the latter including two 100,000 kW generating units which are the largest in operation in the State.

At Vales Point, on Lake Macquarie, work is in progress on a large thermal station with an initial capacity of 875,000 kW. The first stage will comprise two 200,000 kW units and the second stage one 200,000 kW and one 275,000 kW unit.

The site of a further major station, to be called Munmorah power station, has been selected between Lakes Munmorah and Budgewoi (on the central coast), and contracts have been let for the first stage of construction comprising two 350,000 kW generating units.

The development of the 330 kV main system is expected to be rapid in the next few years. The 330 kV line from the Snowy region to Sydney, via the 330 kV centre at Yass and a new one being built at Dapto, is being duplicated. Work has also begun on two new lines from Sydney South to a new substation just north of Sydney, and a further link from there to the new power station at Vales Point ready for the operation of that station in 1963.

New construction of 132 kV and 66 kV transmission lines will extend the system within the next two or three years to South Grafton in the north, to Hay and to Moulamein in the west and south-west, and subsequently to Moruya on the South Coast. Plans to augment the transmission system during the next five years provide for the construction of 850 route miles of 330 kV lines and six associated substations, 800 route miles of 132 kV line and 25 substations, as well as additions to existing substations and a number of lower voltage works.

(vi) *Hydro-electricity.* The greater part of the hydro-electric potential of New South Wales is concentrated in the Snowy Mountains Area (*see* Snowy Mountains Hydro-electric Scheme, p. 248). Apart from this area, there are in operation the new hydro-electric stations at the Warragamba Dam (50,000 kW) and Hume Dam (50,000 kW), and stations at the Burrinjuck Dam (20,000 kW), Wyangala Dam (7,500 kW) (shortly to be closed during repairs and extensions to the dam), and Keepit Dam (6,000 kW). The output of Warragamba Power Station depends upon the availability of water surplus to the requirements of the Sydney Metropolitan Area, and the output of the other stations on the release of water for irrigation.

Of the remaining hydro installations, the largest is that of the New England County Council on the Oakey River, a tributary of the Macleay River, which has a capacity of 5,250 kW.

The Northern Rivers County Council operates a hydro-electric power station on the Nymboida River, a tributary of the Clarence River. This station has a capacity of 4,500 kW.

The Bega Valley County Council has constructed a hydro-electric scheme at Brown Mountain utilizing the headwaters of the Bemboka River. This installation has a capacity of 3,950 kW.

The Mullumbimby Municipal Council has in operation two 150 kW hydro units on Wilson's Creek, a tributary of the Richmond River.

4. *Rural Electrification.*—When the Electricity Authority of New South Wales was constituted in 1946, only 16,000 New South Wales farms were being served with electricity—less than one-quarter of those within reasonable reach of public electricity supply systems. Under a subsidy scheme approved in August, 1946, local electricity suppliers receive subsidies from the Electricity Authority towards the cost of new rural lines. The amount of subsidy is based on the estimated cost of the proposed extension and the number of consumers able to be served by the new lines, and the scheme was designed to encourage local electricity supply authorities to construct the more economic extensions first by fixing a limit to the cost for which suppliers could be subsidized. Originally this limit was £250 per consumer when averaged over the cost of the whole extension, but the limit was raised to £400 in December, 1953. Some subsidy was paid on higher cost extensions, but the excess over an average of £400 was not subsidized.

To assist supply authorities in extending supply to less populated, and thus high-cost, areas of the State, the subsidy scheme was extended from May, 1959, to provide for payment of increased subsidy in respect of extensions where the average capital cost per consumer lies within the range of £600-£800.

Between August, 1946, and June, 1962, about 42,754 miles of new distribution lines in rural areas were erected at a cost of over £29,000,000. These lines served 51,270 farms and 31,292 other rural consumers. At 30th June, 1962, the Electricity Authority was committed to the payment of £12,689,763 in subsidies, of which £6,137,270 had been paid.

## § 2. Victoria

1. *General*.—In Official Year Book No. 39, a detailed description is given of the development of electricity generation in the cities of Melbourne, Geelong, Bendigo and Ballarat up to the time of transfer of control of electricity undertakings in those cities to the State Electricity Commission of Victoria. An account is also given of the events culminating in the establishment of the Commission in 1919, and of the early developments in the Commission's undertakings.

2. *State Electricity Commission of Victoria*.—(i) *Power and Fuel Authority*. Since it began operating in 1919, the State Electricity Commission has expanded and co-ordinated the production and supply of electricity on a State-wide basis to the point where its system now generates almost all the electricity produced in Victoria and serves about 97 per cent. of the population through a supply network covering more than three-quarters of the populated area of the State.

Development of Victoria's electricity system is based on the utilization for both power and fuel of Victoria's extensive brown coal resources in the Latrobe Valley in eastern Gippsland, with supplementary development of the hydro-electric potential of north-eastern Victoria. Victoria is entitled to one-third of the electricity from the Snowy Mountains Hydro-electric Scheme, after the Commonwealth has taken the power it needs for its purposes. Output from the Snowy scheme was made available to Victoria in the latter half of 1959. Victoria also shares with New South Wales in the electricity generated at Hume Hydro Station on the River Murray. Over 80 per cent. of the State's electricity is generated from brown coal, either used in its raw state or manufactured into higher quality fuel in the form of brown coal briquettes. All the brown coal and briquette fuel is supplied by undertakings which the Commission itself owns and operates. Output of brown coal in 1961-62 from the three open cuts at Yallourn, Yallourn North and Morwell totalled 16,241,414 tons, of which 10,981,172 tons were used in the Commission's own power stations, and 4,861,632 tons were manufactured into 1,819,937 tons of brown coal briquettes, 52 per cent. of the briquette output then being used for electricity production in metropolitan and provincial steam power stations.

The two functions, generation of electricity and production of fuel, are closely integrated. Apart from the large proportion of brown coal and briquette fuel consumed in the power stations, the process of briquette manufacture results also in large-scale generation of electricity, since the steam needed for processing the raw coal for briquetting is first used to operate turbo-generators.

(ii) *Status and Powers*. Constituted by Act of the Victorian Parliament, the State Electricity Commission is a semi-governmental authority administered since 1921 by a full-time Chairman and three part-time Commissioners. The principal duty of the Commission is to co-ordinate and extend on an economic basis the supply of electricity throughout Victoria. For this purpose, it is vested with power to erect, own, and operate power stations and other electrical plant and installations, supply electricity retail to individual consumers or in bulk to any corporation or public institution, acquire and operate electricity undertakings, develop, own, and operate brown coal open cuts and briquetting works, and develop the State's hydro-electric resources. From its own revenues, which it controls, the Commission must meet all expenditure in the operation of its power, fuel and subsidiary undertakings, and all interest and other charges incurred in the service of its loans and other capital commitments.

The Commission is the controlling authority for all electrical undertakings in Victoria. It is responsible for the registration of electrical contractors, the licensing of electrical mechanics, the control of installation methods and material and the testing and approval of electrical equipment and appliances. Incidental to its main operations, the Commission owns and operates the tramway systems in Ballarat and Bendigo. For the accommodation of its employees at Yallourn, the Commission owns and administers the town of Yallourn.

It also owns large housing estates in the surrounding area, but is progressively selling houses in these estates to Commission employees. In the Kiewa hydro-electric works area, it has built the two townships of Mount Beauty and Bogong, municipal administration of the former now being vested in the Shire of Bright. With construction at Kiewa now complete, many houses at Mount Beauty have been sold for holiday homes.

(iii) *Electricity Supply.* At 30th June, 1962, consumers in Victoria served by the State system numbered 941,433. Outside the State system, there were 15,052 other consumers served by local country undertakings. The system supplies all the Melbourne metropolitan area and over 1,700 other centres of population.

The Commission sells electricity retail in all areas except part of the metropolitan area, where it sells in bulk to eleven municipal undertakings which operate as local retail supply authorities under franchises granted before the Commission was established. Bulk supply is also being provided at present to several New South Wales municipalities and irrigation settlements bordering the River Murray. Rural electrification is now more than 95 per cent. completed, the plan to extend the State system to all populated regions of Victoria having made rapid progress during recent years. The number of consumers served by the State system outside the Melbourne metropolitan area is 411,421, and the number of farms connected to supply 49,506. Of the new consumers connected to supply each year, more than two-thirds are outside the metropolitan area. New farm connexions average nearly 3,000 a year.

The Commission's retail consumers numbered 743,234 at 30th June, 1962. Retail supply is administered through the metropolitan branch, seven extra-metropolitan branches (Ballarat, Eastern Metropolitan, Geelong, Gippsland, Midland, North Eastern and South Western) and the North Western Region, which comprises the Northern branch (based on Bendigo) and the two sub-branches based on Mildura and Horsham (Wimmera). At 30th June, 1962, there were branch and district supply offices in 86 towns in Victoria.

(iv) *Electricity Production.* Electricity generated in the State system or purchased by it totalled 6,853 million kWh in 1961-62 or 99 per cent. of all Victoria's electricity. The system comprises a series of thermal and hydro-electric power stations. Inclusive of generator capacity both within the State and available to the Victorian system from outside the State, the total installed generator capacity at 30th June, 1962, was 1,879,000 kW. Power stations are interconnected, and feed electricity into a common pool for general supply. The major power station in this interconnected system is the brown coal burning power station at Yallourn, which alone generates more than half of Victoria's electricity. Other power stations in the interconnected system comprise the important brown coal burning power station at Morwell; steam stations in Melbourne (Newport, Richmond and Spencer Street), Geelong and Ballarat; hydro-electric stations at Kiewa; at Eildon; on the Rubicon and Royston Rivers, near Eildon; and at Cairn Curran; and internal combustion stations at Shepparton and Warrnambool. All within Victoria are commission-owned, except Spencer Street Power Station, which remains the property of the Melbourne City Council, although operated as a unit in the interconnected system. A 330,000-volt transmission line links the Victorian system with the Snowy Mountains undertaking, and also provides facilities for interconnexion between the Victorian and New South Wales State generating systems. Also linked with the Victorian interconnected system is the hydro station at Hume Dam on the River Murray. This power station is operated by the Electricity Commission of New South Wales. Output and operating costs are shared by Victoria and New South Wales.

In meeting the total demand on the system, which fluctuates throughout the day and from month to month, each group of stations in the interconnected system is assigned a predetermined function dependent upon the availability of power from each group and the economics of generation. The various stations are utilized in the combination that will meet the system load most economically at a given time.

Commission power stations not connected with the rest of the State system at 30th June, 1962, comprised the two steam stations (Redcliffs and Mildura) serving the Mildura region. This region was scheduled to be interconnected with the rest of the State system in the latter half of 1962.

(v) *Transmission and Distribution.* The electrical transmission and distribution system in the State supply network at 30th June, 1962 comprised 36,949 miles of power-lines, 17 terminal receiving stations, 5 switching stations, 74 main sub-stations and over 30,000 distribution sub-stations. Main transmission is by 220 kV, 132 kV and 66 kV power lines which supply the principal distribution centres and also provide interconnexion between the

power stations. The 330 kV line connecting the Victorian system with the Snowy Mountains Scheme and the New South Wales transmission system via Dederang, near Kiwara, came into service in November, 1959. The 220 kV system now totals 983 miles.

(vi) *Future Development.* Major new construction is concentrated on the erection of a large new brown coal burning power station (Hazelwood) near Morwell in the brown coal fields of the Latrobe Valley. At the same time, the Commission continues its programme of rural electrification and extension and reinforcement of the State system (particularly in western and north-western Victoria).

Yallourn Power Station has been greatly enlarged, and an extension of 240,000 kW capacity was completed in 1962. At Morwell, six miles from Yallourn, the Commission has almost completed a second brown coal power and briquette undertaking. The new undertaking comprises a brown coal open cut and power station operating in association with a briquetting plant. Some of the electricity generated at Morwell is needed to operate the briquette works, but most of the output of the power station is transmitted through Yallourn to metropolitan terminal stations for general supply through the State network. The power station began operation at the end of 1958. Installed generator capacity, now 110,000 kW, will be increased to an ultimate capacity of 170,000 kW on completion of the power station by the end of 1962. Commercial production of briquettes began in December, 1959. The briquette works (completed in September, 1960) have a production capacity of approximately 1,300,000 tons of briquettes a year. The Commission's new Hazelwood Power Station is being erected a short distance south of Morwell. It will operate on raw brown coal fuel supplied by belt conveyor direct from the Morwell open cut. The power station will have a capacity of 1,200,000 kW and will comprise six turbo-generators each of 200,000 kW capacity. Hazelwood is being built in stages. Contracts have been placed for four generating units (800,000 kW) and the related boiler plant, and site work is in progress on the first 400,000 kW stage. The first turbo-generator is due to be in service in 1964 and the second in 1965. Succeeding units are scheduled to be in service in 1967, 1968, 1970 and 1971. Power generated at Hazelwood Power Station will be transmitted at high voltage to Melbourne metropolitan terminal stations for distribution through the State supply network.

3. *Local Country Electricity Undertakings.*—At 30th June, 1962, there were 26 independent electricity undertakings in country centres in Victoria generating and distributing their own local supply. Most of these undertakings were in the far south-west, west and north-west of the State. Under the State Electricity Commission's rural electrification programme, almost all the independent local country undertakings will ultimately be acquired and absorbed into the State system. For the year 1961–62, the total production of the independent undertakings was 40 million kWh. The number of consumers at 30th June, 1962, was 15,052. The operation of the independent undertakings is governed by the *Electric Light and Power Act*, 1958, which the State Electricity Commission administers.

### § 3. Queensland

1. *General.*—In Official Year Book No. 39, an account is given of the growth of electricity generation in Queensland, with particular reference to the City Electric Light Co. Ltd. of Brisbane (now the Southern Electric Authority of Queensland), the Brisbane City Council and the Toowoomba Electric Light and Power Co. Ltd. (taken over by the Southern Electric Authority) (see para. 3).

The generation and distribution of electric power in Queensland in earlier years had tended to lag behind developments in this field in other States of Australia, and in 1935, the Queensland Government, being concerned with the need to develop the State's power resources in the public interest, appointed a Royal Commission to inquire into and make recommendations on matters relating to the generation and distribution of electric power in Queensland. (An account of the results of its investigations and of the alternative proposals put before it will be found on page 1182 of Official Year Book No. 39.) The Commission recommended that a commission to control the generation and distribution of electric power be vested in the State; but if the establishment of an operating commission was not found practicable, then electrification under public control with ultimate public ownership should be implemented by means of a controlling commission capable of being converted into an operating commission. In 1937, the State Government constituted the State Electricity Commission of Queensland.

2. **The State Electricity Commission of Queensland.**—The State Electricity Commission of Queensland commenced to function during January, 1938, its main powers being to secure a proper and efficient supply of electric power, review tariffs, grant licences to supply electricity, secure the safety of the public, and control and advise electrical undertakings generally. It was thus a controlling authority as distinct from an operating authority. Details of its growth and development may be found in earlier issues of the Official Year Book (see No. 44, p. 284). Since its inception, the Commission has made considerable progress in its task of developing the State's power resources and promoting a more widespread use of electric power. The degree of utilization of electrical energy in Queensland now compares favourably with other States in the Commonwealth.

3. **The Southern Electric Authority of Queensland.**—A further major step in electrical progress was taken by the passing of the *Southern Electric Authority of Queensland Act* of 1952. This Act constituted the City Electric Light Co. Ltd. as a public authority to be known as the Southern Electric Authority of Queensland. Two government representatives are included on the board of the Authority, whose establishment prepares the way for the complete amalgamation, in due course, of the electrical undertakings serving the south-eastern Queensland area of supply.

As from 1st July, 1954, the Southern Electric Authority acquired the Toowoomba Electric Light and Power Co. Ltd., thus bringing that company's area of supply under its control. The Southern Electric Authority is now responsible for the electrical supply and development of a consolidated area of over 17,000 square miles and is also providing bulk supply to the Western Downs area centred on Dalby. The Authority also supplies the Tweed area of northern New South Wales.

The Southern Electric Authority supplies the requirements of the inner portion of the City of Brisbane and those of a considerable rural area in the south-eastern corner of the State from modern power stations at Bulimba, a suburb of Brisbane, and a "packaged plant" at Abermain (near Ipswich). The output from a 3,200 kW hydro-electric unit installed at Somerset Dam near Brisbane is also fed into the Southern Electric Authority system. With these plants, 941 million kWh were generated in 1960–61 and 991 million kWh in 1961–62, while the total number of the Authority's consumers at 30th June, 1961, was 129,399 and at 30th June, 1962, 133,243.

4. **The Brisbane City Council.**—The Brisbane City Council's electrical undertaking comprises power stations at New Farm and Tennyson (with a "packaged plant" also installed at the latter locality) and supplies suburban Brisbane. Units purchased and generated amounted to 781 million kWh in 1960–61 and 838 million kWh in 1961–62, and there were 143,627 consumers connected at 30th June, 1961 and 148,911 at 30th June, 1962.

5. **Regional Electricity Boards.**—With a view to facilitating the control and development of electricity supply in areas of low population density and those having a predominantly primary producing economy, the Government, in 1945, passed the *Regional Electric Authorities Act* providing for the creation of regions of electricity supply and the constitution of regional electricity boards. Prior to the establishment of these boards, no attempt had been made to unify or co-ordinate electricity supplies outside south-eastern Queensland, and rural electrification, apart from reticulation within certain townships, was practically unknown.

Soon after passage of the Act, four regional boards were constituted, Wide Bay, Capricornia, Townsville and Cairns. A fifth board, South Burnett, became an operating authority in October, 1947, but on 1st July, 1951, was absorbed in the Wide Bay Regional board, and this organization is now known as the Wide Bay-Burnett Regional Electricity Board. As from 1st March, 1957, a further regional board became operative, covering the areas of Mackay, Sarina, Proserpine and adjacent rural areas under the name of Mackay Regional Electricity Board. Supply throughout this region is provided from the central generating station at Mackay, and accelerated electrical development of this area is being undertaken.

The Townsville Regional Electricity Board's area was extended in July, 1957, to include that of the Bowen Electricity Undertaking, in October, 1959, to include the Hughenden Electricity Undertaking, and in September, 1960, to include the Collinsville Electricity Undertaking. The local authority areas of Thursday Island and Cook were included in the Cairns Regional Electricity Board's area from 1st July, 1956, and 1st July, 1957, respectively, and the Normanton Undertaking was transferred to this Board on 1st January, 1962. As from 1st January, 1958, the Capricornia Region was extended to include the Shires of Bauhinia, Belyando, Emerald and Peak Downs in central-west Queensland.

Activities of the five Regional Boards in 1960-61 and 1961-62 compared with operations of the stations located in regions in 1945-46 are shown in the following table.

### QUEENSLAND: REGIONAL OPERATIONS

Region	1945-46		1960-61		1961-62	
	Units generated	No. of consumers	Units generated	No. of consumers	Units generated	No. of consumers
	Million kWh		Million kWh		Million kWh	
Wide Bay-Burnett ..	13.7	11,467	102.9	33,199	109.3	34,769
Capricornia ..	19.5	11,196	159.4	24,355	175.7	25,342
Townsville ..	25.8	11,612	(a) 53.1	30,338	(a) 98.0	31,334
Cairns ..	22.7	9,722	276.5	23,686	257.7	24,650
Mackay ..	6.5	4,283	40.9	12,203	44.1	13,353
<b>Total ..</b>	<b>88.2</b>	<b>48,280</b>	<b>632.8</b>	<b>123,781</b>	<b>684.8</b>	<b>129,448</b>

(a) Excludes 131.4 m.kWh purchased from Tully Falls Power Station in 1960-61 and 99.5 m.kWh in 1961-62.

Installed generator capacity of the five regional boards at 30th June, 1962, was:—Wide Bay-Burnett, 37,500 kW; Capricornia, 54,088 kW; Townsville, 41,725 kW; Mackay, 15,250 kW; Cairns, 86,875; total, 235,438 kW.

6. **Hydro-electricity.**—Behind the coastal plain of the Cairns-Ingham area is an extensive plateau with elevation ranging from 2,000 to 3,000 feet, although isolated peaks exceed 4,000 feet. The short coastal streams which rise on the plateau descend rapidly into deep gorges, which they have cut through the divide. With heavy monsoonal rainfall on their catchments and concentrated fall, these streams represent a considerable potential source of power, but storage, which can be provided in most cases, is essential to control the very variable flow.

There is a pronounced wet season from December to March, with a dry season from July to November. Average annual rainfall varies greatly with location, being 178 inches at Deeral (midway between Cairns and Innisfail), but only 34 inches at Cashmere (120 miles south-west of Innisfail).

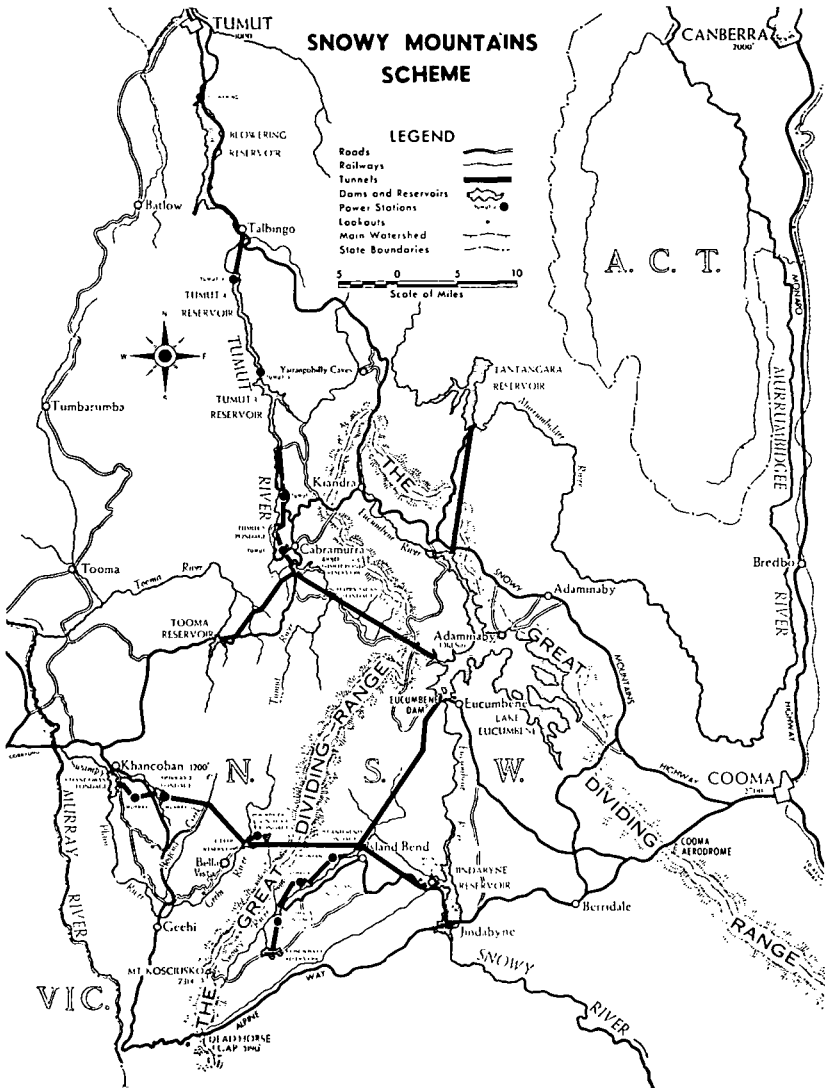

In 1935, a small hydro-electric power station was placed in service at Barron Falls, ten miles north-west of Cairns. The station comprises three 2,000 h.p. turbines, each driving a 1,320 kW generator, with a hydraulic head of 410 feet. An output of 34 million kWh was attained during 1961-62, the station operating essentially as a run-of-river station, without any significant water storage capacity being available. Power is fed at 22 kV into the main network at Mareeba and Cairns.

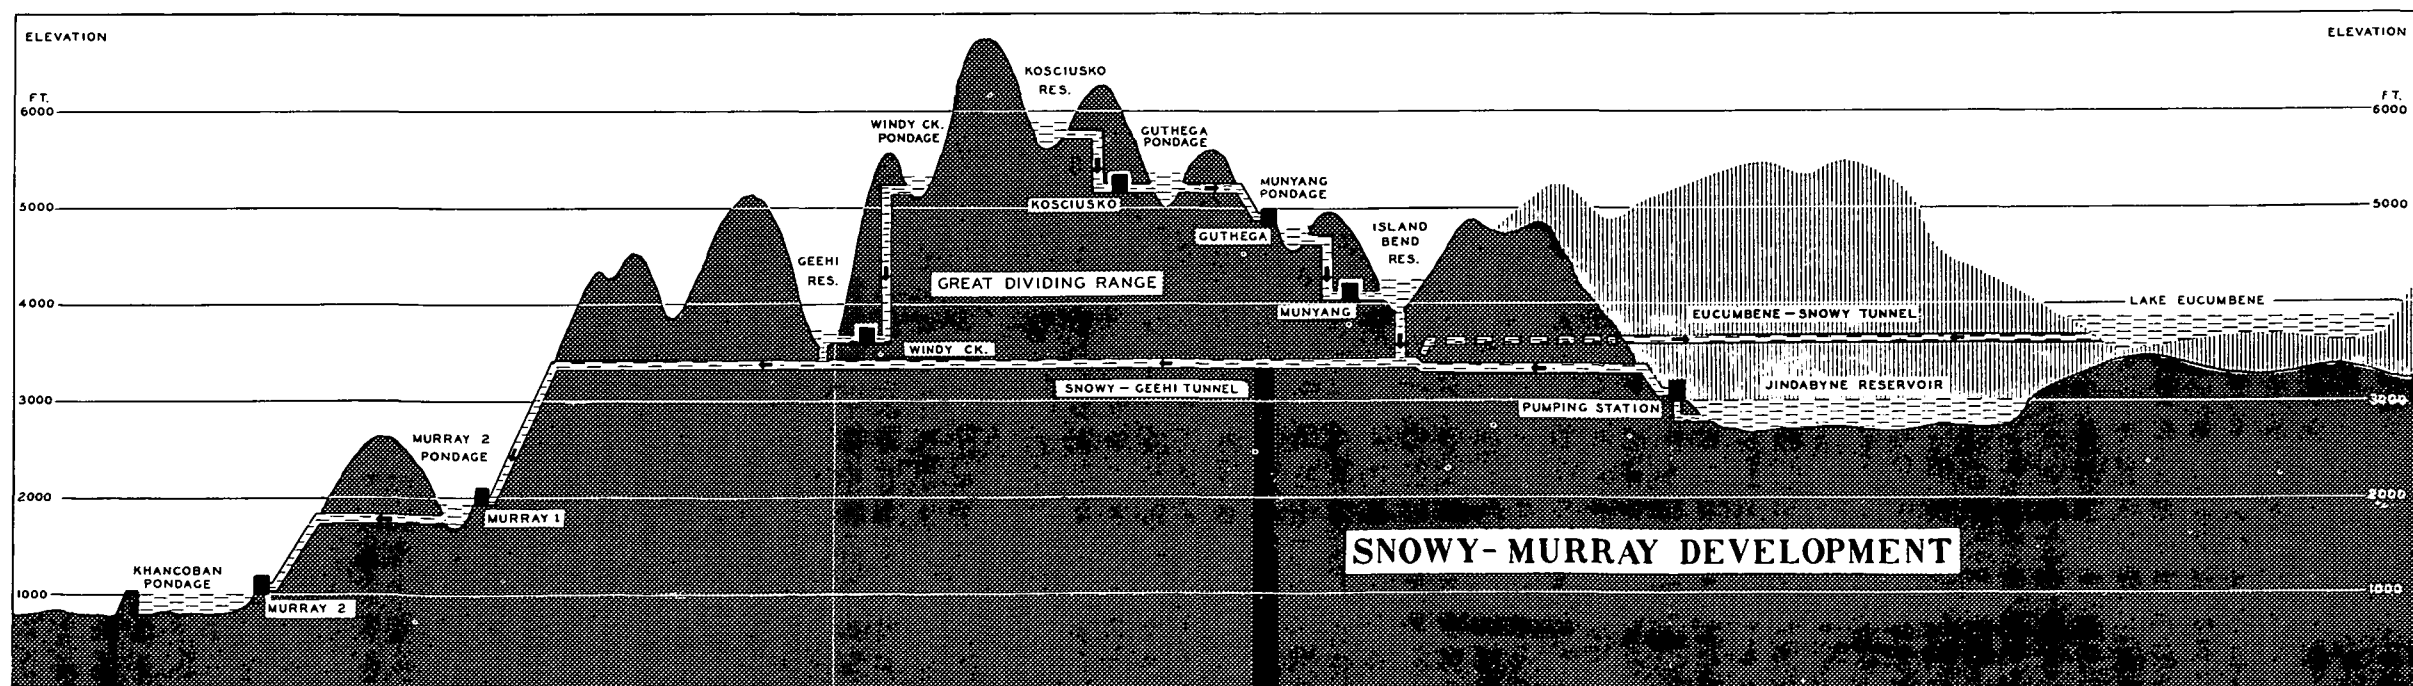

The hydro-electric power scheme at Tully Falls was commissioned in September, 1957, with an initial plant installation of 36,000 kW. Work was completed during 1958-59 on the installation of a further two 18,000 kW sets, making a total installation of 72,000 kW. An output of 222 million kWh was obtained from this station during 1961-62. Power is transmitted to the load centres at Cairns and Innisfail by means of 132 kV transmission lines. Further extensions of the Tully Scheme may be undertaken at a later date. Inter-connexion of the Tully Scheme with the Townsville area, which is also being served by a thermal station, was completed in February, 1958, by the provision of a 160 mile double circuit 132 kV transmission line.

A new peak load power station is under construction at Barron Falls to provide a firm (dry year) output of 60,000 kW at 25 per cent. load factor (i.e. firm output of 131 million kWh per annum). This scheme, when commissioned in 1963, will ensure an adequate supply of power to the Cairns and Townsville areas until 1967. The completed scheme will provide for an underground power station below the Barron Falls containing two 30,000 kW Francis turbines, operating under a head of 920 feet.

Eucumbene Dam and Lake Eucumbene, the main water storage of the Snowy Mountains Scheme.

Other major schemes which have been or are currently being investigated include North Johnstone-Russell Rivers (32,000 kW); Beatrice-North Johnstone Rivers (9,000 kW); South Johnstone River (25,000 kW); Herbert River (90,000 kW); Burdekin River (80,000 kW); and Broken River.

The State Electricity Commission, in conjunction with other government departments, is constantly reviewing the development of hydro-electric resources. It is estimated that full development of the hydro-electric potential of north Queensland would provide the equivalent of over 300,000 kW of power at 50 per cent. load factor or approximately 1,300 million kWh a year.

**7. Generating Capacity.**—(i) *Regions.* Within the areas administered by the regional electricity boards development extending over a considerable period may be divided into two stages. The first stage, which is now virtually completed, saw the construction of central power stations at the principal load centres, and of transmission system, taking supply to smaller centres, thus superseding local generation. The second stage provides for the interconnexion of regional transmission systems to take advantage of lower production costs at the larger power stations. At the same time, it is becoming more economic to locate power stations on coalfields rather than at load centres. The selection of the Callide coalfield as the site for the next major generating station in central Queensland and the consideration being given to the Collinsville coalfield in North Queensland are illustrative of this fact.

As part of the first stage, the following new generating stations were commissioned:—Howard (Wide Bay-Burnett Region) which has an installed capacity of 37,500 kW, Rockhampton (Capricornia Region) with 52,500 kW, and Townsville (Townsville Region) which contains 37,500 kW of plant. In the Cairns Region, the Tully Falls Hydro-electric Power Station has been completed with 72,000 kW installed capacity.

The Tully Falls Scheme (*see* para. 6, p. 258) was planned to supply power to the Cairns and to the Townsville Regional Electricity Board systems. Work is well advanced on the construction of a further hydro-electric scheme on the Barron River which should be completed by June, 1963, and will add 60,000 kW of hydro-electric generation capacity to these interconnected regional systems. The first stage of the scheme's development is estimated to cost £5,850,000, and initially, full use will be made of available storage capacity at Tinaroo Falls Dam, thus enabling construction of a £5,000,000 storage dam on Flaggy Creek to be postponed for a number of years.

At Mackay, where supply was first given in 1924, a Regional Electricity Board has now been constituted, and the generating capacity of the station under the control of this Regional Board is 12,500 kW of steam plant and 3,000 kW of diesel plant. To supplement this output a 66 kV transmission line from the Townsville Region is being erected. On completion of this line, the three North Queensland regions of Cairns, Townsville and Mackay will form an interconnected system with integrated generation facilities, based mainly on hydro-electric generation.

To serve the needs of the Capricornia region the construction of a power station capable of being developed to 150 MW capacity has commenced at a site on the Callide coalfields. Transmission to the main load centres will be at 132 kV.

(ii) *Western Queensland.* In western Queensland, where a number of small isolated generating stations supply power to some of the larger towns, the Commission evolved a plan to increase and modernize existing capacity. It involved installation of small internal combustion units ranging in size from 100 kW to 600 kW according to the load likely to be experienced, and conversion from direct to alternating current supply. The Government has assisted the scheme by subsidy—a feature of electrical development in Queensland. Assistance provided for regional electrical development comprises subsidies of up to one-third of capital cost on annual loan charges, with special subsidies of up to 50 per cent. for authorities in the larger towns outside the regions.

In addition to improving supplies to the larger western towns, a scheme was devised for electricity supplies for smaller towns in the western districts, where consumers range from 50 to 200. Subsidies of 65 and 60 per cent. are granted if the number of consumers supplied is less than 100 and 200, respectively. At 30th June, 1962, 24 townships in western Queensland were provided with electricity supplied by small oil-driven generating sets with automatic controls which can be run with a minimum of operating attendance. In addition, investigations of the possibility of supply have been carried out at a number of other small centres.

Coal-burning gas producers have been successfully commissioned for public electricity supply purposes at Longreach, Clermont, Blackall and Barcaldine, and further extension of their use in western Queensland is predicted, as lower tariffs and more efficient production of electricity is expected to follow their use.

In a limited number of cases, transmitted supply from larger generating centres has replaced local generation in small townships, and in southern border areas, transmitted supply is provided from New South Wales to certain townships and rural areas.

All electricity undertakings in western Queensland are operated by local authorities.

(iii) *South-eastern Queensland.* The two major generating authorities of south-eastern Queensland, the Brisbane City Council and the Southern Electric Authority, at 30th June, 1962, had a combined installed capacity of 517,500 kW. The Brisbane City Council's plant consisted of 75,000 kW at New Farm and 190,000 kW at Tennyson, including a 10,000 kW "packaged" generating plant. Current plans include the installation of a further 60,000 kW at Tennyson by 1964. The plant of the Southern Electric Authority consists of 92,500 kW at Bulimba "A", 150,000 kW at Bulimba "B" and a 10,000 kW "packaged" plant at Abermain near Ipswich. It is proposed to augment the Bulimba "B" station by 30,000 kW by 1965.

Negotiations are at present in hand for the constitution of a single authority to control all generation, main transmission and rural distribution in south-eastern Queensland and for another authority to be responsible for metropolitan distribution.

To cater for the power needs of this portion of the State after the completion of existing stations, work has commenced on a new power station at Swanbank, on the West Moreton coalfields, with an ultimate capacity of 360,000 kW.

Power from this station will also be transmitted to the Wide Bay-Burnett region at 132 kV, which will obviate the installation of additional plant within this region.

#### § 4. South Australia

1. *General.*—An account of the companies generating electric power in South Australia prior to the establishment of the Adelaide Electric Supply Co. Ltd., and describing the development of that company's activities, was given in Official Year Book No. 39. Also included in the account was some reference to the early measures of public control over electricity supply in South Australia and the extent to which they were applied, and also to the inquiries into the activities of the Adelaide Electric Supply Co. Ltd. in 1932 and 1935.

Following an inquiry instituted by the Government in 1943, relative to measures for increasing electricity supply to the metropolitan area and country districts, the *Electricity Act* 1943 was passed, which, *inter alia*, established the South Australian Electricity Commission.

2. *The Electricity Trust of South Australia.*—Early in 1946 the assets of the Adelaide Electric Supply Co. Ltd. were transferred to a newly formed public authority, the Electricity Trust of South Australia, which became responsible for unification and co-ordination of the major portion of the State's electricity supply and which took over the powers previously vested in the South Australian Electricity Commission. In addition to the powers specified in the *Adelaide Electric Supply Company's Acts* 1897–1931, the Trust may supply electricity direct to consumers within a district or municipality with the approval of the local authority, and by agreement with other organizations which generate or supply electricity, arrange to inter-connect the mains of the Trust with those of other organizations, and give or receive supplies of electricity in bulk.

3. *Capacity and Production.*—Three main categories of organizations generate electric power in South Australia, namely:—(a) governmental, which include the Electricity Trust; (b) local authorities, e.g. municipal and district councils, and the Renmark Irrigation Trust; and (c) other, including individuals and firms primarily engaged in generating power for sale, firms generating power primarily for their own use but supplying outside consumers, and firms generating power solely for their own use.

In 1961–62, total installed capacity in South Australia was 587,860 kW, and electricity generated totalled 2,126 million kWh.

Of the total installed capacity, the Electricity Trust of South Australia operated plant with a capacity of 551,000 kW. It is thus the most important authority supplying electricity in the State. There were approximately 321,000 ultimate consumers of electricity in the State, of whom 297,203 were supplied directly by the Trust and approximately 10,000 supplied indirectly by the Trust (i.e. through bulk supply). Its major steam stations were Osborne "A" (64,000 kW), Osborne "B" (180,000 kW), and Port Augusta Playford "A" (90,000 kW) and Playford "B" (180,000 kW), the balance of the capacity controlled consisting of house sets and regional stations at Port Lincoln and Mount Gambier, where the Trust operates steam power stations of 5,000 kW and 21,800 kW capacity respectively, the former burning fuel oil and the latter either wood waste or fuel oil.

No hydro-electric potential exists in South Australia. Steam generating units comprise 98 per cent. of installed capacity and the balance is internal combustion equipment. Until 1946, all fuel consumed in the thermal stations was obtained from sources outside the State, and at times power restrictions were necessary owing to the inadequacy of supplies.

4. **Leigh Creek and other New Capacity.**—With a view to reducing the dependence on external sources of fuel, steps have been taken to produce local coal and to install plant to use it. Fairly extensive deposits of low-grade sub-bituminous coal are obtainable at Leigh Creek, about 360 miles north of Adelaide. Under the *Electricity Trust of South Australia Act Amendment Act 1946*, the Trust was given authority to develop Leigh Creek coal for use in its own undertakings and also for sale to other consumers. Production from the Leigh Creek field commenced in 1944, and in the year ended 30th June, 1962, 1,231,023 tons of coal were produced, practically all of which was used by the electricity undertaking.

In order to cope with the rapidly increasing demand for power, the Electricity Trust is constructing a second power station at Port Augusta, known as Playford "B". This station will have a capacity of 240,000 kW, making the combined capacity at Port Augusta 330,000 kW. The first 60,000 kW turbo-alternator was commissioned in June, 1960, the second in March, 1961, and the third in April, 1962; the station is scheduled for completion about 1964. Leigh Creek coal will be used exclusively. The power station will be interconnected with the metropolitan area by two 275 kV transmission lines.

Consideration is now being given to the future establishment of some pumped-storage hydro plant, as being possibly the most economic way of handling the peak loads of the system.

## § 5. Western Australia

1. **General.**—Electrical undertakings in Perth and Fremantle formerly owned by the Perth City Council, the Western Australian Government Electricity Supply, the Fremantle Municipal Tramways and Electric Lighting Board, and other metropolitan, municipal and road board supply authorities have been taken over by the State Electricity Commission of Western Australia. For information on the early history of electricity supply in the metropolitan area, see *Official Year Book No. 39*, page 1189.

2. **The State Electricity Commission of Western Australia.**—In order to ensure an organized and co-ordinated future growth of electricity generation and distribution throughout the State, the Government passed an Act in 1945 to establish the State Electricity Commission, which, together with the *Electricity Act*, became law early in 1946. Under these Acts, the Commission was given power to secure the ultimate co-ordination of all State or other electrical undertakings in the State, to construct and operate power stations and transmission lines, and to purchase as a going concern and carry on the undertaking of any supply authority. No person or organization is permitted to construct or extend an electricity supply undertaking without consent from the Commission. Local authorities are empowered to operate and construct power stations and other works associated with the supply of electricity, provided that authority is first obtained from the Commission and that their proposals are not inconsistent with the Commission's plans.

3. **General Pattern of Electricity Supply.**—(i) **General.** The State Electricity Commission gives central power station supply to the metropolitan area and an area of approximately 25,000 square miles defined in the report which formed a basis for the *South West Power Scheme Act*. These areas include the more highly developed rural districts with a greater population density, which can more readily be connected to a central power station system.

It was announced recently that a similar scheme to be known as the Northern Areas State Power Scheme will be developed during approximately the next sixteen years to serve towns as far north as Northampton.

In the other areas of the State, towns are supplied by the local authority or by a concessionaire operating under an agreement with the local authority and the Commission. Power stations operated under these conditions are exclusively diesel of varying sizes, with the exception of Kalgoorlie which is separately mentioned below.

(ii) *Interconnected System.* At the request of the Government, the Electricity Advisory Committee, in 1945, submitted a report which recommended, among other things, a national power scheme for the south-west. The plan provided for acquisition of the existing Collie Power Station and installation of additional generating capacity, construction of a power station at Bunbury and inter-connexion of the south-west scheme with the metropolitan system. In 1946, the State Electricity Commission acquired the Collie Power Station, and since then it has acquired a number of electrical undertakings from municipal bodies and private organizations in the south-west area and is proceeding with arrangements for the purchase of others. In August, 1951, the first portion of the South-West Power Scheme was officially opened at Collie, and most of the south-west towns have now been connected by transmission line to the interconnected system.

Statistics relating to activities of the interconnected system are shown in the following table.

WESTERN AUSTRALIA: INTERCONNECTED SYSTEM

Particulars						1960-61	1961-62
Plant capacity	..	..	..	..	kW	288,500	288,500
Maximum load	..	..	..	..	kW	171,000	191,000
Units generated	..	..	..	..	Million kWh	803	866
Fuel used per unit (kWh) generated	..	..	..	..	lb.	1 55	1 54
Coal used	..	..	..	..	tons	398,519	521,978

(iii) *Kalgoorlie.* In Kalgoorlie, a re-organization of electricity supply is taking place. All large mines will generate power for their own needs, and the Power Corporation will cease operations during 1963. Kalgoorlie Town Council will supply Kalgoorlie and Boulder with 50 cycle A.C. from a new diesel station, and the present D.C. diesel stations operated by the local authorities will continue for some time at least.

4. *New Projects.*—Since its inception in 1946, the State Electricity Commission has made the provision of an adequate reserve of generating plant its primary object. With the commissioning of the first unit at South Fremantle Power Station in May, 1951, the lag caused by shortages during the war and early post-war years was overcome. The system then developed rapidly to keep pace with the expansion of industry and housing. Generating plant has been quadrupled in the past sixteen years. The three major power stations have been interconnected with the South West Power Station at Collie enabling the most economical units to be used as a base load station. Continuous development of the transmission and distribution system is being undertaken to keep pace with the growth in consumer demand, at present about 8 per cent. a year.

Work has commenced on two 60,000 kW turbo alternators, boilers and buildings for the first section of a new station at Muja near Collie, adjacent to a source of open-cut coal. The first unit is planned to be in service in the latter part of 1965.

## § 6. Tasmania

1. *General.*—A considerable part of the water catchment in Tasmania is at high level, with a substantial natural storage available, and this has made it possible to produce energy at lower cost than elsewhere in Australia, or in most other countries. Another factor contributing to the low costs is that rainfall is distributed fairly evenly throughout the year,

with comparatively small yearly variations. The cheap power has led to the establishment in Tasmania of several large electro-chemical and metallurgical works with high load factor, and as a consequence the system load factor is also very high (at present 66.8 per cent.).

For information on hydro-electric development in Tasmania prior to the establishment of the Hydro-Electric Commission in 1930, see Official Year Book No. 39, pages 1192-3.

**2. The Hydro-Electric Commission.**—(i) *Present System.* In 1929, the Government passed the *Hydro-Electric Commission Act*, under which was established the Hydro-Electric Commission and which vests in the Commission, with some minor exceptions, the right to use the waters of the State of Tasmania, and authorizes it to develop and reticulate electric power for all purposes. In 1930, this corporate body took over the State hydro-electric undertaking and the business of the Hydro-Electric Department.

The first project undertaken by the Commission was the Shannon Power Development which utilizes 258 feet of the difference in level between the Great Lake (Miena Dam) and Waddamana forebay.

The Tarraleah Power Development was commenced in 1933. In this scheme, the waters of the River Derwent are picked up near Butler's Gorge by a canal and conveyed 14 miles to the pipeline forebay 982 feet above the power station on the Nive River.

The Trevallyn Power Development, the first constructed by the Commission outside the Central Plateau region and commenced in 1949, was undertaken primarily to meet the requirements of the aluminium industry. The waters of the South Esk River are diverted through two miles of tunnel and pipeline to a power station on the Tamar River near Launceston.

The Tungatinah Scheme, on which construction started in 1948, draws water from three separate catchment areas located on the Central Plateau between the Great Lake (Shannon-Waddamana) and Lake St. Clair (Butler's Gorge-Tarraleah) catchments, and control of practically the whole run-off from the Central Plateau has now been effected.

The Wayatinah Power Development, started in 1952, comprises two power stations and headworks to utilize water which is, in the main, already regulated and which has been used several times. The volume of water available is much larger and the head smaller than in the case of other major stations.

For further details of these schemes see Official Year Book No. 48, pp. 243-4, and earlier issues.

The Catagunya Power Development utilizes the whole of the waters flowing through Tarraleah and Tungatinah Power Stations and successively through the Liapootah and Wayatinah Power Stations plus water from the Florentine River. Preliminary construction on this development began early in 1957. Four miles below Wayatinah, a diversion dam was constructed at Catagunya, and a power station with an installed capacity of 48,000 kW was completed at the end of June, 1962. The dam was designed and built as a pre-stressed concrete structure, 147 feet in height, and it is notable as being only the second of its type and the largest yet undertaken by this technique anywhere in the world.

The total installed capacity of the present system throughout Tasmania in June, 1962, was as follows.

Power station							Installed capacity of alternators
							kW
Shannon .. .. .	..	..	..	..	..	..	10,500
Waddamana " A " .. .. .	..	..	..	..	..	..	49,000
Waddamana " B " .. .. .	..	..	..	..	..	..	48,000
Tarraleah .. .. .	..	..	..	..	..	..	90,000
Butler's Gorge .. .. .	..	..	..	..	..	..	12,200
Trevallyn .. .. .	..	..	..	..	..	..	80,000
Tungatinah .. .. .	..	..	..	..	..	..	125,000
Lake Echo .. .. .	..	..	..	..	..	..	32,400
Liapootah .. .. .	..	..	..	..	..	..	83,700
Wayatinah .. .. .	..	..	..	..	..	..	38,250
Catagunya .. .. .	..	..	..	..	..	..	48,000
<b>Total</b> .. .. .	..	..	..	..	..	..	<b>617,050</b>
King Island (diesel plant) .. .. .	..	..	..	..	..	..	390

(ii) *New Capacity.* The installed capacity of the system now stands at 617,050 kW, and approved construction will bring this total to approximately 950,000 kW by 1968. Investigations are continuing into the very considerable resources as yet untouched, principally in the west and north-west of the State, and it is estimated that the potential which can be developed economically should ultimately harness 2,400,000 kW to the system.

The Hydro-Electric Commission is engaged on a construction programme which comprises the Great Lake Power Development and the Lower Derwent Power Development. In the first named, the water of the Great Lake, by its diversion in the direction of the most precipitous fall, will be used to much greater advantage than at present. Eventually reaching the South Esk River, it will be used again through the generators of the Trevallyn Power Station. In this development, the power will be generated by the fall of water through a vertical distance of 2,730 feet to an underground power station where generators of 300,000 kW capacity will be installed. The station will be known as Poatina Power Station. A further section of the scheme includes the provision of a dam at Arthur Lakes to increase greatly the storage of the system, and a pumping station and a conduit discharging into the Great Lake so that water from this catchment may be utilized through the Poatina Power Station.

In the Lower Derwent Power Development, a new three-stage development has been sanctioned for construction below Catagunya on the River Derwent. With dams and power stations named Repulse, Cluny and Meadowbanks, the completion of this project by 1968 will add a further 85,000 kW to the system, and it will also bring to an end the exploitation of the power potential of the River Derwent and its tributaries.

The Commission is conducting extensive surveys and investigation of other schemes with a view to further construction after the completion of the present programme.

3. *Power Usage by Secondary Industry.*—The abundant and comparatively cheap supplies of electricity and other natural resources have attracted to Tasmania a number of important secondary industries for which energy costs constitute a large proportion of the total cost of production. These include the Electrolytic Zinc Company of Australasia Ltd., the Aluminium Production Corporation, the Australian Newsprint Mills Ltd., the Associated Pulp and Paper Mills Ltd., the Australian Commonwealth Carbide Company Ltd., the Mount Lyell Mining and Railway Company Ltd., and the Goliath Portland Cement Company Ltd. A new industry which came into operation for the first time during 1962 is a subsidiary of the Broken Hill Pty. Co. Ltd. with the name of the Tasmanian Electro Metallurgical Co. Pty. Ltd., at Bell Bay, engaged in the manufacture of ferro-manganese. The continuous power demands of all these organizations when plant is in full operation aggregates 210,300 kW.

A new paper pulp mill is being constructed by Australian Paper Manufacturers Ltd. at Geeveston, south of Hobart, and this is scheduled to be in operation towards the end of 1962. The Associated Pulp and Paper Mills Ltd. is now constructing an entirely new particle board mill at Wesley Vale, near Devonport in northern Tasmania, and it is known that other industrial undertakings in the State are also contemplating expansions of their activities.

## § 7. Commonwealth Territories

1. *Internal Territories.*—(i) *General.* The electricity supply undertakings at Canberra in the Australian Capital Territory and at Darwin, Katherine, Tennant Creek and Alice Springs in the Northern Territory are operated by the Commonwealth Government.

(ii) *Australian Capital Territory.* The supply authority is the Canberra Electric Supply. Supply was first established at Canberra during 1915 and was met from local steam plant. Connexion to the New South Wales interconnected system was effected in 1929, and all requirements are now taken from this system. Locally owned plant consists of diesel alternators of 4,000 kW which are retained as a standby for essential supplies, and steam plant of 5,100 kW which is retained at present, but whose further use, in the light of present known requirements, is doubtful.

Total population served with electricity at 30th June, 1962, was 65,000 and the total number of ultimate consumers was 19,231.

During the year 1961–62, the bulk electricity purchased was 165,925,850 kWh and the maximum demand incurred was 45,720 kW.

(iii) *Northern Territory.* At Darwin, supply was established by the Town Council in October, 1934, but during April, 1937, responsibility for generation and supply was transferred to the Northern Territory Administration. The power station is now equipped

with diesel generating plant of 7,770 kW capacity, an additional generating set of 1,000 kW having been installed during 1962. At Alice Springs, the power station is equipped with diesel generating plant of 3,356 kW capacity following the installation of a 1,090 kW generating set during the year.

At Katherine, the power station is equipped with a small diesel generating plant of 470 kW capacity. The diesel station at Tennant Creek was closed down in 1957, supply for the township being purchased in bulk from Peko Mines N.L.

The total number of ultimate consumers served in the Territory at 30th June, 1962, was 5,357.

In 1956-57, the Department of Works selected a site on the water front of Darwin for a 15,000 kW steam-driven generating set. This steam station was completed during 1962 and is designed to supply Darwin and suburbs when the present diesel station has reached its maximum economical capacity. A 66 kV transmission system has been built.

2. *External Territories—Papua and New Guinea.*—Responsibility for the operation and establishment of the electrical undertakings in Papua and New Guinea is at present vested in the Administration of the Territory of Papua and New Guinea, whose headquarters are located at Port Moresby, but this responsibility will shortly be vested in an Electricity Commission. The total generating capacity of the diesel engine driven generating sets amounts to 14,040 kW and of the hydro operated sets to 5,930 kW. The generating capacity of the power plants at the main centres is—Port Moresby, diesel 2,223 kW, hydro, 5,500 kW; Rabaul, 3,000 kW; Lae, 2,640 kW; Madang, 1,610 kW; Samarai, 300 kW; Kavieng 194 kW; Wewak, 413 kW; Lorengau, 60 kW; Goroka, hydro, 400 kW; Aiyura, hydro, 30 kW; and 3,600 kW distributed among 115 outstations whose generating capacity is between 5 kW and 50 kW. The townships of Wau and Bulolo are supplied by power generated by the Bulolo Gold Dredging Co., which operates a hydro-electric plant of 5,500 kW. Power produced in this plant is used mainly to supply the plywood mill and gold dredges at Bulolo.

The total number of ultimate consumers served in the Territory was 7,931 at 30th June, 1962.

Hydro-electric potential in New Guinea has been estimated at 15,000,000 kW, but, because of the island's location, absence of large load centres and lack of industrialization, there has been very little development.

In 1950, the Commonwealth Government joined with the British Aluminium Co. Ltd. of London to locate and develop large capacity hydro-electric schemes in New Guinea. A new company was formed, known as New Guinea Resources Prospecting Co. Ltd., with a capital of £100,000. The Commonwealth Government held 51 per cent. of the shares and had a controlling interest on the board of five members, but later sold its interest to a company formed by Consolidated Zinc Pty. Ltd., and the British Aluminium Co. Ltd., both of London.

At Port Moresby, at a site two miles downstream from the Rouna Falls, a hydro-electric plant with an installed capacity of 5,500 kW is operating. Works are at present in hand to regulate the flow of the Laloki River to 180 cusecs, from a present minimum approximating 80 cusecs, by the erection of a dam on the Laloki River at a location known as Sirinumu, 9 miles upstream from the Rouna Falls. The design provides for a second stage in the dam height which will provide regulation to a minimum of 400 cusecs. Designs are at present being prepared for the construction of a second power station which will utilize the head available at the Rouna Falls and some 100 feet head in the rapids above the Falls. The plant proposed will be initially two units each of 6,000 kW, and provision will be made for the installation of a further three units, giving a total capacity of 30,000 kW. At Aiyura, a 30 kW hydro-electric station for the Agricultural Experimental Station has been operating since August, 1956.

At Goroka, the plant installed consists of two 100 kW and one 200 kW units. This is the ultimate development at this site. Investigations are being made on other proposals within the area.

Investigations are advanced for a proposal to develop the potential available in the Upper Ramu River for a power supply to Lae, Goroka, Kainantu and Madang. It is proposed that the initial installation will consist of two 5,000 kW sets with provision for the installation of a further three 5,000 kW sets. Investigations are proceeding for a proposal to develop the potential of the Towanokoko and Pondo Rivers in the Bainings area of the Gazelle Peninsula to provide a supply to Rabaul and other settlements in the peninsula.

Stream-gauging and other preliminary investigations for hydro-electric schemes have been carried out at Lae, Rabaul, Madang, Wewak and Highland Stations.

There are possibilities for major hydro-electric development in the following localities:—Rouna Falls (near Port Moresby), Upper Snake and Busu-Erap-Leron (near Lae), Upper Ramu (near Markham-Ramu divide—80 miles from Lae) and Hathor Gorge (on Purari River), with an estimated average power of 100,000 kW, 150,000 kW, 2 million kW, 250,000 kW, and 3 million kW respectively. These have estimated run-offs of 1,400, 6,000, 12,000, 1,000 and 75,000 cusecs respectively.

In an area of 150,000 square miles of the eastern New Guinea mainland, the power potential has been estimated at 150 kW per square mile, which compares favourably with potentials of 170 kW per square mile for Switzerland and 95 kW per square mile for Norway.

### STATISTICAL SUMMARY

The following table shows statistics for each State separately and for the six States combined for the year 1960-61.

Statistics of the electricity supply industry for the years 1956-57 to 1960-61 are given in Chapter VI. Manufacturing Industry.

#### CENTRAL ELECTRIC STATIONS, 1960-61

Year		N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Australia
<b>Generating stations—</b>

Electricity generated(e)								
million kWh		10,000	6,556	2,693	1,898	1,036	2,631	24,814
Ultimate consumers(f)	No.	1,221,673	956,485	431,225	321,000	165,634	123,104	3,219,121

(a) Not available for publication; included in the total for Australia. (b) Average employment in generating station, over whole year, including working proprietors. (c) Value, at generating station, of electricity produced plus certain earnings. (d) Value added in the process of generation. (e) Total generated including that generated by factories for their own use. (f) Approximate figures supplied by the electricity authority in each State. An "ultimate consumer" is a person, business, undertaking, etc., that has contracted to receive electric power from a public or private organization supplying this service. The number of ultimate consumers is not identical with the number of persons served with electricity because one ultimate consumer may represent three or four persons, e.g. in a household.

## CHAPTER VIII

### WATER CONSERVATION AND IRRIGATION

#### RESOURCES, UTILIZATION AND NATIONAL AND INTERSTATE ASPECTS

##### § 1. Introduction

Official Year Book No. 37, pages 1096-1141, contained a special article on the conservation and use of water in Australia, and for details of general, descriptive and historical matter reference should be made to this article.

For further details on geographical and climatic features determining the Australian water pattern, reference should be made to Chapter II. Physiography; on water supply and sewerage in metropolitan areas, cities and towns to Chapter XIX. Local Government; and on the generation of hydro-electric power to Chapter VII. Electric Power Generation and Distribution, of this issue.

A series of maps showing the location of major dams and reservoirs and the various irrigation schemes operating in each of the States may be found on pages 259-65 of Official Year Book No. 46, and a map showing the extent of known artesian basins throughout Australia is shown on page 273 of issue No. 48.

##### § 2. Water Resources and their Utilization

**1. Surface Supplies.**—Though river gaugings have been recorded over considerable periods in some parts of Australia, records elsewhere are intermittent, of short duration, or non-existent. At present, therefore, it is impossible to estimate, with any degree of reliability, the total average annual flow of Australian streams, but it would probably amount to only a small figure in comparison with the flow of rivers in other continents, some examples of which, expressed as mean annual discharges in millions of acre feet, are: Nile, 72; Danube, 228; Amazon, 1,780; Volga, 148; Mississippi, 474; and the ten main rivers of the United States of America in the aggregate, 900.

**2. Major Dams and Reservoirs.**—The table below lists existing major dams and reservoirs, together with those under construction and those projected, at June, 1962. The list is confined to dams and reservoirs with a capacity of 100,000 acre feet or more. There are, in addition, many others of smaller capacity in Australia.

#### MAJOR DAMS AND RESERVOIRS IN AUSTRALIA

Name	Location	Capacity (acre feet)	Height of wall (feet)	Remarks
EXISTING DAMS AND RESERVOIRS				
Eucumbene ..	Eucumbene River, New South Wales	2,500,000	381	Part of Snowy Mountains Hydro-electric Scheme
Eildon .. ..	Upper Goulburn River, Victoria	2,750,000	260	Storage for irrigation and for the generation of electricity
Hume .. ..	Murray River near Albury	2,500,000	142	Part of Murray River Scheme—storage for domestic, stock and irrigation purposes. Hydro-electric power also developed
Menindee Storage	Darling River, near Menindee, New South Wales	2,000,000	..	Part of Darling River Water Conservation Scheme for irrigation and possible hydro-electric power generation
Warragamba ..	Warragamba River, New South Wales	1,670,000	379	For Sydney water supply. Also provides for generation of hydro-electricity and flood mitigation

(a) Useful storage only.

MAJOR DAMS AND RESERVOIRS IN AUSTRALIA—*continued*

Name	Location	Capacity (acre feet)	Height of wall (feet)	Remarks
<i>EXISTING DAMS AND RESERVOIRS—continued</i>				
Miena .. ..	Great Lake, Tas- mania	(a)984,500	40	Regulates water to Waddamana hydro-electric power station
Burrinjuck ..	Murrumbidgee River, New South Wales	837,000	264	Storage for irrigation and pro- duction of hydro-electric power
Somerset .. ..	Stanley River, Queensland	735,000	173	Brisbane-Ipswich water supply, flood mitigation and small hydro-electric power station
Lake Victoria ..	Murray River, near South Australian border, in New South Wales	551,700	..	Natural storage for irrigation in South Australia. Storage im- proved by construction of embankments and control regulators
Lake Echo .. ..	Lake Echo, Tas- mania	(a)412,200	60	Storage for Lake Echo and Tun- gatinah hydro-electric power stations
Keepit .. ..	Namoi River, near Gunnedah, New South Wales	345,000	177	For rural water supplies and hydro-electricity generation
Waranga .. ..	Goulburn River, Victoria	333,400	..	Irrigation storage
Tinaroo Falls ..	Barron River, north Queensland	330,000	133	For irrigation purposes in the Mareeba-Dimbulah area
Glenbawn .. ..	Hunter River, near Scone, New South Wales	293,000	251	Part of Hunter Valley conserva- tion work, for irrigation and flood mitigation
Rocklands .. ..	Glenelg River, Vic- toria	272,000	..	Part of Wimmera-Mallee domes- tic and stock water supply system
Clark .. ..	Derwent River, Tas- mania	(a)253,400	200	Serves Tarraleah hydro-electric power station
Wyangala .. ..	Lachlan River, New South Wales	(b)245,000	200	Storage for domestic, stock and irrigation purposes and for generation of hydro-electric power. (See also under Dams and reservoirs under con- struction)
Tantangara ..	Murrumbidgee River, New South Wales	(a)193,000	148	Part of Snowy Mountains Hydro- electric Scheme
Avon .. ..	Avon River, New South Wales	173,800	232	Part of Sydney water supply
Glenmaggie ..	Gippsland, Victoria	154,300	100	Storage for irrigation
Lake St. Clair ..	Central Highlands, Tasmania	(a)154,200	..	Improved natural storage for Tarraleah hydro-electric power station
Wellington ..	Collier River, Western Australia	150,100	112	For supply of water to irrigation districts and to agricultural areas and country towns
Serpentine ..	Serpentine River, Western Australia	144,000	171	For Perth water supply
Lake Brewster ..	Lachlan River, near Hillston, New South Wales	123,900	..	Storage of rural water supplies for the lower Lachlan
Cairn Curran ..	Loddon River, Vic- toria	120,600	..	Storage for irrigation
Upper Yarra ..	Yarra River, Victoria	110,000	270	For Melbourne water supply

## DAMS AND RESERVOIRS UNDER CONSTRUCTION

Burrendong ..	Macquarie River, near Wellington, New South Wales	1,361,000	250	For rural water supplies, flood mitigation and possible hydro- electric power generation
Wyangala ..	Lachlan River, New South Wales	1,000,000	270	Strengthening and enlarging of existing dam for increased water supply and hydro- electric power generation. (See also under Existing dams and reservoirs)
Eppalock ..	Campaspe River, near Heathcote, Victoria	250,000	150	To supplement supply to Bendigo and for irrigation
Koombooloomba ..	Tully River, north Queensland	146,000	123	For hydro-electric and possibly irrigation purposes

(a) Useful storage only.

(b) Temporary reduced level.

## MAJOR DAMS AND RESERVOIRS IN AUSTRALIA—continued

Name	Location	Capacity (acre feet)	Height of wall (feet)	Remarks
DAMS AND RESERVOIRS PROJECTED				
Burdekin Falls ..	Burdekin River, North Queensland	6,584,000	150	For generation of hydro-electric power, irrigation and flood mitigation
Chowilla ..	Murray River, in South Australia, near Victorian border	4,850,000	63	Regulation of the lower Murray River
Ord River ..	Near Wyndham, Western Australia	3,500,900	200	For irrigation, generation of hydro-electric power and flood mitigation. (Additional 6,000,000 acre-feet flood control proposed)
Blowering ..	Tumut River, New South Wales	846,000	275	For regulation of discharges from stations of Snowy Mountains Hydro-electric Scheme, primarily for irrigation but also for power generation
Jindabyne ..	Snowy River, New South Wales	560,000	210	Part of Snowy Mountains Hydro-electric Scheme
Warkworth ..	Wollombi Brook, Hunter Valley, New South Wales	406,000	130	Flood mitigation and irrigation dam for the Hunter Valley
Arthur Lakes ..	Source of Lake River near Great Lake, Tasmania	(a)339,000	50	Part of Great Lake hydro-electric power development
Tumut 4 ..	Tumut River, New South Wales	138,000	300	Part of Snowy Mountains Hydro-electric Scheme
Tumut 3 ..	Tumut River, New South Wales	120,000	240	Part of Snowy Mountains Hydro-electric Scheme

(a) Useful storage only.

3. Irrigation.—(i) *History*. For some brief remarks on the history of irrigation in Australia see issues of the Official Year Book prior to No. 39. Trends in irrigation practice in more recent years were described in Official Year Book No. 37, page 1099.

(ii) *Extent and Nature of Irrigated Culture*. The following table shows the area of land irrigated in each State during the seasons 1957–58 to 1961–62, and the nature of irrigated culture in each State in 1961–62.

AREA OF LAND IRRIGATED  
(Acres)

Season and crop	N.S.W. (a)(b)	Vic. (c)	Q'land	S. Aust.	W. Aust.	Tas.	N.T. (d)	A.C.T.	Aust. (e)
1957–58 ..	695,365	1,001,800	160,345	80,853	41,319	15,321	127	1,396	1,996,526
1958–59 ..	641,361	965,766	154,633	85,081	44,102	13,431	274	1,224	1,905,872
1959–60 ..	889,441	1,052,782	152,136	100,899	45,889	18,108	365	869	2,260,489

(a) Source: Water Conservation and Irrigation Commission. (b) Includes total area irrigated by Licensed Diversions (191,782 acres), but details for individual crops, etc., are not available. (c) Source: State Rivers and Water Supply Commission. (d) Incomplete, excludes area of rice irrigated. (e) See footnote (b) to New South Wales. (f) Included in Other crops. (g) Not available for publication; excluded from totals. (h) Incomplete, see footnotes to individual States. (i) Includes tobacco, 13,671 acres.

About half of Australia's irrigated acreage is in Victoria, and about two-thirds is situated along the Murray and its tributaries (including the Murrumbidgee) in the three States of New South Wales, Victoria and South Australia. In those areas served by the Murray and its tributaries, irrigation water is used extensively for vines, orchards, pastures, fodder, and for domestic and stock purposes. Approximately forty per cent. of Queensland's irrigated acreage is devoted to sugar cane. Western Australia's small irrigated acreage is confined to areas in the south-west where vegetables, orchards, fodder, and pastures are served. Large scale irrigation schemes have not been developed in Tasmania or the Northern Territory, although investigations are at present being carried out in the Northern Territory to determine the availability of irrigation water for agriculture.

(iii) *Research.* Comprehensive programmes of research and investigation are being pursued by State water and agricultural authorities and the Commonwealth Scientific and Industrial Research Organization, often in collaboration. Special attention is being given to the following:—high water tables due to the application of water; surface accumulation of salt and other soil changes associated with irrigation; methods of applying water efficiently; soil treatments to improve the physical condition of irrigated heavy clay soils; the utilization of irrigated pastures by stock; growth problems affecting plants and trees; the prevention of evaporation from water storages; and the potability of saline waters for stock.

Irrigation is studied by the Commonwealth Scientific and Industrial Research Organization at a number of its research stations and laboratories, the principal one being the Irrigation Research Laboratory at Griffith (New South Wales), where investigations are concerned with limiting the degradation of land by irrigation, improving the quality and range of irrigated crops, and assessing the amount of water required by irrigated crops and the most economical means of applying it. The crops being studied include citrus, cotton, oil poppy, wine grapes, and lucerne. The Organization's Division of Plant Industry studies irrigated pastures at Deniliquin (New South Wales) and Canberra (Australian Capital Territory), and tobacco at Mareeba (Queensland). At Merbein (Victoria), the Horticultural Research Section is working on problems of the dried-fruit industry. The Division of Land Research and Regional Survey conducts research on rice at the Coastal Plains Research Station, Darwin (Northern Territory), and on a number of irrigated crops, including rice, safflower, linseed, mustard and cotton at the Kimberley Research Station (Western Australia). The Division has also carried out a number of hydrological investigations in connexion with the utilization of underground water for irrigation. The Division of Soils is studying methods of reducing seepage from earthen dams, and takes part in the examination of the physical properties of sediments beneath proposed dam sites. The Division is also looking at underground water movement and the water balance in the south-east of South Australia, and at the drainage and soil moisture regime of the irrigated swamps of the lower Murray River. The Division of Physical Chemistry is investigating methods of minimizing evaporation losses from water storages by the use of monomolecular layers.

The Irrigation Research and Extension Committee plays an important part in the agricultural activity of the Murrumbidgee Irrigation Areas. It is representative of the New South Wales Department of Agriculture, the Commonwealth Scientific and Industrial Research Organization, the Rural Bank of New South Wales, the Soil Conservation Service of New South Wales and certain farmers' organizations (including extension groups). Finance is provided by these authorities on an agreed basis. The objectives are:—to enable the agricultural extension services to the farmers in the defined sub-region to be continued and developed; to provide a system for advising on local agricultural policy and organization; to provide means for farmer opinion to have due weight in the consideration of

regional agricultural administration and policy; to achieve a unified approach to sub-regional extension in all branches of agriculture; to advise on the research needs of the sub-region and the co-ordination of the agricultural research of the various rural institutions working therein; to achieve close liaison between research and extension; and to conduct research in extension methods.

**4. Preservation of Catchments.**—Since water conservation commences on the catchments, it is becoming increasingly recognized that anything which interferes with catchment efficiency affects the quantity of water available for all purposes. Active steps are being taken to counteract soil erosion, to conserve soil generally, and to minimize the effects of floods, overstocking, bush fires, and the destruction of vegetative cover. All States and the Commonwealth have initiated forestry policies which provide for reafforestation and the preservation of catchments. In recent years, efforts to counteract soil erosion have been intensified, and there is some evidence of a more unified approach to catchment, water, forestry, and land use factors regarded as parts of a single problem.

**5. Sub-surface Supplies.**—(i) *General.* Much of Australia's underground water is obtained from artesian and sub-artesian basins and is used for stock purposes. These supplies are indispensable in most inland areas. The quality of the water ranges from usable to very saline. In inland areas, a considerable amount of water has been tapped that is unusable because of its high salt content. Because of this, development of an economic desalting process would provide the interior with additional large quantities of usable water.

Considerable use is also made of sub-surface water, other than pressure water, from local storages, particularly in the well-settled areas. The water is used mainly for domestic and stock purposes. Compared with other countries with similar rainfall and climate, underground water is not used extensively for town and individual industrial supplies, but its use for these purposes is increasing.

The Underground Water Conference of Australia was established as a result of recommendations made by the Australian Academy of Science to the Commonwealth Government in 1958. The Conference, which consists of representatives of Commonwealth and State departments interested in underground water, held its first formal meeting in Canberra in 1961, and the second meeting in Adelaide in 1962. Several committees have been established to carry out the work of the Conference. These include an Education Committee, a Great Artesian Basin Committee and State Committees on Underground Water Resources.

The various States and Territories maintain Geological Surveys and Water Commissions which are continually extending the knowledge of their own States. These authorities have been assisted more recently by various scientific and industrial foundations. In New South Wales, for example, the Hunter Valley Research Foundation is carrying out scientific investigations in the catchment area of the Hunter River, and this includes an integrated study of water, soils and climate.

In addition, the University of New South Wales recently formed the Water Research Foundation which has among its objectives research into underground water. To date, research has been devoted mainly to run-off studies, to the design of large earth farm dams and to sponsoring post-graduate hydrology courses.

As a result, a general picture exists of Australia's available and potential underground water resources. Much remains, however, to be done in the mapping and assessment of individual artesian and sub-artesian basins and in the investigation of their constituent aquifers. Detailed investigations also remain to be carried out of shallower underground water in alluvial deposits, coastal sands and mantles of weathered and jointed rock.

Surveys of this nature are of great importance because of the fundamental need for underground sources of water in the settlement of large areas of Australia.

(ii) *Artesian and Sub-artesian Supplies.* Pressure water (either artesian or sub-artesian), variable in quantity and quality, is obtainable in many parts of Australia, the various artesian basins extending over about half the continent. A map of Australia showing the extent of the known artesian basins appears on page 273 of Year Book No. 48.

The Great Artesian Basin, the most extensive in the world, underlies an area of approximately 657,000 square miles, comprising about 430,000 in Queensland, 107,000 in South Australia (exclusive of about 13,000 square miles of subsidiary basins), 80,000 in New South Wales and 40,000 in the Northern Territory. The following are the principal defined water-bearing basins in Australia.

## PRINCIPAL WATER-BEARING BASINS IN AUSTRALIA

Name	State	Geological age of chief aquifers	Approximate area	Depth to pressure water
			Square miles	Feet
Great Artesian ..	Queensland, New South Wales, South Australia and Northern Territory	Mesozoic .. ..	657,000	Up to 7,000
Canning ..	Western Australia	Mesozoic-Palaeozoic	175,000	100 to 1,800
Murray ..	Victoria, New South Wales and South Australia	Miocene-Eocene ..	107,000	100 to 1,300
Eucla .. ..	Western Australia, South Australia	Pliocene-Miocene ..	68,000	300 to 2,000
Barkly-Georgina	Northern Territory, Queensland	Cretaceous, Ordovician, Cambrian and Upper Proterozoic(?)	57,000	150 to 1,000
Carnarvon ..	Western Australia	Cretaceous, Permian ..	50,000	200 to 4,000
Perth .. ..	Western Australia	Tertiary, Silurian-Ordovician, Mesozoic	23,000	200 to 2,500
Western District (Otway)	Victoria ..	Pleistocene-Upper Cretaceous	6,500	100 to 4,500
Pirie-Torrens ..	South Australia ..	Recent, Pleistocene ..	4,000	Up to 600
East Gippsland ..	Victoria ..	Pleistocene-Eocene ..	2,500	200 to 3,500
Adelaide ..	South Australia ..	Recent, Oligocene ..	1,100	200 to 600
Basins of Ord-Victoria region	Northern Territory, Western Australia	Mainly Cambrian and Permian	Unknown	Unknown

More than 3,000 artesian bores have been constructed within the Great Artesian Basin, while the daily free discharge from all bores continuing to flow in Australia has been stated to exceed 350 million gallons, of which the loss by evaporation and seepage has been estimated at more than 90 per cent. Sub-artesian bores and wells throughout Australia number more than 200,000.

Artesian water generally is good stock water, but most is unsuitable for plant life, while in certain areas sub-artesian waters are suitable for all uses including irrigation. In the Eucla Basin and parts of the Murray and Pirie-Torrens Basins, the water is of poor quality, being barely suitable for stock.

In common with other countries possessing artesian supplies, Australia has been faced with the problem of flow diminution. It was recognized early that flows were diminishing as more bores were drilled, but it is now considered that while many of the bores will ultimately cease to flow, others will assume a perpetually steady rate of flow, corresponding with the average intake of water from rainfall absorbed by permeable outcrops, mainly sandstone and limestone. Diminution in flows from artesian bores has emphasized the need to eliminate wastage as much as possible, and investigations have been made regarding wasteful methods of distribution of artesian water by open channels or bore drains and the careless use of water. (For greater detail on this subject see Official Year Book No. 37, pp. 1103-4.)

(iii) *Shallow Groundwater.* Shallow groundwater supplies are used in various parts of Australia for industry, irrigation, stock and domestic purposes. Two of the most important of these supplies are in New South Wales. The Hunter District Water Board pumps 15 million gallons a day for general use from the Tomago coastal sands near Newcastle, and at Botany, Sydney, private industry pumps 8-10 million gallons a day for its own use from similar sands. Exploration of the coastal sands north of the Tomago Sands has revealed a further potential production of 25 million gallons a day.

Over the past five years there has been a marked increase, particularly in Queensland, New South Wales and Victoria, in investigation into the underground water resources of river and coastal alluvium for irrigation and town water supplies.

### § 3. National and Interstate Aspects

1. *General.*—As the Commonwealth Constitution makes special reference to water rights, both the Commonwealth and the State Governments have an interest in the control and conservation of water. The main responsibility for control of water resources rests with the individual State governments, but as political boundaries sometimes intersect river valleys and catchments, co-operation between governments has been necessary to develop resources in certain cases. Specific examples of Commonwealth-State and interstate co-operation and approach are given in the following sections.

On page 257 of Official Year Book No. 47, information is given on the Rural Reconstruction Commission's Report of 1945, which emphasized national aspects of water conservation and use, and on the Irrigation Production Advisory Committee, whose functions are to prepare for consideration conclusions from investigations as to possible agricultural industries on irrigated lands, and to undertake long-term co-ordination of land utilization in irrigable areas served by the Murray River and its tributaries.

2. *Australian Water Resources Council.*—This Council was established late in 1962 to provide a means of securing the highest level of basic information on Australian water resources and of making it readily available. The major problem to be faced by the Council is that Australia does not have a reliable estimate of how much water is available now, and how much will be available in the future. The Council will therefore aim at providing a comprehensive assessment of Australia's water resources, and extending measurements and research so that future planning can be carried out on a sound and scientific basis.

The first meeting of the Council is expected to be held early in 1963. The Council will comprise the Minister for National Development as Chairman, the Minister for Territories, and the Minister in charge of water supplies from each State. Provision has been made for Ministers responsible for closely related activities to be co-opted when problems of particular concern to them are under discussion. The Council will be assisted by a Standing Committee of Commonwealth and State officers.

3. *Murray River Scheme.*—(i) *General.* The Murray River and its tributaries form the largest river system in Australia. The catchment is approximately 414,000 square miles, or one-seventh of the area of the Australian continent, comprising five-sixths of New South Wales, over one-half of Victoria, one-sixth of Queensland and one-fortieth of South Australia. The Murray proper is 1,600 miles long. Its main tributaries are the Darling (1,700 miles), the Murrumbidgee (980 miles), and the Goulburn (350 miles). The average annual flow of each of the chief contributory streams is as follows:—Upper Murray, including the Mitta Mitta and Kiewa Rivers, 3,623,000 acre feet; Darling River, 2,896,000 acre feet; Goulburn River (including Broken River), 2,570,000 acre feet; Murrumbidgee River, 2,054,000 acre feet; and Ovens River, 1,222,000 acre feet. Irrigated production in the River Murray Basin is mainly grapes for wine, dried fruits, fresh fruits, rice, vegetables, dairy produce, wool, and fat lambs.

(ii) *River Murray Waters Agreement.* For a brief summary of the historical events leading up to the River Murray Agreement (1915) by the Governments of the Commonwealth, New South Wales, Victoria, and South Australia, see issues of the Year Book prior to No. 39. Under the Agreement, construction works are carried out by the States (who are also responsible for maintenance) subject to the approval and direction of the Commission. The Agreement provides that the minimum quantity of water to be allowed to pass for supply to South Australia in each year shall be sufficient to fill Lake Victoria storage once, and with the aid of water returned from Lake Victoria, to maintain certain specified flows in the lower river varying from 47,000 acre feet a month in the winter months to 134,000 acre feet a month in the four summer months of maximum demand—the total amounting to 1,254,000 acre feet over twelve months. These flows are to meet domestic and stock requirements in South Australia, losses of water in lockages and evaporation losses other than in the lakes at the Murray mouth, together with 603,000 acre feet per annum for diversion from the Murray in South Australia. The flow at Albury is shared equally by New South Wales and Victoria, and each of these States has full control of its tributaries below Albury, subject in each case to the fulfilment of the South Australian allocation. For a brief outline of the operation of the Agreement prior to 1949, see Official Year Book No. 40, page 1065, and earlier issues.

At a conference of Ministers held in 1949 to consider the diversion of the Snowy River it was decided that, by diversion of streams in the Snowy Mountains area, an average of approximately 440,000 acre feet per annum would be added to the Murray River (*see* para. 5, Snowy Mountains Hydro-electric Scheme, p. 279) and that increased storage should be provided in order to give additional regulation of the Murray River itself as well as to provide for regulation of the diverted waters. Hydro-electric potentialities would also affect the size of the storage.

The River Murray Commission investigated the position and subsequently recommended to the contracting Governments that the River Murray Waters Agreement be amended to provide for enlargement of the Hume Reservoir by 500,000 acre feet to 2,500,000 acre feet. A conference of Ministers in 1954 agreed to the enlargement, and it was also agreed that the Commission should be given power to construct regulators and to carry out such other work on the Murray River between Tocumwal and Echuca as it considered necessary to reduce the losses from the regulated flow in that stretch of the river. The amended Agreement was ratified in the Parliaments of the Commonwealth and the three States and was proclaimed on 7th April, 1955. In view of the proposed diversions by the Snowy Mountains Authority to and from the Murray River, and for other reasons, amendments to those sections of the River Murray Waters Agreement dealing with the distribution of the waters of the Murray were considered desirable. Following ministerial conferences, amendments were ratified by the four Parliaments concerned, and came into force on 6th November, 1958.

The estimated quantity (in acre feet) of water diverted during 1961–62 from the Murray and its tributaries for irrigation and other purposes under the River Murray Agreement was as follows:—New South Wales, 3,170,000; Victoria, 2,163,000; South Australia, 299,000; a total of 5,632,000 acre feet.

(iii) *River Murray Works.* One of the major works of the Murray River Scheme is the Hume Reservoir, situated just below the junction of the Murray and Mitta Mitta Rivers, 10 miles above Albury, forming a lake of 56,000 acres. The design comprises a mass concrete spillway and outlet works extending for 1,000 feet, and an earthen embankment 142 feet high extending for 4,000 feet across the river flats, the length of the total structure being approximately one mile. Work on the enlargement of the reservoir to its approved capacity was completed in August, 1961.

The Yarrawonga Diversion Weir, which was completed in 1939, raised the river level so that water could be diverted by gravitation into main channels constructed on either side of the river. Between the Yarrawonga Weir and the Murray mouth, thirteen weirs and locks have been built. Two flood diversion weirs have been constructed on the Murrumbidgee—one between Hay and the Lachlan junction and the other below the Lachlan junction.

The Mulwala Canal, served by the Yarrawonga Weir, has an off-take capacity of 2,500 cubic feet a second, to serve 1,500,000 acres of land in New South Wales. The Yarrawonga Channel, on the Victorian side, has an off-take capacity of 1,250 cubic feet a second, to serve 270,000 acres. Only a portion of each area will be irrigated.

Adjoining the river in New South Wales, and 35 miles from the Murray-Darling junction, Lake Victoria storage, with a surface area of 27,670 acres, was completed in 1928. The water released from Lake Victoria is used by the South Australian settlements. The inlet channel to Lake Victoria was enlarged in 1957 to permit greater diversion of periodical flood flows of short duration.

Five barrages across channels near the Murray River mouth connecting Lake Alexandrina with the sea were completed in 1940 to prevent ingress of salt water to Lakes Alexandrina and Albert and to the lower river, thereby increasing the productivity of adjacent lands. The structures maintain a sufficiently high level for 50 miles up river to permit watering by gravitation of a considerable area of reclaimed river flats. The total distance across the barrages and intervening islands is 15 miles.

In addition to the works carried out under the auspices of the Commission, the separate States have constructed thousands of miles of distribution channels and have provided a number of storages on the tributaries, thereby contributing very materially to the large amount of irrigation development in the Murray Basin. The main storages are: New South Wales—Menindee Lakes Storage (Darling), Burrinjuck (Murrumbidgee), Keepit (Namoi) and Wyangala (Lachlan); Victoria—Eildon (Goulburn) and Waranga (Goulburn). Details of these and other State works on Murray tributaries will be found in the sections dealing with State systems. No storages exist on the Murray in South Australia at present, but the construction of a large storage at Chowilla on the river about 37 miles above Renmark was recently approved by the four contracting governments, who will share the estimated cost of £14 million.

4. **New South Wales-Queensland Border Rivers Agreement.**—The New South Wales-Queensland Border Rivers Agreement came into effect on 1st July, 1947. The Agreement provides for the construction of certain works on those sections of the Severn, Dumaresq, Macintyre and Barwon Rivers which constitute part of the boundary between New South Wales and Queensland for the furtherance of water conservation, water supply and irrigation in those States.

The works to be constructed comprise a dam on the Dumaresq River at a site to be selected by the Commission to give a storage basin with a capacity as large as is reasonably practicable and not less than six nor more than twelve weirs as may be found necessary to meet the requirements of irrigation along the rivers. Provision is also made for the construction of not more than four regulators in the effluents from the barrier rivers and for the taking over of the existing weir on the Macintyre River at Goondiwindi and the existing weir on the Barwon River at Mungindi. The cost of these works and of administration are to be borne by the States in equal shares. The agreement further provides that the water discharge from the Dumaresq storage, whether by regulated or unregulated flow, shall be available to the two States in equal shares.

The Water Conservation and Irrigation Commission of New South Wales, which is the constructing authority for the dam, carried out investigations of several dam sites on the Dumaresq River near Mingoola Station homestead, which is approximately 39 miles from Tenterfield. Foundation drilling supplemented by a geophysical survey carried out by the Commonwealth Bureau of Mineral Resources disclosed unfavourable foundation conditions at all sites, the depth of alluvium overlying sound rock exceeding 150 feet in all cases. In an endeavour to obtain more economical storages, investigations were extended to tributary streams, and superficially suitable sites have been located on Pike Creek and the Mole River. A geophysical survey was made at each of these sites and preliminary comparative estimates prepared to determine the relative economy of providing one large storage at Mingoola or two smaller storages on the tributaries. Following exploratory drilling of the tributary sites, a report dealing with alternative storage proposals and possible amendments to the existing Agreement was submitted to the participating States. This report is at present under consideration.

The Irrigation and Water Supply Commission of Queensland is the constructing authority for the new weirs and regulators. Bonshaw and Cunningham Weirs on the Dumaresq River were completed in 1953 and 1954 respectively.

A weir and regulator have been constructed on the Barwon River at the offtake of the Boomi River. A low level weir to establish a pumping pool at Glenarbon on the Dumaresq River was also constructed. The existing Goondiwindi and Mungindi Weirs are being maintained, operated and controlled by the Queensland Irrigation and Water Supply Commission. Until a dam has been constructed, it is unlikely that any weirs, other than those referred to above, will be required.

The catchments for the border streams (2,000 square miles) extend to the granite areas in the vicinity of Tenterfield (New South Wales) and Stanthorpe (Queensland), and elevation rises to 3,000 feet. Average rainfall is 30 inches. The catchments and the areas suitable for irrigation are approximately equal in each State. Climatic conditions are such that it is necessary to supplement rainfall from April to October by irrigation to stabilize and increase production. The capacity of the area to grow lucerne and tobacco under irrigation has already been demonstrated. Other possible development of the area includes irrigation of cotton, root crops, cereals, and citrus fruit, and expansion of the fat stock industry.

5. **Snowy Mountains Hydro-electric Scheme.\***—Following a comprehensive investigation into both the water and power potential of the Snowy River waters by a Technical Committee representative of the Commonwealth and the States of New South Wales and Victoria in 1947 and 1948, and the submission by the committee of reports in 1948 and 1949, the Commonwealth Parliament in July, 1949, passed the *Snowy Mountains Hydro-electric Power Act* setting up an Authority to implement the proposals agreed upon.

The basis of the proposals is to impound the Snowy River waters at high elevations and, by diverting them into tunnels passing under the Alps, to use their potential power for the generation of electricity and then to discharge them into the Murray and Murrumbidgee River systems for use in the irrigation areas.

\* See also Chapter VII. Electric Power Generation and Distribution, p. 248. For more detailed information see special article by the Commissioner, Snowy Mountains Hydro-electric Authority (Sir William Hudson) which appeared in Chapter XXIX. Miscellaneous, of Official Year Book No. 42.

The Scheme involves two main diversions, that of the Eucumbene, a tributary of the Snowy, to the Upper Tumut River and that of the main stream of the Snowy River at Island Bend and Jindabyne to the Swampy Plain River. In addition, works required to make use of the waters of the Upper Murrumbidgee, the Upper Tumut, the Upper Tooma and the Geehi Rivers for power generation also provide additional regulation of these streams, and this makes more water available for irrigation. Details of the two trans-mountain diversions and the associated power works together with details of progress and construction are given in Chapter VII. Electric Power Generation and Distribution (see p. 248).

An additional 500,000 acre feet of water per annum is now available for irrigation in the Murrumbidgee Valley. When all works are completed, it is estimated that the total gain to the Murrumbidgee by diversion and regulation will amount to 1,120,000 acre feet per annum and the total gain to the Murray will be 800,000 acre feet per annum. This additional water should be sufficient to provide irrigation for approximately 1,000 square miles of land which is expected to result in a substantial increase in annual primary production.

#### § 4. International Aspects

Australia maintains contact with international developments in water conservation and irrigation through its membership, since 1952, of the International Commission on Irrigation and Drainage. This Commission was set up in India in 1950 in order that the technical experience of all countries might be pooled for the benefit of all, and to promote the development and application of the science and technique of irrigation and drainage in the engineering, economic and social aspects. The Commission is constituted of National Committees of participating countries, and more than forty-five countries, including Australia, have already been admitted to membership.

The Central Office of the International Commission is situated in New Delhi, India. Congresses, which are held every three years, have taken place in India, Algeria, the United States of America and Spain, in that order. The fifth Congress was held in Tokyo, Japan, in May, 1963.

An Australian National Committee was established following a meeting of representatives of Australian authorities held in Melbourne in 1953. At that meeting, it was decided, *inter alia*, "that a National Committee should be formed and that the National Committee would consist of representatives of Government Departments, Statutory Authorities, firms and individuals actively interested in irrigation and drainage". The Committee meets annually.

### STATES AND TERRITORIES

#### § 1. Australian Local Pattern of Water Conservation and Use

The foregoing sections deal with water conservation and irrigation in Australia generally and with international, national and interstate projects. The following survey covers the local pattern of water resources and the steps taken by the State governments to bring about their development. It will be seen that water policies in the various States tend to assume a distinctive and characteristic pattern closely allied with climatic conditions and specific local needs.

In Victoria, almost every form of water scheme is in operation. In New South Wales, major emphasis at present is on irrigation and stock development in the dry areas along the Murray and Murrumbidgee Rivers, though a substantial scheme of intensive irrigation is being conducted in the Murrumbidgee Irrigation Areas. In Queensland, up to the present, the predominant emphasis has fallen on water (mainly underground sources) for stock, and the development of small irrigation schemes in sub-humid and humid areas, especially to stabilize sugar production.

Apart from regular irrigation practices along the Murray River, South Australian authorities are vitally concerned with reticulated supplies for rural areas and towns. Western Australia has developed unique rock catchments and piped supplies for agricultural areas and towns in dry districts. Tasmanian interest relates almost exclusively to hydro-electric generation. The Northern Territory is concerned primarily with stock supplies and the safeguarding of long stock routes.

## § 2. New South Wales

1. *General.*—(i) *Rainfall and History.* On page 1110 of Official Year Book No. 37, information is given on the pattern of rainfall and the history of irrigation in New South Wales. (See also Chapter II. Physiography, p. 45, of this issue.)

(ii) *Administration.* The Water Conservation and Irrigation Commission of New South Wales consists of three members appointed by the Governor. The operations of the Commission cover water conservation, control of irrigation areas, the establishment, operation and maintenance of works for domestic and stock water supply, irrigation districts, flood control districts, sub-soil drainage districts, constitution of water trusts, the issue of licences for private irrigation, artesian and shallow boring, assistance under the provisions of the farm water supplies scheme, and river improvement works.

Under the *Water Act* 1912–1952, the right to the use and flow, and the control of water in all rivers and lakes which flow through, or past, or are situated within, the land of two or more occupiers, is vested in the Commission for the benefit of the Crown. A system of licences operates for the protection of private works of water conservation, irrigation, water supply, drainage, and prevention of inundation.

For particulars of the New South Wales–Queensland Border Rivers Agreement ratified by Acts of both States in 1947, see page 279 of this chapter.

2. *Schemes Summarized.*—(i) *Location and Type.* The bulk of irrigated land is along the Murray and its tributary the Murrumbidgee. Smaller areas are served by the Wyangala Dam, Lake Cargelligo and Lake Brewster on the Lachlan (a tributary of the Murrumbidgee), by Glenbawn Dam on the Hunter River, by Keepit Dam on the Namoi River, and by the Menindee Lakes Storage on the Darling River. None of the other rivers is regulated by large head storages, though weirs and dams have been provided for town supplies, etc., in many places, and a head storage has been commenced on the Macquarie River. In addition, substantial use is made of artesian and sub-artesian water in pastoral areas.

New South Wales legislation provides for the constitution and control of various schemes having different characteristics and including irrigation areas, irrigation districts, water trust districts, flood control and irrigation districts, and river improvement districts. There are nine irrigation areas, although two of these, Yanco and Mirrool, are generally described under the one heading, namely, the Murrumbidgee Irrigation Areas. The Areas are:—The Murrumbidgee Irrigation Areas, consisting of 451,220 acres served with water through a channel system stemming from the river at Berembed Weir; the Coomalla Irrigation Area of 34,672 acres, served by pumping from the Murray; the Curlwaa Irrigation Area of 10,393 acres, supplied from the Murray by pumping; the Hay Irrigation Area of 6,850 acres, supplied with water pumped from the Murrumbidgee; the Tullakool Irrigation Area of 18,006 acres, supplied from the Edward River by diversion at Stevens Weir; the Buronga (8,693 acres) and Mallee Cliffs (1,900 acres) Irrigation Areas served by pumping from the Murray; and the Coleambally Irrigation Area (89,844 acres), served by diversion from the Murrumbidgee River. All these Areas are administered by the Commission, and details of the various schemes are given in sub-section (iii) below.

(ii) *Works.* The capacities of the main storages (in acre feet) are:—

*Darling*—Menindee Lakes Storages (2,000,000);

*Murray*—Half share of Hume Reservoir, weirs and locks to Wentworth (1,361,420); Stevens Weir, Edward River (7,165);

*Murrumbidgee*—Burrinjuck Dam (837,000); Berembed Weir (10,000); Redbank Weir (7,360); Maude Weir (6,740);

*Namoi*—Keepit Dam (345,000);

*Lachlan*—Wyangala Dam (temporary reduced level 245,000); Lake Brewster (123,900); Lake Cargelligo (29,435); Jemalong Weir (2,200); and

*Hunter*—Glenbawn Dam (185,000 acre feet irrigation storage; 108,000 acre feet flood mitigation storage).

The total length of supply channels, drains, escape channels and pipe lines constructed by the Water Conservation and Irrigation Commission in New South Wales is about 4,700 miles. This comprises 3,330 miles of supply channels (including main canals), 1,300 miles of drains and escape channels, and 70 miles of pipe lines.

(iii) *Extent of Systems and Nature of Irrigated Culture.* The following table shows the areas of the various irrigation systems in 1961-62 and particulars of the areas under irrigated culture in New South Wales during the seasons 1957-58 to 1961-62.

### AREAS OF SYSTEMS AND OF LAND IRRIGATED: NEW SOUTH WALES

(Acres)

(Source: Water Conservation and Irrigation Commission)

Season and system	Total area	Area irrigated(a)										Total

(a) Excludes Flood Control Districts and some Irrigation Trusts, particulars for which are not available. (b) Citrus and deciduous. Deciduous amounted to 8,810 acres, of which 8,605 acres were in the Murrumbidgee Irrigation Area. (c) Includes details (except total area) for Licensed Diversions. (d) Includes total area irrigated by Licensed Diversions, but details for individual crops, etc., are not available. (e) Not available. (f) Incomplete. (g) Details for individual crops, etc., are not available.

3. **Irrigation Areas.**—(i) *Murrumbidgee.* (a) *Description.* These areas, together with adjacent lands supplied under agreement, received 379,242 acre feet, or about a quarter of the total water (1,718,325 acre feet) allocated within the State for stock, domestic supply and irrigation. They are served by the Burrinjuck Dam on the Murrumbidgee, 40 miles north-west of Canberra. The catchment above the dam is about 5,000 square miles. The river rises on the high plateau north of Mount Kosciusko where the average annual rainfall exceeds 60 inches. Flow for the irrigation areas and districts is supplemented by unregulated flow from the Tumut River below the dam. The dam also provides town supplies for Gundagai, Wagga, Narrandera, Hay, Balranald, and for towns served by the South-West Tablelands scheme.

Domestic and stock water and water for irrigation are supplied to the Irrigation Districts of Tabbita, Benerembah and Wah Wah, and the Flood Control and Irrigation District of Lowbidgee. Flood flows are relied on to serve the Lowbidgee district, and water is not released from the dam for that purpose. For the other undertakings, however, water is stored during the winter, fed by melting snows and spring freshets, and is released during the September-May irrigation season. It passes along the river channel to Berembend Weir, 240 miles westward, where it is diverted to the main canal with an off-take capacity of 1,600 cubic feet a second. The main canal has been completed to beyond Griffith, 96½ miles from the off-take. Reticulation channels aggregate approximately 900 miles and drainage channels 880 miles. In addition, approximately 440 miles of supply channels run through irrigation districts adjacent to the Murrumbidgee areas in which the water supply is operated and maintained by the Water Conservation and Irrigation Commission.

The land on which the Murrumbidgee Irrigation Areas and associated districts are situated originally comprised large sheep stations and was sparsely populated, but at 30th June, 1962, its population was approximately 29,000, that of Leeton Shire being 10,355 and that of Wade Shire 17,950.

(b) *Administration.* The Water Conservation and Irrigation Commission controls land transactions and water supplies for the Murrumbidgee Irrigation Areas only, and has no jurisdiction over land transactions in the adjacent irrigation districts, although it is responsible for the operation and maintenance of the water supply in these areas. Other local government services, including electricity and town water supply, are provided by Councils. Land is disposed of by the Commission by purchase or under perpetual lease tenure or leased for short terms for grazing or cultivation. The area under occupation at 30th June, 1962, was 407,963 acres, including 36,363 held for short lease grazing, agriculture, etc.

(c) *Production.* The principal products of the Areas are wool, livestock for slaughtering, rice, citrus fruits, peaches and nectarines, grapes, tomatoes, peas, beans and root vegetables. Rice growing was initiated on the Murrumbidgee Irrigation Areas in 1924 and has since become the most important crop. In a normal season, the water supplied for rice represents about half the total delivered to the Murrumbidgee Irrigation Areas.

(ii) *Other Irrigation Areas.* The Coomealla, Tullakool, Buronga, Mallee Cliffs, Hay, Curlwaa and Coleambally Irrigation Areas follow the same administrative pattern as the Murrumbidgee Areas—that is, land transactions are administered by the Water Conservation and Irrigation Commission which is responsible also for the operation and maintenance of works to supply water.

4. **Irrigation Districts.**—These Districts are set up under the *Water Act* for (a) domestic and stock water supply and (b) irrigation. They differ from water trusts in that the cost of the works is not required to be repaid over a period, but annual charges are made by the State for water supplied to landholders.

Since the completion of the Hume Reservoir, several such districts have been established along the Murray to utilize the New South Wales share of the storage. Water is not available for the whole of the 5,000,000 acres adjacent to the Murray in New South Wales, and therefore the schemes are based on "extensive" irrigation, that is, water rights are allotted to holdings on the basis that only a portion of each holding (one acre in three, five or ten, according to the district, etc.) will be irrigated, but additional water, when available, may be obtained by landholders. "Water right" means right to such a quantity annually of water, 12 inches deep, as will cover an area of one acre.

Water to serve Berriquin, Deniboota and Denimein Districts is diverted through a main canal which will be 100 miles long when completed. Water for the Wakool Irrigation District and the Tullakool Irrigation Area is diverted from the Edward River at Stevens Weir, and a supplementary supply is also obtainable from Mulwala canal. At 30th June, 1962, the total length of completed canals and channels in Berriquin District was 996 miles, comprising Mulwala canal 75 miles, Berrigan channel 22 miles, subsidiary channels 782 miles, escape channels 107 miles and cross drainage channels 10 miles. Off-take capacity of the Mulwala canal is 5,000 acre feet a day.

Wakool, with 387 miles of channel, contains 308 holdings and the area developed by irrigation includes about one acre in eight of the total area. Sheep raising is the main industry.

Considerable subdivision has occurred within the Berriquin District and the proportion of the total area developed for irrigation is higher than in the case of Wakool. Sheep (including fat lambs), dairying and wheat growing are the main industries.

**5. Water Trust Districts, Irrigation Trusts and Flood Control and Irrigation Districts.**—The *Water Act* provides for the constitution of Trust Districts for domestic and stock water and irrigation, and empowers the Commission to construct, acquire or utilize necessary works. When the works are completed, they are handed over to trustees to administer. The trustees are elected by the occupiers of the land and act with a representative of the Commission. They are empowered to levy and collect rates covering the cost of the works repayable to the Crown by instalments and also the cost of operation and maintenance of the works. The rates are struck according to the area of land which benefits. The following water trusts—other than irrigation—have been constituted (the area in acres of each district is shown in parenthesis)—*Murray River*—Little Merran Creek (157,440), Tuppal Creek (78,080), Bullatale Creek (68,320), Poon Boon (34,300), Minnie Bend Flood Prevention (2,190); *Murrumbidgee River*—Yanco, Colombo and Billabong Creeks (1,007,780); *Lachlan River*—Marrowie Creek (292,640), Torrigan, Muggabah and Merrimajeele Creeks (170,240), Ulonga (64,960), Micabil Weir (11,500), Condobolin West Weir (4,480); *Miscellaneous*—Great Anabranch of Darling River (959,184), Nidgerly Weir (46,880), Algdudgerie Creek (9,760), Collarenebri town water supply (117)—making in all a total area of 2,907,871 acres. Thirteen of these trusts have been formed for the provision of water for domestic and stock purposes, one for a town supply and one for flood prevention.

Irrigation Trusts are established under the same Act and are administered by trustees in a similar way.

The Lowbidgee Provisional Flood Control and Irrigation District, the first of its kind, was constituted in 1945. Its purpose is to provide flood irrigation for pasture lands on the lower Murrumbidgee by water diverted from the Maude and Redbank Weirs. Another district, Medgun near Moree in the north-west, is also in operation.

**6. River and Lake, and Farm Water Supplies.**—During recent years, the numbers of licences and permits issued to individuals to draw water from rivers and lakes for irrigation have increased substantially, especially along the coastal streams in sub-humid districts where the value of supplementary irrigation is becoming more recognized as a means of stabilizing production in dry months. There has also been a considerable increase along the Murrumbidgee and Lachlan.

The *Farm Water Supplies Act* was passed in 1946. Technical advice and assistance, and also financial assistance, are made available to help individual farmers and groups of farmers to provide and improve water supplies for domestic, stock and irrigation purposes by means of wells, bores, excavated tanks, weirs or dams, flood and spray irrigation systems.

**7. Underground Water.**—Extensive use is made of artesian, sub-artesian, and shallow underground water. The Great Artesian Basin underlies an area of nearly eighty thousand square miles in the northern and western portions. Eighty-seven Bore Water Trusts and 12 Artesian Wells Districts have been constituted. The Bore Trusts are administered in the same way as Water Trusts, but in Artesian Wells Districts settlers maintain the drains. Bore Trusts and Artesian Districts cover over 5 million acres and water is distributed through approximately 8,000 miles of open earth drains. The number of artesian bores giving a flowing or pumping supply at 30th June, 1962, was 1,088 and the estimated total daily flow from approximately 600 flowing bores was 64 million gallons.

Of other structural basins of sedimentary rocks, e.g., Murray, Cumberland (Sydney), Oxley and Clarence Basins, the Murray is the largest and also the most important in that it affords stock water supplies over an extensive area of the south-western section of the State. Only a few of these bores flow, the remainder being sub-artesian. Good supplies for stock

and, in some instances, small scale irrigation, are obtained from porous sandstone in the Moss Vale-Picton area of the south-western lobe of the Cumberland Basin, but the remainder has limited potential. Stock supplies are obtained from bores in the fringe zones of the Oxley Basin, but the centre of this basin lies under the Liverpool range. The Clarence Basin is relatively unimportant from a groundwater viewpoint.

In other parts of the State, the largest and best quality groundwater supplies are obtained from sands and gravels in the alluvium of the major rivers and their tributaries, particularly the western flowing rivers, e.g. Lachlan, Macquarie and Namoi. Supplies of up to 50,000 gallons an hour are obtained from wells and screened bores in these areas and are used for irrigation purposes. The Government is carrying out investigations to determine the groundwater potential of the alluvium of such valleys, particularly with regard to irrigation use, and a test-boring programme is in progress in the Lachlan Valley. Coastal river systems have a much more limited potential in this regard, the main exception being the Hunter.

Old sand dune areas along the coast provide large supplies of good quality water. However, since the soils of these areas are not suited to agricultural pursuits, exploitation has been largely confined to the Sydney and Newcastle areas. Initially a source of Sydney's water supply, the Botany sands are now utilized mainly by industry. The Tomago sands provide a considerable proportion of the Newcastle water supply.

The older rocks, which are mostly folded and jointed, are very variable in their groundwater potential and only rarely do they yield supplies sufficient and suitable for limited irrigation. Where suitable conditions obtain, they yield useful stock supplies, mostly at depths between 50 and 250 feet.

It is necessary under the 1955 amendments to the *Water Act* that all wells and bores be licensed, and details of over 18,500 bores and wells in the State are recorded. When assessed in relation to the geologic and topographic conditions of any particular area, such records provide valuable evidence of the groundwater potential and are thus of considerable benefit to landholders.

**8. Future Programme.**—The programme of post-war development already in hand includes the provision of additional dams and storages, diversion weirs, and flood mitigation and river protection works in various parts of the State. Construction of *Burrendong Dam* on the Macquarie River is in progress. Legislation has been passed authorizing the construction of a flood control and irrigation dam at Warkworth in the Hunter Valley and a storage dam at Blowering on the Tumut River. The Hunter River development, of which Glenbawn Dam is an integral part, concerns an exceptionally fertile coastal valley, forming the hinterland to Newcastle, where the annual rainfall is not heavy and variations from month to month are considerable. This is the first coastal scheme initiated in New South Wales. At Wyangala Dam, on the Lachlan River, the fixed crest of the dam spillway has been lowered temporarily to enlarge the spillway for passage of greater floods. Construction has commenced on a new earth and rock fill dam which will be built behind the present dam to give a storage of 1,000,000 acre feet. Within the new Coleambally Irrigation Area further development of farms has been carried out and water is being supplied by the new diversion weir at Gogeldrie. At the 30th June, 1962, 54 large area farms and 8 horticultural farms had been allotted south of the Murrumbidgee River, whilst 47 large area farms had been allotted north of the river and now form part of the Murrumbidgee Irrigation Areas.

**9. Hydro-electricity.**—A survey of the use of water for power generation in New South Wales may be found in the previous chapter (*see* p. 253).

### § 3. Victoria

**1. General.**—(i) *Rainfall.* Particulars of the rainfall pattern of Victoria were given on page 1117 of Official Year Book No. 37. (*See also* Chapter II. Physiography, p. 45, of this Year Book.)

(ii) *Administration.* The passing of the *Irrigation Act* of 1886 put the control of surface waters under the Crown, provided for the establishment of Irrigation Trusts and marked the beginning of irrigation development. In 1905, the *Water Act* established the State Rivers and Water Supply Commission and gave it control of all irrigation, rural domestic and stock supplies, town water supplies, and flood protection and drainage undertakings outside the Metropolitan area, with the exception of the irrigation area operated by the First Mildura Irrigation Trust and the town water supplies operated by locally constituted waterworks trusts or local governing bodies.

The operations of the First Mildura Irrigation Trust, the waterworks trusts and local governing bodies administering town water supplies, the river improvement and drainage trusts and the various sewerage authorities which control sewerage undertakings in country towns are also subject to general supervision by the Commission.

**2. Works Summarized.**—In 1902, a great drought emphasized the need for a concerted attack on water problems. Subsequently to the establishment of the State Rivers and Water Supply Commission, the total capacity of storages controlled by that Commission has increased from 172,000 to 4,263,618 acre feet at 30th June, 1962. In addition, Murray River storages with a combined capacity of 2,722,840 acre feet are shared equally by New South Wales and Victoria under the River Murray Waters Agreement, subject to certain obligations to South Australia. The total storage capacity available to Victoria is thus some 5,625,038 acre feet. Most of the water from these storages is used for irrigation. The area actually irrigated has risen from 105,000 acres in 1906 to 1,117,900 acres in 1961–62, to which 1,744,473 acre feet of water were delivered. The Commission estimated the value of irrigated production in 1960–61 at £61,125,000, representing about one-sixth of the value of Victoria's total rural production.

Besides supplying water to its own irrigation districts, the Commission supervises the diversion of water for irrigation by private persons by means of licences and permits. In the last ten years, the area so licensed has doubled and private diverters now provide a fifth of total irrigation production.

**3. Storages.**—The capacities of the main storages in the various systems (in acre feet) at 30th June, 1962, were as follows:—

*Goulburn System:*—Eildon Reservoir, 2,750,000; Waranga Reservoir, 333,400; Total, 3,104,100; *Murray-Loddon System:*—Half share of Murray River storages, 1,361,420; Cairn Curran, 120,600; Tullaroop, 60,000; Total, 1,690,230; *Wimmera-Mallee:*—Rocklands, 272,000; Total, 563,800; *Gippsland:*—Glenmaggie, 154,300; Total 154,340; *Coliban:*—62,730; *Werribee-Bacchus Marsh:*—34,900; *Mornington Peninsula:*—5,800; *Otway:*—1,080; *Miscellaneous:*—8,058; *Grand Total:*—5,625,038.

**4. Extent of Systems and Nature of Irrigated Culture.**—The following table shows the areas of the various irrigation systems in 1961–62, and the areas under irrigated culture during the seasons 1957–58 to 1961–62.

#### AREAS OF SYSTEMS AND OF LAND IRRIGATED: VICTORIA

(Acres)

(Source: State Rivers and Water Supply Commission)

(a) Excludes Private Diversions and Northern Systems other than Campaspe District. (b) Includes First Mildura Irrigation Trust. (c) Area of Campaspe District only. (d) Excludes private diverters in the Torrumbarry System, but includes all other private diverters along the Murray River. (e) Not available.

5. *Irrigation Systems.*—(i) *Goulburn.* The storage capacity for this system is provided principally by Eildon Reservoir. The enlargement of the storage capacity of this reservoir was completed in 1956, enabling 600,000 acres to be irrigated when the necessary distributary works are completed. Water from Eildon Reservoir flows down the Goulburn River to the Goulburn Weir, located near Nagambie. This raises the summer level of the river about 45 feet for the purpose of diversion. From this weir, water is diverted via the East Goulburn Main Channel direct to the irrigation areas around Shepparton. The western main channels from the weir convey water to the Waranga Reservoir near Murchison in addition to supplying part of the large Rodney area directly.

Two main outlet channels issue from Waranga Reservoir. One serves the western section of Rodney area while the other serves irrigation areas as far west as Boort, and continues into the Wimmera-Mallee domestic and stock system to provide a supplementary supply as far as Beulah East (*see para. 6, below*).

Water is also supplied to part of the Goulburn system from Cairn Curran Reservoir on the Loddon River, and from Tullaroop Reservoir on one of its tributaries. Eildon itself may be used to supplement supply to the districts along the Murray River.

The main products of the Goulburn system are dairy produce, fruit, wool and fat lambs. Annual production of deciduous canning fruits in the area is about two-thirds of Australia's total.

(ii) *Murray River System.* The waters of the Murray River are used to supply the area between Yarrawonga and Merbein. The districts between Yarrawonga and Swan Hill, except Tresco near Swan Hill, are supplied by gravitation and those west of Swan Hill by pumping.

The main items produced in the Murray Valley Irrigation Area, which is served from Yarrawonga Weir, are dairy products, fat lambs and canning fruit.

The gravitation system based on Torrumbarry Weir (52 miles downstream from Echuca) serves the area around Cohuna, Kerang, Koondrook and Swan Hill. (Also included in the Torrumbarry System is the Tresco District supplied by pumping from Lake Boga.) Dairying and fat lamb raising are the major industries. Vine fruits and vegetables are grown around Swan Hill, and tobacco growing is increasing in importance.

West of Swan Hill lie four Commission districts with a pumped supply—Nyah, Robinvale, Red Cliffs and Merbein. These contain about 1,500 holdings devoted mainly to dried vine fruit, although citrus fruit and table and wine grapes are of some importance. The area around Mildura is controlled by the First Mildura Irrigation Trust, the only irrigation trust operating in Victoria. It serves an irrigated area about half the combined size of the four Commission districts and has similar major products.

(iii) *Southern Systems.* The most important southern system is the area around Maffra and Sale, devoted mainly to dairying. This is supplied from Glenmaggie Reservoir on the Macalister River and from the natural flow of the Thomson River when the flow is adequate. Other important irrigation districts are located quite close to Melbourne around Werribee and Bacchus Marsh. These districts are intensively developed for dairying and vegetable growing.

6. *Wimmera-Mallee Domestic and Stock Supply System.*—This system serves an area of 11,000 square miles or about one-eighth of the State. Without the artificial supply of water, development in this area would be meagre and hazardous owing to the constant threat of drought. The main supply is drawn from the Grampians storages and can be supplemented by water drawn from the Goulburn and Loddon Rivers, via the Waranga Western Channel referred to previously. Works in progress will make the Wimmera and Mallee independent of supplies from the Goulburn and Loddon Rivers in the near future. In addition, certain areas in the north of the system are supplied direct from pumps on or near the Murray River.

As far as possible, water is distributed in the winter and spring to reduce evaporation losses in 6,500 miles of Commission channels and 3,000 miles of farm channels. It is the responsibility of the 7,000 farmers served to provide sufficient storage capacity on their farms to meet their domestic and stock needs for the year. In addition to meeting rural and domestic demand, together with stock requirements, the Grampians storages provide a water supply for more than 40,000 people in 47 towns and are used to irrigate a small area near Horsham.

7. *Town Water Supplies and Sewerage.*—Details of the operations of the State Rivers and Water Supply Commission with respect to water supplies and sewerage for country towns and local government authorities are given in Chapter XIX. Local Government, of this Year Book.

**8. Drainage, Flood Protection and River Improvement.**—The largest work in this category undertaken by the State Rivers and Water Supply Commission is the Koo-wee-rup-Cardinia flood protection district embracing 80,000 acres of a continuous depression along the seaboard of Westernport. Once useless, indeed a hindrance to communication, this area now yields primary products worth several million pounds each year.

By the *River Improvement Act* 1948, the formation of local river improvement and drainage trusts under the supervision of the Commission has been greatly facilitated, and since 1950, 20 such trusts have been formed. The importance of river improvement work is expected to continue to grow.

**9. Finance.**—The capital liability of the Commission at 30th June, 1962, was £108 million. Of this amount, nearly £75 million were expended on irrigation and £8 million on domestic and stock supply systems. Both these amounts were financed entirely by the State. The total liability for urban supply was £15.5 million, of which 53 per cent. was borne by the State and the remainder by the districts concerned. The remaining £9.5 million were due for expenditure on flood protection and drainage (£2 million) and items such as loan flotation expenses, surveys and investigations, and buildings, plant and stores (£7.5 million).

**10. Underground Resources.**—A survey of these resources is being carried out by the Victorian Department of Mines. Their deep drilling plant has located suitable water for town supplies at Portland, Heywood, Port Fairy, Timboon and Petersborough during exploration to 5,500 feet in the Western District basin. Other drilling plants are engaged in other parts of the State, and up to date over 100 wells have been successfully completed.

The Murray Artesian Basin underlies an area of 107,000 square miles, of which 27,000 square miles are in Victoria, 28,000 square miles in South Australia and 52,000 square miles in New South Wales. The quality of the water varies, and is suitable for domestic purposes in much of the south-western part of the basin in Victoria, but elsewhere is suitable only for limited stock use. Maximum depth of development of underground water in Victoria is approximately 4,500 feet. Some individual bores can yield up to 2,000,000 gallons a day. In the last few years, the Department of Mines has expanded considerably the work of exploration for underground water.

**11. Future Programme.**—The main work under construction is the enlargement of the channels of the Goulburn system to distribute the extra water now available from Eildon, Cairn Curran and Tullaroop Reservoirs. A considerable amount of this work has already been carried out. Other large projects under construction are the enlargement of Eppalock Reservoir on the Campaspe River to a capacity of 250,000 acre feet and a new storage on Devilbend Creek for the Mornington Peninsula area. Approved works for future construction include Lake Bellfield on Fyans Creek (Grampians Mountains) and a storage on the Buffalo River.

## § 4. Queensland

**1. General.**—(i) *Rainfall.* Particulars of the rainfall pattern of Queensland are given in Official Year Book No. 37, page 1122. (See also Chapter II. Physiography, page 45, of this Year Book.)

(ii) *Administration.* In Queensland, the right to the use and flow of non-tidal surface water contained in, or flowing through or past, the land of two or more occupiers, and all artesian and sub-artesian water vests in the Crown. Subject to certain reservations for Local Authority and other purposes, such water is controlled by a Commissioner of Irrigation and Water Supply.

For a description of the development of the present administration, see Official Year Book No. 42 and earlier issues.

(iii) *Water Utilization.* In Queensland, private diversions from watercourses, artesian wells, and in certain declared areas, sub-artesian wells, are subject to licence by the Commissioner. Dams and weirs are constructed by the Commissioner to safeguard supplies in streams from which private pumping for irrigation takes place, and also to provide water for irrigation areas established by the Commissioner.

**2. Irrigation.**—(i) *General.* Irrigation as a means of stabilizing and increasing agricultural production continues to receive attention in Queensland. As a large portion of Queensland is tropical, the State's crops differ considerably from those of other States.

Sugar cane is the greatest individual crop, representing in value about half of the total agricultural production. In 1961-62, approximately 15 per cent. of the sugar cane acreage was irrigated. This represented about 36 per cent. of the total irrigated area in Queensland. Queensland is also Australia's major tobacco-producing State, and plans are in hand to increase greatly the annual production of this crop by means of development under irrigation. The area of tobacco irrigated during 1961-62 represented 90 per cent. of the total plantings of this crop in the State.

Most irrigation in Queensland is undertaken by private farmers operating under licence to obtain water by pumping from streams or from natural underground storages. During recent years, there has been considerable development of individual water conservation projects (water harvesting) to provide storage for irrigation of pastures, fodder crops and small crops, and orchards. Where available, electricity is the most popular source of power for pumping, and the principal areas supplied with electricity are the Burdekin Delta, the Lockyer Valley, and the Darling Downs.

It has been estimated that about two-thirds of the total area irrigated in Queensland is supplied from underground water. The main areas where these supplies have been developed extensively are the Burdekin Delta (Ayr-Hill area), the Pioneer Valley, Callide Valley, Lower Burnett (Bundaberg area), Lockyer Valley and Redland Bay. Similar development is taking place in other areas such as parts of the Darling Downs.

Furrow irrigation is used for cotton, sugar cane, most tobacco and some other crops. Spray irrigation is used widely on fruit, vegetables, fodder crops and a small part of the tobacco crop. Spraying is well suited for the application of water on deep soils by small pumping plants, particularly when the quantity of water available is limited. Use of the border check method in the irrigation of pasture and fodder crops has proved successful.

The following table shows the number of irrigators and the areas irrigated for the years ended 31st March, 1958 to 1962, and for each division for the year ended 31st March, 1962.

#### AREA OF LAND IRRIGATED: QUEENSLAND

Season and division	No. of irrigators	Area irrigated (acres)							
		Vegetables	Fruit	Sugar-cane	To-bacco	Cotton	Other crops	Pastures	Total
1957-58 .. ..	7,296	28,187	4,585	69,980	6,881	640	40,123	9,949	160,345
1958-59 .. ..	7,149	26,597	4,876	65,613	7,490	1,520	38,135	10,402	154,633
1959-60 .. ..	6,889	27,207	5,212	62,346	9,256	2,579	36,115	9,421	152,136
1960-61 .. ..	7,839	29,698	5,758	68,987	12,066	2,675	51,862	15,651	186,697
1961-62—									
Southern Queensland ..	5,873	26,338	5,146	19,249	2,786	432	48,099	15,121	117,171
Central Queensland ..	648	1,014	299	40	36	1,510	8,397	2,525	13,821
Northern Queensland ..	1,912	4,787	1,092	55,252	10,849	98	3,451	2,898	78,427
<b>Total, 1961-62 ..</b>	<b>8,433</b>	<b>32,139</b>	<b>6,537</b>	<b>74,541</b>	<b>13,671</b>	<b>2,040</b>	<b>59,947</b>	<b>20,544</b>	<b>209,419</b>

The pattern of irrigation in Queensland is unlike that in southern States. The spring to autumn "irrigation season" of the temperate southern irrigated lands is not applicable, as round-the-year irrigation is required throughout most of the State, the timing and duration of the summer "wet" season being too variable to enable a definite non-irrigation season to be fixed.

Two of the more important areas of development by irrigation by private pumping are the Lockyer Valley and Burdekin River Delta.

(a) *Lockyer Valley.* West of Brisbane and within 30 miles of that metropolitan market is the Lockyer Valley, which is portion of the Brisbane River Basin. The valley comprises an extensive flood plain where heavy black alluvial soil thickly overlies gravels and sands carrying water suitable for irrigation. Despite a mean annual rainfall of 30 inches, the variation is great, and irrigation is necessary for continuous agricultural production. Surveys suggest that of some 60,000 acres of land highly suitable for irrigation only about a third is under irrigation. Most of the farmers operate electric pumps for irrigation purposes, and a special policy designed to encourage such development is fostered by the Southern Electric Authority of Queensland. The Irrigation and Water Supply Commission has constructed a number of small weirs on Lockyer Creek with a total storage of

1,370 acre feet. These also tend to augment and conserve underground supplies. The Irrigation Research Station established at Gatton has been converted to a Regional Experimental Farm under the control of the Department of Agriculture and Stock.

The Lockyer Valley produces a substantial proportion of Queensland's onions, potatoes, pumpkins, lucerne, hay, green fodder, maize and dairy products.

(b) *Burdekin River Delta.* The Burdekin River, which enters the sea between Townsville and Bowen, is a major factor in the life of north Queensland. In most years, heavy floods from a catchment twice the size of Tasmania cause extensive damage and traffic disruptions. On the other hand, the fertile delta area, with its underground water supplies at shallow depth, has contributed greatly to the agricultural prosperity of north Queensland. The average annual rainfall of this area is some 41 inches, but the major part falls in the months December to March. Consequently, sugar growers and other farmers have tapped the underground water resources of the delta to obtain supplies in the dry periods. Sugar is the main crop irrigated, together with citrus fruits, pineapples, vegetables and tobacco. The irrigated area is in excess of 30,000 acres, up to 1,000 acre feet of water being drawn daily from underground sources.

In the Home Hill-Inkerman areas on the south side of the Burdekin, water is obtained from shallow wells by electric pumps supplied from a local power station controlled by the Townsville Regional Electricity Board. Around Ayr, on the north side of the river, electric power from the mains of the Townsville Regional Electricity Board is now being used in place of individual internal combustion engines. At both Home Hill and Ayr, water for domestic supply is raised by a windmill on each property.

In 1940, the Burdekin River Trust was formed to safeguard the sugar areas of the delta from erosion and floods. An irrigation research station studies the development of pastures and irrigated crops under local conditions.

(ii) *Government Projects.* The Irrigation and Water Supply Commission has constructed and operates two dams and forty-one weirs with a storage capacity of 452,776 acre feet. Water from these storages supplies four irrigation areas operated by the Commission and supplements numerous streams from which pumping for private irrigation takes place.

(a) *Mareeba-Dimbulah Irrigation Area.* The large areas of sandy soils in the valleys of the Walsh and Barron Rivers in the neighbourhood of Mareeba and Dimbulah are suitable for tobacco production, and in 1952 an irrigation undertaking was established.

Construction of Tinaroo Falls Dam on the Barron River has been completed, and construction of irrigation works which will serve a total of 78,000 acres is proceeding. Of this area, 49,000 acres will be irrigated. It is expected that 910 tobacco farms and 180 mixed farms will be served. While tobacco will be the basic crop, peanuts, vegetables, maize, cotton and stock fattening also appear suitable. One hundred and twenty-nine miles of channels have been constructed, and irrigation water from Tinaroo Falls Dam is available to 386 farms.

In 1961-62, the value of tobacco leaf sold was £5.4 million from 465 farms.

(b) *Burdekin River Irrigation Area.* While construction of the major part of the Burdekin River Irrigation, Hydro-electric and Flood Mitigation Project has been deferred indefinitely, three schemes associated with the Project have been completed. These are the Irrigation Areas of Cläre (constituted in 1949), Millaroo (1952) and Dalbeg (1953), all of which are at present used predominantly for tobacco production. Located from 25 to 65 miles upstream from the mouth of the Burdekin, these areas comprise 18,862 acres, and obtain irrigation waters from central pumping stations drawing on the flow of the Burdekin. A temporary storage of 7,670 acre feet capacity has been constructed about 79 miles upstream from the mouth of the Burdekin to augment supplies. At 30th June, 1962, 149 farms were occupied, and total production for 1961-62 was valued at £572,264.

(c) *Dawson Valley Irrigation Area.* A scheme for the development of the Dawson Valley providing for the irrigation of 70,000 acres was inaugurated in 1923. Much investigational and survey work on the scheme was carried out, but the general financial depression and limited loan funds brought about the cessation of the work. However, the initial step in construction was completed, comprising a weir on the river at Theodore and irrigation works to serve an area of 3,500 acres supplied from a central pumping station. Two additional weirs have since been built, giving a total storage of 10,280 acre feet and covering

some 61 farms in production, returning an estimated £256,000. Pasture, vegetables, cotton, fruit and dairy products are the principal produce. Recently, further attention has been given to the former plans for the valley, and earlier work has been under close scrutiny as a prelude to future development. Construction of works to serve some 2,400 acres at Gibber Gunyah, adjacent to the existing Theodore area, has been completed, and 17 farms have been occupied. These farms have been increased in size by the addition of dry areas and by some readjustment of boundaries.

(d) *St. George Irrigation Area.* The St. George irrigation area comprises 19 farms engaged mainly in raising fat lambs in conjunction with irrigated pastures. Water supply for the area is obtained by pumping from the combined weir and road bridge on the Balonne River at St. George.

(e) *Warrill Valley Project.* Moogerah Dam on Reynolds Creek (a tributary of Warrill Creek) is of double curvature thin arch construction 105 feet high to spillway crest level, and will serve some 11,000 acres of the Valley by private diversion of water released from its 73,000 acre feet storage into Reynolds and Warrill Creeks.

(f) *Mary Valley Project.* The construction by contract of Borumba Dam on Yabba Creek is proceeding satisfactorily. This is a rockfill structure with an upstream impermeable concrete membrane 144 feet high above stream bed. In its initial stage, storage capacity will be 34,500 acre feet with provision for later increase to 80,000 acre feet. In its first stage, water released from the dam will be available to maintain the town water supply for Gympie, and will allow extension of the area irrigated by private diversion from the Mary River to some 18,000 acres.

(g) *Upper Condamine Project.* Work has commenced on the construction of Leslie Dam on Sandy Creek, a tributary of the Condamine River. This will be a mass concrete gravity dam 95 feet above foundation level. In its initial stage, storage capacity will be 38,500 acre feet with provision for later increase to 87,000 acre feet. Water released from the dam will be available for irrigation of sections of the Darling Downs downstream the Condamine River as far as Cecil Plains. In addition, the city of Warwick will be supplied by pipeline from Leslie Dam.

(h) *Border Rivers Project.* The development of the rivers constituting portion of the border between Queensland and New South Wales is under the authority of the Dumaresq-Barwon Border Rivers Commission on which each State is represented. For information on the project see page 279.

3. *Great Artesian Basin.*—(i) *General.* Western Queensland, beyond the 20 inch rainfall belt, is predominantly pastoral and is mainly dependent for water supplies on artesian and sub-artesian bores and, where surface storage is not readily available, on excavated tanks. The Great Artesian Basin in Queensland corresponds approximately with the area lying west and south of the Great Dividing Range, excluding the Cloncurry mineral field and the Barkly Tableland. It comprises 430,000 square miles or about two-thirds of the total State area of 667,000 square miles.

(ii) *Artesian Water.* Although the number of bores has gradually increased over the years, the total flow of all bores has declined since the peak flow of 351 million gallons a day. A report on the nature and structure of the Great Artesian Basin, presented in 1954, indicated that the output would continue its decline during the next sixty years, at which stage the flow from the remaining flowing bores would be of the order of 110 million gallons a day. The discharge from windmills, springs and other leakages, together with the underflow past the Queensland borders, would then be about 20 million gallons a day. It was further expected that the total discharge, of the order of 130 million gallons a day, would be in equilibrium with the recharge of the basin. It was anticipated that numbers of bores on higher ground would cease to flow during the next sixty years and the area served by the flowing bores would contract by perhaps twenty per cent.

Up to 30th June, 1962, 2,776 artesian bores had been drilled, of which 1,874 were still flowing. The total depth drilled amounted to 3,905,298 feet and the estimated daily flow was 208 million gallons. Although very few bores exceed 2,000 feet in depth (the average depth is 1,407 feet) and a new bore greater than 3,000 feet deep is exceptional, the deepest bore recorded was sunk to 7,009 feet. Some bores which had been classified as "ceased" have been inspected and found to be still flowing, while other ceased bores have responded to deepening and have recommenced flowing. Both the pressure and flow of artesian bores are steadily diminishing, the rate of decrease varying widely throughout the basin. Present

average rates of diminution are:—pressure 1–2 feet/head; total flow 2–3 per cent. per annum. The greater part of the artesian discharge is distributed by some 15,500 miles of open earth channels, from which a large proportion of the water is lost by soakage and evaporation, less than 10 per cent. being actually used by stock.

Although artesian beds underlie a large area of the State, only 79,000 square miles are primarily watered by bore drains. The remaining area is watered by artesian bores (with small or no flow and limited drains), sub-artesian bores, excavated tanks, dams and natural waterholes. In many districts, artesian bores do not provide economical watering facilities because of depth, limited area to be watered, and difficult terrain for distribution of water by drains. The quality of artesian water from the greater part of the basin is not suited for prolonged use for irrigation on most soils, nor are the supplies sufficient for both large scale irrigation and stockwatering. Practically the whole of the final steady-rate discharge from flowing bores will be needed for the watering of stock.

Shallower supplies, which come from beds unconnected with artesian beds, are of variable quality and volume. These supplies are available at depths of less than 1,000 feet over a large area of the basin. Some 10,656 sub-artesian bores, within the Great Artesian Basin, have been registered in Queensland. An important practical consideration is that the main artesian beds are continuous and the sub-artesian beds are not continuous.

Detailed surveys of numerous other sources of underground water in the State, such as the smaller sedimentary basins, the Cainozoic alluvial deposits, recent coastal sands and fractured older rocks, still largely remain to be carried out.

(iii) *Bore Water Areas.* The constitution of Bore Water Areas was inaugurated in 1913 to aid pastoral settlement in districts where large flows were available at a cost beyond individual capacity, and to conserve artesian supplies by fully utilizing flows from the existing bores on the land resumed for closer settlement. Bores and drains are constructed from loan funds repayable over a period of years. The areas are administered by local boards or by the Commissioner of Irrigation and Water Supply, acting as a board. Rates are levied to meet interest, redemption, maintenance and administration costs. Statistics for the year 1961–62 are:—areas constituted, 73; administered by the Commissioner, 55; administered by local boards, 6; number abolished, 12; area benefited, 4,107,637 acres; average rate per acre, 1.27d.; number of flowing bores, 57; total flow, 26,544,000 gallons a day; drains served, 2,678 miles.

4. *Other Basins.*—Two major areas bordering the Great Artesian Basin in Queensland carry artesian water. One is located on the western slopes of Cape York Peninsula and the other in the Dawson-Mackenzie River (Bowen) Basin.

Groundwater supplies from the Barkly Basin, which extends into western Queensland from the Northern Territory, are referred to in the section dealing with the Northern Territory.

5. *Non-artesian Sources.*—The Irrigation and Water Supply Commission and Geological Survey, in addition to siting numerous bores for shallow groundwater, has been carrying out systematic detailed investigations of areas of river and coastal alluvium. Many of these areas are favourably situated for recharge and are hence capable of supporting relatively large groundwater drafts for their limited areal extent. Among the most important of these is the Burdekin delta in the sugar-cane growing area of Queensland. In the delta, groundwater is used extensively for irrigation.

6. *Stock Watering.*—(i) *General.* A predominant interest in the field of water conservation has been the provision of stock and domestic water supplies in Queensland's great pastoral areas, which contain more than a third of the Commonwealth's cattle and about a seventh of the sheep. In addition to the stabilization of water supplies in the pastoral areas, the provision of water along stock routes for travelling stock has received much attention in recent years.

(ii) *Main Stock Routes.* The Queensland Irrigation and Water Supply Commission acts as consultant and constructing authority to the Stock Routes Co-ordinating Board for watering facilities on stock routes. On completion, facilities are vested in local authorities for control and maintenance. From 1935, when the scheme was inaugurated, to 30th June, 1962, 567 facilities had been completed, and at 30th June, 1962, 46 facilities were under construction or investigation. A State-wide investigation is being carried out by the two authorities mentioned above to ascertain the general movement of stock, determine primary and secondary routes, register existing water facilities, and formulate a co-ordinated plan in regard to the provision of new watering facilities.

(iii) *Channel Country Stock Routes.* Under *The State Grants (Encouragement of Meat Production) Acts 1949-1954*, the Commonwealth Government has agreed to meet half the cost of providing additional watering facilities in stock routes leading into, along, and out of, the Channel country and on the route from Camooweal to Mount Isa. These routes connect with the main far-western route included in the State scheme inaugurated in 1935.

At 30th June, 1952, 41 watering facilities at an estimated cost of £300,000 had been proposed, and by 30th June, 1962, 37 had been completed.

**7. Technical and Financial Assistance to Farmers.**—The *Farm Water Supplies Assistance Act* of 1958 is designed to improve the standard of water supply installations on individual holdings, encourage greater development of individual irrigation schemes, and provide greater stability of production and avoid losses in time of drought together with generally increasing production.

To achieve this purpose, the Act authorizes the provision of technical and financial assistance to landowners for the investigation, design and installation of approved works of farm water supply. All projects for which finance is provided under the Act are carried out under Commission supervision, and for the payment of a small charge the Commission will supervise the construction of works designed by its staff, but for which the landowners do not require financial assistance under the Act.

During 1961-62, 1,000 requests (765 for technical assistance only, and 235 for technical and financial assistance) were dealt with in addition to advice on a further 468 requests on groundwater supplies. An amount of £239,998 was approved for advances under the Act in 1961-62.

**8. Hydro-electricity.**—An outline of hydro-electricity schemes operating in Queensland is given in the previous chapter (*see p. 258*).

## § 5. South Australia

**1. General.**—(i) *Rainfall.* Brief particulars of the climatic conditions in South Australia are given on page 1129 of Official Year Book No. 37. (*See also* Chapter II. Physiography, page 45, of this Year Book.)

(ii) *Administration.* Water supplies, other than irrigation works, are under the control of the Engineering and Water Supply Department, which administers the *Waterworks Act* governing the supply of water through mains in water districts for townships and farm lands. The *Water Conservation Act* provides for the construction of storages in non-reticulated areas, and authorizes the Minister concerned to "divert and impound the water from any streams or springs or alter their courses, and take water therefrom, or any other waters as may be found in, under, or on, any land entered upon for the purpose of supplying water to the inhabitants of any water district".

(iii) *Methods of Catchment and Conservation.* Early in the history of the State, the rights to all running streams, springs and soaks were vested in the Crown. The *Water Conservation Act* was passed in 1886 and, up to 30th June, 1962, more than 550 dams, tanks and rainsheds, together with 460 wells and 340 bores, had been built or acquired by the State at a total cost of £1,774,900. The rainsheds are timber frameworks roofed with galvanized iron to collect rainfall which is delivered to storage tanks and is available for surrounding settlers and travellers. Rainshed catchments vary from a few hundred square feet to four acres in extent. Over most of the State, extraordinary precautions are taken to counteract evaporation, and pipelines in preference to open channels and covered storages are used for this purpose. Meters are attached to practically all services to check usage by individual consumers.

**2. Irrigation.**—Australian irrigation originated in the upper Murray of South Australia and the Mildura area of Victoria. South Australian irrigation commenced with an agreement between the Government and the Chaffey brothers in 1887 whereby an area of land at Renmark was made available for the establishment of certain irrigation works. In South Australia, irrigation is almost exclusively confined to the Murray Valley. Except for that held in various lock pools, no water from the Murray is stored in South Australia. Water is either pumped onto the land or gravitated from the river.

The two major authorities administering irrigation areas are the Department of Lands and the Renmark Irrigation Trust. The Trust is controlled by a local board of management consisting of seven members. This area differs from other South Australian irrigation areas in that the land is freehold instead of leasehold and is self-contained and self-controlled. Every settler is entitled to vote for the election of Trust members. The Trust maintains 100 miles of reticulation channels.

The following table shows particulars of the areas of crops and pastures irrigated in South Australia during the seasons 1957-58 to 1961-62.

### AREA OF LAND IRRIGATED: SOUTH AUSTRALIA

(a) Includes fodder and fallow land.

3. **Water Supply Schemes.**—(i) *Adelaide Metropolitan Water Supply.* Adelaide derives its water from five reservoirs in the nearby Mount Lofty Ranges, and by means of pumping stations and a pipeline from the Murray River at Mannum. The reservoirs have a storage capacity of 69,663 acre feet and the pipeline has a capacity of 65,000 acre feet a year.

A concrete arch dam is nearing completion at Myponga, which will provide an additional capacity of 22,000 acre feet in 1962–63 to serve areas south of Adelaide. To the north, the new city of Elizabeth receives water from South Para Reservoir in the Barossa system and from the metropolitan storages. The consumption for the whole area for the year 1961–62 was 96,107 acre feet, equivalent to a consumption of 112 imperial gallons per head per day. The capital cost to 30th June, 1962, was £40,303,256.

(ii) *Country Reticulated Supplies.* Areas extending to a distance of 90 miles north of Adelaide are supplied from the Warren, Barossa, and South Para Reservoirs (50,350 acre feet) in the Barossa Ranges. Agricultural towns and areas further north are supplied from Beetaloo, Bundaleer and Baroota Reservoirs, and the Morgan-Whyalla Pipeline. There is a supplementary supply from the Mannum-Adelaide pipeline through the Warren Reservoir. The 223-mile pipeline from Morgan to Whyalla can remove up to 10,000 acre feet of water a year from the Murray River. Work is commencing on a second main of more than double the capacity. A large part of Eyre Peninsula is supplied through the 240-mile Tod River Main and the 104-mile East Coast Main, with water from the Tod River reservoir (9,160 acre feet), the sand beds of the Uley-Wanilla Basin, and the newly developed Lincoln Basin. Along the Murray River, all towns are supplied from the river. Water from the river is also reticulated through adjacent farmlands for up to 30 miles. Surface and underground resources have been developed to supply most rural centres not covered by the larger schemes.

Water conservation and distribution works in country districts to 30th June, 1962, have cost £39,267,767 (exclusive of river control and irrigation works on the Murray River) and contain 7,073 miles of water mains.

4. **Underground Water.**—The occupied portion of South Australia is, on the whole, well endowed with underground water, and the extent of the several artesian basins is reasonably well known. There are also considerable areas in which groundwater occurs, notably in the south-east of the State where, in the Keppock district, supplies exceeding 100,000 gallons per hour are not uncommon. Quality varies widely, but a great deal is at least useful for watering stock, and this is the major use to which it is put.

The deepest portion of the Great Artesian Basin (in the north-east) is not extensively developed because development costs are high in proportion to the carrying capacity of the arid land. Deep boreholes have been drilled by the Government to provide watering places along stock routes, and bores around the basin margin have developed pressure waters which occur at comparatively shallow depth, as at Marree township where the deepest flowing bore is 575 feet. In addition to the pressure waters, the non-pressure aquifers of the subsidiary basins provide pastoralists with stock water supplies which can be readily and economically developed.

The use of the waters of the Murray Basin is essential to settlement in the Murray Mallee country and in the south-east of the State, especially for farms and township supplies. Mount Gambier draws its water from Blue Lake, which is fed from the Basin. Bores supply a number of towns in this Basin, the deepest bore being 1,805 feet.

On Eyre Peninsula, the Uley Wanilla Basin has been in use since 1949, and the Lincoln Basin since 1960, to supplement surface supplies. Investigations are being made into the further development of the Lincoln Basin and into the use of the Poldia Basin near Lock.

Pastoralists, farmers, market gardeners and others have been assisted with expert advice on drilling, and the Government maintains and operates 30 drilling plants which to date have developed an underground water supply potential in excess of 140 million gallons of water a day throughout the State. The whole of the Murray River Basin has been examined critically to ascertain the extent of land which could be used for lucerne, and considerable tracts of previously undeveloped country in the upper south-east, Kangaroo Island and Yorke Peninsula have been found to have usable water and are now being opened up.

Groundwater resources surveys are undertaken continually by geologists of the Department of Mines, the results being published in various bulletins and reports issued from time to time. The *Groundwater Handbook* published in 1959 by the department provides a comprehensive detailed review of the State's groundwater resources.

5. **Farm Water Schemes.**—The Department of Mines gives assistance to individual farmers in the provision of supplies from underground sources, and the Department of Agriculture provides an advisory service on water conservation on farms. In addition, a great part of the farming areas is supplied with water under pressure from the extensive distribution systems connected to various reservoirs or the Murray River.

6. **South-Eastern Drainage.**—In the south-east of South Australia it has been necessary to construct costly drainage schemes to dispose of surplus water from areas where a series of valleys or flats is separated by low ranges, parallel to the coastline, which prevent natural drainage.

The Millicent Drainage System, completed in 1885, reclaimed 100,000 acres. The South-Eastern Drainage Area System, which is controlled by the South-Eastern Drainage Board, comprises drains constructed by the Government at national cost, plus those undertaken by the Government in co-operation with the landholders. The area is bounded on the east by the State boundary, and on the west by the sea coast. It extends from about 55 miles north of Kingston southerly to near Millicent and Kalangadoo. Up to 1948, about 430 miles of drains had been provided at a cost of £720,876. These were of a developmental nature intended more to promote the rapid removal of floodwaters than to provide a complete system of drainage. Since 1948, the complete drainage of the Biscuit, Reedy Creek and Avenue Flats in the Western Division has been in progress. The southern section of 260,000 acres, involving an excavation of 8,100,000 cubic yards, has been completed. Work is in progress on the northern section of 140,000 acres, where 31 miles of the main outlet drain, involving the excavation of nearly 2½ million cubic yards of material, have been completed. In addition, work is in hand for the drainage of 727,000 acres of land in the Eastern Division of the south-east, situated east of Bakers Range, and extending from near Kalangadoo to north of Naracoorte. As part of the first stage of the work (which involves the construction of a main diversion drain from Beachport to Struan), an existing drain from Beachport to Legges Lane (a distance of over 24 miles) is being enlarged, and 3,187,000 cubic yards of material have been excavated.

The capital cost of drainage in the South-Eastern Drainage Area System to 30th June, 1962, was £6,534,000, and the length of drains constructed was 730 miles.

## § 6. Western Australia

1. **General.**—(i) *Rainfall.* Brief particulars of the climatic conditions in Western Australia are given on page 1133 of Official Year Book No. 37. (See also Chapter II. Physiography, page 45, of this Year Book.)

(ii) *Administration.* Natural water rights in the State, with few exceptions, are vested in the Crown. Irrigation districts are administered by the Minister for Water Supply, Sewerage and Drainage under the *Rights in Water and Irrigation Act* 1914–1954, and he is advised by an Irrigation Commission representing the local irrigationists and governmental, technical and financial branches. Water supplies in country areas in Western Australia coming under the provisions of the *Water Boards Act* 1904–1954 and the *Country Areas Water Supply Act* 1947–1960 are controlled either by the local authority or by the Water Supply, Sewerage and Drainage Department. Those controlled by the Department (except for some local water supplies to country towns still under the provisions of the *Water Boards Act*) form the Country Areas Water Supply, consisting of the Goldfields and Agricultural Water Supply, the Great Southern Towns Water Supply and local water supplies to country towns and districts. The Department also controls individual water supplies serving isolated mines, stock routes, and agricultural areas.

2. **Irrigation.**—The main irrigation areas are situated along the South-Western Railway between the towns of Waroona (70 miles from Perth) and Dardanup (116 miles from Perth).

The Water Supply, Sewerage and Drainage Department controls three irrigation districts—Waroona, Harvey and Collie River—the total area irrigated in these districts during 1961–62 being 26,121 acres and the total water used 103,500 acre feet. Investigations are being carried out with a view to irrigating a further 30,000 acres south of the Collie River Irrigation District.

The Waroona Irrigation District (3,417 rated acres) is supplied from Samson Brook Dam (7,437 acre feet capacity) and Drakes Brook Dam (1,855 acre feet); the Harvey Irrigation District (14,369 rated acres) from Stirling Dam (46,191 acre feet) and the Harvey Weir (8,372 acre feet); and the Collie River Irrigation District (9,269 rated acres) from the Wellington Dam (150,107 acre feet). The Logue Brook Dam (19,246 acre feet) within the Harvey Irrigation District is currently under construction.

An area of approximately 650 acres of Gascoyne River flats adjacent to Carnarvon is under irrigated cultivation. The principal crops are bananas and beans, but others such as tomatoes are also grown. For this agriculture, some 130 acre feet of water a week are drawn from river underflow.

On the Liveringa flood plain, 65 miles south-east of Derby, commercial production of rice has been achieved following successful experimental work. Irrigation water from the Fitzroy River is diverted through Uralla Creek for 25 miles to the rice growing area where a natural storage of approximately 1,200 acre feet exists. During periods of low flow in the Fitzroy River, the supply of water is augmented by pumping. Further storage with a capacity of 4,500 acre feet has been provided by the construction of a dam on Uralla Creek 18 miles from the Fitzroy River. A weir which has been constructed across the Fitzroy River provides gravity flow to Uralla Creek while the Fitzroy River is flowing.

The Ord River in the Kimberley Division of Western Australia traverses a tropical area served with monsoonal rains of irregular incidence and quantity, varying from 20 inches in the south to 30 inches in the north. The hottest months (December to March) are also the months of highest rainfall. Communications and population are sparse. The Western Australian Government is considering a proposal to build a dam to conserve 3½ million acre feet of water, equipped with a hydro-electric plant, which might supply water for an area of some 200,000 acres agriculturally and topographically suitable for irrigation. Investigations show that the climate and soil conditions are suitable for the cultivation of sugar cane, rice, cotton, safflower and various oil seeds. The economic production of these and other crops, as well as the possible use of such irrigation areas for fattening cattle, is being examined at the Kimberley Research Station on the Ord River. Construction of a diversion dam at Bandicoot Bar, now in progress some 30 miles downstream from the main dam site, will enable a number of pilot irrigation farms to be established.

Particulars of the areas of crops and pastures irrigated in Western Australia in the years 1957-58 to 1961-62 are given in the table below.

#### AREA OF LAND IRRIGATED: WESTERN AUSTRALIA

(Acres)

Year	Vegetables	Fruit	Vineyards	Other crops (a)	Pastures	Total
1957-58.. ..	8,417	5,794	575	2,205	24,328	41,319
1958-59.. ..	8,211	6,850	630	3,429	24,982	44,102
1959-60.. ..	8,447	7,642	705	3,668	25,427	45,889
1960-61.. ..	9,076	8,335	897	5,591	24,652	48,551
1961-62.. ..	9,596	8,840	972	4,235	25,036	48,679

(a) Includes fodder and fallow land.

3. Water Supply Schemes.—(i) *Metropolitan*. Particulars relating to the Metropolitan Water Supply are given in Chapter XIX. Local Government.

(ii) *Goldfields and Agricultural Water Supply*. Western Australia has one of Australia's most spectacular water supply schemes, and a brief account of its development will be found on page 1134 of Official Year Book No. 37. Mundaring Reservoir on the Helena River, 26 miles from Perth, is the source of water supplied to the Eastern Goldfields and has a capacity of 62,435 acre feet and a catchment of 569 square miles. The water passes through 346 miles of main pipeline, mostly steel and 30 inches in diameter, equipped with eight pumping stations.

Maximum pumping capacity from Mundaring Pumping Station is 13.75 million gallons a day with provision to increase this to 18.5 million gallons a day. The total capacity of

all receiving, regulating, standby and service tanks along the main pipeline is 154 million gallons, which includes three standby reservoirs at Kalgoorlie having a combined capacity of 60 million gallons.

Hundreds of miles of branch pipelines have been laid to mining areas, agricultural areas and country towns, a notable one being the Norseman extension of 103 miles. The system serves some 82 towns and water is reticulated to 4,200,000 acres of mixed farming lands. The total length of pipelines is 3,727 miles and the number of services is 24,700. The total quantity of water pumped from Mundaring Reservoir in 1961-62 was 3,511 million gallons. The total cost of the scheme to the end of 1961-62 was £18,278,091, of which the Commonwealth Government contributed £3,570,278 under the terms of the Comprehensive Water Supply Scheme.

(iii) *Comprehensive Water Supply Scheme.* A comprehensive water supply scheme to supplement water supplies to the goldfields, agricultural areas, and country towns, authorized in 1947 as a joint work between the Commonwealth and State Governments, was completed towards the end of 1961. The northern section is an enlargement and extension of the Goldfields and Agricultural Water Supply. The southern section is the Great Southern Towns Water Supply. Linked with Wellington Dam (initially an irrigation work on the Collie River) by 80 miles of 30-inch diameter pipe through three pumping stations to Narrogin, it now supplements the existing water supplies to country towns along the Great Southern Railway, north to Brookton and south to Katanning. The raising of the impounding wall of Wellington Dam to increase its storage to about 150,100 acre feet was completed in 1960. Expenditure on the Scheme to 30th June, 1962, amounted to £10,214,496.

(iv) *Local Water Supplies.* Local schemes other than as above comprise those in the remaining agricultural and mining areas, including the North-west and Kimberley Divisions. Eighty-three separate reticulated water supplies serve country towns and districts. Of these, seventy-seven are controlled by the Water Supply, Sewerage and Drainage Department and the remainder by local authorities.

(v) *Commonwealth and State Government Railways.* Railways of the Commonwealth and State Governments make independent provision for supplies of water for their own purposes, although considerable additional quantities are consumed by the Railways from other sources, e.g., Public Works and Metropolitan Water Supply Departments.

(vi) *Catchments.* The water supplies to these country schemes come from stream flow, dams, tanks, wells and bores.

A total of 81 rated stream gauging stations is operating in the South-west, North-west and Kimberley Divisions. Three types of catchment peculiar to this State developed in connexion with local water supplies and deserving special mention are:—rock catchments, which consist mainly of clear granite out-cropping rock, from which the overall run-off from rain amounts to approximately 40 per cent.; bituminous catchments, which are areas which have been sealed with emulsified bitumen—some hundreds of acres have been so treated and yield a run-off of approximately 80 per cent. of the rainfall; and roaded catchments, where selected areas of a catchment are cleared, graded and formed into roads to assist in obtaining additional rainfall run-off.

4. *Underground Water.*—Individual farmers, orchardists, market gardeners and others pump groundwater from wells and bores, using windmills, engines or electric power. Water is also obtained from artesian and sub-artesian bores. Local artesian aquifers are utilized for town supplies at Perth, Bunbury and Busselton, while underground water is piped from the Wicherina Basin (in the Perth Basin) for the town supply at Geraldton. The Public Works Department hires out boring plants to local authorities who in turn hire them to farmers to assist their boring operations. In addition, the department operates its own boring plants and contracts with private firms in connexion with water supply works.

Considerable advances in the knowledge of aquifers and quality of water in the main sedimentary basins have been made as a result of the extensive geological surveys in connexion with oil exploration during the past ten years. The Geological Survey of Western Australia has established a Hydrological Division to investigate and advise on the underground water resources of the State. A detailed survey of the Perth Basin, extending from Northampton to Augusta, is in progress. The Mines Department Drilling Section, with its own plant and by separate contracts, drills the exploratory holes recommended by the Geological Survey.

## § 7. Tasmania

1. **General.**—(i) *Rainfall.* Brief particulars of the rainfall pattern in Tasmania are given on page 1136 of Official Year Book No. 37. (See also Chapter II. Physiography, page 45 of this Year Book.)

(ii) *Main Purposes of Conservation and Utilization.* Owing to the generally more adequate rainfall in Tasmania, scarcity of water is not such a problem as it is in most mainland areas, though not all streams are by any means permanently flowing. The only large scale conservation by reservoirs is for hydro-electric power generation, but there are some moderately sized dams built by mining and industrial interests, and by municipal authorities for town water supplies.

Until a few years ago, irrigated areas were negligible except for long-established hop fields, but there is a rapidly extending use of spray irrigation on orchards and pastures, and to some extent on potatoes and beans. Up to the present, there has been almost complete dependence on natural stream flows, but the need for some regulating storages is now apparent. A few farmers are constructing storages of their own, and the extension of this practice is foreseen as the logical solution in most areas, as valleys are narrow and steep sided. Single large reservoirs cannot economically serve large areas of suitable land, as nearly every valley is separated from others by pronounced hills, prohibiting the construction of cross-country channels.

Underground water is generally of poor quality through mineralization, but a small quantity, exploited to a minor degree by bores and pumps, exists over an area in the midlands, on the north-west coast and on King Island.

(iii) *Administration.* In 1962, a new authority, the Metropolitan Water Board, assumed control of water supplies to Hobart, Glenorchy, Kingborough and Clarence. Water supplies to other areas are primarily the responsibility of local councils, subject to approval of plans and finance by the Rivers and Water Supply Commission.

While the Commission does not own the waters of streams and lakes, it is empowered to take them, or issue licences, subject to pre-existing statute and common law rights. These include water reserved for specific industries, municipal requirements, and ordinary riparian rights. The Commission is also concerned with drainage trusts' operations, river improvement, including repairs after flood damage, and stream gauging.

2. **Hydro-electricity.\***—With the exception of a small diesel plant on King Island, electricity generation in Tasmania has resulted entirely from the development of its plentiful waters, and on a world basis this State ranks second to Norway in electricity consumption per head of population. The Hydro-Electric Commission, the authority controlling the generation of electricity in Tasmania, conducts a continuous survey of the water power resources of the State assisted by modern methods such as aerial photography and geo-physical exploration.

3. **Regional Water Schemes.**—Three regional water schemes are in operation. The first draws water from the east bank of the River Derwent at Lawitta to provide domestic and industrial supplies in five southern municipalities. A second, which increases existing supplies to Hobart, pumps water from the west bank of the River Derwent at Lawitta. In addition, the State government has constructed a regional water scheme to serve the aluminium refinery at Bell Bay on the River Tamar and to supply several municipalities with bulk water for domestic and industrial purposes.

Potential sources capable of greater development without storage exist on the Derwent, South Esk, Huon, Lake, Mersey and Forth Rivers. There is also a great reserve of untapped permanent streams in the western half of the State, which is largely unsettled. Diversion to the eastern half of the watersheds is not regarded as practicable.

4. **Industrial.**—Three principal industrial schemes have been installed privately. About 10 million gallons of water a day are being pumped from the Derwent River at Lawitta for use in a nearby paper mill. Another paper mill at Burnie uses several million gallons of water a day from the Emu River, and a factory at Heybridge reticulates water from Chasm Creek.

The State government has constructed some water schemes for use primarily for industrial purposes. The scheme serving the aluminium refinery at Bell Bay is referred to in para. 3 above. A new wood-pulping plant which will require several million gallons of

\* See also Chapter VII. Electric Power Generation and Distribution, p. 267.

water a day is being installed near Geeveston and, in order to supplement the summer flows of the Kermadie River for use by the industry, the State government in 1962, through the Hydro-Electric Commission, constructed a storage on Riley's Creek by means of a 37-foot high rock-fill dam.

5. **Irrigation.**—There are no State irrigation projects at present, but the Rivers and Water Supply Commission is investigating the possibility of establishing a storage for the Coal Valley. Preliminary investigations have also been made in the Jordan Valley. The *Water Act* 1957 provides for irrigation works to be undertaken by municipalities and by trusts constituted for the purpose, but no such works have been undertaken to date. All systems operating are privately owned, and with one exception (at Bushy Park) are single-farm units. At Bushy Park, a small system serves a group of properties. The larger proportion of the area under irrigation is watered by gravitational systems and the remainder comprises areas devoted to vegetables and served by municipal water supplies or private spray systems.

Details of the areas of crops and pastures irrigated in Tasmania in the years 1957–58 to 1961–62 are shown in the following table.

#### AREA OF LAND IRRIGATED: TASMANIA

(Acres)

Year	Vegetables	Fruit	Hops	Other crops (a)	Pastures	Total
1957–58.. ..	1,289	1,833	1,381	1,502	9,316	15,321
1958–59.. ..	1,386	1,737	1,292	1,514	7,502	13,431
1959–60.. ..	1,235	2,350	1,311	1,873	11,339	18,108
1960–61.. ..	2,103	3,311	1,364	1,787	10,369	18,934
1961–62.. ..	3,388	3,930	1,447	2,711	11,713	23,189

(a) Includes fodder and fallow land.

### § 8. Northern Territory

1. **Climate and Topography.**—Some particulars of the climate and main topographical features of the Northern Territory are given on page 1138 of Official Year Book No. 37, and in this issue information on climatic conditions will be found in Chapter II. Physiography, and a brief outline of contour and physical characteristics in Chapter V. The Territories of Australia.

2. **Administration.**—Under the *Control of Waters Ordinance* 1938–1961 of the Northern Territory, natural waters are vested in the Crown. Where a watercourse or lake forms a boundary of any land alienated by the Crown, the beds and banks are deemed to remain the property of the Crown (except in special cases) and diversion of water is prohibited except under prescribed conditions. There is a Water Resources Branch of the Northern Territory Administration under the control of a Director. The functions of the branch include systematic stream gauging, collection of data on surface and underground water supplies, planning of water use for irrigation and town water supplies, and flood prevention and control.

Another function of the branch, which is increasing in importance as it builds up a body of technical data and information about the Territory's water resources, is the dissemination of this knowledge by the provision of advice and assistance to professional drillers and to landholders for the development and improvement of water supplies on agricultural and pastoral leases.

3. **Underground Water.**—The marked seasonal rainfall over the whole of the Northern Territory is one of the basic factors affecting the pastoral industry, which provides the bulk of the Territory's income. The inadequacy of surface water during the dry season emphasizes the importance of underground water supplies in the Territory, where most of the cattle numbers are dependent on underground supplies for three to five months each year.

Rainfall is one of the factors controlling cattle numbers, but geological features, controlling both soils and the storage of underground water, are equally important. In the northern-most portion of the Territory, which receives from 25 to 60 inches of seasonal rainfall a year, surface water supplies are, in general, adequate for the pastoral industry. Despite this, however, this area has a comparatively low carrying capacity for cattle, and the pastoral industry is concentrated more in inland areas where feed retains more nutritive value in winter, despite dry conditions.

South from this well-watered northern-most portion, the Territory becomes progressively drier, with an average annual rainfall of only 5 inches at the margins of the Simpson Desert in the south-east corner. In the lower rainfall areas, the search for potable underground water becomes exacting, but in the Ord-Victoria region and the Barkly Tablelands, the best pastures are generally in areas where sub-surface conditions are suitable for the storage of underground water.

In the Ord-Victoria region, the best grass lands overlie volcanic rocks and extend over some 10,000 square miles. Groundwater is obtained in shallow bores averaging 70 to 80 feet in depth and producing small supplies which range up to 1,500 gallons an hour. For the most part, water is stored in joints, faults or cracks in the rocks, although in places sub-artesian conditions exist. On the whole, selection of bore sites is difficult. There are also small sedimentary basins in the region, some of which yield sub-artesian, and in places artesian, water and provide areas of good pastures.

The Barkly Tablelands, which extend into Western Queensland, overlie flat-lying limestone, sandstone and shale of the Barkly Basin. In most places, underground water is under pressure (sub-artesian), but no flowing bores are known. Sandstones and beds of limestone with fractures and solution cavities provide a number of aquifers within the Basin. The hydraulic surface (to which pressure water will rise in bores) ranges between 500 and 600 feet above sea level and adequate supplies for the watering of stock are available at depths ranging from 150 to 400 feet from the surface. The water from over 90 per cent. of the bores is suitable for stock and over 50 per cent. of it is suitable for human consumption. Investigations by the Commonwealth Bureau of Mineral Resources indicate that underground water supplies will be more than sufficient for the future development of the pastoral industry on the Tablelands.

In the Alice Springs district, valuable pastures occur on a great variety of rock types, and from some of these very little underground water is available. Many shallow bores obtain water from alluvium near stream channels. There are also many successful bores in porous sands and limestone in Mesozoic and Cainozoic sedimentary basins and in some Upper Proterozoic and Palaeozoic limestones and sandstones. Boring in the metamorphic rocks and granite of the basement has, on the whole, met with little success. In many areas, the underground water is of poor quality.

Considerable research has been undertaken in recent years into increasing the Alice Springs water supply from alluvial basins and provision of a water supply for the mining town of Tennant Creek from the Cabbage Gum Basin, a small basin of alluvium and deeply weathered Precambrian rocks, 15 miles south of the town.

Up to 30th June, 1962, 2,949 bores and wells had been registered in the Territory. Of these 1,917 were on pastoral properties, 74 on agricultural properties, 223 served town and domestic water supplies, 22 were located on mining fields, 80 were being used as test-bores and 378 were used by Defence Departments during World War II. The number of registered stock route bores established by the Government is 255.

**4. Irrigation.**—There are no large-scale water conservation projects in the Territory with the exception of the Manton Dam (12,700 acre feet), which serves Darwin with a reticulated supply. Some water is drawn from the rising main between the Manton Dam and Darwin for irrigation purposes, but the trend is for properties in this area to develop their own water supplies, either by boring or by pumping from watercourses or lakes. Investigations for a further dam site to augment Darwin's water supply and to provide reticulated water to properties without natural waters have commenced in the Berry Springs area. Hydrological investigations are being carried out by the Administration to determine the supply of water and the best methods of control and use in the potential rice-growing areas of the Territory. One hundred and thirty-three gauging stations were in operation in the Territory at 30th June, 1962, under the control of the Administration's Water Resources Branch. Of these, 81 are equipped with automatic water level recorders. The remaining 52 are staff gauges. Twenty-five gauging stations are for recording changes in water level only, one of these being the Darwin Harbour Tide gauge, which is operated on behalf of

the Harbour and Marine Branch. The other 24 gauges of this kind are scattered over the north sub-coastal plains and measure the depth of flooding over the plains. The information is required for future agricultural production in these areas, notably rice culture. Agricultural activity in the Territory is not extensive, being confined to the Darwin, Adelaide River, Coomalie Creek, Daly River, Katherine River and Alice Springs areas, with only small acreages being utilized.

The Katherine River appears to offer irrigation potentialities on the level soil below the township. Approximately 14 properties in and around Katherine are at present drawing water from the Katherine River for irrigation purposes, vegetables and pastures being the usual crops grown. The Katherine River passes through a gorge upstream of the town under conditions which appear suitable for dam construction. The Administration and the Commonwealth Scientific and Industrial Research Organization are investigating the potentialities of the Katherine area for agricultural production.

## § 9. Papua and New Guinea

1. **Rainfall.**—Rainfall in Papua and New Guinea varies considerably from approximately 250 inches near Lindenhafen (New Britain) and 230 inches at Kikori (Papua) to about 70 inches near Marienburg (New Guinea) and 40 inches at Port Moresby (Papua).

2. **General.**—For a general description of these territories *see* Chapter V. The Territories of Australia, page 140, of this Year Book. Irrigation has not been developed on any organized basis owing to the availability of high rainfall and the nature of agricultural development.

The Territory of Papua and New Guinea is well served with large rivers deriving their water from heavy tropical rains and high mountains which rise to over 14,000 feet. However, complete data regarding water resources are not available.

The largest rivers in the Territory include the Fly (a description of which is given in Chapter XXVI of Year Book No. 40), the Sepik (700 miles), the Ramu (450 miles), the Purari (300 miles) and the Markham (110 miles).

The main water conservation interest in New Guinea at present is the hydro-electric potential, which is extensive. An outline of schemes at present in operation is given in the previous chapter.

## CHAPTER IX

### POPULATION

Statistics in this chapter cover, in the main, the year 1961. More detailed figures will be found in the annual bulletin, *Demography*, and current statistics are published in the *Monthly Review of Business Statistics*, the *Quarterly Summary of Australian Statistics*, and the *Australian Demographic Review* (a mimeographed series issued at intervals throughout the year on population and vital statistics).

Statistics of the population of the principal countries and continental groupings of the world are set out in § 15.

#### § 1. Population Statistics

Population statistics for Australia or the component States and Territories at specific dates are of two types.

- (i) *Those ascertained by census enumeration.* These results attain a very high degree of accuracy and may generally be accepted without reservation.
- (ii) *Estimates derived by the application of vital and migration statistics to census data.* In general, three estimates are made for any specific date.
  - (a) Original estimates for dates subsequent to a census made before another census is taken. These estimates represent the population ascertained at the Census, plus natural increase and recorded net migration since the Census. As complete records of interstate migration are not available, the estimated State or Territory populations so derived are approximate, and are subject to revision when the actual population of each State or Territory is ascertained at the next Census. For some States, such revisions are substantial.
  - (b) Two-stage revision of the original estimates for each newly completed intercensal period to adjust for the difference between the new census result and the comparable estimate. This is to bring intercensal estimates into line with the two census populations and thus effect adjustment for unrecorded movement of population in the intercensal period. The first revision is reconciled with preliminary census results and the second revision with final census results.

Final revised figures become the permanent population estimates. For purposes requiring a mean population for any twelve-month period, such mean is calculated as described in § 4. As populations at specific dates are used in these calculations, consequential revisions are made in mean populations when the estimates for specific dates are revised as described above.

In accordance with this policy, all Australian population statistics shown in this issue of the Official Year Book for dates up to 30th June, 1961, and all mean populations for calendar years up to 1960 and financial years up to 1960-61 are final. Population statistics for dates or years subsequent to these will be revised in accordance with the results of the next Census.

Since the establishment of the Commonwealth Bureau of Census and Statistics, the populations of the States and Territories have been estimated in a comparable manner and attention has been given to the improvement of the basic data from which the estimates are compiled. The principal source of error in early estimates lay in the migration

records, both overseas and interstate, and post-censal revisions were made to these figures. With the improvement of records of overseas migration, however, such post-censal revision of the records of overseas migration was not found necessary after the 1933 Census. The same level of improvement has not been achieved in respect of records of interstate movement, which cover travel by sea, air, rail and some movements by road.

## § 2. The Census

1. *Census-taking.*—Although “musters” of the population were carried out at least annually from 1788 to 1825, the first regular census in Australia was not taken until 1828, when a count of the population of the Colony of New South Wales was made. Subsequent censuses were taken sporadically in the various colonies until 1881, when a census was taken on the same date throughout Australia.

In 1891 and 1901, census-taking was still in the hands of the Government Statisticians of the States, but, in 1911, under the provisions of the *Commonwealth Census and Statistics Act*, which provides for the enumeration to be made from one centre instead of by each State as formerly, the Commonwealth Statistician undertook the first Census of the Commonwealth of Australia. The second was taken in 1921, the third in 1933, the fourth in 1947, the fifth in 1954, and the sixth in 1961.

2. *Population recorded at Censuses.*—State and Territorial populations recorded at the Australia-wide censuses taken over the period 1881 to 1961 are shown in the following table. The figures relate to the political boundaries of the several States (or Colonies) and Territories as they existed at the date of each census, except that the Northern Territory has been shown separately from South Australia for the censuses prior to its transfer from that State. The years of formation of the separate Colonies and transfer of the Territories are shown in Chapter 1, § 3 and § 4. The total populations recorded at the censuses taken in the Colonies from 1828 to 1881 were shown in Official Year Book No. 40, page 326.

(a) Part of New South Wales prior to 1911.

The results of the 1961 Census of the Australian External Territories are shown in § 13 of this chapter and in some detail in an appendix to Chapter V. The Territories of Australia.

3. Increase since 1891 Census.—The increases in the populations of the several States and Territories and of Australia as a whole during the last seven intercensal periods are shown in the following table, which distinguishes the numerical increases, the proportional increases (which do not allow for the differences in the length of the intercensal periods) and the average annual rates of increase.

POPULATION: INTERCENSAL INCREASES  
(EXCLUDING FULL-BLOOD ABORIGINES)

State or Territory	1891-1901 (10 years)	1901-1911 (10 years)	1911-1921 (10 years)	1921-1933 (12½ years)	1933-1947 (14 years)	1947-1954 (7 years)	1954-1961 (7 years)

(a) Part of New South Wales prior to 1911. (b) Includes all defence personnel enlisted in Australia irrespective of movements subsequent to enlistment.

Estimates of population for intercensal years are obtained in the manner outlined in § 1.

The estimated population at 31st December each year from 1788 to 1946 was shown in *Demography*, Bulletin No. 67, 1949, and for the period 1881 to 1961 in *Demography* Bulletin No. 79. A graph illustrating the growth of the population of Australia and of each State and Territory appears on page 327.

2. **Proportion of Area and Population, Density and Masculinity.**—The previous table shows the estimated number of persons in each of the States and Territories at 31st December, 1962. In the following table, the proportions of the total area and of the total population represented by each State and Territory are given, together with the density and the masculinity of the population.

### DENSITY AND MASCULINITY OF POPULATION, 1962

(EXCLUDING FULL-BLOOD ABORIGINALS)

State or Territory	Proportion of total area (per cent.)	Proportion of estimated population, 31st December, 1962 (per cent.)			Density (a)	Masculinity (b)
		Males	Females	Persons		
New South Wales .. ..	10.42	36.96	37.36	37.16	12.98	100.68
Victoria .. ..	2.96	27.78	27.98	27.88	34.29	101.05
Queensland .. ..	22.45	14.48	14.20	14.34	2.32	103.81
South Australia .. ..	12.79	9.25	9.24	9.25	2.63	101.91
Western Australia .. ..	32.85	7.14	7.02	7.08	0.78	103.42
Tasmania .. ..	0.88	3.44	3.39	3.42	14.09	103.45
Northern Territory .. ..	17.62	0.29	0.20	0.24	0.05	150.66
Australian Capital Territory .. ..	0.03	0.66	0.61	0.63	73.29	109.98
Australia .. ..	100.00	100.00	100.00	100.00	3.64	101.78

(a) Number of persons per square mile.

(b) Number of males per 100 females.

Additional information regarding density and masculinity of population appears in later sections of this chapter.

3. **Urban and Rural Distribution.**—Particulars of the distribution of the population amongst metropolitan, other urban and rural areas in each State and Territory are available only from a census. The following table shows the distributions at the 1954 and 1961 Censuses. Corresponding details for previous censuses were shown in earlier issues of the Year Book.

Metropolitan Urban Divisions comprise the capital cities of the States and the City of Canberra, the National Capital, the boundaries of the metropolitan urban divisions being determined for Census purposes by the Statisticians of the States in collaboration with the Commonwealth Statistician, and include, together with the city proper, a number of adjacent municipalities and shires. In order to conform to the growth of the metropolitan urban population, the boundaries are reviewed at each Census and adjustments made, wherever necessary, to embrace contiguous urban areas that have developed since the previous Census. Amendments were made, prior to the Census of 1961, to the boundaries of the Metropolitan Urban Divisions of Victoria, Queensland and Tasmania.

Other Urban Divisions comprise (i) all separately incorporated municipalities (or cities, towns or boroughs) outside the Metropolitan Urban Division (including Darwin, the capital city of the Northern Territory) except for any municipality or part of a municipality which was specifically regarded as rural for Census purposes; and (ii) towns, not separately incorporated, with a population of 1,000 persons or more (750 persons in Tasmania).

Rural Divisions comprise the remaining portions of each State and Territory.

The term "Migratory" used in the following tables refers to persons not elsewhere enumerated who at midnight between 29th and 30th June, 1961, were on ships in Australian waters or were travelling on long-distance trains, motor coaches or aircraft.

Before comparisons are made between the populations of the metropolitan urban, other urban and rural divisions at various Censuses, consideration must be given to the changes which have taken place in the composition of these divisions from Census to Census. In the following table, the comparative figures for 1954 have been adjusted to the boundaries used in 1961.

**URBAN AND RURAL POPULATION(a): CENSUS, 30th JUNE, 1961**

(a) See letterpress preceding this table for definitions of urban, rural, etc., and for reference to the adjustments to 1954 Census figures in order to provide approximate comparisons on the 1961 Census basis.

NOTE.—Minus sign (—) denotes decrease.

A feature of the metropolitan population is its relatively higher femininity, but this has become less marked over the last 20 years owing to the excess of males in the high annual number of births and in the oversea migration flow in that period. In 1933, the masculinity ratio of metropolitan population was only 90.35 males per 100 females, but in succeeding Censuses the ratios have been: 1947, 92.76; 1954, 96.04; and 1961, 97.67. There is little difference in the ratios between the several metropolitan areas, the ratio of males per 100 females ranging from 95.39 in Perth (Western Australia) to 98.71 in Melbourne (Victoria).

4. Principal Urban Areas.—The following table shows the population of the principal cities and towns (population 6,000 or more) in each State and Territory of Australia at 30th June, 1962, or at 30th June, 1961, where later figures are not available.

### ESTIMATED POPULATION OF PRINCIPAL CITIES AND TOWNS: AUSTRALIA, 30th JUNE, 1962

(a) The only city or town is Canberra, the capital city of Australia, classed as metropolitan.

In the foregoing table, "Urban Areas" comprising two or more local government areas, or portions thereof, are treated as units. The "Urban Areas" so treated are: in New South Wales, Newcastle; in Victoria, Ballarat, Bendigo, Geelong, Latrobe Valley (Urban); in Western Australia, Kalgoorlie; and in Tasmania, Launceston. With the exception of Latrobe Valley (Urban), the areas in each instance are composed of the nucleus town and neighbouring local government areas, either in whole or in part, to form one continuous built-up area. In Latrobe Valley (Urban) there is no nucleus town, but all urban localities are closely associated with the development of the Latrobe Valley brown coal deposits.

A table showing similar data at the 1954 Census was given in Official Year Book No. 47, page 295 and at the 1947 Census in Official Year Book No. 40, page 334. Comparisons between these various tables can be made only if allowance is made for changes in the status and structure of local government areas and for changes in the manner of determining urban population at each Census.

6. **Principal Cities in the World.**—The following table shows the population of the world's largest cities at the latest available date.

## POPULATION OF THE WORLD'S LARGEST CITIES

## § 4. Mean Population

1. General.—Mean populations are calculated for twelve-month periods to provide a satisfactory average basis for calculations requiring allowance for the continuous change in population figures during such periods.

From 1901 onwards, the mean population for any year has been calculated by the formula:—

$$\text{Mean Population} = \frac{a + 4b + 2c + 4d + e}{12}$$

where *a*, *b*, *c*, *d* and *e*, respectively, are the populations at the end of the quarter immediately preceding the year and at the end of each of the four succeeding quarters; e.g., in the case

of a calendar year, 31st December of the preceding year and 31st March, 30th June, 30th September and 31st December of the year under consideration. This formula gives a close approximation to the mean of a theoretical population progressing smoothly through the five values *a*, *b*, *c*, *d*, *e*.

2. Results.—(i) *Calendar Years*. The following table shows the mean population of each State and Territory for the calendar years 1953 to 1962.

### § 5. Elements of Increase

1. General.—The two factors which contribute to the growth of a population are “natural increase”, i.e., the excess of births over deaths, and “net migration”, i.e., the excess of arrivals over departures. The “total increase” of the population is obtained by combining natural increase with the increase by net migration. However, comparison of the total increase so obtained with that derived by subtracting the population recorded at one Census from that recorded at the next Census reveals differences which can be attributed partly to differences in the coverage of the Census enumerations, and partly to deficiencies in the records of the elements of increase. The principal source of error in the elements of increase in earlier years lay in migration records, overseas as well as interstate, and adjustments were made to these records for the intercensal periods. With the gradual improvement of records of overseas migration it was considered that from July, 1933, it was no longer possible to attribute the much smaller differences for Australia as a whole solely to records of overseas migration, and since that date the differences, when ascertained for the intercensal period, have been shown as a separate item, with the elements of increase left as recorded. However, it has not been possible to effect a similar improvement in the records of interstate migration, and much of the intercensal differences for particular States may be attributed to deficiencies in this factor.

2. Elements of Increase, 1936-1962, Australia.—In the following table, particulars are given of the elements of increase for each five-year period from 1936 to 1960 and for each of the years 1958 to 1962. The numbers of males, females and persons are shown separately.

1962..	..	..	..	143,918	62,522	..	206,440

(a) Excess of births over deaths. For the period September, 1939, to June, 1947, deaths of defence personnel, whether overseas or in Australia, have been included. (b) Excess of arrivals over departures. Excludes troop movements for the period September, 1939, to June, 1947. (c) Adjustment of population on the basis of the final results of the 1947, 1954 and 1961 Censuses. For periods subsequent to the Census of 30th June, 1961, the intercensal adjustment will not be known until after the next Census has been taken.

3. Analysis of Intercensal Increase, 30th June, 1954, to 30th June, 1961.—In the following table, particulars are given for States and Territories of the recorded elements of increase and the intercensal adjustment for the whole of the seven-year intercensal period from 30th June, 1954, to 30th June, 1961.

As stated in § 1. of this chapter (*see* p. 303), complete records of interstate migration are not available. For this reason, the differences between the estimated populations and those recorded at the Census of 30th June, 1961, i.e., the intercensal adjustments, were substantial for some States.

(a) Census. (b) Excess of births over deaths. (c) Excess of arrivals over departures for recorded interstate and overseas migration. (d) Adjustment of population on the basis of the Census of 30th June, 1961.

**4. Rate of Population Growth.**—The annual percentage rate of population growth is computed by the compound interest formula. The formula is as follows:—

$$P_1 = P_0 (1 + r)^t$$

where  $P_0$  and  $P_1$  are the populations at the beginning and end of the period respectively,  $t$  is the number of years intervening and  $r$  is the annual rate of growth.

The annual rates of growth of population (per cent.) in Australia during each of the five yearly periods 1936–40 to 1956–60 and the years 1958–1962 are shown in the following table.

**POPULATION: RATE OF GROWTH, AUSTRALIA**  
(Per cent.)

Period	Annual rate of population growth(a)		
	Natural increase(b)	Net migration (c)	Total increase (d)
1936-40 .. .. .	0.79	0.13	0.94
1941-45 .. .. .	1.03	0.02	0.98
1946-50 .. .. .	1.39	0.93	2.26
1951-55 .. .. .	1.40	0.98	2.31
1956-60 .. .. .	1.41	0.86	2.22
1958.. .. .	1.42	0.67	2.09
1959.. .. .	1.38	0.77	2.15
1960.. .. .	1.40	0.89	2.27
1961.. .. .	1.45	0.59	2.04
1962.. .. .	1.36	0.59	1.95

(a) Annual rate representing increase during the period expressed as a proportion (per cent.) at the beginning of the period. (b) Excess of births over deaths. Excess of births over civilian deaths for the period September, 1939, to June, 1947. In calculation of these rates, the following deaths of defence personnel registered in civil registers, 1940, males 272, and 1941, males 418, have been included. (c) Excess of overseas arrivals over departures. (d) Total increase of natural and net migration, together with adjustments for differences disclosed by the results of population censuses up to 30th June, 1961.

The annual rate of population growth during the present century has been 1.71 per cent., but the results from year to year have deviated widely from this figure. In the following table, the period 1st January, 1901, to 31st December, 1962, has been arranged into certain defined groups of years according to the occurrence of influences markedly affecting the growth of population.

**POPULATION: PERIODICAL RATES OF GROWTH**

Period	Interval (years)	Total increase ('000)	Average annual numerical increase ('000)	Annual rate of population growth (per cent.)		
				Natural increase	Net migration	Total
1901 to 1913 .. ..	13	1,128	87	1.59	0.53	2.04
1914 to 1923 .. ..	10	862	86	1.50	0.15	1.64
1924 to 1929 .. ..	6	680	113	1.28	0.64	1.88
1930 to 1939(a) ..	10	569	57	0.82	0.03	0.85
1940 to 1946(a) ..	7	513	73	1.05	0.01	1.01
1947 to 1952(a) ..	6	1,222	204	1.41	1.23	2.54
1953 to 1962 .. ..	10	2,071	207	1.44	0.81	2.15

(a) For the period September, 1939, to June, 1947, overseas movements of Australian defence forces have been excluded and deaths of members of these forces, whether occurring in Australia or overseas, have been included.

Up to 1913, the rate of natural increase was rising, and this factor, coupled with the impetus given to immigration from 1911 onwards by increased governmental assistance, was responsible for the comparatively high annual rate of 2.04 per cent. during this period. The 1914-18 War was a dominating influence in the decade 1914-23, and its effects can be seen in the reduction of the rate from 2.04 to 1.64 per cent. From 1924 to 1929, more settled and prosperous conditions were experienced; encouraged migration was resumed on a large scale and, despite a further decline in the rate of natural increase owing to the persistent fall in the birth rate, the annual rate of growth rose to 1.88 per cent. After 1929 came the economic depression and immigration ceased—in fact, Australia actually lost people through an excess of departures over arrivals in 1930, 1931, 1932 and 1935. The rate of natural increase also fell, and the annual rate of growth of the population fell to 0.85

per cent. With the outbreak of war in 1939, Australia entered a new phase in her demographic history. The immediate effect of the war was to increase the number of marriages and to reverse the downward trend in fertility. The number of births increased each war year from 1940 to 1945, and these increases more than offset the rise in deaths due to war casualties and higher civilian death rates. As might be expected, migration over these years was negligible. The period 1947 to 1962 was marked by a continued high natural increase and a resumption of immigration, the latter resulting in very high net gains in each of the four years 1949 to 1952. The annual rate of growth for the period 1947 to 1952 was 2.54 per cent., and from 1953 to 1962 it was 2.15 per cent.

Rates of population growth from 1881 are shown for each State and Territory of Australia in the annual bulletin, *Demography*.

Estimated rates of growth of the population of Australia in comparison with those for other countries of the world for the years 1953–1960 are shown in the table in § 15. International Statistics of Population.

## § 6. Density

From certain aspects, population may be less significant in respect of its absolute amount than in its relation to the area of the country. Australia, with an area of 2,971,081 square miles and an estimated population at 31st December, 1962, of 10,810,371, excluding full-blood aborigines, has a density of only 3.64 persons to the square mile, and is, therefore, one of the most sparsely populated countries of the world. For other continents and sub-continents, the densities in 1960 were approximately as follows:—Europe (excluding U.S.S.R.), 223; Asia (excluding U.S.S.R.), 161; U.S.S.R., 25; Africa, 22; Northern and Middle America, 28; and South America, 20. The population density of Australia in 1960 was 3.5; about one-sixth of that of South America and of Africa; about one-seventh of that of U.S.S.R.; about one-eighth of that of Northern and Middle America; about one-forty-sixth of that of Asia (excluding U.S.S.R.); and about one sixty-fourth of that of Europe (excluding U.S.S.R.).

Because of the large area of Australia and the unsuitability for settlement of much of the country, the density of population must necessarily increase slowly. In Australia as a whole, the figure has increased from 1.29 per square mile in 1901 to 3.64 in 1962. The rise in density from 1901 to 1962 in each State and Territory was:—New South Wales 4.45 to 12.98, Victoria 13.77 to 34.29, Queensland 0.76 to 2.32, South Australia 0.95 to 2.63, Western Australia 0.20 to 0.78, Tasmania 6.68 to 14.09, Northern Territory 0.01 to 0.05, and Australian Capital Territory 2.05 (in 1911) to 73.29. When comparing the density of population of the several States, consideration should be given to the average annual rainfall distribution in each State as an indication of the climatic influence upon probable population numbers. The proportion of the area of Australia receiving less than 10 inches of rainfall is 38 per cent.; that of the various States is:—New South Wales, 20 per cent.; Victoria, nil; Queensland, 13 per cent.; South Australia, 83 per cent.; Western Australia, 58 per cent.; and Tasmania, nil.

The number and density of population of the principal countries and continental groups of the world are shown in the table in § 15. International Statistics of Population.

## § 7. General Characteristics

NOTE.—The total populations of the States and Territories and of Australia at the 1961 Census shown in this section are final totals, but the details of the various characteristics are subject to minor amendments as later tabulations are completed.

1. *Sex Distribution*.—The number of males to each hundred females has been adopted as a measure of the “masculinity” of the population. The masculinity of the population of each of the States may be obtained for each year from 1796 to 1900 from the table on pages 163–5 of Official Year Book No. 2 and for the years 1901 to 1910 from the table on page 123 of issue No. 5.

With the exception of some dislocation arising from the two World Wars, there was a continuous diminution of the masculinity of the population until 1945. This resulted from the increasing proportion of the population in the higher age groups, in which females preponderate owing to their greater longevity, and from the general long-term fall in the birth rate. At the 1947 Census, the numbers of the sexes were practically equal, but there has since been an increase in masculinity owing to the greater number of males as compared with females in net overseas migration, which offsets the femininity of natural increase.

The following table shows the masculinity of the population at ten-year intervals from 1900 to 1960 and for each of the years 1957 to 1962.

POPULATION: MASCULINITY, 1900 TO 1962  
(NUMBER OF MALES PER 100 FEMALES)

(a) At the 1954 and 1961 Censuses, unspecified ages were distributed over all ages prior to tabulation.

NOTE.—Minus sign (—) denotes decrease.

Of the 10,508,186 persons enumerated at the 1961 Census, 39.3 per cent. were under 21 years of age; 52.2 per cent. were 21 to 64 years; and 8.5 per cent. were aged 65 years and over. At the 1954 Census, 36.3 per cent. were under 21 years of age; 55.4 per cent. were 21-64 years; and 8.3 per cent. were aged 65 years and over.

(ii) *Proportional Distribution, Censuses, 1871 to 1961.* The next table shows the changes which have taken place in the age distribution of the population of Australia since 1871.

Total	..	..	..	..	..	5,402,432	5,302,689	10,705,121

(a) Based on the age distribution at the Census of 30th June, 1961 (adjusted only for "not stated" ages), and on subsequent births, recorded ages at death and recorded ages of migrants.

3. *Conjugal Condition.*—(i) *Censuses, 30th June, 1954 and 1961.* Of the total population of Australia at the 1961 Census, 48.0 per cent. were never married; 46.2 per cent. were married (including 1.4 per cent. married but permanently separated); 5.0 per cent. were widowed and 0.8 per cent. were divorced. Between 1954 and 1961, the number never married increased by 19.8 per cent.; those married (including permanently separated) by 14.8 per cent.; the widowed by 13.0 per cent. and the divorced by 18.7 per cent.

The ratio of widowed females to widowed males increased from 311 : 100 in 1954 to 352 : 100 in 1961. This disparity between the number of widowed males and widowed females is the result of two influences. The first is the greater longevity of females coupled with the usually younger age at marriage; and the second is that a larger proportion of males cancel their widowhood by remarriage.

The ratio of males to females in the never married group "15 years of age and over" increased from 141 : 100 in 1954 to 143 : 100 in 1961.

The numbers of males, females and persons recorded at the Censuses of 30th June, 1954 and 1961, are shown in the following table according to their conjugal condition.

**POPULATION: CONJUGAL CONDITION, AUSTRALIA, 1954 AND 1961**

4. *Birthplace.*—(i) *Censuses, 30th June, 1954 and 1961.* At 30th June, 1961, the Australian-born element of the population of Australia represented 83.1 per cent. as compared with 85.7 per cent. at the 1954 Census. The number of Australian-born increased by 1,028,950 or 13.4 per cent. between 1954 and 1961, while the oversea-born population increased by 492,706 or 38.3 per cent. The latter resulted mainly from the increase of 441,203 in the number of persons of European birthplace between 1954 and 1961—principally persons born in Italy (an increase of 107,792); United Kingdom and Republic of Ireland (91,371); Greece (51,494); and the Netherlands (50,143).

Of persons born outside Australia, 55.5 per cent. were males and 44.5 per cent. females.

The following table shows the birthplaces of the population recorded at the Census of 30th June, 1961, as compared with the Census of 30th June, 1954.

(a) All persons of individual citizenship status who, by virtue of the *Nationality and Citizenship Act 1948*, are deemed to be British subjects. Includes naturalized British. For purposes of this table Irish nationality is included with British.

7. Religion.—(i) *Censuses, 30th June, 1954 and 1961.* At the 1921 Census, 92,258 persons in Australia, or 1.7 per cent., gave no reply to this question, but at the Censuses of 1933, 1947, 1954 and 1961, when the public was informed that there was no legal obligation to answer this question, 848,948 persons (12.8 per cent.), 824,824 (10.9 per cent.), 855,819 (9.5 per cent.) and 1,102,930 (10.5 per cent.) respectively, gave no reply. Of males 11.2 per cent., and of females 9.8 per cent., did not state their religion in 1961.

Amongst the denominations with the larger numbers of adherents, the greatest proportional increase since 1954 was recorded by Roman Catholic and Catholic combined, 27.1 per cent.; then Presbyterian, 12.2 per cent.; Methodist, 10.1 per cent.; Church of England, 7.6 per cent. The largest proportional increase was that of the Greek Orthodox denomination, 107.3 per cent.

At the 1961 Census, as at earlier censuses, 99 per cent. of those who stated their religion professed the Christian faith. Between 1954 and 1961 the number who stated they were of non-Christian religion increased by 26 per cent., while those specifically stating they had no religion increased by 59 per cent.

The following table shows the number of adherents of the various religions as recorded at the Censuses of 30th June, 1954, and 30th June, 1961.

8. *Industry.*—The following table shows the main groups of industry for the male and female population of Australia at 30th June, 1961, compared with 1954. For industry groups Finance and Property, Public Authority (n.e.i.) and Defence Services, and Community and Business Services (including Professional), the figures derived from the 1954 classification have been adjusted to the classification used in 1961.

Persons usually engaged in industry are regarded as being “in the work force”, while the remainder of the population, which at the 1961 Census comprised 6,283,255 persons, is classified as not being in the work force. The term “in the work force” includes persons of all ages who are employees, self-employed or working on their own account, wage and salary earners, unpaid helpers engaged in industry, and those who usually work for a living but have lost their jobs.

# POPULATION OF AUSTRALIA, 1788 TO 1962

30<sup>TH</sup>. JUNE, 1961

## WORK FORCE

PERSONS IN WORK FORCE 4,224,931

# OVERSEA ARRIVALS AND DEPARTURES AUSTRALIA, 1925 TO 1962

Persons who do not earn their living by doing work for monetary reward, such as children, housewives, full-time students, retired persons, pensioners and inmates of institutions (excluding temporary inmates of hospitals and members of religious orders) are regarded as not being in the work force.

(i) *Censuses, 30th June, 1954 and 1961.* At the 1961 Census, 60 in every 100 of the male population and 20 in every 100 of the female population were in the work force.

Of the males in the work force, those engaged in manufacturing represented the largest proportion, namely 28.0 per cent.; followed next in order by those in Commerce, 14.3 per cent.; Primary Production, 13.3 per cent.; Building and Construction, 11.5 per cent.; and Transport and Storage and Communication, 10.3 per cent.

As with males, females in the work force were engaged mainly in Manufacturing, 23.9 per cent.; followed next in order by those in Commerce, 22.2 per cent.; Community and Business Services, 21.5 per cent.; and Amusement, Hotels and Other Accommodation, Cafés, Personal Service, etc., 12.8 per cent.

(a) Includes police, fire brigades, hospitals, medical and dental services, education, and business services such as consultant engineering and surveying, accountancy and auditing, industrial and trade associations, advertising, etc.

**9. Occupational Status.**—(i) *Censuses, 30th June, 1954 and 1961.* The term "occupational status" relates to the capacity in which persons are engaged in the various branches of industry.

Of those persons in the work force at 30th June, 1961, 79.3 per cent. were employees; 9.8 per cent. were self-employed and 6.3 per cent. were employers, compared with 79.9 per cent.; 11.1 per cent.; and 6.8 per cent. respectively in 1954.

There was a higher percentage of dependent population (i.e. persons not in the work force) to total population in 1961 (59.8 per cent.) than in 1954 (58.8 per cent.). The increase since 1954 in the number of persons not in the work force (18.9 per cent.) was greater than the increase in the work force (14.1 per cent.).

The following table shows the occupational status of the population at the Census of 30th June, 1961, as compared with the 1954 Census.

**POPULATION: OCCUPATIONAL STATUS, AUSTRALIA, 1954 AND 1961**

(a) On wage or salary. (b) Not on wage or salary. (c) The category "Not at work" includes those who stated that they were usually engaged in work, but were not actively seeking a job at the time of the Census by reason of sickness, accident, etc., or because they were on strike, changing jobs, or temporarily laid off, etc. It includes also persons able and willing to work but unable to secure employment, as well as casual and seasonal workers not actually in a job at the time of the Census. The numbers shown as "Not at work", therefore, do not represent the number of unemployed available for work and unable to obtain it. (d) In processing the 1961 Census data, an occupational status was allocated prior to tabulation in all instances where this information was not stated.

NOTE.—Minus sign (—) denotes decrease.

(ii) *States and Territories, Census, 30th June, 1961.* The following table shows particulars of the occupational status of the population of each State and Territory at the 1961 Census.

(c) The category "Not at Work" includes those who stated that they were usually engaged in work but were not actively seeking a job at the time of the Census by reason of sickness, accident, etc., or because they were on strike, changing jobs or temporarily laid off, etc. It includes also persons able and willing to work but unable to secure employment, as well as casual and seasonal workers not actually in a job at the time of the Census. The numbers shown as "Not at Work", therefore, do not represent the number of unemployed available for work and unable to obtain it.

10. *Other General Characteristics.*—In addition to the questions asked at the 1961 Census on the foregoing characteristics, a question on race was asked. The information supplied in reply to this question has not yet been tabulated.

For information supplied at the 1961 Census in answer to questions asked on dwellings and householders see Chapter XI. Housing and Building.

NOTE.—The density and distribution, age distribution, birthplaces and industry of the population at the 1961 Census are shown in graphs on pp. 328-31.

### § 8. Oversea Arrivals and Departures

1. Oversea Arrivals and Departures since 1936.—Earlier issues of the Official Year Book contain, in summary form, tables showing the increase of population by net migration from 1861 to the latest date, while information for individual years from 1881 is published in the annual bulletin, *Demography*. The following table shows, for Australia, arrivals and departures since 1936, and refers to total movement irrespective of length of stay. A graph showing arrivals and departures from 1921 to 1962 appears on page 332.

#### OVERSEA ARRIVALS AND DEPARTURES: AUSTRALIA

(a) Excludes movements of defence personnel from September, 1939, to June, 1947.

2. Excess of Arrivals over Departures.—(i) *General*. The excess of total overseas arrivals over total departures is one of the elements of population increase taken into account in preparing the estimated population for other than census dates (see § 5 of this chapter, pp. 313-4). It is necessary to use statistics of total overseas arrivals and departures for this purpose, because Australian population statistics relate to the total population present in Australia at the date of the census or estimate, and not the population normally resident in Australia (which would include those temporarily overseas and exclude those temporarily visiting Australia). In the following paragraphs are set out particulars of the net gain or loss of population due to overseas migration, according to age and conjugal condition and country of birthplace, during the years 1960 to 1962.

(ii) *Age Distribution and Conjugal Condition*. The net gain to the population of Australia due to total migration movement during the years 1960, 1961 and 1962, according to age and conjugal condition, was as follows.

#### EXCESS OF ARRIVALS OVER DEPARTURES: AGE DISTRIBUTION AND CONJUGAL CONDITION, AUSTRALIA, 1960 TO 1962

3. **Stated Purpose of Travel.**—Since 1st July, 1924, overseas travellers have been classified according to declared intention in regard to residence into two principal categories, distinguishing movements for short terms from movements for longer periods (including permanently). Prior to 1957, these categories were *temporary* and *permanent*. Thereafter they were changed to *short-term* and *permanent and long-term*, but the basis of classification was not changed and the figures are directly comparable for the whole period. For short-term movements, overseas visitors and Australian residents have been identified separately.

Revised questions for travellers were introduced in mid-1958, and these enabled the separation, from 1st January, 1959, of permanent from other long-term movements and also the identification of former settlers departing among the permanent departures.

The principal categories of travellers according to stated purpose of travel are as follows:—

*Permanent movement*—consisting of persons arriving with stated intent to settle permanently in Australia, and Australian residents departing with stated intent to reside permanently abroad;

*Long-term movement*—consisting of the arrival of visitors and the departure of residents with stated intent to stay (in Australia or in a country abroad respectively) for twelve months or more; and departure of visitors and return of residents who have stayed (in Australia or in a country abroad respectively) for twelve months or more;

*Short-term movement*—consisting of all other movements, including the movement of Australian troops irrespective of period of stay (air crew and ships' crew are excluded);

*Settlers*—i.e. persons who, on arrival in Australia, indicated that they came intending to settle, and *Former Settlers*—i.e. persons who, on departure from Australia, stated that they had come to Australia intending to settle, had stayed for a period of twelve months or more and were now departing permanently.\*

\* Included in *Permanent movement* above.

This classification is based on the purpose of travel stated by travellers on arrival in, or departure from, Australia. These statements represent the traveller's intention at that time. Many travellers subsequently change their intentions, and this must be borne in mind in interpreting the statistics.

The numbers so classified since 1st January, 1936, on the basis of declared intention as to residence, and since 1st January, 1959, on this basis supplemented by additional particulars as to stated purpose of travel, are as follows.

5. **Other Oversea Movement Statistics.**—More detailed statistics of oversea arrivals and departures, covering country of residence, country of embarkation/intended disembarkation, mode of travel, month of arrival or departure, short-term movements, etc., are shown in the tables of Section II. "Oversea Arrivals and Departures" of the annual bulletin, *Demography*.

### § 9. Assisted Migration into Australia

1. **General.**—In the following table particulars are shown of the total numbers of persons who were assisted to come to Australia by the Australian Government under all assisted passage schemes during the period 1936 to 1962.

#### "ASSISTED" MIGRATION: AUSTRALIA

Period							Nominated and selected (assisted) arrivals
1936-40	..	..	..	..	..	..	3,828
1941-45	..	..	..	..	..	..	..

1956-60	..	..	..	..	..	..	305,517
1958 ..	..	..	..	..	..	..	55,799
1959 ..	..	..	..	..	..	..	64,146
1960 ..	..	..	..	..	..	..	68,254
1961 ..	..	..	..	..	..	..	55,685
1962 ..	..	..	..	..	..	..	45,276

2. *Joint Commonwealth and States Scheme.*—Details of the joint scheme of assisted immigration arrived at by agreement between the Commonwealth and State Governments, which operated from 1920 to 1939, were published in earlier issues of the Official Year Book (see No. 38, p. 576). After the outbreak of hostilities in 1939, it was decided to discontinue the grant of assisted passages for the duration of the war.

3. *Migration from Britain.*—(i) *General.* Resumption of migration was the subject of negotiations between the Commonwealth and British Governments towards the end of 1945, and two agreements were signed in March, 1946. These agreements, which came into operation on 31st March, 1947, provided for free and assisted passages to be granted to British residents desirous of settling in Australia. The Free Passage Agreement, which applied to British ex-servicemen and their dependants, was terminated on 28th February, 1955. From 1st April, 1949, the Assisted Passage Agreement continued in operation under renewal from time to time and was again renewed as from 1st April, 1962.

(ii) *Assisted Passages.* Under the existing financial arrangements, the British Government's contribution towards the Assisted Passage Scheme is agreed upon when the agreement is extended, and for the five years from 1st April, 1962, was fixed at a maximum amount of £150,000 sterling a year.

The Assisted Passage Agreement covers five main groups of migrants (and their families), namely, personal nominees, group nominees, Commonwealth nominees, "Bring out a Briton" campaign families, and unnominated migrants. *Personal nominees* are migrants sponsored by residents of Australia able to provide suitable accommodation for them (any adult resident of Australia may nominate friends or relatives in Britain who are eligible to be considered for assisted passages under this agreement). *Group nominees* are recruited on a trade-qualification basis to meet applications lodged by employers and State Governments, who undertake to provide employment and accommodation for those selected. *Commonwealth nominees* comprise workers selected against known and assessed employment demands in Australia. Migrants in this group can live in hostels established by the Commonwealth Government for up to two years while they are seeking to obtain private accommodation. The Commonwealth nominee scheme was introduced in 1950 in order to reinforce the personal and group nomination schemes. "Bring out a Briton" campaign families are selected to fill employment and accommodation vacancies located by special voluntary committees formed by community effort to stimulate the flow of British migrants who are otherwise unable to obtain sponsorship. *Unnominated migrants* may also be granted assisted passages, even though they are unable to arrange personal nominations and are not occupationally qualified for approval under other existing assisted passage selection schemes. Unnominated families must possess a minimum of £500 sterling for transfer to Australia. Unnominated single persons must possess £25 sterling, and married couples without children £50 sterling. The unnominated categories must be prepared to make their own accommodation arrangements after arrival.

Although the Commonwealth is not generally prepared to accept single persons or married persons without children if they have reached their forty-sixth birthday before the date of sailing, the parents or close relatives of intending migrants or of persons established in Australia may, if otherwise acceptable under the scheme, be granted passages irrespective of age. Each migrant of 19 years of age and over is required to contribute £10 sterling towards the cost of his or her passage, while persons under 19 years travel free. Apart from this contribution and that made annually by the British Government, the cost of the passages is borne by the Commonwealth Government.

(iii) *Number of Arrivals.* The numbers of British migrants who came to Australia under the Free and Assisted Passage Agreement during the years January, 1947, to June, 1962, are given in the following table, according to the State of proposed destination.

**UNITED KINGDOM FREE AND ASSISTED PASSAGE AGREEMENT: NUMBER OF MIGRANTS(a)**

(a) Includes child migrants as shown in para. 4 (iii) below.

(b) See text, p. 343, for explanation.

**4. Child Migration from Britain.**—(i) *General.* Since the commencement of the assisted passage schemes in 1947, the migration of unaccompanied children and youths from Britain has been encouraged under the auspices of approved voluntary organizations. The organizations at present introducing child migrants include the Fairbridge Farm Schools, Dr. Barnardo's Homes, the Big Brother Movements of New South Wales and Tasmania, and the Northcote Children's Emigration Fund. All the principal religious denominations are also participating in the scheme. There are 34 approved homes in Australia for the care of child migrants. There is also a growing interest in the Family Schemes operated by the Fairbridge Society and the Northcote Children's Farm School. Children of school age may be accepted under the Fairbridge Scheme by schools at Molong (New South Wales) and at Pinjarra (Western Australia) and, by arrangement with the Northcote Trust, at the Northcote Farm School near Bacchus Marsh (Victoria). Children with only one parent living may be accommodated at the St. John's Home for Boys and Girls at Canterbury (Victoria) conducted by the Church of England, and at Draper's Hall, Adelaide. Maintenance payments for these children vary within each State.

(ii) *Financial Assistance.* The British Government contributes £A. 15s. a week for each child, and in addition, the respective State Governments contribute amounts varying from 7s. a week in New South Wales to 16s. in Western Australia. The Commonwealth Government pays the normal child endowment of 10s. a week. In addition, the Commonwealth Government and the State Government concerned have contributed towards the capital expenditure on accommodation for child migrants.

(iii) *Number of Arrivals.* From the beginning of 1947 to 30th June, 1962, a total of 6,301 British children and youths arrived under the sponsorship of voluntary organizations. New South Wales took 3,961, Western Australia 1,345, Victoria 554, and the other three States 441. These children were brought to Australia under the United Kingdom Free and Assisted Passage Scheme and are included in the figures shown in the table above.

**5. Maltese Migration.**—On 31st May, 1948, the Commonwealth Government and the Government of Malta entered into an agreement under which both Governments grant financial assistance towards the passage costs of selected Maltese migrants. The Commonwealth contribution is £30 sterling per adult, with proportionate amounts for children, and the Government of Malta contributes an amount at least equal to this sum. This agreement has been extended from time to time. On 13th August, 1957, a new agreement, which was acknowledged to have come into effect as from 1st July, 1956, was signed between the two governments. This agreement has been extended by exchange of letters and is currently operative till 30th June, 1963.

From its inception until 30th June, 1962, a total of 27,443 Maltese had arrived under this scheme. Up to the end of June, 1962, 248 Maltese children had been brought out to approved institutions in Australia. These are included in the number shown above.

6. **Netherlands Migration.**—A migration agreement outlining the terms and conditions under which Netherlands nationals may be selected in the Netherlands and assisted with their passage costs to enable them to settle in Australia was concluded between the Commonwealth and Netherlands Governments in February, 1951, and came into operation on 1st April of that year. The agreement was extended for a period of 5 years as from 1st April, 1956, and subsequently until 1st April, 1963. This superseded an earlier arrangement in 1946, between the Commonwealth and the Netherlands Emigration Foundation (*see* Official Year Book No. 39, p. 567).

The migrant is required to contribute towards his passage costs in accordance with a formula devised by the Netherlands Government. The balance is met by the Commonwealth and Netherlands Governments and the Intergovernmental Committee for European Migration. The Commonwealth Government's contribution is now equivalent to \$118 a head.

The provision of shipping is the responsibility of the Netherlands Government. The Commonwealth arranges for the reception of migrants and their after-care and assists in the securing of employment. Families who have not obtained private accommodation prior to arrival may be temporarily accommodated in an Immigration Centre. When the breadwinner is placed in employment, he proceeds either to employer-found accommodation or to a Commonwealth Hostel. These arrangements continue until the family can secure its own accommodation, or vacancies enable a family to be united in a hostel.

Up to the end of June, 1962, 64,297 Dutch migrants had settled here under the Netherlands-Australia Migration Agreement.

7. **Italian Migration.**—On 29th March, 1951, the Commonwealth and Italian Governments entered into a migration agreement effective for a period of 5 years, under which certain selected Italian migrants were assisted to Australia. The agreement came into force on 1st August, 1951.

The agreement was temporarily suspended at the end of 1952, but in March, 1954, provision was made for assisted passages to be granted to certain relatives and fiancées of migrants who had previously settled in Australia under the agreement. On 1st December, 1954, the agreement proper was re-opened and was extended to 31st July, 1959. It has since been further extended to 31st January, 1963. At present, the Commonwealth contributes the equivalent of \$100 towards the fare of each migrant. The balance of passage costs is contributed by the migrants themselves, the Italian Government, and the Intergovernmental Committee for European Migration. Up to 30th June, 1962, arrivals under this agreement totalled 45,193 persons.

8. **German Migration.**—On 29th August, 1952, a migration agreement was signed between the Commonwealth Government and the Government of the Federal Republic of Germany. This was somewhat similar to the agreements concluded with the Netherlands and Italy and was effective for a period of 5 years. The agreement was renewed on 27th August, 1958, to be effective from 29th August, 1957. The Commonwealth Government's contribution towards passage costs is the equivalent of \$100 a head. The migrants may be required to pay a small contribution, and the balance of passage costs is paid by the Intergovernmental Committee for European Migration. The ICEM payment is derived in part from a lump sum contribution which the Government of the Federal Republic of Germany makes annually to the Committee. Arrivals of German assisted migrants numbered 67,847 to the end of June, 1962.

9. **Austrian Migration.**—Late in 1952, arrangements were made with the Intergovernmental Committee for European Migration for the migration to Australia of a small number of selected rural and other workers and their families from Austria. Later, these arrangements were extended to cover greater numbers and wider categories of migrants. The Commonwealth contributes an amount equivalent to \$100 a head towards the passage costs of Austrian migrants. The Austrian Government, the Intergovernmental Committee for European Migration and the migrants themselves also contribute towards passage costs. Reception arrangements, temporary accommodation, after-care and placement in employment are undertaken by the Commonwealth. Under these arrangements, 16,750 Austrians arrived in Australia up to 30th June, 1962.

**10. Greek Migration.**—An arrangement similar to the Austrian one was made with the Intergovernmental Committee for European Migration late in 1952. The Commonwealth's contribution and the arrangements for reception, accommodation, employment and after-care are the same as for Austrian migrants. Under this arrangement, 31,557 Greek assisted migrants had settled in Australia up to 30th June, 1962.

**11. Refugee Migration.**—On 21st July, 1947, the Commonwealth Government entered into an agreement with the International Refugee Organization to settle displaced persons in Australia. Although the International Refugee Organization concluded its activities in 1951, the Commonwealth agreed to receive those displaced persons already accepted for migration, but whose passages had still to be arranged. A total of 170,700 persons settled in Australia under this scheme. Following the cessation of the Displaced Persons Scheme in 1951, Australia has accepted for permanent resettlement under assisted passage arrangements 30,796 refugees of European origin to 30th June, 1962. Included in this figure are 14,060 Hungarians who have been granted asylum in Australia since the uprising in October, 1956. The Commonwealth Government granted a total of £A. 130,000 for the relief of Hungarian refugees and, in addition, contributed the equivalent of \$100 a head to the passage costs of those refugees who were granted assisted passages.

Australia continues to accept refugees under assisted passage and full-fare arrangements. In recent years, a special assisted passage quota has been established with application mainly in Italy and Austria. In the post-war period to 30th June, 1962, 201,496 refugees arrived as assisted passage and 65,701 as full-fare migrants.

**12. General Assisted Passage Scheme.**—To encourage the migration of persons from the United States of America, Switzerland, Denmark, Norway, Sweden and Finland, the Commonwealth Government on 10th September, 1954, introduced an assisted passage scheme for nationals of these countries. Later, the scheme was extended to cover certain British subjects living in a number of countries other than the United Kingdom and to nationals of Eire, Belgium and France. (As from 1st February, 1961, new arrangements have operated for Belgium. See para. 14 following.) Up to 31st December, 1958, the Commonwealth made a contribution of £37 10s. sterling per adult and *pro rata* amounts for children according to the fare paid, but this was increased to £57 2s. 10d. sterling (\$160) per adult and *pro rata* for children in respect of migrants approved on and after 1st January, 1959. To the end of June, 1962, 18,314 migrants had arrived in Australia under this scheme.

**13. Spanish Migration.**—Negotiations were completed in 1958 with the Spanish Government and the Intergovernmental Committee for European Migration under which selected rural workers suitable for sugar-cane cutting were offered assisted passages to Australia. Later this arrangement was extended to include other occupational groups.

The Commonwealth contributes £A. 44 12s. 9d. (\$100) towards the passage costs of each approved migrant, while the Spanish Government, the migrant, and the Intergovernmental Committee for European Migration contribute the balance.

Reception arrangements, temporary accommodation and initial placement in employment are the responsibility of the Commonwealth. Under these arrangements 3,554 Spanish nationals arrived in Australia up to 30th June, 1962.

**14. Belgian Migration.**—On 1st February, the General Assisted Passage Scheme, which had covered Belgian nationals, ceased to operate in Belgium, and arrangements similar to those operating in Greece and Austria were introduced, following negotiations with the Belgian Government and with the Intergovernmental Committee for European Migration.

The Commonwealth contribution and the arrangements for reception, accommodation, employment and after-care are the same as for Austrian migrants. Under these arrangements, 738 Belgian assisted migrants arrived in Australia up to 30th June, 1962.

**15. Other Assisted Migration Schemes.**—The Displaced Persons Scheme, the Empire and Allied Ex-Servicemen's Scheme, the Triestian Scheme and the Eire Assisted Passage Scheme have now lapsed. Details of these schemes were published in earlier issues of the Official Year Book (see No. 47, p. 320).

16. *Summary of Arrivals of Assisted Migrants.*—The following table shows the number of assisted migrants who arrived in Australia in each of the last five financial years and since January, 1947.

## ARRIVALS UNDER ASSISTED MIGRATION SCHEMES

Assisted migration scheme	1957-58	1958-59	1959-60	1960-61	1961-62	January, 1947 to June, 1962
Austrian .. .. .	1,007	1,289	1,841	1,494	227	16,750
Belgian .. .. .	..	..	..	232	506	738

United Kingdom .. .. .	29,969	28,506	33,897	34,700	27,070	427,938
Other schemes .. .. .	376	623	406	323	..	28,098
<b>Total .. .. .</b>	<b>54,659</b>	<b>58,020</b>	<b>69,317</b>	<b>66,996</b>	<b>42,062</b>	<b>933,225</b>

(a) Mostly Scandinavians, U.S. Americans and British nationals from countries other than the United Kingdom.

NOTE.—(i) All arrivals indicated in this table have obtained some financial assistance from the Australian Government towards payment of their passage money. Transport to Australia for the migrants concerned has been arranged on (1) ships under charter to the Department of Immigration, (2) ships and aircraft under charter to the Intergovernmental Committee for European Migration and (3) normal commercial shipping and airlines.

(ii) The arrivals under these schemes include a small number of nationals of countries other than those referred to, and stateless persons.

## § 10. The Regulation of Immigration into Australia

1. *Powers and Legislation of the Commonwealth.*—(i) *Constitutional.* Under section 51 (xxvii.) and (xxviii.) of the Commonwealth Constitution, the Parliament of the Commonwealth is empowered to make laws with respect to immigration, emigration, aliens and the influx of criminals.

(ii) *Legislation.* Immigration into the Commonwealth is regulated by the *Migration Act 1958* which came into force on 1st June, 1959, and repealed the *Immigration Act 1901-1949* and *Aliens Deportation Act 1948*.

Any immigrant entering Australia after the commencement of the Act without having been granted an "entry permit" and without being within an exempted class, is a prohibited immigrant. Exempted persons include diplomatic, consular and trade representatives of other countries and seamen whose ships are in Australian ports. "Immigrant" includes persons entering for temporary stay.

Entry permits are normally granted at ports of entry by means of stamps in travellers' passports or equivalent documents, without any form of application having to be completed. Temporary entry permits are granted to persons who have been authorized to enter for a limited period only. Persons eligible to enter for permanent residence are granted permits of unrestricted validity. Persons who are refused entry permits must be kept on board the ship on which they arrive; otherwise, the shipping company is liable to a fine of £500.

The Act abolishes the " Dictation Test " as a means of excluding or deporting ineligible persons. Other deportation powers which were contained in the repealed legislation were largely re-enacted, though with some revision.

The Act also revises the law relating to the emigration of aborigines and children, repealing the *Emigration Act* 1910.

The new Act does *not* affect passport or visa requirements for entry to Australia. All persons who, prior to the 1958 Act, had been required before embarkation to obtain visas, or other kinds of provisional authority to proceed to Australia, still have to obtain them. Likewise, persons who did *not* have to produce authority to enter Australia, before being given passages to Australia, do *not* have to obtain them solely as a result of the new Act. Persons previously allowed to enter Australia without production of passports—notably British people arriving from New Zealand—are still able to do so.

The *Immigration (Guardianship of Children) Act* 1946–1952 provides that the Minister for Immigration becomes the legal guardian of every person under the age of 21 years who enters Australia other than in the charge of, or for the purpose of living in the care of, a parent or adult relative. It is administered primarily through the child welfare authorities in each State who, as the Minister's delegates under the Act, supervise the welfare of each " immigrant child ".

The *Aliens Act* 1947–1959 provides that a register of aliens shall be maintained for every State and mainland Territory of the Commonwealth. Unless exempted, aliens 16 years of age and over are required to register with the Department of Immigration and to notify the Department of any change of address, occupation or employment and of their marriage. The Act also provides that consent must be obtained before an alien may change his surname.

**2. Conditions of Immigration into Australia.**—(i) *Persons of Non-European Race.* In pursuance of established policy, the general practice is not to permit persons of non-European descent to enter Australia for the purpose of settling permanently, but exceptions are made in favour of the spouses and minor unmarried children of Australian citizens and other British subjects permanently resident in Australia. Special provision exists for the temporary admission of non-Europeans who are highly qualified or of special distinction or who are bona fide merchants, students, tourists or of numerous other categories. They are permitted to enter and remain in Australia under temporary entry permits while they retain their status. Such persons must obtain prior authority to enter Australia.

(ii) *Persons of European Race.* Maltese, Cypriots and aliens of European race desiring to settle permanently in Australia are required to obtain authority for admission from the Department of Immigration or an Australian oversea post. Their admission under the present policy is subject to their compliance with the Commonwealth's requirements in regard to health, character, freedom from security risk and general suitability as settlers.

(iii) *General Information.* General information as to conditions of entry into Australia may be obtained from the following officers:—

- (a) In Australia—the Secretary, Department of Immigration, Canberra, Australian Capital Territory, and Commonwealth Migration Officers in the capital cities of the various States;
- (b) In Great Britain—the Chief Migration Officer, High Commissioner's Office, Australia House, Strand, London;
- (c) In other British Commonwealth countries—the High Commissioner for Australia;
- (d) In Holland, Italy, Germany, Greece, Austria, Sweden, Switzerland and Hong Kong—the Chief Migration Officer or Migration Officer in the capital city of each of those countries;
- (e) In other countries where Australia is represented—the Secretary, Australian Embassy, Legation or Consulate.

### § 11. Passports

Australian passports are issued, under the *Passports Act 1938-1948* and *Passport Regulations*, to Australian citizens.

Diplomatic passports are issued to persons travelling on official missions of a diplomatic character. Official passports are granted to persons travelling on the official business of the Commonwealth or a State Government.

Australian passports are obtainable on application at offices of the Commonwealth Department of Immigration in each State of Australia or from oversea offices of that Department, from any Australian diplomatic or consular mission abroad, or from the office of any Australian Government Trade Commissioner overseas.

Applicants for passports must furnish evidence of their identity and nationality and pay a fee of £1.

Approximately 50,000 Australian passports are issued each year in Australia and abroad.

### § 12. Citizenship and Naturalization

1. *Commonwealth Legislation.*—The *Nationality and Citizenship Act 1948* commenced on Australia Day (26th January), 1949, and repealed all previous Commonwealth legislation on this subject. The most significant effect of the Act was the creation for the first time of the status of "Australian Citizen". In this respect, the Act was complementary to citizenship legislation passed or about to be passed by other countries of the British Commonwealth. All Australian citizens, and the citizens of other countries of the British Commonwealth, are declared to be British subjects. For details of the Act, see *Official Year Book No. 42*, page 619.

2. *Certificates Granted.*—The following tables show the number of certificates granted during 1961 and the number of persons affected by these certificates. The certificate covers the person being naturalized and his/her children under the *Nationality and Citizenship Act 1948-1958*.

#### NATURALIZATION: CERTIFICATES GRANTED, AUSTRALIA, 1961

(a) Excludes children affected by grant of certificates.

The number of persons affected by certificates granted in 1960 in respect of residents of the various States and Territories was as follows:—New South Wales, 14,679; Victoria, 13,428; Queensland, 4,482; South Australia, 3,846; Western Australia, 3,648; Tasmania, 796; Northern Territory, 207; Australian Capital Territory, 432; External Territories, 377; Total, 41,895.

### § 13. Population of External Territories

Ordinances of the individual external territories under the control of Australia provide for a Census of the population to be taken on the day prescribed for the taking of a Census in the Commonwealth of Australia.

The following table shows the population of the Territories of Christmas Island, Cocos (Keeling) Islands, Norfolk Island, Papua, the Trust Territory of New Guinea and the Trust Territory of Nauru at the Census of 30th June, 1961, and as estimated at 30th June, 1962.

#### POPULATION: EXTERNAL TERRITORIES

Territory	Census, 30th June, 1961			Estimate 30th June, 1962
	Males	Females	Persons	Persons
Christmas Island .. ..	1,963	1,136	3,099	3,200
Cocos (Keeling) Islands .. ..	333	273	606	615
Norfolk Island .. ..	421	423	844	876

Trust Territory of Nauru .. ..	3,019	1,594	4,613	4,849

(a) Not available.

(b) Non-indigenous population only.

Particulars concerning the indigenous populations of the territories and further details of the 1961 Census results will be found in Chapter V. The Territories of Australia.

### § 14. The Aboriginal Population of Australia

In Official Year Book No. 17, pages 951-61, a brief account was given of the Australian aboriginal population, its origin, its numbers as estimated from time to time and the steps taken for its protection. On pages 914-6 of Official Year Book No. 22, particulars were shown for each of the States and Territories of Australia at successive periods, while a special article dealing with the estimated number and distribution of the native population at the date of first settlement of the white race in the continent appeared on pages 687-96 of Official Year Book No. 23.

The aborigines are scattered over the whole of the mainland, but are mostly in the Northern Territory, Queensland, and Western Australia. Particulars of the number in each State and Territory at the Census of 30th June, 1961, are shown in the following table. Full-blood aborigines in employment or living in proximity to settlements were enumerated at the census, while estimates of the total numbers, including those living in the nomadic state, were furnished by the authorities responsible for native welfare. Half-caste aborigines are included in the numbers of the population and are of course enumerated at the census. The figures shown for Queensland are exclusive of Torres Strait Islanders.

**FULL-BLOOD ABORIGINAL POPULATION, 30th JUNE, 1961**

State or Territory	Number of full-blood Aborigines enumerated at Census, 30th June, 1961			Estimated number of full-blood Aborigines out of contact at Census	Total number of full-blood Aborigines as recorded or estimated as at 30th June, 1961
	Males	Females	Persons		
New South Wales .. ..	791	697	1,488	..	1,488

<b>Australia .. ..</b>	<b>18,899</b>	<b>17,238</b>	<b>36,137</b>	<b>3,944</b>	<b>40,081</b>

Torres Strait Islanders, whether full-blood or half-caste, and half-caste aborigines or persons of less than half aboriginal blood are included in the populations shown on pp. 304-35. Census tabulations which show separately the number of full-blood and half-caste Torres Strait Islanders and half-caste aborigines so included have not yet been completed.

For further information as to the estimated numbers of full-blood aborigines, and the difficulty of arriving at precise figures, see Official Year Book No. 47, page 329.

### § 15. International Statistics of Population

1. Introduction.—In the following tables, the population, density, rate of growth, natural increase and masculinity are shown in respect of all countries which had an estimated population of at least one million persons in 1960, together with Cyprus, Papua and Western New Guinea. The source of these figures is the 1961 *Demographic Yearbook* which is prepared and published by the Statistical Office of the United Nations. The tables include figures varying in reliability and accuracy, there being considerable variation in the quality of demographic statistics as between countries, but this information has been shown to provide some form of guide as to the magnitude and trend of population movements in overseas countries.

Where the information available to the Statistical Office of the United Nations relates to only part of the population of a country, the population characteristic (e.g. rate of growth), or vital statistic rate (e.g. marriages), has been omitted from the tables, and this is indicated by a footnote.

For fuller particulars of the differences in the quality of the statistics and their reliability and for other qualifications, reference should be made to the detailed explanations contained in the *Demographic Yearbook* of the Statistical Office of the United Nations (see particularly Technical Notes on Statistical Tables and footnotes to the tables).

2. **Population, Rate of Growth and Density: World, Continents and Regions.**—The following table shows for the World, Continents, and Regions, estimated population and density at ten yearly intervals since 1920, and for 1960. The annual rate of increase (per cent.), together with the average annual increase during the period 1950–60, is also shown. It should be noted that the population figures have been adjusted for underenumeration and errors in estimation. In preparing these figures, the Population Branch of the United Nations revises, from time to time, the estimates for previous years as new data become available, for example, from a census. The figures are estimates only, and as such are subject to a substantial margin of error.

### POPULATION, DENSITY AND RATE OF INCREASE FOR THE WORLD AND CONTINENTS—SELECTED YEARS

(Source: United Nations *Demographic Yearbook*, 1961)

Continent and region	Population							Density (persons per square mile)
	Adjusted estimates of mid-year population (millions)					Annual rate of increase 1950-60 (per cent.)	Average annual increase 1950-60 (millions)

## CHAPTER X

### VITAL STATISTICS

NOTE.—The tables in this chapter are confined to the principal characteristics of vital statistics for Australia, and relate, in the main, to the year 1961, except for the totals of marriages, births, deaths and infant deaths, for which it has been possible to include figures for 1962. Comparisons have been restricted, in general, to the individual years 1958 to 1962 and the five-year periods 1926–30 to 1956–60, while age data have been shown in five-year groups. Comparisons over longer periods, together with more detailed figures such as single age particulars and cross-classifications of various characteristics, will be found in the annual bulletin, *Demography*. Current information is published in the *Monthly Review of Business Statistics*, the *Quarterly Summary of Australian Statistics* and the *Australian Demographic Review* (a mimeographed series issued at intervals throughout the year on population and vital statistics).

Figures of births and deaths for Australia throughout are exclusive of full-blood aboriginals.

Rates for the period 1954 to 1961 have been recalculated on the basis of revised population figures ascertained from the Census of 30th June, 1961.

Vital statistics for the principal countries of the world are set out in § 7. International Vital Statistics.

#### § 1. Provisions for Registration and Compilation of Statistics

In Australia, vital statistics are compiled from information supplied for the registration of births, deaths and marriages. Each State and Territory has an independent system of registration. Provisions for the civil registration of births, deaths and marriages have been in force in Tasmania from 1839, in Western Australia from 1841, in South Australia from 1842, in Victoria from 1853, and in New South Wales and Queensland (then part of New South Wales) from 1856. Registration in the Territories is administered by the Commonwealth Government, registration in respect of the Northern Territory having been taken over from South Australia in 1911 and in respect of the Australian Capital Territory from New South Wales in 1930. The authority responsible for the registration of births, deaths and marriages occurring within his particular State or Territory is the Registrar-General (the Government Statist in Victoria) or the Principal Registrar.

In the Australian Capital Territory and the Northern Territory, information concerning a birth is required to be supplied within 21 days and in South Australia in 42 days, while in all other States 60 days is allowed. In all States, however, provision has been made for the late registration of births. For the registration of a death, the period allowed is 8 days in Tasmania, 10 days in South Australia, 14 days in Western Australia, the Northern Territory and the Australian Capital Territory, 21 days in Victoria and 30 days in New South Wales and Queensland. Provision is made in all States and Territories for the celebration of marriages by ministers of religion registered for that purpose with the Registrar-General (the Government Statist in Victoria) or the Principal Registrar of Births, Deaths and Marriages of the State or Territory, and also by certain civil officers. In all cases, the celebrant, whether minister of religion or civil officer, is required to register particulars of the parties married with the Registrar-General's Office. In Victoria, Western Australia, the Northern Territory and the Australian Capital Territory, registration of a marriage is required immediately following the ceremony, in Tasmania and South Australia within 7 days, and in New South Wales and Queensland within 30 days.

The registration of stillbirths is compulsory in all the States and Territories, except Tasmania. Western Australia was the first State to introduce compulsory registration in 1908, followed by the Australian Capital Territory in 1930, New South Wales in 1935, South Australia in 1937, the Northern Territory in 1949, Victoria in 1953, and Queensland in 1959. Registration is effected in New South Wales, Western Australia, the Northern Territory and the Australian Capital Territory as a birth and subsequent death; in the other States as a stillbirth. Though registration is not compulsory in Tasmania, it is believed that for various reasons nearly all stillbirths are registered voluntarily. In this chapter, stillbirths have been excluded from all tables of births and deaths and are shown only in those specially relating to stillbirths.

The data for the compilation of vital statistics are obtained from registry records and dispatched, through the Statistical Office in each State and Territory, to the Commonwealth Statistician. The compilation and publication of vital statistics for Australia is one of the functions of the Commonwealth Statistician. The Deputy Commonwealth Statisticians compile and publish statistics relating to their respective States.

## § 2. Marriages

1. **Number of Marriages.**—The numbers of marriages registered in each State and Territory in five-year periods from 1926–30 to 1956–60, and for each of the years 1958 to 1962, are shown in the following table. Annual averages for each five-year period from 1861 to 1950 were published in Official Year Book No. 39, page 575. A graph showing the number of marriages in each year from 1870 to 1962 appears on page 365 of this issue.

(a) Number of marriages per 1,000 of mean population.

The crude marriage rates of Australia and the principal countries of the world are shown for the latest available year in § 7. International Vital Statistics.

3. **Marriage Rates based on Marriageable Population.**—As the marriage rates in some international tabulations are based on the unmarried population aged 15 years and over, the corresponding rates have been calculated for Australia for the nine census periods to 1960–62. The period in each case comprises the census year with the year immediately preceding and the year immediately following, and the figures are as follows.

**PERSONS MARRYING PER 1,000 OF UNMARRIED POPULATION: AUSTRALIA**

Period				Rate(a)	Period				Rate(a)
1880–82	..	..	..	48.63	1932–34	..	..	..	42.88
1890–92	..	..	..	44.04	1946–48	..	..	..	71.24
1900–02	..	..	..	42.14	1953–55	..	..	..	65.32
1910–12	..	..	..	50.12	1960–62	..	..	..	62.27
1920–22	..	..	..	55.97					

(a) Average annual number of persons who married per 1,000 unmarried persons, including widowed and divorced, aged 15 years and over.

4. **Age and Conjugal Condition at Marriage.**—(i) *General.* Particulars of age at marriage in age groups, and previous conjugal condition of bridegrooms and brides in 1961 are given hereunder. There were 8,469 males under 21 years of age married during 1961, while the corresponding number of females was 29,986. At the other extreme, there were 1,040 bridegrooms and 526 brides in the age group 65 years and over.

**AGE AND CONJUGAL CONDITION OF BRIDEGROOMS AND BRIDES:  
AUSTRALIA, 1961**

(iv) *Average Ages of Bridegrooms and Brides.* The average age at marriage of brides and bridegrooms has declined during recent years. The average ages, in years, of brides for each of the five years to 1961 were:—1957, 25.18; 1958, 25.00; 1959, 25.01; 1960, 24.84; and 1961, 24.73. The average ages, in years, of bridegrooms were 28.54 in 1957, 28.36 in 1958, 28.39 in 1959, 28.15 in 1960 and 28.07 in 1961. The difference in the average age at marriage between brides and bridegrooms is generally just over three years, the difference in 1961 being 3.34 years.

5. **Previous Conjugal Condition.**—The following table shows the relative conjugal condition of bridegrooms and brides in 1961.

#### CONJUGAL CONDITION OF BRIDEGROOMS AND BRIDES: AUSTRALIA, 1961

Conjugal condition of bridegrooms	Total bridegrooms	Conjugal condition of brides		
		Spinsters	Widows	Divorced
Bachelors .. .. .	69,118	65,189	1,244	2,685
Widowers .. .. .	3,032	998	1,396	638
Divorced .. .. .	4,536	2,422	661	1,453
<b>Total Brides .. .. .</b>	<b>76,686</b>	<b>68,609</b>	<b>3,301</b>	<b>4,776</b>

6. **Birthplaces of Persons Marrying.**—The following table shows the relative birthplaces of bridegrooms and brides married in 1961.

#### RELATIVE BIRTHPLACES OF BRIDEGROOMS AND BRIDES: AUSTRALIA, 1961

Birthplace of bridegroom	Birthplace of bride											Total bridegrooms
	Australia	New Zealand	United Kingdom and Ireland	Germany	Greece	Italy	Netherlands	Poland	Yugoslavia	Other European	Other and unspecified	
Australia ..	54,253	204	2,496	232	46	76	322	40	34	256	394	58,353

Germany ..	385	8	69	465	4	6	29	14	12	84	15	1,091
Greece ..	139	1	11	11	2,012	3	3	1	4	15	46	2,246
Italy ..	696	9	59	24	17	2,338	31	8	57	60	34	3,333
Netherlands ..	552	2	65	29	2	1	381	2	4	14	33	1,085
Poland ..	137	3	27	35	6	5	5	275	6	56	19	574
Yugoslavia ..	222	1	36	37	35	47	15	18	416	43	12	882
Other European ..	921	23	130	175	41	25	49	58	57	986	73	2,538
Other and unspecified ..	774	15	83	17	80	19	35	8	5	56	439	1,531
Total Brides ..	61,712	347	4,058	1,076	2,246	2,527	911	432	602	1,633	1,142	76,686

7. **Occupation of Bridegrooms.**—The distribution of the 76,686 bridegrooms for 1961 amongst classes of occupations was as follows:—craftsmen, 25,875; administrative and clerical workers, 9,815; labourers, 8,875; rural and mining workers, 8,049; professional and technical workers, 6,637; workers in transport and communication, 6,029; sales workers, 5,248; service, sport and other workers, 5,196; persons not in the work force, 962.

8. **Celebration of Marriages.**—In all the States, marriages may be celebrated either by ministers of religion who are registered for that purpose with the Registrar-General or by certain civil officers, in most cases district registrars, but most of the marriages are celebrated by ministers of religion. The registered ministers in 1961 belonged to more than forty different denominations, some of which, however, have only very few adherents. A number of these have been combined under the heading "Other Christian". The figures for 1961 are shown in the following table.

## MARRIAGES IN EACH DENOMINATION, 1961

## PROPORTION OF TOTAL

(Per cent.)

Denominational	84.63	90.92	96.23	88.67	85.18	86.48	80.19	80.43	88.37
Civil ..	15.37	9.08	3.77	11.33	14.82	13.52	19.81	19.57	11.63

## § 3. Divorce

The number of dissolutions of marriage, nullities of marriage and judicial separations in 1961 was 6,711 and in 1962, 7,265. Further information may be found in Chapter XVI. Public Justice.

## § 4. Fertility and Reproduction

1. **Introduction.**—Of the two elements of increase in the population, natural increase and net migration, the former has been by far the more significant in Australia for many years. The level of natural increase depends on the excess of births over deaths, and the relation between fertility and mortality determines the rate of reproduction or replacement of the population.

2. **Number of Live Births and Confinements.**—(i) *Year 1961.* There are various methods of measuring the fertility of the population by relating the number of births to the numbers of the population. In each, the basic data are, of course, the numbers of live births.

The number of live births registered in Australia during 1961 is shown in the following table. The table shows also the number of confinements resulting in one or more live births. The figures exclude cases where the births were of still-born children only.

## LIVE BIRTHS AND CONFINEMENTS, 1961

Particulars	N.S.W.	Vic.	Q'land	S. Aust.	W.A.	Tas.	N.T.	A.C.T.	Aust.
-------------	--------	------	--------	----------	------	------	------	--------	-------

## LIVE BIRTHS

Single births	84,535	64,452	35,819	21,934	16,749	8,761	848	1,680	234,778
Twins ..	1,833	1,409	806	459	326	219	30	54	5,136
Triplets ..	24	21	12	6	3	2	..	..	68
Quadruplets	..	4	..	..	..	..	..	..	4
Males ..	44,224	33,875	18,863	11,402	8,800	4,635	446	867	123,112
Females ..	42,168	32,011	17,774	10,997	8,278	4,347	432	867	116,874
Total ..	86,392	65,886	36,637	22,399	17,078	8,982	878	1,734	239,986

## STILLBIRTHS ASSOCIATED WITH MULTIPLE BIRTHS INCLUDED ABOVE

Twins ..	51	17	22	7	4	7	2	..	110
Triplets ..	..	..	..	..	..	1	..	..	1

## CONFINEMENTS RESULTING IN BIRTHS SHOWN ABOVE

Nuptial ..	80,951	62,504	33,815	21,156	15,964	8,474	745	1,673	225,282
Ex-nuptial ..	4,534	2,669	2,422	1,013	951	401	119	34	12,143
Total ..	85,485	65,173	36,237	22,169	16,915	8,875	864	1,707	237,425

NOTE.—Owing to the registration procedure adopted in some States, it is possible that in some cases where one child only of a multiple pregnancy was live-born, the confinement has been treated as a single birth. However, the numbers of multiple births are not significantly affected. See also para. 12, p. 371.

(ii) *Live Births, Years 1926 to 1962.* The average annual number of live births in each State and Territory for each five-year period from 1926 to 1960 and the total number of live births for each year from 1958 to 1962 are given in the following table. Corresponding figures for each five-year period from 1861 to 1950 were published in Official Year Book No. 39, page 583.

## LIVE BIRTHS

Period	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.

A graph showing the number of births in each year from 1870 to 1962 will be found on page 365.

3. *Crude Birth Rates.*—The oldest and most popular method of measuring fertility is to relate the number of births to the total population, thus obtaining the crude birth rate. The crude birth rate measures the rate per thousand persons (irrespective of age or sex) at which the population has added to its numbers by way of births during a given period. Other methods of measuring fertility are shown on pages 363 *et seq.*

Crude birth rates for each five year period from 1926 to 1960 and for each year from 1958 to 1962 for each State and Territory are set out below.

## CRUDE BIRTH RATES(a)

(a) Number of births per 1,000 of mean population.

NOTE.—The birth rates in the table above are based on *live births registered in the respective States and Territories*. Some confinements, however, take place in States other than the State in which the mother usually resides, particularly in areas near State borders.

The variations thus caused in the birth rates for the States and Territories *by referring the birth registrations to the mother's usual residence* are shown by the following corrected rates for 1962:—New South Wales, 21.51; Victoria, 22.02; Queensland, 23.12; South Australia, 21.49; Western Australia, 22.61; Tasmania, 24.80; Northern Territory, 35.59; and Australian Capital Territory, 28.01.

See Official Year Book No. 47 (p. 339) for the effect of the variations in the availability of hospital facilities on the birth rate in the Australian Capital Territory and in the neighbouring town of Queanbeyan in New South Wales.

A graph showing the birth rate for each year from 1870 to 1962 will be found on page 366.

The crude birth rates of Australia and the principal countries of the world for the latest available year are shown in § 7. International Vital Statistics.

4. **Fertility Rates.**—The principal demographic factors affecting the level of crude birth rates are the proportion of women of child-bearing age in the population and the proportion of such women who are married. These factors may vary considerably at different periods and for different countries, and a population with a higher proportion of married women of child-bearing age will have a much higher crude birth rate than one with a low proportion, although the fertilities of the two populations may be identical.

In order to compare fertilities, births are sometimes related to the number of women of child-bearing age or, alternatively, nuptial births are related to the number of married women of child-bearing age. Thus births are related to potential mothers, giving the fertility rate.

The following table sets out for certain periods, commencing with 1880–82, the number of births per thousand of mean population, the number of births per thousand women of child-bearing age and the number of nuptial births per thousand married women of child-bearing age. For purposes of this table, the child-bearing age has been taken to be 15–44 years inclusive, but births to mothers who were stated to be under 15 or over 44 years have been included in the compilations.

CRUDE BIRTH RATES AND FERTILITY RATES: AUSTRALIA

Period	Average annual rates			Index nos. (Base: 1880–82 = 100)		
	Crude birth rate(a)	Fertility rates		Crude birth rate(a)	Fertility rates	
		Births per 1,000 women aged 15–44 years	Nuptial births per 1,000 married women aged 15–44 years		Births per 1,000 women aged 15–44 years	Nuptial births per 1,000 married women aged 15–44 years
1880–82..	35.3	170	321	100	100	100
1890–92..	34.5	159	332	98	94	103
1900–02..	27.2	117	235	77	69	73
1910–12..	27.2	117	236	77	69	74
1920–22..	25.0	107	197	71	63	61
1932–34..	16.7	71	131	47	42	41
1946–48..	23.6	104	160	67	61	50
1953–55..	22.7	109	149	64	64	46
1960–62..	22.5	112	(b)	64	66	(b)

(a) Number of births per 1,000 of mean population. (b) Not yet available.

The table above shows how increasing proportions both of women of child-bearing age and of married women of child-bearing age inflate the crude birth rate. Thus, while the nuptial birth rate for married women increased by only 22 per cent. over the period 1932–34 to 1946–48, the crude birth rate rose by 41 per cent. owing principally to the greatly increased number of marriages during that period.

5. **Age-specific Fertility Rates for Females.**—So long as customary ages at marriage do not change drastically, the main demographic factor affecting the number of births is the age composition of the potential mothers in the population. Within the child-bearing group, the fertility of women of different ages varies considerably, and a clearer view of the fertility of the population can be obtained from an examination of what are known as its age-specific fertility rates, that is, the number of births to women of specified ages per thousand women of those particular ages.

Age-specific fertility rates are more commonly expressed in age groups than in single ages. In the following table, such rates, calculated in terms of female births for the purpose of obtaining the gross and net reproduction rates described in para. 6, are shown in five-year age groups for Australia for the period 1926 to 1961.

#### AGE-SPECIFIC FERTILITY RATES(a): AUSTRALIA

Age group (years)	1926	1931	1936	1941	1946	1951	1956	1960	1961
15-19 ..	14.02	13.08	12.18	11.90	12.63	18.59	20.84	21.62	22.87
20-24 ..	60.23	53.08	50.33	59.42	73.52	85.84	101.46	107.11	110.01
25-29 ..	76.82	62.47	62.02	70.78	89.51	90.24	98.11	104.99	107.73
30-34 ..	61.90	51.25	46.33	49.72	65.03	59.16	59.65	61.65	63.62
35-39 ..	43.55	33.23	28.89	28.69	37.43	32.29	31.32	30.43	30.53
40-44 ..	17.63	13.61	10.19	9.52	11.87	9.97	9.48	8.93	9.36
45-49 ..	1.90	1.45	1.11	0.80	1.03	0.80	0.76	0.70	0.70

(a) Number of female births per 1,000 women in each age group.

6. **Gross and Net Reproduction Rates for Females.**—A single measure of reproduction, known as the gross reproduction rate, is obtained by adding together the specific fertility rates for each age in the child-bearing group. This measure indicates the number of female children who would be born on an average to women living right through the child-bearing period, if the conditions on which the rate is based continue. The rate is unaffected by the age composition of the potential mothers, and consequently it shows more clearly than the crude birth rate the reproductive propensity of the population. It is, however, an imperfect measure of reproduction because it does not take into account the females who fail to live from birth to the end of the reproductive period. A more accurate measure of this nature is obtained by multiplying the specific fertility rates by the number of females in the corresponding age group of the stationary or life table population and summing the products. Allowance is thus made for the effect of mortality, and the result is known as the net reproduction rate. The net reproduction rate indicates the average number of female children who would be born to women during their lifetime if they were subject at each age to the fertility and mortality rates on which the calculation is based. A constant net reproduction rate of unity indicates that the population will ultimately become stationary. If it continues greater than unity, the population will ultimately increase; if less than unity, it will ultimately decrease. The following table should be read in the light of the comment which follows it and of the index of marriage fertility in paragraph 8 page 369.

#### GROSS AND NET REPRODUCTION RATES: AUSTRALIA

Year	Gross reproduction rate	Net reproduction rate	Year	Gross reproduction rate	Net reproduction rate
1881(a) ..	2.65	(b) 1.88	1947 ..	1.493	(g) 1.416
1891(a) ..	2.30	(b) 1.73	1954 ..	1.558	(h) 1.497
1901(a) ..	1.74	(c) 1.39	1957 ..	1.662	(h) 1.598
1911 ..	1.705	(d) 1.421	1958 ..	1.667	(h) 1.603
1921 ..	1.511	(e) 1.313	1959 ..	1.678	(h) 1.614
1931 ..	1.141	(f) 1.039	1960 ..	1.677	(h) 1.613
1941 ..	1.154	(f) 1.053	1961 ..	1.724	(h) 1.658

(a) Approximate only. (b) 1881-1890 mortality experience used. (c) 1891-1900 mortality experience used. (d) 1901-1910 mortality experience used. (e) 1920-1922 mortality experience used. (f) 1932-1934 mortality experience used. (g) 1946-1948 mortality experience used. (h) 1953-1955 mortality experience used.

NOTE.—It is not strictly correct to assume, as in the calculations of the rates above, that a particular age-specific fertility rate can be applied to a hypothetical group of women reaching that age, without taking account of previous fertility and marriage experience. Reproduction rates are therefore unreliable when birth and marriage rates have been changing. The indexes of marriage fertility shown on the next page are also of doubtful reliability in similar circumstances.

7. **Gross and Net Reproduction Rates, Various Countries.**—In the following table, a comparison is given of the gross and net reproduction rates recorded for various countries in the period 1954 to 1961. These represent the latest available international comparisons.

# BIRTHS, DEATHS, AND MARRIAGES: AUSTRALIA, 1870 to 1962

# RATES OF BIRTHS, DEATHS, AND NATURAL INCREASE

AUSTRALIA, 1870 To 1962

# INFANT DEATHS: AUSTRALIA, 1910 to 1962

(NUMBER)

# INFANT MORTALITY RATES: AUSTRALIA, 1910 to 1962

(INFANT DEATHS PER 1,000 LIVE BIRTHS)

## GROSS AND NET REPRODUCTION RATES: VARIOUS COUNTRIES

Country	Period	Reproduction rate		Country	Period	Reproduction rate	
		Gross	Net			Gross	Net
Thailand..	1954	2.26	1.70	Finland ..	1960	1.29	1.22
New Zealand(a)	1960	1.97	1.90	Austria ..	1960	1.28	1.19
Canada ..	1960	1.90	1.81	Belgium ..	1960	1.24	1.13
United States of America(b)	1959	1.73	1.67	England and Wales	1958	1.22	1.18
Australia(c)	1961	1.72	1.66	Denmark..	1959	1.21	1.11
Ireland, Republic of	1955	1.59	1.45	Czechoslovakia ..	1959	1.16	1.04
Netherlands ..	1960	1.52	1.46	Switzerland ..	1959	1.15	1.09
Portugal ..	1958	1.47	1.26	Germany—			
Scotland ..	1960	1.40	1.35	Federal Rep. ..	1959	1.16	(d)
Norway ..	1959	1.39	1.34	Eastern ..	1955	1.13	(d)
France ..	1960	1.33	1.28	Sweden ..	1959	1.08	1.04
Yugoslavia ..	1959	1.31	1.08	Japan ..	1959	0.99	0.93
				Hungary ..	1960	0.98	0.91

(a) Excludes Maoris. (b) White population only. (c) Excludes full-blood aboriginals. (d) Not available.

In comparing the reproduction rates of the countries shown above, allowance should be made for any differences in years, as the rates for any one country from year to year are affected by variations in the incidence of marriage, as well as the stationary or life table population used.

8. **Fertility of Marriages.**—More satisfactory estimates of the fertility of marriages may be made by relating nuptial confinements in each year to the marriages from which they could have resulted. Confinements of women of a certain number of years duration of marriage are related to the number of marriages taking place that number of years previously. The table below sets out this index of current fertility per marriage in respect of confinements in the individual years shown.

## FERTILITY OF MARRIAGES: AUSTRALIA

Year	Nuptial confinements per marriage	Year	Nuptial confinements per marriage	Year	Nuptial confinements per marriage
1947..	2.55	1952..	2.63	1957..	2.87
1948..	2.44	1953..	2.66	1958..	2.88
1949..	2.45	1954..	2.66	1959..	2.93
1950..	2.56	1955..	2.71	1960..	2.96
1951..	2.55	1956..	2.76	1961..	3.05

NOTE.—See NOTE to table on p. 364.

The figure for a particular year gives the estimated number of children which a marriage would produce according to the fertility conditions of that year. The figures for 1949 and subsequent years present a somewhat inflated index, as many of the births which have been used to calculate the index relate to marriages of immigrants which took place overseas and consequently are not included in Australian marriage records. Partial investigation suggests that this factor probably overstated the index by very little in 1949, but that the overstatement at present is about 8 per cent.

9. **Masculinity of Live Births.**—The masculinity of live births, i.e., the number of males born for every 100 female births, has remained fairly stable for Australia at about 105. But when the number of births for which masculinity is being calculated is small (for example, totals for smaller States), considerable variation is shown. The averages for the ten years 1951–60 were as follows:—New South Wales, 105.38; Victoria, 105.50; Queensland, 105.80; South Australia, 104.89; Western Australia, 105.25; Tasmania, 104.96; Northern Territory, 107.16; Australian Capital Territory, 108.77; Australia, 105.43. The following table shows the figures for Australia for each ten-year period from 1901 to 1960 and for each of the years 1960 to 1962.

**MASCULINITY(a) OF LIVE BIRTHS REGISTERED: AUSTRALIA**

Particulars	1901-10	1911-20	1921-30	1931-40	1941-50	1951-60	1960	1961	1962
Total births ..	105.22	105.27	105.55	105.12	105.38	105.43	105.81	105.34	106.21
Ex-nuptial births	104.08	105.25	105.16	105.36	105.34	103.99	104.22	108.02	106.23

(a) Number of males born for every 100 female births.

10. **Ex-nuptial Live Births.**—(i) *General.* The variations in the proportions of ex-nuptial live births as between the individual States and Territories for 1962 are shown below.

**EX-NUPTIAL LIVE BIRTHS: NUMBER AND PROPORTION, 1962**

Particulars	N.S.W.	Vic.	Q'land	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Number ..	4,771	2,954	2,470	1,017	1,005	472	101	23	12,813
Proportion of total births%	5.58	4.48	6.92	4.76	5.89	5.31	10.93	1.26	5.40

The number and proportion of ex-nuptial births at intervals from 1901 to 1962 are as follows.

**EX-NUPTIAL LIVE BIRTHS: NUMBER AND PROPORTION, AUSTRALIA**

Particulars	Annual average						1958	1959	1960	1961	1962
	1901-10	1911-20	1921-30	1931-40	1941-50	1951-60					
Number ..	6,498	6,836	6,238	5,133	6,780	9,013	10,131	10,687	10,987	12,269	12,813
Proportion of total births%	6.05	5.22	4.66	4.40	4.13	4.25	4.55	4.71	4.77	5.11	5.40

(ii) *Rate of Ex-nuptiality.* A further measure of ex-nuptiality is obtained by calculating the number of ex-nuptial births per thousand of the single, widowed and divorced female population aged from 15 to 44 years. On this basis, the number of ex-nuptial births per 1,000 unmarried women of ages 15 to 44 is as follows:—1880-82, 14.49; 1890-92, 15.93; 1900-02, 13.30; 1910-12, 12.53; 1920-22, 10.50; 1932-34, 6.91; 1946-48, 11.45; and 1953-55, 14.45. Ex-nuptial births to married women, which are not recorded separately, are included in these figures and it is not possible to determine to what extent they influence the trend shown.

(iii) *Comparison of Rates.* The following table shows the relative proportions of ex-nuptial and nuptial births to the total population for periods from 1901.

**CRUDE EX-NUPTIAL, NUPTIAL, AND TOTAL BIRTH RATES (a): AUSTRALIA**

Birth rate	Annual average						1959	1960	1961
	1901-10	1911-20	1921-30	1931-40	1941-50	1951-60			
Ex-nuptial ..	1.60	1.39	1.04	0.76	0.90	0.97	1.06	1.07	1.17
Nuptial ..	24.91	25.18	21.40	16.47	20.99	21.75	21.51	21.35	21.68
<b>Total ..</b>	<b>26.51</b>	<b>26.57</b>	<b>22.44</b>	<b>17.23</b>	<b>21.89</b>	<b>22.72</b>	<b>22.57</b>	<b>22.42</b>	<b>22.85</b>

(a) Number of births per 1,000 of mean population.

11. *Legitimations*.—Acts have been passed in the several States to legitimize children born before the marriage of their parents, provided that no legal impediment to the marriage existed at the time of birth. On registration in accordance with the provisions of the *Legitimation Acts*, any child who comes within the scope of their purposes, born before or after the passing thereof, is deemed to be legitimate from birth by the post-natal union of its parents, and entitled to the status of offspring born in wedlock. During 1961, the number of children legitimized in Australia was 992.

12. *Multiple Births*.—Because the current Australian birth statistics are based only on those confinements which resulted in a live-born child, the number of confinements for multiple births for Australia is understated—firstly, because in cases where all children of a multiple birth are still-born the confinement is excluded, and secondly, because some cases of multiple births in which only one child was live-born are registered as single births.

During 1961, multiple births recorded on this basis comprised 2,623 cases of twins, 23 cases of triplets and 1 case of quadruplets, the resultant numbers of live-born and still-born children being respectively 5,136 and 110 for twins, 68 and 1 for triplets, and 4 live-born children for quadruplets. This represents an average of 11.05 recorded cases of twins and 0.10 recorded cases of triplets per 1,000 confinements or, alternatively, mothers of twins represented 1 in every 91 mothers and mothers of triplets 1 in every 10,323. Total cases of multiple births represented 11.15 per 1,000 confinements or 1 in every 90 mothers.

The proportion of mothers of multiple births to total mothers does not vary greatly from year to year.

13. *Ages of Parents*.—The relative ages of the parents of children whose births were registered in 1961 have been tabulated separately for male and female births, multiple births being distinguished from single births. For total births and for multiple births, the relative ages of parents are shown in *Demography*, Bulletin No. 79. In the following table, the relative ages of parents are shown in five-year groups.

#### CONFINEMENTS: RELATIVE AGES OF PARENTS, AUSTRALIA, 1961

Age of father (years) and type of birth	Total	Age of mother (years)									Not stated
		Under 15	15-19	20-24	25-29	30-34	35-39	40-44	45 and over

Other and unspecified ..	1,475	23	223	38	165	37	111	18	10	70	1,601	3,771
Total Mothers ..	184,118	833	11,437	2,460	3,861	8,970	3,631	977	1,550	4,148	3,297	225,282

15. *Occupation of Fathers.*—The distribution of the 225,282 fathers of nuptial children for 1961 amongst classes of occupations was as follows:—craftsmen, 70,950; rural and mining workers, 31,680; administrative and clerical workers, 29,482; labourers, 23,326; workers in transport and communication, 20,725; professional and technical workers, 18,717; sales workers, 15,348; service, sport and other workers, 15,054.

16. *Age, Duration of Marriage and Issue of Mothers.*—(i) *General.* The total number of nuptial confinements resulting in live births in 1961 was 225,282, comprising 222,769 single births, 2,489 cases of twins, 23 cases of triplets and 1 case of quadruplets. The following tables relating to previous issue exclude the issue of former marriages and still-born children. On the other hand, they include in some States children by the same father who were born to the mother prior to the marriage. Children born at the present confinement are included in the total issue shown.

(ii) *Duration of Marriage and Issue of Mothers.* The following table shows that in 1961 the duration of marriage of mothers of nuptial children ranged from less than one year to over 25 years and that the average family increased fairly regularly with the duration of marriage. The average issue of married mothers who bore children in 1961 was 2.60, compared with 2.59 in 1960, 2.58 in 1959, 2.56 in 1958, and 2.54 in 1957.

## NUPTIAL CONFINEMENTS: DURATION OF MARRIAGE AND ISSUE OF MOTHERS, AUSTRALIA, 1961

<b>Total Married Mothers ..</b>	<b>15,053</b>	<b>71,434</b>	<b>66,238</b>	<b>43,974</b>	<b>22,140</b>	<b>6,016</b>	<b>422</b>	<b>5</b>	<b>225,282</b>

(v) *Multiple Births—Previous Issue of Mothers.* Figures regarding the previous issue of married mothers of twins in 1961 show that 613 mothers had no previous issue either living or deceased, 664 had one child previously, 513 had two previous issue, 310 three, 189 four, 96 five, 49 six, 23 seven, 15 eight, 12 nine, 2 ten, one twelve, one thirteen and one fourteen.

Of the 23 cases of nuptial triplets and one case of quadruplets registered during 1961, 7 mothers had no previous issue, 6 had one, 5 had two, 2 had three, 2 had four, 1 had five and 1 had six previous issue.

17. *Nuptial First Births.*—(i) *Duration of Marriage.* The following table shows the interval between marriage and first birth for periods since 1911. In cases of multiple births, the first live-born child only is enumerated.

## NUPTIAL FIRST BIRTHS: DURATION OF MARRIAGE, AUSTRALIA

18. *Stillbirths.*—Interstate comparisons of the figures and rates in the following tables are affected by the differences in the definitions of stillbirths adopted by the various States, and only the trends in the rates for the States should be compared.

For various reasons, the registration of stillbirths is not as complete as for live births and deaths. Particulars for the Territories and smaller States are more affected on this account than are those for the larger States.

The number of stillbirths recorded in each State and Territory since 1936 is shown in the following table.

#### STILLBIRTHS

Period	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.

1961 ..	35,048	24,500	12,756	7,815	5,729	2,789	128	196	88,961
1962 ..	36,861	25,847	13,182	8,232	5,810	2,870	144	217	93,163

(a) Excludes deaths of defence personnel and of internees and prisoners of war from overseas for the period September, 1939 to June, 1947.

A graph showing the number of deaths in each year from 1870 to 1962 will be found on page 365.

2. **Crude Death Rates.**—The commonest method of measuring the mortality rate is to relate the number of deaths for a given period to the mean population for that period, thus obtaining the crude death rate. This rate for a given period measures the number per thousand of population by which the population is depleted through deaths during that period. Crude death rates for each State and Territory from 1926 to 1962 are shown in the following table.

CRUDE DEATH RATES(a)

Period.	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
AVERAGE ANNUAL RATES									
1926-30 ..	9.26	9.56	9.06	8.83	8.91	9.44	15.83	5.36	9.26
1931-35 ..	8.68	9.72	8.62	8.72	8.83	9.63	13.46	3.81	9.00
1936-40(b) ..	9.45	10.36	9.08	9.33	9.22	9.91	11.69	4.54	9.63
1941-45(b) ..	9.73	10.63	9.24	10.26	9.86	10.21	6.43	4.98	9.96
1946-50(b) ..	9.70	10.37	9.13	9.76	9.23	9.30	6.27	5.31	9.74
1951-55 ..	9.49	9.55	8.71	9.25	8.49	8.48	6.86	4.58	9.25
1956-60 ..	9.20	8.91	8.36	8.62	7.90	7.97	5.32	4.31	8.78

ANNUAL RATES

1958 ..	8.75	8.69	7.98	8.63	7.94	8.07	4.87	4.43	8.50
1959 ..	9.37	9.01	8.43	8.62	7.72	8.14	5.25	4.12	8.87
1960 ..	9.14	8.59	8.30	8.26	7.88	7.70	5.34	4.03	8.61
1961 ..	8.95	8.37	8.42	8.06	7.77	7.89	4.88	3.33	8.47
1962—									
Males ..	10.33	9.43	9.88	9.10	8.84	8.90	6.63	3.69	9.69
Females ..	8.18	7.85	7.19	7.53	6.51	7.04	3.42	2.88	7.69
Persons ..	9.26	8.64	8.56	8.32	7.69	7.99	5.34	3.30	8.70

(a) Number of deaths per 1,000 of mean population.  
from September, 1939 to June, 1947.

(b) Excludes deaths of defence personnel

A graph showing the crude death rate for each year from 1870 to 1962 will be found on page 366.

3. **Standardized Death Rates.**—(i) *General.* The death rates quoted above are crude rates, i.e., they simply show the number of deaths per thousand of mean population without taking into consideration differences in the sex and age composition of the population. Other conditions being equal, however, the crude death rate of a community will be low if it contains a large proportion of young people (not infants), and conversely it will be relatively high if the population includes a large proportion of elderly people. The foregoing table of crude death rates, therefore, does not indicate comparative incidence of mortality either as between States in the same year or in any one State over a period of years. In order to obtain a comparison of mortality rates on a uniform basis as far as sex and age constitution are concerned, "standardized" death rates may be computed. These are computed by selecting a particular distribution of age and sex as a standard, and then calculating what would have been the general death rate if the death rates for each sex and in each age group had been as recorded, but the age and sex distribution had been the same as in the standard population. For the standardized rates which follow, the standard population compiled by the International Institute of Statistics has been used. This standard is based upon the age distribution according to sex of nineteen European countries at their censuses nearest to the year 1900.

An examination of the age distribution of deaths and the resultant age-specific death rates is made in paragraph 7, page 384.

(ii) *Comparison of Crude and Standardized Death Rates.* The relative incidence of mortality as between individual States and as between the years 1921, 1933, 1947, 1954 and 1961 is illustrated in the following statement of crude and "standardized" death rates. These years have been chosen for comparison because the census data give essential information as to sexes and ages of the State populations. Crude death rates are shown to indicate the degree to which they disguise the true position.

#### CRUDE AND STANDARDIZED DEATH RATES

Particulars	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Aust.
Crude death rate(a)—							
1921 .. ..	9.50	10.52	9.37	10.02	10.42	10.30	9.91
1933 .. ..	8.58	9.59	8.84	8.44	8.64	9.60	8.92
1947 .. ..	9.53	10.44	9.15	9.61	9.39	9.17	9.69
1954 .. ..	9.46	9.20	8.63	9.01	8.38	8.67	9.10
1961 .. ..	8.95	8.37	8.42	8.06	7.77	7.89	8.47
Standardized death rate(b)—							
1921 .. ..	10.35	10.79	10.24	10.38	11.88	10.83	10.58
1933 .. ..	8.52	8.74	9.10	7.66	8.74	8.86	8.62
1947 .. ..	7.44	7.31	7.47	6.77	7.28	7.21	7.34
1954 .. ..	7.24	6.63	6.80	6.52	6.71	7.02	6.90
1961 .. ..	6.56	6.12	6.26	5.90	6.02	6.19	6.27

(a) Total deaths per 1,000 of mean population, in para. 3 (i) p. 377.

(b) See explanation of standardized death rates

The comparisons above relate to individual years in which a census of population was taken and should not be used as the basis for general conclusions as to changes in incidence of mortality for other than those years.

4. *True Death Rates.*—The main objections to standardized death rates are that the choice of a standard population is arbitrary and that the standardized rates have little value except for comparative purposes, and even then variation of the standard population may make appreciable differences. However, a correct measurement of the mortality of the population can be obtained from life tables. A life table represents the number of survivors at each age from a group of newly-born children who are subject to given mortality conditions, and from such a table the complete expectation of life at birth can be calculated. The reciprocal of this figure is known as the true death rate, since, if the complete expectation of life of a person at birth is 50 years, say, then each person will on the average die 50 years after birth, so that in a stationary population one person in 50 or 20 per thousand will die each year. The true death rate for a given period is unaffected by the particular age distribution of that period and is determined solely by the mortality experience of the period as manifested in the rate of survival from each year of age to the next. The table below sets out complete expectation of life at birth and true death rates for the periods covered by Australian life tables.

#### COMPLETE EXPECTATION OF LIFE AT BIRTH AND TRUE DEATH RATES: AUSTRALIA

Period					Complete expectation of life at birth (years)		True death rate	
					Males	Females	Males(a)	Females(b)
1881-1890 .. ..	..	..	..	..	47.20	50.84	21.19	19.67
1891-1900 .. ..	..	..	..	..	51.06	54.76	19.58	18.26
1901-1910 .. ..	..	..	..	..	55.20	58.84	18.12	17.00
1920-1922 .. ..	..	..	..	..	59.15	63.31	16.91	15.80
1932-1934 .. ..	..	..	..	..	63.48	67.14	15.75	14.89
1946-1948 .. ..	..	..	..	..	66.07	70.63	15.14	14.16
1953-1955 .. ..	..	..	..	..	67.14	72.75	14.89	13.75

(a) Number of deaths per 1,000 males in stationary population.

(b) Number of deaths per 1,000 females in stationary population.

The crude death rates and the true death rates of Australia and the principal countries of the world for the latest available year are shown in the table on pages 397-8 of § 7. International Vital Statistics.

5. *Australian Life Tables.*—(i) *Life Tables prior to 1954.* It has been the practice at each census from 1911 onwards to prepare Life Tables representative of the mortality experience of Australia. The mortality of the Australian population for the thirty years from 1881 to 1910 inclusive was investigated in 1911 by the Commonwealth Statistician. Tables were compiled for each State and for Australia as a whole in respect of each sex for each of the decennial periods 1881-1890, 1891-1900 and 1901-1910. These compilations furnished a comprehensive view of Australian mortality in respect of sex, time, and geographical distribution, and practically superseded all Life Tables prepared in Australia prior to 1911. In addition, monetary tables based on the experience for the whole of Australia for the ten years 1901-1910 were prepared and published.

At the Census of 1921, Life Tables were prepared by the Commonwealth Statistician from the recorded census population and the deaths in the three years 1920 to 1922. In 1933 and 1947, Life Tables based on the census population and the deaths in the years 1932 to 1934 and 1946 to 1948 respectively were compiled by the Commonwealth Actuary.

(ii) *Life Tables of Census of 1954.* On the occasion of the 1954 Census, the seventh Life Tables in the series were compiled by the Commonwealth Actuary. These were based on the population recorded at the Census, adjusted to allow for variation in the net movement into Australia over the years 1953 to 1955, and deaths during these years. Full particulars of the data used, the method of construction and the tabulations of these Life Tables will be found in the report of the Commonwealth Actuary, which was published by the Commonwealth Statistician in 1958. This report also appears in Volume VIII. of the detailed tables of the 1954 Census.

The main features of the tables are set out in the following summary table. Comparisons with earlier Australian tables and with the latest experiences in the United Kingdom and New Zealand are provided in Year Book No. 48, page 338).

LIFE TABLES, 1953-55

Age (x)	Males			Females		
	Rate of mortality ( $q_x$ )	Number of survivors ( $l_x$ )	Complete expectation of life ( ${}^oe_x$ )	Rate of mortality ( $q_x$ )	Number of survivors ( $l_x$ )	Complete expectation of life ( ${}^oe_x$ )
0 .. ..	.02521	100,000	67.14	.01989	100,000	72.75
10 .. ..	.00056	96,488	59.53	.00035	97,228	64.78
20 .. ..	.00186	95,460	50.10	.00064	96,774	55.06
30 .. ..	.00170	93,801	40.90	.00096	96,055	45.43
40 .. ..	.00297	91,861	31.65	.00217	94,715	36.00
50 .. ..	.00819	87,553	22.92	.00530	91,573	27.03
60 .. ..	.02221	76,256	15.47	.01203	84,665	18.78

80 .. ..	.11958	23,658	5.47	.09314	39,633	6.30

$q_x$  = probability of dying within one year at specified ages.  $l_x$  = number surviving at specified ages out of 100,000 births.  ${}^oe_x$  = complete expectation of life at specified ages.

The following table shows a comparison of the complete expectation of life at selected ages for males and females as calculated from the life tables of 1920-22, 1932-34, 1946-48 and 1953-55.

COMPLETE EXPECTATION OF LIFE ( $^{\circ}e_x$ ) AT SELECTED AGES: AUSTRALIA

Age (x)	Males				Females			
	1920-22	1932-34	1946-48	1953-55	1920-22	1932-34	1946-48	1953-55

(a) Number of deaths of children aged under one year per 1,000 live births registered.

Compared with other countries, Australia occupies a favourable position in respect of infant mortality. In 1961, only a few countries recorded a lower rate than Australia. Rates for Australia and the principal countries of the world for the latest available year are shown in the tables on pages 397-8 of § 7. International Vital Statistics.

(b) *Under Four Weeks.* The following table shows infant mortality rates under four weeks of age in each State and Territory during the period 1926 to 1961.

#### INFANT MORTALITY RATES(a): UNDER FOUR WEEKS

Period	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.

1961 ..	14.86	13.46	14.80	12.99	12.76	11.91	14.81	10.96	14.01

(a) Number of deaths of children aged under four weeks per 1,000 live births registered.

(c) *Four Weeks and under One Year.* Infant mortality rates for children aged four weeks and under one year are shown in the following table for the period 1926 to 1961.

#### INFANT MORTALITY RATES(a): FOUR WEEKS AND UNDER ONE YEAR

Period	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
AVERAGE ANNUAL RATES									
1926-30 ..	25.11	22.59	19.75	20.11	24.17	20.25	51.72	42.45	23.03
1931-35 ..	14.30	14.98	11.55	12.13	15.70	14.38	45.34	11.03	14.00
1936-40 ..	13.55	11.69	10.60	11.46	17.08	11.67	16.00	5.45	12.62
1941-45 ..	11.77	10.33	10.14	12.34	12.77	12.30	22.40	6.21	11.27
1946-50 ..	8.38	6.27	7.54	8.12	8.62	7.19	15.92	4.09	7.64
1951-55 ..	7.77	5.52	6.49	7.60	7.14	7.33	16.65	4.12	6.89
1956-60 ..	6.19	5.17	5.85	6.84	6.41	7.33	11.81	4.04	5.98

#### ANNUAL RATES

1957 ..	6.31	5.14	6.46	6.86	5.96	6.52	15.48	1.76	6.05
1958 ..	5.99	4.75	5.64	6.68	7.17	7.12	14.34	6.28	5.99
1959 ..	6.28	5.99	5.64	6.68	6.37	8.58	11.31	2.94	6.23
1960 ..	5.91	4.76	5.17	5.68	5.73	7.91	6.43	5.69	5.52
1961 ..	5.98	4.34	5.21	7.01	6.91	4.90	9.11	4.61	5.53

(a) Number of deaths of children aged four weeks and under one year per 1,000 live births registered.

(ii) *Australia. (a) Under One Year.* The fact that out of 584,962 male infants born from 1957 to 1961, 13,417 (22.94 per 1,000) died during the first year of life, while of 555,188 female infants only 10,081 (18.16 per 1,000) died during the first year, accords with the universal experience that during the first few years of life the higher death rate of male infants tends to counteract the excess of male births. Stillbirths, for which masculinity is also higher, are not included in any of the tables relating to deaths.

As shown by the following table, the disparity is greater during the first four weeks of life, termed the neonatal period, than during the remainder of the first year of life, or the post-neonatal period.

### INFANT DEATHS AND MORTALITY RATES: AUSTRALIA

Period	Number of deaths						Rates(a)					
	Neonatal— under four weeks		Post- neonatal— four weeks and under one year		Total under one year		Neonatal— under four weeks		Post- neonatal— four weeks and under one year		Total under one year

(a) Number of deaths per 1,000 male or female live births registered.

(b) *Under Four Weeks.* The following table shows particulars of infant deaths in the first four weeks of life, or the neonatal period, from 1931 to 1961. It will be seen that, for both males and females, the risk of death is very much greater during the first day of life than subsequently.

### INFANT DEATHS AND MORTALITY RATES—UNDER FOUR WEEKS: AUSTRALIA

Period	Number of deaths						Rates(a)					
	Early neonatal			Late neonatal— one week and under four weeks			Early neonatal			Late neonatal— one week and under four weeks		
	Under one day		One day and under one week				Under one day		One day and under one week			
	Males	Fe- males	Males	Fe- males	Males	Fe- males	Males	Fe- males	Males	Fe- males	Males	Fe- males

1961 ..	976	744	739	490	236	176	7.93	6.36	6.00	4.19	1.92	1.51

(a) Number of deaths per 1,000 male or female live births registered. (b) Not available.  
(c) Includes under one day.

Graphs showing infant deaths and infant mortality rates for each year from 1910 to 1962 will be found on pages 367 and 368 respectively.

(iii) *Causes of death—Children under One Year.* (a) *Numbers.* Causes of death of children under one year of age should be considered in relation to age at death, because the emphasis on various causes changes rapidly as age at death varies.

A summary for 1961 of deaths of children under one year of age, classified according to principal causes of death and age at death, is given in the following table.

# CAUSES OF DEATH: CHILDREN UNDER ONE YEAR OF AGE, AUSTRALIA, 1961

International Statistical Classification number	Cause of death	Age at death										Total under one year
		Days		Total under one week	Weeks			Months				
		Under 1	1-6		1	2	3	1-2 (a)	3-5	6-8	9-11

(a) 490-493, 500-502, 763.

7. *Age Distribution.*—(i) *Number of Deaths.* Age at death is recorded for statistical purposes in days for the first week of life, in weeks for the first four weeks, in months for the first year and in completed years of life thereafter. These ages are usually combined in groups for publication, the most common being weeks for the first four weeks, months or groups of months for the first year, single years of age of the first five years and thereafter the five-year groups 5-9 years, 10-14 years, etc. A summary in this form for the year 1961 is given for Australia in the following table.

## AGE AT DEATH: AUSTRALIA, 1961

Age at death	Males	Females	Persons	Age at death	Males	Females	Persons
Under 1 week ..	1,715	1,234	2,949	5-9 years ..	260	192	452
1 week and under 2 weeks ..	129	83	212	10-14 ..	273	150	423
2 weeks and under 3 weeks ..	66	55	121	15-19 ..	511	184	695

Total under 5 years ..	3,233	2,419	5,652	Total, All Ages ..	50,248	38,713	88,961

There are different mortality rates at various stages of life, and the actual number of deaths in any period is related to the numbers living at the respective stages. Changes in the number of deaths from one period to another are associated with changes in the rate of mortality in the various age groups and by the changed proportions of persons living in the different groups.

The combined effect of various influences, i.e. the steady decline in the rate of mortality, the long-term decline in the birth-rate, and the effects of past and present migration on the age distribution of the population, is shown in the following table, which shows the proportion of deaths in various age groups in ten-year periods from 1901 to 1960 and for the year 1961.

## PROPORTION OF DEATHS IN EACH AGE GROUP: AUSTRALIA

(Per cent.)

Period	Age at death (years)								Total
	Under 1	1-4	5-19	20-39	40-59	60-64	65 and over	Unspecified	
1901-10 ..	20.51	6.45	6.37	14.99	17.99	5.31	28.26	0.12	100.00
1911-20 ..	16.66	6.09	5.49	14.44	20.32	6.19	30.68	0.13	100.00
1921-30 ..	13.10	4.51	4.85	12.12	20.55	8.26	36.53	0.08	100.00
1931-40 ..	7.40	2.56	3.83	9.36	20.54	8.36	47.92	0.03	100.00
1941-50 ..	6.79	1.71	2.26	6.01	19.04	9.33	54.84	0.02	100.00
1951-60 ..	5.59	1.33	1.80	4.90	17.27	9.18	59.90	0.03	100.00
1961—									
Males ..	5.35	1.08	2.08	5.23	19.93	9.91	56.39	0.03	100.00
Females ..	5.16	1.09	1.36	3.36	13.12	6.99	68.91	0.01	100.00
Persons ..	5.27	1.08	1.77	4.42	16.97	8.64	61.83	0.02	100.00

A table showing these proportions for males and females separately for the period 1901 to 1950 was published in Official Year Book No. 39, page 614.

(ii) *Age-specific Death Rates.* In previous issues of the Official Year Book, average annual age-specific death rates were given for each State and Australia for the periods 1932-34, 1946-48 and 1953-55 (see Official Year Books, Nos. 37, p. 778, No. 39, pp. 615-6 and No. 44, pp. 640-1). These rates were based on the age distribution of the population at the relevant censuses.

Intercensal estimates of the age distribution of the population are available for Australia and for the larger States. The following table shows age-specific death rates for Australia for the years 1959, 1960 and 1961.

#### AGE-SPECIFIC DEATH RATES(a): AUSTRALIA

Age group (years)	1959	1960	1961	Age group (years)	1959	1960	1961

(a) Average number of deaths per 1,000 of mid-year population in each age group.

8. *Causes of Death.*—The classification of causes of death adopted for Australia by the Commonwealth Bureau of Census and Statistics at the inception of its mortality statistics in 1907 was that introduced by the International Institute of Statistics in 1893, reviewed by that Institute in 1899, and revised by an International Commission in 1900. This classification became known as the International List of Causes of Death, and further international revisions in 1909 (Second), 1920 (Third), 1929 (Fourth), 1938 (Fifth), 1948 (Sixth), and 1955 (Seventh), were successively adapted for use in Australian statistics.

The Sixth Revision of the International Statistical Classification of Diseases, Injuries and Causes of Death was used in Australia for deaths registered in 1950 to 1957. The Seventh Revision has been used for deaths registered in 1958 and subsequent years. The Sixth Revision, for the first time in connexion with the International Classification, laid down rules for a uniform method of selecting the main cause to be tabulated if more than one cause is stated on the death certificate. These rules were maintained in the Seventh Revision, which was concerned mainly with certain essential changes and amendment of errors and inconsistencies in the previous classification. Prior to 1950, the rules adopted in Australia for the selection of the cause of death to be tabulated were those laid down in the United States Manual of Joint Causes of Death, first published in 1914 and revised to conform to successive revisions of the International List.

The adoption of the new method introduced with the Sixth Revision and maintained in the Seventh marked a fundamental change in Australian cause of death statistics, emphasis now being placed on the underlying cause of death as indicated by the certifying practitioner. This change in principle affects the comparability of the statistics for 1950 and subsequent years with those for earlier years. A complete detailed classification of causes of death for Australia for 1950 according to both the Fifth and Sixth Revisions was shown in *Demography*, Bulletin No. 68, 1950.

In order to facilitate the concise presentation of cause of death statistics, the present International Classification provides two special lists of causes for tabulation—the Intermediate List of 150 causes and the Abbreviated List of 50 causes. The latter has been used as the base of the cause of death tabulations A to C which follow. Some categories have been sub-divided to show additional particulars of interest in Australian statistics. Tables A and B show deaths of males and females, respectively, in age groups for 1961 and Table C shows the total numbers of males and females who died, the death rates per million of mean population, and the percentage of total deaths for 1961.

9. Deaths from Principal Causes.—(i) *General*. In the preceding tables, particulars have been given for each of the causes of death comprising the Abbreviated Classification according to the Seventh Revision of the International List. Certain important causes are treated in detail hereunder. The Abbreviated Classification numbers used in tables A to C (pp. 387-90) are indicated in parentheses for each cause or group of causes.

(ii) *All Forms of Tuberculosis (B1, B2)*. (a) *General*. The total number of deaths classified to all forms of tuberculosis in 1961 was 447, consisting of 335 males and 112 females. In comparing any of the figures for 1950 and subsequent years with those for 1949 and earlier years, consideration should be given to the effect of the change in basis from the Fifth to the Sixth Revision of the International List. This was discussed in Official Year Book No. 39, page 626.

(b) *Age at Death*. The following table shows the age groups of males and females who were classified as dying from tuberculosis in 1961, together with figures for 1921, 1931, 1941 and 1951.

#### TUBERCULOSIS (ALL FORMS): DEATHS IN AGE GROUPS, AUSTRALIA

Age group (years)	Males					Females				
	1921	1931	1941	1951	1961	1921	1931	1941	1951	1961
0-14 .. ..	143	90	63	23	5	128	81	54	35	1
15-29 .. ..	477	294	162	46	2	540	487	275	68	..

45-64 .. ..	692	674	793	570	128	278	252	251	126	41
65 and over ..	138	193	279	306	175	56	89	110	86	50
Not stated ..	3	..	..	..	..	..	..	..	1	..
Total ..	2,171	1,836	1,725	1,080	335	1,516	1,331	1,009	458	112

(c) *Death Rates*. The reduction in mortality from tuberculosis is shown by the decline in the crude death rate from tubercular diseases, which fell from 68 per 100,000 of mean population in 1921 to 18 in 1951, and still further to 4 in 1961. The reductions in the younger age groups are much greater, as can be seen from the table above.

A comparison of the death rates from tuberculosis for Australia with those for various other countries, made on the latest figures available, shows that Australia, with a rate of 4.3 deaths per 100,000 of mean population, occupies a favourable position as regards this disease. Whereas the rate for the Netherlands is only 2.8, rates range as high as 46.8 for Portugal. For various other countries, rates are as follows:—Denmark 4.0; Canada 4.7; New Zealand 4.8; United States of America 5.9; United Kingdom 7.7; South Africa (European population) 7.8; Switzerland 15.7; Greece 16.6; Italy 18.2; France 22.1; Finland 26.0; Japan 34.2.

(iii) *Malignant Neoplasms, including Neoplasms of Lymphatic and Haematopoietic Tissues (B18)*. (a) *General*. Deaths classified under this heading according to the Sixth Revision of the International List (used in Australia for deaths registered in 1950 to 1957) are not directly comparable in total with those on the Fifth Revision basis (*see* Official Year Book No. 39, page 628). This should be kept in mind in considering the comparisons shown in the following pages.

(b) *Seat of Disease*. Tables showing the seat of disease in conjunction with age and conjugal condition of the persons dying from malignant neoplasms in 1961 will be found in *Demography*, Bulletin No. 79. A summary regarding seat of disease for 1961 is given below.

**DEATHS FROM MALIGNANT NEOPLASMS AND NEOPLASMS OF LYMPHATIC

(c) *Age at Death.* The ages of males and females who died from malignant neoplasms in 1961 are given below, together with figures for 1921, 1931, 1941 and 1951. The increase in the number of deaths from malignant neoplasms in the years since 1921 is due principally to the increase in the number of people in the higher age groups, at which ages the risks of cancer are much greater. While the total population increased by about 93 per cent. between 1921 and 1961, the number of people over 55 years of age increased by about 178 per cent. The increase in the number of deaths in the lower age groups from 1951 is partly due to the inclusion of neoplasms of lymphatic and haematopoietic tissues, and it is probable also that part of the increased number of deaths from cancer recorded in recent years has been due to improved diagnosis and certification on the part of the medical profession.

**MALIGNANT NEOPLASMS(a): NUMBER OF DEATHS IN AGE GROUPS,  
AUSTRALIA**

(a) Includes neoplasms of lymphatic and haematopoietic tissues.

(d) *Death Rates.* The death rates from malignant neoplasms have continued to rise over recent years. The rates are crude death rates representing the number of deaths from malignant neoplasms per 100,000 of mean population and do not take account of changes in the age constitution of the population, and to a substantial extent they reflect the increasing age of the population rather than the true change in mortality from malignant neoplasms (see previous paragraph). In 1921, the rate for Australia was 87 (males, 88; females, 87); in 1931 it was 101 (males, 105; females, 97); in 1941 it was 119 (males 119; females, 120); and in 1951 it had risen to 126 (males, 130; females, 122). Figures for 1961 gave a rate of 130 (males, 139; females, 121).

Death rates from malignant neoplasms per 100,000 of mean population for Australia and for various other countries are as follows:—Portugal, 95; Japan, 100; Australia and Canada, 130; South Africa (white population) and New Zealand, 139; Italy, 144; United States of America, 147; Finland, 155; the Netherlands, 168; Switzerland, 195; France, 197; and the United Kingdom, 214. The rates are for the latest available year in each case.

(iv) *Diseases of the Heart (B25 to B28).* The number of deaths classified to diseases of the heart in 1961 was 31,895 (18,896 males and 12,999 females). This class is the largest among causes of death, the rate having increased from 112 per 100,000 of mean population in 1911–15 to 304 in 1961. The increase in the number of deaths recorded from heart diseases has been particularly pronounced during the past twenty years. The rapid increase in mortality is partly a reflection of the ageing of the population, but the figures have been influenced mainly by improved diagnosis and certification by medical practitioners.

The death rates for heart diseases for various years from 1921 were as follows:—1921, 93 (males, 102; females, 83); 1931, 159 (males, 178; females, 142); 1941, 269 (males, 306; females, 231); 1951, 314 (males, 367; females, 259); and 1961, 304 (males, 356; females, 250). Deaths from heart diseases in 1961 represented 36 per cent. of the total deaths.

(v) *Puerperal Causes (B40).* It was shown in Official Year Book No. 39, page 634, that the changes introduced with the Sixth Revision of the International List did not significantly affect the comparability of the total number of deaths from puerperal causes. The Seventh Revision, introduced in 1958, did not affect comparability. The death rate from these causes (including criminal abortion) has fallen rapidly during recent years and in 1961 the rate was 0.5 per 1,000 live births, compared with a rate of 6 per 1,000 in 1936. The 108 deaths in 1961 correspond to a death rate of 2.08 per 100,000 females. The death rate may be expressed in other terms by stating that 1 of every 2,198 women giving birth to a live child in 1961 died from puerperal causes.

The death rate per 1,000 live births from puerperal causes in various countries for the latest available year is as follows:—United States of America, 0.3; United Kingdom, New Zealand, Canada, Denmark and Netherlands, 0.4; Australia and France, 0.5; Finland and Switzerland, 0.7; Italy, 1.1; and Japan, 1.3.

Tables showing ages at marriage and at death, duration of marriage, and issue will be found in *Demography*, Bulletin No. 79.

(vi) *Causes of Infant Mortality.* See paragraph devoted to causes of infant deaths on pages 383–4.

(vii) *Accidents, Poisonings and Violence (BE47 to BE50).* (a) *General.* Deaths in this class are classified according to external cause and not according to nature of injury. The classification provides sub-groups for accidents, including adverse reactions to prophylactic inoculations, therapeutic misadventures and late effects of accidental injury; suicide; homicide and injuries purposely inflicted by other persons; and injury resulting from operations of war, including delayed effects.

The following table, showing the death rates in the main sub-groups per 100,000 of mean population, indicates that the death rate from violence is between two and three times as great for males as for females. It can be seen also that in 1961 the proportion of deaths caused by violence was 7.69 per cent., compared with 6.76 per cent. in 1931–35.

The low level of the rates and proportions for the years 1941–45 is due largely to the exclusion of deaths of defence personnel from accidents, suicide and homicide, though the rates have been based on total mean population (including defence personnel). A further contributing factor is the decrease during this period in the number of automobile accidents. From July, 1947, deaths of defence personnel from accidents, etc., have again been included.

## ACCIDENTS, POISONINGS AND VIOLENCE: DEATH RATES(a)

1961 ..	72	30	52	17	7	12	2	1	1	91	38	65	966	514	769

(a) Number of deaths per 100,000 of mean population. (b) Includes "open verdict".  
(c) Includes late effects of injuries due to operations of war.

(b) *Accidents (BE47, BE48).* In 1961, the total number of deaths from accidental causes was 5,437 (3,857 males and 1,580 females). Just over half of the accidental deaths were the result of transport accidents. Of these, the numbers attributable to the major causes, and the percentages of the total accidental deaths in each case, were as follows:—Motor vehicle traffic accidents, 2,531 (46.55 per cent.); motor vehicle non-traffic accidents, 60 (1.10 per cent.); other road vehicle accidents, 57 (1.05 per cent.); railway accidents, 102 (1.88 per cent.); water transport accidents, 113 (2.08 per cent.); aircraft accidents, 54 (0.99 per cent.); a total of 2,917 (53.65 per cent.). Other important causes were accidental falls, 912 (16.77 per cent.); accidental drowning, 467 (8.59 per cent.); and accidents caused by fire and explosion of combustible material, 196 (3.60 per cent.).

(c) *Suicide (BE49). Modes Adopted.* Deaths from suicide in 1961 numbered 1,249 (males, 901; females, 348). Firearms and explosives were used in 307 cases (24.58 per cent. of total deaths by suicide). Other important modes adopted, together with the numbers and relevant percentages, were as follows:—Poisoning other than by gases, 375 (30.02 per cent.); poisoning by gases, 247 (19.78 per cent.); hanging or strangulation, 167 (13.37 per cent.); submersion (drowning), 56 (4.48 per cent.); other modes, 97 (7.77 per cent.).

Of the 901 males who committed suicide, 289 (32.08 per cent.) used firearms or explosives. For females the most common mode was poisoning (other than by gases). This was used in 175 cases (50.29 per cent.).

*Age at Death.* The following table shows the age of persons who committed suicide in 1961.

## AGE OF PERSONS WHO COMMITTED SUICIDE: AUSTRALIA, 1961

Age group (years)	Males	Females	Persons	Age group (years)	Males	Females	Persons
10-14 ..	1	..	1	60-64 ..	63	34	97

50-54 ..	115	36	151				
55-59 ..	96	41	137				
				<b>Total Deaths ..</b>	<b>901</b>	<b>348</b>	<b>1,249</b>

(d) *Homicide and Operations of War (BE50).* Of the 154 deaths recorded in 1961, there were 142 deaths from homicide and injury purposely inflicted by other persons (not in war), of which assault by firearms and explosives caused 56, assault by cutting and piercing instruments 23, and assault by other means 63. Deaths from injury resulting from the operations of war numbered 12, but all were deaths from late effects of such injuries.

10. *Age at Death and Average Issue of Deceased Married Males and Females.*—*Demography*, Bulletin No. 79, contains a number of tables showing, in combination with the issue, the age at marriage, age at death and occupation of married (including widowed or divorced) persons who died in Australia in 1961. Deaths of married males in 1961 numbered 38,497, and those of married females, 30,849. The tables which follow deal, however, with only 37,967 males and 30,636 females, the information regarding issue in the remaining 743 cases being incomplete. The total number of children in the families of the 37,967 males was 113,067 and of the 30,636 females, 98,763. The average number of children is shown for various age groups in the following table.

**AGE AT DEATH AND AVERAGE ISSUE OF DECEASED MARRIED(a) MALES  
AND FEMALES: AUSTRALIA**

**§ 6. Vital Statistics of External Territories**

The following table shows, for the year 1961, the number of marriages, births and deaths registered in the external territories under the control of Australia. More detailed information will be found in a series of tables in *Demography*, Bulletin No. 79.

**EXTERNAL TERRITORIES: VITAL STATISTICS, 1961**

Territory	Marriages	Births	Deaths
Christmas Island(a) .. ..	3	100	11
Cocos (Keeling) Islands(b) .. ..	..	2	1
Norfolk Island(a) .. ..	6	10	11
Papua(c) .. ..	96	239	29
Trust Territory of New Guinea(c) .. ..	111	377	35
Trust Territory of Nauru(c) .. ..	3	19	1

(a) Total population.  
population only.

(b) Excluding those registered on Home Island.

(c) Non-indigenous

**§ 7. International Vital Statistics**

**Vital Statistics Rates—Principal Countries.**—In the following table, vital statistics rates for selected countries are shown. Crude marriage, birth, and death rates represent the number of "events" reported for the year stated per 1,000 of the population. Infant mortality rates

are the number of deaths which occurred under one year of age per 1,000 live births. The true death rates (reciprocals of the expectation of life at birth) have been computed from the life tables for the respective countries as published in the United Nation's *Demographic Yearbook*, 1961 (see explanation of true death rates, para. 4, p. 378).

In many instances, the rates shown in the following table are estimates and the results of sample surveys only. Reference should be made to the detailed comments contained in the United Nation's *Demographic Yearbook*, 1961 (see particularly Technical Notes on Statistical Tables and footnotes to the tables).

## CHAPTER XI

### HOUSING AND BUILDING

**NOTE.**—In § 1 of this chapter details are given of the characteristics of dwellings as obtained from censuses, § 2 provides a summary of building activities, § 3 outlines government activities in the field of housing, and § 4 relates to financial arrangements associated with the erection or purchase of homes.

For further information on dwellings as obtained from censuses, reference should be made to the results published in the detailed tables of the 1961 Census (*see Price List of Publications at end of this volume*) and earlier censuses and in the mimeographed statements of the 1961 Census.

More detailed information on building activity may be found in the *Quarterly Bulletin of Building Statistics*, and current information is obtainable also in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics*, and in the mimeographed statements *Building Statistics: Number of New Houses and Flats* (quarterly), and *Building Approvals* (monthly). Details relating to a State are available from publications issued regularly by the Deputy Commonwealth Statistician in that State.

Commonwealth Government activities relate in the main to the provision of moneys to State Governments under Commonwealth-State Housing Agreements, to the assistance of ex-service personnel in the erection and purchase of homes, and to the provision of homes in the Territories. Further details of activities of the Commonwealth and State Housing Authorities are shown in the reports issued by these authorities.

#### § 1. Census Dwellings

**1. General.**—At each census of the population, in addition to the questions relating to the personal particulars of the individual members of households, there have been a number of important questions on the census schedule designed to elicit information concerning the dwellings in which the population was housed at the date of the census. For the purpose of the census, a "dwelling" is any habitation occupied by a household group living together as a domestic unit, whether comprising the whole or only part of a building. The term has therefore a very wide reference, and includes, *in addition to houses and flats*, a great variety of dwellings ranging from a single-roomed shack to a multi-roomed hotel or institution.

**2. Number of Dwellings.**—(i) *Censuses 1911 to 1961.* The following table shows the number of occupied and unoccupied dwellings in Australia at each census from 1911 to 1961. Occupied dwellings are classified into "private" and "other than private" dwellings (*see para. 3, p. 403*, for definitions of "private" and "other than private" dwellings). As the term "unoccupied dwellings" includes "week-enders", "holiday homes" and other dwellings whose usual occupants were temporarily absent on census night, the total number of unoccupied dwellings must not be taken as representing the number of vacant houses and flats available for occupancy. Newly completed dwellings awaiting occupancy are also included as "unoccupied".

**DWELLINGS: AUSTRALIA, CENSUSES, 1911 TO 1961**  
(EXCLUDING DWELLINGS OCCUPIED SOLELY BY FULL-BLOOD ABORIGINALS)

Census				Occupied			Unoccupied
				Private	Other than private	Total	
1911	..	..	..	894,389	29,070	923,459	33,473
1921	..	..	..	1,107,010	46,275	1,153,285	51,163
1933	..	..	..	1,509,671	37,705	1,547,376	68,772
1947	..	..	..	1,873,623	34,272	1,907,895	47,041
1954	..	..	..	2,343,421	36,932	2,380,353	112,594
1961	..	..	..	2,781,945	35,325	2,817,270	194,114

(ii) *Census, 1961.* The following table shows the number of occupied and unoccupied dwellings in the urban and rural areas of Australia at the Census of 30th June, 1961. (For definitions of "urban" and "rural" see Chapter IX. Population, para. 3, p. 307.) The boundaries of the metropolitan urban and other divisions of States differ from Census to Census, and consequently accurate comparison cannot be made between figures for corresponding divisions.

The total number of occupied dwellings in Australia at the Census of 30th June, 1961, showed an increase of 18.4 per cent. over the corresponding figure for the 1954 Census, compared with an increase of 16.9 per cent. in population. Occupied private dwellings increased by 18.7 per cent., while occupied dwellings other than private decreased by 4.4 per cent. At the 1961 Census, 98.7 per cent. of the total occupied dwellings in Australia were private dwellings, compared with 98.4 per cent. in 1954. Proportional increases in total occupied dwellings over 1954 figures in each State and Territory were:—New South Wales, 16.3 per cent.; Victoria, 19.7 per cent.; Queensland, 17.4 per cent.; South Australia, 21.6 per cent.; Western Australia, 19.3 per cent.; Tasmania, 15.8 per cent.; Australian Capital Territory, 95.8 per cent.; and Northern Territory, 59.9 per cent.

Unoccupied dwellings increased by 72.4 per cent.

# NEW HOUSES: AUSTRALIA

1952-53 TO 1961-62

# NEW FLATS: AUSTRALIA

1952-53 TO 1961-62

3. **Class of Dwelling.**—The following table shows the numbers of the various classes of occupied dwellings in the metropolitan urban, other urban, and rural areas of Australia at the censuses of 1954 and 1961.

**Private dwellings** are classified into the following four categories:—

*Private House*—includes houses, sheds, huts, garages, etc., used for dwelling purposes, and shared private houses for which only one householder's schedule was received;

*Share of Private House*—portion of a shared private house which is occupied separately and for which portion a separate householder's schedule was received;

*Flat*—part of a house or other building which can be completely closed off and which has its own cooking and bathing facilities;

*Other Private Dwelling*—includes private dwellings such as rooms, apartments, etc., which are parts of buildings but are not self-contained units.

**Other than Private dwellings** include hotels; motels; boarding houses, lodging houses and hostels; educational, religious and charitable institutions; hospitals; defence and penal establishments; police and fire stations; clubs; staff barracks and quarters, etc.

It is desirable when considering the question of housing to exclude those forms of accommodation which do not represent the normal housing conditions associated with family life, and the statistics which follow relate therefore mainly to private dwellings.

### OCCUPIED DWELLINGS BY CLASS: AUSTRALIA, 1954 AND 1961

(EXCLUDING DWELLINGS OCCUPIED SOLELY BY FULL-BLOOD ABORIGINES)

(a) See text on p. 400 regarding comparability as between censuses. (b) Includes shared private houses for which only one householder's schedule was received. (c) Portion of a shared private house which is occupied separately and for which portion a separate householder's schedule was received. (d) Prior to 1961, single self-contained dwellings attached to, or situated above offices, shops, etc., were classified as private houses irrespective of the description stated in the householder's schedule. In 1961 such dwellings, if described as self-contained flats, were classified as flats. (e) Included with Private dwellings. (f) Certain institutions previously classified as "Educational" were in 1961 classified as "Religious".

NOTE.—Minus sign (—) denotes decrease.

4. **Population According to Class of Dwelling, etc.**—The following table shows the number of the various classes of occupied dwellings at the Censuses of 1954 and 1961, together with the number of inmates therein.

(a) Includes shared private houses for which only one householder's schedule was received.  
 (b) Portion of a shared private house which is occupied separately and for which portion a separate householder's schedule was received. (c) See footnote (d) to table on p. 403. (d) See footnote (e) to table on p. 403. (e) Shipping, railway and air travellers.

5. **Occupied Private Dwellings.**—(i) *Material of Outer Walls.* In the following table, occupied private dwellings are classified according to the material of the outer walls

Wood has been the most extensively used material in the construction of the outer walls, followed by brick and fibro-cement, and for Australia at 30th June, 1961, the respective proportions for which material of outer walls was specified, were 41.5 per cent., 34.3 per cent., and 16.3 per cent. Fibro-cement dwellings have increased from 1933, when the proportion was 1.6 per cent. (23,696 dwellings), to 6.3 per cent. in 1947 (117,631 dwellings), to 12.7 per cent. in 1954 (296,553 dwellings), and to 16.3 per cent. in 1961 (452,267 dwellings). The proportions of both brick and wooden dwellings have shown small decreases since 1954. The numbers of dwellings of all other materials except fibro-cement and concrete have decreased. Brick dwellings in 1961 represented 50.3 per cent. of all occupied private dwellings in the metropolitan urban division, while in the other urban and rural divisions wooden dwellings predominated, the percentages of such dwellings being 54.8 per cent. and 55.3 per cent. respectively.

### OCCUPIED PRIVATE DWELLINGS BY MATERIAL OF OUTER WALLS: AUSTRALIA, 1954 AND 1961

(a) See text on p. 400 regarding comparability as between censuses.

NOTE.—Minus sign (–) denotes decrease.

(ii) *Number of Rooms.* For Census purposes, the kitchen and any permanently enclosed sleep-out were included in the number of rooms in the dwelling, but the bathroom, pantry, laundry and storehouse were excluded unless generally used for sleeping.

Excluding houses with rooms unspecified, private houses of four, five and six rooms represented 80.2 per cent. of the total number of private houses in Australia at 30th June, 1961, compared with 78.3 per cent. in 1954; 90.2 per cent. of the total increase in the number of private houses since 1954 consisted of houses containing these numbers of rooms.

(a) Includes kitchen and permanently enclosed sleep-out but does not include bathroom, pantry, laundry or storehouse, unless generally used for sleeping. (b) Includes houses, sheds, huts, etc., and shared private houses for which only one householder's schedule was received. (c) Portion of a shared private house which is occupied separately and for which portion a separate householder's schedule was received. (d) See footnote (d) to table on p. 403. (e) See text on p. 400 regarding comparability as between censuses.

(iii) *Number of Inmates.* A classification of occupied private dwellings according to the number of inmates is shown in the following table.

For Australia as a whole, at the 1961 Census, private houses with two inmates were most numerous, followed by those with four and three inmates in that order.

An increase of 21 per cent (93,418 houses) in the number of private houses occupied by two inmates brought this group from second position in 1954, to first position in 1961. Houses with two inmates in 1961 constituted 22 per cent. of the total number of occupied private houses in Australia, while private houses with four and three inmates constituted 21 per cent. and 19 per cent., respectively.

The greatest proportional increase since 1954 in the number of occupied private dwellings occurred in those with one inmate, the growth of 33.9 per cent. being due mainly to an increase of 34.5 per cent. in the number of private houses with one inmate and an increase of 108.3 per cent. in the number of flats with one inmate. The number of flats with two, three and four inmates showed increases of 66.7 per cent., 46.7 per cent. and 61.8 per cent. respectively since 1954. However, the comparison of figures for flats between 1954 and 1961 is affected by the classification as flats in 1961, of dwellings previously classified as private houses (see footnote (d) to table on p. 403).

At 30th June, 1961, dwellings with less than 6 inmates represented 86.4 per cent. of total occupied private dwellings compared with 87.2 per cent. in 1954.

#### OCCUPIED PRIVATE DWELLINGS BY NUMBER OF INMATES: AUSTRALIA, 1954 AND 1961

(EXCLUDING DWELLINGS OCCUPIED SOLELY BY FULL-BLOOD ABORIGINALS)

(a) Includes houses, sheds, huts, etc., and shared private houses for which only one household's schedule was received. (b) Portion of a shared private house which is occupied separately and for which portion a separate household's schedule was received. (c) See footnote (d) to table on p. 403. (d) See text on p. 400 regarding comparability as between censuses.

(iv) *Nature of Occupancy.* At the 1961 Census, 52.0 per cent. of occupied private houses in Australia for which particulars were supplied were occupied by owners, 25.1 per cent. by purchasers by instalments, 20.7 per cent. by tenants, and 2.2 per cent. by others. The corresponding percentages in 1954 were—owners, 52.5 per cent.; purchasers by instalments, 16.8 per cent.; tenants, 28.1 per cent.; and others, 2.6 per cent. Owner-occupied houses in Australia increased by 17.3 per cent. between 1954 and 1961, and those being purchased by instalments by 76.8 per cent., the increase in these two groups combined being nearly 32 per cent., while tenant-occupied houses decreased by 12.4 per cent.

In the metropolitan areas, 80.6 per cent. of all occupied private houses were either owner-occupied or being purchased by instalments, as compared with 74.6 per cent. in the other urban areas and 70.2 per cent. in the rural areas.

Tenants occupied by far the greater proportion of flats and other private dwellings.

 (e) At the 1954 Census, figures were compiled from the answers furnished in response to the instruction on the householder's schedule: "Tenant paying rent to a Government Authority to write 'Tenant (G)'". At the 1961 Census, householders were instructed on the schedule to write "Tenant (G)" if they paid rent to the Governmental Housing Authority in their State or Territory.

(v) *Weekly Rent—Tenanted Private Dwellings.* The following table shows tenanted private dwellings in the metropolitan urban, other urban and rural areas of Australia classified according to weekly rent (unfurnished).

Information tabulated concerning rents was restricted to the actual rent paid per week by tenants for unfurnished private dwellings. Particulars of rents shown in the following tables are therefore on an *unfurnished* basis. Dwellings shown as rent "Not stated" include those whose rents were shown on householders' schedules on a *furnished* basis, and those whose rents were not applicable (e.g., for shop and dwelling combined). In this section information on "tenanted private dwellings" *excludes particulars of dwellings occupied by "Tenants (Governmental Housing)" in each State*, i.e. those householders who at the 1954 Census furnished answers in response to the instruction on the census householder's schedule "Tenant paying rent to a Government Authority to write 'Tenant (G)'" and those householders who at the 1961 Census furnished answers in response to the instruction on the census householder's schedule "Tenant paying rent to the Governmental Housing Authority in their State to write 'Tenant (G)'". *For the Australian Capital Territory and the Northern Territory particulars of all tenanted private dwellings are included.*

<b>Average weekly rent (unfurnished) per private dwelling ..</b>	<b>s. d. 32 2</b>	<b>s. d. 34 2</b>	<b>s. d. 50 6</b>	<b>s. d. 36 2</b>	<b>s. d. 35 0</b>	<b>s. d. 57 7</b>	<b>s. d. 66 3</b>	<b>s. d. 94 9</b>	<b>s. d. 62 5</b>	<b>s. d. 66 6</b>

(a) These figures exclude dwellings occupied by "Tenants" (Governmental Housing) except those in the Northern Territory and the Australian Capital Territory. (b) Includes houses, sheds, huts, etc., and shared private houses for which only one householder's schedule was received. (c) Portion of a shared private house which is occupied separately and for which portion a separate householder's schedule was received. (d) See footnote (d) to table on p. 403. (e) See text on p. 400 regarding comparability as between censuses. (f) Includes tenanted dwellings which were rent-free, those rented on a furnished basis, and those for which the rents were not applicable (e.g., for shop and dwelling combined).

At the 1954 Census, nearly 55 per cent. of the tenanted private houses in Australia for which unfurnished rents were stated had weekly rentals of between 20s. and 40s.; at the 1961 Census, only 28 per cent. were within these limits. In 1954, 18 per cent. had rentals below 20s. and 27 per cent. above 40s. In 1961, 8 per cent. had rentals below 20s. and 64 per cent. above 40s. At the 1961 Census, 31 per cent. of the flats in Australia had rentals of between 40s. and 70s., 10 per cent. were below this range, and 59 per cent. above it. At the 1954 Census, the corresponding proportions were:—51 per cent., 34 per cent. and 15 per cent. In 1961, 14 per cent. of tenanted private houses and 40 per cent. of tenanted flats were in the rental range 100s. and over. Dwellings whose rents were not stated were excluded in obtaining these proportions.

The average rentals shown in this table for all tenanted private dwellings in Australia at the 1961 Census were 90 per cent. higher than in 1954 (79 per cent. higher for houses and 88 per cent. higher for flats). Metropolitan rentals in 1961 were higher by 106 per cent., 98 per cent. and 93 per cent., respectively, than in 1954.

In all such comparisons as these, the difference in basis between the 1954 and 1961 Censuses, referred to in the opening paragraph (p. 410), and also the differences in the urban and rural divisions (*see* p. 400), should be borne in mind.

(a) These figures exclude tenanted private houses occupied by "Tenants (Governmental Housing)" in 1954, and those occupied by "Tenants (State Governmental Housing Authority)" in 1961. However, the data used for the Australian Capital Territory and Northern Territory include particulars of such dwellings. (b) *See* text on p. 400 regarding comparability as between censuses.

(vi) *Date of Building.* The numbers of occupied private dwellings in Australia at the Census of 30th June, 1961, classified according to date of building from replies given to the relevant question at the 1961 Census, are shown below.

(a) Includes houses, sheds, huts, etc., and shared private houses for which only one household's schedule was received. (b) After 30th June, 1954, but year not stated.

NOTE.—The information above was derived from replies of occupants of dwellings at 30th June, 1961. For a number of reasons, the figures shown on the first line of the table do not agree with the number of dwellings by class recorded at the Census of 30th June, 1954, e.g., demolitions, conversion from one class of dwelling to another and errors of memory regarding date of building. Also, the figures are not precisely comparable with 1954 data because of changes in classification of dwellings adopted at the 1961 Census, as indicated in footnotes (d) and (e) to table on p. 433.

Of those occupied private dwellings in Australia where date of building was stated, 21.8 per cent. were built after 30th June, 1954. In the metropolitan urban division, 22.4 per cent. were built after 30th June, 1954, while in the other urban and rural divisions, the proportions were 22.7 per cent. and 18.6 per cent. respectively.

(vii) *Facilities, etc.* At the 1961 Census a question was asked regarding the facilities gas, electricity and television. Of those persons who answered the question on gas and electricity, 51.4 per cent. had electricity but not gas, and 45.2 per cent. had both electricity and gas, making a combined total of 96.6 per cent. with electricity. Occupied private dwellings with gas but not electricity constituted 0.2 per cent. In the metropolitan urban division 99.7 per cent. of occupied private dwellings had electricity, while in the other urban and rural divisions the proportions with electricity were 98.7 per cent. and 82.5 per cent. respectively. The proportion of private dwellings with both electricity and gas was 65.6 per cent. in metropolitan urban, 25.3 per cent. in other urban and 4.4 per cent. in rural.

Of the occupied private dwellings in Australia stated to have a television set, 81.2 per cent. were in the metropolitan urban division. In this division 64.6 per cent. of occupied private dwellings were stated to have a television set.

Similar information was not compiled for the 1954 Census, but a summary of information obtained at the 1947 Census was published on page 571 of Official Year Book No. 38.

# **OCCUPIED PRIVATE DWELLINGS BY FACILITIES: AUSTRALIA, CENSUS, 30th JUNE, 1961**

(EXCLUDING DWELLINGS OCCUPIED SOLELY BY FULL-BLOOD ABORIGINALS)

Facilities	Class of dwelling				Division			Total, Aus- tralia

## **§ 2. Building**

1. **General.**—(i) *Statistics of Building Approved.* Statistics of building approvals have been compiled from (a) permits issued by local government authorities in the areas subject to building control by these authorities, and (b) contracts let or work commenced and day labour projects authorized by governmental authorities. *They relate only to approvals for buildings as distinct from the construction of roads, bridges, railways, earth works, water*

*storage, etc.* Values shown represent the estimated cost when completed (excluding cost of land) of new buildings and alterations and additions to existing buildings. Additions of £5,000 and over are included with new buildings in all States except New South Wales, where they are included in "alterations and additions".

These statistics are available from the year 1953-54.

(ii) *Statistics of Building Commenced, Completed and Under Construction.* These relate to building by private contractors, Government authorities and owner-builders.

The following outlines the scope of the statistics: (a) *only the erection of new buildings as distinct from the construction of railways, bridges, earthworks, water storage, etc., is covered*; (b) major new additions to existing buildings are included as new buildings (for New South Wales, major alterations also are included as new building); (c) minor additions, alterations, renovations and repairs are excluded because of the difficulty of obtaining details of this work; (d) temporary dwellings are excluded; (e) figures for houses exclude flats and dwellings attached to other new buildings (the value of dwellings attached to other new buildings is included with the value of buildings to which they are attached); figures for flats include "home units"; (f) imported prefabricated houses are included; (g) details obtained from Government authorities and building contractors refer to all areas whereas details for owner-builders cover only areas subject to building control by Local Government Authorities.

The following definitions of terms used in this section are necessary for interpretation of the data presented.

*Government or private ownership.* A building is classified as "government" or "private" according to ownership at date of commencement. Thus "government" includes buildings erected for Commonwealth and State Governments, Semi-Governmental and Local Government authorities either by contractor or by day-labour, whether these buildings are for their own use, for rental or sale after completion. Houses erected for *particular persons* under Government sponsored home building schemes or with Government financial assistance are classified as "private".

*Owner-built.* An "owner-built" house is one actually erected or being erected by the owner or under the owner's direction without the services of a contractor who is responsible for the whole job.

*Contract-built.* Includes the operations of all building contractors and Government instrumentalities which undertake the erection of new buildings.

*Commenced.* A building is regarded as having been commenced when work on foundations has begun. Owing to the difficulty of defining the exact point that this represents in building operations, classifications made by informants may not be entirely uniform.

*Completed.* A building is regarded as having been completed when the contractor has fulfilled the terms of the contract. As with commencements, the classifications made may not be entirely uniform.

*Under construction.* A building is regarded as being under construction if it has been commenced but not completed, whether or not work on the building is actively proceeding.

*Values.* All values shown exclude the value of land and represent the estimated value of buildings on completion.

*Type of building.* Classification is according to the function a building is intended to serve. A building which is ancillary to other buildings or forms part of a group of related buildings is classified according to the major function of the building as a whole.

*Employment.* Figures relate to persons actually working on the jobs of contractors who undertake the erection of new buildings and of Government instrumentalities which erect new buildings on their own account. They include persons actually working on alterations, additions, repairs and maintenance when these jobs are undertaken by such contractors and instrumentalities.

Contractors are asked to give details of all persons working on their jobs on a specified day, including working principals, men working as or for sub-contractors and men temporarily laid off on account of weather. Because of the intermittent employment of various types of sub-contractors on any particular job, it is sometimes difficult for contractors and authorities to

provide precise particulars of the number of sub-contractors and the number of employees of sub-contractors working on their jobs on the specified day. This factor may cause some under-estimation by persons completing returns. On the other hand, because of frequent movement between jobs of some types of tradesmen (such as electricians) who may work on several jobs on the one day, a small element of duplication may occur.

The figures *exclude* persons working on owner-built houses, and employees of builders who undertake only alterations, additions, repairs and maintenance.

2. **New Houses.**—(i) *Approved, Commenced, Completed and Under Construction, 1961–62.* The next table provides a summary of the number of new houses approved, commenced, completed and under construction in each State and Territory.

A graph showing the number of new houses commenced, completed and under construction for the period 1949–50 to 1961–62, will be found on page 401.

**NEW HOUSES: NUMBER, 1961–62**

<b>Total ..</b>	<b>71,179</b>	<b>78,797</b>	<b>81,630</b>	<b>80,775</b>	<b>74,044</b>

(a) Includes Northern Territory flats for periods prior to 1961-62.

(v) *Under Construction*, 1957-58 to 1961-62. The number of new houses under construction at the end of each year 1957-58 to 1961-62 in each State and Territory is shown in the following table.

## NEW HOUSES UNDER CONSTRUCTION: NUMBER

(INCLUDING OWNER-BUILT HOUSES)

At end of year—	N.S.W.	Vic.	Q'land	S.A.	W.A.	Tas.	N.T. (a)	A.C.T.	Aust.
1957-58 ..	17,546	18,429	3,154	5,199	3,951	1,949	199	974	51,401
1958-59 ..	16,082	16,543	2,948	5,181	3,347	1,935	177	894	47,107
1959-60 ..	14,611	15,587	2,906	5,114	3,296	1,817	262	1,174	44,767
1960-61 ..	12,487	12,010	2,713	5,006	3,016	1,578	274	1,078	38,162
1961-62 ..	11,434	11,580	2,739	4,599	3,250	1,656	303	1,153	36,714

(a) Includes flats for periods prior to 1961-62.

3. *New Flats*.—The figures in the foregoing tables, except those for the Northern Territory for periods prior to 1961-62, do not include particulars of new flats. It should be noted: (a) that the figures hereunder are additional to the numbers of houses shown in other tables, (b) that each flat is counted as a separate unit, and the numbers shown therefore relate to individual flats, (c) that new flats only are included, i.e., conversions of old buildings into flats are omitted, and (d) "home units" are included as flats.

A graph showing the number of new flats commenced, completed and under construction for the period 1949-50 to 1961-62 will be found on page 402.

(i) *Approved, Commenced, Completed and Under Construction*, 1961-62. The summary below shows the number of new flats approved, commenced, completed and under construction for the year 1961-62.

## NEW FLATS: NUMBER, 1961-62

(Individual living units)

Particulars	N.S.W.	Vic.	Q'land	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Approved ..	5,747	3,291	820	560	592	117	67	28	11,222
Commenced ..	4,927	3,001	588	605	493	166	62	28	9,870
Completed ..	5,938	4,070	928	593	265	154	2	269	12,219
Under construction at end of year ..	3,838	2,242	411	331	379	106	64	23	7,394

(ii) *Approved, Government and Private, 1957-58 to 1961-62.* The following table shows the number of new flats approved in each State or Territory, according to government and private ownership.

(a) At 29th June.

## § 3. Government Activities in the Housing Field

1. *Housing Agreements between Commonwealth and State Governments.*—Under the Commonwealth-State Housing Agreements the Commonwealth Government makes substantial loans to the States for the provision of housing.

(i) *The 1945 Agreement.* In November, 1945, the Commonwealth Government entered into an Agreement with the Governments of the States whereby the Commonwealth Government would provide finance for, and the State Governments would undertake the building of, housing projects. Tasmania withdrew from the Agreement in August, 1950, and South Australia did not begin to operate under it until July, 1953.

Between 1945–46 and 1955–56 under this Agreement the Commonwealth Government advanced £88,849,000 to New South Wales; £85,781,000 to Victoria; £24,344,000 to Queensland; £11,700,000 to South Australia; £27,050,000 to Western Australia; and £2,835,000 to Tasmania. When Tasmania withdrew from the Agreement, it repaid all advances made to it.

For information on the conditions of sale, etc., under the 1945 Agreement, *see* Year Book No. 48, page 367. In 1961, the 1945 Agreement was amended to allow sales of dwellings on terms decided by the States. But tenants eligible under the *War Service Homes Act* are entitled to purchase dwellings built under the 1945 Agreement on the terms provided in the *War Service Homes Act*.

(ii) *The 1956 Agreement.* In 1956, the Commonwealth and the States entered into a new agreement, under which added emphasis was placed on the construction of homes for private ownership. The Commonwealth Government provided finance to the States over a period of five years ending 30th June, 1961, for the erection of housing projects. For the first two years of the agreement, 20 per cent. of the money allocated to each State (and 30 per cent. for the next three years) was advanced to building societies and other approved institutions for lending to private house builders. The remaining allocation to each State was used by the States for the erection of houses for either rental or sale. The States determined the type of houses to be erected, their location and the selection of tenants, and also fixed the terms of selling.

The Commonwealth was entitled to specify that a portion of the moneys be set aside for the erection of houses for serving members of the defence forces nominated by the Commonwealth. The Commonwealth provided supplementary advances to the States equal to the amounts set aside by them for this purpose.

For other features of the 1956 Commonwealth and State Housing Agreement, *see* Year Book No. 48, page 368.

(iii) *The 1961 Agreement.* Following the termination of the 1956 Agreement on 30th June, 1961, a new agreement running for a further period of five years was entered into by the Commonwealth and the State Governments. This Agreement continues with some amendments the terms and conditions of the 1956 Agreement, but the Commonwealth and/or a State may agree to contribute funds in excess of the previous statutory maximum of 5 per cent. of a State's allocation, for the erection of dwellings for servicemen.

Under the 1961 Agreement, each advance of money, together with interest thereon, is to be repaid in equal instalments over a period of 53 years from the date each advance is made. The rate of interest chargeable on advances is the long-term bond rate at the time the advance was made less one per cent. per annum. The interest rates under the Agreement have been: from 1st July, 1961, to 6th February, 1962,  $4\frac{1}{2}$  per cent. per annum; and since 7th February, 1962, 4 per cent. per annum.

(iv) *Operations in 1961-62.* The following tables shows operations under the various Housing Agreements during 1961-62.

## COMMONWEALTH AND STATE HOUSING AGREEMENTS, 1961-62

2. *War Service Homes.*—The provision of War Service Homes is a function of the War Service Homes Division of the Department of National Development, and the administration of the *War Service Homes Act* is under the control of the Director of War Service Homes.

The *War Service Homes Act* 1918-1962 is a measure for the provision of homes for Australian ex-servicemen who served during the 1914-1918 War or the 1939-1945 War and to persons with service in Korea or Malaya. Provision is made also for assistance to the female dependants of Australian ex-servicemen and other classes of eligible persons as defined in the Act. Assistance may be granted to an eligible person and the wife or husband of that person as joint tenants, but the War Service Homes Division does not provide homes for occupation purely on a tenancy basis.

(i) *Operations, 1961-62.* The following table gives details of the operations of the War Service Homes Division in the year 1961-62 and also since the inception of the Scheme on 6th March, 1919. The figures shown include operations in the Territories of Papua, New Guinea and Norfolk Island.

**WAR SERVICE HOMES DIVISION: OPERATIONS, AUSTRALIA, 1961-62, AND TO 30TH JUNE, 1962**

(a) Includes Norfolk Island.

(b) Includes Territories of Papua and New Guinea.

In addition to the homes provided under the *War Service Homes Act* and shown in the table above, 2,004 homes which had been provided originally under the Housing Agreements with the States have been taken over in accordance with those Agreements, 83 being taken over during 1961-62.

**3. State Housing Authorities.**—The following paragraphs describe briefly the organizations of the various State Housing Authorities and their activities in the fields of home construction and provision of homes on a rental basis (*see* § 4 for their financial advances to persons wishing to purchase or build a home). For summarized figures of total government construction of houses and flats, *see* pages 419 and 422.

(i) *New South Wales—The Housing Commission of New South Wales.* (a) *General.* The Housing Commission of New South Wales was constituted in 1942, with a full-time salaried chairman and four other members remunerated by fees. The principal function of the Commission is the provision of low-cost housing for rental or sale to persons in the lower or moderate income groups. The Commission is also empowered to make surveys of housing conditions, recommend local government building ordinances, provide assistance to private home builders, and undertake the manufacture, purchase, and supply of building materials.

Most of the permanent dwellings provided by the Commission have been erected under the Commonwealth-State Housing Agreements. In 1961, 3,658 houses and flats valued at £8,575,000 were completed by or for the Housing Commission, mostly erected by private builders on contract to the Commission.

(b) *Capital, Income and Expenditure.* Advances from the Commonwealth have provided most of the Housing Commission's capital funds. Of the £139,978,000 total capital funds available to the Commission from its inception to 30th June, 1962, £131,877,000 (or 94.2 per cent.) came from Commonwealth advances, £2,464,000 (1.8 per cent.) from Consolidated Revenue, £4,652,000 (3.3 per cent.) from General Loans Account and £985,000 (0.7 per cent.) from other State funds.

During the year 1961-62, the Housing Commission's income and expenditure (other than capital transactions) was—total income, £9,462,627 (consisting of rent £6,574,521, interest £1,996,880, other £891,226); and total expenditure, £8,382,826.

(c) *Rental Housing (other than Housing Agreements).* Upon request by other State Departments, the Housing Commission will erect houses for employees of those Departments, e.g., Education, Agriculture, Water Conservation, etc. These Departments provide the necessary land and funds needed to finance the erection of the houses. Rentals charged are fixed by the Departments in accordance with the salaries of the officers occupying the houses. The number of rental houses erected (other than under the Housing Agreements) is 925.

Specially designed units are erected by the Housing Commission to provide dwellings for elderly persons at rentals within their means. The rents of these units are £1 per week for elderly single persons and £1 10s. per week for elderly couples. Four hundred and twenty-seven of these units have been completed.

(d) *Sales Schemes.* During 1953-54, the Housing Commission began the erection of 100 houses for sale. Under this scheme, the Commission acted as the construction authority, while administrative arrangements were carried out by the Rural Bank. Houses were sold on the basis of 10 per cent. deposit with repayment of the balance over a maximum period of 40 years.

Applicants who have established eligibility for Housing Commission accommodation may now apply to have a standard type dwelling erected on their own block of land. Under this scheme, 207 dwellings have been completed.

(ii) *Victoria—Housing Commission, Victoria.* (a) *General.* A preliminary investigation into housing conditions in Victoria was begun in July, 1936, when a board for the purpose was appointed by the Government. As a result of their report, the *Housing Act* 1937 was passed by Parliament which provided for the appointment of a Housing Commission of four members to be the central housing authority of the State. The Housing Commission of Victoria was appointed on 1st March, 1938.

The objects of the Commission as now laid down are the improvement of existing housing conditions; the provision of suitable rental housing for persons displaced from slum reclamation areas or living under unsatisfactory conditions, and for other eligible persons; the sale of houses to eligible persons and making of advances to such persons to enable them to own their homes; the development of land for housing and related purposes; and the responsibility of maintaining housing standards. Until the 1945 Commonwealth-State Housing Agreement was entered into, with its retrospective application to all estates or projects completed after 3rd December, 1943, the construction of dwellings by the Commission was financed by loan funds provided by the State and by three specific debenture issues raised by the Commission. Since the signing of the 1945 Commonwealth-State Housing Agreement, the construction of dwellings has been financed by the Commonwealth Government.

(b) *Dwellings Provided.* At 30th June, 1962, the Housing Commission had completed 1,328 dwelling units under the State Housing Scheme, and 45,642 dwelling units under Commonwealth-State Agreements. An additional 1,187 units were either under construction or let to contract at this date.

(c) *Dwellings for Elderly Persons.* Specially designed dwelling units are erected by the Commission to provide dwellings for elderly persons at rentals within their means. To 30th June, 1962, 1,696 of these units had been completed.

(d) *Housing of Aborigines.* Under the *Aborigines Act* 1958, as amended by the *Aborigines (Housing) Act* 1959, the Housing Commission of Victoria is empowered to erect houses for the Aborigines Welfare Board for occupation as dwellings by aborigines. To 30th June, 1962, 13 of these units had been completed.

(e) *Rental Housing (other than Housing Agreements).* State Government Authorities, such as the Public Works Department, State Electricity Commission, Victorian Railways, State Rivers and Water Supply Commission, etc., provide from time to time the necessary land and finance for the erection of dwellings for employees of those departments. Rentals charged are fixed by the Government Authorities in accordance with the salaries of officers occupying the dwellings.

(f) *Rural Housing.* Prior to the end of the Second World War, the Commonwealth Government and various State Governments made arrangements for the settlement of discharged soldiers on the land as part of a general scheme of rehabilitation of ex-members of the Services. In 1945, the Victorian Government completed an Agreement with the Commonwealth Government, and legislation was passed constituting the Soldier Settlement Commission. The Commission is charged with the responsibility of developing a holding to a stage where it can be brought into production within a reasonable time. This provides for, amongst other things, the erection of farm residences. At 30th June, 1962, a total of 2,894 farm residences had been erected.

(iii) *Queensland—The Queensland Housing Commission.* (a) *General.* The Queensland Housing Commission was established in 1945 to assist in meeting the existing housing shortage. It took over the operations of the State Advances Corporation which was established in 1916 to make advances to home builders under the *State Advances Act* (State housing in Queensland originally began in 1910 under the Workers' Dwelling Board). In addition, the Commission was empowered to build houses itself, either for sale or for letting.

(b) *House Units Completed.* During 1961–62, the Commission completed 2,006 house units, bringing the total completions under all schemes since the revival of housing construction in 1944–45 to 26,126. Of this number, 15,047 houses, or 57.6 per cent., were for home ownership, and 11,079, or 42.4 per cent., were for rental.

(c) *Finance.* The Housing Commission finances its operations through two Treasury Trust Funds—the Queensland Housing Commission Fund and the Commonwealth-State Housing Fund. In addition, a Home Builders' Deposit Trust Fund is available to assist eligible persons to accumulate money to acquire land and erect a Commission dwelling

thereon, or to purchase a dwelling under contract of sale conditions. Total disbursements by the Commission for the year 1961-62 amounted to £10,929,291, representing £4,296,149 from the Queensland Housing Commission Fund and £6,633,142 from the Commonwealth-State Housing Fund, while the Home Builders' Deposit Fund had a balance of £4,718 at 30th June, 1962.

(d) *Rental Schemes.* In the field of rental housing, the Commission administers and acts as the constructing authority for the Commonwealth-State Housing Agreements of 1945, 1956, and 1961. These agreements have made possible large-scale home building programmes during the post-war years, the houses so built being mainly for rental, although they may be subsequently sold.

Until 28th March, 1961, when the *Workers' Homes Acts*, 1919-1957, were repealed, the Commission administered the *Workers' Homes* scheme, which was described in the Commonwealth Year Book No. 48, 1962, p. 371.

(e) *Sales Schemes.* Operating under the provisions of the *State Housing Acts*, 1945 to 1961, the Commission, through its scheme of *Workers' Dwellings*, makes advances for the construction of dwellings to eligible persons who own a suitable building site. To be eligible to participate in any of its home-ownership schemes a person must not own, nor must his wife or her husband own, a house in Queensland or elsewhere. The number of workers' dwellings completed during 1961-62 amounted to 682, making a total of 27,986 completions since the inception of the scheme. The Commission also has power to make advances, secured by mortgage, to firms for housing of employees.

Home ownership is further assisted through the Commission's powers to sell houses under contract of sale conditions. It may sell houses already erected to eligible applicants, or it will erect a dwelling to the intending purchaser's own design, on Commission land, for subsequent sale to him. Tenants of rental houses may also purchase, under contract of sale conditions, the houses they are occupying. Contract of sale agreements were made to purchase 883 of the Commission's houses during 1961-62.

The Commission is also authorized, under the *State Housing Acts Amendment Act*, 1961, to sell freehold land, or lease vacant Crown land which has been set apart for the purposes of the *State Housing Acts*, to an eligible person for the erection of a dwelling, subject to the condition that within 18 months from the date of contract he will execute a building agreement for the erection of a dwelling thereon for his occupation.

(iv) *South Australia—The South Australian Housing Trust.* (a) *General.* The South Australian Housing Trust was constituted in 1937 under the *South Australian Housing Trust Act*, 1936-37, for the purpose of providing comfortable homes for workers in regular employment on the lower ranges of income and for tenants in serious financial straits. The Housing Trust builds houses for both rental and sale and, in addition, administers an emergency dwelling scheme for the South Australian Government. From July, 1946 to 30th June, 1962, 44,059 houses were erected by the Trust in both city and country areas.

(b) *Rental Houses.* In 1958, the State Government made available funds for the purpose of providing houses in the country towns for people who cannot afford to pay an economic rent, and to 30th June, 1962, 177 houses had been built.

Upon request by State Government Departments, the Trust will erect houses for purchase by those Departments for the accommodation of their employees. During the financial year 1961-62, 72 houses were built for Education, Police, Highways, and Woods and Forests Departments, etc. Rents for the houses are determined by the Public Service Board. Rents charged for other accommodation are generally based on the overall cost of construction, and vary not only according to the size of the dwelling but also according to date of erection. As at 1st November, 1962, the rents of 5-roomed houses (i.e., 3 bedrooms) ranged from £2 2s. a week for houses of an older type to £3 12s. 6d. a week for houses then being completed. Factors taken into consideration when allotting rental houses include date of application, housing need and suitability of tenant. Persons with high incomes are asked to consider purchasing their own homes. Two- and three-storey groups of flats with weekly rentals ranging from £3 7s. 6d. to £6 10s. per flat have been built in the Metropolitan Area and at Elizabeth. By December, 1962, 953 of these flats had been completed in the Metropolitan Area and 220 at Elizabeth.

(c) *Sales Scheme.* Houses built under this scheme, which was inaugurated in 1946, are of solid or timber-frame construction. More than 20,200 have been completed in both metropolitan and country areas since the scheme began. The Trust may receive cash payment for the house and land. More usually, the purchaser pays a deposit (which varies according to the type of house and locality—at present £200 for a timber-frame house and £400 for a 5-roomed brick house—and the purchaser's ability to pay) and raises the balance by way of mortgage. In 1956, the Trust began the erection of houses, which may be of solid or timber-frame construction or a mixture of both, for individuals on their own land. Houses are built by contract under the Trust's supervision. Prices for building and supervision of the standard houses covered by the scheme in late 1962 ranged from £3,350 for a 2-bedroom brick house to £5,500 for a 6-roomed house. During 1962–63, the Trust commenced construction of Rental-Purchase houses. The aim of this scheme is to provide less expensive houses for the lower-middle income wage earner, and it is expected that such houses will, as far as possible, replace the demand for the double-unit type rental houses.

(d) *Rural Housing.* In order to assist primary producers, the Trust will erect houses on the applicant's own land for his own use or that of his employees, either using local materials or transporting prefabricated houses to the site. At the 30th June, 1962, prices for houses erected on level sites within 100 miles of Adelaide ranged from £2,300 for a 2-bedroom minimum type timber house to £3,000 for a 3-bedroom asbestos cement sheeted timber house.

(v) *Western Australia—State Housing Commission of Western Australia.* (a) *General.* The State Housing Commission was established in January, 1947, under the *State Housing Act* of 1946 to replace the Workers' Homes Board which had been created in 1912 to "erect and dispose of workers' dwellings and to make advances to people of limited means to provide homes for themselves". The *State Housing Act* 1946–1961 has as its objects "the improvement of existing housing conditions" and "the provision of adequate and suitable housing accommodation for persons of limited means and certain other persons not adequately housed". The legislation is comprehensive in scope, providing for the erection of homes for workers, the making of advances to workers for the purchase of homes, the erection of homes for letting on a weekly rental basis, the acquisition and development of land, the clearing of slums, the erection of hostels and the planning of community facilities. The Commission, consisting of seven members, builds houses for letting or sale and lends money for home building. The houses are built by private contract on land provided by the applicant or the Commission. Government housing is primarily the responsibility of the Commission, whose functions, in addition to its operations under the *State Housing Act*, include the administration in Western Australia of the Commonwealth and State Housing Agreements and the *War Service Homes Act*.

(b) *Operations.* The number of houses completed under the *State Housing Act* up to 30th June, 1962, was:—freehold—1,758; leasehold—3,083; assistance by second mortgage—831.

Various forms of assistance have been granted by the Commission to encourage home ownership, including schemes for arranging purchase by means of loans secured by mortgage, advances made under contract of sale, advances for securing homes under leasehold conditions, second mortgage loans and loans for the completion of partly built dwellings. Under the leasehold scheme a purchaser can convert, from perpetual Crown lease or a lease for a term of years, to freehold conditions upon having a 10 per cent. equity in the improvements and by agreeing to purchase the land at the valuation determined at the date of commencement of the lease.

The Commission also conducts certain other housing schemes and has completed, or is currently engaged in, other specific projects. Among the more important of these are the construction in the period 1951–52 to 1953–54 of 237 home units for evicted persons; the building of 653 homes at Kwinana-New Town between 1952–53 and 1955–56 in terms of the agreement contained in the *Oil Refinery Industry (Anglo-Iranian Oil Company Limited) Act*, 1952; the Government Employees' Housing Scheme, which commenced in 1958–59 and, up to 30th June, 1962, had provided 75 rental houses in country areas for certain government employees; the construction of 100 houses to be built under the provisions of the *Laporte Industrial Factory Agreement Act*, 1961; and the management, free of charge, of the McNess Housing Trust, a private endowment, the income from which, together with State Government allocations and Lotteries Commission donations, is used to provide homes for aged and infirm persons not able to acquire a home from their own resources. The Commission also undertakes the construction of houses for some other State Government Departments and semi-governmental authorities.

(vi) *Tasmania—The Housing Department.* (a) *General.* The Housing Department was established in July, 1953, as a separate identity, and is responsible for administering that portion of the *Homes Act* 1935 which relates to the acquisition and development of land for housing purposes and the erection of homes for rental and ultimate sale, the *Homes (Old Age Pensioners') Act* and the *Homes (Temporary Housing) Act*. Housing Department construction utilizes both day labour and private contractors to build houses on land developed by the Department. On-site construction is supported by the Department's factory which incorporates joinery works, timber mill, plumbing and electrical workshops, material stores, and garage. Most of the dwellings constructed by the Department are three-bedroom timber dwellings. Roofing is usually corrugated iron, but some coloured asbestos cement sheeting is used. Flats for elderly persons and multi-unit flats have also been constructed.

(b) *Construction of Dwellings.* During 1961–62, 492 dwellings were completed. Construction since 1944 is summarized in the following table.

Type of dwelling	One-bedroom	Two-bedroom	Three-bedroom	Total
Single unit—Timber .. .. .	..	510	5,734	6,244
Other material .. .. .	..	..	652	652
Elderly persons' flatettes .. .. .	28	108	..	136
Maisonettes .. .. .	..	12	10	22
Multi-unit flats .. .. .	125	157	14	296
<b>Total Dwelling Units .. .. .</b>	<b>153</b>	<b>787</b>	<b>6,410</b>	<b>7,350</b>

(c) *Dwellings for Rental.* Flats, maisonettes and elderly persons' homes are for rental only. It is the Department's policy to allot single-unit dwellings on a purchase contract basis except where the allottee would be unable to meet the full economic charges or where the dwelling would not be large enough for the allottee's future requirements. In the June quarter of 1962, rents of three-bedroom timber dwellings averaged £3 10s. per week, but on similar new dwellings allotted during 1961–62 rents averaged £5 3s. 6d. per week. Rental rebates are allowed in certain cases and the Department is reimbursed by the State Treasury. Rents of elderly persons' flatettes are graduated according to the incomes of occupiers. Under the current rental rebate formula, a married couple whose only income is the age pension pays £1 18s., while a single person solely dependent on the pension pays £1 per week.

(d) *Dwellings for Sale.* Allotments are made on a no deposit purchase contract basis with repayments over a 53-year term, but allottees are encouraged to pay a deposit if they are in a position to do so. Purchase contracts are sometimes surrendered to the Department. Net of surrenders, 4,415 purchase contracts had been entered into by June, 1962. The sale price, excluding land, of a new three-bedroom timber house in the Hobart metropolitan area was approximately £3,265 in the June quarter of 1962. Prices in the north and north-western areas were slightly lower.

The weekly instalments on a purchase contract are slightly less than the weekly rent of a similar dwelling, as the latter includes a charge for maintenance.

4. *Housing Schemes in Commonwealth Territories.*—(i) *Northern Territory.* In 1946, control of all government-owned residences in the Territory (excluding those belonging to the Defence Services, Commonwealth Railways or attached to post offices) was vested in the Administration. The Administration provides houses for rental to Commonwealth employees. In January, 1959, an Ordinance was passed to set up a Housing Commission to construct houses for letting at an economic rental to low income groups. To 25th February, 1963, 247 Housing Commission homes had been completed.

The Commission's 1961-62 building programme included a £20,000 project known as Tuckwell Court, consisting of 24 flats designed to accommodate aged pensioners in Darwin. These flats were occupied in December, 1962.

(ii) *Australian Capital Territory.* The Commonwealth Government provides houses and flats for rental to persons employed in the Australian Capital Territory. At 30th June, 1962, the Department of the Interior controlled 7,202 houses and 1,630 flats for rental purposes.

Government rental houses may be purchased by tenants. Up to 30th June, 1962, 2,407 houses had been sold to tenants.

(iii) *Papua and New Guinea.* In 1960, the Administration started a project for providing low-cost houses for rental to indigenes and mixed-bloods. To 30th June, 1962, 151 houses had been completed.

5. **Summary of Rental Activities of Government Authorities.**—(i) *Revenue from Rentals.* The following table shows the revenue from rentals for dwellings under control of Government Housing Authorities each year from 1958-59 to 1961-62.

**GOVERNMENT HOUSING AUTHORITIES: REVENUE FROM RENTALS**  
(£'000)

Year	N.S.W.	Vic.	Qld	S.A. (a)	W.A.	Tas.	N.T.	A.C.T.	Aust.
1958-59 ..	5,856	5,568	1,502	2,476	1,849	426	115	823	18,615
1959-60 ..	6,094	5,562	1,599	2,687	1,914	454	138	1,045	19,493

(a) Excludes tenanted temporary dwellings.  
At 30th June, 1962, these numbered 2,549.

(b) Excludes temporary and emergency dwellings.  
(c) Number of occupied dwellings at 30th June.

#### § 4. Advances to Home Purchasers

Many prospective home purchasers wish to borrow for the purpose of constructing or purchasing their own homes. Usually the loan is covered by way of mortgage of the home to be constructed or bought. Such loans are provided from a number of private sources and from agencies owned or guaranteed by the State or Commonwealth Governments. The information in this section concerns the direct loans made to home purchasers by the more important institutional lenders. Loans to institutions which in turn lend moneys to

home purchasers and loans to contract builders, etc., are excluded as far as possible. The loans may be for the construction of new dwellings, the purchase of existing dwellings, for additions, renovations, etc., as first or subsequent mortgages, overdrafts and so on.

While figures of all loans to home purchasers are not available, the institutions mentioned below account for a significant proportion of total loans. Details of the terms and conditions of lending are given, together with available information on the number and value of loans made.

**1. State Authorities and Agencies.**—(i) *New South Wales.* (a) *Housing Commission of New South Wales—Commission Financed Advances.* Under the *Housing Act, 1912–1955*, the Housing Commission is empowered to provide finance to persons to have houses erected on their own land, to purchase existing dwellings, or to effect improvements or repairs to houses. Regulations prescribing the present maximum amount that may be advanced and the limitation on income which may be received by an applicant for a loan have not been published, and at present no advances or sales are being made under this legislative provision.

(b) *Rural Bank of New South Wales—Sale of Homes Agency.* A Sale of Homes Agency was established in 1954 within the Rural Bank's Government Agency Department to arrange for the sale on terms of houses erected by the Housing Commission of New South Wales.

The Agency's operations began with the sale to selected purchasers of 100 houses made available by the Commission during 1954–55 and 1955–56. The sales were made on the basis of 10 per cent. deposit and repayment of the balance over a maximum period of 40 years, with interest at 4½ per cent. per annum. Total advances under that scheme amounted to £323,324; at 30th June, 1962, the advances outstanding amounted to £245,482 in respect of 92 houses.

Since 1956, the Sale of Homes Agency has acted as the agent of the Housing Commission in arranging the sale on terms of houses erected under the 1956 Commonwealth-State Housing Agreement. These houses are sold, in general at the Bank's valuation, to persons who have satisfied the Commission as to their housing needs and have registered as prospective purchasers. The terms of sale provide for a minimum deposit of £50 and repayment of the balance over a maximum period of 45 years, with interest at 5½ per cent. (4½ per cent. before May, 1961) per annum. The cash deposits and periodical instalments payable by purchasers are collected by the Agency as agent for the Commission. Particulars of the advances made by the Agency in connexion with the sale of houses erected under the 1956 Agreement are given in the following table.

**RURAL BANK OF NEW SOUTH WALES—SALE OF HOMES AGENCY: ADVANCES FOR HOMES SOLD UNDER THE 1956 COMMONWEALTH—STATE HOUSING AGREEMENT**

Year	Advances during year		Advances outstanding at end of year(a)	
	Number of houses	Amount	Number of houses	Amount
		£'000		£'000
1956–57 .. .. .	1,604	5,079	1,604	4,976
1957–58 .. .. .	3,012	9,983	4,612	14,715
1958–59 .. .. .	2,013	6,326	6,623	20,808
1959–60 .. .. .	2,227	7,200	8,831	27,692
1960–61 .. .. .	1,565	5,218	10,364	32,487
1961–62 .. .. .	1,826	6,537	12,129	38,508

(a) Comprises principal outstanding and loan charges due but not paid.

(c) *Rural Bank of New South Wales—Other Loans.* The Rural Bank of New South Wales provides assistance to individuals for the erection or purchase of homes, for the discharge of mortgages on homes and for other approved purposes associated with homes. Advances are based on the bank's official valuation of the dwelling. The rate of interest on long-term loans for housing purposes was increased from 5 per cent. to 5½ per cent. from 1st October, 1956, and to 5½ per cent. from 15th December, 1960.

The following table shows particulars of Rural Bank advances for homes during the last ten years.

### RURAL BANK OF NEW SOUTH WALES: ADVANCES FOR HOMES

Year	Advances during year(a)		Advances outstanding at end of year(b)	
	Number of dwellings	Amount	Number of dwellings	Amount
		£'000		£'000
1952-53 .. .. .	1,141	2,272	21,488	16,213
1953-54 .. .. .	1,375	2,135	20,045	15,749
1954-55 .. .. .	2,133	3,488	19,615	16,750
1955-56 .. .. .	1,399	2,757	18,778	17,419
1956-57 .. .. .	1,372	2,851	18,098	18,171
1957-58 .. .. .	1,576	3,490	17,644	19,595
1958-59 .. .. .	1,176	2,722	16,915	20,212
1959-60 .. .. .	1,610	4,026	16,611	21,967
1960-61 .. .. .	2,032	5,400	17,096	25,282
1961-62 .. .. .	1,668	5,658	17,357	28,211

(a) The number of advances during a year represents the number of dwellings in respect of which an advance was first made in the year, but the amount of advances includes subsequent advances made in respect of the dwellings. (b) The number of advances outstanding at the end of a year represents the number of dwellings on which a debt was still outstanding. The amounts shown comprise principal outstanding and loan charges due but not paid.

(ii) *Victoria. (a) Housing Commission, Victoria.* Very few houses were sold by the Commission until 1954. The amendments to the Commonwealth-State Housing Agreement in 1955-56 have had the effect of substantially increasing the number of houses sold. Whereas between 1949 and 1954 only about 100 houses were sold, a total of 14,308 houses were sold on terms to 30th June, 1962, the total value of terms sales exceeding £52 million.

Houses are sold on a minimum deposit of £100, with a maximum repayment term of 45 years, and interest at 4½ per cent.

An inducement to tenants of the Commission to purchase their homes was the introduction of a Death Benefit Scheme, to provide for the property under purchase to pass to the estate of the purchaser free of debt in the event of his death prior to completion of purchase. If application is made for admittance to the Death Benefit Scheme, the maximum period for repayment is reduced to 30 years, the rate of interest is fixed at 5½ per cent. and the contract must terminate before the purchaser's 70th birthday.

(b) *Home Finance Trust.* In 1956, a Home Finance Trust was established with the object of receiving money from institutions and others in order to make loans for the erection or purchase of houses. Applicants for loans must declare that they intend to use the houses as homes for themselves, their families and dependants. Except in special circumstances, no loan will be granted if the borrower or wife or husband of the borrower already owns a house in Victoria at the date of the proposed mortgage.

Loans granted are on the basis of a first mortgage over the house. Loans are not to exceed 95 per cent. of the value of the security (house and land) and are not made if the value of the security exceeds £5,000. The house must not have been erected more than two years before the date of the mortgage. Repayment of loans may be made over a maximum period of 30 years, with interest charges determined by the Trust. At 30th June, 1962, 2,223 loans totalling £6,168,848 had been made.

(See para. 3, Savings Banks, p. 442, for activities of the Crédit Foncier Department of the State Savings Bank of Victoria.)

(iii) *Queensland. (a) The Queensland Housing Commission.* The present maximum advance allowable under the Acts is £3,500 for a timber, brick veneer, brick, or concrete building. The rate of interest on advances is 5½ per cent. a year. Repayment may be made at the option of the borrower over either a 30-year or a 45-year period. A borrower

or purchaser who elects to repay over a 30-year period, who is under 40 years of age, and who has passed a prescribed medical examination, is entitled to free life insurance cover to an amount sufficient to liquidate his indebtedness to the Commission in the event of his death before his loan has been fully repaid, provided that the maximum benefit payable under such insurance cover does not exceed £2,250.

(b) *Workers' Dwellings.* From 4th October, 1962, the maximum advance under this scheme was increased to £3,500 for all types of workers' dwellings. Total advances made for dwellings since operations commenced in 1910 to 30th June, 1962, amounted to £25,423,624.

(iv) *South Australia.* (a) *The South Australian Housing Trust Sales Scheme.* A minimum deposit of £50 is proposed for houses under the Rental-Purchase scheme for a maximum loan of £3,750, repayable at a proposed interest rate of 4½ per cent. per annum over a period not exceeding 40 years.

Prospective purchasers of Housing Trust houses (other than Rental-Purchase houses) can arrange or have arrangements made for a first mortgage to be granted by a lending institution of their choice. In cases where the deposit and the first mortgage so raised are insufficient, the Trust may advance the balance of the house price by way of a second mortgage, the repayment term of which is a maximum of 30 years, interest being at the rate of 6 per cent. per annum.

During 1961-62, the Trust commenced 770 second mortgages valued at £404,000. At 30th June, 1962, second mortgages totalled 6,230 and the balance outstanding at that date was £3,342,000.

(b) *State Bank of South Australia.* The State Bank, together with the Housing Trust, is the principal agent of the State Government for the distribution through the Home Builders' Fund of moneys received under the Commonwealth-State Housing Agreement.

During 1961-62, the Bank opened 1,420 new accounts worth £3,923,014 in the Home Builders' Fund. The balance of loans outstanding at 30th June, 1962, in this Fund totalled £8,573,218.

A major proportion of loan moneys received by the State Government for housing is administered by the Bank under the *Advances for Homes Act*. Under this Act, 314 accounts, for a value of £1,010,448, were opened during 1961-62, leaving a balance outstanding at 30th June, 1962, of £15,634,606.

The present limit to housing loans under either of these schemes is £3,000, repayable over a period not exceeding 42 years at a rate of interest of 5½ to 6 per cent. per annum calculated on monthly balances. Persons who have received benefit under either of these schemes are ineligible for another mortgage.

(v) *Western Australia. State Housing Commission of Western Australia.* The maximum loan is £2,500 by way of mortgage and leasehold, and £2,750 plus land for contract of sale, under the *State Housing Act*. For houses built north of the 26th parallel the Minister can approve of an advance exceeding £2,750.

To proceed under the mortgage conditions, a deposit of not less than 10 per cent. is required, but under the contract of sale or leasehold provisions the minimum deposit is £100. The interest rate in both cases is 5½ per cent. per annum and the repayment period is 45 years. To obtain assistance, an applicant cannot have an income exceeding £1,228 a year, plus £25 for each dependent child under 16 years of age. This figure varies according to the movement of the basic wage. North of the 26th parallel, the Minister may allow a higher-income family to be assisted.

A second-mortgage scheme exists under the *State Housing Act* which provides that assistance be limited to those applicants who are building or purchasing new residential improvements, the cost of which does not exceed £3,300. By policy decision, the Commission limits the second mortgages to a maximum of £1,000.

(See para. 3, Savings Banks, p. 442, for activities of the Savings Bank Division of the Rural and Industries Bank of Western Australia.)

(vi) *Tasmania. (a) The Housing Department.* Amounts outstanding in respect of loans made by the Housing Department by way of purchase contracts were as follows for the years 1958–59 to 1961–62.

**TASMANIAN HOUSING DEPARTMENT: PURCHASE CONTRACTS**

Particulars	1958–59	1959–60	1960–61	1961–62
Number of loans outstanding .. ..	3,254	3,471	3,835	4,156
Amount outstanding .. .. £'000	8,901	10,112	11,317	12,601

The interest rate on contracts signed after February, 1962, was 4 per cent., immediately prior to which the rate was  $4\frac{1}{2}$  per cent. To be eligible for a house on purchase contract terms, an applicant must be married or about to be married, or have dependants for whom it is necessary to provide a home. Number of dependants, income and existing accommodation are considered in determining the priority of applicants.

(b) *Agricultural Bank of Tasmania.* The Agricultural Bank, as an approved institution under the Commonwealth-State Housing Agreement, receives part of those funds allocated for advances to home builders. Prior to the commencement of the agreement, the Bank borrowed from the State Loan Fund and from private institutions. To be eligible for a loan, an applicant must be married or about to be married and be over the age of 21, and when, as is usual, the advance is required to build a house, the applicant must own a block of land. The maximum amount of an advance to an applicant is £3,300 for brick or concrete block type houses in certain areas, or £3,000 for a timber dwelling, provided that the total advance does not exceed 90 per cent. of the Bank's valuation of land and dwelling. Advances to borrowers are repayable by equated instalments over 31 years. Advances made as from 1st February, 1962, were at an interest rate of  $5\frac{1}{2}$  per cent., immediately prior to which the rate was  $5\frac{3}{4}$  per cent. The following table shows details for recent years.

**TASMANIAN AGRICULTURAL BANK: ADVANCES FOR HOUSING(a)**

Particulars	1959–60	1960–61	1961–62
Advances approved—			
Number .. ..	100	115	239
Value .. .. £'000	310	362	730
Advances outstanding(b) .. .. £'000	3,957	4,195	4,512

(a) Excludes advances to Building Societies.

(b) At 30th June.

Since November, 1945, a total of 2,200 loans amounting to £5,871,606 have been approved, of which 2,032 have been for erection of dwellings and 168 for the purchase of existing homes.

2. *Commonwealth Authorities and Agencies.*—(i) *War Service Homes.* The maximum amount of loan or advance which may be granted under the *War Service Homes Act* is £3,500. The period of repayment may be up to 45 years. In the case of a widow or widowed mother of an Australian ex-serviceman, the period may be extended to a maximum of 50 years.

The following table gives details of advances by the War Service Homes Division in each State and Territory of Australia, and the Territories of Papua, New Guinea and Norfolk Island, for the years 1952–53 to 1961–62. (See tables on p. 430 for the number of homes provided.)

1962 ..	119,851	102,645	39,073	30,510	36,997	7,447	(c)	(d)	336,523

(a) Includes Norfolk Island.

(b) Includes Territory of Papua and New Guinea.

(c) Included in South Australia.

(d) Included in New South Wales.

(ii) *Northern Territory. (a) Loans Scheme.* This Scheme, inaugurated in 1953, provides for loans for the erection of houses, the purchase or extension of existing houses or the discharge of mortgages on houses. The maximum loan available was increased from £2,000 to £2,750 in July, 1955, and to £3,500 in April, 1962.

Up to 30th June, 1962, 758 loans totalling £1,962,000 had been approved. These were for:—construction, 554; purchase, 157; discharge of mortgage, 47.

(b) *Sales Scheme.* The Administration is prepared to sell to its tenants for cash or on terms the houses they occupy. Minimum deposit is 5 per cent. of the first £2,000 and 10 per cent. of the balance, with repayments over a maximum of 45 years and interest of  $4\frac{1}{2}$  per cent. per annum.

(iii) *Australian Capital Territory.* Loans may be granted by the Commissioner for Housing to enable persons to purchase or build a new house in the Australian Capital Territory. Where the Commissioner's valuation does not exceed £2,000, the maximum loan may not exceed 95 per cent. of the valuation. If the Commissioner's valuation exceeds £2,000, the maximum loan is 95 per cent. of the first £2,000 and 90 per cent. of the balance (but in no case can the amount lent exceed £3,500). Repayment may be made over a maximum period of 45 years. The current rate of interest is  $5\frac{1}{4}$  per cent. per annum. From 1st July, 1950, to 30th June, 1962, 1,280 loans were granted.

Government rental houses may be purchased by tenants. The basis of the sale is a minimum deposit of 10 per cent. of the purchase price fixed by the Department of the Interior with no limit to the amount which may be held on mortgage from the Department. Repayment of the amount covered by mortgage may be made over a maximum period of 45 years. The interest rate is 4½ per cent. per annum. Up to 30th June, 1962, 2,407 houses had been sold to tenants.

(iv) *Papua and New Guinea.* The *Housing Loans Ordinance* 1953–1958 permits the advance of loans of up to £3,500 to any member of the community for the erection of a house or the purchase or extension of an existing house. The loans are limited to declared township areas and are repayable over a maximum period of 35 years. The effective rate of interest is 5½ per cent. per annum. Up to 30th June, 1962, 198 loans totalling £465,783 had been approved.

3. **Savings Banks.**—All savings banks lend funds for housing to both individuals and to building societies. Separate figures of loans to individuals are not available for all savings banks. The amounts outstanding on housing loans of all savings banks (including loans to building societies) were £277 million, £312 million and £346 million at the end of June, 1960, 1961 and 1962, respectively.

Some details in respect of three savings banks are shown below.

(i) *State Savings Bank of Victoria—Crédit Foncier Department.* The State Savings Bank of Victoria grants long term loans to depositors to enable them to build, purchase or improve homes and to purchase or improve farms. Most, but not all, of the loans are made by the Crédit Foncier Department of the Bank.

In order to encourage new building, home loans are granted only on houses up to one year old. The maximum proportion of the valuation to be granted as loan is 80 per cent. and the maximum loan is £3,500. Interest is 5½ per cent. and the term of the loan is 20½ years.

During 1961–62, the Crédit Foncier Department advanced £7,362,966 to 3,446 borrowers and at the end of that year £68,646,443 was owing by 38,526 borrowers.

(ii) *Savings Bank of South Australia.* The Bank grants mortgage loans for the building or purchase of houses for personal occupation. The maximum loan available is £3,000 for a new solid construction home and £2,250 for timber-framed houses and dwellings which have been previously occupied, or 95 per cent. of the Bank's valuation of the home if the mortgage is granted under the *Homes Act*, or 75 per cent. for other mortgages. The maximum loan period is 30 years at a rate of interest of 5½ per cent., subject to review after 10 years.

During 1961–62, the Bank advanced £5,124,535 on 1,899 loans for houses. At 30th June, 1962, there were 17,937 loans current with a balance outstanding of £31,530,000.

(iii) *The Rural and Industries Bank of Western Australia (Savings Bank Division).* The Rural and Industries Bank of Western Australia is authorized by the *Rural and Industries Bank Act* 1944–1958 to make loans from moneys in deposit with its Savings Bank Division to a person or body for the purchase or erection of a dwelling. It is the policy of the Bank to provide funds for housing primarily for occupancy by the borrower. There is no fixed limit on the amount of a loan, but loans in excess of £3,500 are rarely made. The average loan in the case of a brick or timber house is about £2,500. The rate of interest is 5½ per cent. per annum and the average repayment term about 22 years.

During the year ended 31st March, 1962, three separate "One Hundred Small Homes" plans were conducted by the Bank with State Government financial assistance. The scheme is designed to assist credit-worthy people with less deposit than is otherwise needed to secure a housing loan, and assistance has been limited to borrowers with income of £1,750 per annum or less. Under this scheme the Bank has granted 316 loans totalling £971,864, of which the State Government contributed £225,000. This contribution enabled individual advances to be made to a maximum of £3,500 on a minimum deposit of 10 per cent., the loan being repayable over a maximum period of 25 years at an interest rate of 5½ per cent. per annum.

4. **Trading Banks.**—Apart from loans by certain State banks as Government agencies (see State and Commonwealth Authorities and Agencies, paras. 1 and 2, pp. 437–42), advances for housing to individuals are also provided by the trading banks.

Amounts outstanding in respect of advances to individuals for housing purposes made by the major trading banks were £98 million, £85 million and £95 million at the end of June, 1960, 1961 and 1962, respectively.

5. **Life Insurance Companies.**—The life insurance companies are another source of funds for housing. Details of new loans made during 1962 (particulars for earlier years are not available) are given in the following table.

**LIFE INSURANCE COMPANIES: HOUSING LOANS PAID OVER DURING 1962**

State							Amount
							£'000
New South Wales .. .. .	..	..	..	..	..	..	23,394
Victoria .. .. .	..	..	..	..	..	..	12,167
Queensland(a) .. .. .	..	..	..	..	..	..	3,715
South Australia(b) .. .. .	..	..	..	..	..	..	3,882
Western Australia .. .. .	..	..	..	..	..	..	2,021
Tasmania .. .. .	..	..	..	..	..	..	1,429
Australian Capital Territory .. .. .	..	..	..	..	..	..	838
<b>Total .. .. .</b>	..	..	..	..	..	..	<b>47,446</b>

(a) Includes loans made in Papua and New Guinea.  
Territory.

(b) Includes loans made in Northern

Amounts outstanding at the end of June, 1960, 1961 and 1962, in respect of housing loans made by insurance companies were £134 million, £151 million and £153 million respectively.

6. **Registered Building Societies.**—Excluding the Victorian Co-operative Housing Societies there are some 1,700 registered building societies in Australia, of which about 100 are permanent societies and the remainder terminating societies. The permanent societies are in the main investment societies which make loans for housing purposes, usually on *crédit foncier* terms, and obtain their funds from share capital deposits and borrowings from banks and other lending institutions. The terminating societies are co-operative societies which make loans to members from funds obtained from lending institutions (usually government guaranteed), members' subscriptions, and, since 1956, from moneys provided under the Commonwealth-State Housing Agreements.

Details of new loans granted and loans outstanding for each of the years ended June, 1957 to 1961, are given in the following table.

**REGISTERED BUILDING SOCIETIES**

Year	N.S.W.	Vic.	Q'land	S. Aust.	W. Aust.	Tas.	Total
<b>LOANS GRANTED DURING YEAR (£'000)</b>							
1956-57 ..	16,668	2,582	2,287	590	1,414	942	24,483
1957-58 ..	17,985	3,611	2,736	721	1,890	1,024	27,967
1958-59 ..	21,038	3,884	3,320	932	2,234	1,146	32,554
1959-60 ..	20,560	4,689	4,889	1,157	2,710	1,357	35,362
1960-61 ..	23,702	4,637	5,418	1,212	2,863	1,310	39,142
<b>ADVANCES OUTSTANDING(a) AT END OF YEAR (£'000)</b>							
1956-57 ..	100,386	15,273	7,841	2,767	3,596	3,270	133,133
1957-58 ..	107,654	16,329	9,092	3,130	5,508	3,699	145,412
1958-59 ..	117,341	17,185	10,814	3,624	6,923	4,176	160,063
1959-60 ..	124,396	19,256	13,493	4,326	8,601	4,806	174,878
1960-61 ..	134,890	20,569	16,744	4,997	10,253	5,318	192,771

(a) Net of borrowing members' funds.

The Victorian Co-operative Housing Societies are identical in character with the terminating societies in other States, and in 1961, there were some 500 of these societies.

The table below shows details of outstanding loans at the end of, or during, the years ended 30th June, 1957 to 1961. The details given are on a gross basis, as details of borrowing members' funds are not available.

**VICTORIAN CO-OPERATIVE HOUSING SOCIETIES: ADVANCES  
OUTSTANDING(a)**

Year(b)									Amount
									£'000
1955-56	..	..	..	..	..	..	..	..	37,510
1956-57	..	..	..	..	..	..	..	..	43,558
1957-58	..	..	..	..	..	..	..	..	51,018

(a) Gross; borrowing members funds have not been deducted.  
year ended 30th June.

(b) At end of, or during,

7. **Other Lenders.**—Little information is available on advances made by other lenders such as superannuation and other trust funds, private finance and investment companies, etc. In South Australia, advances on first mortgage are granted by the Superannuation Fund under the *Advances for Homes Act* by which the State Government guarantees 15 to 25 per cent. of the value of the mortgage, thus raising the limit of the advance. Loans so made are limited to 95 per cent. of the Superannuation Board's valuation to a maximum of £3,000, and 85 per cent. of the Board's valuation to a maximum of £3,500. The rate of interest is 6 per cent. per annum, calculated on quarterly balances, reducing to 5½ per cent. when payments are made within a prescribed period of 21 days from the end of the quarter. The terms of the mortgage may run for 30 years on a stone or brick home or 20 years on a timber framed construction. Trustee mortgages may be granted as an alternative. A maximum of 70 per cent. of the Board's valuation may be granted for a trustee mortgage.

At 30th June, 1962, there were 4,723 Superannuation Fund loans current, the principal outstanding totalling £7,336,412. During 1961-62, advances made by the South Australian Superannuation Board were to a value of £1,048,714.

## CHAPTER XII

### LABOUR, WAGES AND PRICES

NOTE.—Reference is made in this chapter to retail, wholesale and export price indexes. For particulars of the Farm Production Price Index, see Chapter XXIX, Miscellaneous.

For further information on the subjects dealt with in this Chapter, see the *Labour Report*, issued by this Bureau. For current information, see the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics*, and the *Quarterly Summary of Australian Statistics*, also the mimeographed statements *Monthly Bulletin of Employment Statistics*, *Wage Rates and Earnings*, *Consumer Price Index*, *Wholesale Price (Basic Materials and Food-stuffs) Index*, and *Export Price Index*.

In addition, the following relevant special publications were issued in mimeographed form during 1962:—*Minimum Weekly Wage Rates, 1939 to 1959* (S.B. 123); *Minimum Weekly Wage Rates, January, 1960 to June, 1962* (S.B. 124); *Survey of Weekly Earnings—Australia, October, 1961* (S.B. 22); *Wage and Salary Earners in Employment, June, 1947 to June, 1960*.

### RETAIL PRICES AND PRICE INDEXES

#### § 1. General

Retail prices of food and groceries and average rentals of houses for years extending back to 1901 were collected by the Commonwealth Statistician, and in some cases have been recorded by Statisticians for earlier years.

Retail prices of a more extensive range of commodities (including clothing) and certain services in common demand have been ascertained at frequent and regular intervals since 1923 for each of the six State capital cities and for 27 of the more important towns of Australia. Comparable information is available for the month of November in each year from 1914 to 1922 for each of the six State capital cities. The list of items currently priced for index purposes is published in *Labour Report* No. 48, 1960.

Average retail prices of certain food and grocery items in current periods are published in the annual *Labour Report*.

An explanation of the nature and purposes of retail price indexes is given in the various editions of the annual *Labour Report*, together with further particulars of indexes then current. In § 2 below, previous retail price indexes for Australia are briefly outlined. The current retail price index, entitled the Consumer Price Index, was published for the first time in August, 1960. It was compiled retrospectively to 1948–49. A description of the Consumer Price Index is given in § 3 on pages 446–50.

#### § 2. Previous Retail Price Indexes

1. General.—Five series of retail price indexes had been compiled at various times for Australia by the Commonwealth Statistician prior to 1960. Each of these was continued until changed conditions required the compilation of indexes more directly relevant to current conditions. The respective indexes were as follows.

- (i) The “A” Series Index (covering food, groceries and house rents) was first compiled in 1912 with the year 1911 as base = 1,000. It was discontinued in June, 1938.
- (ii) The “B” Series Index (covering food, groceries and rent of 4 and 5 roomed houses) was first compiled in 1925 and continued until December Quarter, 1953. It was the food and rent constituent of the “C” Series Index and was designed to replace the “A” Series Index for general statistical purposes.

- (iii) *The "C" Series Index* (covering food and groceries, rent of 4 and 5 roomed houses, clothing, household drapery, household utensils, fuel, lighting, fares, smoking and some other miscellaneous items) was first compiled in 1921. It was last issued on its original basis for December quarter, 1960. For certain transitional purposes the "C" Series Index was issued for some quarters after that. This was calculated by varying the index numbers of December quarter, 1960, in ratio to movements shown by the Consumer Price Index.
- (iv) *The "D" Series Index*, derived by combining the "A" and "C" Series Indexes, was used by the Commonwealth Court of Conciliation and Arbitration from May, 1933, to May, 1934, and then discontinued.
- (v) *The Interim Index* (covering food and groceries, rent of 4 and 5 roomed houses, clothing, household drapery, household utensils, fuel, lighting, fares, smoking, certain services and some miscellaneous items) was first compiled in 1954 with the year 1952-53 as base year = 100. As its title indicated, it was constructed as a transitional index. Its compilation was discontinued following its replacement by the Consumer Price Index in June quarter, 1960.

2. *The "Court" Index*.—In 1937, the Commonwealth Court of Conciliation and Arbitration introduced a "Court" Index for the purpose of its system of making automatic quarterly adjustments to the basic wage within its jurisdiction. By decision of the Court, the "Court" Index ceased to be issued by the Industrial Registrar as at December Quarter, 1953. "Court" Index numbers were an arithmetical conversion of the "C" Series Index.

### § 3. Consumer Price Index

1. *General*.—This retail price index was first compiled in 1960, retrospectively to September quarter, 1948. A full description of the index is given in Labour Report No. 48, 1960.

2. *Origin*.—The list of component items and the weighting pattern of the "C" Series Retail Price Index, first adopted in 1921, were slightly revised by Conference of Statisticians in 1936, but otherwise continued almost unchanged until the index was discontinued in 1960. The reasons for this, and the circumstances which led to the present Consumer Price Index, appear from ensuing paragraphs.

From the outbreak of war in 1939 to late in 1948, periodic policy changes in regard to various war-time controls (including rationing) caused recurrent changes in consumption and in the pattern of expenditure. This rendered changes desirable but made it impracticable either to produce a new index, or to revise the old one, on any basis that would render the index more representative than it already was of the changing pattern of household expenditure in those years.

When commodity rationing had virtually ceased in the latter part of 1948, action was taken by the Statistician to collect price data of about 100 additional items and to gather information as to current consumption and expenditure patterns. This was done to facilitate review of the component items and weighting system of the "C" Series Retail Price Index, in the light of the new pattern of wage-earner expenditure and consumption that appeared to be emerging. But there supervened, in the next few years, conditions which caused wide price dispersion coupled with a very rapid rise in prices and a new sequence of changes in consumption and the pattern of wage-earner expenditure. Under these conditions, it was not possible to devise any new weighting pattern likely to be more continuously representative of current conditions than was the existing "C" Series Index on the 1936 revision.

A Conference of Statisticians considered the matter in June, 1953, and resolved (in part) as follows:—

- "(a) That, in view of the persistence of recurrent changes in the pattern of consumer expenditure in the post-war period, it is undesirable to make a general revision of the list of items and weighting system of the "C" Series Retail Price Index at present, unless industrial tribunals expressly desire some revision for special purposes.

- (b) That an Interim Retail Price Index be compiled with putative weights and components representative, as nearly as may be, of the post-war pattern of consumer usage and expenditure."

The "C" Series Index continued to be compiled on its pre-war basis without significant change in procedures. The Interim Retail Price Index was introduced in 1954 and continued until March quarter, 1960.

This Interim Index was a transitional index designed to measure retail price variations on the "C" Series model in terms of post-war consumption weights, as emerging in the early 1950's. It embraced a wider range of commodities and services than did the "C" Series Index, but it did not take into account successive major changes in the pattern of expenditure and modes of living that began to occur early in 1950 and through to 1960. These changes could not, in fact, be detected and measured promptly, and incorporated into an index, concurrently with their happening. Nor was it envisaged as desirable to adopt fundamentally new procedures in price index construction until it was fully evident that far-reaching procedural changes were necessary to meet the situation that had developed between about 1950 and 1960.

In this period, home owning largely replaced house renting, the use of the motor car greatly increased and partly replaced use of public transport, and various items of electrical household equipment and television came into widespread use. The impact of these and other changes in usage upon the pattern of household expenditure was heightened by disparate movements in prices. Together, they rendered nugatory the attempt to meet the situation by devising a single Interim Retail Price Index. As studies progressed and new data became available, it was clear that *no single list of items and no single set of fixed weights* would be adequately representative as a basis for measuring retail price changes at all times throughout the post-war period. In consequence, the situation was met by compiling the Consumer Price Index constructed as a chain of linked indexes with significant changes in composition and weighting effected at short intervals during the period 1950-1960.

3. Purpose, Scope and Composition.—(i) *General.* The Consumer Price Index is a quarterly measure of variations in retail prices for goods and services representing a high proportion of the expenditure of wage-earner households. The weighting pattern relates to estimated aggregates of wage-earner household expenditures and not to estimated expenditures of an "average" or individual household of specified size, type, or mode of living. In this way, it is possible to give appropriate representation to owner-occupied houses as well as rented houses and to include motor cars, television sets, and other major expenditures which relate to some households and not to others.

Consumer (retail) price indexes are sometimes loosely called "cost of living indexes" and are thought to measure changes in the "cost of living". Neither the Consumer Price Index, nor any other retail price index, measures changes in the cost of living that result directly from changes in the mode or level of living. Changes of that kind are matters for consideration apart from price indexes, but the change in prices of goods and services is a very important part of the change in the cost of living and this part is measured by consumer (retail) price indexes.

The Consumer Price Index covers a wide range of commodities and services arranged in the following groups:—

- Food;
- Clothing and Drapery;
- Housing;
- Household Supplies and Equipment;
- Miscellaneous.

These groups do not include every item of household spending. It is both impracticable and unnecessary for them to do so. Prices are collected regularly for specified quantities and qualities of a large and representative selection of commodities and services. Movements in the prices of these items, when combined in suitable proportions, provide a representative measure of price change as affecting a high proportion of the expenditure of wage-earner households.

(ii) *Composition and Weighting.* A comprehensive view of the present composition and weighting of the Consumer Price Index is given in the table below. The weights shown are those comprised in the index for the six State capital cities combined. Broadly, they are in proportion to estimated consumption in 1956-57 (see (iii) "*Basis of Weighting*" on p. 449), valued at the relevant prices of March quarter, 1960.

## CONSUMER PRICE INDEX

COMPOSITION AND WEIGHTING PATTERN AS AT MARCH QUARTER, 1960, FOR THE SIX STATE CAPITAL CITIES COMBINED

Group, section, etc.	Percentage weight	
	Section, etc.	Group
<i>Food—</i> .. .. .	..	32.1
Cereal products—Bread, flour, biscuits, rice, and breakfast foods .. .. .	4.1	..

<b>Total</b> .. .. .	<b>100.0</b>	<b>100.0</b>

4. *Structure.*—(i) *A Chain of Linked Indexes.*—Substantial changes occurred in consumer usage and patterns of expenditure following the 1939–45 War. In order to keep the weighting pattern representative of current expenditures, it became necessary to construct indexes with additional items and changes in the weighting pattern at intervals, rather than on the basis of a list of items and set of weights that remained unchanged throughout the whole period covered. Four new series for short periods (namely, from the September quarter of 1948 to the June quarter of 1952, from the June quarter of 1952 to the June quarter of 1956, from the June quarter of 1956 to the March quarter of 1960, and from the March quarter of 1960 onwards) were therefore constructed and linked to form a continuous retail price index series to be known as the Consumer Price Index. During each period between links, the items and weighting remained unchanged. At times of linking, the weighting pattern was altered and new items that had become significant in household expenditure were introduced.

Under this method, in effect, average percentage price movements are assessed on one pattern up to the time of the link and on another pattern thereafter. The process of linking ensures that the series reflects only price variations and not differences in cost of the old and new lists of items. The introduction of new items and weights by linking does not, of itself, raise or lower the level of the index.

(ii) *Comparison of the Four Linked Series.* The Consumer Price Index is a chain of “fixed weight aggregative” indexes, with significant changes in composition and weighting effected at June quarter, 1952, June quarter, 1956, and March quarter, 1960. The principal changes are:—

- (a) the introduction of private motoring (June quarter, 1952) and of television (March quarter, 1960);
- (b) altered proportions of houses under the various modes of occupancy (June quarters, 1952 and 1956); and
- (c) changes in weights of fuel and fares (June quarters, 1952 and 1956) and of private motoring (June quarter, 1956).

It is envisaged that future links will be made in the index when significant changes in the pattern of household expenditure render it necessary to do so.

(iii) *Basis of Weighting.* For most of the items included in the index, the weights used are based on the pattern of consumption of the years 1952–53 to 1956–57, which for these items is broadly representative of the whole period for which the index has been compiled. In some important fields, no single set of items and weights was adequately representative throughout the whole period. Weights relevant to short-term conditions in these fields were therefore used in each of the four linked series which constitute the Consumer Price Index. The principal fields affected are Fuel and Light, Transport, Household Appliances, and Housing.

The resultant sets of index weights are broadly typical of the patterns of consumption of:—

- 1948–49: for periods up to June quarter, 1952;
- 1952–53: for periods from June quarter, 1952 to June quarter, 1956;
- 1956–57: for periods from June quarter, 1956.

The weighting of the index from the beginning of the current linked series (i.e., March quarter, 1960) is representative of a 1956–57 pattern of consumption as adjusted to incorporate television in the index from March quarter, 1960.

The sets of weights used for the successive periods covered by the index have been derived from analyses of statistics of production and consumption, the general Censuses of 1947 and 1954, the Censuses of Retail Establishments of 1948–49, 1952–53 and 1956–57 and the continuing Survey of Retail Establishments, from information supplied by manufacturing, commercial, and other relevant sources, and from special surveys.

In the main, the weights for items are derived from estimates of average household consumption or expenditure for the community as a whole. The following are the principal exceptions.

- (a) The proportionate weighting of the various modes of occupancy of houses, and the weighting generally in the Housing Group, are as estimated for wage and salary earner households (in the individual cities).
- (b) The weights for private motoring, tobacco and cigarettes, beer and some services have been adapted to accord with notional estimates of expenditure by wage earner households.
- (c) Local weights for the individual cities are used for some items (e.g. housing, fuel, and fares).

Basic data for many of the item weights were obtained initially from particulars of quantities consumed. Refinements were made where necessary so that item weights would reflect the approximate relative importance of the items (sometimes including similar items not directly priced) in terms of expenditure. Group and section weights were checked as far as possible against independent estimates of expenditure. Nevertheless, the index is essentially a combination of selected items under various headings and not a dissection of total household expenditure into its component parts. Tables showing the index weighting are provided to assist prospective users in an understanding of the index. The weights are designed as suitable for measuring changes in retail prices within the definition of the index and do not purport to be valid estimates for any other purpose.

#### § 4. Tabular Statements of Retail Price Index Numbers

1. **Consumer Price Index.**—(i) *General.* The index has been compiled for each quarter from September quarter, 1948, and for each financial year from 1948–49. "All Groups" index numbers and "Group" index numbers for each of the five major groups are compiled and published regularly for the six State capital cities separately and combined. The reference base for each of these indexes is: year 1952–53 = 100.0. Figures appearing after the decimal point possess little significance for general statistical purposes. They are inserted to avoid distortions that would occur in rounding off the figures to the nearest whole number.

Index numbers for each quarter are first issued in mimeographed statistical bulletins available from the Commonwealth Statistician about three weeks after the end of the quarter. These bulletins contain comment on the index and on price movements in that quarter. Tables showing index numbers for preceding quarters and years are presented.

(ii) *Consumer Price Index Numbers.* The following table shows Consumer Price Index Numbers (Total All Groups), for the six State capital cities separately and combined, for periods from the year 1948–49.

#### CONSUMER PRICE INDEX: ALL GROUPS INDEX NUMBERS

##### SIX CAPITAL CITIES, SEPARATELY AND COMBINED

(Base of each Index: Year 1952–53 = 100.0)

NOTE.—The separate city indexes measure price movements within each city individually. They do not compare price levels as between cities.

The following table shows Consumer Price Index Group Index Numbers for each State capital city for recent years and quarters.

### CONSUMER PRICE INDEX: GROUP INDEX NUMBERS

(Base of each Index: Year 1952-53 = 100.0)

NOTE.—The index numbers hereunder are designed to measure movements in retail prices of specified groups of items for specified cities individually. They measure variations from time to time and not differences in price level as between cities nor comparative costs of groups of items.

## § 5. Retail Price Index Numbers, 1901 to 1962

The index numbers shown below are presented as a continuous series, but they give only a broad indication of long-term trends in retail price levels. They are derived by linking a number of indexes that differ greatly in scope. The successive indexes used are: from 1901 to 1914, the "A" Series Retail Price Index; from 1914 to 1946-47, the "C" Series Retail Price Index; from 1946-47 to 1948-49, a composite of Consumer Price Index Housing Group (partly estimated) and "C" Series Index excluding Rent; from 1948-49 to 1962, the Consumer Price Index.

## RETAIL PRICE INDEX NUMBERS, 1901 TO 1962

## SIX STATE CAPITAL CITIES COMBINED

(Base: Year 1911 = 100)

Year	Index number	Year	Index number
1901	88	1932	138
1902	93	1933	133
1903	91	1934	136

1928	167	1959	443
1929	171	1960	459
1930	162	1961	471
1931	145	1962	469

(a) November.

## § 6. International Comparisons

The following table shows index numbers of consumer (retail) prices for various countries. Except where otherwise noted, the year 1958 is taken as base (= 100). The index numbers show fluctuations in prices in each country, and do not measure relative price levels as between countries.

(a) Consumer Price Index converted to base 1958 = 100 by Commonwealth Statistician.  
of March–December, 1958 = 100.

(c) Index of European families' expenditure.

(b) Base: Average

NOTE.—Symbol — on each side of an index number (e.g. -95-) indicates that two series have been linked at that period. Symbol — between two index numbers indicates that it is not possible to link two series (because of change in scope, etc.) and therefore the index numbers are not comparable with each other even though they are shown on the same base period.

## WHOLESALE PRICES AND PRICE INDEXES

## § 1. General

Two indexes of wholesale prices have been compiled by the Commonwealth Bureau of Census and Statistics. These are:—

- (i) The Melbourne Wholesale Price Index;
- (ii) The Wholesale Price (Basic Materials and Foodstuffs) Index.

A brief note on the Melbourne Wholesale Price Index, which is now obsolete, is given in § 3 on page 456. After reviewing the list of items and weighting of the Melbourne Wholesale Price Index, the 1930 Conference of Statisticians resolved that a new index of wholesale prices of basic materials and foodstuffs should be compiled. This index, the Wholesale Price (Basic Materials and Foodstuffs) Index, is compiled monthly and extends back to 1928.

## § 2. Wholesale Price (Basic Materials and Foodstuffs) Index

1. **Price Quotations.**—The prices used in the index have in the main been obtained directly from manufacturers and merchants, and, with a few important exceptions, from Melbourne sources. Apart from locally-produced building materials and one or two minor commodities, however, the price movements may be taken as representative of variations in wholesale prices of basic materials in most Australian markets.

Commodities in the index are priced in their primary or basic form wherever possible and, in respect of imported materials, as nearly as may be at the point where they first make effective impact on the local price structure. Thus the prices of imported goods are not taken at the time of import, but rather on an ex-bond (or into factory) basis.

Broadly, where home-consumption prices exist for local products, they have been used in this index. During the year 1950–51, wool for local manufacture was subsidized, and the home-consumption price for wool was used to calculate the index numbers shown in the table on page 456.

2. **Commodities and Grouping.**—For purposes of this index, “basic” materials (as opposed to certain of the foodstuffs) are commodities in the primary or basic forms in which they first enter into productive processes carried out in Australia. The list of items is divided into seven main groups, each of which is sub-divided into goods which are mainly imported, and goods which are mainly home-produced. The percentage of the total aggregate in 1961–62 contributed by each group was as follows:—Metals and coal, 17.85; oils, fats and waxes, 8.30; textiles, 3.11; chemicals, 4.04; rubber and hides, 1.82; building materials, 11.15; foodstuffs and tobacco, 53.73. Goods principally imported comprised 23.79 per cent. of the total aggregate in 1961–62, and goods principally home-produced, 76.21.

A full list of the commodities and the quantity-multipliers (weights) is published in *Labour Report* No. 48, 1960, page 45.

3. **Method of Construction.**—The index is constructed on the simple aggregative fixed-weights formula. The weights (quantity-multipliers) are based on estimates of the average annual consumption of the commodities in Australia during the period 1928–29 to 1934–35 inclusive. Changes in usage, changes of category as between “imported” and “home-produced” for some commodities, and changes in the industrial structure have affected the validity of some of the weights in the index.

During 1956, supplies and prices of potatoes and onions fluctuated violently between abnormally wide limits. These fluctuations were so great as to dominate the movement of the sections of the index in which these items were included, namely, “Foodstuffs and Tobacco”, “Goods Principally Home-produced” and “Total, All Groups”. In the circumstances, neither seasonal adjustment nor conversion of the index to a “changing weights” formula could be applied to eliminate these fluctuations. Accordingly, in order to provide a representative measure of general trend in wholesale prices, the index was reconstructed as from July, 1936, by omitting potatoes and onions.

Consideration is being given to the enlargement of the index to cover additional groups and to revision of the weighting pattern of the index.

4. **Index Numbers.**—Index numbers for each group of commodities and for All Groups for the index of wholesale prices of basic materials and foodstuffs are given in the following table. Current index numbers, on the base: Average of three years ended June, 1939 = 100, are published monthly in the mimeographed statistical bulletin *Wholesale Price (Basic Materials and Foodstuffs) Index* and in the *Monthly Review of Business Statistics*. A table showing index numbers computed to the base 1928 = 100 is published in the *Labour Report*.

## WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX NUMBERS

(Base of each Index: Average of 3 years ended June, 1939 = 100)

Period	Basic Materials							Food-stuffs and Tobacco (a)	Basic Materials and Foodstuffs		
	Metals and Coal	Oils, Fats and Waxes	Textiles	Chemicals	Rubber and Hides	Building Materials	Total		Goods principally imported (b)	Goods principally home-produced (a)	Total, All Groups (a)
1928-29	127	106	129	121	115	95	114	107	91	118	110
1929-30	126	111	99	116	87	94	107	110	94	118	111
1930-31	116	117	80	117	73	96	105	91	100	99	99

(a) Excluding potatoes and onions from 1936-37. See para. 3 on p. 455. (b) Represents only such imported commodities as are included in the Wholesale Price Index and does not measure changes in the prices of all imports. (c) Subject to revision.

## § 3. Melbourne Wholesale Price Index

An index of Melbourne wholesale prices was first compiled in 1912. It related chiefly to basic materials and foods weighted in accordance with consumption in the years immediately preceding that date. Neither the list of items nor the weighting was varied, except for some changes in the building materials group in 1949. The series has some historical significance as a measure of changes in the prices, since the year 1861, of its component items combined in the proportions in which they were in common use about the year 1910. A description of the index and a list of the commodities included in it were published in *Labour Report* No. 38, 1949, pages 43-45. Index numbers up to the year 1961, the last period for which the index was compiled, were published in *Official Year Book* No. 48, 1962.

## EXPORT PRICES AND PRICE INDEXES

## § 1. Previous Export Price Indexes

1. **1901 to 1917.**—An annual index of export prices has been published by the Bureau since its inception. The first index was compiled annually for the years 1901 to 1916–17. The method of computation was to select all articles of export which were recorded by units of quantity, and to apply to the quantities of these export commodities actually exported during any year the average price per unit ruling in the year 1901 (adopted as the base year). The “total value” so obtained was divided into the total recorded value of these exports for the year concerned and the result (multiplied by 1,000) was the export price index number for that year.

2. **1918 to 1930.**—The method was changed in 1918. Weights for all principal exports were calculated, based on the average quantities of exports for the nineteen and a half years from 1st January, 1897, to 30th June, 1916. To these weights were applied the “average unit export values” of each export in successive years, and a weighted aggregative index of “price” variations was derived. This index was published for the years 1897 to 1929–30. Particulars of this index were last published in Official Year Book No. 24, page 147.

3. **1928 to 1962.**—(i) *General.* After the 1914–18 War, the relative importance of different exports changed considerably, and the pattern of exports varied considerably from year to year. For these reasons, two new series of monthly export price indexes—one using fixed weights and the other using changing weights—were published in 1937, compiled back to 1928. The data on which both series were based differed from those used in the previous series of annual index numbers. The most important change was the use of actual (or calculated) export prices in place of the “unit values” declared at the Customs. Brief notes on these two indexes are given below. A full description of both indexes was last published in Official Year Book No. 48, 1962, pages 500–4.

(ii) *The Fixed Weights Index.* This was a weighted aggregative index of price variations. It was compiled back to 1928, with that year taken as base. In later years, it was published on the base: Average of three years ended June, 1939 = 100. The original weights (used for the period 1928 to 1936) were the average annual exports (production in the case of gold) during the five years 1928–29 to 1932–33. From July, 1936, the weights were revised and were based on average annual exports (production in the case of gold) during the three years 1933–34 to 1935–36. This index was published from 1937 until July, 1962, after which it was replaced by the current Export Price Index described in § 2 below.

(iii) *The Changing Weights Index.* This index was designed for shorter period comparisons—from one or more months of the current year to the corresponding months of the previous year. In computing these index numbers, the “quantity multipliers” were the quantities actually exported (sold, in some cases) in the months (or periods) to which the index numbers relate. This index was discontinued in 1962.

## § 2. The Current Export Price Index

1. *General.*—The current Export Price Index was first published in August, 1962, but index numbers were compiled back to July, 1959. The reference base of this index is: Year 1959–60 = 100. This index is a fixed-weights index, and its purpose (as was that of the previous fixed-weights index) is to provide comparisons monthly, over a limited number of years, of the level of export prices of the selected items, making no allowance for variations in quantities exported. The index numbers are thus measures of price change only. The price series used in the index relate to specified standards for each commodity and in most cases are combinations of prices for a number of representative grades, types, etc. For some commodities, price movements in the predominant market, or markets, are used, while for other commodities average realizations in all export markets are used. As nearly as possible, prices used are on the basis f.o.b. at the main Australian ports of export. The index is compiled by the method known as “weighted average of price relatives”.

2. *Composition and Weighting.*—There are 29 items in the current index compared with 20 items in the previous index. These 29 items have constituted approximately 83 per cent. of the total value of Australian exports in recent years. (The 20 items in the previous index, which in pre-war years constituted about 85 per cent. of total exports, and for most of the post-war period averaged about 80 per cent. of total exports, in recent years constituted about 73 per cent. of total exports.) The weights for the current index are based on average

annual values of exports during the five years 1956-57 to 1960-61, whereas the weights for the previous index were based on average annual exports during the three years 1933-34 to 1935-36. A comparison of the old and new indexes, showing percentage contributions of the various items to the total index in the year 1959-60, is set out in the table below.

### COMPARISON OF PREVIOUS AND CURRENT EXPORT PRICE INDEXES

#### PERCENTAGE CONTRIBUTION OF ITEMS TO ALL GROUPS INDEXES IN 1959-60

Item	Percentage contribution to All Groups Index	
	Previous Index	Current Index
Wool .. .. .	51.24	50.73
Beef .. .. .	4.68	6.71
Lamb .. .. .	2.22	0.76
Mutton .. .. .	0.36	0.59
Pork .. .. .	0.32	(a)
Canned beef .. .. .	(a)	1.65
Canned mutton .. .. .	(a)	0.21
Processed milk .. .. .	(a)	1.36
Butter .. .. .	9.46	4.02
Cheese .. .. .	(a)	0.64
Eggs .. .. .	(a)	0.47
Wheat and flour .. .. .	15.02	10.11
Barley .. .. .	(a)	1.77
Oats .. .. .	(a)	0.66
Sultanas .. .. .	1.21	1.06
Raisins .. .. .	0.10	(b)
Currants .. .. .	0.35	0.12
Canned pineapples .. .. .	(a)	0.20
Canned apricots .. .. .	(a)	0.11
Canned peaches .. .. .	(a)	0.37
Canned pears .. .. .	(a)	0.68
Sugar .. .. .	2.89	3.99
Cattle hides .. .. .	0.55	0.72
Calf skins .. .. .	0.09	(c)
Tallow .. .. .	0.51	0.54
Coal .. .. .	(a)	0.63
Iron and steel .. .. .	(a)	3.48
Copper .. .. .	0.27	1.57
Tin .. .. .	0.27	(a)
Zinc .. .. .	2.50	1.23
Lead .. .. .	4.07	2.97
Silver .. .. .	0.61	0.66
Gold .. .. .	3.28	1.99
<b>Total .. .. .</b>	<b>100.00</b>	<b>100.00</b>

(a) Not included. (b) Included in weight for sultanas. (c) Included in weight for cattle hides.

The following table sets out a list of the items, and groups of items, in the new index, together with the percentage contribution of each item and group to the All Groups index in the reference base year 1959-60. The weights used for some of the items are adjusted to cover some related commodities which are not priced directly. The most important instances of this are wool, which includes wool exported on sheepskins, and copper, zinc, lead and silver, which include the estimated metallic content of ores and concentrates exported. In the previous index, the weight for gold was derived from production instead of export figures. For the period 1956-57 to 1960-61, production and exports of gold were similar, and therefore in the new index the weight for gold (as for the other items) is based on average annual exports during the period.

## EXPORT PRICE INDEX

LIST OF ITEMS AND PERCENTAGE CONTRIBUTION OF ITEMS AND GROUPS TO  
ALL GROUPS INDEX IN 1959-60

Group and item	Percentage contribution to All Groups Index
Wool .. .. .	50.73
Meats—	
Beef .. .. .	6.71
Lamb .. .. .	0.76

(b) Nominal.

4. Link between Current and Previous Indexes.—In order to show approximate movements in export prices over a long period, the “All Groups” indexes of the previous and current series have been linked together at the year 1959–60, the earliest year for which the new index has been compiled. The table below shows this linked series and a long-term price index for wool, which is the most important single component in the movement of the “All Groups” index.

## EXPORT PRICE INDEX NUMBERS—LINKED SERIES

(Base of each Index: Year 1959-60 = 100)

## CONTROL OF PRICES DURING AND SINCE THE 1939-45 WAR

1. General.—An account of the measures taken by the Commonwealth Government to control prices from September, 1939, until 29th May, 1948 (the date of the Prices Referendum), was given in Official Year Book No. 37, pages 458-64.

2. Transfer of Price Control to the States.—Consequent upon the rejection of the proposal embodied in the Prices Referendum held on 29th May, 1948, that permanent power to control rents and prices (including charges) be conferred on the Commonwealth Government, responsibility for price fixation was assumed by the State Governments and steps were taken to pass State Prices Acts. These Acts were proclaimed to operate simultaneously on 20th September, 1948. Except in the case of Queensland, each Act was to remain in force for a specific period, but the period varied from State to State.

On 20th September, 1948, each State Government issued declarations covering uniform lists of goods and services, which were brought under price control. Existing Commonwealth Prices Regulation Orders continued to apply to these goods and services until specially varied in accordance with the terms of the State legislation. At the same time, the Commonwealth Government issued an identical list of declared items to operate in the Australian Capital Territory and other Territories of the Commonwealth.

In the operation of State price control, the State Prices Commissioners collaborated closely. Conferences of Commissioners were held at intervals of approximately two months. Thus a large degree of uniformity was attained in controlling and decontrolling items and in the fixation of margins and prices of major items.

Since 1952, price control has been progressively modified in all States. General price control ceased in Western Australia on 31st December, 1953; in Tasmania on 31st October, 1954; in Victoria on 31st December, 1954; in the Australian Capital Territory on 10th February, 1955; and in Queensland during 1961. In New South Wales, general control of prices was suspended on 15th April, 1955, but was temporarily restored on some items from July, 1955, to September, 1956.

**3. Price Stabilization.**—Expenditure by the Commonwealth Government on price stabilization subsidies reached a peak in 1947–48, and since then the Commonwealth Government has progressively reduced the range of commodities eligible for subsidy.

In addition to those subsidies which had been an integral part of the Price Stabilization Plan, the Commonwealth Government paid bounties and subsidies for assistance to primary production, and these payments also had a stabilizing influence on prices.

For particulars of expenditure by the Commonwealth Government on price stabilization, see Official Year Book No. 38, page 414, and for other subsidies and bounties, see Chapter XXI. Public Finance.

## WAGES

### § 1. Arbitration and Wages Boards Acts and Associated Legislation

**1. General.**—Particulars regarding the operation of Commonwealth and State Laws for the regulation of wages, hours and other conditions of employment were first compiled for the year 1913, and revised particulars have appeared annually in the *Labour Report* and in issues of the Official Year Book prior to No. 38. A summary of the Commonwealth legislation and brief particulars of Commonwealth and State industrial tribunals are given in the following paragraphs.

**2. Commonwealth.**—Under placitum (xxxv) of section 51 of the Commonwealth of Australia Constitution, the Commonwealth Parliament is empowered to make laws with respect to “conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State”. The Parliament has made such a law, namely the *Conciliation and Arbitration Act*.

This Act defines an “industrial dispute” as “(a) A dispute (including a threatened, impending or probable dispute) as to industrial matters which extends beyond the limits of any State; and (b) a situation which is likely to give rise to a dispute as to industrial matters which so extends; and includes—(c) such a dispute in relation to employment in an industry carried on by, or under the control of, a State or an authority of a State; (d) a dispute in relation to employment in an industry carried on by, or under the control of, the Commonwealth or an authority of the Commonwealth, whether or not the dispute extends beyond the limits of any one State; and (e) a claim which an organization is entitled to submit to the Commission under section eleven A of the *Public Service Arbitration Act* 1920–1960 or an application or matter which the Public Service Arbitrator has refrained from hearing, or from further hearing, or from determining under section fourteen A of that Act, whether or not there exists in relation to the claim, application or matter a dispute as to industrial matters which extends beyond the limits of any one State.”

The *Conciliation and Arbitration Act* was extensively amended by an Act (No. 44 of 1956) assented to on 30th June, 1956. This amendment altered the structure of the arbitration machinery by separating the judicial functions from the conciliation and arbitration functions. The Commonwealth Industrial Court was established to deal with judicial matters under the Act and the Commonwealth Conciliation and Arbitration Commission to handle the functions of conciliation and arbitration. A summary of the provisions of the *Conciliation and Arbitration Act* 1904–1961 is given in the following paragraphs.

The Commonwealth Industrial Court is at present composed of a Chief Judge and three other Judges. The jurisdiction of the Court shall be exercised by not less than two Judges, except in the following circumstances. A single Judge may exercise the jurisdiction of the Court with respect to the dismissal or injury of an employee on account of industrial action, interpretation of awards, questions concerning eligibility of membership of an organization, disputes between an organization and its members and a prescribed matter of practice or procedure. A single Judge may refer a question of law for the opinion of the Court constituted by not less than two Judges. The Court is a Superior Court of Record with the same power to punish contempts of its power and authority as is possessed by the High Court. In general, decisions of the Industrial Court are final; however, an appeal lies to the High Court, but only when the latter grants leave to appeal. The Act provides for the registration of associations of employees and employers and for inquiries to be held concerning disputed elections in organizations; and certain powers in connexion therewith are, by the Act, given to the Industrial Court. Provision is also made for the Commission to exercise the powers of the Court with regard to an application for cancellation of registration of an organization. Any such change of jurisdiction must be notified by proclamation. This provision could be used if the powers of the Court in this regard were declared, in whole or in part, to be invalid.

Special provision is made concerning the right of audience before the Commonwealth Industrial Court. Briefly, except in proceedings which, in general, involve questions of law or offences against the Act, parties are able to elect whether to appear personally or to be represented by lawyers or officials. Even in proceedings involving questions of law, except appeals from decisions by other Courts to the Industrial Court, on matters arising under this Act or the *Public Service Arbitration Act 1920-1960*, the parties may, if they wish and the Court grants leave, be represented by officials.

The Commonwealth Conciliation and Arbitration Commission at present consists of a President, five Deputy Presidents, a Senior Commissioner, seven Commissioners and three Conciliators. The Commission is empowered to prevent or settle industrial disputes by conciliation or arbitration, and to make suggestions and to do such things as appear right and proper for (a) effecting a reconciliation between parties to industrial disputes; (b) preventing and settling industrial disputes by amicable agreement; and (c) preventing and settling, by conciliation or arbitration, industrial disputes not prevented or settled by amicable agreement. The Commission may exercise its powers of its own motion or on the application of a party.

The President may assign a Commissioner to deal with industrial disputes relating to particular industries, or members of the Commission to deal with a particular industrial dispute. However, subject to the approval of the President, it is the duty of the Senior Commissioner to organize and allocate the work of the Commissioners and Conciliators.

When an industrial dispute occurs or is likely to occur, a Commissioner shall take steps for the prompt prevention or settlement of that dispute by conciliation or, if in his opinion conciliation is unlikely to succeed or has failed, by arbitration. A Commissioner may arrange with the Senior Commissioner for a Conciliator to assist the parties to reach an amicable agreement and shall do so if the parties so request. If an agreement is reached, a memorandum of its terms shall be made in writing, and may be certified by the Commission. A certified memorandum shall have the same effect as an award.

Only the Commission in Presidential Session, that is, the Commission constituted by at least three presidential members nominated by the President, has the power to make awards, or to certify agreements, concerning standard hours, basic wages and long-service leave.

Upon application by a party to an industrial dispute, a Commissioner shall consult with the President as to whether in the public interest any matter in dispute should be dealt with by a Commission constituted by not less than three members nominated by the President, at least one of whom shall be a presidential member and one, where practicable, the Commissioner concerned. The President may direct the Commission to hear the matter in dispute; however, after consideration, the Commission may refer the matter in dispute back for determination to the Commissioner originally dealing with the dispute.

An appeal against the decision of a Commissioner shall be heard by not less than three members nominated by the President, of whom at least two shall be presidential members of the Commission. However, an appeal will not be heard unless the Commission considers it is necessary as a matter of public interest. The President, after taking account of the views of the parties to a dispute, may appoint a member of the Commission to take evidence on behalf of a presidential bench of the Commission, so that it may have this evidence before it when it commences its hearing.

Full benches of the Commission not constituted by the same persons may sit in joint session at the direction of the President when he considers it desirable and has the opinion that a question is common to the matters before those benches. A joint session may be held whether the benches concerned are constituted pursuant to the *Conciliation and Arbitration Act* or the *Public Service Arbitration Act*, and whether they are constituted to hear references or appeals. However, it is left to each appropriate full bench to determine any of the matters before it.

Provision is also made in the Act for a presidential member of the Commission to handle industrial matters in connexion with the maritime industries, the Snowy Mountains Area and the stevedoring industry, except in those matters for which the Act requires that the Commission shall be constituted by more than one member.

The Commonwealth Conciliation and Arbitration Commission also deals with disputes and industrial matters, interstate or intra-state, associated with undertakings or projects of the Commonwealth Government which have been declared by the Minister to be Commonwealth projects for the purposes of this Act. In effect, this places employees of Commonwealth projects, so declared, under the jurisdiction of the Commission. The Minister has the power to exempt certain persons or classes of persons working on these projects from the jurisdiction of the Commission.

The Commission may make an award in relation to an industrial dispute concerning employees of a Commonwealth project or when the Public Service Arbitrator refrains from dealing with claims made by a Public Service employee organization or consents to the claims being presented to the Commission, though such an award may be inconsistent with a law of the Commonwealth relating to salaries, wages, rates of pay or terms or conditions of service of employees in the Public Service as defined by section 3 of the *Public Service Arbitration Act* 1920-1960, not being the *Commonwealth Employees' Compensation Act* 1930-1959, the *Commonwealth Employees' Furlough Act* 1943-1959, the *Superannuation Act* 1922-1959 or any other prescribed Act.

The Act provides that where a State law, or an order, award, decision or determination of a State industrial authority is inconsistent with or deals with a matter dealt with in an award of the Commission, the latter shall prevail, and the former, to the extent of the inconsistency or in relation to the matter dealt with, shall be invalid.

For further particulars regarding Commonwealth arbitration legislation, see the annual *Labour Report*.

3. **States.**—In each State, Industrial Tribunals have been established to regulate and arbitrate in industrial matters. Brief particulars are given in the following paragraphs.

(i) *New South Wales.* The controlling authority is the Industrial Commission of New South Wales, consisting of a President and five other Judges. Subsidiary tribunals are the Conciliation Commissioners, the Apprenticeship Commissioner, Conciliation Committees and Apprenticeship Councils constituted for particular industries. Each Conciliation Committee consists of a Conciliation Commissioner as Chairman and equal numbers of representatives of employers and employees. The Apprenticeship Commissioner and the members of the Conciliation Committee for an industry constitute the Apprenticeship Council for the industry. These subsidiary tribunals may make awards binding on industries, but an appeal to the Industrial Commission may be made against any award. Special Commissioners with conciliatory powers and limited arbitration powers may be appointed. Compulsory control commenced in 1901, after the earlier Acts of 1892 and 1899 providing for voluntary submission of matters in dispute had proved abortive.

(ii) *Victoria.* The authorities are separate Wages Boards for the occupations and industries covered, each consisting of a chairman and equal numbers of representatives of employers and employees, and a Court of Industrial Appeals, the latter presided over by a Judge of the County Court. The system was instituted in the State in 1896, and represented the first example in Australia of legal regulation of wage rates.

(iii) *Queensland.* Legal control was first instituted in 1907 with the passing of the *Wages Board Act*. The *Industrial Conciliation and Arbitration Act* of 1961 established the Industrial Conciliation and Arbitration Commission and preserved and continued in existence the Industrial Court. The Industrial Court is constituted by the President (a Judge of the Supreme Court of Queensland) sitting alone, and the Full Industrial Court by the President and two Commissioners. The Conciliation and Arbitration Commission is constituted

by a Commissioner sitting alone; and the Full Bench of the Commission by at least three Commissioners. Not more than five Commissioners shall be appointed. A Commissioner shall not be capable of being a member of the Executive Council or of the Legislative Assembly, and shall not take part in the management of any business.

(iv) *South Australia.* The principal tribunal is the Industrial Court, composed of the President (a person eligible for appointment as a Judge of the Supreme Court) who may be joined by two assessors employed in the industry concerned; Deputy Presidents may also be appointed. There are also Industrial Boards, for the various industries, consisting of a chairman and equal numbers of representatives of employers and employees. Another tribunal provided for under the Industrial Code is the Board of Industry, composed of a President, who shall be the President or a Deputy President of the Industrial Court, and four Commissioners. Broadly speaking, the functions of these three tribunals are:—(i) the Industrial Court delivers awards concerning workers who do not come under the jurisdiction of the Industrial Boards and hears appeals from decisions of Industrial Boards; (ii) the determinations of the Industrial Boards apply to most industries in the metropolitan area; however, for employees of the Public Service, Railways, and councils of a municipality or district, determinations of Industrial Boards apply to the whole of the State; (iii) the Board of Industry declares the "living wage".

(v) *Western Australia.* The system of control comprises an Arbitration Court, Industrial Boards, Conciliation Committees and a Conciliation Commissioner. Employers and employees are equally represented on both Boards and Committees. The Court consists of a Judge of the Supreme Court and two members. Commissioners may also be appointed by the Minister for the settlement of particular disputes. Legal control dates back to 1900.

The Western Australian Coal Industry Tribunal, established under the *Mining Act*, has power to determine any industrial matter in the coal mining industry. It consists of a chairman and four other members (two representatives each of employers and employees). Boards of reference may be appointed by the Tribunal and decisions of the Tribunal may be reviewed by the Court of Arbitration on the application of a party subject to the decision.

(vi) *Tasmania.* The authority consists of Wages Boards for separate industries, comprising a Chairman (who is common to all Wages Boards), appointed by the Governor, and equal numbers of representatives of employers and employees, appointed by the Minister administering the Act. The system was instituted in 1910.

## § 2. Rates of Wage and Hours of Work

1. *General.*—This section contains indexes (with base: year 1954 = 100) of minimum weekly and hourly rates of wage and standard hours of work for adult males and adult females for Australia and each State. In the indexes, there are 15 industrial groups for adult males and 8 industrial groups for adult females. For relevant periods, these indexes replace cognate indexes (base: year 1911 = 1,000 for males and April, 1914 = 1,000 for females) published in issues prior to No. 46, 1960. The current indexes are based on the occupation structure existing in 1954. Weights for each industry and each occupation were derived from two sample surveys made in that year. The first was the Survey of Awards in April, 1954, which showed the number of employees covered by individual awards, determinations and agreements. This provided employee weights for each industry as well as a basis for the Survey of Award Occupations made in November, 1954. This second survey showed the number of employees in each occupation within selected awards, etc., thereby providing occupation weights.

The industrial classification used in the current indexes, shown in the table on page 469, does not differ basically from the previous classification, the alterations being largely in the arrangement of classes. The former Pastoral, Agricultural, etc., group and the Domestic part of the group Amusement, Hotels, Personal Service, etc. are excluded from the current indexes because of coverage difficulties.

The minimum wage rates and standard hours of work used in the current indexes are for representative occupations within each industry. They have been derived entirely from representative awards, determinations and agreements in force at the end of each month or quarter, commencing with 31st March, 1939, for adult males and 31st March, 1951, for adult

females. From January, 1957, particulars for adult males have been available as at the end of each month. The index for adult males includes rates and hours for 3,417 award designations. However, as some of these designations are operative within more than one industry, or in more than one State, the total number of individual award occupations is 2,315. For adult females, the corresponding numbers are 1,103 and 518. Using the industry and occupation weights derived from the surveys described above, these rates and hours were combined to give weighted averages for each industrial group for each State and Australia. Weighted averages of the components of the total minimum weekly wage rate, i.e. basic wage, margin and loading, were calculated separately for employees covered by Commonwealth awards, etc., and for those covered by State awards, etc. (see pages 470-1).

Because the indexes are designed to measure movements in prescribed minimum rates of "wages" as distinct from "salaries", those awards, etc., which relate solely or mainly to salary earners are excluded.

A more detailed description of the current indexes of minimum rates of wage and standard hours of work is given in the *Labour Report*, which also contains an extensive tabular presentation of the minimum rates of wage for adult males and females in the principal occupations in the capital city of each State. Further particulars of weekly wage rates and index numbers will be found in the statistical bulletins S.B. 123—*Minimum Weekly Wage Rates, 1939 to 1959*, and S.B. 124—*Minimum Weekly Wage Rates, January, 1960 to June, 1962*. Current figures are published in the monthly bulletin *Wage Rates and Earnings*.

2. **Weekly Wage Rates.**—(i) *Adult Males—States.* The following table shows, for each State and Australia, the weighted average minimum weekly rates of wage payable to adult male workers for a full week's work, and index numbers at the dates specified.

(a) As prescribed in awards, determinations and agreements. (b) The amounts shown should not be regarded as actual current averages, but as an index expressed in money terms, indicative of trends. (c) Includes the value of keep, where supplied. (d) Excludes rural.

(iii) *Adult Males—Components of Total Wage Rate.* A dissection of weighted average minimum weekly wage rates for adult males into the three components of the total minimum wage, i.e. basic wage, margin and loading, is given in the following two tables, separate particulars being shown for employees covered by awards, etc., within Commonwealth and

State jurisdictions. For the purposes of the index, the Commonwealth jurisdiction embraces awards of, or agreements registered with, the Commonwealth Conciliation and Arbitration Commission, and determinations of the Commonwealth Public Service Arbitrator. State jurisdictions embrace awards or determinations of, or agreements registered with, State industrial tribunals, together with certain unregistered agreements, where these are dominant in the particular industries to which they refer.

The basic wage rates shown herein are weighted averages of the rates prescribed in awards, etc., for the occupations included in the index for each State. For industries other than mining, metropolitan basic wage rates have generally been used. However, there are a number of occupations for which basic wage rates other than the metropolitan rate are prescribed. Also, in some States at various times, State Government employees under Commonwealth awards have been paid State basic wage rates, and the basic wage rates of some employees have been subject to automatic quarterly adjustments while those of other employees within the same jurisdiction have remained unchanged. In all such cases, the basic wage rate actually paid is used in tables below. For these and other reasons, the weighted average basic wage rates differ, in the majority of cases, from the metropolitan basic wage rates shown in other sections of this chapter.

Margins are minimum amounts, in addition to the basic wage, awarded to particular classifications of employees for features attaching to their work, such as skill, experience, arduousness and other like factors.

Loadings are minimum amounts, in addition to the basic wage and margin (if any), awarded for various kinds of disabilities associated with the performance of work, or to meet particular circumstances. They include payments such as industry loadings and other general loadings prescribed in awards, etc., for the occupations included in the index.

For a more detailed description of this dissection of weekly wage rates into components and for tables for each State and Australia, according to jurisdiction, extending back to 1939, see the statistical bulletins S.B. 123—*Minimum Weekly Wage Rates, 1939 to 1959*, and S.B. 124—*Minimum Weekly Wage Rates, January, 1960, to June, 1962*.

(a) *States.* The following table shows the components of the total minimum weekly wage rate for each State and Australia, as at 31st December, 1962, according to jurisdiction.

(a) As prescribed in awards, determinations and agreements. (b) The amounts shown should not be regarded as actual current averages, but as an index expressed in money terms, indicative of trends.

3. *Standard Hours of Work.*—(i) *General.* In the fixation of weekly wage rates, most industrial tribunals prescribe the number of hours constituting a full week's work for the wage rates specified. The hours of work so prescribed form the basis of the compilation of the weighted averages and index numbers on pages 474–5. The main features of the reduction of hours to 44 and later to 40 per week are summarized below. In considering such changes, it must be remembered that even within individual States the authority to alter conditions of work is divided between Commonwealth and State industrial tribunals and the various legislatures, and that the State legislation usually does not apply to employees covered by awards of the Commonwealth Conciliation and Arbitration Commission. However, it may do so in respect of matters not treated in Commonwealth awards.

(ii) *The 44-hour Week.* No permanent reduction to a 44-hour week was effected until 1925, although temporary reductions had been achieved earlier. In 1920, the New South Wales legislature granted a 44-hour week to most industries, but in the following year this provision was withdrawn. Also in 1920, the President of the Commonwealth Court of Conciliation and Arbitration (Higgins J.), after inquiry, granted a 44-hour week to the Timber Workers' Union, and in the following year extended the same privilege to the Amalgamated Society of Engineers. In 1921, however, a reconstituted Commonwealth Court of Conciliation and Arbitration unanimously rejected applications by five trade unions for the shorter standard week and reintroduced the 48-hour week in the case of the above-mentioned two unions then working 44 hours. During 1924, the Queensland Parliament passed legislation to operate from 1st July, 1925, granting the 44-hour standard week to employees whose conditions of work were regulated by awards and agreements of the Queensland State industrial authority. Similar legislative action in New South Wales led to the re-introduction of the 44-hour week in that State as from 4th January, 1926.

In 1927, after an exhaustive inquiry, the Commonwealth Court of Conciliation and Arbitration granted a 44-hour week to the Amalgamated Engineering Union and intimated that this reduction in standard hours of work would be extended to industries operating under conditions similar to those in the engineering industry. Applications for the shorter hours by other unions were, however, treated individually, the nature of the industry, the problem of production, the financial status and the amount of foreign competition being fully investigated. The economic depression delayed the extension of the standard 44-hour week until the subsequent improvement in economic conditions made possible its general extension to employees under Commonwealth awards.

In States other than New South Wales and Queensland, no legislation was passed to reduce the standard hours of work, so that, for employees not covered by Commonwealth awards, the change had to be effected by decisions of the appropriate industrial tribunals. In these cases, the date on which the reduction to 44 hours was implemented depended on the decision of the tribunals in particular industries, employees in some industries receiving the benefit of the reduced hours years ahead of those in others. In these States, the change to the shorter week extended over the years from 1926 to 1941.

(iii) *The 40-hour Week.* (a) *Standard Hours Inquiry, 1947.* Soon after the end of the 1939-45 War, applications were made to the Commonwealth Court of Conciliation and Arbitration for the introduction of a 40-hour week, and the hearing by the Court commenced in October, 1945. Before the Court gave its decision, the New South Wales Parliament passed legislation granting a 40-hour week, operative from 1st July, 1947, to industries and trades regulated by State awards and agreements, and in Queensland similar legislation was introduced in Parliament providing for the 40-hour week to operate from 1st January, 1948.

The Commonwealth Court of Conciliation and Arbitration, in its judgment on 8th September, 1947, granted the reduction to the 40-hour week from the beginning of the first pay-period commencing in January, 1948. The Queensland Act was passed, and was proclaimed on 10th October, 1947. On 27th October, 1947, the South Australian Industrial Court, after hearing applications by unions, approved the incorporation of the 40-hour standard week in awards of that State. The Court of Arbitration of Western Australia on 6th November, 1947, approved that, on application, provision for a 40-hour week could be incorporated in awards of the Court, commencing from 1st January, 1948.

In Victoria and Tasmania, the Wages Boards met and also incorporated the shorter working week in their determinations, so that from the beginning of 1948 practically all employees in Australia whose conditions of labour were regulated by industrial authorities had the advantages of a standard working week of 40 hours or, in certain cases, less.

(b) *Basic Wage and Standard Hours Inquiry, 1952-53.* In the 1952-53 Basic Wage and Standard Hours Inquiry, the employers sought an increase in the standard hours of work per week, claiming that one of the chief causes of the high costs and inflation had been the loss of production due to the introduction of the 40-hour week. This claim was rejected by the Court, as it considered that the employers had not proved that the existing economic situation called for a reduction of general standards in the matter of the ordinary working week. (*See also* § 5, para. 2 (iii) p. 488.)

(c) *Basic Wage and Standard Hours Inquiry, 1961.* In this case, the employers sought an increase in the number of ordinary working hours from 40 to 42 per week, with a concomitant increase in weekly wages by an amount equal to two hours' pay at ordinary rates. This was to be a temporary measure to have effect for four years, after which time hours would revert to forty and the increased wage would remain. The employers submitted that such a measure was called for by the balance of payments crisis, that it would lead to increased productivity at stable prices, and that work in excess of forty hours would be more evenly distributed with consequent financial relief for men not getting overtime work. The Commonwealth Conciliation and Arbitration Commission, which heard the application, was not persuaded that the anticipated consequences would follow, and the claim was rejected. (See also § 5, para. 2 (x) p. 493.)

4. **Hourly Wage Rates.**—(i) *General.* The average rates of wage in the preceding tables are based on the minimum rates prescribed for selected occupations in awards, etc., for a full week's work, excluding overtime. However, the number of hours constituting a full week's work differs in some instances between various occupations in each State, and between the same occupations in the several States. For some purposes, a better comparison may be obtained by reducing the results in the preceding paragraphs to a common basis, namely, the rate of wage per hour. The particulars of weighted average minimum hourly rates of wage given in the following tables relate to all industrial groups except Rural, and Shipping and Stevedoring. The Rural industry is not included in the index and Shipping and Stevedoring has been excluded because, for some of the occupations in this group, definite particulars for the computation of average working hours and hourly rates of wage are not available.

(ii) *Adult Males—States.* The following table shows the weighted average minimum hourly rates of wage payable to adult male workers, and index numbers of hourly rates in each State.

(a) The amounts shown should not be regarded as actual current averages, but as an index expressed in money terms, indicative of trends.

5. *Weighted Average Standard Weekly Hours of Work.*—The 40-hour week has operated in Australia generally from 1st January, 1948, and in New South Wales from 1st July, 1947 (*see* para. 3 (iii), p. 473). However, as stated in para. 4 (i) on page 474, the number of hours constituting a full week's work (excluding overtime) differs between occupations and/or between States. The weighted average standard hours of work (excluding overtime) prescribed in awards, determinations and agreements for a full working week, in respect of adult male workers in all industrial groups except Rural, and Shipping and Stevedoring, at 31st December, 1962, were:—New South Wales, 39.95; Victoria, 39.97; Queensland, 39.98; South Australia, 39.96; Western Australia, 39.89; Tasmania, 39.97; Australia, 39.96. Corresponding figures for adult female workers at 31st December, 1962, were:—New South Wales, 39.53; Victoria, 39.81; Queensland, 39.70; South Australia, 39.77; Western Australia, 39.78; Tasmania, 39.56; Australia, 39.67.

## § 3. Average Weekly Earnings

1. **Average Weekly Total Wages and Salaries Paid and Average Earnings, All Industries.**—The following figures are derived from employment and wages recorded on Pay-roll Tax returns, from other direct collections and from estimates of the unrecorded balance. Pay of members of the Defence Forces is not included. The figures are subject to revision. Corresponding figures for each quarter were published in the *Monthly Bulletin of Employment Statistics* until the August, 1962, issue and since then have been published in a monthly bulletin entitled *Wage Rates and Earnings*. Figures are also published in the *Monthly Review of Business Statistics*.

**AVERAGE WEEKLY TOTAL WAGES AND SALARIES PAID AND AVERAGE EARNINGS(a)**

1960-61	..	..	24.03	23.32	21.00	21.33	20.57	21.42	22.86
1961-62	..	..	24.51	23.96	21.79	21.96	21.27	22.43	23.48

(a) Includes, in addition to wages at award rates, earnings of salaried employees, overtime earnings, over-award and bonus payments, etc. (b) Includes Australian Capital Territory. (c) Includes Northern Territory. (d) Total wages and salaries, etc., divided by total civilian employment expressed in male units. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings. As it is not possible to estimate the ratio of female to male earnings in the several States, the same ratio has been used for each State. Because the actual ratio may vary between States, precise comparisons between average earnings in different States cannot be made on the basis of the figures above.

2. **Average Weekly Earnings Index Numbers.**—The following table shows, for "All Industries" and for "Manufacturing", the movement in average weekly earnings from 1948-49 to the March quarter, 1963. The "All Industries" index is based on Pay-roll Tax returns and other data. The index for manufacturing industries for the years 1948-49 to 1961-62 is based on the average earnings of male wage and salary earners employed in factories as disclosed by annual factory censuses (see Chapter VI. Manufacturing Industry, § 8, para. 2 (iii), p. 206); figures for quarters subsequent to June quarter, 1962, are preliminary estimates based on Pay-roll Tax returns.

The index numbers for "All Industries" and "Manufacturing" show the movement in average earnings for each group over a period of time. However, they do not give, at any point of time, a comparison of actual earnings in the two groups. The base of each series is the year 1953-54 = 100, and both series have been seasonally adjusted.

**AVERAGE WEEKLY WAGE EARNINGS(a) INDEX NUMBERS: AUSTRALIA**  
**SEASONALLY ADJUSTED**  
*(Base of each Series: 1953-54 = 100)*

Year	All industries(b)	Manufacturing	Quarter	All industries(b)	Manufacturing

1954-55..	105.4	106.9	March	145.4	144.4
1955-56..	112.2	113.8	June	147.0	145.4
1956-57..	118.2	118.3			
1957-58..	121.3	122.0	1962-63—September	146.2	145.7
			December	147.3	145.6
1958-59..	124.5	125.6	March	149.6	148.6
1959-60..	133.6	135.4			
1960-61..	140.5	141.1			
1961-62..	144.7	143.4			

(a) See note (a) to table on previous page. (b) Average earnings per male unit employed. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings.

#### § 4. Surveys of Wage Rates, Earnings and Hours

1. **General.**—Towards the end of 1960, a statistical survey of the wage structure of Australia was undertaken by this Bureau. The object of the survey was to obtain information as to marginal rates of wage and actual weekly earnings of adult male employees (excluding part-time and casual employees) for the last pay-period in September, 1960. A survey as at the last pay-period in October, 1961, provided similar information as to actual weekly earnings. A survey of weekly earnings and hours, carried out in respect of the last pay-period in October, 1962, provided information about the hours of work and average earnings of male and female employees in private industry.

The surveys were based on returns from stratified random samples of private employers subject to Pay-roll Tax. They did not include government or semi-government employment. Because of insufficient data, employees in rural industry and private domestic service were excluded, as also were employees of religious, benevolent and other similar bodies exempt from Pay-roll Tax. In addition, the 1960 survey excluded the shipping and stevedoring industry, the motion picture industry, certain businesses such as those of accountants and consultant engineers, and trade associations, etc.

A brief summary of the results of the 1960 and 1961 surveys is given in paras. 2 and 3 below. Only the proportions of the total employees in the various groups are shown in this issue, but more detailed particulars, including the number of employees in each group, may be found in Official Year Book No. 48, 1962, pages 410-418. The results of the 1962 survey are shown in para. 4.

2. **Survey of Wage Rates and Earnings, September, 1960.**—The sample for this survey was designed to provide accurate particulars only for Australia as a whole; hence no State details are shown in the tables below. The survey covered more than 1,100,000 adult male employees.

Definitions relevant to the survey are as follows.

- (a) *Adult Male Employees* refers to employees on the pay-roll of the last pay-day in September, 1960, and includes those who, although under 21 years of age, were paid at the adult rate prescribed in the appropriate award. Part-time and casual employees and those absent in the defence forces were excluded.
- (b) The term *awards*, as used herein, denotes awards or determinations of, or agreements registered with, Commonwealth or State industrial tribunals. Employees whose rates of pay and working conditions were not regulated by awards, and employees covered by formal, though unregistered, agreements between employee organizations and employers, are shown as "not covered by awards".

- (c) *Margins* are minimum amounts, in addition to the basic wage, awarded to particular classifications of employees for features attaching to their work, such as skill, experience, arduousness or other like factors. For the purposes of this survey the following were not included in margins:—special allowances prescribed in awards, such as shift, dirt, and height money, leading hand allowances, etc.; and other payments such as commission, payments above the minimum rate for contract and piece work, etc. (see sub-para. (e) and (g) below and also § 6. Wage Margins). In the case of contract work, etc., the margin was determined by the minimum amount prescribed in the award for the class of work performed. Where the marginal rate of wage for an occupation was not specified in an award, the margin was assumed to be the difference between the total minimum prescribed rate of wage for the occupation and the appropriate Commonwealth or State basic wage. For employees not covered by awards, and whose margins were not specified in unregistered agreements, the margin was assumed to be the difference between the appropriate basic wage in the State jurisdiction and the agreed rate of pay for a standard working week (or the weekly equivalent of the agreed rate).
- (d) *Total Weekly Earnings* include ordinary time earnings at award rates (and, for employees not covered by awards, payments at agreed rates for a standard working week), overtime earnings and all other payments. Annual or other periodical bonuses were included only at the appropriate proportion for one week. For employees paid other than weekly, only the proportion of earnings equivalent to one week was included.
- (e) *Ordinary Time Earnings at Award Rates* represent the total weekly payment to adult male employees (excluding part-time and casual employees) for hours of work paid for up to the standard or award hours, calculated at award rates of pay. They include payments for sick leave, proportion of annual leave, special allowances prescribed in awards, etc. (see sub-para. (c) above). For employees not covered by awards, they include payments at agreed rates for a standard working week.
- (f) *Overtime Earnings* represent the total weekly payment to adult male employees (excluding part-time and casual employees) for time worked in excess of award or agreed hours.
- (g) *Other Earnings* include all payments other than those in sub-para. (e) and (f) above, such as commission, payments above the minimum rate for contract work, incentive scheme, piece-work, and profit-sharing scheme payments, proportion of annual or other periodical bonuses, points system payments, attendance or good time-keeping bonuses, etc. (see sub-para. (c) above).

(i) *Marginal Rates of Wage. (a) Industrial Groups.* In the following table, adult male employees in each of the main industrial groups are classified according to weekly margin above the basic wage.

**ADULT MALE EMPLOYEES (EXCLUDING PART-TIME AND CASUAL EMPLOYEES) CLASSIFIED ACCORDING TO MARGINAL RATES OF WAGE: INDUSTRIAL GROUPS, AUSTRALIA, SEPTEMBER, 1960 (a)**

(c) Inquiry indicated that many of the adult males in this group were absent for part of the week.

3. *Survey of Weekly Earnings, October, 1961.*—For this survey the sample was designed so that particulars of the distribution of earnings in each State could be obtained as well as those for Australia (see below), but it was not possible, without a considerable increase in the number of returns, to obtain particulars for each industry group in each State. State details were therefore restricted to the two major groups, manufacturing and non-manufacturing; those for Australia were obtained for eight separate industry groups. Because of limitations of space, it has not been possible to include all figures in the tables herein. For further details, reference should be made to Statistical Bulletin No. 22—*Survey of Weekly Earnings, October, 1961*, 14th February, 1962.

The businesses selected in the sample were allocated by States and by industry and size groups in such a way that the precision of the sample estimates for total manufacturing and total non-manufacturing, expressed as percentages of the estimates themselves, would be approximately the same in each State.

Definitions relevant to the survey are as follows.

*Adult Male Employees* refers to employees on the pay-roll of the last pay-period in October, 1961, and includes those who, although under 21 years of age, were paid at the adult rate prescribed for their particular occupation. Part-time and casual employees and those absent in the defence forces were excluded. Executive clerical and sales staff were included, as were employees working short time who would normally have been full-time employees.

*Total Weekly Earnings* (i.e. gross earnings before taxation and other deductions) include ordinary time earnings, overtime earnings and all other payments, such as holiday and sick pay, commission, payments above the minimum rate for contract work, incentive scheme, piece-work and profit-sharing scheme payments, points system payments, attendance bonuses, etc. Annual or other periodical bonuses have been included only at the appropriate proportion for one week. For employees paid other than weekly, only the proportion of earnings equivalent to one week has been included.

(i) *States.* (a) *All Industries.* The following table shows the proportions of adult male employees in each earnings group in each State.

**ADULT MALE EMPLOYEES (EXCLUDING PART-TIME AND CASUAL EMPLOYEES) CLASSIFIED ACCORDING TO TOTAL WEEKLY EARNINGS, OCTOBER, 1961(a)**

(c) Inquiry indicated that the majority of the adult males in this group did not work a full week because of absenteeism, changing jobs, etc. Others were working short time.

4. *Survey of Weekly Earnings and Hours, October, 1962.*—This survey provided, for Australia, information on average weekly and hourly earnings and average weekly hours paid for, in each of the principal industrial groups. Much of this information had previously not been available in Australia. The total numbers of employees in the field represented by the sample were 1,318,000 males and 513,000 females, the coverage being as set out on page 477. Preliminary results of the survey, which were published in Statistical Bulletin 213—*Survey of Weekly Earnings and Hours, October, 1962*, 20th March, 1963, are shown in the tables following. The information for each State is not available in the same industry detail as is that for Australia, but tables have been included to show particulars for the two broad groups of industry, manufacturing and non-manufacturing. Further particulars will be found in the Appendix.

Definitions relevant to the survey are as follows.

*Employees* refers to male and female employees on the pay-roll of the last pay-period in October, 1962.

*Employees whose Hours of Work were known* exclude (i) all managerial, executive, professional and higher supervisory staff, irrespective of whether or not their hours of work were known, and (ii) any other employees whose hours of work were not known.

They comprise all other employees who received pay for the last pay-period in October, 1962 and whose hours of work were known (including foremen, transport, supervisors, floor-walkers, other minor supervisory employees, clerical and office staff, etc.).

*Part-time Employees* refers to employees who ordinarily worked less than 30 hours a week. Employees on short time who normally worked 30 hours or more were classified as "other than part-time".

*Adults* include employees who, although under 21 years of age, were paid at the adult rate for their occupation.

*Juniors* are those employees under 21 years of age who were not paid at the adult rate for their occupation.

*Earnings* (i.e. gross earnings before taxation and other deductions) include ordinary time and overtime earnings, payments for sick leave and holidays, commission, and all other payments such as incentive scheme, piecework and profit-sharing scheme payments, etc., and bonus payments of any kind. Annual or other periodical bonuses have been included only at the appropriate proportion for one week. For employees paid other than weekly, only the proportion of earnings equivalent to one week has been included.

*Weekly Hours paid for* include ordinary time and overtime hours, paid stand-by or reporting time, paid sick leave and paid holidays. For employees paid other than weekly, hours have been converted to the equivalent for one week.

### § 5. Basic Wages in Australia

1. **General.**—The concept of a "basic" or "living" wage is common to rates of wage determined by industrial authorities in Australia. Initially the concept was interpreted as the "minimum" or "basic" wage necessary to maintain an average employee and his family in a reasonable state of comfort. However, it is now generally accepted "that the wage should be fixed at the highest amount which the economy can sustain and that the 'dominant factor' is the capacity of the community to carry the resultant wage levels".\*

Under the *Commonwealth Conciliation and Arbitration Act* 1904–1961 (see p. 463) the Commonwealth Conciliation and Arbitration Commission (previously the Commonwealth Court of Conciliation and Arbitration) may, for the purpose of preventing or settling an industrial dispute extending beyond the limits of any State, make an order or award "altering the basic wage (that is to say, that wage or that part of the wage, which is just and reasonable for an adult male [female], without regard to any circumstance pertaining to the work upon which, or the industry in which he [she] is employed) or the principles upon which it is computed".

In the past, the Commonwealth Court of Conciliation and Arbitration held general basic wage inquiries from time to time, and its findings applied to industrial awards within its jurisdiction. Prior to the decision of the Commonwealth Court of Conciliation and Arbitration, announced on 12th September, 1953, discontinuing the automatic adjustment of basic wages in Commonwealth awards in accordance with variations occurring in retail price index numbers, the relevant basic wage of the Commonwealth Court of Conciliation and Arbitration was adopted to a considerable extent by State Industrial Tribunals. In New South Wales and South Australia, the State industrial authorities adopted the relevant Commonwealth basic wage. In Victoria and Tasmania, where Wages Boards systems operate, no provision was included in the industrial Acts for the declaration of a basic wage, although, in the past, Wages Boards generally adopted basic wages based on those of the Commonwealth Court. In Queensland and Western Australia, the determination of a basic wage is a function of the respective State Industrial or Arbitration Courts, and (subject to State law) they took into account the rates determined by the Commonwealth Court. Following the decision of the Commonwealth Court of Conciliation and Arbitration to discontinue automatic quarterly adjustments to the basic wage, the various State industrial authorities have determined State basic wages in accordance with the provisions of the respective State industrial legislation. Details of the action taken in each State and subsequent variations in State basic wages are set out in para. 5 of this section.

In addition to the basic wage, "secondary" wage payments, including margins for skill and various kinds of loadings peculiar to the occupation or industry, are determined by these authorities. The basic wage, and the "secondary" wage, where prescribed, make up the "minimum" wage for a particular occupation. The term "minimum wage" as distinct from the basic wage is used currently to express the lowest rate payable for a particular occupation or industry. (See also § 2, para. 2 (iii) *Adult Males—Components of Total Wage Rate*, pp. 469–71).

\* *Commonwealth Arbitration Reports*, Vol. 77, p. 494.

2. **The Commonwealth Basic Wage.**—(i) *Early Judgments.* The principle of a living or basic wage was propounded as far back as 1890, but it was not until 1907 that a wage, as such, was declared by a Court in Australia. The declaration was made by way of an order in terms of section 2 (d) of the *Excise Tariff* 1906 in the matter of an application by H.V. McKay that the remuneration of labour employed by him at the Sunshine Harvester Works, Victoria, was "fair and reasonable". Mr. Justice Higgins, President of the Commonwealth Court of Conciliation and Arbitration, defined the standard of a "fair and reasonable" minimum wage for unskilled labourers as that standard appropriate to "the normal needs of the average employee, regarded as a human being living in a civilized community".\* The rate declared was 7s. a day or £2 2s. a week for Melbourne, the amount considered reasonable for "a family of about five".

The "Harvester" standard was adopted by the Commonwealth Court of Conciliation and Arbitration for incorporation in its awards, and practically the same rates continued until 1913, when the Court took cognizance of retail price index numbers, covering food and groceries and rent of all houses ("A" Series) for the 30 more important towns of Australia, which had been published by the Commonwealth Statistician for the first time in the preceding year. The basic wage rates for towns were thereafter varied in accordance with the respective retail price index numbers. Court practice was to equate the retail price index number 875 for Melbourne for the year 1907 to the "Harvester" rate of 42s. a week (or the base of the index (1,000) to 48s. a week). At intervals thereafter as awards came before it for review, the Court usually revised the basic wage rate of the award in proportion to variations in the retail price index. In some country towns, certain "loadings" were added by the Court to wage rates so derived to offset the effect of lower housing standards, and consequently of house rents, on the index numbers for these towns.

Over the period of its operation, the adequacy or otherwise of the "Harvester" standard was the subject of much discussion, the author of the judgment himself urging on several occasions the need for its review. During the period of rapidly rising prices towards the end of the 1914-18 War, strong criticism developed that this system did not adequately maintain the "Harvester" equivalent. A Royal Commission was appointed in 1919 to inquire as to what it would actually cost a man, wife and three children under fourteen years of age to live in a reasonable standard of comfort, and as to how the basic wage might be automatically adjusted to maintain purchasing power. The Commission's Reports were presented in 1920 and 1921. An application by the unions to have the amounts arrived at by the inquiry declared as the basic wage was not accepted by the Court because they were considerably in advance of existing rates, and grave doubts were expressed by members of the Court as to the ability of industry to pay such rates. Further details of the recommendations of the Commission were given in *Labour Report* No. 41, page 102.

The system of making automatic quarterly adjustments to the basic wage in direct ratio to variations in the retail price index ("A" Series) was first introduced in 1921. The practice then adopted was to calculate the adjustments to the basic wage quarterly on the index number for the preceding quarter. Previously, adjustments had been made sporadically in relation to retail price indexes for the previous calendar year or the year ended with the preceding quarter. The new method would have resulted in a basic wage lower than that to which employees would have been entitled had the previous practice been continued, and in 1922† the Court added to the basic wage a general loading of 3s. (known as the "Powers 3s."), "a sum . . . which did, to the extent of 3s. per week, relieve the employees from the detrimental effect so far as they were concerned of the change which the Court was then making in its method of fixing the basic wage".‡ This loading continued until 1934. The practice adopted by the Commonwealth Court in 1921 of making automatic quarterly adjustments continued until the Court's judgment of 12th September, 1953 (see p. 488).

For a description of the several series of retail price indexes referred to in these paragraphs, see pages 445-6 of this chapter.

(ii) *Basic Wage Inquiries, 1930 to 1950.* No change was made in the method of fixation and adjustment of the basic wage until the onset of the depression in 1930, when applications were made to the Court for a reduction of wages. From 1st February, 1931, the Court reduced all wages under its jurisdiction by 10 per cent. Subsequent applications in 1932 and 1933 for cancellation of this reduction were refused. In May, 1933, the Court transferred the basis of the quarterly adjustment of the basic wage from the "A" Series to the "D" Series Retail Price Index. Further particulars may be found in the *Labour Report*, Nos. 22 and 23.

\* *Commonwealth Arbitration Reports*, Vol. 2, p. 3.

† 16 C.A.R., p. 32.

‡ *Ibid.*, p. 841.

The "Harvester" standard, adjusted by variations in retail price index numbers, continued to be the theoretical basis of the wage of the Commonwealth Court until the judgment of 17th April, 1934, when automatic adjustment was transferred to the "C" Series Retail Price Index, the base of the index being taken as equal to 81s. a week. The new rate for the six capital cities, £3 5s., was in effect the same as that previously paid under the "A" Series, without the "Powers 3s." and without the 10 per cent. reduction, which then ceased to operate. (*See Labour Report* No. 25, 1934.)

The following were the main features of the judgment of the 1937 Inquiry. (a) Amounts were added to the basic wage not as an integral, and therefore adjustable, part of that wage, but as "loadings" additional to the rates payable under the 1934 judgment (referred to as the "needs" portion of the basic wage). These loadings, commonly referred to as "Prosperity" loadings, ranged, for capital cities, from 4s. to 6s., that for the six capitals being 5s. (b) The minimum adjustment of the basic wage was fixed at 1s. a week instead of 2s. (c) The basis of the adjustment of the "needs" portion of the wage in accordance with the variations shown by retail price index numbers was transferred from the "C" Series to a special "Court" Series based upon the "C" Series. (d) Female and junior rates were left for adjustment by individual judges when dealing with specific awards. (*See Labour Report* No. 28, pages 77-87.)

In 1940, the combined unions applied to have the value of 1,000 (the base of the "C" Series Index upon which the "Court" Series was based) raised from 81s. to 100s. a week, and the "Prosperity" loadings incorporated in the new rate. In its judgment of 7th February, 1941, the Court unanimously refused to grant any increase, owing mainly to the uncertainty of the economic outlook under existing war conditions. The application was stood over for further consideration. (*See below.*) In the course of the judgment, the Chief Judge suggested that the basic wage might be graded according to family responsibilities by means of a comprehensive system of child endowment, and that if a scheme of this nature were established, future fixations of the basic wage would be greatly simplified. (The Commonwealth *Child Endowment Act* came into operation on 1st July, 1941. For details see Chapter XV. Welfare Services.)

In 1946, an application was made for restoration of the adjourned 1940 hearing (*see above*). During the protracted hearing of the Standard Hours Inquiry (*see p. 473*), it became apparent that reconsideration of the amount of the basic wage was, in the public interest, a matter of increasing urgency, and the unions therefore applied for an "interim" basic wage declaration. Judgment was delivered on 13th December, 1946, whereby an increase of 7s. a week was granted in the "needs" portion of the basic wage, the rate for the six capital cities as a whole being increased from 93s. to 100s. a week. For automatic quarterly adjustments, a new "Court" Index (Second Series) (Base 1923-27 = 87.0) was adopted. All "loadings" on the basic wage were retained. Further particulars of this judgment may be obtained from *Labour Report* No. 38, page 79.

The Basic Wage Inquiry, 1949-50, completed the case begun in 1940 and continued in 1946 (*see above*). The general hearing of the unions' claims was commenced on 17th May, 1949, and separate judgments were delivered on 12th October, 1950.\* A majority of the Court (Foster and Dunphy JJ.) was of the opinion that the basic wage for adult males should be increased by £1 a week, and that for adult females should be 75 per cent. of the adult male rate. Kelly C.J. considered that no increase in either the male or the female wage was justified. On 24th October and 17th and 23rd November, 1950, the Court made further declarations concerning the "Prosperity" and other loadings. The "Prosperity" loading of 1937 (*see above*), which was being paid at rates between 3s. and 6s. a week according to localities, was standardized at a uniform rate of 5s. a week for all localities and was declared to be an adjustable part of the basic wage, the "War" loadings were declared to be not part of the basic wage, and any other loading declared to be part of the basic wage ceased to be paid as a separate entity.

The new rates operated from the beginning of the first pay-period in December, 1950, in all cases being the rate based on the Court Index (2nd Series) for the September quarter, 1950, plus a flat-rate addition of £1, together with the standardized "Prosperity" loading of 5s. The new basic wage rate for the six capital cities (weighted average) was £8 2s., comprising £6 17s. Court (2nd Series) plus 5s. uniform "Prosperity" loading plus the £1 addition. The declaration provided that the whole of this basic wage would be subject to automatic quarterly adjustments as from the beginning of the first pay-period commencing in February, 1951, on the basis of the index numbers for the December quarter, 1950. For this purpose, the new rate of £8 2s. was equated to the "C" Series retail price index number 1,572 for the

\* *Commonwealth Arbitration Reports*, Vol. 68, p. 698.

six capital cities (weighted average) for the September quarter, 1950. From this equation was derived a new "Court" Index (Third Series) with 103.0 equated to 1,000 in the "C" Series Index. Further particulars of the judgment may be found in *Labour Report* No. 39, page 81.

For more detailed descriptions of the foregoing inquiries, reference should be made to earlier issues of the *Labour Report* and the *Official Year Book*.

(iii) *Basic Wage and Standard Hours Inquiry, 1952-53.* On 5th August, 1952, the Commonwealth Court of Conciliation and Arbitration began hearing claims by employers' organizations that (a) the basic wage for adult males be reduced; (b) the basic wage for adult females be reduced; (c) the standard hours of work be increased; (d) the system of adjusting the basic wages in accordance with variations occurring in retail price index numbers be abandoned; and by employees' organizations, that the basic wage for adult males be increased.\*

The decision of the Court, announced on 12th September, 1953, was as follows:—the employers' applications for reduction of the basic wages for adult males and females and for an increase of the standard hours of work were refused; the employers' applications for omission or deletion of clauses or sub-clauses providing for the adjustment of basic wages were granted; and the unions' applications for increases of basic wages were refused.

The Court in the course of its judgment said that nothing had been put before it during the inquiry in support of a departure from its well-established principle that the basic wage should be the highest that the capacity of the community as a whole could sustain. If the Court is at any time asked to fix a basic wage on a true needs basis, the question of whether such a method is correct in principle and all questions as to the size of the family unit remain open.

In order to remove certain misconceptions about its function, the Court stated that it was neither a social nor an economic legislature, and that its function under section 25 of the Act was to prevent or settle specific industrial disputes. However, these must be settled upon terms which seem just to the Court, having regard to conditions which exist at the time of its decision.

The Court intimated that time would be saved in future inquiries if the parties to the disputes, in discussing the principle of the "capacity to pay", directed their attention to the broader aspects of the economy, as indicated by a study of employment, investment, production and productivity, overseas trade, overseas balances, the competitive position of secondary industry, and retail trade.

In accordance with its decision, the Court, commencing on 21st October, 1953, amended all Commonwealth awards by deleting the clauses providing for the automatic adjustment of the basic wage. Subsequently, the power of the Court to vary awards not the subject of an application by one of the parties was unsuccessfully challenged in the High Court of Australia.

For further particulars of the judgment, see *Labour Report* No. 46, page 64.

(iv) *Basic Wage Inquiry, 1956.* On 14th February, 1956, the Commonwealth Court of Conciliation and Arbitration commenced hearing an application by trade unions for an increase in the basic wage to the amount it would have reached if automatic quarterly adjustments deleted in September, 1953, had remained in force, plus a further £1; for the re-introduction of automatic quarterly adjustments; and for the abolition of what was known as the 3s. country differential. This application was regarded as a general application for variation of the basic wage in all Commonwealth awards.

All the claims made by the unions were opposed by the respondent employers. The Commonwealth Government intervened in the public interest and opposed the re-introduction of automatic adjustments. The States of New South Wales, Queensland, Western Australia and Tasmania supported the unions' claims for the re-establishment of the system of automatic adjustments and the raising of the basic wage to the levels indicated by the current "C" Series Index numbers, but the State of South Australia opposed these claims. The State of Victoria neither supported nor opposed the unions' claims.

The judgment was delivered on 26th May, 1956. The Court rejected each claim made by the unions, but decided to increase the adult male basic wage by 10s. a week, payable from the beginning of the first pay-period in June. As a result of this decision, the basic wage for adult females was increased by 7s. 6d. a week with proportionate increases for juniors of both sexes and for apprentices.

---

\* *Commonwealth Arbitration Reports*, Vol. 77, p. 477.

The Court took the view that its decision in 1953 to abandon the system of quarterly adjustments was clearly right and that "so long as the assessment of the basic wage is made as the highest which the capacity of the economy can sustain, the automatic adjustment of that basic wage upon price index numbers cannot be justified, since movements in the index have no relation to the movements in the capacity of the economy".\* After examining the state of the economy and the possible disastrous extension of inflation, the Court decided that the nation had not the capacity to pay a basic wage of the amount to which automatic quarterly adjustments would have brought it.

In its judgment, the Court stated that in future a yearly assessment of the capacity of Australia for the purpose of fixing a basic wage would be most appropriate and that it would encourage any steps to have the Court fulfil such a task each year.

For further details, see *Labour Report* No. 46, page 67.

(v) *Basic Wage Inquiry*, 1956-57. On 13th November, 1956, the Commonwealth Conciliation and Arbitration Commission in Presidential Session commenced to hear claims by the combined unions for an increase of the basic wage to the amount it would have reached if automatic quarterly adjustments had remained in force and for the restoration of automatic quarterly adjustments.† This application was treated by the Commission as a general application for alteration of the basic wage in all Commonwealth awards.

The unions' claims were opposed by the respondent employers. Victoria and South Australia were the only States to appear before the Commission and the Commonwealth Government intervened in the public interest. Victoria neither supported nor opposed the application by the unions. South Australia opposed the unions' claims and suggested that, if an increase in the basic wage were granted, the Commission should decide on the increase to be added to the six capitals basic wage, and then apportion that increase among the six capital cities on a basis accurately reflecting the differences in their cost of living. The Commonwealth opposed the restoration of the automatic adjustment system, whatever index was used for this purpose.

After hearing submissions by counsel for the unions that automatic quarterly adjustments of the basic wage should be restored and argument as to the appropriateness of using the "C" Series Index for this purpose, the Commission reaffirmed the decision of the Court in 1953, which, it said, "was primarily based on the view that there is no justification for automatically adjusting in accordance with a price index a wage assessed as the highest that the capacity of the community as a whole can sustain".‡ Accordingly, the claim for restoration of automatic quarterly adjustments was refused.

The Commission, having considered all aspects of the state of the economy, decided that the adult male basic wage should be increased by 10s. a week, payable from the first pay-period to commence on or after 15th May, 1957. The basic wage for adult females was increased by 7s. 6d., with proportionate increases for juniors and apprentices.

The historical background of differential rates of basic wage for respective cities and towns was examined by the Commission and it acknowledged that the Federal basic wage had two components. The first and greater component differed for each capital city and represented a rate of wage calculated by the use of "C" Series retail price index numbers for the June quarter, 1953, and the second component, common to all places, was the uniform 10s. awarded by the Court in 1956. On the question of whether the increase should be of a uniform amount, the alternative open to the Commission appeared to be either to follow what the Court did in 1956, or to recalculate the inter-capital-city differentials of the newly-fixed standard basic wage according to the latest "C" Series index numbers. The Commission decided to grant an increase of a uniform amount.

Judgment was delivered on 27th April, 1957. The Commission advised that it approved an annual review of the basic wage and would be available for this purpose in February, 1958. However, although favouring an annual review of the basic wage, the Commission considered that "it would not be proper for it nor would it wish to curtail the existing right of disputants to make an application at whatever time they think it necessary to do so".§

A more detailed summary of the judgment may be found in *Labour Report* No. 46, pages 68-71.

(vi) *Basic Wage Inquiry*, 1958. On 18th February, 1958, the Conciliation and Arbitration Commission commenced hearing an application by unions respondent to the Metal Trades Award for an increase of the basic wage to the amount it would have reached had the quarterly adjustment system been retained, plus an addition of 10s., and for restoration of quarterly adjustments.||

† 87 C.A.R., p. 439.

‡ *Ibid.*, p. 445.

§ *Ibid.*, p. 459.

|| 89 C.A.R., p. 287.

These claims were opposed by private employers and by the State of South Australia, which also contended that, as the cost of living was much lower in Adelaide than in Melbourne and Sydney, greater disparities in basic wage rates than then existed should be determined if, against its submission, any general increase in the basic wage were decided upon. Tasmania, the only other State represented, made no submissions. The Attorney-General of the Commonwealth intervened in the public interest, and leave to intervene was granted to a number of professional, salaried and public service organizations.

In its judgment, delivered on 12th May, 1958, the Commission rejected the submission by the Professional Officers' Association that consideration should be given to the question whether increased capacity should be reflected in an increased basic wage only or extended also to the marginal or secondary contents of aggregate wages and salaries. The Commission also rejected the submission by the Australian Council of Salaried and Professional Associations that when the Commission looked at the capacity of industry to pay and gave an increase in the basic wage, it always kept something in reserve for a subsequent marginal claim.

The claim of the unions for the restoration of the 1953 basic wage standard was rejected by the Commission on the same ground as in its 1957 judgment, i.e. that it was unsafe to assume that the economy could sustain the 1953 rate as a "standard" in real terms.

The Commission then considered the three specific issues before it, namely, (a) should the system of automatic adjustments be restored? (b) should the basic wage be increased, and if so, by what amount? and (c) should there be uniform or disparate increases?

Counsel for the unions submitted that the unions still regarded the "C" Series Index as a proper guide for the determination of basic wage levels, but that if this contention were unacceptable to the Commission, there should be an immediate decision upon principle, and later, if need be, an inquiry in an effort to ascertain a proper price index. He also submitted that there should be, from time to time, additions to wages to afford to workers their proper share of increased productivity and efficiency, and that although the unions had never claimed that increments for increased productivity could under present circumstances be made by way of automatic adjustment, the objective of wage increases commensurate with price increases could best be achieved by the use of an automatic adjustment system. After having considered the submissions, and without hearing arguments against the proposition, the Commission rejected the application for the restoration of automatic adjustments and for a deferred inquiry thereon. In the reasons for its judgment, the Commission stated that there was nothing in the submission to justify a departure from the decisions of 1953, 1956 and 1957 to reject automatic wage adjustments. The Commission also again expressed the opinion that a yearly assessment of the capacity of Australia for the purpose of fixing a basic wage would be most appropriate.

The Commission was unanimously of the opinion that the position of the economy regarded as a whole was such as to justify an increase in the basic wage, but a difference of opinion existed as to what the amount of the increase should be. Kirby *C.J.* and Gallagher *J.* considered that it was undesirable in the interests of all to grant an increase higher than 5s.; Wright *J.* considered that a basic wage level substantially higher than that proposed by the majority was justified. The decision of the majority prevailed, and the basic wage for adult males under Federal awards was therefore increased by 5s. a week.

The South Australian Government submitted that economically there was no scope at all for a basic wage increase anywhere in Australia, and again pursued the question of inter-city differentials as an answer to the union claim that the amount of the basic wage in Adelaide should be calculated by reference to the "C" Series retail price index numbers for that city. The substance of the State's case was that the actual cost of living was so much lower in Adelaide than in Melbourne and Sydney that greater disparities in basic wage rates than then existed should be determined by the Commission, if any general increase in the basic wage were decided upon. Subject to a stipulation that no reduction should be made in the existing basic wage rate for Adelaide, counsel for the South Australian Government claimed that the rate should be approximately 10 per cent. below the rate fixed for Sydney instead of approximately 5 per cent. below, as it then was. The Commission rejected the claim on the ground that it would not be wise or just to apply it in South Australia in view of the fact that it was neither sought nor supported by any other party, and its application to the government and its instrumentalities alone was not sought. The Commission indicated that the issues involved in inter-city differential wage rates were complex and could not be decided after a brief hearing.

The new basic wage rates for employees under Federal awards operated from 21st May, 1958.

(vii) *Basic Wage Inquiry*, 1959. On 24th February, 1959, the Conciliation and Arbitration Commission commenced hearing an application by unions respondent to the Metal Trades Award for an increase of the basic wage to the amount it would have reached had the quarterly adjustment system been retained, plus an addition of 10s., and for restoration of quarterly adjustments.\* A large number of applications for similar variation of other awards were ordered to be treated as involved in the inquiry, and as such to be decided upon the evidence, material and submissions made from the beginning of the hearing.

The application of the unions was opposed by private employers generally, and by the State of South Australia and two of its instrumentalities. Tasmania was the only other State represented, and it appeared in support of the application of the unions in regard to the increase of the basic wage and the restoration of the quarterly adjustment system. The Commonwealth Government intervened in the public interest and submitted that the application for restoration of the automatic adjustment system should be refused. The Commonwealth again supplied, for the benefit of the Commission and the parties, economic and statistical information and material, and, in addition, without making a particular submission as to whether there should be an increase, made a general submission on the state of the national economy.

Organizations of employers in the pastoral industry asked for a reduction in the basic wage in the Pastoral Award of £1 5s., being the aggregate amount of the increases granted in 1956, 1957 and 1958. The Commission decided to join these applications in the main hearing on 17th March, 1959, as a matter of procedure only, and without deciding affirmatively that the Commission as constituted for that hearing had power to grant them in whole or in part. At the conclusion on 5th May, 1959, of submissions in support of these applications and without calling upon employees in reply, the Commission stated that it would reject the applications for reduction of the basic wage in the Pastoral Award, and again indicated that the question of jurisdiction as to whether the Commission had the power to decide a different basic wage remained "undecided and open".

On 5th June, 1959, the three Judges delivered separate judgments. On the question of whether the system of automatic quarterly adjustments should be restored, the members of the Commission were divided in opinion, and therefore the question was decided in accordance with the decision of the majority. The majority decision, namely, that of Kirby C.J. and Gallagher J., was that the claim of the unions for restoration of quarterly adjustments should be refused. Foster J. dissented.

The members of the Commission were unanimous in the opinion that there should be an increase in the basic wage, but as to the amount of the increase they were divided in opinion as follows. The President, Kirby C.J., was of opinion that the increase should be 15s. a week, and that the increased basic wage should become payable as from the beginning of the first pay-period commencing on or after 11th June, 1959. Foster J. was of opinion that the increase should be 20s. a week, payable as to 10s. as from the first pay-period in July, 1959, and as to the balance by increases of 2s. 6d. for four quarters commencing 1st January, 1960. Gallagher J. was of opinion that the increase should be one of 10s. a week, and that the increased wage should become payable as from the date chosen by the President. Foster J., while holding his opinion, decided to concur in the decision proposed by the President.

A summary of the separate reasons for judgment was published in Official Year Book No. 46, pages 437-9.

(viii) *Basic Wage Inquiry*, 1960. On 16th February, 1960, the Conciliation and Arbitration Commission, constituted in Presidential Session by Kirby C.J. (President), Ashburner and Moore J.J. (Deputy Presidents), commenced hearing an application by respondent unions for the restoration to the Metal Trades Award of quarterly adjustments to the basic wage and for an increase in the amount of the basic wage. On the six capital cities rate, the amount of the increase sought was 22s. a week.† This amount was composed of two parts—firstly, an addition of 5s. a week to restore to the basic wage the same real value as it had in 1953, and, secondly, a further amount of 17s. representing the unions' estimate of the minimum increase in productivity which had occurred in the period since the automatic adjustment system was abolished.

The Commonwealth Government intervened in the public interest and again presented a detailed analysis of the economic situation of Australia, together with comments on fiscal and budgetary policy. It also announced its opposition to the unions' application both for restoration of automatic quarterly adjustments and for an increase in the basic wage.

\* *Commonwealth Arbitration Reports*, Vol. 91, pp. 683-4.

† 94 C.A.R., p. 313.

The State of South Australia presented material to the Commission to show the effect which wage increases would have on its finances, and opposed the unions' application. Victoria, Queensland and Western Australia presented information to show how their finances would be affected by wage increases, but neither supported nor opposed the claims of the applicants. Tasmania indicated that it supported the application for restoration of quarterly adjustments, but made no submissions.

In its judgment, delivered on 12th April, 1960, the Commission refused the unions' application. A summary of the judgment is given in the following paragraphs. Further particulars may be found in Official Year Book, No. 47, pp. 443-6.

*Application for Restoration of Quarterly Adjustments.* Counsel for the unions criticized the decision in the 1953 inquiry to abolish automatic quarterly adjustments to the basic wage and also the decisions, in subsequent inquiries, against their re-introduction. He submitted that it would be inequitable and unjust not to restore the practice which existed for many years prior to 1953, of having the basic wage automatically adjusted each quarter in accordance with movements in a price index. He relied in particular on the 1934 basic wage judgment.

In refusing the application, the Commission stated that the decision in the 1934 case was not relevant, as the question of automatic quarterly adjustments must be decided in the light of existing situations and practices. In 1934, the basic wage was determined for an undefined period and automatic quarterly adjustments applied. In 1960, the Commission was considering a situation in which in practice the basic wage was re-assessed each year. The Commission decided that it was preferable to fix a basic wage which it considered just and reasonable for the ensuing twelve months and then review it. In the Commission's view it was not inequitable or unjust not to restore automatic adjustments.

*Application to Increase the Basic Wage.* The Commission referred to the two elements that comprised the total wage paid to most workers under federal awards, namely, the basic wage and a margin. The existence of these two elements was a result of the history of federal wage fixation and had received legislative approval. The legislation required that the basic wage and margins be dealt with by differently constituted benches of the Commission. The basic wage could be altered only by the Commission in Presidential Session, that is, by a bench constituted by three or more judges; margins could be altered by a single member of the Commission or by a full bench constituted by at least three members of whom at least one had to be a judge, and the President could, on the ground of public interest, direct that applications for alterations of margins be dealt with by a full bench. The Commission then went on to state briefly the recent history of basic wage and marginal fixation and referred to the four basic wage increases in the years 1956 to 1959 and the increases in margins in 1947, 1954 and 1959. The Commission expected that, in the light of the history of marginal fixation since 1947, it would be asked to consider the question of general marginal increases every few years. So long as its decisions regarding metal trades margins were given general application, and so long as the annual review of the basic wage continued, it followed that in one particular year the Commission constituted by a full bench of judges would review the basic wage and, constituted by a mixed bench, review margins. When the economy was found capable of sustaining an increase in both the basic wage and margins, it followed that the economic and psychological effect of each increase was affected and indeed highlighted by the other. This happened in 1959, when the basic wage was increased as from June by 15s., or an increase of 6 per cent., and margins were increased as from December by 28 per cent. of the amount of the margins existing as a result of the 1954 review by the Court. Together, the 1959 increases approximated 8 to 10 per cent. of award wages.

The Commission was required by legislation to treat the basic wage and margins separately, but although constituted differently for each task, at the time of fixation of rates it had to look forward to the period which its decision would cover; that is, a year for the basic wage and, generally speaking, a longer period for margins. In dealing with the application then before it, the Commission had to decide whether the basic wage should again be increased, although less than a year had elapsed since increases were granted in both the basic wage and margins.

The unions submitted that since 1952-53 all the economic indicators customarily used by the Commission had shown significant improvement. The employers submitted that there were two factors dominating the economic scene, namely, the two wage increases granted by the Commission in 1959, and the lifting of import restrictions by the Commonwealth Government. The whole of the economic material available to the Commission had to be

discounted by the fact that the combined effect of the two wage increases had not at that time been felt by the economy. As to the lifting of import restrictions, the likelihood was that there would be an appreciable increase in the amount of imports, which would render more difficult the task of local manufacturers, a task already made difficult by the wage increases in 1959.

The Commonwealth Government stated that, although no quantitative estimate could be made of the increase in imports likely to occur as a result of the lifting of import restrictions, the significance of their removal was that it had come at a time when the effects of the 1959 wage increases had not been fully felt. The effect on the annual wages bill of the increased margins was estimated to be about £100 million and the direct cost of the 1959 basic wage increase about £65 million. In the Commonwealth's view, these increases would raise costs and price levels significantly and further secondary effects would follow. They would also give a further strong stimulus to the demand for goods and services. The Commonwealth Government submitted that what were needed were a firm rejection of any new measures that would add to current inflationary pressures and time for the adjustment of the economy to the general wage increases of 1959. The Commission considered that such a clear statement of the Commonwealth Government's attitude, supported by submissions and economic material, was a matter which it must seriously take into account.

Having referred to the substantial increases in both basic and secondary wages that had been granted in the previous twelve months to employees under federal awards, and to the fact that their effects had not at that time been reflected in the economy, the Commission concluded:—"We consider that it would be unsafe and perhaps dangerous to increase the basic wage at this point of time. We have formed this opinion with a full sense of the obligation which this Commission has to fix the basic wage from time to time at the highest amount that the economy can sustain so that the wage and salary earner may obtain his proper share of goods and services. On the other hand we are mindful of the danger to the whole community, including the wage and salary earner, of the basic wage being fixed at an amount which might increase inflation and upset the stability of the economy."\*

(ix) *Differential Basic Wage Inquiries*, 1960. On 9th August, 1960, the Commonwealth Conciliation and Arbitration Commission commenced hearing claims by:—(a) the Federated Engine Drivers and Firemen's Association of Australia to vary the Engine Drivers and Firemen's (General) Award by eliminating country differentials from basic wages prescribed therein; (b) employers' associations in South Australia to vary the Metal Trades Award by providing that future basic wage increases for Adelaide should be 25 per cent. less than basic wage increases for Sydney until the Adelaide basic wage was 90 per cent. of the Sydney basic wage, and that the basic wage applicable in areas other than Adelaide, Whyalla and Iron Knob should be £13 8s. and should remain unchanged until the Adelaide rate reached £14.

Judgment was delivered on 14th December, 1960. The Commission granted the application to eliminate specified country differentials from the Engine Drivers and Firemen's (General) Award, the new basic wages to be payable from the beginning of the first pay-period commencing on or after 1st January, 1961. Other awards were adjusted similarly on application to the Commission. The employers' applications in respect of basic wages in South Australia were both rejected.

(x) *Basic Wage and Standard Hours Inquiry*, 1961. On 14th February, 1961, the Commonwealth Conciliation and Arbitration Commission, constituted by Kirby C.J. (President), Ashburner and Moore JJ. (Deputy Presidents), commenced hearing applications by employers and unions for variation of the Metal Trades Award. In the first application the employers sought to increase the number of ordinary working hours per week from 40 to 42, with a concomitant increase in weekly wages by an amount equivalent to two hours pay at ordinary rates, and to effect certain other consequential variations. In the second the unions applied for an increase in the basic wage on a six capital cities basis by the amount of 49s. (which was amended during the hearing to 52s.) and for the re-introduction of automatic quarterly adjustments based on the "C" Series Retail Price Index. The amount claimed represented 27s. (30s.) for cost of living increases since 1953 and 22s. to reflect increases in productivity since that time.

---

\* *Commonwealth Arbitration Reports*, Vol. 94, p. 321.

In its judgment, delivered on 4th July, 1961, the Commission refused the employers' application and the unions' application for restoration of quarterly adjustments, and increased the basic wage of adult male employees covered by federal awards by a uniform amount of 12s. a week, payable from the beginning of the first pay-period commencing on or after 7th July, 1961.\*

The applications were heard together, but although from time to time reference was made to the employers' claim, in essence it was the unions' claim which was to the forefront and with which all the parties principally concerned themselves.

*The Unions' Claims.* In dealing with the unions' claims, the Commission first discussed its own role and that of the Commonwealth and States.

In view of certain propositions put forward which seemed to be founded on the assumption that it had jurisdiction to deal with economic matters at large, the Commission once again set out the role and function of a federal arbitral tribunal in cases such as this. After citing what had been said in earlier judgments, the Commission further stated:—"We are not national economic policy makers or planners. We are confined to the legislation under which we act, and, in particular, in basic wage cases we have the function of deciding only what is a just and reasonable basic wage. This does not mean of course, that we have not to consider seriously the probable effects of our decision on the economy."

The question of what weight the Commission should give to the attitude and submissions of the Commonwealth Government was again raised. In the 1960 Basic Wage Inquiry, the attitude of the Commonwealth was positively stated to be one of opposition to a wage increase, but in the 1961 Inquiry, although the Commonwealth followed its usual practice of supplying, for the benefit of the Commission and the parties, certain economic and statistical material, it expressed no attitude other than its opposition to the re-introduction of quarterly adjustments. The Commission stated that it was not concerned with drawing inferences, as it had been asked to do, from the material presented, as to whether the Commonwealth had an attitude, and as to what it might be. The mere fact that the Commonwealth adopted an attitude before the Commission would not result in that attitude being accepted. Any opposition to or support of any claim by the Commonwealth would be treated on its merits.

All States except New South Wales were represented at the hearing. South Australia made no submissions and called no evidence. Tasmania indicated its support for the unions' application for the restoration of automatic adjustments, plus an adjustment of the basic wage to the level indicated by the movement in the "C" Series Index, but presented no material. Victoria, Queensland and Western Australia neither supported nor opposed the application of the unions, but all presented some statistical information.

In claiming the re-introduction of automatic quarterly adjustments, counsel for the unions submitted, firstly, that the reasoning in each of the judgments of the Court and the Commission from 1952-53 to 1960 was wrong and that there was in none of them any proper reason for rejecting the principle of automatic quarterly adjustments; and secondly, that it was wrong for the Commission to fix a wage based on the capacity of the economy and not to provide some machinery which would ensure that the value of the wage was not subsequently eroded by price movements when prices increased.

The Commission considered it indisputable that at the time of its fixation the amount of a basic wage is both a money wage and a real wage, but the value of the real wage is altered by subsequent changes in price levels. Counsel for the unions submitted that a real basic wage should be determined from time to time with some interval longer than one year between determinations, and that the real value of the basic wage between determinations should be maintained automatically by adjustment in accordance with a price index. Unless this were done, the amount of goods and services that could be purchased by the basic wage would decline as prices rose.

The Commission was asked to assume that between basic wage fixations the capacity of the economy to maintain a basic wage would increase or remain constant. If capacity were to diminish, the unions argued, the Commission was of easy access and employers could seek corrective action. The Commission's duty was to fix a just and reasonable basic wage, and the provision of automatic quarterly adjustments would ensure that this was done. Further, the provision of automatic adjustments would relieve the Commission of the necessity of annual reviews of the state of the economy. The unions claimed that it was not practicable for the Commission to make a proper assessment of the economy, including movements in productivity, every twelve months, and to give proper consideration to the fixation of a new real basic wage.

\* Print No. A7848, p. 3.

The Commission rejected the employers' argument that the unions were really asking it to return to a needs basic wage as distinct from a capacity basic wage.

It went on to consider the practical difficulty which would in the past have confronted both the Court and the Commission if they had attempted to ensure that a basic wage fixed by them could be properly maintained at its real level. The Commission stated:—" . . . the 'C' Series Index was over a period becoming suspect and the Court and the Commission could not have relied on it to achieve a proper result. The emergence of the Consumer Price Index, however, has removed that difficulty and we are therefore now able to seek to ensure that the basic wage which we fix should, subject to our supervision, maintain its real standard; in other words, that employees should, between fixations of the real basic wage and subject to our supervision, continue to be able to purchase the same amount of goods and services with the basic wage portion of their wage. We add that amongst other things the emergence of the Consumer Price Index has also enabled us to fix at this time a standard which, in our view, is more likely to be properly maintainable than recent past standards."\*

Having reached the conclusion that the principle of the maintenance of the purchasing power of the basic wage could be adopted, the Commission found it unnecessary to deal with the first part of the unions' argument, as to the correctness or otherwise of earlier decisions.

After comparing the "C" Series Retail Price Index and the Consumer Price Index, the Commission said:—"In our view the material available demonstrates the superiority of the Consumer Price Index over the 'C' Series Retail Price Index. The former is an index recently constructed by the Commonwealth Statistician in order to give a proper and accurate up-to-date coverage of movements in retail prices. The latter index, on a regimen constructed many years ago, can no longer in our view be considered reliable for wage-fixing purposes. We find the Consumer Price Index suitable under present circumstances for the maintenance of the purchasing power of the basic wage we will now fix."†

It was then necessary to consider the question of how movements in the Consumer Price Index could be used. In the 1959 and 1960 basic wage decisions the Commission had stated that it was preferable to have an annual review rather than provide for automatic adjustments. However, with the publication of the Consumer Price Index, upon which greater reliance could be placed, what had been said in those two cases was no longer adequate. Nevertheless, the Commission was not prepared to return to a system whereby adjustment was purely automatic, because it thought that there should be some safeguard. Although the Consumer Price Index was preferred to the "C" Series Retail Price Index, it could not be assumed that this index would at all times so accurately measure movements in retail prices that the Commission would be prepared to apply its workings automatically to the basic wage.

In its judgment, the Commission stated:—"We consider it desirable that the application of the Consumer Price Index should always be subject to control by the Commission and the Commission should be able to decide whether a particular increase or decrease in the figures as disclosed in the Consumer Price Index should be applied to the basic wage. Our present opinion is that this consideration of prices should take place annually. We will each year make the assumption that the effect of movements in the Consumer Price Index should be reflected in the basic wage unless we are persuaded to the contrary by those seeking to oppose the change. As the basis of our decision is the desirability of maintaining the value of the real wage based on the concept of national capacity, the appropriate matter for consideration would appear to be what should be the effect on the six capital cities basic wage of movements in the six capital cities index. The resulting figure will be applied to all federal basic wages.

"Since such a consideration of price movements is to take place annually, the question remains whether the Commission should at the annual hearing continue to review all factors in the economy to decide whether or not to change the level of the real basic wage. It seems to us that once the question of prices is dealt with otherwise, a review of the economy generally and in particular of productivity increases could more properly take place at longer periods of time, say, every three or four years. This statement of our views does not, of course, preclude any party from seeking to exercise its right to come to the Commission more frequently than every three or four years to seek a change in the real basic wage but, except in unusual circumstances, we consider such a period a proper interval between reviews of this kind."‡

The Commission concluded that the basic wage which it had fixed took into account increases in productivity up to June, 1960, and it therefore anticipated that a review of the real basic wage would not be necessary for some three years. The Commission went on:—

\* Print No. A7848, p. 10.

† Ibid., p. 11.

‡ Ibid., p. 12.

"If our anticipation is correct, in the proceedings next year the only issue will be whether or not the money wage should be adjusted in accordance with any change in the Consumer Price Index. The onus will be on the party opposing such an alteration to show that it should not be made. If the price index has risen the unions may rely *prima facie* on that fact. It will then be for the employers to show that the increase in prices is of an exceptional character . . . so that it should not be reflected in a basic wage increase or that there is some special factor in the economy which would make it inadvisable to allow the increase."\*

The Commission had in the past felt some difficulty in endeavouring to make a satisfactory assessment of the economy from the long-range point of view every twelve months, and this difficulty played its part in the Commission's attempt to confine short-term considerations to price movements, and to allow a longer period of time between considerations of the long-term trends in the economy.

On the subject of departure from past practices, the Commission said:—"We consider it to be of importance that the Commission should not only consider itself open to depart from past practices when the occasion demands, but that it should make it quite clear that this will happen when the Commission, after due and careful consideration, considers it necessary. The concept is fundamental to our decision to depart from what has become the practice of having annual reviews of the basic wage in which the question of price increases is only one of a number of factors and is not given any special status."\*

*Productivity.* The unions claimed that there should be an increase of 22s. a week in the basic wage, based on an estimated one per cent. per annum increase in productivity over the previous decade, and that since 1952-53 no proper allowance had been made in the amounts awarded for increases in productivity. On this subject, the Commission stated:—"The question of productivity has been mentioned from time to time in various judgments of the Commission and there is really no dispute between the parties that workers are entitled to their share of increases in productivity. The issues between the parties are whether productivity can be measured with reasonable accuracy and whether in fact through wage increases workers have received their share of increased productivity."†

In evidence presented by the unions, productivity was calculated by taking the Gross National Product for a year, deflating it by a price index and dividing the figure corrected for prices by (a) population and (b) the total of wage and salary earners in civilian employment. On the basis of these calculations, it was claimed that from 1952-53 to 1959-60 productivity had increased by about 2.6 per cent. per annum, "real" average earnings had increased by less than productivity, and the "real" basic wage had decreased. Counsel for the unions submitted that by taking 1 per cent. per annum the unions had clearly allowed for a safe margin of error.

In answer to this, the employers produced a similar type of calculation, but one that used a different deflator and 1949-50 as the base year. On this basis, it was claimed that the "real" basic wage had increased slightly more than productivity per person employed and some 10 per cent. more than productivity measured on a population basis, and "real" average weekly earnings had increased more than the "real" basic wage.

After considering the various calculations which had been submitted, the Commission concluded that 1952-53 was an abnormal year for the purpose of relevant comparison, and that 1949-50 was a more satisfactory starting point. In the Commission's view, it followed that the 1960 basic wage properly reflected increased productivity in so far as that could be approximately measured.

The employers claimed that the Commission should look at average weekly earnings as the true indicator of whether increases in productivity had been distributed to the work force, and that the only thing to be measured against productivity was what was in fact earned, and not the basic wage. In the Commission's view, the relevant consideration in fixing a basic wage was whether, if average weekly earnings properly reflected increased productivity but the basic wage did not, there was room for an increase in the basic wage based on the same increased productivity. In view of its finding that the 1960 basic wage did reflect increased productivity, the Commission concluded that it was unnecessary to decide the question on that occasion.

The Commission, having reviewed in detail indicators of the state of the economy, considered that the economy had the capacity to sustain an increase of 12s. in the basic wage and that that increase was the highest that could be sustained. This amount was sufficient to restore to the 1960 basic wage its purchasing power as measured by the Consumer Price Index.

\* Print No. A7848, p. 13.

† Ibid., p. 14.

The Commission considered the standard of the seven basic wages of the previous ten years and decided that the most appropriate one was the standard of 1960. It felt that the new basic wage combined in the result its conclusions on fundamental factors in a threefold way, because it was fixed at the highest amount the capacity of the economy allowed, it adopted as a standard that set by the basic wage of 1960, and it took account of productivity increases up to and including 1959-60.

Both the employers and the Commonwealth Government warned of the danger of inflation which might result from an increase in wages. However, the Commission pointed out that there was no legal reason why any increase in the basic wage should not be absorbed by over-award payments, although this might not be possible because of industrial pressure and scarcity of skilled labour. While the increase in wages granted would cause some increase in costs, the stimulation of demand would only restore it to the level of the previous year. The estimated increase of £60 million a year in wages and salaries would add less than 2 per cent. to the annual wages bill.

*The Employers' Claim.* The employers' claim was for an increase in standard hours from forty to forty-two per week, with a concomitant increase in the weekly wage equivalent to two hours pay at ordinary rates. This was to operate for four years, after which time weekly hours would revert to forty but the increased wage would remain. The Commission rejected arguments supporting this application, which stated that such a measure was called for by the balance of payments crisis, and that it would lead to increased productivity at stable prices and distribute more evenly the amount of overtime worked. The Commission did not think that the state of the economy was such that standard hours should be increased.

*Employees on Lower Margins.* During the course of the proceedings, the President asked for submissions on the question of whether by prescription of the basic wage special consideration should or could be given to those employees who receive a margin above the basic wage of, say, £1 a week or less. The Commission decided that even if it had jurisdiction it would not, as a matter of discretion, make a differential basic wage at that time.

*Annual Leave Decision.* The Commission rejected the view that the reasons given for not granting an increase in annual leave in 1960 should impel it to refuse an increase in the basic wage. The question of wages was more fundamental and more important to the worker than the question of leave, and reasons which might delay the granting of additional leave might not be of sufficient weight to delay a basic wage increase. Also, had an increase in annual leave been granted, the Commission might not have been able to grant the increase in wages.

*Decisions.* The decisions of the Commission were as follows.

- " 1. The employers' claim for an increase in the standard hours of work from forty to forty-two with a concomitant increase in the weekly wage equivalent to two hours' pay at ordinary rates is refused.
2. The unions' claim for restoration of automatic quarterly adjustments is refused.
3. The basic wages of adult male employees covered by federal awards will be increased by a uniform amount of 12s. per week.
4. The new rates will come into effect from the beginning of the first pay-period commencing on or after 7th July instant subject to special cases.
5. For the specific reasons set out in the judgment we consider that in February next the only issue in regard to the basic wage should be why the money wages fixed as a result of our decision should not be adjusted in accordance with any change in the Consumer Price Index and for the purpose of deciding that issue the Order giving effect to the decisions hereby announced will also provide for the adjournment of the application of the unions for increase of the basic wages under the Metal Trades Award to Tuesday, 20th February, 1962, in Melbourne, when such submissions thereon as are desired to be made will be heard.
6. The decision regarding increases in basic wages is applicable to all the applications which have been ordered by the Commission to be joined for hearing and decision with the original application and those joined applications are stood over to a date after 20th February, 1962, to be fixed by the Commission."

(xi) *Basic Wage Inquiry, 1962.* In accordance with decision No. 5 in the 1961 Inquiry (see above), the adjourned hearing was held on 20th February, 1962, before Kirby C.J., and Ashburner and Moore JJ.

Counsel for the unions submitted that, although the 1961 judgment represented a recognition of union claims as to the need to maintain the real value of the basic wage, it had not met in full the demands of the trade union movement. The unions intended to return to the Commission at the appropriate time to argue at length for the implementation of their policy as to the basic wage standard and the question of quarterly adjustment.

In the employers' submission, reference was made to the Commission's 1961 judgment as indicating a firm intention to confine argument in the current hearing to the quantum of any basic wage change and to exclude any re-examination of the Commission's departure from previously accepted principles. As the Consumer Price Index had shown practically no change between the March and December quarters of 1961, there could be no change in the basic wage. However, the employers' view was that in any hearing involving movement in the basic wage the parties must be free to discuss economic capacity to sustain the basic wage at any given level and the principles upon which it is computed.

Counsel for the Commonwealth stated that at the proper time the Commonwealth would appear before the Commission to present argument as to the use of price indexes in basic wage fixation and other important issues raised by the 1961 judgment. However the matter might come before the Commission as a matter of procedure, when circumstances called for the debate of any substantive issue the Commonwealth would be in a position to make further submissions.

The Commission decided that there would be no alteration in the amounts of the existing basic wages until further order; and further adjourned the application before it until 19th February, 1963. At the adjourned hearing the issues would be: (a) The issue set out in paragraph 5 of the decisions of 4th July, 1961 (*see* p. 497); (b) Any issue which a party desired to raise and of which it had given notice to the Industrial Registrar, the other parties and to the Attorney-General by 31st January, 1963. The applications referred to in paragraph 6 of the decision of 4th July, 1961, were stood over to a date after 19th February, 1963, to be fixed by the Commission with liberty to any of the parties to those applications to apply in the meantime.

(xii) *Basic Wage Inquiry*, 1963. This was an adjourned inquiry which arose out of an order made by the Commission on 20th February, 1962 (*see* p. 497). The hearing was held on 5th February, 1963 before Kirby C.J., Ashburner and Moore JJ.

During the proceedings, counsel for the unions discussed the various methods by which changes in the rates of basic wage could be calculated by using changes in the index numbers of the Consumer Price Index. Counsel asked for a direction by the Commission as to which method should be used.

In conformity with the decision in the 1962 Basic Wage Inquiry (*see* above), counsel for the employers gave notice to the Commission that issues and procedures referred to in the 1961 Basic Wage Judgment that related to the fixation of wages or conditions of employment by reference to the capacity of the national economy would, of necessity, be argued at the present hearings.

The employers submitted that the following matters were essential considerations in the hearing and determining of any application seeking to alter wages and conditions of employment on a national basis.

- (a) The role of the Commission in relation to government economic or fiscal policies, inflation, etc.
- (b) The justification for adjustment of wages by reference to a price index either automatically or *prima facie*, including the relationship between movements in a price index and variations in capacity of the national economy.
- (c) The relationship between the capacity of the economy to absorb increases in wages or labour costs and the movements or likely movements in national productivity.

Counsel for the unions pointed out that the matters raised by the employers could be discussed only before a Presidential Bench of the Commission and that the employers could not seek the right to argue the 1961 basic wage decisions before a bench of the Commission constituted otherwise.

In the judgment given on 5th February, 1963 the Commission said:—

“1. There will be no alteration in the amounts of the existing basic wage until further order of the Commission.

2. The application before the Commission is further adjourned until 18th February, 1964.

3. At such adjourned hearing the issues will be:

- (a) The issue set out in paragraph (5) of the decision of 4th July, 1961; and
- (b) Any issue which a party desires to raise and of which it has given notice to the Industrial Registrar, the other parties, and the Attorney-General, by the 31st January, 1964."

With regard to the matter of the use of statistics, which had been raised by counsel for the unions, the Commission felt that it was not the appropriate time to deal with the matter, but it would be further considered when it was appropriate.

The Commission referred to the matter raised by the employers concerning the considerations to be taken into account by the Commission when hearing applications to alter wages and conditions of employment, and ruled that it was not the appropriate time to deal with the submissions made.

If submissions were made before benches of the Commission differently constituted from the present one, then those benches were the ones to deal with their relevance, admissibility or otherwise.

The application referred to in para. 6 of the decision of 4th July, 1961, were further stood over to a date after 18th February, 1964, to be fixed by the Commission with liberty to any of the parties to these applications to apply in the meantime.

(xiii) *Rates Operative, Principal Towns.* The basic wage rates of the Commonwealth Conciliation and Arbitration Commission for adult males and females, operative as from the beginning of the first pay period commencing on or after 7th July, 1961, are as shown in the following table.

COMMONWEALTH BASIC WAGE: WEEKLY RATES(a), 1963

City or town	Rate of wage		City or town	Rate of wage	
	Adult males	Adult females		Adult males	Adult females
	£ s. d.	£ s. d.		£ s. d.	£ s. d.
New South Wales—			Western Australia—		
Sydney ..	14 15 0	11 1 0	Perth ..	14 8 0	10 16 0
Newcastle ..	14 15 0	11 1 0	Kalgoorlie ..	14 15 0	11 1 0

(a) Rates prescribed by the Commonwealth Conciliation and Arbitration Commission (before 30th June, 1956, the Commonwealth Court of Conciliation and Arbitration). Rates include prosperity loadings, where applicable.

(b) Rates operative from the beginning of the first pay-period commencing in the month shown or commencing on or after the date shown. (c) From December, 1950 the basic wage rates for adult females have been 75 per cent. of the rates for adult males. (d) Automatic adjustment discontinued (see p. 488).

A table showing Commonwealth basic wage rates from 1923 to 1962 was published in the Appendix to *Labour Report No. 49*.

3. **Australian Territories.**—In the Northern Territory, there are two basic wages operating, one in respect of areas north of the 20th parallel of South Latitude, generally referred to as the "Darwin" rate, and the other in respect of areas south of that parallel and extending down to the 26th parallel (the "Port Augusta" rate).

The basic wage rates payable as from the beginning of the first pay-period commencing on or after 7th July, 1961 were:—"Darwin" rate, adult males £15 7s., adult females £11 10s.; "Port Augusta" rate, adult males £14 14s., adult females £11 0s. 6d.

In addition to these rates, special loadings were prescribed in Northern Territory awards following the fixation of the basic wage rates operative from November, 1951.

In the Australian Capital Territory, the rates payable as from the beginning of the first pay-period commencing on or after 7th July, 1961 were £14 10s. for adult males and £10 17s. 6d. for adult females.

Further details of basic wage rates in the Northern Territory and the Australian Capital Territory may be found in *Labour Report No. 49*, pages 114 to 118.

4. **Basic Wage Rates for Females.**—Reference should be made to *Labour Report No. 49* (pp. 112–14) for an account of the fixation of minimum rates and basic wages for adult females by the Commonwealth Court of Conciliation and Arbitration. At the end of the 1949–50 Basic Wage Inquiry, the Commonwealth Court of Conciliation and Arbitration, by a majority decision, fixed the basic weekly wage for adult females at 75 per cent. of the corresponding male rate from the beginning of the first pay-period commencing in December, 1950. This percentage has continued to be prescribed in subsequent inquiries.

5. *State Basic Wages.*—(i) *New South Wales.* The first determination under the New South Wales Industrial Arbitration Act of a standard "living" wage for adult male employees was made on 16th February, 1914, when the Court of Industrial Arbitration fixed the living wage at £2 8s. a week for adult males in the metropolitan area. A Board of Trade, established in 1918, with power to determine the "living" wage for adult male and female employees in the State, made numerous declarations from 1918 to 1925, but ceased to function after the *Industrial Arbitration (Amendment) Act*, 1926 transferred its powers, as from 15th April, 1926, to the Industrial Commission of New South Wales.

The adult male rate was determined on the family unit of a man, wife and two children from 1914 to 1925; a man and wife only in 1927, with family allowances for dependent children; and a man, wife and one child in 1929, with family allowances for other dependent children. However, with the adoption in 1937 of the Commonwealth basic wage, the identification of a specified family unit with the basic wage disappeared.

A State scheme of supplementing wages by child endowment became operative in New South Wales from July, 1927, and continued until superseded by the Commonwealth Government scheme in July, 1941. A brief account of the main features of the New South Wales system was given in Official Year Book No. 37, pages 485–6. For particulars of the Commonwealth scheme, see Chapter XV.

Shortly after the Commonwealth Court of Conciliation and Arbitration announced its decision in the 1937 Basic Wage Inquiry, the Government of New South Wales amended the *Industrial Arbitration Act* to make the State basic wage agree with the Commonwealth rate ruling in New South Wales, and to adopt, as far as practicable, the general principles of operation laid down by the Commonwealth Court. Further amendments to the *Industrial Arbitration Act* were made in 1950 to give effect to the new rates declared by the Commonwealth Court of Conciliation and Arbitration in the 1949–50 Basic Wage Inquiry (see page 487).

Differential basic wage rates for country areas (except Broken Hill) and for employees under Crown awards were eliminated by an amendment of the *Industrial Arbitration Act* in 1951. Separate rates for Broken Hill were discontinued in 1961 (see below).

Following the decision of the Commonwealth Court of Conciliation and Arbitration in September, 1953, to discontinue the system of automatic adjustment of the basic wage in accordance with changes in the "Court" Series retail price index numbers, the New South Wales Industrial Commission deleted the automatic adjustment clause from awards, etc., within its jurisdiction. As a result, the basic wages applicable for the State and operative from the beginning of the first pay-period commencing in August, 1953, remained unchanged until November, 1955.

In October, 1955, the *Industrial Arbitration Act* 1940–1955 was amended to provide for the automatic adjustment of the existing basic wage each quarter, in accordance with the movements in the Commonwealth Statistician's "C" Series retail price index numbers. The first adjustment, based on the index number for the September quarter, 1955, represented the amount which would have been added to the basic wage if quarterly adjustments had not been suspended, and was made payable from the beginning of the first pay-period in November, 1955. Automatic adjustments have continued to operate since that date.

Act No. 29, 1961 (assented to on 13th October, 1961) amended the *Industrial Arbitration Amendment Act*, 1961, by adopting the Consumer Price Index numbers in place of the "C" Series retail price index numbers for purposes of the automatic quarterly adjustment of the basic wage. The November, 1961, variation was the first based on the Consumer Price Index. Consumer Price Index numbers relate only to capital cities and the weighted average for the six capital cities, and as a result the Sydney basic wage rate became the rate for the whole of New South Wales, separate rates no longer being prescribed for Broken Hill and "5 Towns" after November, 1961.

From the beginning of the first pay-period in May, 1963, the basic wage for adult males was £15 2s. and for adult females £11 6s. 6d.

The *Industrial Arbitration (Female Rates) Amendment Act* (No. 42, 1958), which became operative on 1st January, 1959, defined the existing basic wage for adult females as being 75 per cent. of the adult male rate and made provision for equal pay for males and females in certain circumstances. Where the Industrial Commission or a Conciliation Committee is satisfied that male and female employees are performing work of the same or a like nature and of equal value, they shall prescribe the same marginal or secondary rates of wage. The basic wage for these adult females was prescribed as 80 per cent. of the appropriate basic wage for adult males as from 1st January, 1959. Thereafter, the basic wage was to be increased annually by 5 per cent., so that on 1st January, 1963, it became the same as that for adult males.

A table showing, for the period from 16th February, 1914 to November, 1962, the basic wage rates for adult males and females payable in Sydney was published in the Appendix to *Labour Report* No. 49, 1961.

(ii) *Victoria*. There is no provision in Victorian industrial legislation for the declaration of a State basic wage. Wages Boards constituted from representatives of employers and employees, with an independent chairman, for each industry group or calling, determine the minimum rate of wage to be paid in that industry or calling. In general, these Boards have adopted a basic wage in determining the rate of wage to be paid.

By an amendment to the *Factories and Shops Act* in 1934, Wages Boards were given discretionary power to include in their determinations appropriate provisions of relevant Commonwealth Awards. A further amendment to this Act in 1937 made it compulsory for Wages Boards to adopt such provisions of Commonwealth Awards. The 1937 Act, as amended, also gave Wages Boards power to adjust wage rates, "with the variation from time to time of the cost of living as indicated by such retail price index numbers published by the Commonwealth Statistician as the Wages Board considers appropriate". The Wages Boards thus adopted the basic wages declared by the Commonwealth Court of Conciliation and Arbitration and followed that Court's system of adjusting the basic wage in accordance with variations in retail price index numbers.

After the Commonwealth Court of Conciliation and Arbitration discontinued the system of automatic adjustment of the Commonwealth basic wage in September, 1953, a number of Wages Boards met in November, 1953, and deleted references to these adjustments. However, an amendment to the *Factories and Shops Act* in November, 1953, required Wages Boards to provide for the automatic adjustment of wage rates in accordance with variations in retail price index numbers.

In October, 1956, an amendment to the *Labour and Industry Act* (which had superseded the *Factories and Shops Acts* in 1954) deleted the automatic adjustment provision and directed Wages Boards in determining wage rates to take into consideration relevant awards of, or agreements certified by, the Commonwealth Conciliation and Arbitration Commission. As a result of this legislation, the last automatic quarterly adjustment of the basic wage made was based on the variation in retail price index numbers for the June quarter, 1956, and was payable as from the beginning of the first pay-period in August, 1956. Following the judgment of the Commonwealth Conciliation and Arbitration Commission in the 1961 Basic Wage Inquiry, Wages Boards met in July and August, 1961, and varied their determinations by incorporating the new Commonwealth rates. As the 1963 Basic Wage Inquiry resulted in no change being made to Commonwealth basic wage rates, the rates for Melbourne are £14 7s. a week for adult males and £10 15s. for adult females.

A table showing, for the period November, 1953, to July, 1961, the basic wage rates for adult males and females adopted by most Wages Boards was published in the Appendix to *Labour Report* No. 49, 1961.

(iii) *Queensland*. The *Industrial Conciliation and Arbitration Act* of 1929 established an Industrial Court, and provided that the Court could make declarations as to the basic wage and standard hours. This Act, as subsequently amended, was repealed by the *Industrial Conciliation and Arbitration Act* of 1961, which established, in addition to the Industrial Court, an Industrial Conciliation and Arbitration Commission. The full bench of the Commission, consisting of not less than three Commissioners, may make declarations as to, *inter alia*, the basic wage for males and/or females and the standard hours of work. The first formal declaration of a basic wage (£4 5s. for adult males) by the Queensland Court of Industrial Arbitration operated from 1st March, 1921. Prior to this declaration, the rate of £3 17s. a week for adult males had been generally recognized by the Court in its awards as the basic or living wage. The Queensland Industrial Conciliation and Arbitration Act provides that any basic wage declared must at least maintain an employee, his wife and family of three children in a fair and average standard of comfort.

From 21st April, 1942, the Queensland Industrial Court adopted the practice of making quarterly declarations of the basic wage on the basis of variations in the "C" Series retail price index number for Brisbane.

The Court granted increases of 7s. and 5s. to the basic wages for adult males and adult females respectively, payable from 23rd December, 1946, following the "interim" basic wage judgment of the Commonwealth Court of Conciliation and Arbitration announced earlier in December, 1946.

Following the decision of the Commonwealth Court of Conciliation and Arbitration to increase the male and female basic wages from December, 1950, the Queensland Industrial Court, after an inquiry, granted an increase of 15s. a week to both adult males and adult females, operative from 7th December, 1950. The new male rate was identical with the Commonwealth basic wage for the Brisbane metropolitan area and the basic wage payable to adult females became approximately 66 per cent. of the male rate.

In January, 1953, because the Court was not satisfied that the fall in the "C" Series index for Brisbane for the December quarter, 1952, was a true representation of the economic position for Queensland as a whole, it declined to make any alteration to the existing basic wage. However, quarterly adjustments were made for the next four quarters.

Following a Basic Wage Inquiry, the Court announced, on 11th June, 1954, that there would be no change in the basic wage rates declared for February, 1954. For the following four quarters, the Court also decided not to vary the existing basic wage rates. However, after considering the "C" Series index number for the quarter ended 30th June, 1955, and its relation to the index number for the March quarter, 1955, the Court announced that, as these figures showed a continued upward trend, the basic wage for adult males should be increased from 1st August, 1955. In this judgment, the Court emphasized that it held itself free whether or not to adjust the basic wage upwards or downwards in accordance with movements in the "C" Series retail price index numbers. The Court examined the movement in these index numbers for each subsequent quarter and announced variations in the basic wage.

On 22nd and 23rd April, 1958, the Court heard an application by combined unions for an immediate increase of £1 in the basic wage, on the ground that a state of emergency existed with regard to the cost of living. On 30th May, 1958, the Court dismissed the application.

In December, 1960, the Court determined that as from 1st May, 1961, the basic wage for adult females should be 75 per cent. of that for adult males.

In its basic wage declaration of 25th January, 1961, the Court referred to the opinion given by the Commonwealth Statistician that the "C" Series Retail Price Index had become an unreliable measure of retail price changes in recent quarters and to the fact that for current statistical purposes variations in retail prices were measured by the Consumer Price Index. Taking into consideration all relevant factors, including the approximate increase in price levels as disclosed by the Consumer Price Index, the Court decided to increase the basic wage for adult males by 4s.

The *Industrial Conciliation and Arbitration Act* of 1961, which came into operation as from 2nd May, 1961, provided that all persons interested must be given an opportunity to be heard before any general declaration as to the basic wage can be made.

Following an inquiry, the Commission, in a decision issued on 24th May, 1961, increased the adult male basic wage by 4s. a week, which was approximately the amount of the increase indicated by the Consumer Price Index for March quarter, 1961.

In September, 1961 the Commission heard an application by employer organizations for a declaration of a general ruling that "in future the basic wage for males and/or females shall not be reviewed merely by reason of any change in the Consumer Price Index at intervals of less than twelve months". The application was opposed by the trade unions generally. In a judgment delivered on 14th November, 1961, the Commission refused the employers' application.

An inquiry held in November and December, 1962, dealt with an application by unions for increases of £1 4s. in the adult male basic wage and 18s. in the adult female basic wage. The application was opposed by employer organizations generally, by the State of Queensland and by the Queensland Commissioner for Railways. Judgment was given on 20th December, 1962, the application being refused.

A further application was made by trade unions for a declaration of a basic wage, and an inquiry was held in April, 1963. Employers generally opposed the application, and the State of Queensland, while adopting a neutral attitude, submitted information for the assistance of the Commission. In a judgment delivered on 26th April, 1963, the Commission increased the basic wage by 2s. for adult males and by 1s. 6d. for adult females from 6th May, 1963.

The rates payable in the Southern Division (Eastern District) from 6th May, 1963, were £14 6s. for adult males and £10 14s. 6d. for adult females.

In addition to the basic wage for the Southern Division (Eastern District), which includes Brisbane, adult males in other areas receive district allowances. As from 2nd February, 1959, the allowances have been:—Southern Division (Western District) 10s. 6d., Mackay Division 9s., Northern Division (Eastern District) 10s. 6d., Northern Division (Western District) £1 12s. 6d. The allowances for adult females are not less than 75 per cent. of those for adult males.

In the Appendix to *Labour Report* No. 49, a table was published showing adult male and adult female basic wage rates payable in the Southern Division (Eastern District) from 1st March, 1921, to 29th May, 1961.

(iv) *South Australia.* The *Industrial Code*, 1920–1958 provides that the Board of Industry shall after public inquiry declare the “living wages” to be paid to adult male and adult female employees. The Board has power also to fix different rates to be paid in defined areas.

The family unit was not specifically defined in the Code, but the South Australian Industrial Court in 1920 decided that the average employee in respect of whom the living wage was to be declared was a man with a wife and three children. However, the concept of a family unit disappeared with the adoption of basic wage rates declared by the Commonwealth Conciliation and Arbitration Commission (*see below*).

The first declaration by the Board of Industry became operative from 4th August, 1921, when the living wage for adult male employees in the metropolitan area was determined at £3 19s. 6d. a week. A table showing the living wages declared from time to time was published in the Appendix to *Labour Report* No. 49.

Following the “interim” increase in the “needs” basic wage of the Commonwealth Court of Conciliation and Arbitration announced on 13th December, 1946, the South Australian Government made a provision in the *Economic Stability Act* 1946 for the declaration by the Governor of a living wage based on the Commonwealth basic wage for Adelaide. This action was taken because the Board of Industry had made a determination on 5th September, 1946, and under the *Industrial Code* was not able to make a further determination for six months.

The *Industrial Code Amendment Act* 1949 made provision for the quarterly adjustment of the living wage in accordance with the variations in the Commonwealth basic wage for Adelaide. In effect, this made the State living wage and the Commonwealth basic wage equal from the beginning of the first pay-period commencing in February, 1950. The prescribed adjustment to the female living wage was seven-twelfths of that made to the Commonwealth male basic wage. The Board of Industry retained power to amend the living wage, but any new living wage was to be adjusted quarterly as above.

Following the decision of the Commonwealth Court of Conciliation and Arbitration in the 1949–50 Basic Wage Inquiry, the South Australian *Industrial Code* was amended to provide for declarations of the living wage by proclamation to prevent unjustifiable differences between the State and Commonwealth rates of wage. By proclamation dated 30th November, 1950, the South Australian living wage in the metropolitan area was made identical with the December, 1950, rates fixed by the Commonwealth Court of Conciliation and Arbitration for the metropolitan area of South Australia. The female basic wage, which had been approximately 54 per cent. of the male basic wage, was increased to 75 per cent. of the corresponding male rate.

When the Commonwealth Court of Conciliation and Arbitration discontinued quarterly adjustments to Commonwealth basic wages in September, 1953, the South Australian living wage also ceased to be varied quarterly, and since that time it has remained the same as the Commonwealth basic wage for Adelaide. Following the Commonwealth basic wage inquiries in 1956 and subsequent years, increases were made to the South Australian living wages by proclamation. The rates operative from 10th July, 1961, were £14 3s. for adult males and £10 12s. for adult females.

(v) *Western Australia.* The *Industrial Arbitration Act* 1912–1961 provides that the Court of Arbitration may determine and declare a basic wage at any time on its own motion and must do so when requested by a majority of industrial unions or by the Western Australian Employers' Federation, with the limitation that no new determination shall be made within twelve months of the previous inquiry.

The term "basic wage" is defined in the Act as "a wage which the Court considers to be just and reasonable for the average worker to whom it applies". In determining what is just and reasonable, the Court must take into account not only the "needs of an average worker", but also the "economic capacity of industry" and any other matters it deems relevant.

The Act provides that the Court of Arbitration may make adjustments to the basic wage each quarter, if the statement supplied by the State Government Statistician showing retail price index numbers and monetary equivalents in terms of the State basic wages indicates that there has been a variation of 1s. or more a week compared with the previous quarter. These adjustments generally apply from the dates of declaration by the Court.

The first declaration of the basic wage by the Court of Arbitration, after the authority to fix one was vested in the Court in 1925, operated from 1st July, 1926. The family unit is not specifically defined in the Act, but it has been the practice of the Court to take as a basis for its calculations a man, his wife and two dependent children. Since that date, the principal inquiries have been those of 1938, 1947, 1950 and 1951. A table showing declarations of the basic wage by the Court of Arbitration, operative from 1st July, 1926, to 30th October, 1961, will be found in the Appendix to *Labour Report* No. 49.

Following the judgment of the Commonwealth Court of Conciliation and Arbitration in the 1949-50 Basic Wage Inquiry, the Western Australian Court of Arbitration decided that the basic wage should be increased by £1 a week for adult males and by 15s. a week for adult females. As the result of a subsequent inquiry, the basic wage for adult females was increased from 1st December, 1951, to 65 per cent. of the corresponding male rate. This was subject to the condition that the increase in the basic wage should be offset by the reduction in, or deletion of, existing margins as specified by the appropriate award or determination.

Following the decision of the Commonwealth Court of Conciliation and Arbitration, in September, 1953, to discontinue quarterly adjustments to Commonwealth basic wages, the Western Australian Court of Arbitration exercised its discretionary power and declined to make any adjustments to the basic wage from November, 1953, to the June quarter, 1955.

However, from 9th August, 1955, the Court decided to increase the adult male basic wage by 5s. 11d. a week for Perth and to make corresponding increases for other areas. No further change was announced in the basic wage until January, 1956, and for each subsequent quarter to September quarter, 1961, the Court varied the State basic wages after considering the official statement supplied by the State Government Statistician, except in February, 1959, and February, 1960, when no change was made. Basic wage rates remained unchanged from 30th October, 1961, to 22nd April, 1963.

In a decision issued on 30th January, 1960, the Court, acting in recognition of an agreement between representatives of unions and employers, increased the basic wage for adult females from 65 per cent. to 75 per cent. of the adult male rate. The increased rates were payable from the beginning of the first pay-period commencing on or after this date. As in December, 1951, female margins were to be reduced or deleted to offset the increase in the female basic wage.

The rates payable in the metropolitan area as from 22nd April, 1963, were £15 0s. 3d. for adult males and £11 5s. 2d. for adult females.

(vi) *Tasmania.* A State basic wage is not declared in Tasmania. Under the *Wages Board Act* 1920-1961, Wages Boards are constituted for a number of industries, from representatives of employers and employees and an independent chairman (who is common to all Wages Boards), with power to determine the minimum rates of wage payable in each industry. Until February, 1956, these Boards generally adopted the basic wages of the Commonwealth Court of Conciliation and Arbitration in determining the rates of wage to be paid.

Wages Boards have power to adjust their wage rates in accordance with variations in the cost of living as indicated by retail price index numbers published by the Commonwealth Statistician. When the Commonwealth Court discontinued the system of automatic adjustments of the basic wage in September, 1953, the Chairman of the Wages Boards stated he was of the opinion that automatic adjustment clauses should be deleted from all Wages Boards determinations. Before Wages Boards met to consider this matter, the wage rates for all determinations were automatically adjusted upwards from the beginning of the first pay-period commencing in November. By early December, 1953, all Wages Boards had met and deleted the automatic adjustment clause from determinations and cancelled the adjustment increases payable from November.

Automatic quarterly adjustments in accordance with movements in retail price index numbers were re-introduced by Wages Boards in February, 1956, and restored the basic wage to the level it would have reached if quarterly adjustments had not been discontinued in 1953. A further basic wage increase was payable from the first pay-period in May, 1956.

Upon application by the Employers' Federation of Tasmania, a compulsory conference of employer and employee representatives was held on 22nd and 25th June, 1956, to consider the adoption of Commonwealth basic wages and the deletion of automatic quarterly adjustment provisions. At the conclusion of the conference, the Chairman of the Wages Boards stated he was of the opinion that the adjustments should be suspended for a period in an endeavour to achieve some measure of stability. However, he pointed out that any Wages Board was competent to adopt by agreement between the representatives of employers and employees or majority decision, the Commonwealth Court's basic wage or any other method of fixing the basic wage.

The majority of Wages Boards suspended automatic quarterly adjustments after the August, 1956, adjustment, and wage rates remained unchanged until July, 1959, when the Commonwealth rates were adopted. Following the decision of the Commonwealth Conciliation and Arbitration Commission in July, 1961, to increase the basic wage, Wages Boards met during July, and incorporated the new rates in their determinations. The rates for Hobart then became £14 14s. for adult males and £11 0s. 6d. for adult females. These rates were still operative in May, 1963. During January, 1961, Wages Boards adopted the basic wage for Hobart as the uniform rate applicable throughout the State.

A table was published in the Appendix to *Labour Report* No. 49, 1961, showing basic wage rates for adult males and females generally adopted in Hobart for the period February, 1956, to July, 1961.

During 1962, a number of Wages Boards met and varied determinations by making provision for the automatic adjustment of the basic wage to conform to any change in the basic wage determined from time to time in awards of the Commonwealth Conciliation and Arbitration Commission.

(vii) *State Basic Wage Rates.* The "basic" wage rates of State industrial tribunals, operative in May, 1962, and May, 1963, are summarized in the following table.

STATE BASIC WAGES: WEEKLY RATES

State	May, 1962				May, 1963

(a) Where dates are not quoted, wage rates operate from the beginning of the first pay-period commencing in the month shown. (b) No basic wage declared. Rates shown are those adopted by most Wages Boards.

(c) During July and August, 1961, Wages Boards adopted the Commonwealth rate.

(d) The "living wage" declared for the metropolitan area is also adopted for country areas, except at Whyalla and nearby areas, where a loading of 5s. a week for adult males is generally payable.

(e) Most Wages Boards adopted the Commonwealth rate from July, 1961.

Tables showing State basic wage rates for a long period of years are contained in the Appendix to *Labour Report* No. 49, 1961.

## § 6. Wage Margins

1. **General.**—Wage margins have been defined as “minimum amounts awarded above the basic wage to particular classifications of employees for the features attaching to their work which justify payments above the basic wage, whether those features are the skill or experience required for the performance of that work, its particularly laborious nature, or the disabilities attached to its performance”.\*

Marginal rates of wage are determined by Commonwealth and State industrial tribunals. In the Commonwealth jurisdiction, prior to 1954, the Commonwealth Court of Conciliation and Arbitration had not made any general determination in respect of wage margins, but general principles of marginal rate fixation had been enunciated by the Court in the *Engineers Case of 1924*, the *Merchant Service Guild Case of 1942* and the *Printing Trades Case of 1947*. Major determinations affecting margins were made in 1954, 1959 and 1963. The decisions of the Commonwealth Court and later the Commonwealth Conciliation and Arbitration Commission have generally been followed by State industrial tribunals in the determination of margins in State awards.

A summary of the 1954 and 1959 Margins Cases is given in the following paragraphs. A summary of the 1963 case will be found in the Appendix.

2. **Metal Trades Case, 1954.**—Employee organizations parties to the Metal Trades Award, 1952, filed applications during 1953 for increased margins for all workers covered by this award. The applications came on for hearing before J. M. Galvin C.C., who decided that they raised matters of such importance that, in the public interest, they should be dealt with by the Commonwealth Court of Conciliation and Arbitration. On 16th September and 6th October, 1953, the Conciliation Commissioner, pursuant to section 14A of the *Conciliation and Arbitration Act*, referred these applications to the Court.

The actual claims of the trade unions were that the marginal rate of 52s. a week payable to a fitter in the metal trades should be increased to 80s. a week (86s. for certain electrical trades), with proportionate increases for other award occupations. The margins then current, with a few exceptions, had been in existence since 1947. The employees' claims were in the nature of a test case to determine the attitude of the Court to other applications for increased margins.

Employer organizations respondent to the Metal Trades Award counter-claimed that existing margins for skilled tradesmen should remain unaltered, while those paid to partly skilled or unskilled workers should be reduced.

The Court decided to take the Commissioner's two references together, and the matter came on for hearing before the Full Arbitration Court (Kelly C.J., Kirby, Dunphy and Morgan JJ.) in Melbourne on 13th October, 1953.

In a judgment delivered on 25th February, 1954, the Court held that a *prima facie* case had been made for a re-assessment of margins but that the economic situation at that time, particularly in regard to the level of costs, did not permit of such a comprehensive review. The Court decided that, to avoid the creation of new disputes, to save expense and to obviate procedural difficulties, it would not reject the claims but adjourn them until 9th November, 1954.

On 25th and 26th August, 1954, summonses were filed by the employees' organizations for orders that proceedings in this case be brought forward, and the hearing was resumed on 5th October, 1954.

In a judgment delivered on 5th November, 1954†, the Court made an order re-assessing the marginal structure in the Metal Trades Award by, in general, raising the current amount of the margin to two and a half times the amount of the margin that had been current in 1937. However, in cases in which the result of that calculation produced an amount less than the existing margin, the existing margin was to remain unaltered. In effect, this decision increased the margins of a fitter from 52s. a week to 75s. a week, increased similarly margins of other skilled occupations, and made no increase in margins of what may generally be described as the unskilled or only slightly skilled occupations under the Metal Trades Award.

At the end of its judgment, the Court stated that, while its decision in this case related immediately to one particular industry, it was expected to afford general guidance to all authorities operating under the *Conciliation and Arbitration Act*, or under other legislation which provided for tribunals having power to make references, or being subject to appeal, to the Court, where the wage or salary may properly be regarded as containing a margin.

\* *Commonwealth Arbitration Reports*, Vol. 80, p. 24.

† *Ibid.*, p. 3.

The Court added observations for the guidance of these and of other tribunals "which may regard decisions of this Court as of persuasive authority". Further details were published in *Labour Report* No. 46, 1958, pages 101-8.

3. *Margins Cases, 1959.*—On 25th August, 1959, the Commonwealth Conciliation and Arbitration Commission began considering a number of applications for changes in margins referred to it from the appropriate Commissioner. Applications had been made by various employee organizations for increased margins in Parts I. and II. of the Metal Trades Award, Part II. of the Aircraft Industry Award, the Bank Officials' Award and the Gold and Metalliferous Mining Award. An application by employers sought to reduce marginal rates in the Metal Trades Award. The Commission decided to hear all these matters together, permitting the applicant unions in respect of Part II. of the Metal Trades and Aircraft Industry Awards and the Bank Officials' Award to ask first for an interim increase. A summary of the principal decisions and reasons for judgment of the Commission is given in the following paragraphs. Further details, including extracts from the judgment, were published in Official Year Book No. 47, pages 455-9.

*Metal Trades Award, Part I.* The employee organizations claimed an increase in the margin for the fitter, as set out in the Metal Trades Award, 1952 (i.e. the award as it existed prior to the Metal Trades Case, 1954—see para. 2, page 507), from 52s. to 134s. a week and an increase of 157 per cent. in the margins for other classifications. The employers counter-claimed for a reduction in margins of 15s. a week.

The Attorney-General of the Commonwealth intervened, and not only submitted statistical material and an analysis of the economic situation, but also assisted the Commission with an exposition of various factors proper to be taken into account in the fixation of margins. In particular, the Commonwealth emphasized the desirability of flexibility in the workings of the arbitration system.

Counsel for the unions put broadly a case that in the proper fixation of margins the basic criteria were the market value at the time of the fixation of the wage and the economic capacity of the economy to pay the wages claimed, and he alleged that the 1954 Metal Trades decision had departed from these principles. He produced to the Commission material to demonstrate that the economic situation would justify the increases asked for. He also submitted that the true relativities in the Metal Trades Award should be those created by a combination of the 1947 Full Court decision and the second variation order made in 1947 by G. A. Mooney, C.C.\*

The employers adopted the view that no case had been made out for any increase and that there should be wage reductions. They also supplied the Commission with economic material in support of their case that there was no capacity in the community to sustain increased margins, and alternatively that any increased economic capacity which may have occurred since 1954 had been exhausted by basic wage fixations. As to relativities, the employers submitted that the 1954 decision should be adhered to and should be carried to its logical conclusion in so far as the lower paid classifications were concerned.

In its judgment, delivered on 27th November, 1959, the Commission rejected the employers' application to reduce margins, and made an order re-assessing the marginal structure in the Metal Trades Award by increasing the existing margins by 28 per cent., the amount of the increase being taken to the nearest 6d. The new margins applied from the beginning of the first full pay-period commencing in December, 1959. The effect of this decision was to increase the margin of the fitter from 75s. to 96s. a week and that for the process worker from 22s. to 28s.

The Commission stated that, not having before it the question of work values, and having decided not to alter the 1954 relativities, the increases had been expressed as a percentage of current margins, but this was not to be taken as an endorsement of that method of fixing margins.

In discussing the principles of marginal fixation, the Commission stated that there was no real reason why a margin should be expressed as a percentage of the basic wage, and that it would be unwise to express any margin in that way. On the related question of whether margins should be increased merely because of the decreasing power of money since last fixed, the Commissioner's view was that, although the automatic or mathematical approach should be rejected, some account must be taken, whenever a margin is under review, of the amount at which the margin was originally fixed and of any decrease in the purchasing power of money since the time of fixation.

\* *Commonwealth Arbitration Reports*, Vol. 59, p. 1272

On the question of economic capacity the Commission said that prior to 1947 it had been the practice, in the metal trades industry at least, to consider the economic situation of the industry itself, but in 1954 the Court considered only the capacity of industry generally. However, the Commission pointed out that in many cases in the past, margins had been fixed without consideration of capacity, and it could see no reason why in appropriate circumstances that practice should not continue.

The submission by the employers that, even if there had been capacity to pay increased wages, that capacity had been exhausted by basic wage decisions in recent years, was rejected by the Commission.

The unions sought to have restored the relativities within the marginal structure of the Metal Trades Award which existed prior to the 1954 decision. The employers not only relied on the relativities created in 1937 and confirmed in 1954, except as to the lower paid classifications, but also asked the Commission to take the 1954 relativities to their logical conclusion in its decision in this matter as far as those classifications were concerned.

The Commission said that, in origin at least, relativities in margins were merely an expression of relative work values and there was no evidence of such values before the Commission. In the circumstances, the Commission was not prepared to accede either to the unions' submissions or to the employers' submission in this regard, and it accepted the relativities established by the 1954 decision except to the extent necessary to round some of the figures off. The question of relativities in margins in the Metal Trades Award, based on work value, thus remained open.

During the proceedings, the unions presented some evidence as to over-award payments in the industry. The Commission referred to the question whether it should pay regard to payments obtained by duress, and decided that the means by which over-award payments of sufficient duration were obtained was irrelevant when considering economic capacity. The mere fact that such amounts were being paid and had been paid over a considerable period was sufficient to demonstrate capacity.

The Commission could not arrive at any figure which could be said to be a reliable average over-award payment for any classification. The most it could say was that in the Metal Trades industry there were over-award payments of varying amounts in quite a number of establishments, and it had taken this factor, indefinite though it was, into account in arriving at its decision.

In reviewing the economic situation, the Commission considered the current position in the light of information which had become available since the 1959 Basic Wage Judgment. After considering various indicators of the state of the economy, the Commission discussed the problems of inflation and the maintenance of economic stability. The Commission said that it had looked at the increases which it proposed to grant in the light of the submissions about economic stability and it did not consider that such increases were so likely to affect that stability that the economy would be adversely affected. If marginal increases could not be granted in times of economic prosperity, it was difficult to imagine when they could be granted.

Summing up, the Commission stated:—"We have considered, with the qualifications already mentioned in this Judgment, the decrease in the purchasing power of money which has occurred since the 1954 marginal fixation, we have assessed as well as we are able to the increased capacity which has occurred in the Australian economy since that time and the fact that productivity has played its part in that increase of strength, and we have considered the Basic Wage decisions and appraisals of the economy by the Court and the Commission since 1954. In the result, we have thought it proper to increase margins in the Metal Trades industry in the particular circumstances which confront us by an amount which exceeds the loss in purchasing power of the 1954 margins, which excess we consider has been earned by the contribution of the employees to productivity increases and made possible by the additional strength of the national economy."\*

The Commission went on to say:—"This decision is based on the material placed before us and our general industrial knowledge which, in view of our functions under the Act, we think it proper to use. Both that material and that knowledge relate to the Metal Trades industry and to the economy generally. Our decision, however, relates only to the Metal Trades Award. We realize that on occasions in the past, margins fixed in the Metal Trades Award, and in particular the margin of the fitter, have been used as standards

\* *Commonwealth Arbitration Reports*, Vol. 92, p. 793.

for other awards. The use of the increases which we have granted as a guide in other disputes will be a matter for the parties as far as conciliation is concerned and, if arbitration is necessary, for this Commission however constituted."

*Gold and Metalliferous Mining Award.* Judgment was also delivered on 27th November, 1959, in connexion with the application for variation of margins in this award.\* The margin for the miner was increased from 30s. to 42s. 6d. a week from the beginning of the first full pay-period commencing in December, 1959. Marginal claims for other classifications were referred back to the appropriate Commissioner for consideration. Subsequently, the parties to the award agreed that margins for all other classifications should be increased in the same proportion as the margin for the miner (i.e. 41.7 per cent.). The Commissioner varied the award accordingly.

*Metal Trades Award, Part II., and Aircraft Industry Award, Part II.* On 11th December, 1959, the Commission delivered a judgment granting a 20 per cent. interim increase in margins to graduate and diplomate engineers and scientists, payable as from the beginning of the first full pay-period commencing in December, 1959.

*Bank Officials' Award.* On 11th December, 1959, a 20 per cent. interim increase in margins was granted to officers in the 10th to 18th year of service inclusive and to accountants and managers, payable retrospectively as from 11th June, 1959. Interim increases were not awarded to more junior officers, nor to females. Subsequently the parties to the Bank Officials' Award met before a single Commissioner, and a consent award was made giving final marginal increases to adult males and adult females and making adjustments to junior rates of pay.

4. *Margins Cases, 1963.*—A summary of the judgment delivered in these cases will be found in the Appendix.

### § 7. Leave

1. *Annual Leave.*—In the judgment given by the Commonwealth Court of Conciliation and Arbitration in the Commercial Printing Case of 1936, Dethridge *C.J.*, in granting one week's annual leave with full pay to employees in the industry, said:—"This Court has frequently been asked to award annual leave on full pay but has hitherto not done so except in cases where employees have to work on Sunday, or suffer some other deprivation by reason of isolation or other cause, or in cases where such leave has become the custom generally by the practice of most of the parties concerned."† This judgment has usually been regarded as the first statement of the principles involved in deciding whether or not annual leave should be awarded.

In 1940, Beeby *C.J.*, awarded annual leave of one week to the manufacturing section of the metal trades industry, and in the same year O'Mara *J.* extended leave throughout the industry, with the exception of that section engaged in the servicing of motor vehicles.

Annual leave in the Commonwealth jurisdiction was introduced over a period of time, industry by industry, if the Judge responsible for the industry considered it proper.

The question of annual leave was again before the Court in 1945.‡ In that case applications had been made seeking variations of awards to prescribe an extension of annual leave from a period of seven days to fourteen days. The Court in its judgment set out what it considered to be the principles to be applied in all applications for an extension of the annual leave period to fourteen days. The question of altering any particular award to prescribe for two weeks' annual leave was left to the discretion of the single Judge who heard the application.

Further inquiries into annual leave were conducted by the Commonwealth Conciliation and Arbitration Commission in 1960, 1962 and 1963. A summary of the 1960 and 1962 inquiries is given in paras. 2 and 3 below. A summary of the 1963 inquiry will be found in the Appendix.

Employees in New South Wales in private industry, other than those covered by Federal awards, were granted three weeks' annual leave by an amendment to the Annual Holidays Act, passed in 1958. Generally, employees of government authorities (Commonwealth, State, Local and Semi-government), with the exception of State and Local Government employees in Western Australia, are entitled to three weeks' annual leave, as are also many salaried employees and wage earners in certain industries. The majority of the remaining employees in Australia receive two weeks' annual leave.

2. **Three Weeks' Annual Leave Inquiry, 1960.**—Unions respondent to the Metal Trades Award applied to the Commonwealth Conciliation and Arbitration Commission on 18th July, 1960, to vary the Award to provide three weeks' paid annual leave instead of two weeks. In a judgment issued by the Commission, constituted by Kirby C.J. (President), Moore J. (Deputy President) and E. A. Chambers (Senior Commissioner), on 14th December, 1960, the application was refused.\*

At the beginning of proceedings, it had been stated by counsel for the unions that the matter was regarded as providing a standard of three weeks' annual leave for all Federal awards, and it was treated accordingly by the Commission. The application was opposed by employers, the State of Victoria and the Electricity Trust of South Australia. The State of Tasmania supported the application. The Commonwealth Government and the State of Queensland neither supported nor opposed the application, although the Commonwealth tendered statistical and economic information for the benefit of the Commission and the parties. The Commission stated that it did not disagree with the concept of increased leisure, nor did it think that, at that time, leisure was at a maximum. The issue for decision was whether that was the time to increase it for employees under Federal awards.

Counsel for the unions contended that serious anomalies existed because awards of the Commission lagged behind standards of annual leisure increasingly adopted in other jurisdictions, notably in New South Wales, where the *Annual Holidays Act* of 1958 had, with effect from the beginning of 1959, extended three weeks' annual leave to employees covered by that legislation. He held that judgments of the previously existing Arbitration Court had shown an eagerness to avoid industrial anomalies, and that the onus lay on employers to show a lack of economic capacity once anomalies as to leisure were established.

Evidence was submitted on the incidence of three weeks' annual leave among members of the Federated Ironworkers' Association of Australia, and similar material was supplied by other unions. Although precise information was not available, it was claimed that 40 to 50 per cent. of all workers were in receipt of three weeks' annual leave. Analysis of this information showed that employees of government and government instrumentalities and employees in the State of New South Wales were principally responsible for this high figure.

Thus anomalies arose mainly because of two factors: the operation of the *Annual Holidays Act* 1944–1958 in New South Wales, and the fact that generally employees of Governments and Local Governments and government instrumentalities throughout the Commonwealth were granted three weeks' annual leave. The Commission considered it obvious that dissatisfaction would exist in an establishment covered by both Federal and New South Wales State awards if these awards provided for their respective groups of employees annual holidays of different duration. Although it was of significance to the Commission that dissatisfaction would exist in New South Wales among Federal award workers receiving two weeks' annual leave, the Commission was a Federal body with responsibilities throughout the Commonwealth, and, although it could not ignore the New South Wales legislation, it did not feel impelled, in using its powers, to follow it.

The amount of annual leave enjoyed by public servants had been different for many years, and at present few employees of the Commonwealth either in the public service or elsewhere received less than three weeks' annual leave. However, employment in the public service had never been regarded as setting standards in industry generally. The Commission considered that, since in a federal system differences almost certainly will exist through the use by State legislatures and industrial tribunals of their industrial powers, too much emphasis could be placed on anomalies. This attitude was consistent with that section of the *Conciliation and Arbitration Act* which enjoined the Commission "so far as possible, and so far as the Commission thinks proper" to provide uniformity throughout an industry in relation to hours of work, holidays and general conditions, upon which counsel for the unions had relied.

In considering the history of annual leave, various cases involving decisions by the Arbitration Court had been cited. In the forty hours case, upon which much reliance had been placed by counsel for the unions, the Court was pressed by the Commonwealth Government and the Governments of New South Wales, Victoria, Queensland and Tasmania

to award a forty hour week, and that fact had weighed heavily. In the present case, only the Tasmanian Government supported the application, and the Governments of some other States had not appeared. Assuming that the attitudes of Governments were a matter of significance in this case, those attitudes expressed did not help either the applicants or the employers, and in particular the Commonwealth Government's attitude could not be said to be in support of the application as was contended by the unions, any more than it could be said to have opposed the application.

The Commission said that this review of cases was of little assistance to it. It rejected the submission that from them could be found a principle that once desirability for increased leisure was established, the onus moves to employers to demonstrate lack of capacity to pay for this increased leisure. In these cases, principles for general application had not been laid down.

In dealing with the state of the economy, counsel for the unions stated that productivity had increased by about 2 per cent. per annum between 1946-47 and 1959-60, that wages had by no means absorbed this productivity increase, and that in New South Wales the universal grant of three weeks' annual leave had not adversely affected the economy of that State.

Evidence given on behalf of employers, covering the sheep and cattle industries, had provided the view that, if the application succeeded, direct and indirect labour costs would increase, thereby producing an adverse effect on the industries, which would be harmful to the whole economy. Counsel for the employers submitted that at the end of September there was a strong demand for labour. Surveys of overtime taken from time to time in 1960 disclosed that in about 2,400 factories covered, the average weekly hours of overtime per person working overtime were 7.8 and per employee in the survey 2.7. The probability was that any extension in annual leave would result in more overtime being worked rather than more leisure being achieved by employees. In addition, the need in future to find employment for school leavers increasing in numbers with the expansion of population would require an expansion in the economy. This could only be assured by selling more exports to obtain the imports needed in such an expansion. Any extension of annual leave would result in additional costs which would adversely affect export earnings.

He also referred to the position of the balance of international payments and pointed out that this was the third successive year in which reserves had fallen, and that this fall would continue in the current year. Terms of trade had become progressively adverse over the previous ten years, and although they showed some improvement in 1959-60, the adverse trend was resumed in the first quarter of 1960-61.

Material from the International Labour Office was presented, showing the position in all industrial countries as far as yearly hours of work were concerned. The normal hours for an employee under the Metal Trades Award were 1,928 as compared with 1,984 in the United States of America and 2,152 in the United Kingdom. With regard to annual leave, most industrial countries had two weeks or less; the only relevant countries having more were the Scandinavian countries and France.

The Commission stated that, against the background of the attitudes and submissions discussed, its decision was that the application should be rejected. It repeated its belief that the existing amount of leisure was not at a maximum, but it also believed that the time was not appropriate for an increase in paid annual leave.

The Commission considered that Gross National Product was not suitable as a measure of productivity as it is itself increased by wage increases. It was inappropriate to use, as a basis to increase wages, figures which were themselves increased by the very decision made.

Two economic factors considered most significant were the export-import position and the state of employment. Imports were at a higher level than for some time and export earnings appeared to be decreasing. The wool industry was a major factor in the exports position, and in the light of increasing imports, the combination of lower prices for, and lower production of, wool presented Australia with a difficult problem. The industry was suffering a price-cost squeeze which the Commission hesitated to aggravate. While it appreciated

that an increase in holidays would not of itself increase prices, experience showed that, even if the application were granted for secondary industries alone, at least some of the resultant increased costs would be passed on in increased prices. In addition, international reserves were likely to fall some £200 million and this emphasized the need for increased production making more difficult a decision to increase leisure.

At a time when there was a shortage of skilled labour and such extensive use of overtime, it appeared wrong to attempt to increase periods of paid leisure for those employed under Federal awards. The ideal background to the granting of additional paid leave would be that there was enough labour to go round. It appeared that an attempt to increase holidays by 50 per cent. would result in a situation in which it was agreed that production should be maintained or increased, not in increased leisure, but only in increased overtime and thus increased total pay envelopes. It was not the function of the Commission to grant an application for increased leisure when it considered that it would accomplish no such purpose but would merely provide additional pay.

In conclusion the Commission stated:—"We accordingly dismiss this application because of the present economic situation. In doing so we would again repeat what we have said earlier in this judgment that we do not consider that employees under Federal awards have yet achieved all the leisure which they should achieve. We have done no more than decide that the present is not an appropriate time in which to award an extra week's paid leave."\*

The Commission emphasized that its decision to dismiss the application was not intended to apply to a situation where, for special reasons related to a particular award or industry, it may consider an amount of annual leave greater than two weeks to be justified.

**3. Three Weeks' Annual Leave Inquiry, 1962.**—On 10th April, 1962, the Commonwealth Conciliation and Arbitration Commission, constituted by Kirby C.J. (President), Moore J. (Deputy President) and D. G. Apsey (Commissioner) commenced hearing an application by unions respondent to the Metal Trades Award for variation of the award to provide three weeks' paid annual leave instead of two weeks.

Although the application was made in respect of the Metal Trades Award only, counsel for the unions made it clear that they wished the claim to be regarded as a test case which, if granted, would involve the inclusion in federal awards generally of the basic standard of three weeks' annual leave. The application was opposed by employers, the State of Victoria and the Electricity Trust of South Australia. New South Wales and Tasmania supported the application. The Commonwealth Government and the State of Queensland neither supported nor opposed the application, although the Commonwealth intervened in the public interest and made submissions on the state of the economy, as well as providing economic and statistical information for the benefit of the Commission and the parties.

The hearing was concluded on 2nd May, 1962, and on 30th May the Commission made the following announcement.

"We have given careful consideration to the submissions which have been made to us in this case. The applicant unions have asked that we consider the claim a general one, the result to be applied to Federal awards generally. This must result in greater caution on our part in deciding whether or not the application should succeed. Our present intention is that an increase to three weeks' annual leave generally in secondary industry, subject to special cases, should be granted as soon as we are satisfied that the economy is in a position to cope with the effects of such an increase. However, there are two aspects of the economic arguments about which we are troubled and about which we consider it too early to make any firm decision. These are, firstly, whether our internal economy has sufficiently recovered from the recession of late 1961 and, if so, what is the likely rate of its recovery in the future and, secondly, the effect on Australia of success or failure of the application of the United Kingdom to enter the European Common Market. There have been developments in relation to the latter question since the hearing which both emphasise its importance and the lack of accurate information as to what is going to happen and the short and long term effect on Australia's economy.

So that we may be able better to assess these matters we have decided to adjourn these proceedings until a date in February or March next which will be announced later when the parties and interveners will be able to make such further submissions on these two matters as they may desire."

A brief summary of the case is given in the following paragraphs.

Counsel for the unions submitted that about half of the Australian work force was already entitled to three weeks' leave or more, and that the Commission was being asked to settle a genuine industrial dispute arising from the disparity between the leave granted to different sections of the work force. He referred to the judgment in the 1960 Annual Leave Inquiry, in which the Commission had stated that its decision to refuse the application had been influenced by the export-import position and the state of employment, and submitted that there had been sufficient improvement in these two factors to justify the granting of the application, particularly as the Commission had in the 1960 case conceded that two weeks should not be regarded as the ultimate in paid annual leave.

Counsel then submitted evidence to show that three weeks' annual leave, which had been granted by legislation in New South Wales in 1958, had not had any adverse effects on the economy of that State. Also, in the 17 years since 1945, when annual leave was extended to two weeks, the national economy had developed in a way which would permit the granting of an extra week's leave with much more safety than had been possible in 1945, at the end of the war.

Counsel for the employers, in opposing the application, said that since the previous rejection of the unions' claim in 1960, Australia had undergone a major recession. No new arguments had been advanced by the unions in support of their claim and it should therefore again be rejected. Counsel submitted that even on the grounds of social justice the claim should be rejected because Australian workers enjoyed shorter annual hours of work than those of any other country in the world. In addition, an examination of the relation of average weekly earnings to productivity showed that they had already received the fruits of all productivity increases.

The balance of payments situation, though improved, had been achieved only through drastic government action and in fact looked satisfactory only in comparison with that of the previous year. As to employment, there was still a shortage of skilled labour, which would be aggravated by the granting of increased leave.

He submitted that the claim should not be treated as a test case, because it was being argued not only on general economic issues but also in relation to specific problems in the metal trades. No party to any other award should be inhibited in any way from arguing the particular circumstances of other industries.

**4. Three Weeks' Annual Leave Inquiry, 1963.**—A summary of the judgment delivered by the Commonwealth Conciliation and Arbitration Commission will be found in the Appendix.

**5. Long Service Leave.**—(i) *General.* Paid long service leave, i.e. leave granted to workers who remain with the one employer over an extended period of time, has been included in the provisions of industrial legislation in the several States. A brief summary is given in the following paragraphs. In all cases the transfer of ownership of a business does not constitute a break in continuity of service with the same employer.

(ii) *New South Wales.* Long service leave was first introduced for the majority of workers by the *Industrial Arbitration Act, 1951*, which provided such leave for workers under State awards. This Act was replaced by the *Long Service Leave Act, 1955*, which extended the benefits to any worker within the State. An amendment to the Act in 1963 provided for three months' long service leave for fifteen years' continuous service with the same employer.

(iii) *Victoria.* The *Factories and Shops (Long Service Leave) Act* 1953 first provided for long service leave for workers in Victoria, the provisions of this Act being subsequently incorporated in the *Labour and Industry Act*. Leave provided for is thirteen weeks for twenty years' continuous service with the same employer. Contributions by employers to retirement schemes can be taken into consideration in dealing with exemptions from the Act.

(iv) *Queensland.* In 1952, the *Industrial Conciliation and Arbitration Act* was amended to include long service leave provisions for employees within the jurisdiction of the Industrial Court, and the Act was amended again in 1955 to extend these provisions to any employee in respect of whose employment there was not in force an award or industrial agreement under the Act and to seasonal workers in sugar mills and meat works. Leave provided for is thirteen weeks for twenty years' continuous service with the same employer.

(v) *South Australia.* The *Long Service Leave Act*, which was passed in 1957, exempts a large number of industrial agreements, with wide industrial coverage, specifying long service leave for employees. For those covered by the Act, leave provided for is seven days in the eighth and in each subsequent year of continuous service. Contributions by employers to retirement schemes can be taken into consideration in dealing with exemptions under the Act.

(vi) *Western Australia.* The *Long Service Leave Act* was passed in 1958, but it does not apply to employees whose conditions of work are regulated under the *Western Australian Industrial Arbitration Act*. The Court of Arbitration of Western Australia, in an order dated 1st April, 1958, incorporated in most of the awards and agreements within its jurisdiction provisions similar to those in the *Long Service Leave Act*. Leave provided for is thirteen weeks for twenty years' continuous service with the same employer. Contributions by employers to retirement schemes can be taken into consideration in dealing with exemptions from the Act.

A general inquiry into long service leave, public holidays, annual leave and hours was held by the Court in 1961. In its judgment, delivered on 5th May, 1961,\* it disallowed the major claims by the parties relating to long service leave, but deleted sub-clause (4.) of paragraph (f) of the 1958 Order. (Sub-clause (4.) entitled an employer to offset any payment in respect of long service leave under the Order against any payment by him to any long service leave scheme, superannuation scheme, pension scheme, retiring allowance scheme, provident fund or the like or under any combination thereof operative at 1st April, 1958.)

The Court rejected claims by employers that (a) an employee who illegally severed his contract of employment should forfeit his right to *pro rata* leave, (b) voluntary retirement by an employee should never be deemed to be a pressing necessity (the Act provides that an employee with at least 10 years' but less than 15 years' continuous service who terminates his employment on account of domestic or other pressing necessity may be entitled to *pro rata* long service leave), and that (c) the conditions under which an employer may obtain exemption from the long service leave provisions should be extended.

The Court also rejected claims by trade unions that (a) any period during which the service of the worker was interrupted by service under the *National Security (Manpower) Act* or the *Re-establishment and Employment Act* should be counted as service, (b) any termination of employment should not break the continuity of service if the employer re-engaged the worker within 14 days, (c) the qualifying period for *pro rata* leave should be reduced, (d) a worker with at least ten years' service who retired on account of reaching the age of 65 years or over should be entitled to *pro rata* leave, and that (e) annual leave and public holidays falling during the period of a worker's long service leave should be excluded from the period of that long service leave.

(vii) *Tasmania.* The *Long Service Leave Act*, which was passed in 1956, provides for thirteen weeks leave for twenty years' continuous service with the same employer. Contributions by employers to retirement schemes can be taken into consideration in dealing with exemptions from the Act. Provisions for long service leave for casual waterside workers are contained in the *Stevedoring Industry Long Service Leave Act* 1960. This Act has been superseded by the (Commonwealth) *Stevedoring Industry Act* 1961 (see below).

\* *Western Australia Industrial Gazette*, Vol. 41, p. 355.

(viii) *Commonwealth*. The applicability of long service leave provisions under State law to workers under federal awards has been tested before the High Court and the Privy Council and such provisions have been held to be valid.

The Commonwealth Conciliation and Arbitration Commission may include provisions for long service leave in its awards, and, if it does so, they will take precedence over State law in accordance with the terms of such provisions expressed in individual awards. However, the Commission has generally declined to include such provisions, except in the Northern Territory and Australian Capital Territory (*see below*). The Commission's position was set out in its decision, issued on 16th September, 1959, regarding disputes on the inclusion, in the Graphic Arts (Interim) Award 1957, of provisions for long service leave. It stated that it should refrain, until further order, from determining the disputes so far as they concerned long service leave, and that if, in future, the Commission decided that long service leave on a national basis was desirable, it was open to proceed to the making of an award on the matter.

Long service leave codes for employees in the Northern Territory and the Australian Capital Territory were prescribed on 4th December, 1961, by the Commonwealth Conciliation and Arbitration Commission in Presidential Session. The unions submitted that the Commission should refrain from exercising its jurisdiction and emphasized that it was the considered policy of the trade union movement "that long service leave should come from legislative action and not from prescription by industrial authorities." However, the Commission rejected the submission and awarded leave in each case in terms of the employers' applications, which were, in general, that employees should be granted three months' long service leave after 20 years service with one employer, even if part of this service was outside the Territory. In addition, the Australian Capital Territory code prescribed that employees presently employed might "go back for a period of 25 years in regard to the calculation of their present or future entitlement of long service leave."

The *Stevedoring Industry Act* 1961, which came into operation on 6th June, 1961, included provisions granting long service leave to persons who had been continuously registered as waterside workers under Commonwealth stevedoring legislation. Leave provided for is thirteen weeks after the completion of twenty years' qualifying service, and six and a half weeks for each subsequent ten years' qualifying service.

## EMPLOYMENT AND UNEMPLOYMENT

### § 1. Employment

1. **General.**—In previous issues of the Official Year Book tables were published showing particulars of total occupied persons in each State and Territory and in rural and non-rural industry at various Population Census dates. Although the figures were derived from census results, they differed, because of certain adjustments, from recorded census figures.

Information necessary to enable corresponding particulars of total occupied persons to be calculated for June, 1961, is not yet available, and the tables have therefore been omitted from this issue. However, recorded Census figures for June, 1961, are being issued in a series of mimeographed and printed publications which show, for each State and Territory, particulars of the industry and occupational status of persons in the work force. This information is given in summarized form in Chapter IX. Population, of this Year Book.

2. **Wage and Salary Earners in Civilian Employment.**—Monthly estimates of the number of wage and salary earners in civilian employment (excluding employees in rural industry and private domestics) are obtained from three main sources, namely, (a) monthly data as to persons employed in factories as shown at annual Factory Censuses; (b) current monthly returns from government bodies; and (c) current Pay-roll Tax returns (generally monthly). There are also some other direct records of monthly employment (e.g. for hospitals). Data from these sources are supplemented by estimates of the number of wage and salary earners not covered by the foregoing collections.

The estimates of wage and salary earners are compiled on an establishment or enterprise basis, and therefore do not cover exactly the same area of industry as do the relevant industry tabulations of general Population Censuses, which are based on the returns of individual employees. However, results of the 1961 Census that are at present available indicate that revision of the employment estimates is necessary. The programme of revision had not been completed when this chapter was sent for press, and the tables showing wage and salary earners in civilian employment that were previously included in this section have therefore been omitted. Revised figures will be found in the Appendix.

## § 2. Unemployment

The total number of persons "unemployed" has been recorded only at the dates of the various Censuses. At Censuses prior to 1947, persons who were "unemployed" were requested to furnish particulars of the cause and duration of unemployment, but from 1947 onwards the inquiry was broadened to include all persons (usually engaged in industry, business, trade, profession or service) who were out of a job and "not at work" at the time of the Census for whatever reason, including any not normally associated with unemployment. The category "not at work" includes those who stated that they were usually engaged in work, but were not actively seeking a job at the time of the Census by reason of sickness, accident, etc., or because they were on strike, changing jobs or temporarily laid off, etc. It includes also persons able and willing to work but unable to secure employment, as well as casual and seasonal workers not actually in a job at the time of the Census. The numbers shown as "not at work", therefore, do not represent the number of unemployed available for work and unable to obtain it.

### CAUSES OF UNEMPLOYMENT: AUSTRALIA, CENSUSES, 1933 TO 1961

Year	Unable to secure employment	Temporarily laid off	Illness	Accident	Industrial dispute	Other	Total
------	-----------------------------	----------------------	---------	----------	--------------------	-------	-------

#### MALES

1933..	374,569	(a)	18,083	4,702	1,595	6,483	405,432
1947(b)	17,314	12,458	14,639	2,985	475	(c) 18,743	66,614
1954(b)	9,912	4,423	11,879	2,804	344	(c) 11,652	41,014
1961(b)	85,448	12,162	13,931	6,262	547	(c) 10,280	128,630

#### FEMALES

1933..	62,630	(a)	9,193	434	95	3,465	75,817

1954(b)	3,685	1,386	4,310	318	17	(c) 4,284	14,000
1961(b)	28,054	4,009	5,928	793	202	(c) 4,991	43,977

#### PERSONS

1933..	437,199	(a)	27,276	5,136	1,690	9,948	481,249
1947(b)	19,568	14,907	19,035	3,265	499	(c) 26,255	83,529
1954(b)	13,597	5,809	16,189	3,122	361	(c) 15,936	55,014
1961(b)	113,502	16,171	19,859	7,055	749	(c) 15,271	172,607

(a) Not available. (b) Persons in the work force who were "not at work" (see explanation above) at the time of the Census. (c) The majority of these persons were resting between jobs or changing jobs.

Details of the number of persons receiving unemployment and sickness benefits and the payments made are shown in Chapter XV, Welfare Services. Current figures are included in the *Monthly Bulletin of Employment Statistics*, *Quarterly Summary of Australian Statistics*, *Monthly Review of Business Statistics* and *Digest of Current Economic Statistics*.

### § 3. Commonwealth Employment Service

Statutory warrant for the Commonwealth Employment Service (C.E.S.) is to be found in the *Re-establishment and Employment Act 1945-1959* (sections 47 and 48). In brief, the main functions of the Service are to assist people seeking employment to obtain positions best suited to their training, experience, abilities and qualifications; and to assist employers seeking labour to obtain employees best suited to the demands of the employers' particular class of work.

The organization and functions of the C.E.S. conform to the provisions of the Employment Service Convention 1948 of the International Labour Organization, which was ratified by Australia in December, 1949. In addition, C.E.S. practices follow substantially the provisions of the I.L.O. Employment Service Recommendation, 1948.

The C.E.S. functions within the Employment Division of the Department of Labour and National Service on a decentralized basis. The Central Office is in Melbourne and there is a Regional Office in the capital city of each State, with 142 District Employment Offices and Branch Offices in suburban and the larger provincial centres and 339 agents in the smaller country centres. The District Employment Offices and Branch Offices are distributed as follows: New South Wales, 55; Victoria, 37; Queensland, 21; South Australia, 11; Western Australia, 12; Tasmania, 4; Northern Territory, 1; Australian Capital Territory, 1.

The C.E.S. provides specialized facilities for young people, persons with physical and mental handicaps, ex-members of the defence forces, migrants, rural workers and persons with professional and technical qualifications. Vocational guidance is provided free of charge by a staff of qualified psychologists. It is available to any person, but is provided particularly for young people, ex-servicemen and the physically handicapped. In New South Wales, the State Department of Labour and Industry provides this service, mainly to young people leaving school.

The C.E.S. has responsibilities in the administration of the unemployment benefits provided under the *Social Services Act 1947-1962*. All applicants for benefits must register at a District Employment Office or agency of the C.E.S., which is responsible for certifying whether or not suitable employment can be offered to them.

The C.E.S. is responsible for placing in employment migrant workers sponsored by the Commonwealth under the Commonwealth Nomination and similar schemes. This includes arranging for them to move to their initial employment and for their admission, if necessary, to Commonwealth migrant hostels. Assistance to obtain employment is provided to other migrants as required. From the inception of the various free and assisted schemes, including the Displaced Persons Scheme, to the end of December, 1962, about 216,000 British and European migrant workers had been placed in initial employment by the C.E.S. Since 1951, it has been responsible for recruiting Australian experts for overseas service under the Colombo Plan and the United Nations Expanded Programme of Technical Assistance. The principal spheres in which experts have been supplied are agriculture, education, engineering, geology, health, and economic and scientific research and development.

In association with placement activities, regular surveys of the labour market are carried out, and detailed information is supplied to interested Commonwealth and State Government Departments and instrumentalities and to the public. Employers, employees and other interested persons are advised on labour availability and employment opportunities in various occupations and areas and on other matters concerning employment.

The service completed its sixteenth year of operation in May, 1962. During the year ended 31st December, 1962, there were 913,400 applicants who registered for employment, of whom 613,378 were referred to employers and 397,089 placed in employment. New vacancies notified numbered 549,624 and vacancies unfilled at the end of December, 1962, 32,184.

Prior to the setting up of the Commonwealth Employment Service, State Labour Exchange Organizations existed in several States, but they have been superseded. Details of the organization and administration of these exchanges were given in *Labour Report* No. 30, page 133.

#### § 4. Industrial Disputes

1. **General.**—Detailed information regarding industrial disputes involving stoppage of work is given in the *Labour Report*. A table showing statistics of industrial disputes for each year from 1913 is contained in the Appendix to *Labour Report* No. 49, 1961.

Particulars of all disputes in progress during the year are included in the annual figures whether the dispute commenced in that year or was in progress at the beginning of the year. Consequently, details of "the number of disputes" and "workers involved" in disputes which commenced in any year and were still in progress during the following year are included in the figures for both years.

2. **Industrial Groups.**—The following table gives, for Australia as a whole, particulars of industrial disputes which were in progress during 1962, classified according to industrial groups. As from 1959, the industrial groups were rearranged to conform, as nearly as may be, to the order adopted in other tables in this chapter. However, the figures for each industrial group shown are comparable with those published in issues of the Official Year Book prior to No. 47, 1961.

INDUSTRIAL DISPUTES(a): INDUSTRIAL GROUPS, AUSTRALIA, 1962

Industrial group	Number	Workers involved			Working days lost	Estimated loss in wages (£'000)
		Directly	Indirectly (b)	Total		
Agriculture, grazing, etc. .. ..	1	16	87	103	569	1.7
Coal mining .. ..	299	38,231	31	38,262	43,739	187.7
Other mining and quarrying .. ..	5	2,091	..	2,091	2,796	13.8
Engineering, metals, vehicles, etc. ..	250	42,614	11,332	53,946	108,971	451.3
Textiles, clothing and footwear .. ..	..	..	..	..	..	..
Food, drink and tobacco .. ..	149	45,490	8,967	54,457	101,487	391.9
Sawmilling, furniture, etc. .. ..	..	..	..	..	..	..
Paper, printing, etc. .. ..	6	1,966	..	1,966	13,639	54.7
Other manufacturing .. ..	93	19,853	1,972	21,825	69,521	302.0
Building and construction .. ..	135	27,221	507	27,728	49,376	223.3
Railway and tramway services .. ..	12	9,176	71	9,247	8,947	32.5
Road and air transport .. ..	30	20,192	55	20,247	18,625	78.2
Shipping .. ..	3	181	..	181	720	3.0
Stevedoring .. ..	180	121,245	..	121,245	86,571	367.9
Amusement, hotels, personal service, etc. ..	8	701	8	709	1,075	3.4
Other industries(c) .. ..	12	1,846	..	1,846	2,719	10.7
<b>Total .. ..</b>	<b>1,183</b>	<b>330,823</b>	<b>23,030</b>	<b>353,853</b>	<b>508,755</b>	<b>2,122.1</b>

(a) Refers only to disputes involving a stoppage of work of 10 man-days or more. (b) Persons thrown out of work at the establishments where the stoppages occurred but not themselves parties to the dispute. (c) Includes Communication; Finance and Property; Wholesale and Retail Trade; Public Authority (n.e.i.); and Community and Business Services.

A graph showing, for the years 1953 to 1962, the working days lost as a result of industrial disputes in the main industrial groups is shown on page 467.

3. **States and Territories.**—The following table gives particulars of the number of industrial disputes in each State and Territory, together with the number of workers involved and the losses in working days and wages caused by disputes which were current during each of the years 1958 to 1962.

INDUSTRIAL DISPUTES(a): STATES AND TERRITORIES

State or Territory	Year	Number	Workers involved			Working days lost	Estimated loss in wages (£'000)
			Directly	Indirectly (b)	Total		
New South Wales ...	1958	624	137,922	3,906	141,828	231,537	832.7
	1959	547	123,558	2,493	126,051	211,352	819.6
	1960	736	289,266	7,646	296,912	416,762	1,731.9
	1961	529	131,661	5,295	136,956	318,629	1,316.0

	1962	7	4,005	105	4,110	3,608	15.0
Australia ...	1958	987	275,573	7,276	282,849	439,890	1,590.6
	1959	869	229,469	8,002	237,471	365,039	1,377.2
	1960	1,145	592,053	11,226	603,279	725,107	2,926.8
	1961	815	288,526	11,831	300,357	606,811	2,723.8
	1962	1,183	330,823	23,030	353,853	508,755	2,122.1

(a) Refers only to disputes involving a stoppage of work of 10 man-days or more. (b) Persons thrown out of work at the establishments where the stoppages occurred but not themselves parties to the dispute.

4. **Duration.**—(i) *General.* The duration of each industrial dispute involving a loss of work, i.e. the time between the cessation and resumption of work, has been calculated in working days, exclusive of Saturdays, Sundays and holidays, except where the establishment involved carries on a continuous process (e.g. metal smelting and cement manufacture).

(ii) *Industrial Groups, 1962.* The following table shows, for the year 1962, industrial disputes in coal mining, stevedoring and other industries classified according to duration.

## DURATION OF INDUSTRIAL DISPUTES(a): AUSTRALIA, 1962

Duration(b)	Number	Workers involved		Working days lost		Estimated loss in wages (£'000)
		Number	Proportion of total (per cent.)	Number	Proportion of total (per cent.)	
COAL MINING						
1 day and less .. ..	221	28,660	74.9	18,178	41.5	77.7
2 days and more than 1 day ..	41	5,333	13.9	8,833	20.2	37.2
3 days and more than 2 days ..	14	1,579	4.1	4,194	9.6	17.3
Over 3 days and less than 1 week	16	1,818	4.8	7,261	16.6	33.4
1 week and less than 2 weeks ..	7	872	2.3	5,273	12.1	22.1
2 weeks and less than 4 weeks ..	..	..	..	..	..	..
4 weeks and less than 8 weeks ..	..	..	..	..	..	..
8 weeks and over .. ..	..	..	..	..	..	..
Total .. ..	299	38,262	100.0	43,739	100.0	187.7
STEVEDORING						
1 day and less .. ..	153	105,802	87.3	61,138	70.6	259.8
2 days and more than 1 day ..	19	12,380	10.2	15,611	18.0	66.3
3 days and more than 2 days ..	6	905	0.7	2,219	2.6	9.5
Over 3 days and less than 1 week	2	2,158	1.8	7,603	8.8	32.3

2 weeks and less than 4 weeks ..	..	..	..	..	..	..
4 weeks and less than 8 weeks ..	..	..	..	..	..	..
8 weeks and over .. ..	..	..	..	..	..	..
Total .. ..	180	121,245	100.0	86,571	100.0	367.9
OTHER INDUSTRIES						
1 day and less .. ..	315	113,924	58.6	88,445	23.4	355.8
2 days and more than 1 day ..	141	36,016	18.5	55,217	14.6	215.6
3 days and more than 2 days ..	78	17,702	9.1	48,780	12.9	194.9
Over 3 days and less than 1 week	57	6,262	3.2	24,940	6.6	103.9
1 week and less than 2 weeks ..	82	16,552	8.5	107,227	28.3	470.1
2 weeks and less than 4 weeks ..	26	3,734	1.9	49,871	13.2	207.3
4 weeks and less than 8 weeks ..	4	143	0.1	3,276	0.8	15.3
8 weeks and over .. ..	1	13	0.1	689	0.2	3.6
Total .. ..	704	194,346	100.0	378,445	100.0	1,566.5
ALL INDUSTRIES						
1 day and less .. ..	689	248,386	70.2	167,761	33.0	693.3
2 days and more than 1 day ..	201	53,729	15.2	79,661	15.7	319.1
3 days and more than 2 days ..	98	20,186	5.7	55,193	10.9	221.7
Over 3 days and less than 1 week	75	10,238	2.9	39,804	7.8	169.6
1 week and less than 2 weeks ..	89	17,424	4.9	112,500	22.1	492.2
2 weeks and less than 4 weeks ..	26	3,734	1.1	49,871	9.8	207.3
4 weeks and less than 8 weeks ..	4	143	..	3,276	0.6	15.3
8 weeks and over .. ..	1	13	..	689	0.1	3.6
Grand Total .. ..	1,183	353,853	100.0	508,755	100.0	2,122.1

(a) Refers only to disputes involving a stoppage of work of 10 man-days or more.

(b) One week equals five working days.

5. Causes.—(i) *General.* In issues of the Official Year Book prior to No. 40, the causes of industrial disputes were classified in some detail for all industries combined. As from 1950, however, stoppages have been analysed in three separate groups, "Coal Mining", "Stevedoring" and "Other Industries".

Causes have been grouped under four main headings:—(1) Wages, Hours and Leave; (2) Physical Working Conditions and Managerial Policy; (3) Trade Unionism; (4) Other Causes. The first group is restricted to disputes involving general principles relating to wages, hours and leave; minor questions regarding the claims to pay or leave by individual employees are included under managerial policy. The second group comprises disputes regarding physical working conditions and general questions of managerial policy, which term covers disciplinary action, the promotion of employees, the employment of particular individuals, personal disagreements between employees and supervisory staff and disputes arising from the computation of wages, leave, etc., in individual cases. The third group includes stoppages over employment of non-unionists, inter-union and intra-union disputes, disputes over recognition of union activities, and sympathy stoppages in support of employees

in another industry. The last group comprises disputes by way of protest against situations not arising from the usual relationship of employer and employee, e.g. political matters, and cases (occurring mainly in the coal mining industry) where the cause of the stoppage is not officially made known to the management.

(ii) *Industry Groups.* The following table shows particulars of industrial disputes for 1962 classified according to cause in three industry groups.

#### CAUSES OF INDUSTRIAL DISPUTES(a): AUSTRALIA, 1962

Cause of dispute	Coal mining	Stevedoring	Other industries	All industries
NUMBER OF DISPUTES				
Wages, hours and leave .. .. .	12	19	259	290
Physical working conditions and managerial policy ..	183	144	380	707

(b) Includes workers indirectly involved. See note (b) to table on p. 520.

## WORKERS' COMPENSATION LEGISLATION

A conspectus of the principal provisions of Workers' Compensation Acts in force in Australia at 31st December, 1961, will be found in *Labour Report* No. 49, pages 176-83.

## LABOUR ORGANIZATIONS

## § 1. Labour Organizations in Australia

1. **General.**—The figures shown in this section are prepared from a special collection of membership of labour organizations at 31st December each year. The affairs of single unions are not disclosed in the published results and this has assisted in securing complete information. The Bureau is indebted to the secretaries of trade unions for their co-operation in supplying information.

2. **Organizations Registered under the (Commonwealth) Conciliation and Arbitration Act.**—Under Part VIII. of the *Conciliation and Arbitration Act* 1904–1961, any association of employers in any industry which has, or any employer who has, employed, on an average taken per month, not less than 100 employees during the six months preceding application for registration, or any association of not less than 100 employees in any industry, may be registered. However, under the *Public Service Arbitration Act*, an association of less than 100 employees may be registered as an organization, provided that its members comprise at least three-fifths of all persons engaged in that industry in the Service. Such organizations are included in the figures shown below. Registered unions include both interstate associations and associations operating within one State only. Registration under Commonwealth legislation began in 1906. At the end of 1962, the number of employers' organizations registered under the provision of the *Conciliation and Arbitration Act* was 64. The number of unions of employees registered at the end of 1962 was 155, with a membership of 1,622,322 representing 83 per cent. of the total membership of all trade unions in Australia.

3. **Particulars regarding Trade Unions.**—(i) *Types.* The trade unions in Australia are very diverse in character, and range from the small independent association to the large interstate organization, which, in its turn, may be a branch of an international body. Broadly speaking, there are four distinct classes of labour organizations:—(a) the local independent; (b) the State; (c) the interstate; and (d) the Australasian or international; but a number of variations occur from each of these classes. The schemes of organization of interstate or federated unions vary greatly in character. In some unions, the State organizations are bound together under a system of unification with centralized control, while in others the State units are practically independent and self-governing, the federal bond being loose and existing only for one or two specified purposes.

(ii) *Number and Membership.* Returns showing membership by States as at 31st December each year are obtained for all trade unions and employee organizations. The following table shows the position at the end of each of the years 1960 to 1962.

TRADE UNIONS: NUMBER AND MEMBERSHIP

State or Territory	Number of separate unions			Number of members			Percentage increase in membership(b)		
	1960	1961	1962	1960	1961	1962	1960	1961	1962
New South Wales ..	231	226	222	768,458	743,581	765,245	3.6	-3.2	2.9
Victoria ..	157	156	155	479,244	486,760	498,018	3.9	1.6	2.3
Queensland ..	133	133	135	327,416	329,746	333,999	1.6	0.7	1.3
South Australia ..	136	134	133	153,468	151,488	160,390	4.3	-1.3	5.9

Australian Capital Territory ..	31	34	38	8,768	8,251	10,940	18.9	-5.9	32.6
Australia ..	(a)363	(a)355	(a)347	1,912,392	1,894,603	1,950,484	3.3	-0.9	2.9

(a) Without interstate duplication. See below. (b) On preceding year.

NOTE.—Minus sign (—) denotes decrease.

In the preceding table, under the heading "Number of Separate Unions", a union reporting members in a State is counted as one union within that State. The figures by States do not add to the Australian total (shown in the last line) because a union represented in more than one State is included in the figure for each State in which it is represented, but is counted only once in the Australian total.

A table showing the number and membership of trade unions in Australia for the years 1912 to 1961 will be found in the Appendix to *Labour Report* No. 49.

(iii) *Classification in Industrial Groups.* The following table shows the number of unions and members thereof in Australia at the end of each of the years 1960 to 1962.

The industrial groups have been rearranged to conform, as nearly as may be, to the order adopted in other tables in this chapter. However, the figures for each industrial group shown are comparable with those published in previous issues.

#### TRADE UNIONS: INDUSTRIAL GROUPS, AUSTRALIA

Industrial Group	1960		1961		1962	
	No. of unions (a)	No. of members	No. of unions (a)	No. of members	No. of unions (a)	No. of members

<b>Total</b> .. ..	<b>363</b>	<b>1,912,392</b>	<b>355</b>	<b>1,894,603</b>	<b>347</b>	<b>1,950,484</b>

(a) Without interstate duplication. See para. (ii) above.  
municipal, etc.

(c) Includes Community and business services.

(b) Includes communication,

(iv) *Number of Members and Proportion of Wage and Salary Earners.* The following table shows the estimated percentages of wage and salary earners in employment who are members of trade unions. As current estimates of wage and salary earners in employment do not include employees engaged in rural industry or females in private domestic service, the percentages have been calculated on figures obtained by adding to the end of year estimates the number of employees in rural industry and females in private domestic service recorded at the Census of 30th June, 1954. For this reason, and also because the membership of trade unions includes some persons not in employment, the percentages shown in the table must be regarded as approximations. The estimates of employment are subject to revision pending detailed results of the 1961 Population Census.

#### TRADE UNIONS: NUMBER OF MEMBERS AND PROPORTION OF TOTAL WAGE AND SALARY EARNERS, AUSTRALIA

Year	Number of members			Proportion of total wage and salary earners (Per cent.)		
	Males	Females	Persons	Males	Females	Persons
1958 .. ..	1,465,682	345,536	1,811,218	65	41	58
1959 .. ..	1,494,669	356,058	1,850,727	65	41	58
1960 .. ..	1,534,423	377,969	1,912,392	65	41	58
1961 .. ..	1,521,900	372,703	1,894,603	66	41	59
1962 .. ..	1,561,854	388,630	1,950,484	66	42	59

(v) *Interstate or Federated Trade Unions.* The following table gives particulars of the number and membership of interstate or federated trade unions in 1962.

**INTERSTATE OR FEDERATED TRADE UNIONS(a): AUSTRALIA, 1962**

Particulars	Unions operating in—					Total
	2 States	3 States	4 States	5 States	6 States	
Number of unions ..	12	8	21	32	67	140
„ „ members ..	29,962	63,549	184,201	371,650	1,092,541	1,741,903

(a) Certain unions in this group have, in addition to branches in the States, branches in the Northern Territory and/or in the Australian Capital Territory.

4. **Central Labour Organizations.**—Delegate organizations, consisting of representatives from a group of trade unions, have been established in each of the capital cities and in a number of industrial centres elsewhere. Their revenue is raised by means of a *per capita* tax on the members of each affiliated union. In most of the towns where such central organizations exist, the majority of the local unions are affiliated with the central organization, which is usually known as the Labour or the Trades Hall Council. In Western Australia, a unified system of organization extends over the industrial centres throughout the State. In this State, there is a provincial branch of the Australian Labor Party, having a central council and executive, and metropolitan and branch district councils, with which the local bodies are affiliated. The central council, on which all district councils are represented, meets periodically. In the other five States, however, the organization is not so close, and, while provision usually exists in the rules of the central council at the capital city of each State for the organization of district councils or for the representation of the central council on the local councils in the smaller industrial centres of the State, the councils in each State are generally independent bodies.

The table below shows the number of metropolitan and district or local labour councils, together with the number of unions and branches of unions affiliated therewith in each State and Territory at the end of 1962.

**CENTRAL LABOUR ORGANIZATIONS: NUMBER, AND UNIONS AND BRANCH UNIONS AFFILIATED, 1962**

Particulars	N.S.W.	Vic.	Q'land	S.A.	W.A.	Tas.	N.T.	A.C.T.	Total
Number of councils ..	12	9	12	5	10	5	..	1	54
Number of unions and branch unions affiliated	336	282	176	148	413	123	..	21	1,499

The figures given in the preceding table concerning the number of unions do not necessarily represent separate unions, since the branches of a large union may be affiliated with the local trades councils in the several towns in which they are represented.

A Central Labour Organization, now called the Australian Council of Trade Unions, came into being during 1927. The Council was created to function on behalf of the trade unions of Australia, and was founded at an All-Australian Trade Union Congress held in Melbourne in May, 1927. The A.C.T.U. consists of affiliated unions and affiliated Metropolitan and/or State Labour Councils and Provincial Councils. The Metropolitan or State Labour Council in each State is the State Branch of the A.C.T.U. and has the right to appoint one representative to act on the executive of the Council. In addition to the representatives of the State Branches of the A.C.T.U., six delegates are elected by and from Congress, one

from each of the following industry groups of unions:—Building, Food and Distributive Services, Manufacturing, Metal, Services, Transport. To this executive are added the four officers, namely, President, two Vice-Presidents and Secretary, who are elected by and from the Australian Congress of Trade Unions.

The ordinary meetings of Congress are held in each alternate year. Special meetings of Congress shall be held whenever deemed advisable by decisions of the executive, as approved by the majority of its branches, or by resolution of unions representing one-third of the total membership of the A.C.T.U.

The objectives of the A.C.T.U. are the socialization of industry, i.e. production, distribution and exchange, and the utilization of the resources of Australia for the benefit of the people—ensuring full employment, with rising standards of living, real security and full cultural opportunities for all. The methods to be adopted are:—the closer organization of the workers by the transformation of the Australian trade union movement from the craft to an industrial basis, by grouping of unions in their respective industries and by the amalgamation of unions with a view to the establishment of one union in each industry; the consolidation of the Australian Labour Movement, with the object of unified control, administration and action; the centralized control of industrial disputes; educational propaganda among unions; and political action to secure satisfactory working-class legislation.

The A.C.T.U. was the first interstate body in Australia with authority to deal with industrial matters of an interstate character affecting the trade union movement generally. It is also the body responsible for submitting to the Commonwealth Government the names of persons suitable for selection as the Australian workers' delegate to the annual International Labour Conference.

All the major unions are affiliated with the A.C.T.U., with the exception of the largest, the Australian Workers' Union, which is itself virtually a central organization of branches catering in the main for employees in rural and constructional pursuits.

Between the trade union and the central organization of unions may be classed certain State or district councils organized on trade lines, and composed of delegates from separate unions whose members' interests are closely connected because of their occupations. Delegate councils of bakers, bread carters and mill employees, or of unions connected directly or indirectly with the iron, steel, or brass trades, or with the building trades, may be so classed.

## § 2. International Labour Organization

The International Labour Organization (I.L.O.) was established on 11th April, 1919, as an autonomous institution associated with the League of Nations. Its original constitution was adopted as Part XIII. of the Treaty of Versailles and formed part of other treaties of peace. During the years between its establishment and the outbreak of the 1939–45 War, the I.L.O., with headquarters at Geneva, played a leading role in promoting the improvement of labour conditions throughout the world.

In 1940, in order to ensure that the I.L.O. should be able to continue to function freely, a working centre was established at Montreal, Canada. In 1946, the Organization became the first of the specialized agencies of the United Nations. Under the terms of agreement, the United Nations recognizes the I.L.O. as a specialized agency having responsibility in the field defined by its constitution, which embraces labour conditions, industrial relations, employment organization, social security and other aspects of social policy. The Organization has three basic parts. These are the International Labour Conference, its highest authority, which as a rule meets annually; the Governing Body, its executive council, which usually meets three times each year; and the International Labour Office, which provides the secretariat of the Organization. The Conference is composed of delegations from the Member States of the Organization. At the end of 1962, there were 105 Member States, each of which is entitled to be represented by four delegates—two government, one representing employers and one representing workers, together with their advisers. Each delegate speaks and votes independently, so that all points of view in each country are fully expressed. The Governing Body consists of the representatives of twenty governments

and ten employers' and ten workers' representatives. Of the twenty government representatives, half are from the ten countries of major industrial importance and ten are elected by the remaining governments. These latter ten government representatives and the ten employers' and ten workers' titular delegates and the deputy members of the three groups are elected by their groups at the Conference every three years. Since the 1939-45 War, Australia has alternated as a member and deputy member of the government group, and is at present a deputy member. Particulars are given in *Labour Report* No. 49 of the proceedings of International Labour Conferences up to the 45th Session, held in Geneva in June, 1961. For details of I.L.O. conventions ratified by Australia, see *Labour Report* Nos. 47 to 49.

## CHAPTER XIII

### OVERSEA TRADE

NOTE.—Because of the limitations of space, the statistics in this chapter are in the main restricted to summarized form. For details of imports and exports, reference should be made to the annual bulletins on *Oversea Trade* (preliminary and final), *Australian Exports*, and *Imports Cleared for Home Consumption*. Current information on oversea trade is contained in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics*, the *Monthly Bulletin of Oversea Trade Statistics*, and a preliminary monthly statement on *Australian Oversea Trade—Merchandise*. The *Australian Balance of Payments* (mimeographed statement) contains detailed information on this subject, and there are also the following additional mimeographed statements:—*Exports of Wool* (monthly), *Oversea Trade with Major Groups of Countries* (quarterly), *Trade of Australia with the United Kingdom* (half-yearly) and *Trade of Australia with Eastern Countries* (annually).

#### § 1. Legislation affecting Oversea Trade

1. **Constitutional Powers.**—By the *Commonwealth of Australia Constitution Act*, section 51 (i), the power to make laws with respect to trade and commerce with other countries was conferred on the Commonwealth Parliament. Under section 86 of the Constitution, the collection and control of duties of customs and excise passed to the Executive Government of the Commonwealth on 1st January, 1901. Other references to trade and commerce are contained in sections 87 to 95 of the Constitution (*see pp. 18–19*).

2. **Commonwealth Legislation.**—The principal Commonwealth Acts affecting oversea trade at present in force are: the *Customs Act* 1901–1960; *Customs Tariff* 1933–1962; *Customs Tariff (Canadian Preference)* 1960–1962; *Customs Tariff (New Zealand Preference)* 1933–1962; *Customs Tariff (Papua and New Guinea Preference)* 1936–1959; *Customs Tariff (Federation of Rhodesia and Nyasaland Preference)* 1960–1962; *Customs Tariff (Primage Duties)* 1934–1958; *Customs Tariff (Dumping and Subsidies) Act* 1961; *Trading with the Enemy Act* 1939–1957.

The Customs Act is the administrative Act under which the Department of Customs and Excise operates, while the Customs Tariffs provide the statutory authority for imposing the actual rates of duty operative from time to time.

3. **The Customs Tariff.**—(i) *General.* The first Commonwealth Customs Tariff was introduced by Resolution on 8th October, 1901, from which date uniform duties came into effect throughout Australia. The tariff has since been extensively amended. The Act at present in operation is the *Customs Tariff* 1933–1962.

The Australian Customs Tariff has been developed in conformity with the policy of protecting economic and efficient Australian industries and of granting preferential treatment to certain imports from certain countries of the Commonwealth of Nations. Duties are also imposed on some goods, generally of a luxury nature, for revenue purposes. Customs collections are a major source of revenue, but in its protective character the tariff has an important influence on the Australian economy.

Australia has three classes of tariff—the British Preferential Tariff, the Intermediate Tariff and the General Tariff.

(ii) *British Preference.* British Preferential Tariff rates of duty apply to goods the produce or manufacture of the United Kingdom, provided that such goods comply with the laws and statutory regulations in force at the time affecting the grant of preference,

and that the goods have been shipped in the United Kingdom to Australia and have not been transhipped, or, if transhipped, it is proved to the satisfaction of the Collector of Customs that the intended destination of the goods, when originally shipped from the United Kingdom, was Australia. For the purpose of the preferential tariff, the following goods are deemed by section 151A of the *Customs Act* 1901–1960 to be the produce or manufacture of the United Kingdom, provided the final process of their production or manufacture was performed in that country.

- (a) Goods which are wholly produced or wholly manufactured in the United Kingdom from materials in one or more of the following classes:—
  - (i) Materials wholly produced or wholly manufactured in the United Kingdom or in Australia;
  - (ii) Imported unmanufactured raw materials;
  - (iii) Imported manufactured raw materials as determined by the Minister.
- (b) Goods of the factory or works cost of which not less than 75 per cent. is represented—
  - (i) by labour or material of the United Kingdom; or
  - (ii) by labour or material of the United Kingdom and labour or material of Australia.
- (c) Goods of a class or kind not commercially produced or manufactured in Australia and of the factory or works cost of which not less than 25 per cent. (or 50 per cent. if the Minister so determines) is represented—
  - (i) by labour or material of the United Kingdom; or
  - (ii) by labour or material of the United Kingdom and labour or material of Australia.

The British Preferential Tariff also applies to the Republic of Ireland and, with the exception of a relatively small number of commodities which carry special rates of duty, to Canada, New Zealand (except Cook Islands) and the Territory of Papua and New Guinea, and the abovementioned preference conditions apply *mutatis mutandis* to each of those countries, except that in respect of New Zealand the percentage content of goods under clause (b) of the said conditions is 50 per cent. of New Zealand and Australian labour and materials or 75 per cent. of New Zealand and United Kingdom or of New Zealand, Australian and United Kingdom labour and materials. In relation to certain goods, the British Preferential Tariff also applies to specified countries of the Commonwealth of Nations and most of the British non-self-governing colonies, protectorates and trust territories.

(iii) *Intermediate Tariff.* The Intermediate Tariff has been a feature of the Australian Tariff for a considerable number of years, although its effective application dates only from 1st January, 1937, consequent upon the conclusion of trade agreements with Belgium, Czechoslovakia and France in 1936. The countries to which the Intermediate Tariff applies include those countries with which Australia has concluded trade agreements (including tariff negotiations pursuant to the General Agreement on Tariffs and Trade) and countries which accord Australia reciprocal most-favoured-nation tariff treatment by reason of agreements between those countries and the United Kingdom. The Intermediate Tariff has also been extended to some countries to which Australia has no formal obligation to accord most-favoured-nation treatment. The countries and the particular tariff items to which the Intermediate Tariff applies are specified by order made in pursuance of section 9A of the *Customs Tariff* 1933–1962.

(iv) *General Tariff.* The General Tariff applies to goods other than those to which the British Preferential Tariff or Intermediate Tariff or special rates under trade agreements apply.

4. *Primage Duties.*—In addition to the duties imposed by the Customs Tariff, *ad valorem* primage duties at rates of 4 per cent., 5 per cent. or 10 per cent. are charged on some goods according to the type of goods and origin thereof under the *Customs Tariff (Primage Duties)* 1934–1958. Other goods are exempt from primage duty. Goods the produce or manufacture of New Zealand, Norfolk Island, Fiji, Cocos Islands, Christmas Island and the Territory of Papua and New Guinea are exempt from primage duty.

**5. Tariff Board.**—The *Tariff Board Act* 1921–1962 provides for the appointment of a Tariff Board consisting of eight members. Of these, two must, and three may, be members of the Commonwealth Public Service at the time of their appointment (or first appointments in the case of re-appointments). Members of the Board are appointed for terms of not less than one year and not more than five years. The purpose of the Tariff Board is to advise the government on matters relating to the protection and encouragement of Australian industry.

The Minister of State for Trade is required to refer to the Board for inquiry and report the following matters:—the necessity for new, increased, or reduced duties; the necessity for granting bounties and the effect of existing bounties; and any complaint that a manufacturer is taking undue advantage of the protection afforded him by the Tariff or by the restriction of the importation of any goods by charging unnecessarily high prices for his goods or acting in restraint of trade. In addition, the Minister may refer the following matters to the Tariff Board for inquiry and report:—the general effect of the working of the Customs Tariff and the Excise Tariff; the fiscal and industrial effects of the Customs laws on the Commonwealth; the incidence between the rates of duty on raw materials and on finished or partly finished products; and other matters affecting the encouragement of primary and secondary industries in relation to the Tariff. The Minister of State for Customs and Excise may refer to the Tariff Board for inquiry and report the following matters:—the classification of goods in the Customs Tariff or Excise Tariff and matters in connexion with the interpretation of these Tariffs; the question of the value for duty of goods; whether goods not prescribed in departmental by-laws should be so prescribed; and any matters in respect of which action may be taken under the *Customs Tariff (Dumping and Subsidies) Act* 1961.

Where a matter of the necessity for new or increased duties on any goods has been referred to the Board for inquiry and report, the Board may, in its report, recommend the restriction of the importation of those goods for such period as is specified in the report.

Inquiries conducted by the Board relating to a revision of the Tariff, a proposal for a bounty, a question under the *Customs Tariff (Dumping and Subsidies) Act*, or any complaint that a manufacturer is taking undue advantage of the protection afforded him by the Tariff or by the restriction of the importation of any goods, are held in public, and evidence in such inquiries is taken in public on oath, unless the Board accepts evidence as confidential or in the form of a written statement by a witness on oath. The Board is required to make available to the public the contents of any such written statement except any matter which it accepts as confidential.

The Minister for Trade may also request a Special Advisory Authority to inquire into cases where urgent action may be necessary to protect an Australian industry against import competition pending receipt and consideration of a full report by the Tariff Board. The Special Advisory Authority's report must be submitted to the Minister within thirty days of the making of the request. Temporary protection recommended by a Special Advisory Authority may be imposed, but may only operate for a period of up to three months after the date of receipt of the final report by the Tariff Board on the goods concerned.

**6. Anti-dumping Legislation.**—The *Customs Tariff (Dumping and Subsidies) Act* 1961 provides protection for Australian industry against various forms of unfair trading. Under this Act, dumping duty may be imposed on goods that are sold to Australia at an export price which is less than the normal value of the goods, where this causes or threatens material injury to an Australian industry.

“Normal value” under the Act means:—

- (a) Fair market value in the country of export;
- (b) Price in the country of export to a third country;
- (c) Fair market value in a third country; or
- (d) Cost of production, plus f.o.b. charges, plus selling costs and profit.

Countervailing duty may be levied on goods in respect of which any subsidy, bounty, reduction, or remission of freight or other financial assistance has been, or is being, paid or granted directly or indirectly upon the production, manufacture, carriage or export of those goods. The amount of the countervailing duty in respect of any goods is a sum equal to the amount of the subsidy, bounty, reduction or remission of freight or other financial assistance.

Special duties may be collected also if dumped or subsidized goods are imported to the detriment of the trade of a third country in the Australian market.

Dumping and countervailing duties may be imposed to protect an Australian industry only after inquiry and report by the Tariff Board.

For information concerning the *Customs Tariff (Industries Preservation) Act 1921-1957* reference should be made to Official Year Book No. 47, page 483.

**7. Trade Descriptions.**—The *Commerce (Trade Descriptions) Act 1905-1950* gives power to require the application of a proper trade description on certain prescribed goods imported into or exported from Australia. Goods which must bear a prescribed trade description upon importation into Australia are specified in the *Commerce (Imports) Regulations*. As regards exports from Australia, marking requirements are prescribed in regulations issued under the Act and relating to specified export commodities.

**8. Import Controls.**—*Customs (Import Licensing) Regulations*. A comprehensive system of import licensing was introduced in Australia at the beginning of the second World War under the authority of the *Customs (Import Licensing) Regulations*.

With the end of the War, it was possible to relax the restrictions progressively. However, because of a serious deterioration in Australia's external financial position, import licensing controls were reimposed on 8th March, 1952, on imports from all sources except for goods originating in Papua, New Guinea and Norfolk Island.

The object of import licensing was to limit the value of imports to an annual rate determined by the government in order that payments for imports would not involve an excessive drawing on Australia's overseas exchange reserves. Imports were divided into a number of categories to which different licensing treatment was accorded (largely by the establishment of quotas for individual importers within each category). In general, the nature of goods and their relative importance to the Australian economy were taken into account in determining the licensing rate for particular goods.

Between March, 1952, and February, 1960, import restrictions were relaxed and intensified broadly in line with changes in Australia's balance of payments position.

The import controls were administered without discrimination as to country of origin, with the exception of those relating to imports from Japan and the dollar area. The special restrictions against Japanese imports were removed in July, 1957, and from October, 1955, Australia progressively removed discrimination against imports from the dollar area.

In accordance with the principle of relaxing and removing controls in the light of developments in Australia's balance of payments position, large-scale licensing changes involving the almost complete abolition of controls were made as from 23rd February, 1960. As a result of these changes, some 90 per cent. of total imports were exempted from control. The remaining import licensing controls were removed on 18th October, 1962, with the exception of goods retained under control for reasons associated with the protection of the Australian industries concerned. These goods are broadly described as:—aluminium and aluminium alloy ingot and preliminary shapes; ball bearings; penicillin and streptomycin; timber; used, secondhand or disposal earthmoving and construction equipment.

The administration of the import controls is the responsibility of the Department of Trade, although the issue of import licences is a function of the Department of Customs and Excise at the various ports of the Commonwealth.

**9. Export Controls.**—(i) *Commodity Control*. Section 112 of the *Customs Act* provides that the Governor-General may, by regulation, prohibit the exportation of goods from Australia, and that this power may be exercised by—(a) prohibiting the exportation of goods absolutely; (b) prohibiting the exportation of goods to a specified place; and (c) prohibiting the exportation of goods unless prescribed conditions or restrictions are complied with. Goods subject to this export control are listed in the *Customs (Prohibited Exports) Regulations*.

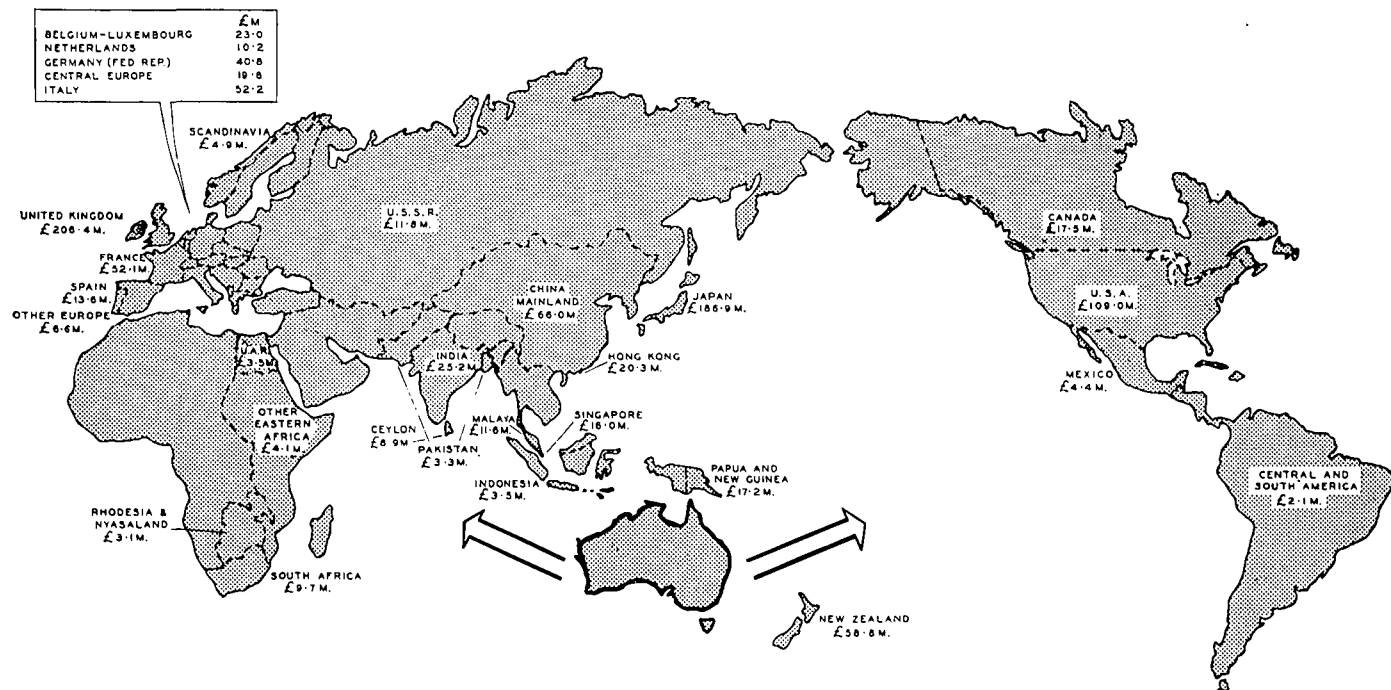

(ii) *Exchange Control*—*Banking Act 1959*. As an integral part of the framework of exchange control, a control over goods exported from Australia is maintained under the provisions of Part III. of the *Banking (Foreign Exchange) Regulations*, to ensure that the full proceeds of such goods are received into the Australian banking system and that these proceeds are received in the currency and in the manner prescribed by the Reserve Bank of

# OVERSEA TRADE: AUSTRALIA, 1936-37 to 1961-62

Australia. This action is complementary to that taken under other parts of the Banking (Foreign Exchange) Regulations and under Part IV. of the *Banking Act* 1959 to control the movement out of Australia of capital in the form of securities, currency and gold.

Export licences are issued subject to terms and conditions specified in the Banking (Foreign Exchange) Regulations, and may be subject to such further terms and conditions as are determined, or may be free from terms and conditions. On the receipt in Australia by the Reserve Bank, or by a bank acting as agent for that Bank, of advice that the foreign currency has been paid to the Reserve Bank or to an agent of the Bank in payment for goods exported in accordance with a licence granted under the regulations, the Bank, or an agent of the Bank, pays the licensee, or such other person as is entitled to receive it, an amount in Australian currency equivalent to the foreign currency received. In addition to commercial transactions involving exports, movements of personal effects are also controlled. Persons leaving Australia for overseas are required to obtain licences to cover their bona fide baggage, personal effects and household effects in any individual case where the gold content thereof exceeds £A.125, or where jewellery and other articles of high intrinsic worth either exceed £A.1,000 in value or have not been the personal property of the passenger for at least twelve months.

10. *Trade Agreements.*—(i) *The United Kingdom.* The original United Kingdom and Australia Trade Agreement (Ottawa Agreement) was signed on 20th August, 1932. Under this agreement, Australia secured preferences in the United Kingdom market for a wide range of Australian export commodities, and in return assumed obligations in respect of tariff levels and the grant of preference to United Kingdom goods.

A new Trade Agreement, designed to replace the original agreement and correct the unbalance in benefits which had emerged in the 25 years of its operation, came into effect on 9th November, 1956. Briefly, this agreement preserves security for Australian exports in the United Kingdom market, but lowers the obligatory margins of preference which Australia extends to the United Kingdom (*see also* page 542).

(ii) *Canada.* The existing agreement between Australia and Canada came into force on 30th June, 1960, replacing an agreement signed on 3rd August, 1931. The agreement provides for Australian goods to receive British Preferential Tariff rates, or better, upon entry into Canada, and for Canada to maintain margins of preference in favour of Australia on a range of commodities. With some exceptions, the agreement specifies that Canadian goods shall receive the benefit of the British Preferential Tariff upon importation into Australia. The agreement continues subject to six months notice.

(iii) *New Zealand.* The existing trade agreement between Australia and New Zealand came into force on 1st December, 1933. The basis of the agreement is, generally, the mutual accord of British Preferential Tariff treatment. The exceptions to this general rule are listed in the schedules to the agreement.

(iv) *Federation of Rhodesia and Nyasaland.* During June, 1955, a trade agreement was negotiated with the Federation. Australia's principal undertaking was to grant an exclusive tariff preference to the Federation on unmanufactured tobacco, a concession formerly accorded only to Southern Rhodesia, under a trade agreement now terminated. The Federation accorded preferential tariff treatment on a wide range of Australian export products. The agreement continues subject to six months notice.

(v) *Federation of Malaya.* A trade agreement with the Federation was signed on 26th August, 1958, and came into force immediately. The agreement gives an assurance that Australia's traditional flour trade will be protected from subsidized or dumped competition. An undertaking is given that any tariff preferences Malaya accords will be extended also to Australia. Australia guarantees free entry for natural rubber so long as the Papua-New Guinea crop is absorbed, and the Federation is assured that natural rubber will not be at a disadvantage compared with synthetic rubber in respect of tariff or import licensing treatment. The agreement continues subject to six months notice.

(vi) *Japan.* An Agreement on Commerce between the Commonwealth of Australia and Japan was signed on 6th July, 1957, and formally ratified on 4th December, 1957. It was provided that the Agreement would remain in force until 5th July, 1960, and thereafter unless prior notice of termination should be given by either government.

Australia received certain specific undertakings. Japan agreed:—

- (a) To accord Australian wool the opportunity of competing in the global quota for wool for not less than 90 per cent. of the total foreign exchange allocation for wool each year, and not to restrict the total foreign exchange allocation for wool beyond the extent necessary to safeguard Japan's external financial position and balance of payments;
- (b) to take no action to vary the present level of duty on wool imports from Australia—initially for a period of three years from date of signature but subsequently extended;
- (c) to admit Australian wheat and barley on a competitive and non-discriminatory basis;
- (d) to accord Australian sugar the opportunity of competing for not less than 40 per cent. of the total foreign exchange allocation for sugar;
- (e) to include Australia as a permitted source of supply for beef tallow and cattle hides on the automatic approval (licensing) list;
- (f) to admit Australian dried skim milk on a competitive and non-discriminatory basis;
- (g) to make reasonable provision for the import of Australian dried vine fruits (raisins, currants and sultanias) in each year of the three-year period.

Since the Agreement was signed, Japanese imports of wool, tallow and dried fruits have been fully liberalized.

Provision exists for either country to suspend obligations under the agreement to the extent and for such time as may be necessary to prevent serious injury to domestic producers as a result of imports of like or directly competitive products from the other country.

The agreement provides that each country shall extend most-favoured-nation treatment to the other in respect of customs duties and similar charges and import and export licensing. Japan will not be entitled to claim the benefit of preferences accorded by Australia to Commonwealth countries and dependent territories.

It was agreed that before the end of the initial three-year period of the agreement, the two governments would explore the possibility of applying the General Agreement on Tariffs and Trade between the two countries. Discussions on this and other aspects of the Agreement were held in October, 1960, and October, 1961, when operation of certain undertakings under the Agreement was extended to September, 1962. Further discussions took place in Canberra in November, 1962. The Agreement itself continues until notice of termination is given by either party.\*

(vii) *Federal Republic of Germany.* An agreement signed in October, 1959, provided for annual import quotas for Australian wheat, coarse grains, frozen mutton and lamb, canned meat, fruits preserved in sugar, canned tropical fruit and wine. The agreement also provided for Australia to be included in all global tenders for whole and skim milk powder, butter, cheese, frozen beef, apples, pears, canned fruits, jam and casein.

The Agreed Minute on the export of flour from the Federal Republic of Germany to certain traditional Australian flour markets was also signed in October, 1959.

(viii) *Indonesia.* This agreement came into operation on 1st July, 1959. It records the desirability of expanding trade between Australia and Indonesia. It also gives special recognition to the importance of the flour trade from Australia to Indonesia. Australia recognizes the importance to Indonesia of its traditional export items to Australia. The agreement is subject to review for extension before 31st May, 1964.

(ix) *Other Countries.* Australia has entered into bilateral agreements with South Africa, Brazil, Czechoslovakia, France, Greece and Switzerland. Summaries of the texts

---

\* For particulars of new trade agreement signed in Tokyo in August, 1963, see Appendix.

of these agreements were given in earlier issues of the Official Year Book. In 1951, Australia entered into a trade agreement with Israel under which each country undertook to accord most-favoured-nation treatment to imports from the other. A similar agreement with Iceland was concluded in 1952.

(x) *The General Agreement on Tariffs and Trade (G.A.T.T.)*. The General Agreement on Tariffs and Trade, of which Australia is an original member, is an international trade agreement which has been in operation since 1st January, 1948.

The objectives of the G.A.T.T. include the expansion of world trade and the raising of living standards throughout the world. Its members work towards these objectives by the reduction of tariffs and other barriers to trade, and by reduction of discrimination between countries through negotiations on a reciprocal and mutually advantageous basis. The essential features of the G.A.T.T. are the schedules of tariff concessions which its members have agreed to apply in tariff negotiations with each other, the application of most-favoured-nation treatment among its members, the avoidance of trade discrimination, and a code of agreed commercial policy rules for fair international trading.

G.A.T.T. is at present being applied pursuant to the Protocol of Provisional Application under which its members apply the commercial policy rules (contained in Part II. of the Agreement) to the fullest extent consistent with legislation existing at the time of becoming members.

Five series of tariff negotiations have been conducted under the provisions of the General Agreement. As a result of these negotiations, Australia has obtained tariff concessions on a number of products of which it is an actual or potential exporter to the individual countries concerned. These concessions were a result both of direct negotiation by Australia and of negotiations by other countries—in the latter case, benefits occur through the operation under the Agreement of the most-favoured-nation principle. It has not, however, been possible to secure many worthwhile concessions on foodstuffs and metals, and some concessions received on these products have been impaired by non-tariff barriers.

In 1954 and 1955, some of the provisions of the G.A.T.T. were revised. The revised G.A.T.T. contains tighter provisions on non-tariff barriers to trade. These barriers are in many respects most significant for some of the export items of interest to Australia. The revised G.A.T.T. also gives more freedom for countries like Australia to revise individual tariff items which had been "bound" against increase in tariff negotiations conducted under the G.A.T.T. In 1958, a Committee was set up to examine problems of expansion of trade in agricultural products and obstacle to the expansion of trade of under-developed countries, and in 1962, groups were set up to study the problems of trade in cereals and meat. Little progress has been made, however, in resolving the problems of expanding trade in agricultural products.

There are at present (January, 1963) 44 Contracting Parties to the Agreement, comprising most of the world's larger trading nations, and further countries are seeking accession or have some provisional association with the G.A.T.T. The Contracting Parties periodically hold plenary sessions to deal with the questions arising out of the administration of the Agreement. The 20th Session was held in October/November, 1962. A permanent Council has been set up to deal with urgent business arising between sessions and gives preliminary consideration to work arising at the sessions.

## § 2. Imperial Preference in the United Kingdom

1. *Preferential Tariff of the United Kingdom*.—A brief summary of the preferential tariff of the United Kingdom in the years prior to 1931 was published in Official Year Book No. 43, page 328. Further details were published in Official Year Book No. 48, page 474.

Since 30th October, 1947, Canada and the United Kingdom have, by an exchange of letters, recognized the rights of their respective Governments to reduce or eliminate the preferences they accord one another without prior consultation or consent.

In 1947, the United Kingdom and Australia adhered to the General Agreement on Tariffs and Trade, which prohibits increases in tariff preferences by either country. This rule, as is the case with the other provisions of the General Agreement, may be waived by a two-thirds majority of the signatories to the agreement.

2. *The Australia-United Kingdom Trade Agreement.*—The provisions and history of the original Australia-United Kingdom Agreement (Ottawa Agreement) were published in Official Year Book No. 43, page 329.

The major provisions of the current agreement (operative since 9th November, 1956) which affect Australia's position in the United Kingdom market are as follows.

- (a) Continued free entry for those Australian goods in which Australia has an active trade interest, and which were accorded free entry immediately prior to the new agreement.
- (b) A guaranteed minimum margin of preference in the United Kingdom Tariff on all items so treated in the previous agreement plus an extension of this guarantee to several items on which the margin of preference, although in force, was not bound to Australia. This latter group comprised currants, egg powder and egg pulp, jam, rice, tomato juice, pineapple juice and coconut oil. A selection of the items on which Australia receives a bound margin of preference and the extent of that preference is as follows (all values in sterling):—butter (15s. a cwt.); cheese (15 per cent. *ad val.*); canned peaches, pears and apricots (12 per cent. *ad val.*); raisins (8s. 6d. a cwt.); eggs in shells (1s. to 1s. 9d. a great hundred (10 dozen)); milk powder (6s. a cwt.); sweetened condensed milk (5s. a cwt.); apples (4s. 6d. a cwt. in season); honey (5s. a cwt.); flour (10 per cent. *ad val.*); light wine (2s. a gallon); heavy wine (10s. a gallon at present duty rate).
- (c) All rights under the Ottawa Agreement in respect of meat are maintained.
- (d) Australia receives an assured wheat market of at least 750,000 tons f.a.q. wheat or flour equivalent annually. Any Australian high-protein wheat sold to the United Kingdom is not counted against this obligation.
- (e) There is provision for full consultation between the two Governments on such matters as agricultural production and marketing, transport and communication, the disposal of surpluses and restrictive business practices.
- (f) The agreement shall be the subject of re-negotiation between the two Governments during the fifth year of its operation. (By agreement between the two governments this re-negotiation has been postponed.)

### § 3. Trade Commissioner Service

The stimulation of interest abroad in Australia's exports is an important government activity in which the Australian Trade Commissioner Service plays a prominent part. The origin of the Service dates back to 1921, when the first Trade Commissioner was appointed to Shanghai. In the following year, a second Commissioner was appointed to Singapore. These appointments, however, were terminated shortly afterwards.

In 1929, a Trade Commissioner post was opened at Toronto. Wellington was opened five years later. The *Trade Commissioners Act* 1933 provided for the establishment of an Australian Government Trade Commissioner Service. In 1935, official trade representation was established at Batavia (now Djakarta), Shanghai and Tokyo. Cairo, New York and Calcutta posts were opened between 1937 and 1939 and the Singapore post was established in 1941.

After the War, the service increased steadily to take care of Australia's expanding export interests and the growing diversity of our export commodities. By December, 1962, there were 37 Trade Commissioner posts in 28 countries, new posts having been opened in Beirut (Lebanon), August, 1961, Lima (Peru), October, 1961, Caracas (Venezuela), March, 1962 and Athens (Greece), July, 1962. With the continuing need to take advantage of new markets, the opening of additional posts is being considered.

In 1957, Australia's official commercial representation overseas was extended by the introduction of a system of government Trade Correspondents. These men, who as a rule already reside in particular centres overseas, are engaged on a part-time basis to carry out market research, arrange introductions between buyer and seller, and generally promote Australia's trade interests in the same way as Trade Commissioners. Each Trade Correspondent operates under the general direction of the nearest Trade Commissioner.

The first two Australian Trade Correspondents were appointed in 1957 at Montevideo (Uruguay) and Nairobi (Kenya) (since replaced by a Trade Commissioner). In 1958, four more were appointed at Suva, Honolulu, Mauritius and Mexico City. Additional appointments have been made at Taiwan, Malta and Madrid. In addition, Marketing Officers have been appointed at Los Angeles and Rangoon. Further limited expansion of this form of commercial representation is contemplated.

Trade Commissioners and, to a lesser extent, Trade Correspondents, are responsible for commercial intelligence in their territories. Particular facilities provided for Australian exporters and export organizations include the following:—

- (a) Surveys of market prospects;
- (b) Advice on selling and advertising methods;
- (c) Arranging introductions with buyers and agents;
- (d) Providing reports on the standing of overseas firms;
- (e) Advice and assistance to business visitors;
- (f) Helping to organize and carry through trade missions, trade displays, newspaper supplements and other promotion and publicity media;
- (g) Providing information on import duties, import licensing, economic conditions, quarantine and sanitary requirements, and other factors affecting the entry and sale of goods;
- (h) Helping to attract desirable investment.

In some countries, Trade Commissioners also participate in inter-governmental negotiations in the economic and commercial fields. In certain countries where there is no diplomatic or consular mission (Trinidad, Hong Kong, the Federation of Rhodesia and Nyasaland, Lebanon, Peru and Venezuela), he is called upon to act as the Australian representative.

Trade Commissioners usually enter the Service from either the commercial world or the public service, and applications for entry into the Service are called for periodically by public advertisement. In the more important posts, it is the practice for the Trade Commissioner to be supported by an Assistant Trade Commissioner, who normally qualifies at a later stage for appointment as a Trade Commissioner.

The Trade Commissioner Service is administered by the Commonwealth Department of Trade (as distinct from the diplomatic and consular services, administered by the Department of External Affairs), but in countries where there is an Australian diplomatic or consular mission it is the practice for Trade Commissioners to be attached to the mission and to hold an appropriate diplomatic or consular rank (Commercial Counsellor, Commercial Secretary or Commercial Attaché).

The overseas trade representation is shown in Chapter XXVIII. International Relations.

#### § 4. Australian Trade Missions

Over the last decade, Trade Missions have become an integral part of the Commonwealth Government's campaign to develop and expand Australia's export trade.

They have proved successful in creating an awareness, especially in new markets, of Australia as a producer of quality primary and secondary products, in establishing Australia as a source of supply, and in establishing a basis for long-term business, as well as producing valuable export business from "on the spot" trading. Trade Missions have been directly responsible for substantial and continuing increases in our export earnings.

Since 1954, Australia has sent overseas fourteen major Trade Missions, three Trade Ships, five Trade Survey Missions and two Specialized Selling Missions. The countries visited include South Africa, East Africa, West Africa, the Rhodesias, Singapore, Malaya, India, Ceylon, Thailand, Hong Kong, the Philippines, Japan, British North Borneo, New Guinea, the Solomons, Fiji, New Caledonia, United States of America, Canada, Pakistan, New Zealand, countries on the Arabian Gulf, Egypt, Saudi Arabia, Jordan, Lebanon, Syria, Turkey, Cyprus, Greece, Malta, Venezuela, Colombia, Ecuador, Peru, Chile, Argentina, Uruguay, Brazil and the West Indies. Some of these countries have been visited more than once.

There are different types of trade missions. The Trade Survey Mission is designed purely to carry out a survey of a particular area, obtain commercial information, assess the market potential for Australian commodities, and recommend a programme of trade publicity and promotion in the area. This may or may not include the organization of a full scale trade mission to visit the area. A trade survey mission usually comprises five or six members.

The major Trade Mission usually comprises between 20 and 40 businessmen from all sectors of commerce, agriculture, finance and industry, together with Department of Trade representatives. The function of major Trade Missions is firstly to sell, and secondly to publicize and promote Australia as an exporting nation. These missions rely entirely on the selling and negotiating capacities of the businessmen who participate.

More recently, the Department has introduced a new type of specialized trade mission. These missions are smaller and are confined to one industry at a time. Recently a Building Industry Materials Mission visited Singapore and Malaya, and a Food Survey Mission visited Japan early in 1963.

#### § 5. Export Payments Insurance Corporation

The *Export Payments Insurance Corporation Act* No. 32 of 1956 established the Corporation with the objective of protecting Australian exporters against risks of loss arising from non-payment of their overseas accounts.

The Corporation is charged to be self-supporting, that is, over a period it is to operate at neither a profit nor a loss. It operates on principles similar to those of any other form of insurance, in as much as in return for payment of a premium the exporter can claim on the Corporation in the event of non-payment by his buyer for any of the reasons set out in his policy. There is no overlap with normal insurance facilities, since the Corporation does not cover risks which can normally be insured with commercial insurers.

The main risks of loss against which the Corporation insures are the "commercial" risks of the insolvency or protracted default of the buyer and "political" risks. The latter include exchange transfer delays; the imposition of government regulations which prevent the import of goods into the buyer's country; war or revolution in the buyer's country; and generally any other cause not being within the control of the exporter or the buyer, and which arises from events occurring outside Australia. Prior to December, 1959, the Corporation could extend cover only to 85 per cent. for all types of risks insured. From that time, however, cover on the "political" risks was increased to a maximum of 90 per cent. for the amount of loss in the pre-shipment period and a maximum of 95 per cent. in the post-shipment period. The cover for "commercial" risks remains at 85 per cent.

The initial capital of the Corporation was £500,000 and the maximum liability limit of the Corporation was £25,000,000. In April, 1959, these limits were doubled to enable the Corporation to meet fully demands of the Australian exporters for this facility.

The Corporation itself does not provide finance for exporters, but the stated policy of the trading banks is that E.P.I.C. guarantees considerably reduce the risks involved in the export trade, and this can assist the exporter in obtaining such finance as he requires.

Since the first policy was issued in September, 1957, Australian exporters have made increasing use of the facilities of the Corporation. On 31st March, 1963, the Corporation had 363 policies current to the value of over £42,500,000. The Corporation has issued policies covering exports to over 142 countries, and has insured a wide range of Australian exports.

A Consultative Council of leading figures in the fields of banking, commerce and industry has been appointed to advise the Corporation on its activities.

## § 6. European Economic Integration

1. *European Economic Community.*—(i) *Origin and Aims.* The European Economic Community, often referred to as the European Common Market or simply as the Common Market, was established under the Treaty of Rome which was signed on 25th March, 1957, and entered into force on 1st January, 1958. The members of the Community are Belgium, France, the Federal Republic of Germany, Italy, Luxembourg and the Netherlands (commonly referred to as the Six).

The preamble to the Treaty of Rome, which states the general aims of its signatories, begins by recording their determination to establish the foundations of an ever-closer union among the European peoples. Article 1. states: "It shall be the aim of the Community, by establishing a Common Market and progressively approximating the economic policies of Member States, to promote throughout the Community a harmonious development of economic activities, a continuous and balanced expansion, an increased stability, an accelerated raising of the standard of living and closer relations between its Member States."

For these purposes, the Treaty provides for the elimination, over a transitional period of 12 to 15 years (commencing on 1st January, 1958), of all tariffs, quantitative restrictions and other trade barriers among member states. At the same time, a common external tariff and a common commercial policy is to be instituted towards third countries, and a common agricultural policy is to be established. Parallel with these measures, the Treaty requires action to be taken in a number of fields towards ensuring the integration of the six economies. The Treaty also provides for the association of certain overseas countries with the Community, with a view to increasing trade and pursuing joint efforts towards economic and social development. These are the countries and territories which, when the Treaty was signed, had a special relationship with Belgium, France, Italy or the Netherlands. The arrangements for this association, which are set out in the Treaty itself, are supplemented by an Implementing Convention. The original Implementing Convention expired on 31st December, 1962, and a new one has been drawn up.

(ii) *Applications to join E.E.C.* Any European state may apply to join the E.E.C. (Article 237). In addition, any country or union of states or an international organization may seek association with the Community (Article 238). Since the Treaty was signed, one country, Greece, has become associated with the E.E.C., but in a form which looks toward eventual full membership.

Britain commenced negotiations in 1961 with the member states to determine the conditions on which it might enter the Community. Other members of the European Free Trade Association (*see below*), as well as Ireland, Spain and Turkey have applied, in some cases for full membership, in other cases to enter into association. Britain also entered into negotiations with a view to joining the European Coal and Steel Community and the European Atomic Energy Community (*see below*) at the same time as the E.E.C.

In January, 1963, negotiations concerning Britain's entry into the E.E.C. were discontinued.

(iii) *Institutions of E.E.C.* The principal institutions of the Community are as follows:—a Council of Ministers (one from each member State), which makes decisions on basic policy, deciding many things on proposals from the Commission; the European Economic Commission (of nine members, each appointed for four years), which acts in the general interest of the Community through the formulation of proposals for the Council, by the exercise of

certain powers of decision and by ensuring the application of the provisions of the Treaty; a European Assembly (known as the European Parliament) which is at present composed of 142 members drawn from the national Parliaments of the Six and which, besides asking questions of the Commission and debating its annual report, has the power to remove the Commission by a two-thirds vote of censure; the Court of Justice, which interprets the Treaty and regulations of the E.E.C. and acts also for the European Coal and Steel Community, and Euratom (*see below*).

(For details of Australia's trade with the E.E.C. countries, *see pp. 551-2.*)

**2. European Coal and Steel Community.**—The European Coal and Steel Community (E.C.S.C.), which came into operation on 10th August, 1952, was the first effort at economic integration (though confined to coal and steel) made by the six European States which later set up the E.E.C. It continues in existence alongside the E.E.C.

**3. Euratom.**—The third of the three "European Communities" of Belgium, France, the Federal Republic of Germany, Italy, Luxembourg and the Netherlands, is the European Atomic Energy Community ("Euratom"). The treaty establishing Euratom, which was signed at the same time as the treaty to establish the European Economic Community and which also entered into effect on 1st January, 1958, provides for the co-ordination of nuclear research and power projects among the Six.

**4. European Free Trade Association.**—After the breakdown at the end of 1958 of the negotiations to set up an industrial free trade area in Western Europe, seven countries which had not joined the E.E.C. met together and formed the European Free Trade Association (E.F.T.A.). This Association, which entered into effect in 1960, comprises Austria, Denmark, Norway, Portugal, Sweden, Switzerland and the United Kingdom. Finland is an associate member of E.F.T.A. The members of this Association have agreed to eliminate in ten years tariffs and other obstacles to their trade in industrial (i.e. non-agricultural) products with each other, but each of them preserves its own external tariff against non-member countries. In June, 1961, the members of E.F.T.A. agreed that "the Association would be maintained at least until satisfactory arrangements have been worked out in negotiations to meet the various legitimate interests of all Members of E.F.T.A., and thus enable them all to participate from the same date in an integrated European market."

(For details of Australia's trade with E.F.T.A. countries, *see pp. 551-2.*)

## § 7. Method of Recording Imports and Exports

**1. Source of Statistics.**—Oversea trade statistics are compiled from documents obtained under the *Customs Act* 1901-1960 and supplied to the Commonwealth Bureau of Census and Statistics by the Department of Customs and Excise. Certain items are excluded for which customs entries are not required. *See Sub-para. (viii) Balance of Payments, page 548.*

**2. Customs Area.**—The area to which all oversea trade statistics issued by this Bureau apply is the whole area of the Commonwealth of Australia. Non-contiguous territories are treated as outside countries, and trade transactions between Australia and these non-contiguous territories are part of the oversea trade of Australia. Such transactions are shown separately, i.e. the trade of Australia with each particular country is separately recorded and tabulated.

**3. The Trade System.**—There are two generally accepted systems of recording oversea trade statistics, namely (a) special trade and (b) general trade. Statistics of both are published by the Bureau, although greater emphasis is placed on general trade. The Statistical Office of the United Nations defines the two systems as follows.

"*System of Trade.* Two systems of recording trade are in common use, differing mainly in the way warehoused and re-exported goods are recorded.

- (a) *Special Trade.* Special imports are the combined total of imports directly for domestic consumption (including transformation and repair) and withdrawals from bonded warehouses or free zones for domestic consumption. Special exports comprise exports of national merchandise, namely, goods wholly or partly produced or manufactured in the country, together with exports of nationalized goods. (Nationalized goods are goods which, having been included in special imports, are then exported without transformation.)
- (b) *General Trade.* General imports are the combined total of imports directly for domestic consumption and imports into bonded warehouse or free zone. General exports are the combined total of national exports and re-exports. Re-exports, in the general trade system, consist of the outward movement of nationalized goods plus goods which, after importation, move outward from bonded warehouse or free zone without having been transformed.

*Direct transit trade*, i.e., goods merely being transhipped or moving through the country for purposes of transport only, is excluded from the statistics of both special and general trade."

The tables which follow refer to general trade, except for those appearing in § 17, para. 2, which refer to imports cleared for home consumption.

4. **Statistical Classification of Imports and Exports.**—Statistics of overseas imports and exports from which the summary tables in this issue of the Official Year Book have been extracted were compiled according to the revised classification which came into operation on 1st July, 1945. This classification is designed to allow for the inclusion of items which become significant with varying trade conditions, and in 1961–62 provided for over 3,000 import items and over 1,500 export items.

5. **The Trade Year.**—From 1st July, 1914, the statistics relating to overseas trade have been shown according to the financial year (July to June). Prior to that date, the figures related to the calendar year. A table is included in § 18 showing the total value of imports and exports in the calendar years 1958 to 1962 inclusive.

6. **Valuation.**—(i) *Imports.* The recorded value of goods imported from countries beyond Australia as shown in the following tables represents the amount on which duty is payable or would be payable if the duty were charged *ad valorem*.

Section 154 (1) of the *Customs Act* 1901–1960 provides that "when any duty is imposed according to value, the value for duty shall be the sum of the following:—

- (a) (i) the actual money price paid or to be paid for the goods by the Australian importer plus any special deduction, or
- (ii) the current domestic value of the goods, whichever is the higher; and
- (b) all charges payable or ordinarily payable for placing the goods free on board at the port of export."

"Current domestic value" is defined as "the amount for which the seller of the goods to the purchaser in Australia is selling or would be prepared to sell for cash, at the date of exportation of those goods, the same quantity of identically similar goods to any and every purchaser in the country of export for consumption in that country". *The recorded values of Australia's imports, as shown throughout this and other chapters of this issue of the Official Year Book, are therefore "transaction value (f.o.b.)" or "domestic value (f.o.b.)", whichever is the higher. These values are f.o.b. port of shipment Australian currency.*

(ii) *Exports.* Since 1st July, 1937, the following revised definitions of f.o.b. values have been adopted for exports generally.

- (a) Goods sold to overseas buyers before export—the Australian f.o.b. port of shipment equivalent of the price at which the goods were sold (e.g., as regards wool, the actual price paid by the overseas buyer plus the cost of all services incurred by him in placing the wool on board ship).

- (b) Goods shipped on consignment—the Australian f.o.b. port of shipment equivalent of the current price offering for similar goods of Australian origin in the principal markets of the country to which the goods were dispatched for sale (as regards wool, the f.o.b. port of shipment equivalent of the current price ruling in Australia will normally provide a sufficient approximation to the f.o.b. port of shipment equivalent of the price ultimately received).

Exporters are required to show all values in terms of Australian currency and to include the cost of containers.

An account of the bases of valuation in operation prior to 1st July, 1937, was given on page 469 of Official Year Book No. 39.

7. *Inclusions and Exclusions.*—(i) *Stores.* Prior to 1906, goods shipped in Australian ports on oversea vessels as ships' stores were included as exports. From 1906, ships' and subsequently aircraft stores have been specially recorded as such, and omitted from the tabulation of exports. A table showing the value of these stores shipped each year since 1956–57 is shown on page 562.

(ii) *Outside Packages.* Outside packages (containers, crates, etc.) have always been included as a separate item in the tabulation of imports, but, except for those received from the United Kingdom, a classification according to country of origin has been available only since 1950–51. For exports, however, the value recorded for each item includes the value of the outside package.

(iii) *Trade on Government Account.* Imports and exports on Government account are treated as normal transactions and are an integral part of oversea trade transactions.

(iv) *Currency.* Notes and coins are included in the oversea trade statistics at their commodity value only.

(v) *Gold Content of Ores and Concentrates.* The value of ores and concentrates imported and exported includes the value of the gold content. The latter is not recorded separately for purposes of inclusion in imports and exports of gold.

(vi) *Migrants' Effects.* Migrants' effects are included in imports and exports.

(vii) *Direct Transit Trade.* Particulars of direct transit trade through Australia are not recorded.

(viii) *Balance of Payments.* Statistics relating to oversea trade do not measure Australia's total balance of payments during the period shown. Particulars of other transactions entering into the balance of payments, for example, freight charges and oversea travel, payment of dividends, profits and interest and government expenditure overseas are provided in the statistical bulletin *Balance of Payments: Quarterly Summary* issued by the Commonwealth Statistician (see also § 20, p. 567). For items such as naval ships, merchant vessels trading overseas, aircraft for use on oversea routes, uranium and certain materials for inter-governmental defence projects, no customs entries are recorded, but these transactions are taken into account in estimating the balance of payments.

8. *Countries.*—(i) *Imports.* From 1st January, 1905, in addition to the record of the countries whence goods arrived directly in Australia, a record of the countries of their origin was kept, as it was considered that classification of imports according to country of origin was of greater interest and value than classification according to country of shipment. Up to and including the year 1920–21, imports continued to be classified both according to country of shipment and according to country of origin, but the former tabulation was discontinued as from the year 1921–22. "Country of origin" referred to in import tables should be taken to mean the country of production.

(ii) *Exports.* In the export sections of tables in this chapter, "country" refers to the country to which the goods were consigned so far as this can be determined at the time of export.

9. Quantities.—Where quantities are shown, they are generally, but not invariably, expressed in terms of the normal trade unit. Where “cental” is used, the unit is equivalent to 100 lb. avoidupois. Quantities are not tabulated in respect of items for which there is no appropriate unit of quantity (e.g. an item which covers a number of commodities and cannot be recorded under a uniform unit of quantity).

10. Pre-federation Records.—In the years preceding Federation each State recorded its trade independently, and in so doing did not distinguish other Australian States from foreign countries. The aggregation of the records of the several States is necessarily the only available means of ascertaining the trade of Australia for comparison with later years, but the results obtained may be subject to error, since past records of values and the direction of imports and exports were not on uniform lines. Imports and exports for years prior to Federation may be found in issues of the Official Year Book prior to No. 41. On the introduction of the *Customs Act* 1901, the methods of recording values were made uniform throughout the States.

### § 8. Total Oversea Trade

1. Including Gold.—The following table shows the total trade (including gold) of Australia with overseas countries from 1901 to 1961–62. The period 1901 to 1955–56 has been divided into five-year periods, and the figures shown represent the annual averages for the periods specified. Figures for the individual years were published in Official Year Book No. 40 and earlier issues, but figures for imports in issues prior to No. 37 were expressed in British currency.

VALUE OF OVERSEA TRADE: AUSTRALIA  
(INCLUDING GOLD)  
(£A. f.o.b.)

Period	Imports	Exports	Total	Excess of exports(+) or imports(–)	Value per head of population

1960–61.. ..	1,087,577	968,843	2,056,420	– 118,734	104.6	93.2	197.8
1961–62.. ..	884,746	1,077,284	1,962,030	+ 192,538	83.4	101.6	185.0

(a) Prior to 1906, ship's stores were included in exports. For the value of such goods shipped on overseas vessels and aircraft during each of the years 1957–58 to 1961–62, see table on p. 562.

A graph showing the overseas trade of Australia from 1936–37 to 1961–62 appears on page 533.

2. **Excluding Gold.**—The fluctuations in recent years in merchandise trade (including silver and bronze as merchandise) are shown more clearly in the following table, from which all gold movements have been excluded.

**VALUE OF OVERSEA TRADE: AUSTRALIA**  
(EXCLUDING GOLD)  
(£A. f.o.b.)

2. According to Major Groups of Countries.—The following table shows the trade of Australia with major groups of countries during the years 1960-61 and 1961-62.

The sterling group includes the United Kingdom, its colonies and dependencies, all other countries of the British Commonwealth (except Canada and the New Hebrides Condominium) and certain non-British countries of which the most important are Burma, Bahrain Islands, other Arabian States (excluding Saudi Arabia and Yemen), Iceland, and the Republic of South Africa.

The European Economic Community group consists of Belgium-Luxembourg, France, Federal Republic of Germany, Greece, Italy and the Netherlands.

The European Free Trade Association group in the following table consists of the following countries: Norway and Portugal and their dependencies, Austria, Denmark, Finland, Sweden and Switzerland.
